The betrothal was effected in any of the three following ways: (1) by the man handing a coin (a peruṭah, the smallest Palestinian coin, was sufficient for the purpose) or its equivalent to the woman in the presence of two competent witnesses, and pronouncing the words "Be thou consecrated to me," or any other phrase conveying the same idea; (2) by the man handing a contract ("sheṭar") to the woman containing the same formula; (3) by actual cohabitation between groom and bride. This last form of betrothal was discouraged by the Rabbis; and sometimes such a procedure met with severe punishment at the hands of the authorities. The manner of betrothal first mentioned seems to have been the most common, but later this was modified, so that instead of money the man gave his bride a ring, plain, and made of gold, the value of which was constant and well known (Tos., Ḳid. 9a, *s.v.* "Wehilketa"; Eben ha-'Ezer, 27, 1; 31, 2, Isserles' gloss; see BETROTHAL). The act of betrothal might be performed also by proxies appointed either by the bride or by the groom or by both; but it was recommended that the contracting parties be present at the ceremony ("Yad," Ishut, iii. 19; Eben ha-'Ezer, 35, 36). After betrothal the parties were regarded as man and wife; and the act could be dissolved only by death or by a formal bill of divorce. If the woman proved unfaithful during the period of betrothal she was treated as an adulteress, and her punishment (that of stoning; Deut. xxii. 23, 24; Sanh. 66b) was considered to be much more severe than that (strangulation) inflicted upon the unfaithful married woman (Deut. xxii. 22; Sanh. 52b). The parties were not, however, entitled to conjugal rights, nor were they bound by the obligations of married life (see HUSBAND AND WIFE).

After the lapse of a certain period from the time of betrothal (twelve months if the bride was a virgin and a minor, and thirty days if she was an adult or a widow; Ket. 57b), during which the bride could prepare her trousseau, the marriage proper was celebrated. This was attended with the ceremony of home-taking ("liḳḳuḥin" or "nissu'in") and isolation of the bridal pair in the bridal chamber ("ḥuppah"). From that time they became husband and wife, even if there was no cohabitation. Various ceremonies attended the act of marriage (see MARRIAGE CEREMONY). An important feature was the handing over of the marriage contract ("ketubah") to the bride. In later times the two stages of marriage were combined, a custom universally followed at the present time.

MARRIAGE SETTLEMENT. See KETUBAH.

MARRIED WOMAN. See WOMAN.

MARSEILLES (מרשיליה or מרסיליא): Seaport of southern France with about 5,000 Jews in a population (1896) of 420,300. It had a Jewish colony as early as the fifth century, and in 567 a number of exiles from Clermont, Auvergne, sought refuge there from the intolerance of Bishop Avitus. Pope Gregory intervened in their behalf in 591, reproaching Theodore, Bishop of Marseilles, for having attempted to convert them by force and not by suasion. Benjamin of Tudela says ("Itinerary," i. 6) that when he passed through the city, about 1165, the Jewish community numbered 300 members, who worshiped in two synagogues. In the thirteenth century the Jews carried on an extensive commerce and had considerable relations with the East. While they are called "citizens of Marseilles" ("cives Massiliæ"), as appears from the compact made in 1219 between the city and the bishop in regard to the municipal franchises, and from the agreement between the inhabitants of Marseilles and the Duke of Avignon in 1257, this does not seem to denote that they had equal rights with their Christian fellow citizens. Their condition, which seems to have been favorable during the earlier parts of the Middle Ages, underwent a change in 1262, when the city was obliged to capitulate in consequence of an insurrection against the Duke of Anjou, Count of Provence, to whom the Jews were surrendered as property which he might tax at pleasure. The count, on the other hand, was well disposed toward the Jews, and in March, 1276, issued a severe edict against the inquisitors who had compelled them to wear a badge of greater size than the one worn by them since the Lateran Council of 1215, and extorted large sums from them under the pretext of fines.

Disabilities.

Still, although theoretically the Jews were citizens, certain passages of the laws make it clear that they were not treated as such. After the age of seven they were obliged to have on their breasts a disk of some colored material, as large as the hand, while married Jewesses were required to wear special veils, "orales," under penalty of a fine of five sous. As in other cities of the Provence, the Jews of Marseilles were forbidden to testify against Christians if their testimony was challenged, or to work on Sundays and Christian holy days. They were likewise prohibited from going to the baths more than once a week, from journeying to Alexandria, or from embarking in groups of more than four on the same ship. Jewish passengers on a vessel, moreover, were forced to refrain from meat on days when the Christian passengers abstained.

Toward the end of the thirteenth century a Jew living near the episcopal palace arranged some Purim games which the Christians regarded as a mockery of their religion, and the bishop, making the whole community responsible, imposed a heavy fine upon it (Ibn Adret, *Responsa*, iii. 389).

Fourteenth Century.

The fourteenth century was a golden age for the Jews, for they were placed under the absolute protection of the municipality. The municipal council did not permit the statutes to be construed in any way to their disadvantage, nor did it hesitate to oppose the guardian of the Jews appointed by the Count of Provence, or the most hostile of the clergy, to secure for the Jews the security promised them by the laws of the city. They were permitted to engage in the same trades as the Christians; most them were brokers, wine-, or cloth-merchants, or tailors. There was also one "magister lapidis" or stone-cutter. Another Jew, Crescas Davin, called Sabonerius, is said to have introduced the soap industry in 1371, and he was succeeded by his son Solomon Davin.

Although the majority of the Jews were engaged in commerce, there were also a number of physicians (Barthélemy, "Les Médecins à Marseille Avant et Pendant le Moyen Age," Marseilles, 1883; reprinted nearly entire in "R. E. J." vii. 293, 294).

The counts of Provence intervened in behalf of the Jews whenever occasion demanded. Thus, in 1320 King Robert enjoined his royal officers to afford special protection to the Jews, to assist them under all circumstances, and to receive them at need either in his castles and fortresses or in theirs; and in 1331 and 1332 Philippe de Sanguinet, seneschal of Provence, decreed that the Jewish communities in general and all Jews in particular should be protected against every vexation and that their property should be guarded by royal officers.

Under Provençal Rule.

No complaint seems ever to have been brought against the community as a whole. In 1357 it helped to defend the city, threatened by a siege; in 1385 it contributed fifty florins to a loan which the citizens of Marseilles found themselves obliged to contract. In return, Queen Marie, in 1387, and her son Louis II. in 1389, confirmed the liberties, privileges, and immunities of the Jews. As long as Provence was independent the counts refused to listen to the exaggerated complaints against the Jews, who continued to live under benevolent municipal statutes and franchises. In 1422 Queen Yolande of Naples, Countess of Provence, forbade her royal officers to accept certain personal property from the Jews, under penalty of forfeiture of office and of payment of 100 marks fine silver. In 1463 King René, who ten years previously had entertained certain charges which had been brought against the Jews without investigating them, declared that they had a right to his special protection, since they could count on it alone, not being able to rely on that of the Church. In 1481, on the complaint of two Jewish deputies, Solomon Botarelli and Baron de Castres, René closed the baptistery of Saint-Martin, where a Christian woman had forcibly baptized a young Jewish girl, and he obliged the parishioners to have their children baptized in the Church of St. Jacques de la Corrigerie.

Projects of Expulsion.

In 1484 the lawless bands which overran the cities of Provence, attacking and pillaging the Jews, assailed the community of Marseilles, and in the following year the inhabitants of the city, accusing the Jews of usury and of various imaginary crimes, fell upon them and massacred a large number, demanding that King Charles VIII. immediately expel the remainder from Provence. The king, not daring to comply at once with a demand so contrary to the tolerance hitherto characterizing the rule of the counts of Provence, decreed that all Jews desiring to depart should be permitted to leave the city unmolested, provided they had fulfilled all their engagements with the Christians. The municipal council, ignoring this royal command, forbade any Jew or Jewess to leave with property. The Jews protested vigorously to the provost and the municipal council against this unjustifiable action, and demanded the protection of the magistrates. These protests must have been in so far effective as to secure them a respite, for in 1492 the community was still numerous enough to ransom 118 Aragonian Jews captured by the pirate Bartholemei Janfredi, paying the sum of 1,500 écus, which it borrowed from a Christian. Eight years later a royal decree of banishment from Marseilles was issued against the Jews, though it was not carried out completely until about 1501.

In the seventeenth and eighteenth centuries some Jews had again settled at Marseilles. Among them were Villaréal, who was expelled in 1682 for having induced some Jewish families to come to the city and having opened a synagogue in his house; Lopez, originally from Bordeaux, who was driven out in 1711; and Rouget, who, in virtue of a residence of fifteen years at Marseilles, claimed in 1771 the right of engaging in marine commerce.

Since 1808 Marseilles has been the seat of a consistory, whose administrative authority extends over all the Jewish communities of southern France.

Ghetto.

The Jewish quarter, with its principal street, which was called "Carreria Jusatarie" or "Carreria Judæorum," and its lanes and byways, formed a kind of island designated "Insula Juzatarie," and occupied a considerable area. In 1350 the Jews planned to leave their ghetto, but the inquisitor objected and obliged them to remain. When the city was taken by King Alphonso V. of Aragon, in 1423, the Jews suffered especially, and most of them fled from Marseilles, seeking refuge in various places of Provence. Some returned within a short time, under the protection of a safe-conduct, while the remainder

Synagogues and Cemeteries.

were enjoined to return within fifteen days, under penalty of furnishing their coreligionists with a sufficient security to guarantee the payment of the communal debt incurred before the disasters of 1423. The Jews had two synagogues in the Middle Ages, one "Scola Major," and the other "Scola Minor." A Latin document mentions a third synagogue in an entirely different quarter. The present temple was built in 1865. In medieval times the Jewish cemetery was situated on the Mont-Juif or Montjusieu, but after the expulsion of the Jews King Charles VIII. presented the site to a citizen of Marseilles. In 1783 Solomon de Silva and Mordecai Ḥay Darmon bought a plot in the Quartier du Rouet. This served as a cemetery for the Jews until 1804, when it no longer sufficed; and a larger piece of land was bought in the vicinity ("R. E. J." xiv. 302). At present (1904) the community of Marseilles owns two cemeteries, one, now closed, near the Place Castellane, and the other in the Quartier de St. Pierre.

The hospital was situated in the vicinity of the large synagogue, and the two almshouses were under the supervision of rectors. One of them was called "Saraca." The Jew Bonias Salemas left it in 1426 a bequest of four measures of pure wine annually as a perpetuity; to the other one he bequeathed, in a similar manner, a measure of oil to be delivered every year on the eve of the fast of Kippur. The women's bath, called "Lo Banhador de las Fennas," was also situated in the ghetto. The Jews had their own slaughter-house, called "Lo Masel de los Jusieus."

Scholars.

In the second half of the twelfth century Marseilles was an important center for Jewish studies. Benjamin of Tudela styles it "the city of geonim and sages." In 1194 it was to these "scholars and learned men" that Maimonides addressed his letter on astrology (comp. Maimonides, "Iggerot," ed. Amsterdam, p. 6). The following are some of the scholars of Marseilles: twelfth century: Simeon b. Antoli or Anatole and his brother Jacob, Isaac b. Abba Mari, Moses b. Samuel ibn Tibbon; thirteenth century: Jacob b. Machir (called also Profatius Judæus), Shem-Ṭob b. Isaac, Joseph of Marseilles, Solomon Nasi b. Isaac Cayl, Jonathan, Isaac of Marseilles, Samuel b. Judah or Meles Bonjudas; fourteenth century: Solomon b. Joseph, Nissim b. Moses, Shem-Ṭob Falcon, and Joseph b. Johanan; fifteenth century: Judah b. David (called also Maestre Bonjudas Bondavi), and Jacob b. David Provençal. Of the modern rabbis may be noted Jonas Weyl (d. 1903) and his successor, the present (1904) incumbent, Honel Meiss.

D. S. K.

MARSHALL, LOUIS: American lawyer and communal worker; born at Syracuse, N. Y., Dec. 14, 1856; educated at the Syracuse high school and at the Columbia College Law School. He entered upon the practise of his profession in Syracuse in 1878, removing to New York city in 1894. As a member of the bar Marshall has attained a distinguished position. He was appointed by Governor Hill, in 1890, a member of the commission to revise the judiciary article of the constitution of New York, and was elected to the New York Constitutional Convention of 1894, serving as vice-chairman of the judiciary committee and chairman of the committee on "future amendments." He has served also as vice-president of the New York State Bar Association and has written numerous articles and essays on professional subjects.

Marshall is active also as a Jewish communal leader. He is a director and chairman of the executive committee of the Jewish Theological Seminary of America, and is a director of the Congregation Emanu-El, the Educational Alliance, and the Jewish Protection and Aid Society (all of New York), and of the New York branch of the Alliance Israélite Universelle. Marshall has taken especial interest in the establishment of a Jewish "protectory" for delinquent Jewish children, and has occasionally delivered addresses and lectures on Jewish subjects.

A.

MARTIN, RAYMUND: Spanish Christian theologian; born in the first half of the thirteenth century at Subirats in Catalonia; died after 1284. In 1250 he was selected by the provincial chapter, sitting in Toledo, to study Oriental languages at a Dominican school which had been founded for the express purpose of preparing its pupils to engage in polemics against Jews and Moors. Subsequently he lived for a long time in a monastery at Barcelona. In March, 1264, he was commissioned, with the Bishop of Barcelona, Raymund de Peñaforte, and two other Dominicans, Arnoldus de Sagarra and Petrus Janua, to examine the Hebrew manuscripts and books which the Jews, by order of the king, were to submit to them, and to cancel passages deemed offensive to the Christian religion. This is the first instance of Dominican censorship of the Talmud in Spain. Their report was not at all severe, however, since Raymund Martin declared that many passages were confirmatory of the truth of Christianity, and that the Talmud should not be burned entirely ("Pugio Fidei," ii. 14, § 8).

Martin was the author of two anti-Jewish books, one of which, the "Capistrum Judæorum," has never been printed. His chief work, the "Pugio Fidei," mentioned by Victor Salbaticis in 1520, was lost for a long time, but was finally brought to light by Justus Scaliger, and edited by Joseph de Voisin, with many notes, under the title "Pugio Fidei

Raymundi Martini Ordinis Prædicatorum Adversus Mauros et Judæos" (Paris, 1651). Better known than this edition is its reprint by J. B. Carpzov (Leipsic, 1667), with the anti-Jewish preface "Introductio in Theologiam Judaicam." The work treats of God's omniscience, the Creation, immortality, and the resurrection of the dead, and attempts to show the falsity of the Jewish religion; the latter part of the work is valuable on account of its extracts from the Talmud, the Midrash, and from other sources. Martin has been accused of forgery because of his quotations from Genesis Rabbah, which was not otherwise known; but Zunz defends him against this charge ("G. V." p. 300).

Martin was widely read in Hebrew literature, quoting not only from Talmudic and Midrashic works, but from Rashi, Ibn Ezra, Maimonides, and Ḳimḥi. His fundamental views, which he attempts to substantiate by his citations, are that Jesus is announced in rabbinical literature as the Messiah and son of God; that the Jewish laws, although revealed by God, are abrogated by the advent of the Messiah; that the Talmudists corrupted the text of the Bible, as is indicated by the "tiḳḳun soferim." Martin's work was for a long time the chief source for Dominican polemics.

MARTINET, ADAM: German Catholic Orientalist; born in Höchstädt, near Bamberg, in Jan., 1800; date of death uncertain. Martinet, who was a professor in the lyceum of Bamberg, was the author of "Tif'eret Yisrael," or "Hebräische Chrestomathie der Biblischen und Neueren Literatur, mit Anmerkungen und Glossar" (Bamberg, 1837), in which are given selections from the writings of Rapoport, Wessely, Friedländer, and other modern Hebrew authors.

T.

MARTINEZ, FERRAND: Archdeacon of Ecija in the fourteenth century, and one of the most inveterate enemies of the Jewish people; lived at Seville, where among Christians he was highly respected for his piety and philanthropy. In his sermons and public discourses he continually fanned the hatred of the Christian population against the Jews, to whom he ascribed all sorts of vices. As vicar-general of Archbishop Barroso of Seville he arrogated to himself the right of jurisdiction over the Jews in his diocese, injuring them wherever he could, and demanding that the magistrates of Alcalá de Guadeyra, Ecija, and other places no longer suffer the Jews among them. The Jewish community of Seville, at that time the richest and most important community of the country, was forced to appeal to King Henry II., who commanded the archdeacon, in a letter dated Aug. 25, 1378, not to meddle in future with the affairs of his subjects the Jews; not to incite the people against them; and to abstain from deciding their lawsuits. The Jews were empowered to withdraw from the archdeacon's jurisdiction, and the royal officials of Seville and other cities were summoned to protect the Jews in their rights. But this made no impression on Ferrand Martinez; and the Jews were obliged, four years later, to complain to King John I. John severely reproved him (March 3, 1382), but to no effect. The king issued a new edict (Aug. 25, 1383) in which he commanded the archdeacon to desist, on pain of heavy punishment. Nothing, however, could keep Ferrand Martinez from pursuing his purpose of exterminating the Jews.

Public Trial.

The community of Seville finally decided to summon the archdeacon before the highest tribunal. On Feb. 11, 1388, Ferrand Martinez, and the clothier Judah Aben Abraham, the representative of the community of Seville, together with their witnesses, appeared before the "alcaldes mayores" Ferrand Gonzalez and Ruy Perez. Judah, referring to the two royal edicts, demanded in the name of the community that the archdeacon should desist once for all from any arbitrary and unlawful acts against the community; otherwise the community would immediately bring a complaint before the king. Ferrand Martinez declared in his written answer, read eight days later before the tribunal, that he would continue to preach and act as heretofore; that all he had done so far had been done on the advice of the archbishop and for the benefit of the Church and the welfare of the king. He asserted also that the Jews had offered him 10,000 doubloons for deciding an important case in their favor. The archiepiscopal chapter now interfered, sending two of its members to the king to say that the archdeacon was setting aside even the authority of the pope, and that the safety of the Jews was imperiled. The king, who was entirely ruled by his wife, Leonora, Ferrand Martinez's penitent, replied that matters should not be precipitated, and that the archdeacon's zeal was worthy of all praise; at the same time he declared that the Jews under his protection must not be maltreated.

Appointed Vicar-General.

Archbishop Barroso proceeded more energetically. Summoning a body of theologians and experts in canonical law, he called upon Martinez to recant. As Martinez refused to do so, he was forbidden to perform thenceforth any ecclesiastical functions whatsoever, or to decide any case, on pain of excommunication. When Ferrand Martinez was deposed from office the Jews of Seville felt relieved, but their relief was of short duration. The archbishop Barroso and King John died within three months. The king was succeeded by Henry III., a child of eleven years, under the tutelage of his bigoted mother. The archiepiscopal chapter chose the excommunicated archdeacon for vicar-general. Ferrand Martinez immediately (Dec. 8, 1390) called upon the clergy of his diocese to demolish all synagogues in their parishes, and send to him without delay all lamps, Hebrew books, and scrolls of the Law found therein, on pain of excommunication. The clergy of Ecija and Alcalá de Guadeyra obeyed at once; and the synagogues of Soria and Santillana also came near being torn down.

The Jewish community of Seville turned in its consternation to the king (about Dec. 15, 1390), who seven days later sent a letter to the archiepiscopal chapter, holding it responsible for all damages done to the Jews, and commanding it to rebuild or to repair at its own expense all synagogues that had been torn down or damaged. He gave strict orders that the archdeacon should be at once deposed from office and placed where he could do no further harm. The chapter proceeded to obey the king's command; but Martinez declared that an ecclesiastic was subject to the Church and not to the king, and that the chapter had no right to depose him from office, or to demand that he rebuild the demolished synagogues.

Under Leonora's regency Martinez could defy even the king, receiving effective support from the people he had aroused. The first riots broke out in March, 1391, during which several Jews were killed. The great massacre occurred at Seville June 6, 1391, when several thousand Jews were killed and many forced to accept baptism. The people rose against the Jews throughout Castile, Aragon, and Majorca, many thousands being slain or forced into the Church. Ferrand Martinez was imprisoned at Seville in 1395 by command of Henry III., but was soon released. The people worshiped him as a saint. Before his death he presented his whole fortune to the hospital of San Maria at Seville, which he had founded.

MARTINI GEESE. See Barnacle-Goose.

MARTINIQUE: Island in the West Indies, now constituting a French colony. In the beginning of the seventeenth century a number of Dutch Jews settled at Martinique and in the neighboring islands, and were in very prosperous circumstances when France took possession of the island in 1635. But in 1658 the Jesuits, jealous of the commercial supremacy of the Jews, induced the sovereign council of Martinique to issue an edict forbidding Jewish commerce in the islands. At the instance, however, of the home authorities the council revoked this decision, which menaced the interests of the colony, and consented to restore the Jews to their commercial rights.

This freedom was of short duration. In 1664 Governor-General Tracy was induced by the Jesuits to issue a decree forbidding "persons of the Jewish nation to buy or sell on the Sabbath-day [Sunday] . . . on pain of a fine of 300 pounds of petun, of which one-third shall go to the church, one-third to the poor, and one-third to the informer." The Jews thereupon appealed to the new governor, Baas, who restored to them the free exercise of trade and commerce. Their enemies then approached the governor, who, yielding to their importunities, forbade (1669) Jews "to perform on Saturday any ceremonies relating to their faith, . . . to work on Sunday, or to appear in public from Maundy Thursday to Easter Sunday." But, like his predecessor, Baas soon perceived the importance of Jewish commerce and industry and sent Colbert a report favorable to the Jews, requesting certain privileges for them, especially that of the free exercise of their religion. Colbert pleaded the cause of the Jews so well before the king that on May 23, 1671, Louis XIV. decreed that the Jews of Martinique should thenceforth enjoy not only religious liberty but also the same privileges as the other inhabitants. During the life of Colbert all hostile schemes against the Jews failed, despite the powerful support which their enemies found in Count de Blénac, who had succeeded Baas as governor. But with Colbert's death they lost their protector, and the governor, yielding to the Jesuits, on Sept. 24, 1683, during a visit to France, obtained from Louis XIV. an edict banishing the Jews from Martinique. This order, evidently, was not put into execution at once, since two years later a new decree was issued, known as the "Code Noir," which obliged the Jews to leave the island within three months. No exceptions were to be made, not even in favor of Benjamin d'Acosta, who had introduced the cultivation of the sugar-cane in the island. In 1694 six Jewish families went to Martinique, but were at once expelled.

In the first half of the eighteenth century some Jews obtained permission to live in the colony. Laws were passed granting them a degree of legal existence, and the "Code Noir" was declared to apply only to foreign Jews. In 1722 David Gradis of Bordeaux established an office at St. Pierre. In 1764 Count d'Estaing imposed a tax upon the Jews, who were then numerous in Martinique, some residing there under the protection of "naturalization papers" and others being merely tolerated. Wishing to have their position clearly defined, they appealed to their coreligionists of Bordeaux, with whom they were in family and business relations, to request Louis XVI. to extend to colonial Jews the privileges enjoyed by the Jews of Bordeaux. Jacob Rodrigues Pereire of Bordeaux took up the cause of the Jews of Martinique, and addressed an eloquent memorial to Minister Tartine, who, after investigating the matter for some months, declared against any change (1776). All subsequent attempts made to improve their condition were equally unsuccessful, and they continued to live under a régime of bare toleration down to 1789, when the French Revolution removed their disabilities.

D. S. K.

MARTYRDOM, RESTRICTION OF: True to the principle current in rabbinical literature—"live through them [the laws], but do not die through them" (Yoma 85b, based on Lev. xviii. 5)—the Rabbis endeavored to restrain the desire for martyrdom on the part of the zealous. During the period of the Hadrianic persecutions such a restraint was obviously necessary. Akiba is related to have courted martyrdom rather than give up the teaching of the Law, in spite of the warning given to him by Papus (Ber. 61b); as did also Hananiah b. Teradion, in spite of the counsel of Jose ben Ḳisma ('Ab. Zarah 18a). R. Ishmael, on the other hand, was of the opinion that one may even worship idols in order to save one's life, although he admits that martyrdom should be preferred to a public profession of idolatry (Sanh. 74a; 'Ab. Zarah 24b). Probably it was during this period that the following principle was adopted, at a sitting of rabbis in the house of a certain Nitzah in Lydia: "All negative commandments of the Bible, except those with regard to idolatry, adultery, and murder, may be transgressed if there is danger of life" (Sanh. 74a; Yer. Sanh. iii. 6; Yer. Sheb. iv. 1; comp. Pesiḳ. R., ed. Friedmann, p. 55a). At the same meeting the question whether the study of the Law is more important than the practise of the Law was decided in the affirmative, for the reason that study leads to practise (Ḳid. 40b; Cant. R. ii. 31; Sifre, Deut. 41). This question was of practical importance to the rabbis of that time, and the decision meant that one must submit to martyrdom rather than forsake the study and the teaching of the Law (see B. Ḳ. 17a). The later rabbis, while disregarding this last decision, adopted and developed to meet various cases the general principle governing submission to martyrdom for the practise of the Law (comp. Grätz, "Gesch." 3d ed., iv., note 17, ii.; Weiss, "Dor," ii. 131).

Conditions of Martyrdom.

If the intention of the persecutor is not so much to benefit himself as to compel the Jew to transgress the laws of Judaism in public (פרהסיא = *παῤῥησία*, explained to mean "in the presence of ten Israelites"), the Jew should rather submit to martyrdom than commit even the smallest transgression. In a time of general persecution of Jews one should prefer martyrdom when required to transgress a law even in private (Sanh. 74a, b; Maimonides, "Yad," Yesode ha-Torah, v. 1-3; Shulḥan 'Aruk, Yoreh De'ah, 157, 1). In a case in which a Jew is permitted to transgress a law when the alternative is death, he may submit to martyrdom, if he prefer martyrdom to the transgression; some authorities, however, forbid this, regarding it as a forfeiting of life to no avail ("Yad," Yesode ha-Torah, v. 4; comp. Mishneh le-Melek *ad loc.*; Yer. Sheb. iv. 2; 'Ab. Zarah 27b; Tos. *ib.* s.v. "Yakol"; Yoreh De'ah, *l.c.*). If he can redeem himself by giving up all his possessions he should part with all he has rather than transgress a negative law of the Bible (R. Nissim on Alfasi to Suk. iii. 2, *s.v.* "Dabar"; Isserles to Yoreh De'ah, *l.c.*; "Pitḥe Teshubah," *ad loc.*; comp. "Sefer Ḥasidim," ed. Wistinetzki, § 1365). One who transgresses the Law instead of submitting to martyrdom where martyrdom is enjoined, can not be punished in the courts, since the transgression is committed under duress, but he must be regarded as a defiler of God's name; and if he persists in living in the same place and in continuing the transgression when he can escape, he forfeits his portion in the future world and will be assigned to the lowest chambers of Gehenna ("Yad," *l.c.*). At no time is it permitted to a Jew to commit suicide or to kill his children in anticipation of religious persecution; he must wait until the persecutor comes and submit to the death inflicted upon him ("Be'er ha-Golah" to Yoreh De'ah, 157, 1, end, quoting the "Bedeḳ ha-Bayit").

Other Cases.

The same laws that apply to cases of religious persecution apply also to other cases which involve danger to life. At the order of a physician a sick man is permitted to break all the laws of the Bible except the three mentioned above—idolatry, adultery, and murder—if his life depends on the breaking of these laws (Pes. 25a; "Yad," *l.c.* v. 6-8). But, anxious for the chastity of Jewish women, the rabbis decided that even when adultery is not involved, as when the woman is unmarried, one should be left to die from the intensity of his passion rather than that the purity of a Jewish woman should be defiled. In an instance related in the Talmud conversation between the sick man and the object of his desire was forbidden (Sanh. 75b; "Yad," *l.c.* v. 9). Martyrdom is enjoined only when the transgression of the Law would involve a deliberate act. Thus, a woman is not obliged to undergo martyrdom if attacked with an immoral intent (comp. Sanh. 74b; Tos. *ib.* s.v. "Weha"; R. Nissim on Alfasi to Pes. ii. 1, *s.v.* "Ḥuẓ"; Isserles to Yoreh De'ah, *l.c.*).

If a number of Jews are threatened with death if they do not deliver one among them to be slain, they all should submit to the alternative of martyrdom. There is a difference of opinion, however, in a case where the one demanded is indicated by name. Some authorities hold the view that in such a case they may surrender the one thus specified in order to save themselves from death; while others are of the opinion that they may surrender him only when he is guilty of some act that involves the death-penalty. The same is true if one among a number of women is demanded for immoral purposes (Ter. viii. 12; Yer. Ter. viii. 4, end; Tosef. *ib.* vii. 23; comp. Rashi to Sanh. 72b, *s.v.* "Yaẓa"; "Yad," *l.c.* v. 5; and "Kesef Mishneh," *ad loc.*; Yoreh De'ah, *l.c.*; "Sefer Ḥasidim," §§ 253, 254).

In times of persecution a Jew may not say that he is a Gentile in order to save himself from death, although he may mislead his persecutors into an understanding that he is not a Jew (ROSh to 'Ab. Zarah ii. 4; Yoreh De'ah, 157, 2). In such a case it is permitted to the Jew to put on garments with "sha'atnez" (wool and flax) in them, or to shave his beard, and for a woman to attire herself in male garments, or in those worn by nuns, in order to deceive the persecutors ("Ḥatam Sofer" to Shulḥan 'Aruk, Oraḥ Ḥayyim, 159; "Sefer Ḥasidim," §§ 202-207, 259-262). Although it is forbidden to a Jew to be alone with a non-Jew ('Ab. Zarah 22a), in case of persecution a Jew may seek protection at the house of a non-Jew (ROSh, Responsa, xix. 17; Yoreh De'ah, *l.c.* 3; comp. "Sefer Ḥasidim," § 251).

MARTYROLOGY: Biography of martyrs. Early in its existence the Christian Church began to register the judicial proceedings against its martyrs and saints. These records, called "Acta Sanctorum," took the form of calendars, menologies, "menæa," or "legenda passionalia." Since the anniversaries of the deaths of the saints were celebrated by the sacrifice of the mass, the calendars were merely lists arranged according to the secular year and intended only for the use of individual churches. The martyrologies, which were introduced in the seventh century, were an amplification of the calendars, and contained short biographies, and lists of the festivals of other churches. The arrangement of these books clearly appears in the present official "Martyrologium Romanum." The third class of stories, the "Vitæ Sanctorum," had the alternative name of "legends," as being intended both for private and for public reading.

Jewish "Saints" or Martyrs.

Israel likewise has its "saints," though the word is used in an entirely different sense from that employed by the Christian Church. Only a brief portion of the liturgy is set aside for commemorating the martyrs of Israel, and the literature on the Jewish heroes of the faith is comparatively small. The "ḳedoshim," the saints of Israel, had merely fulfilled their religious duty when they steadfastly endured torture and death. Their widows did not marry again, since their murdered husbands still lived in liturgical poems, simple notices, or formal narratives, and in single lists; in Germany these lists were read at the Hazkarat Neshamot to the community, which, on the Sabbaths before Pentecost and before the anniversary of the destruction of Jerusalem, as well as on the 9th of Ab, commended the souls of the martyrs to the mercy of God. The lists of the places of martyrdom and of the martyrs contained in the Memor-Books may in a certain sense be called "martyrologies," although there were also independent works bearing this name. Schudt ("Jüdische Merkwürdigkeiten," iv. 1) has the following passage referring to the descendants of the martyrs persecuted by the Inquisition: "The 'Neuester Staat des Königreichs Portugall,' by an anonymous author, also shows that the Jews have special martyrologies and records of coreligionists whom they honor as martyrs since because of their religion they were executed by the Inquisition in Spain and Portugal. . . . It is also noteworthy that the Jews of Amsterdam have their own books of martyrs, in which they enter the names of those who were burned for the sake of their faith, and many Jews are marvelously steadfast when they face the Inquisition" (comp. also "Unschuldige Nachrichten auf das Jahr 1740," p. 10; Delitzsch, "Zur Gesch. der Jüdischen Poesie," p. 122).

The Nuremberg Martyrology.

Among the lists of martyrs made in Germany, the home of persecutions, are those of Worms of 1096 and 1349, preserved in several places; the Nuremberg list of 1349; and the lists in the memor-books of Sontheim, Heilbronn, Krautheim, Neustadt-on-the-Aisch, Sindringen, and Widdern (1298), dating from the time of the persecutions instigated in Franconia by the nobleman Rindfleisch. A detailed martyrology, however, is found in the memor-book of the famous old community of Nuremberg, which was composed in 1296 by Isaac b. Samuel of Meiningen; by request of the Historische Commission it was edited by Salfeld, under the title "Das Martyrologium des Nürnberger Memorbuches," and published in 1898 as the third volume of the "Quellen zur Gesch. der Juden in Deutschland." The compiler drew his material not only from ancient accounts of the persecutions, but also, in all probability, from lists which were kept in the Jewish communal archives of Nuremberg. In lapidary style he gives an eloquent account of the victims slain in Germany during the Crusades; during the persecution caused by a false accusation of profanating a host in Franconia; in 1298, during various local massacres; and at the time of the burning of the Jews in 1349. The account referring to this incident mentions only the victims at Nuremberg, while references to former persecutions are apparently complete. For the years 1298, 1338–39 (see Armleder Persecutions), and 1349, also, the manuscript contains lists of those who died as martyrs for their faith. In addition to the accounts of the persecutions in Germany, there are lists of those at Blois (1171) and Troyes (1288), while the persecutions in England and in France are merely mentioned, with the exception of that at Corbeil, which is especially emphasized. The manuscript contains also notes on the sufferings and martyrdoms of converts to Judaism (Salfeld, "Martyrologium," p. 149) in the midst of the other martyrs; and these are followed by a list of places where martyrdoms occurred during the persecutions under Rindfleisch in 1298. The statements in the lists of martyrs are supported by contemporary accounts, especially by the historical elegies, of which eleven, taken from manuscripts and old editions, have been added to the work.

J. S. Sa.

MARTYRS, THE TEN: Among the numerous victims of the persecutions of Hadrian, tradition names ten great teachers who suffered martyrdom for having, in defiance of an edict of the Roman emperor, instructed their pupils in the Law. They are referred to in haggadic literature as the **'Asarah Haruge Malkut.** Popular imagination seized upon this episode in Jewish history and embellished it with various legends relating the virtues of the martyrs and the fortitude shown by them during their execution. These legends became in the geonic period the subject of a special midrash—the Midrash 'Asarah Haruge Malkut, or Midrash Eleh Ezkerah, of which there exist four versions, each differing from the others in various points of detail (see Jellinek, "B. H." i. 64, vi. 19). Contrary to the accounts given in the Talmud and in Midrash Rabbah ('Ab. Zarah 17b, 18a; Ber. 61b; Sanh. 14a; Lam. R. ii. 2; Prov. R. i. 13), which clearly state that there were intervals between the executions of the ten teachers, the Midrash 'Asarah Haruge Malkut, probably in order to produce a greater effect upon the mind of the reader, describes their martyrdom as occurring on the same day.

Their Names.

This midrash differs from the older sources in regard also to the accusation upon which they were condemned. It says that when a certain Roman emperor who had been instructed in the Law came to the Biblical passage, "And he that stealeth a man, and selleth him, or if he be found in his hand, he shall surely be put to death" (Ex. xxi. 16), he conceived the following mischievous device: He summoned Ishmael ben Elisha (perhaps the propounder of the "Thirteen Rules"; see Ab. R. N., ed. Schechter, p. 54b; comp. Ned. ix. 10), Simeon (certainly not Simeon ben Gamaliel II; see Ta'an. 29b), Ishmael, Akiba ben Joseph, Hananiah ben Teradion, Ḥuzpit (the interpreter ["meturgeman"] of the Sanhedrin of Jamnia), Yeshebab (the secretary of the Sanhedrin), Eliezer ben Shammua' (in Midr. R. *l.c.* "R. Eliezer Ḥersanah," or "R. Tryphon"), Hananiah ben Ḥakinai (in Midr. R. *l.c.* "Judah ha-Neḥetam"), and Judah ben Baba, and demanded of them what was the punishment prescribed by the Law for stealing a man. They answered, "Death"; whereupon the emperor said, "Then prepare to die, for your ancestors [alluding to the history of Joseph and his brethren] committed such a crime, and you, as the representatives of the Jewish nation, must answer for it." The rabbis asked for a delay of three days that they might ascertain, by invoking the Ineffable Name, whether the punishment pronounced against them was ordained by Heaven. Ishmael ben Elisha, in his capacity as high priest, or as the son of a high priest, was chosen to make the inquiry, and after having ascertained that it was decreed by Heaven, the rabbis submitted to their fate.

Ishmael and Simeon were the first to be taken to the place of execution, where a dispute arose between them as to which should be executed first, each desiring to precede the other in order that he should be spared the sight of the martyrdom of his colleague. Thereupon the emperor ordered lots to be cast, and the lot fell on Simeon, whose head was stricken from his body with a sword. Ishmael was flayed; he suffered with great fortitude, and began to weep only when his executioners reached the place of the phylacteries. The third victim was Akiba, whose flesh was torn off with a carding-implement. While undergoing the torture he recited the Shema' with a peaceful smile on his face. Astonished at his extraordinary courage, his executioner asked him if he was a sorcerer that he could so easily overcome the pain he was suffering, to which Akiba replied, "I am no sorcerer, but I rejoice that I am permitted to love God with my life." He died at the last words of the Shema'—"God is One." The fourth martyr was Hananiah ben Teradion, who was wrapped in a scroll of the Law and placed on a pyre of green brushwood; to prolong his agony wet wool was placed on his chest. "Wo is me," cried his daughter, "that I should see thee under such terrible circumstances!" "I should indeed despair," replied the martyr, "were I alone burned; but since the scroll of the Torah is burning with me the Power that will avenge the offense against the Law will avenge me also." His disciples then asked: "Master, what seest thou?" He answered: "I see the parchment burning while the letters of the Law soar upward." His disciples then advised him to open his mouth that the fire might enter and the sooner put an end to his sufferings; but he refused to do so, saying, "It is best that He who hath given the soul should also take it away: no man may hasten his death." Thereupon the executioner removed the wool, fanned the flame, thus accelerating the end, and then himself plunged into the fire.

The martyrdom of the remaining rabbis is noted without details, with the exception of Judah ben Baba, who is said to have been pierced by lances. He was the last of the martyrs; according to the Talmud (Sanh. 14a), he was surprised by the Romans in the valley between Usha and Shefar'am, where he was secretly investing the seven remaining pupils of Akiba with the authority to continue the teaching of the Law. The martyrdom of the "Ten Teachers" is commemorated in a seliḥah recited in the Musaf service of the Day of Atonement. It is entitled "Eleh Ezkerah," and is based upon the account given in the Midrash 'Asarah Haruge Malkut. With some difference in names it is treated also in the dirge for the Ninth of Ab entitled "Arze ha-Lebanon."

S. I. BR.

MARX, ADOLF BERNHARD: German musical writer; born at Halle May 15, 1799; died at Berlin May 17, 1866. He had studied music for some time with D. S. Türk when his father, who had destined him for the law, sent him to the University of Halle, where he matriculated. Shortly afterward, however, he rejected the offer of a legal appointment at Naumburg in order to devote himself entirely to music, and proceeded to Berlin, where he became a pupil of Zelter, while gaining a livelihood by teaching. In conjunction with the well-known publisher Schlesinger, he founded (1824) the "Berliner Allgemeine Musikalische Zeitung," which he conducted until 1830. In 1827 the University of Marburg conferred on him the title of doctor of philosophy; and in this capacity he lectured on the pedagogics of music at the University of Berlin, which institution in 1830 appointed him musical director of its student choir.

With Kullak and Stern, Marx founded in 1850 the Berliner Musikschule, now the Stern Musik Conservatorium, one of the most prominent musical institutes of Berlin. Here he taught until 1856, when he resigned in order to devote himself entirely to literary and university work and to the teaching of composition. His long and intimate friendship with Mendelssohn was ultimately severed because of the latter's strictures upon Marx's compositions, which, indeed, have not withstood the test of time. His musical writings, however, are far more valuable, and include: "Ueber Malerei in der Tonkunst" (1828); "Die Lehre von der Musikalischen Komposition" (Berlin, 1837–1847, 4 vols.; several times reprinted); "Allgemeine Musiklehre" (1839; 9th ed., 1875; translated into English); "Die Musik des 19ten Jahrhunderts und Ihre Pflege" (1855); "Ludwig van Beethoven's Leben und Schaffen" (1858; 3d ed., 1875); "Gluck und die Oper" (1863, 2 vols.); "Erinnerungen aus Meinem Leben" (1865, 2 vols.); and several other writings of an analytical nature.

MARX, BERTHE: French pianist; born at Paris July 28, 1859. She began to study the pianoforte at the age of four, receiving her first instruction from her father, who for forty years was a violoncello-player in the Conservatoire and Grand Opera orchestras. In 1868 she entered the Conservatoire, where she became a pupil of Henri Herz, in whose class at the age of fifteen she gained the first prize. Upon completing her studies she undertook a series of concert tours through France and Belgium, everywhere meeting with a cordial reception. At Brussels she met Sarasate, who, recognizing her great talent, engaged her as soloist and accompanist, in which capacities she accompanied him on his tours through Europe and America, extending even to Mexico and California; she played in all in about 600 concerts. She has composed several "Rhapsodies Espagnoles," and has arranged Sarasate's Spanish dances for the piano.

MARX, DAVID: Chief rabbi of Bordeaux, France; born at Landau, Bavaria, in 1807; died Feb., 1864. On his graduation from the Ecole Centrale Rabbinique at Metz he assumed charge of the Ecole Religieuse Israélite at Nancy; and in June, 1837, before he had attained the age required for the office, he was elected by the consistory of Bordeaux to succeed Chief Rabbi Abraham Andrade. In 1841 he proposed the introduction of confirmation at Bordeaux, a rite then regarded as a dangerous innovation. Marx organized numerous institutions in the community of Bordeaux, including a "salle d'asile" and an infirmary; and under his guidance the children of the community founded the Société de la Jeunesse Israélite de Bordeaux, for the relief of less fortunate children. At various times during his term of office he interfered in behalf of minors who had been kidnaped from their parents by Catholic proselytizers. In 1852 he was decorated by Napoleon III., then prince-president, with the cross of the Legion of Honor. On the day of his funeral Donnet, Cardinal Archbishop of Bordeaux, ordered the bells of all the churches in the city to be tolled. Marx, who was a remarkable preacher, published the following sermons: "Sermon sur le Culte Public" (Bordeaux, 1853); "Discours lors de l'Inauguration de la Synagogue de Clermont-Ferrand" (1862); "Sermon sur le Dogme et la Morale" (*ib.* 1863).

MARX, JACOB: German physician; born in Bonn 1743; died in Hanover Jan. 24, 1789; studied medicine in Halle (M.D. 1765). He traveled for scientific purposes in Holland and England, in the latter country making the acquaintance of Dr. John Fothergill. He finally settled in Hanover, where he made himself greatly beloved. He has been reproached with inability to free himself from the prejudices of his time when he opposed Herz for attacking the Jewish burial customs of the period. Marx wrote: "Dissertatio de Spasmis et Motibus Convulsivis Optimaque Iisdem Medendi Ratione" (Halle, 1765); "Observata Quædam Medica" (Berlin, 1772); "Observationes Medicæ" (Hanover, 1774–87), in three parts: part one was translated into German by Böhm (Berlin and Hanover, 1786), parts two and three by Marx himself (Hanover, 1787); "Abhandlung über die Lungenschwindsucht" (Hanover, 1784); "Gesch. der Eicheln und Erfahrungen über die Diät und Medizinischen Gebrauch Derselben" (1784); "Bestätigte Kräfte der Eicheln" (1787); "Ueber die Beerdigung der Toten" (Hanover, 1787); etc.

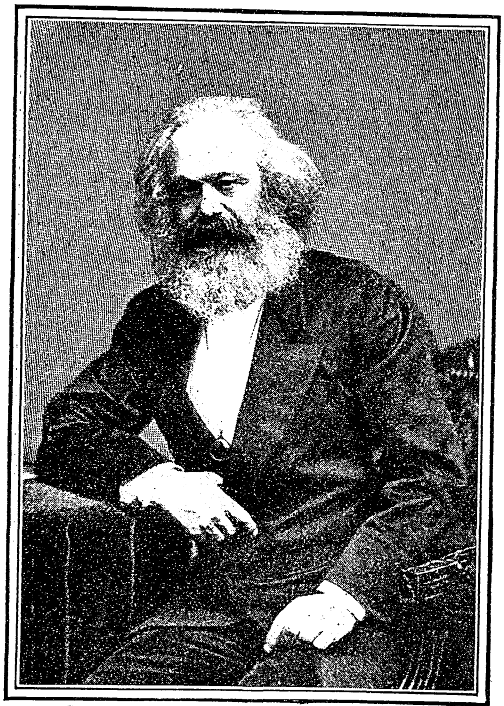
S. N. D.

MARX, KARL: German socialistic leader and political economist; born at Treves May 5, 1818; died in London March 14, 1883. His father, a practising attorney at the Landgericht, adopted Christianity in 1824. Marx attended the gymnasium at Treves and the universities of Bonn and Berlin, graduated as doctor of philosophy, and then turned to journalism, becoming in 1842 editor of the "Rheinische Zeitung für Politik, Handel und Gewerbe," which was founded by the Liberal party at Cologne. It was the most radical journal of the time in Germany. Marx became involved in a number of controversies, particularly with the "Oberpräsident" of the Rhine province, concerning the condition of the peasantry of the Moselle district; and in 1843 he resigned his editorial position to study political economy. In that year also he married Jenny, daughter of Baron von Westphal.

Shortly after the marriage Marx, on the invitation of Arnold Ruge, went to Paris to aid in the publication of the "Deutsch-Französische Jahrbücher," of which, however, only one (double) number was issued (1844). It contained, besides other matter, the celebrated "Lobgesänge auf den König von Bayern," by Heine, and two articles by Marx himself, "Zur Kritik der Hegel'schen Rechtsphilosophie" and "Zur Judenfrage."

After the publication of the "Jahrbücher," Marx became associated with the "Vorwärts," also published in Paris. The Prussian government intimated to that of France its displeasure at certain utterances of the "Vorwärts"; and Guizot ordered those of its editors who were not French citizens to leave the country. An interpellation in the French Chamber led to a revocation of the order; but Marx decided to leave Paris, and in 1845 he went to Brussels.

In Paris Marx had become intimately connected with the Bund der Gerechten, which had been founded in Paris in 1836, and which afterward became the Kommunistenbund. Its leaders in London corresponded with him; and they formed a branch in Brussels, from which to send representatives to the congress to be held in London in the summer and fall of 1847. Marx attended in November, and after expounding his ideas in a number of addresses, the "Kommunistische Manifest," prepared by himself and Engels, was finally adopted, its concluding words, "Proletarier aller Länder, vereiniget Euch!" becoming the battle-cry of the laboring classes throughout the world. Upon the outbreak of the Paris revolution, in Feb., 1848, Marx prepared to go to the scene of conflict, but was arrested and forced to return to Germany. From June 1, 1848, he edited the "Neue Rheinische Zeitung." As leader of the left wing of the democratic movement of the Rhine province he was an important factor in the revolution. He was a member of the Rheinische Kreisausschuss der Demokraten, and with Schaffer and Schneider, as a committee of the organization, signed a proclamation (Nov., 1848) in which the members of the Democratic Association were advised to resist the collection of all taxes and to organize a military force. Marx and his associates were arrested and placed on trial for incitement to rebellion; but a jury acquitted them. In 1849 the government felt itself strong enough to order his banishment (May 16); and he went once more to France.



Karl Marx.

When Marx arrived in Paris a number of petty revolutions were ripe, in which he undoubtedly took part, although his share in them does not seem clear. When the demonstration of June 13 came to an end he was directed to leave France; and he then sought refuge in England.

Freed from agitation and revolution, Marx had now about fourteen years of peaceful literary activity. He frequently contributed to the Anglo-American press. On Sept. 24, 1864, a great meeting was held in London, at which Professor Beesly, the positivist, presided, and it was finally determined to establish a permanent organization of the working people of the civilized world. The International Working Men's Association was thus founded. Mazzini and Marx were entrusted with the task of preparing the address and the constitution; and at the congress held in Geneva in 1866 the report of Marx was adopted. Until 1872 Marx dominated the organization at the congresses and in the executive committee. His purpose was that of propaganda alone; but the mistake of the leaders was that the influence of the association was not exerted to hinder the Paris Commune in 1871. Marx himself was guilty of an even worse mistake: he actually approved the Commune's operations, in his pamphlet "Der Bürgerkrieg in Frankreich," published in 1871 and reissued in 1876. In order to dissolve the Internationale without giving his opponents a chance to reorganize it, he in 1872 transferred the seat of the general council to New York, in care of his faithful follower F. A. Sorge; and so the association came to an end.

The great work of Marx's life, and that with which his fame is most enduringly identified, is "Das Kapital," of which the first volume was published in 1873; the second, edited by Engels, in 1885; and the third, in 1894. Of the first (4th ed., 1892) an English translation by Moore and Aveling was issued in London in 1886.

MARX, ROGER: French art critic; born in Nancy Aug 28, 1859. In 1878 he went to Paris, where he wrote for various theater and art journals. In 1883 he became art, and afterward literary, critic of the "Voltaire." He was later appointed secretary of the Academy of Fine Arts, which position he resigned on the death of the director, M. Castagnary, though he continued to act as inspector of the Academy. In 1886 the government sent him on a mission to Spain to study the methods of instruction followed in the schools of industrial art and of design. In 1889 he was appointed assistant inspector-general of museums and organized the centennial section of French art at the Exposition Universelle in 1900, when, on the occasion of the opening of the fine arts exhibits, he was made an officer of the Legion of Honor. As a writer he is an individualist.

Marx has published: "Les Jouets" and "Les Dimanches de Paris," two works of fiction; "Etude d'Art Lorrain" (1882); "L'Art à Nancy en 1882" (Nancy, 1883); "Henri Regnault" (1886); "La Décoration et l'Art Industriel à l'Exposition Universelle de 1889" (Paris, 1890); "Histoire de la Médaille Française Depuis Cent Ans" (1890); "The Painter Albert Besnard" (*ib.* 1893); "J. K. Huysmans" (*ib.* 1894); "La Collection des Goncourt" (1897); "Die Französischen Medailleure Unserer Zeit," a collection of 442 medals and plaquettes (Stuttgart, 1898); "Les Médailleurs Français de 1789" (Paris, 1898); "La Décoration et les Industries d'Art" (*ib.* 1901); "Les Médailleurs Modernes en France et à l'Etranger" (*ib.* 1901); "Handbuch für Leihbibliotheken."

S. N. D.

MARX, SAMUEL: Chief rabbi of Bayonne, France; born in 1817 at Dürkheim, Bavaria; died in 1887; cousin of David Marx. On completing his studies at the Ecole Centrale Rabbinique at Metz, he became director of the Ecole Religieuse Israélite at Nancy and assistant to the chief rabbi of that city. In 1843 he was appointed rabbi of Saint-Esprit and Bayonne, becoming chief rabbi three years later. Marx published the following sermons: "Sermon Prononcé à la Synagogue de Nancy, le 16 Avril, 1842"; "Discours de l'Installation, 18 Décembre, 1846" (Bayonne); "Sermon sur la Mesousa" (*ib.* 1866); "Le Centenaire de Sir Moses Montefiore" (*ib.* 1884).

Bibliography: Henry Léon, *Histoire des Juifs de Bayonne*, Paris, 1893.

S. J. Ka.

MARYLAND: One of the thirteen original States of the American Union. The history of the Jews in Maryland may be divided into three periods: the first extends from shortly after the establishment of the provincial government at St. Mary's, in 1634, to the expansion of trade and commerce in the middle of the eighteenth century; the second begins a decade before the Revolution and ends with the practical removal of political disabilities in 1826; the third covers the following seventy years of German immigration, congregational development, and communal growth.

The characteristic of the first, or provincial, period is the apparent absence of any single influx of Jews corresponding to those which occurred in New York, Newport, Savannah, and Charleston. Record is found of one Mathias de Sousa as early as 1639, fifteen years before the arrival of "David Israel and the other Jews" at New Amsterdam. If, indeed, credence is to be given to the distinctiveness of such names as Matthias de Costa, Isaac de Barrette, Hester Cordea, David Fereira, and Jacob Leah, it seems probable that Jews were resident in Maryland in appreciable numbers from the earliest days of the palatinate. Yet percolation rather than influx, and quiet exercise rather than open profession of faith, seem to distinguish the period.

From among the hazy forms which thus constitute the history of the Jews in provincial Maryland the figure of Jacob or John Lumbrozo stands forth in bold prominence. He is the first, indeed the only, Jew of whose faith there is documentary evidence. Subsequent data gather about him as a nucleus, and it is largely in his experience that the difficulties of the period must be solved. He is one of the earliest medical practitioners in Maryland; his arrival forms a distinct event in the life of the province, and for nearly a decade he continues an important figure in its economic activity. Names of a distinctively Jewish character appear at intervals in the accessible records from 1660 to the overthrow of the proprietary government in 1692, always without mention of any communal organization, without even a bare indication of the bearers' faith. Among these are the names of David Fereira, Francis Hyems, Abraham Hart, Daniel Mathena, Jacob Leah, Solimon Barbarah, Sarah Hayes, Philip Salomon, Joseph Lazcar, Matthias de Costa, Isaac de Barrette, Hester Cordea, and Isaack Bedlo. Whatever such evidence may suggest, the positive conclusion to which it leads is that while the Jew in proprietary Maryland was, de jure, without civil rights, was denied freedom of residence, and was liable to punishment by death for the bare profession of his faith, he was, de facto, permitted undisturbed domicil and was gradually allowed the exercise of certain undefined rights.

Jacob Lumbrozo.

The reduction of the palatinate to a crown colony in 1692 led naturally to a Protestant church establishment, and ecclesiastical organization, it seems, tended to identify citizenship with church membership and to disfranchise the professed Jew in the province at large. The broader organization of the cities, whither the Jew would naturally gravitate, permitted some political recognition. Thus the charter of Annapolis, granted in 1708, conferred the suffrage upon any person possessing a freehold or a visible estate of twenty pounds sterling, and those of other cities and towns gradually followed with similar privileges. But even there the Jew could hold no office. The act of 1715 reorganizing the Protestant Church establishment provided that the oath of abjuration, terminating with the words, "upon the true faith of a Christian," should be administered to "all persons that already have, or shall hereafter be admitted to have or enjoy, any office or place of trust within this province." The exclusion was perfected in the following year by the addition of the oaths of allegiance and abhorrency, and the test; to the last two no conscientious Jew could subscribe. No essential modification was made in this requirement until sixty years later, when it was embodied in the fundamental law of the state.

Excluded from Office.

Whatever recognition the Jew could obtain, it is necessary to remember, was accorded entirely upon sufferance. Legally, profession of Judaism still remained punishable by death. In 1723 the spirit of the Toleration Act of 1649 was revived by an act (repealing an apparently similar measure of 1715) "to punish blasphemers, swearers, drunkards." It did much more than this, however, in the opening enactment, which declared that "if any person shall hereafter within this province . . . deny our Savior Jesus Christ to be the Son of God, or shall deny the Holy Trinity" he shall, for the first offense, be fined and have his tongue bored; for the second, fined and have his head burned; for the third, put to death.

This act also remained unrepealed until after the adoption of the state constitution.

From the restoration of the "lord proprietor" in 1715 until the outbreak of the Revolution, Jewish names are rarely mentioned. The Jewish settlements at Schaefersville and Lancaster seem to have contributed little to the stream of German immigration which flowed steadily from southeastern Pennsylvania into Frederick county, Md. Similarly, the Jewish communities of Philadelphia and New York do not appear to have yielded to the commercial inducements offered by the more southerly colony. The absence of such contact suggests either a deliberate avoidance of the province or the absence of public avowal of Jewish faith during residence therein. Church establishment terminated with the fall of proprietary rule and with the emergence of Maryland into statehood. With it fell, too, the force of the legislation which for a century and a half had declared profession of the Jewish faith a capital offense. The practical identification in men's minds of citizenship and church membership and the subscription to doctrinal oaths as a necessary preliminary to political office could not, however, be swept away so easily.

The Constitution of 1776.

In Sept., 1776, a declaration of rights and a formal constitution were submitted to the Provisional Convention by a committee of five members appointed a month before. As adopted, the thirty-fifth article of the declaration of rights provided: "That no other test or qualification ought to be required on admission to any office of trust or profit than such oath of support and fidelity to this state, and such oath of office, as shall be directed by this convention or the legislature of this state, and a declaration of belief in the Christian religion." The text of the oath of fidelity was given in the fifty-fifth article of the constitution, and the requirement that the person so appointed "shall also subscribe a declaration of his belief in the Christian religion" was repeated. Henceforth the Jew in Maryland was secure in his religious profession and vested with certain political privileges. But the largest civic recognition was still withheld, and not until half a century later, after a persistent struggle extending over more than half this interval, was the fullest equality in the eye of the law accorded him.

The gradual influx of Jews into Maryland during and immediately after the Revolutionary war must undoubtedly be attributed to the commercial and industrial advantages of Baltimore. There is hardly any detailed information concerning the number, time of arrival, or personal history of these early settlers; a considerable part of them seems to have come from Philadelphia, and almost all appear to have been persons in moderate circumstances.

Beginnings of Civic Emancipation.

The first formal legislative effort to effect the removal of the existing disability was made in 1797. On Dec. 13 in that year a petition signed by Solomon Etting, Bernard Gratz, and others was presented to the General Assembly at Annapolis; the petitioners averred "that they are a sect of people called Jews, and thereby deprived of many of the valuable rights of citizenship, and pray to be placed upon the same footing with other good citizens." The petition was read and referred to a committee of three persons, who upon the same day reported that they "have taken the same into consideration and conceive the prayer of the petition is reasonable, but as it involves a constitutional question of considerable importance they submit to the House the propriety of taking the same into consideration at this advanced stage of the session." This summary disposition of the petition put a quietus upon further agitation for the next five years. On Nov. 26, 1802, a petition "from the sect of people called Jews" specifically stating their grievance, namely, "that they are deprived of holding any office of profit and trust under the constitution and laws of this state," was referred to the General Assembly, which read it and referred it to a special committee of five delegates, including the two Baltimore representatives, with instructions to consider and report upon the prayer of the petitioners for relief. A month later the petition was refused by a vote of thirty-eight to seventeen. The attempt to secure the desired relief was repeated at the legislative session of 1803; again proving unsuccessful, it was renewed in the following year.

There is much similarity in these successive attempts as disclosed in the bare outline of formal records. In 1803 and in 1804, as in 1802, petitions for legislative relief were presented to the House of Delegates, read, and referred to special committees. As in 1802, bills to the desired effect were reported back from these committees and shelved at the second reading; in 1803 the further consideration of the bill at this stage was postponed till the following session of the assembly; in 1804 the bill was defeated by a decisive vote of thirty-nine to twenty-four. Four successive attempts had now been made to secure full civic recognition, and four successive defeats had been suffered. Some favorable advance in public sentiment becomes evident upon a comparison of the votes of 1804 and 1802, but general opinion still continued so pronouncedly hostile to the grant of relief that to the few determined spirits upon whom the brunt of the struggle had thus far fallen any further agitation seemed absolutely hopeless if not actually unwise. Accordingly with the legislative defeat of 1804 further formal agitation ceased until fourteen years later.

Within this period (1804–18) occurred three circumstances of prime importance with respect to further efforts to secure legislative relief: (1) the rise in material importance and communal influence of the Jews of Baltimore; (2) the actual hardship, as distinct from merely possible inconvenience, suffered from the operation of civil disabilities; (3) the enlistment of the keen sympathy and persistent efforts of certain distinguished men active in public affairs in Maryland in behalf of the struggle for the removal of civil disabilities of the Jews.

The first circumstance is largely connected with the arrival in Baltimore from Richmond, Va., in the year 1808, of the Cohen family, consisting of the widow and six sons of Israel J. Cohen. The eldest son, Jacob I. Cohen, Jr., became at an early age a successful business man, and the founder of the banking-house of Jacob I. Cohen, Jr., & Brothers, widely and honorably known in commercial circles. With Solomon Etting he was early recognized as a leader and representative figure in the local Jewish community. His interest in public affairs was keen and sustained, his intercourse and friendship with persons engaged in public life large and intimate, and his concern for the full emancipation of Jews in Maryland intense. He was the author of the successive petitions for relief and the proposed constitutional amendments that besieged every session of the General Assembly from 1816 to 1826. He was the moving spirit of the sharp legislative struggle that followed each effort, and it was his personal friends, largely out of regard for him, who led in the successive contests.

The Cohen Family.

The second circumstance, the actual as distinct from the possible inconvenience entailed by civil disabilities, is closely associated with the rise in material importance of members of the Jewish community. The elder Cohen had in Richmond been "conspicuous in all municipal movements, being chosen a magistrate and a member of the city council"; his sons found that so humble an office as that of wood-corder in Baltimore required a preliminary declaration of belief in the Christian religion. Reuben Etting was deemed by Thomas Jefferson worthy of appointment as United States marshal for Maryland, but for the office of constable or justice of the peace his religious persuasion was an absolute disqualification. Others who had served with distinction in the defense of Baltimore in 1812 and in subsequent military engagements were disqualified from rising from the ranks, and while personal bravery and the esteem and admiration of associates caused the letter of the law to be ignored, the officer's commission was held nevertheless by tacit consent and upon bare sufferance. These two conditions, the larger influence and wider intercourse of leading Jewish families of Baltimore and the actual hardship suffered by the operation of civil disabilities, combined to enlist the sympathy and aid of a group of men active in public life in Maryland, and these conducted the legislative struggle for full emancipation in the General Assembly in the years from 1816 to 1826. The most prominent figure in this group, which included Thomas Brackenridge, E. S. Thomas, General Winder, Col. W. G. D. Worthington, and John V. L. MacMahon, was Thomas Kennedy of Washington county.

Struggle in Legislature.

The history of the legislative struggle for the removal of the obnoxious restriction can be indicated here only in the barest outline. Beginning with the legislative session of 1818, and continuing until the desired end was attained in 1826, a deliberate and sustained attempt was made at each successive session of the General Assembly to secure legislation relieving the Jewish appointee to political or civil office in Maryland of the necessity of subscribing to a declaration of belief in the Christian religion. The legislative struggle attracted wide-spread attention throughout the United States. The important newspapers of the country characterized the test as a disgraceful survival of religious intolerance and urged its prompt repeal. The Jew Bill became a clearly defined issue in Maryland politics. In the debate in the legislative session of 1819–20, a detailed account of which has been preserved in notes taken by Thomas Kennedy and communicated to Jacob I. Cohen, it was openly charged that certain members had failed of reelection because they had voted for the repeal of Jewish disabilities. On the other hand, a disposition favorable to Jewish emancipation became at an early date a sine qua non of election from Baltimore. In 1822 a bill to the desired effect passed both houses of the General Assembly; but the constitution of Maryland required that any act amendatory thereto must be passed at one session of the General Assembly and published and confirmed at the succeeding session of the legislature. Accordingly recourse was necessary to the legislative session of 1823–24, in which a confirmatory bill was introduced, accompanied by a petition, marked by singular loftiness of sentiment and dignity of tone, from the Jews in Maryland. The bill was confirmed by the Senate, but in the House of Delegates, after a stirring debate, the important speeches in which have been preserved, it was defeated, and all formal legislation hitherto enacted was rendered nugatory.

But the end was nearer, perhaps, than even the friends of emancipation dared hope. On the very last day of the following session of the legislature (Feb. 26, 1825) an act "for the relief of the Jews in Maryland," which had already received the sanction of the Senate, was passed by the House of Delegates by a vote of twenty-six to twenty-five, only fifty-one out of eighty members being present. The bill provided that "every citizen of this state professing the Jewish religion" who shall be appointed to any office of profit or trust shall, in addition to the required oaths, make and subscribe a declaration of his belief in a future state of rewards and punishments instead of the declaration now required by the government of the state. A year later the brief but effective statute was enacted "that an act passed at December session, 1824, entitled an 'act for the relief of the Jews in Maryland,' shall be, and the same is hereby, confirmed."

Act of 1825.

An epilogue to the history of the struggle thus sketched were the repeal in 1847, at the instance of Dr. Joshua I. Cohen and through the efforts of John P. Kennedy, of a curious surviving discrimination against the Jews in the existing laws of evidence, and the efforts made, also at the instance of Dr. Joshua I. Cohen, in the constitutional conventions of 1850 and 1867 to eliminate entirely the religious test. The removal of the civil disabilities of the Jews in Maryland was gracefully signalized by the prompt election in Baltimore (Oct., 1826), as members of the city council, of Solomon Etting and Jacob I. Cohen, both of whom had been throughout the moving spirits of the legislative struggle. Cohen was made president of the "First Branch," and subsequently was elected for a long series of years as a municipal representative of his ward.

Since 1825 the Jew in Maryland has suffered no formal disability with respect to political office, and he has been frequently appointed to positions of trust and influence. The later history of the Jews in Maryland has been in the main the history of the Jewish community of BALTIMORE. Small bodies of Jews are to be found in Cumberland (165 in 1901), Hagerstown (209 in 1902), and in many localities throughout the state. The Jewish population of Baltimore in 1902 was estimated at 25,000, and that of the twenty-three counties (including towns) outside of Baltimore, at 1,500, making the total Jewish population of the state 26,500.

MÄRZROTH (pseudonym of **Moritz Barach**): Austrian author; born in Vienna March 21, 1818; died at Salzburg in 1888. After leaving the University of Vienna in 1844 he entered the field of journalism, in which his influence helped to establish a more liberal régime. He founded several journals, including "Das Wiener Feuilleton" (1853; belles-lettres), "Der Komet" (Vienna, 1853; humor), and "Die Komische Welt," edited the comic album "Brausepulver" (Vienna and Leipsic, 1847 and 1848), and wrote for "Fliegende Blätter," "Ueber Land und Meer" ("Wiener Croquis," a humorous chronicle of Vienna life), "Bauerle's Theaterzeitung" (letters of travel from 1855), and other publications. Most of his poems are in dialect, of which he was a master, and many of his songs have been set to music. Toward the end of his life he left Baden bei Wien, where he had long lived, and settled at Salzburg.

The following works of Barach may be mentioned: "Bilder, Lieder, und Geschichten," in dialect (Berlin, 1854); "Liederbuch ohne Goldschnitt" (Dresden, 1856); "Satans Leier" (Prague, 1860); "Spottvögel (*ib.* 1864); "Geistergestalten aus dem Alten Wien" (Vienna, 1868); "Schattenspiele aus dem Alten und Neuen Wien" and "Bitt' Gar Schön, Singa Lass'n!" poems in the Salzburg dialect (1878); "Lachende Geschichten" (4 vols., 1880-81); "Weltlust: Historietten, Schwänke und Lieder eines Heitern Vaganten" (Leipsic, 1883); "Alt-Wien: Bilder und Geschichten" (*ib.* 1885); "Ein Neuer Decamerone" (*ib.* 1887); and the following comedies: "Fritz Nürnberger," "Die Frau Professorin," "Zur Statistik der Frauen" (*ib.* 1869, in one act), "Lucretia Borgia" (with Otto Prechtler), "Der Biberhof," "Eine Million für einen Erben" (with L. Feldmann).

S. N. D.

MASADA: Strong mountain fortress in Palestine, not far west of the Dead Sea. The fortress was built by the high priest Jonathan (a statement which Schürer upon insufficient grounds holds to be false), who also gave it its name (Josephus, "B. J." vii. 8, § 3). The name is certainly Hebrew: "Meẓadah" = "mountain fortress." Josephus writes Μασάδα and Μασαδά (variant, Μεσάδα); Strabo (xvi. 2, § 44) corrupts it to Μοασάδα; while Pliny ("Historia Naturalis," v. 17, § 73) writes correctly "Masada" (comp. "Die Epitome des Solinus," ed. Mommsen, § 35). Helix, second in command under Cassius, took the fortress from the Herodians in 42 B.C. (Josephus, "Ant." xiv. 11, § 7; "B. J." i. 12, § 1). Later Herod took refuge here ("Ant." xiv. 13, § 8; "B. J." i. 13, § 7); Antigonus, who besieged the fortress, could not take it, in spite of the fact that the defenders suffered from a scarcity of water ("Ant." xiv. 14, § 6; 15, §§ 1-4; "B. J." i. 15, §§ 3-4). When Herod became king he repaired the fortress, building a wall with thirty-seven high turrets around the summit of the mountain, which was flat. Within the wall were dwelling-houses and a splendid palace for Herod, who wished the fortress to be a place of refuge from every danger. Grain, which was stored there, on account of the purity of the air did not spoil easily ("B. J." vii. 8, § 3).

Masada attained great importance in the war with the Romans. The Sicarii captured it and killed the Roman garrison ("B. J." ii. 17, § 2); Menahem took possession of the arms stored there by Herod (*ib.* § 8); Menahem's relative Eleazar b. Jair governed the fortress for about six years (*ib.* § 9); and Bar Giora also took refuge there for some time (*ib.* 22, § 2). From here the Sicarii harassed and plundered the whole vicinity, especially Engedi (*ib.* iv. 7, § 2). Not until three years after the fall of Jerusalem did a Roman army, under Silva, advance upon Masada. Josephus in this connection gives a detailed account of the situation of the fortress, which was almost inaccessible and inexpugnable (*ib.* vii. 8, § 3); there was only one spot upon which the Romans could place a battering-ram, and even there only with great difficulty. When, finally, a breach was made in the wall, the invaders were confronted by a newly erected bulwark, which, however, they succeeded in destroying by fire. Eleazar b. Jair persuaded the besieged to kill themselves, and when the Romans entered they found alive only two women (*ib.* 8, §§ 1-7; 9, § 2).

With the fall of Masada the war came to an end (on the 15th of Nisan, 73; 72 according to Niese in "Hermes," xxviii. 211).

Smith and Robinson ("Palästina," ii. 477) discovered Masada in the cliffs of Al-Sabbah. The account of Josephus has been completely confirmed by them and by Ritter ("Erdkunde," xv. 655); and the traces of the Roman camp may still be seen.

G. S. KR.

MASARJAWAIH or **MASARJOYAH** or **MASARJIS**: One of the oldest Arabic Jewish physicians, and the oldest translator from the Syriac; lived in Bassora about 883. His name, mutilated in every possible way, has been transmitted in European sources; nor has it yet been satisfactorily explained. Neuda (in "Orient, Lit." vi. 132) compares the name "Masarjawaih" with the Hebrew proper name "Mesharsheya"; but the ending "-waih" points to a Persian origin. The form "Masarjis" has been compared with the Christian proper name "Mar Serjis"; but it is not known that Masarjis embraced either Christianity or Islam.

Masarjawaih's son, who also was a translator, and was the author of two treatises (on colors and on foods), was called "'Isa," that is, "Jesus"; which name, of course, points to the fact that this son had been converted to Christianity.

Masarjawaih translated the pandects of the archdeacon or presbyter Aaron from the Syriac into Arabic and added to the thirty chapters of this translation two of his own. He also wrote in Arabic two treatises, "The Virtues of Foods, Their Advantage and Their Disadvantage," and "The Virtues of the Medicinal Plants, Their Advantage and Their Disadvantage." None of these three writings has been preserved. Their contents, however, are known to a certain extent by quotations. How much Masarjawaih added to the translation of Aaron's pandects can hardly be decided, as the works themselves are preserved in fragments only.

MASHAL. See Parable.

MASHIAḤ, ḤASUN BEN: Karaite scholar; flourished in Egypt (or Babylonia) in the first half of the tenth century. According to Steinschneider, "Ḥasun" is a corrupted form of the Arabic name "Ḥusain," the ו being easily confounded in manuscript with the י. Ḥasun, or, as he is generally quoted by the Karaite authorities, Ben Mashiaḥ, was a younger contemporary of Saadia Gaon, whom, according to Sahl ben Maẓliaḥ in his "Tokaḥat Megullah," he once challenged to a religious controversy. Ḥasun was the author of a polemical work, written probably in Arabic, in which he refuted one of Saadia's unpublished anti-Karaite writings, which came into his possession after the death of the author. Owing to a misunderstanding of a passage (§ 258) in the "Eshkol ha-Kofer" of Hadassi, Ḥasun was erroneously credited with the authorship of the anonymous chapter, on the theodicy, entitled "Sha'ar Ẓedeḳ" (St. Petersburg, Firkovich MSS. Nos. 683, 685), in the religio-philosophical work "Zikron ha-Datot," and of "Ḳuppat ha-Rokelim." Simḥah Isaac Luzki attributes to Ḥasun also a work on the precepts ("Sefer ha-Miẓwot"). Abraham ibn Ezra, in his introduction to the commentary on the Pentateuch, quotes a Karaite scholar named Ben Mashiaḥ, who is probably identical with Ḥasun.

S. I. BR.

MASKIL (plural, **Maskilim**): **1.** A title of honor used principally in Italy. The word "maskil," with the meaning of "scholar" or "enlightened man," was used by Isaac Israeli, who died in 1326 ("my colleagues, the maskilim"; "Yesod 'Olam," ii. 11, Berlin, 1846). But in some places "maskil" meant one who held a secondary rabbinical position corresponding to that of dayyan, and Jehiel Heilprin ("'Erke ha-Kinnuyim," p. 45b, Dyhernfurth, 1806) so defines it. In the Orient the overseers of the poor, or "gabbai ẓedaḳot," are called "maskilim" (Hazan, "Kerub Mimshaḥ," p. 26b, Alexandria, 1895). In Italy, and especially in Tuscany, the title "maschil" is conferred on rabbinical students (see Panzieri in "Jewish Comment," vol. xiv., No. 18; "Il Corriere Israelitico," 1889, pp. 166–167), though in some parts of Italy the title given in such cases is "ḥaber." It may be said to correspond to the title "Morenu" among the German Jews; it is considered inferior to the rabbinical title "ḥakam" ("Il Vessillo Israelitico," 1900, p. 244). Azulai reports in his diary that in 1776 he experienced considerable difficulty in adjusting a trouble which had arisen in Ancona over the fact that the title "maskil" had been bestowed on the local ḥazzan ("Ma'agal Ṭob," p. 6b, Leghorn, 1879).

2. Among the Jews of the Slavonic countries "maskil" usually denotes a self-taught Hebrew scholar with an imperfect knowledge of a living language (usually German), who represents the love of learning and the striving for culture awakened by Mendelssohn and his disciples; *i.e.*, an adherent or follower of the HASKALAH movement. He is "by force of circumstances detained on the path over which the Jews of western Europe swiftly passed from rabbinical lore to European culture" and to emancipation, and "his strivings and shortcomings exemplify the unfulfilled hopes and the disappointments of Russian civilization."

The Maskilim are mostly teachers and writers; they taught a part of the young generation of Russian Jewry to read Hebrew and have created the great Neo-Hebrew literature which is the monument of Haskalah. Although Haskalah has now been flourishing in Russia for three generations, the class of Maskilim does not reproduce itself. The Maskilim of each generation are recruited from the ranks of the Orthodox Talmudists, while the children of Maskilim very seldom follow in the footsteps of their fathers. This is probably due to the fact that the Maskil who breaks away from strictly conservative Judaism in Russia, but does not succeed in becoming thoroughly assimilated, finds that his material conditions have not been improved by the change, and, while continuing to cleave to Haskalah for its own sake, he does not permit his children to share his fate.

The quarrels between the Maskilim and the Orthodox, especially in the smaller communities, are becoming less frequent. In the last few years the Zionist movement has contributed to bring the Maskilim, who joined it almost to a man, nearer to the other classes of Jews who became interested in that movement.

The numerous Maskilim who emigrated to the United States, especially after the great influx of Russian immigrants, generally continued to follow their old vocation of teaching and writing Hebrew, while some contributed to the Yiddish periodicals. Many of those who went thither in their youth entered the learned professions. See LITERATURE, MODERN HEBREW.

J. P. WI.—D.

MASKILEISON, ABRAHAM B. JUDAH LÖB: Russian rabbi and author; born 1788; died at Minsk 1848. He was a descendant of R. Israel Jaffe of Shklov, author of "Or Yisrael." Maskileison officiated as rabbi in many cities, and in his late years went to Minsk, where he remained till his death. Having no desire to use his cabalistic knowledge for gain, as was done by the miracle-working rabbis, he devoted his whole life to study. He lived in comparative poverty, being satisfied with a small income. He wrote the following works: "Maskil le-Etan" (Shklov, 1818), novellæ on parts of Mo'ed and Ḳodashim, printed with the approbations of Saul Katzenellenbogen of Wilna and Manasseh Iliyer; "Be'er Abraham" (Wilna, 1848), novellæ on the remaining parts of the Talmud. After his death were published: "Naḥal Etan" (*ib.* 1859), novellæ on the first two parts of Maimonides' Yad ha-Ḥazaḳah; "Miẓpeh Etan" (Jitomir, 1858–64; Wilna, 1880–86), notes on the Talmud; "Yad Abraham" (Wilna, 1888), novellæ on Yoreh De'ah; notes on Sifre, some of which are published at the end of the Wilna edition (1865).

H. R. N. T. L.

MASKILEISON, NAPHTALI: Russian Hebrew author and book-dealer; born at Radashkovichi, near Minsk, Feb. 20, 1829; died at Minsk Nov. 19, 1897. His father, R. Abraham Maskileison, a Hebrew scholar of note and the author of "Maskil le-Etan," instructed him in Talmud. Study of the poetical works of Moses Luzzatto and N. Wessely awakened Maskileison's interest in Neo-Hebrew literature, then regarded with disfavor by the Orthodox circles in which he grew up. His first poetical production was the drama "Esther," which was praised by the poet A. B. Lebensohn. Later he published, in various Hebrew periodicals, some poems which are marked by beauty of form and depth of thought. His many prose articles, published in the Hebrew periodicals during a period of forty years, are likewise distinguished for their excellence, as is his "Miktabim le-Lammed," a collection of eighty-eight letters of varied content (Wilna, 1870). One of Maskileison's most valuable undertakings was his revised edition of Jehiel HEILPRIN's "Seder ha-Dorot" (Warsaw, 1878–82). He systematized the work and corrected the errors and omissions that had rendered the chronology almost useless, and appended a biography of Heilprin. He left many works in manuscript. Maskileison represents the best type of the Maskilim.

H. R. J. G. L.

MASLIANSKY, ẒEBI HIRSCH B. ḤAYYIM: Russian preacher; born in Slutsk, government of Minsk, June 6, 1856. He received a thorough rabbinical education, spending two years in the yeshibah of Mir. Later he settled as a teacher in Pinsk, where he remained about fourteen years, occasionally preaching. In 1887 he went to Yekaterinoslaf, where also he taught and preached. In 1891 he went to Odessa, where his oratorical talent attracted the attention of the Zionist leader M. L. Lilienblum and others, who advised him to devote himself entirely to preaching. For the following three years he traveled through many parts of Russia, his Zionist speeches arousing much enthusiasm. In 1894 he went to England, and in 1895 to the United States, where he is recognized as a foremost Yiddish and Hebrew orator. Since 1898 he has lectured every Friday evening in the auditorium of the Educational Alliance, New York city. The "Yiddishe Welt," a daily Yiddish newspaper, was founded by him in 1902 in New York. He contributed also to the Hebrew periodicals "Ha-'Ibri" and "Ha-Pisgah," in which he described his Russian travels.

MASORAH: The system of critical notes on the external form of the Biblical text. This system of notes represents the literary labors of innumerable scholars, of which the beginning falls probably in pre-Maccabean times and the end reaches to the year 1425.

Etymology of the Name.

The name "Masorah" occurs in many forms, the etymology, pronunciation, and genetic connection of which are much-mooted points. The term is taken from Ezek. xx. 37 and means originally "fetter." The fixation of the text was correctly considered to be in the nature of a fetter upon its exposition. When, in course of time, the Masorah had become a traditional discipline, the term became connected with the verb מסר (= "to hand down"), and was given the meaning of "tradition." For a full discussion of the meaning and history of the word see Bacher in "J. Q. R.," iii. 785, and C. Levias in the "Hebrew Union College Annual" for 1904.

The entire body of the Masorah goes back to the Palestinian schools; but recently Dr. P. Kahle discovered a fragment of the Babylonian Masorah which differs considerably from the received text in its terminology (comp. Paul Kahle, "Der Masoretische Text des Alten Testaments nach der Ueberlieferung der Babylonischen Juden," Leipsic, 1902).

Language and Form.

The language of the Masoretic notes is partly Hebrew and partly Palestinian Aramaic. Chronologically speaking, the Aramaic is placed between two periods of the Hebrew; the latter appearing in the oldest, the pre-amoraic period, and in the latest, the Arabic period (which begins here about 800). To the oldest period belong terms like אות = "letter"; פרשה, "section"; פסוק, "verse"; טעם, "sense-clause"; מלא, "plene"; חסר, "defective"; מקרא, "Bible"; also מקרא סופרים, עטור סופרים, הכרע; the verb נקד = "to punctuate," and certain derivatives; not all of these terms, however, happen to occur in the remnants of tannaitic literature which have been preserved. The Aramaic elements may thus be dated roughly from 200 to 800.

The Masoretic annotations are found in various forms: (*a*) in separate works, *e.g.*, the "Oklah we-Oklah"; (*b*) in the form of notes written in the margins and at the end of codices. In rare cases the notes are written between the lines. The first word of each Biblical book is also as a rule surrounded by notes. The latter are called the **Initial Masorah**; the notes on the side margins or between the columns are called the **Small** or **Inner Masorah**; and those on the lower and upper margins, the **Large** or **Outer Masorah.** The name "Large Masorah" is applied sometimes to the lexically arranged notes at the end of the printed Bible, usually called the **Final Masorah,** in Hebrew literature **Masoretic Concordance** (מערכת המסורה, or מסורה מערבית).

The Small Masorah consists of brief notes with reference to marginal readings, to statistics showing the number of times a particular form is found in Scripture, to full and defective spelling, and to abnormally written letters. The Large Masorah is more copious in its notes. The Final Masorah comprises all the longer rubrics for which space could not be found in the margin of the text, and is arranged alphabetically in the form of a concordance. The quantity of notes the marginal Masorah contains is conditioned by the amount of vacant space on each page. In the manuscripts it varies also with the rate at which the copyist was paid and the fanciful shape he gave to his gloss.

The question as to which of the above forms is the oldest can not be decided from the data now accessible. On the one hand, it is known that marginal notes were used in the beginning of the second century of the common era; on the other, there is every reason to assume the existence of Masoretic baraitas which could not have been much later. The Small Masorah is in any case not an abbreviation of the Large Masorah. Like the latter, it occurs also arranged in alphabetical order.

Origin.

From the statements in Talmudic literature to the effect that there was deposited in the court of the Temple a standard copy of the Bible for the benefit of copyists, and that there were paid correctors of Biblical books among the officers of the Temple (Ket. 106a); from the fact that such a copy is mentioned in the Aristeas Letter (§ 30; comp. Blau, "Studien zum Althebr. Buchwesen," p. 100); from the statements of Philo (preamble to his "Analysis of the Political Constitution of the Jews") and of Josephus ("Contra Ap." i. 8) that the text of Scripture had never been altered; finally, from the fact that there seem to have been no differences of readings between Pharisees and Sadducees, it may be concluded that the Scriptural text, at least as much as then belonged to the canon, was already fixed, at the latest, about 200 B.C. and perhaps a century earlier.

While the text was thus early fixed, it took centuries to produce a tolerable uniformity among all the circulating copies. This is by no means astonishing when one considers that the standard copy deposited at the Temple could be of benefit only to those who were sufficiently near Jerusalem to make use of it. This was not the case with those living in the Diaspora. When to this is added the carelessness of some copyists, it will not seem strange that as late as the second century of the common era scholars found it necessary to warn against incorrect copies; and the conclusions usually drawn from differences in the late books between the Hebrew text and the Greek version lose much of their force.

In classical antiquity copyists were paid for their work according to the number of stichs. As the prose books of the Bible were hardly ever written in stichs, the copyists, in order to estimate the amount of work, had to count the letters. Hence developed in the course of time the **Numerical Masorah,** which counts and groups together the various elements and phenomena of the text. Thus וישחט (Lev. viii. 23) forms the half of the number of verses in the Pentateuch; all the names of Divinity mentioned in connection with Abraham are holy except אדני (Gen. xviii. 3); ten passages in the Pentateuch are dotted; three times the Pentateuch has the spelling לא where the reading is לו. The collation of manuscripts and the noting of their differences furnished material for the **Text-Critical Masorah.** The close relation which existed in earlier times (from the Soferim to the Amoraim inclusive) between the teacher of tradition and the Masorite, both frequently being united in one person, accounts for the **Exegetical Masorah.** Finally, the invention and introduction of a graphic system of vocalization and accentuation gave rise to the **Grammatical Masorah.**

Fixation of the Text.

The old Hebrew text was, in all probability, written in continuous script, without any breaks. The division into words, books, sections, paragraphs, verses, and clauses (probably in the chronological order here enumerated); the fixing of the orthography, pronunciation, and cantillation; the introduction or final adoption of the square characters with the five final letters (comp. NUMBERS AND NUMERALS); some textual changes to guard against blasphemy and the like; the enumeration of letters, words, verses, etc., and the substitution of some words for others in public reading, belong to the earliest labors of the Masorites. Since no additions were allowed to be made to the official text of the Bible, the early Masorites adopted other expedients: *e.g.*, they marked the various divisions by spacing, and gave indications of halakic and haggadic teachings by full or defective spelling, abnormal forms of letters, dots, and other signs. Marginal notes were permitted only in private copies, and the first mention of such notes is found in the case of R. Meïr (*c.* 100–150). The traditionally fixed text, especially with a view to its orthography, was called מסורת; the traditional pronunciation, מקרא; the division into sense-clauses, which underlies the proper recitation or cantillation, פיסוק טעמים or הכרע.

Tikkune Soferim.

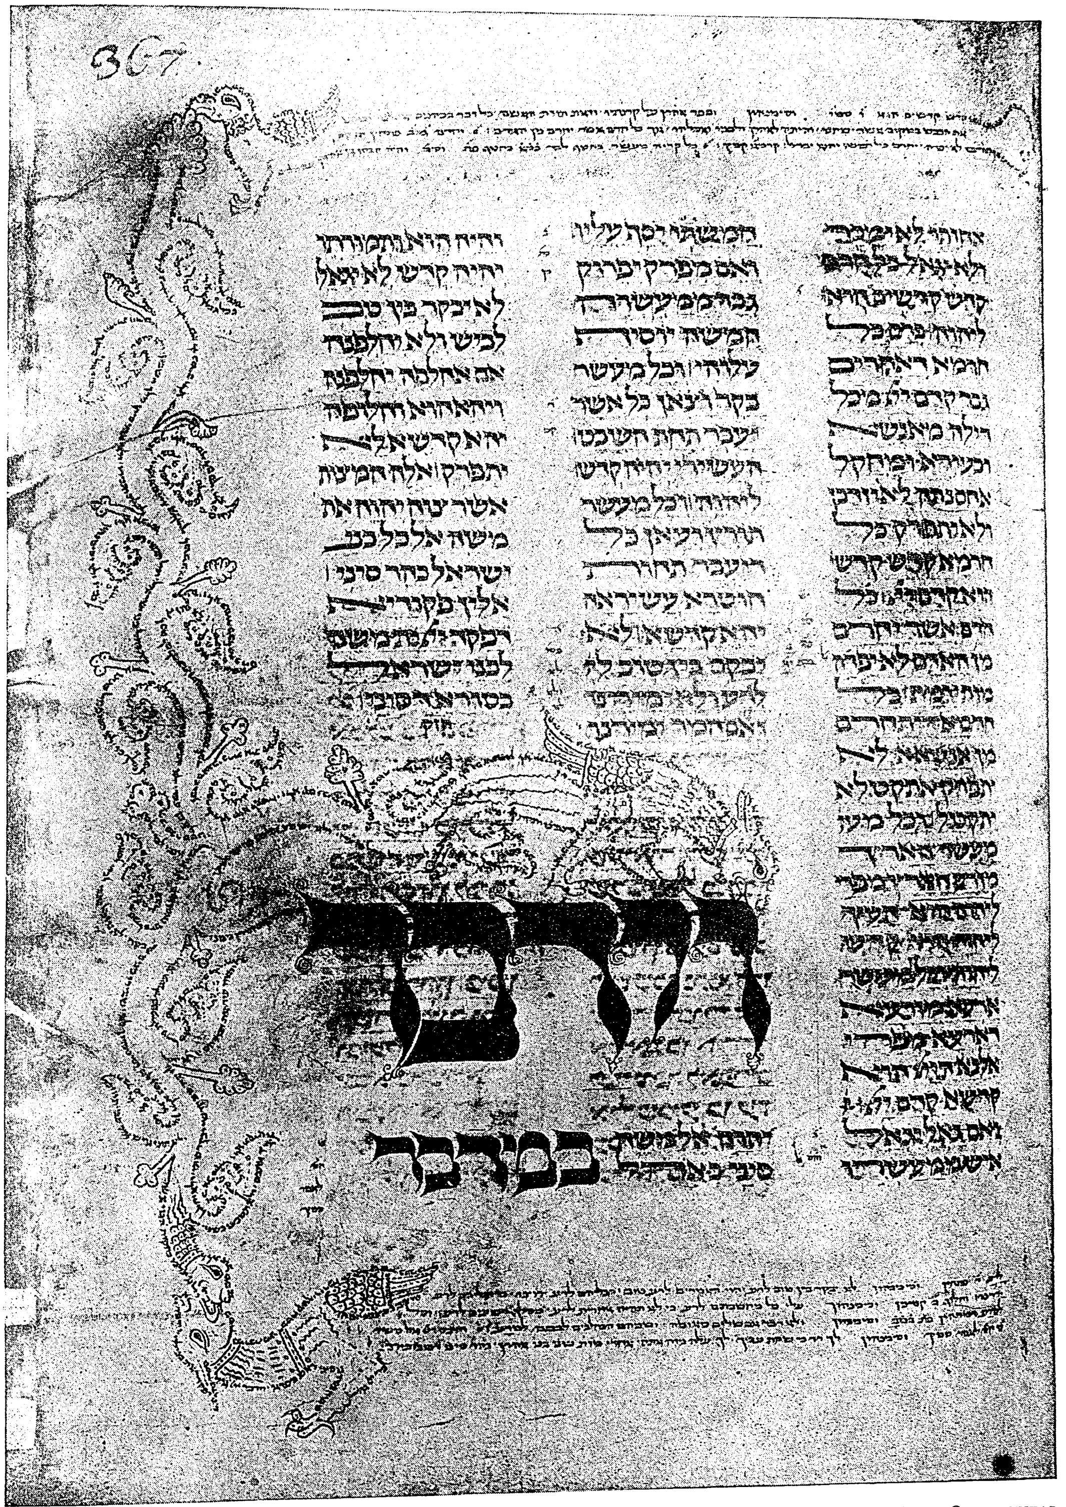
Tannaitic sources mention several passages of Scripture in which the conclusion is inevitable that the ancient reading must have differed from that of the present text. The explanation of this phenomenon is given in the expression כנה הכתוב ("Scripture has used euphemistic language," *i.e.*, to avoid anthropomorphism and anthropopathism). R. Simon b. Pazzi, an amora of the third century, calls these readings "emendations of the Scribes" ("tiḳḳune Soferim"; Gen. R. xlix. 7), assuming that the Scribes actually made the changes. This view was adopted by the later Midrash and by the majority of Masorites. In Masoretic works these changes are ascribed to Ezra; to Ezra and Nehemiah; to Ezra and the Soferim; or to Ezra, Nehemiah, Zechariah, Haggai, and Baruch. All these ascriptions mean one and the same thing: that the changes were made by the Men of the Great Synagogue (comp. Tan., Beshallaḥ, on xv. 7). Ben Asher remarks that the proper expression would have been כנוי סופרים ("Diḳduḳe ha-Ṭe'amim," § 57), but, in the sense of the oldest sources, the only proper expression would have been כנוי הכתובים, a term which in an old variant has really been preserved (comp. Blau, "Masoretische Untersuchungen," p. 50).

The term "tiḳḳun Soferim" has been understood by different scholars in various ways. Some regard it as a viva voce correction or modification of Biblical language authorized by the Soferim for homiletical purposes; *i.e.*, the Scribes interpret a supposed euphemism, and their interpretation is called "tiḳḳun Soferim." Others take it to mean a mental change made by the original writers or redactors of Scripture; *i.e.*, the latter shrank from putting in writing a thought which some of the readers might expect them to express. Considering the various interpretations and the fact that neither the number nor the identity of the passages in question is definite (Mekilta counts 11, Sifre 7, Tanḥuma 18, Masorah 15 or 18), S. Sachs (in "Kerem Ḥemed," ix. 57, note) and, without mentioning him, Barnes ("Journal of Theological Studies," i. 387–414) come to the conclusion that the tiḳḳun tradition belongs rather to the Midrash than to the Masorah; *i.e.*, its true bearing is on exegesis, not on textual criticism. The tiḳḳune Soferim are interpretations, not readings. The tiḳḳun tradition is probably connected with the tradition which ascribes the redaction of several books of Scripture to the Great Synagogue.

There are, however, phenomena in the Biblical text which force one to assume that at some time textual corrections had been made. These corrections may be classified under the following heads:

(1) Removal of unseemly expressions used in reference to God; *e.g.*, the substitution of ברך ("to bless") for קלל ("to curse") in certain passages.

(2) Safeguarding of the Tetragrammaton; *e.g.*, substitution of "Elohim" for "YHWH" in some passages. Under this head some have counted such phenomena as the variants of the divine names in theophorous proper names; *e.g.*, "Joahaz" for "Je-



Page from a Thirteenth-Century (?) Manuscript Bible Bearing Masoretic Notes Written to Form Ornamental Decorations.

(In the British Museum.)

hoahaz," "Elijah" for "Eliyahu," etc., but compare on this point J. H. Levy in "J. Q. R." xv. 97 *et seq.*

(3) Removal of application of the names of false gods to YHWH; *e.g.*, the change of the name "Ishbaal" to "Ishbosheth."

(4) Safeguarding the unity of divine worship at Jerusalem. Here belongs the change (Isa. xix. 18) עיר ההרס for עיר הצדק or עיר ההדם.

"Mikra" and "'Ittur."

Among the earliest technical terms used in connection with activities of the Scribes are (Ned. 37b) the "miḳra Soferim" and "'iṭṭur Soferim." In the geonic schools the first term was taken to signify certain vowel-changes which were made in words in pause or after the article; *e.g.*, אֶרֶץ, הָאָרֶץ: the second, the cancelation in a few passages of the "waw" conjunctive, where it had by some been wrongly read. The objection to such an explanation is that the first changes would fall under the general head of fixation of pronunciation, and the second under the head of "ḳere" and "ketib." Various explanations have, therefore, been offered by ancient as well as modern scholars without, however, succeeding in furnishing a satisfactory solution.

Undecided Constructions.

A number of words is mentioned—by the Talmud 5; by later authorities 8—which negatively expressed have no הכרע, but positively expressed have a השאה. According to Yer. 'Ab. Zarah ii. 8 (41c), this Masoretic note should be understood to mean that the Scribes had left undecided the question whether the affected words belonged to the preceding or to the following clause. But such an interpretation may be objected to for two reasons. First, the accentuation fixes the construction of those words in a very definite way. Even if one assumes that the accentuators had acted high-handedly and had disregarded tradition, which is not probable, it is impossible to conceive how in public worship the words were recited to indicate such doubtful construction. The reader must have connected them either with the first or with the second clause. Secondly, a still graver objection is that some of those words make sense in only one clause, the one in which the accentuators have put them. It must, therefore, be assumed that the tradition refers here to exegesis, not to textual criticism. It must refer to what is termed by later scholars עוֹלה ויורד, a kind of construction ἀπὸ κοινοῦ, wherein the word is understood to follow itself immediately. Tradition was undecided whether these words were to be read merely as they stood, or understood also with the following word.

Suspended Letters and Dotted Words.

There are four words having one of their letters suspended above the line. One of them, מנשה (Judges xviii. 30), is due to a correction of the original משה out of reverence for Moses. The origin of the other three (Ps. lxxx. 14; Job xxxviii. 13, 15) is doubtful. According to some, they are due to mistaken majuscular letters; according to others, they are later insertions of originally omitted weak consonants.

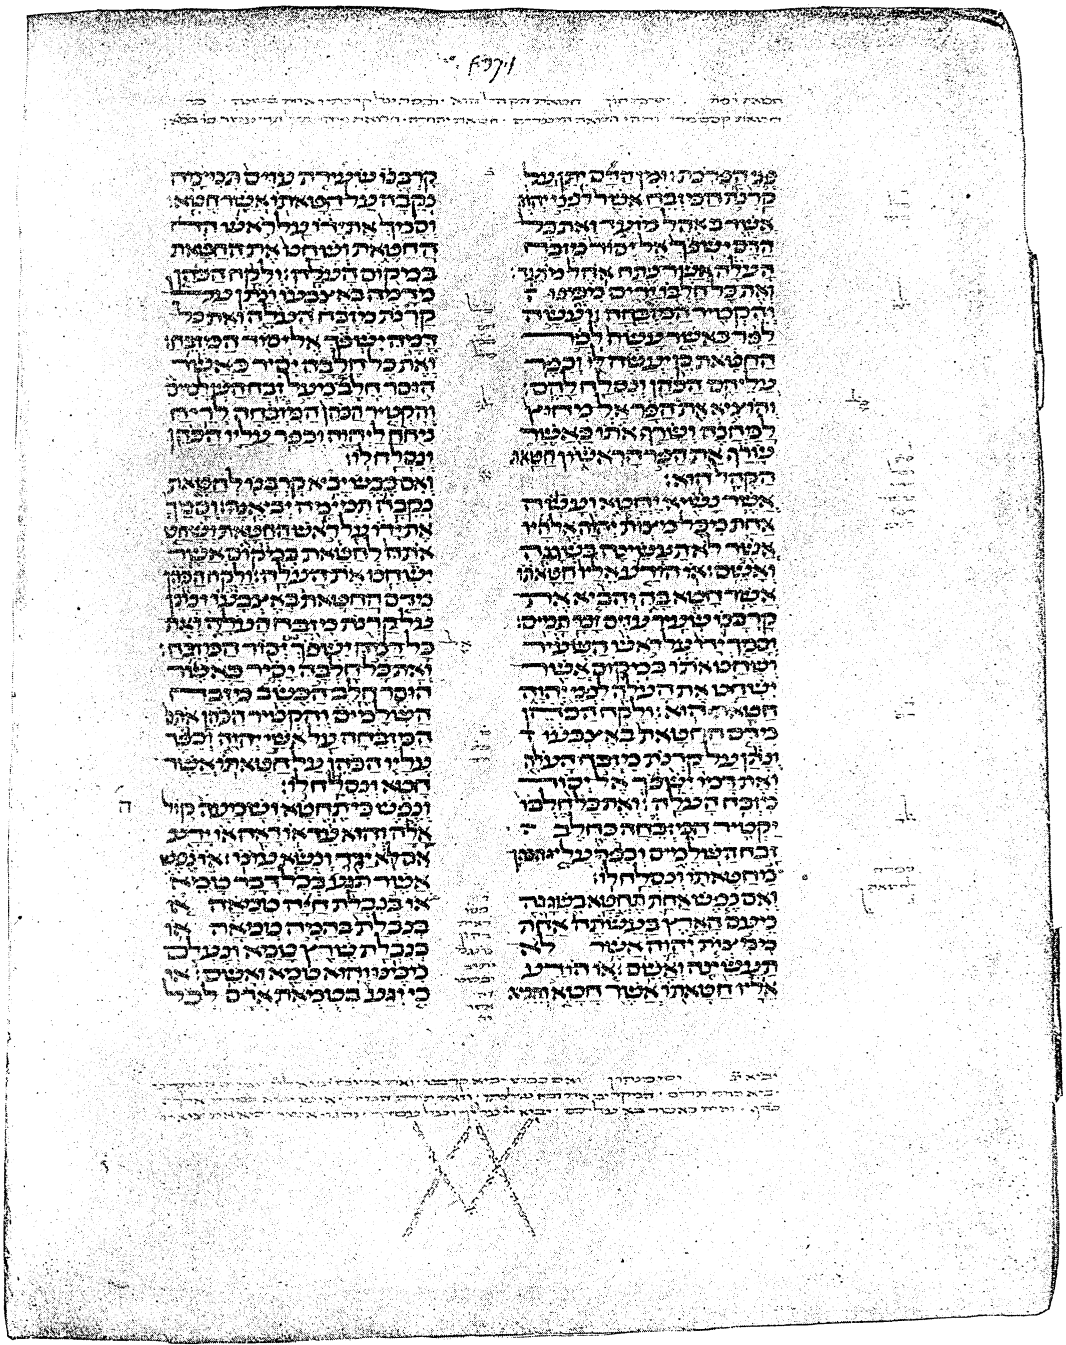
In fifteen passages in the Bible some words are stigmatized. The significance of the dots is disputed. Some hold them to be marks of erasure; others believe them to indicate that in some collated manuscripts the stigmatized words were missing, hence that the reading is doubtful; still others contend that they are merely a mnemonic device to indicate homiletical explanations which the ancients had connected with those words; finally, some maintain the dots were designed to guard against the omission by copyists of text-elements which, at first glance or after comparison with parallel passages, seemed to be superfluous. Instead of dots some manuscripts exhibit strokes, vertical or else horizontal. The first two explanations are unacceptable for the reason that such faulty readings would belong to ḳere and ketib, which, in case of doubt, the majority of manuscripts would decide. The last two theories have equal probability.

Inverted Letters.

In nine passages of the Bible are found signs usually called "inverted nuns," because resembling the letter נ. Others find a resemblance in these signs to the letter ר or כ. S. Krauss (in Stade's "Zeitschrift," xxii. 57) holds that the signs were originally obeli, and have text-critical value. He assumes that the correct reading in Massek. Soferim vi. 1, 2 is שיפוד; but the original reading seems to be שילפר, a word of unknown etymology. If the word stands for *ששפר it would be a synonym of ציון and mean simply "sign." But the reading שיפור ("ram's horn") yields a very good sense. It is the Greek *παράγραφος*, which had exactly such a sign and served the same purpose (comp. Perles, "Etymologische Studien," p. 41, note 1; p. xiv., col. 3).

Marginal Readings.

Even in antiquity substitutions were made—at first only orally in public worship; later also in the form of marginal notes in private copies—of readings other than those found in the text. As Frankel has shown ("Vorstudien," pp. 220 *et seq.*), even the Septuagint knew those readings and frequently adopted them. These variants have various origins. Some of them represent variants in ancient manuscripts and have, therefore, a text-critical value (comp. Ḳimḥi, Introduction to Commentary on Joshua; Eichhorn, "Einleitung," § 148; also Joseph ibn Waḳar, in Steinschneider, "Jewish Literature," p. 270, note 15). Others arose from the necessity of replacing erroneous, difficult, irregular, provincial, archaic, unseemly, or cacophonous expressions by correct, simpler, current, appropriate, or euphonious readings (comp. Abravanel, Introduction to Commentary on Jeremiah). A third class may have been designed to call attention to some mystic meaning or homiletical lesson supposed to be embodied in the text (comp. Krochmal, "Moreh Nebuke ha-Zeman," ch. xiii.; S. Bamberger, "Einleitung zu Tobiah b. Eliezer's Leḳaḥ Ṭob zu Ruth," p. 39, note 1). A fourth class, finally, and this very late, is due to variants found in Talmudic literature (comp. "Minḥat Shai" on Isa. xxxvi. 12, Ps. xlix. 13, Eccl. viii. 10; Luzzatto, in "Kerem Ḥemed," ix. 9 on II Sam. xxii. 8). These variants are of a threefold character: (1) words to be read ("ḳere") for those written in the text ("ketib"); (2) words to be read for those not written in the text; (3) words written, but not to be read.



ויקרא

פני הפרכת ומן הדם יתן על
קרנת המזבח אשר לפני יהוה
אשר באהל מועד ואת כל
הדם ישפך אל יסוד מזבח
העלה אשר פתח אהל מועד
ואת כל חלבו ירים ממנו
והקטיר המזבחה ועשה
לפר כאשר עשה לפר
החטאת כן יעשה לו וכפר
עלהם הכהן ונסלח להם
והוציא את הפר אל מחוץ
למחנה ושרף אתו כאשר
שרף את הפר הראשון חטאת
הקהל הוא

אשר נשיא יחטא ועשה
אחת מכל מצות יהוה אלהיו
אשר לא תעשינה בשגגה
ואשם או הודע אליו חטאתו
אשר חטא בה והביא את
קרבנו שעיר עזים זכר תמים
וסמך ידו על ראש השעיר
ושחט אתו במקום אשר
ישחט את העלה לפני יהוה
חטאת הוא ולקח הכהן
מדם החטאת באצבעו
ונתן על קרנת מזבח העלה
ואת דמו ישפך אל יסוד
מזבח העלה ואת כל חלבו
יקטיר המזבחה כחלב
זבח השלמים וכפר עליו הכהן
מחטאתו ונסלח לו
ואם נפש אחת תחטא בשגגה
מעם הארץ בעשתה אחת
מכל מצות יהוה אשר לא
תעשינה ואשם או הודע
אליו חטאתו אשר חטא והביא

ממנו והוא טמא ואשם או
כי יגע בטמאת אדם לכל

Page from a Manuscript Bible of the Fourteenth Century Containing Masoretic Notes.
(From the Sulzberger collection in the Jewish Theological Seminary of America, New York.)

A certain school of Masorites used for the term "ḳere" the synonymous term "sebirin." The readings of that school are usually registered by the Masorah disapprovingly with the addition "u-maṭ'in" = "and they are misleading."

To the Masorites belongs also the credit of inventing and elaborating graphic signs to indicate the traditional pronunciation, syntactical construction, and cantillation of the Biblical text.

History of Development.

The history of the Masorah may be divided into three periods: (1) creative period, from its beginning to the introduction of vowel-signs; (2) reproductive period, from the introduction of vowel-signs to the printing of the Masorah (1425); (3) critical period, from 1425 to the present time.

The materials for the history of the first period are scattered remarks in Talmudic and Midrashic literature, in the post-Talmudical treatises Masseket Sefer Torah and Masseket Soferim, and in a Masoretic chain of tradition found in Ben Asher's "Diḳduḳe ha-Ṭe'amim," § 69 and elsewhere. Masseket Soferim is a work of unknown date by a Palestinian author. The first five chapters are a slightly amplified reproduction of the earlier Masseket Sefer Torah, a compendium of rules to be observed by scribes in the preparation and writing of Scriptural rolls. Ch. vi. to ix. are purely Masoretic; the third part, commencing at ch. x., treats of ritualistic matter. While the work as a whole is perhaps not earlier than the beginning of the ninth century, its Masoretic portions probably go back to the sixth or seventh century. A comparison of this work with the Masoretic material found in Talmudic literature shows that the lists of marginal readings have been systematically enlarged. A critical comparison has been instituted between parallel passages in Scripture. Rules are now given, for the first time, as to the unusual form in which certain letters and words, of which the Talmud had taken special note, are to be written. The stichometrical form in which the Scriptural songs are to be arranged is described in fuller detail than it had been in the Talmud. It is also stated that in private copies the beginnings of verses used to be marked. Some readings in ch. xiii. 1 mention also accents; but these readings are doubtful (comp. Vocalization). In the chain of tradition quoted in Ben Asher the earliest name is a certain Naḳḳai, who is said to have emigrated under the persecutions of T. Annius Rufus from Palestine to Babylonia and spread Masoretic knowledge in the city of Nehardea. This would be about 140 of the common era, and the tradition, containing eight names, would date about 340.

Differences Between Babylonia and Palestine.

In the course of time differences in spelling and pronunciation had developed not only between the schools of Palestine and of Babylonia—differences already noted in the third century (comp. Ginsburg, "Introduction," p. 197)—but in the various seats of learning in each country. In Babylonia the school of Sura differed from that of Nehardea; similar differences existed in the schools of Palestine, where the chief seat of learning in later times was the city of Tiberias. These differences must have become accentuated with the introduction of graphic signs for pronunciation and cantillation; and every locality, following the tradition of its school, had a standard codex embodying its readings.

In this period living tradition ceased, and the Masorites in preparing their codices usually followed the one school or the other, examining, however, standard codices of other schools and noting their differences. In the first half of the tenth century Aaron b. Moses ben Asher of Tiberias and Ben Naphtali, heads of two rival Masoretical schools, each wrote a standard codex of the Bible embodying the traditions of their respective schools. Ben Asher was the last of a distinguished family of Masorites extending back to the latter half of the eighth century. In spite of the rivalry of Ben Naphtali and the opposition of Saadia Gaon, the most eminent representative of the Babylonian school of criticism, Ben Asher's codex became recognized as the standard text of the Bible. Notwithstanding all this, for reasons unknown neither the printed text nor any manuscript which has been preserved is based entirely on Ben Asher: they are all eclectic. Aside from Ben Asher and Ben Naphtali, the names of several other Masorites have come down; but, perhaps with the exception of one—Phinehas, the head of the academy, who is supposed by modern scholars to have lived about 750—neither their time, their place, nor their connection with the various schools is known.

Ben Asher and Ben Naphtali.

The two rival authorities, Ben Asher and Ben Naphtali, practically brought the Masorah to a close. Very few additions were made by the later Masorites, styled in the thirteenth and fourteenth centuries Naḳdanim, who revised the works of the copyists, added the vowels and accents (generally in fainter ink and with a finer pen) and frequently the Masorah. Considerable influence on the development and spread of Masoretic literature was exercised during the eleventh, twelfth, and thirteenth centuries by the Franco-German school of Tosafists. R. Gershom, his brother Machir, Joseph b. Samuel Bonfils (Tob 'Elem) of Limoges, R. Tam (Jacob b. Meïr), Menahem b. Perez of Joigny, Perez b. Elijah of Corbeil, Judah of Paris, Meïr Spira, and R. Meïr of Rothenburg made Masoretic compilations, or additions to the subject, which are all more or less frequently referred to in the marginal glosses of Biblical codices and in the works of Hebrew grammarians.

Critical Study.

Jacob b. Ḥayyim ibn Adonijah, having collated a vast number of manuscripts, systematized his material and arranged the Masorah in the second Bomberg edition of the Bible (Venice, 1524-25). Besides introducing the Masorah into the margin, he compiled at the close of his Bible a concordance of the Masoretic glosses for which he could not find room in a marginal form, and added an elaborate introduction—the first treatise on the Masorah ever produced. In spite of its numerous errors, this excellent work has generally been acknowledged as the "textus receptus" of the Masorah. Next to Ibn Adonijah the critical study of the Masorah has been most advanced by Elijah Levita, who published his famous "Massoret ha-Massoret" in 1538. The "Tiberias" of the elder Buxtorf (1620) made Levita's researches accessible to Christian students. Walton's eighth prolegomenon is largely a réchauffé of the "Tiberias." Levita compiled likewise a vast Masoretic concordance, "Sefer ha-Zikronot," which still lies in the National Library at Paris unpublished. The study is indebted also to R. Meïr b. Todros ha-Levi (RaMaH), who, as early as the thirteenth century, wrote his "Sefer Massoret Seyag la-Torah" (correct ed. Florence, 1750); to Menahem di Lonzano, who composed a treatise on the Masorah of the Pentateuch entitled "Or Torah"; and in particular to Jedidiah Solomon of Norzi, whose "Minhat Shai" contains valuable Masoretic notes based on a careful study of manuscripts. Mention must also be made of J. C. Wolf, whose "Bibliotheca Hebræa" contains a treatise on the Masorah and a list of Masoretic authorities (part ii., book iii.). For less-known names consult the bibliography below.

In modern times knowledge of the Masorah has been advanced by the following scholars: W. Heidenheim, A. Geiger, S. D. Luzzatto, S. Pinsker, S. Frensdorff, H. Graetz, J. Derenbourg, D. Oppenheim, S. Baer, L. Blau, B. Königsberger, A. Büchler, J. Bachrach, I. H. Weiss, S. Rosenfeld, M. Lambert, J. Reach, A. Ackermann, L. Bardowicz, and W. Bacher. Among Christian scholars are to be mentioned: H. Hupfeld, Franz Delitzsch, L. H. Strack, C. D. Ginsburg (a Jew by birth), W. Wickes, Ad. Merx, F. Praetorius, and P. Kahle.

Masorah to Targum Onkelos.

In imitation of the Masorah to the Hebrew text, a similar work exists to the text of Targum Onkelos, first edited by A. Berliner (Leipsic, 1877), then by S. Landauer (Amsterdam, 1896). According to Berliner's opinion, it must have been compiled about the end of the ninth or the beginning of the tenth century.

T. C. L.

MASSACHUSETTS: A northeastern state in the American Union. The earliest record of a Jew in Massachusetts bears the date of May 3, 1649, and refers to a certain Solomon Franco, for whom an allowance was made pending his return to Holland; and recorded among the inhabitants of Boston, in 1695, there are "Samuell, the Jew," and "Raphaell Abandana" ("Publications Am. Jew. Hist. Soc." No. 11, pp. 78-80). On Sept. 13, 1702, Simon the Jew was baptized at Charlestown, taking the name of "Barns," and about the same time a certain Joseph Frazon or Frazier lived in Boston. An attempt to convert him was unsuccessful, and it is recorded that he died Feb. 4, 1704, and that his body was sent to Newport, R. I., for burial. In 1722 Judah MONIS was baptized; he was an instructor in Hebrew at Harvard College from 1723 to 1760.

The first considerable colony in Massachusetts resulted directly from the Revolutionary war. In 1777 Aaron Lopez and Jacob Rivera, with fifty-nine other Jews, left Newport to find a refuge from its invasion by the British troops, and established themselves at Leicester, Mass. Lopez was a man of great wealth and, according to Ezra Stiles, in the extent of his commercial dealings was probably surpassed by no merchant in America (*ib.* No. 10, p. 15). He purchased an estate at Leicester and erected upon it a substantial house, which since has become the home of the Leicester Academy. The colonists rigidly observed the customs of their faith. In spite of the high opinion in which Lopez was held, it appears that in 1762 the supreme court of Massachusetts refused to grant the application of himself and Isaac Lezur for naturalization (*ib.* No. 6, p. 71).

It is known that other Jews went to Boston during the seventeenth century, but owing to the intolerance of the Puritans, they either removed or embraced Christianity. This accounts for the numerous families of distinctively Jewish name found in many of the Massachusetts towns. Just prior to the War of the Revolution Moses Michael Hays went to Boston from Newport, taking with him his own family and his two nephews, Abraham and Judah Touro. Hays was a successful insurance underwriter, and for four years (1788 to 1792) was grand master of the Grand Lodge of Masons of Massachusetts; he died in 1805. It is not known that any of his descendants live there. Abraham Touro became a very wealthy merchant, and when he died in 1822 he bequeathed $10,000 to the Massachusetts General Hospital, and $5,000 each to the Asylum for Indigent Boys, the Massachusetts Humane Society, and the Boston Female Society. His brother Judah Touro went to New Orleans. Judah Hays, Isaac Solomon, and Abraham Solis were residents of Boston between 1780 and 1798.

In 1830 a number of Algerian Jews settled in Boston and occupied themselves in trading; some of them went to Newport to live; the others disappeared, and no trace of them is left. In 1840 a number of German and Polish Jews settled in Boston, and their descendants still live there (for the history of Boston Jews see BOSTON). After 1880, Russian and Rumanian Jews began to settle in the towns outside of Boston, and now there are estimated to be about thirty thousand Jews in various parts of the state, exclusive of those in the capital. The newcomers have become Americanized and take an interest in public affairs; many work in factories and mills; it is estimated that 30 per cent of them are successfully established in various branches of business; a few still follow the old custom of peddling. In Boston there are 40,000 Jews, 21 synagogues, 64 lodges, many charitable societies, and a large number of social and literary clubs.

STATISTICS.

The following statistics of Massachusetts cities and towns (exclusive of Boston) were obtained through inquiry of town officials or are based upon the "American Jewish Year Book" for 5661, and upon manuscript additions thereto in possession of the Jewish Publication Society of America:

MASSARANI (MASSARAN): Name of an Italian family which has been known since the latter part of the fifteenth century. Originally the name of the family was ממאסראן, from Massarano, a small town near Novara in Piedmont. Subsequently various members lived at Mantua, and still later at Milan. The earliest known bearer of the name was **Isaac Massaran,** who copied, in 1255, No. 23 of the Codex De Rossi; it is not certain, however, whether he belonged to this family or whether he was a native of Mazarron, in Spain. Two centuries later the copyist **Isaiah b. Jacob b. Isaiah Massaran** lived at Mantua and wrote Nos. 6 and 620 of the Codex De Rossi, No. 127 of the Codex Turin, and No. 45 of the Codex Montefiore. Azariah dei Rossi's scholarly brother-in-law, **Ḥayyim Massaran,** who owned a number of rare Talmudical works, lived at Mantua about 1560. At the same time **Bezaleel b. Samson, Levi b. Jacob, Samson b. Jehiel,** and **Samson b. Isaiah,** all belonging to the Massarani family, were living in this community. Among these Bezaleel b. Samson Massarani is especially noteworthy for his energetic efforts to save Hebrew books from the destruction with which the Inquisition threatened them. He was the chairman of the deputation of communal directors and rabbis that decided at Padua upon an anticipatory censorship in order to secure permission to reprint the Talmud. As the leader of this deputation Bezaleel went to Rome, to Pope Sixtus V., and obtained permission to print and own the Talmud after it had been censored and expurgated and the title changed. **Samson Massarani** was one of the deputies cited by the cardinals in 1590 before the Congregation of the Index Expurgatorius. Another **Samson,** a son of Bezaleel, was a pupil of R. Moses Provençal, with whom he corresponded on Talmudic subjects. In 1592 **Simon Massarani** published at Mantua Al-Ḥarizi's "Mishle Hakamim," with a rimed Italian translation, under the title "Motti di Diversi Saggi Tradotti di Lingua Hebræa in Volgare." Abraham b. Isaac Alluf described, in 1630, the expulsion of the Jews from Mantua. **Ephraim Massarani** was rabbi at Cento in 1676, and in correspondence with Isaac Lampronti. About the same time **Isaac Massarani** was rabbi at Salonica. Among the more recent members of this family may be mentioned **Giacobbe Massarani,** lawyer at Milan about 1850, whose son **Tullo,** one of the foremost writers of Italy, was formerly vice-president of the Italian chamber, and has been a member of the Senate since 1879.

G. I. E.

MASSARANI, TULLO: Italian senator, author, and painter; born at Mantua in 1826. He studied law at Pavia and took an active part in the Italian revolution of 1848, after the failure of which he fled to Frankfort-on-the-Main. From Paris he went to Switzerland, and a little later to Milan, where he became a member of Parliament (1860–67), and was afterward very efficient as a member of the municipal council. He is well known in Italy as a painter, his best-known painting being "The Warm Baths of Alexandria." His essay on Heine in "Crepuscolo" (1857) and his translation of the latter's works have made Heine very popular in Italy. Massarani was president of the international jury of art at the Paris Exposition of 1878. He is a member of the Lombard Institute for Arts and Sciences, of the Academy of Fine Arts, and honorary member of the Academy of San Luca. He is the author of the following works: "Quelques Mots sur la Défense de Venise" (Paris, 1849); "L'Idea Italiana Attraverso i Tempi" (*ib.* 1850); "Deutschland und die Italienische Frage" (Breslau, 1859); "L'Arte a Monaco e a Norimberga" (Florence, 1870); "Studii di Letteratura e di Arte" (*ib.* 1873); "Studii di Politica e di Storia" (*ib.* 1875); "Domeniche di Agosto" (*ib.* 1876); "Legnano, Grandi e Piccole Storie" (1876); "Eugenio Camerini e i Suoi Tempi" (*ib.* 1877); "L'Arte a Parigi" (Rome, 1879); "Sermoni" (Florence, 1880; 2d ed. 1884); "Il Libro di Giuda" (*ib.* 1882); "Saggi Critici" (2d ed. 1883); "Carlo Tenca e il Pensiero Civile del Suo Tempo" (*ib.* 1886); "Cesare Correnti Nella Vita e Nelle Opere" (*ib.* 1892); "L'Odissea della Donna," prose and verse (Rome, 1893); "Come la Pensava il Dottore Lorenzi" (1894). He has collected and published the scattered writings of Cesare Correnti.

MASSEKET or **MASSEKTA** (plural, **Massektot, Massektiyyot**; Num. R. xviii. 21; Midr. Teh. civ. 25): Any collection of rabbinic texts affecting any more or less complex subject. Literally the term means "a web" (from נסך = "to weave"; comp. Latin "textus"). It is applied indifferently to a treatise of the Mishnah (Shab. 3b; B. Ḳ. 102a), to a compilation of baraitot (Shab. 114a), or to a treatise of the Mishnah with Gemara (Hor. 10b). The whole of the Mishnah as now known comprises sixty-three massektot, though ancient authorities speak of sixty only, reckoning the three Babot (Baba Ḳamma, Baba Meẓi'a, and Baba Batra) as one and Sanhedrin and Makkot as one (Num. R. xviii. 21; see Straschun *ad loc.*, note 23; Cant. R. vi. 9; see Luria *ad loc.*). The Babylonian Gemara embraces thirty-seven massektot, and the Palestinian thirty-nine. Besides these there are appended to editions of the Babylonian Talmud many "minor massektot" ("massektot ḳeṭannot"), seven of which Raphael Kirchheim edited (Frankfort-on-the-Main, 1851); these seven are chiefly of a halakic nature. Latterly the term "masseket" was applied to any treatise, even if of comparatively small compass and of cabalistic type. See Talmud.

MASSEL, JOSEPH: Russian Jewish Hebraist; born at Ujasin, government of Wilna, 1850. He emigrated to England in the nineties and settled at Manchester, where he opened a printing and publishing office. Massel has translated and published the following works: "Ha-Rokel," a novel, translated from the German (Warsaw, 1886); "Shimshon ha-Gibbor," a translation of Milton's "Samson Agonistes" (Manchester, 1895); "Mi-Kenaf ha-'Areẓ," original poems, and translations from the English (*ib.* 1898); "Dibre Aḥiḳar," translation of "Ahikar the Wise" (*ib.* 1898); "Yehudah ha-Makkabi," a translation of Longfellow's "Judas Maccabeus" (*ib.* 1900). He has published also "Ha-Maḳhelah," a collection of Hebrew poets from 1725 to 1903 (London, 1903).

Bibliography: Zeitlin, *Bibl. Post-Mendels.* p. 232; Lippe, *Osaf ha-Mazkir he-Ḥadash*, p. 260, Vienna, 1899; *Jewish Year-Book*, 1904.

J. A. S. W.

MASTER AND SERVANT: The Pentateuch lays down the rule, in favor of the workman, that "the wages of him that is hired shall not abide with thee all night until the morning" (Lev. xix. 13); the preceding words of the same verse, "thou shalt not oppress thy neighbor" (R. V.), are also construed as forbidding the withholding of the workman's hire (B. M. 110). Even more strongly is this idea expressed in Deut. xxiv. 15: "In his day thou shalt give him his hire; neither shall the sun go down upon it" (R. V.).

Deut. xxiii. 25, which permits one who goes into the vineyard or the cornfield of his neighbor to pluck and eat grapes or ears of corn, though he may not use a vessel for the former nor a sickle for the latter, is by tradition (B. M. vii. 2–8) interpreted as applying only to the workmen who enter into the vineyard or field in the employment of the owner.

Board as Wages.

(1) What the Mishnah says about the rights and duties of workmen ("po'alim") applies mainly to those employed in husbandry; mechanics and carriers are specially treated as such. As in the law of rural leases (see Landlord and Tenant), local custom was the principal standard in dealings with those hired for husbandry. The Mishnah (B. M. vii. 1) says, "He who hires workmen and asks them to work in early morning or in late evening at a place where early morning or late evening work is not customary can not compel them [to do so]. Where the custom is to feed, he must feed; to provide sweets, he must provide [them]—all according to the custom of the province." This applies also to the quality of the board, as R. Simeon ben Gamaliel points out in answer to the saying of R. Johanan ben Mattai, of whom the following is reported: He sent his son to hire laborers, and the son agreed to board them. When he returned to his father, the latter said: "My son, even if you provide for them a meal equal to the best of Solo-

mon's, you have not discharged your obligation to them, for they are the children of Abraham, Isaac, and Jacob. Before they begin to work, say to them: 'I shall give you bread and beans.'" Though R. Johanan's view is not correct, it shows the high regard in which even the lowly Israelite, depending on hired labor for his daily bread, was held by the sages (B. M. 83-87).

(2) The passages in Leviticus and Deuteronomy on the payment of hired laborers, one giving the entire day and the other the entire night in which to pay, are thus harmonized in the Mishnah (B. M. ix. 11): "He that is hired by the day receives [his wages] at any time in the [following] night; one hired by the night, at any time in the [following] day; one hired by the hour, at any time during the night and day following; one hired by the week, month, year, or week of years, if the time ends in the day, during the remainder of the day; if during the night, he receives it during that night or on the following day." The duty of the hirer to pay promptly is not confined to wages, but extends to payment for the use of cattle or implements (B. M. ix. 12), probably because these were often furnished by the workman, as is the case to-day with the teamster, who sets a price per day for himself and his team.

User of Crop.

(3) In regard to the right to eat grapes or ears of corn in the master's field, the Mishnah (B. M. vii. 2-8) says: "The following eat according to Scripture: He that works on what is affixed to the ground eats at the time of finishing the work; he that works on what is separated from the ground eats before the work is complete [for after that it is subject to tithe] of those things which grow from the earth [which excludes esculent roots]." But those engaged in milking or cheese-making, for instance, do not eat of the produce they are handling. "He whose work is among figs has no right to eat from the grapes, or vice versa; but the man may restrain his appetite until he comes to the finest fruit." All this applies to men at ordinary work; but when the workmen are engaged in bringing back some of the master's lost property, they may eat while going from furrow to furrow, or while returning from the wine- or oil-press, or from what is on a beast of burden which they are unloading. The workman may eat cucumbers, or dates, or the like, irrespective of their market value; but he should be taught not to act greedily and thereby "close the door upon himself." The workman may, for a sum of money, surrender his right to eat, either on his own behalf, or on behalf of his wife, or of his grown children or slaves, but not on behalf of his infant children or infant slaves, or of his beasts.

Those that watch the crops are according to Scripture not permitted to eat, but by custom are, nevertheless, allowed to do so. When one man watches the fields of several owners he may satisfy his hunger from the field of one alone (B. M. 87-93).

(4) Elsewhere (B. M. vi. 1-2) the Mishnah speaks of mechanics ("umanin"), ass-drivers, and teamsters, the hirer being not a master mechanic or master carrier, but a householder ("ba'al ha-bayit") who employs them in his own affairs. If, in the case of the hirer and the mechanic, one has led the other into error, the latter has no remedy beyond a "rebuke" ("tar'umet"). In the Gemara two possible cases of this sort are mentioned. In one the householder sends one workman to employ others, and the workman so sent engages them either at higher wages than authorized (which, of course, does not bind the employer), or at lower wages, which, to their loss, they accept. In the other, after work is begun, the master (or the workmen) refuses to continue. But where an ass-driver or teamster is hired under pressing circumstances, as for a wedding or a funeral, or where workmen are hired to bring in flax from the tanks, or to do similar tasks involving perishable matter, and they refuse to continue (after beginning the work), the hirer may employ others at the cost of the workmen so refusing, to the extent of the whole wage or any part thereof.

Mechanics.

When the mechanics who have been employed refuse to continue with the work (after doing part) they are at a disadvantage; the hirer may take out of their wages all the cost of employing others, even though the rate of wages has risen; but if the householder refuses to continue he is at a disadvantage; that is, he must pay them for what they have done plus the whole contract-price for the future work, less what it would cost to hire others, even though the rate of wages has fallen in the interval. In general, whoever recedes from a contract is at a disadvantage (lit. "his hand is the lower"). These rules naturally would apply to husbandry also (B. M. 75a; B. B. 153a).

(5) Whenever a workman in plying his trade has in his charge any chattel or animal of his employer, his liability for loss or damage is measured by that of a "keeper for hire" (B. M. vi. 6). See BAILMENTS.

MAT, MOSES BEN ABRAHAM: Galician rabbi; born at Przemysl about 1550; died at Opatow 1606. After having studied Talmud and rabbinics under his uncle R. Ẓebi and Solomon Luria, he became rabbi of Beldza, where he had a large number of pupils. He retired from this rabbinate and lived privately for a time at Vladimir. He was then called to the rabbinate of Przemysl, and, in 1597, to that of Luboml. Toward the end of his life Mat became the chief of the community of Opatow and district rabbi of Cracow.

Mat was the author of the following works: "Taryag Miẓwot" (Cracow, 1581), a versification of the 613 commandments; "Maṭṭeh Mosheh" (*ib.* 1590-91), a treatise on the practical ritual laws; "Ho'il Mosheh" (Prague, 1611), a simple and homiletic commentary on the Pentateuch, in which he occasionally explains the commentary of Rashi. Some responsa of his are to be found in the responsa collections of his rabbinical contemporaries.

S. S. B. FR.

MATAH MEḤASYA (MAḤSEYA): Town in southern Babylonia, near Sura (see Schechter, "Saadyana," p. 63, note 1). Sherira Gaon regarded the two places as identical, for in his accounts of the geonim of Sura he uses the names of both Matah Meḥasya (or Meḥasya) and Sura to indicate the seat of the academy, the former name even being the more frequent of the two. In the passage where he describes the founding of the Academy of Sura by Rab he says expressly that Rab had come to "Sura, which is Matah Meḥasya" (ed. Neubauer, i. 29; variant, "Sura, called 'Matah Meḥasya'"). There is no doubt, however, that these names belonged to two distinct towns, which came to be regarded as one when the seat of the academy was mentioned. They are named together in Ber. 29a, where the different modes of speech of the peoples of the two places are noted. Other Talmudic passages clearly indicate that these were two different towns (B. M. 67b; Yoma 86a). Sherira Gaon himself says (i. 30) that in the second half of the third century Ḥuna's school (by implication the academy founded by Rab) was in the vicinity of Matah Meḥasya; Rab's colleague Ḥisda lived at Sura. It seems likely, therefore, that the school was situated between the two places.

When the academy entered upon a new period of prosperity, under Ashi, in the second half of the fourth century, its seat was at Matah Meḥasya, where Ashi lived, and most of the Talmudic references to this place, which, Ashi says (Ket. 4a), may not be called either a city or a borough, date from his time. He refers to its synagogue, which strangers visited on his account (Meg. 26a), and he claims to have saved the town from destruction by prohibiting the construction of houses higher than the synagogue (Shab. 11a). Ashi was wont to say that the non-Jewish inhabitants of Matah Meḥasya were hard-hearted, since they beheld the splendor of the Torah twice a year at the great Kallah assemblies, and yet not one of them was converted to Judaism (Ber. 27b).

Halevy assumes that Sura again became the seat of the academy after Ashi's death ("Dorot ha-Rishonim," ii. 599), and that Mar b. Ashi restored Matah Meḥasya to the position to which Ashi had raised it. From his time probably dates the maxim which the martyr Mashershaya gave his sons, contrasting the outward poverty of Matah Meḥasya with the splendor of Pumbedita: "Live on the dung-heaps of Matah Meḥasya and not in the palaces of Pumbedita!" (Ker. 6a; Hor. 12a). There were various differences of opinion between the scholars of Pumbedita and Matah Meḥasya regarding questions of civil law, the opinions being collected in Ket. 55a. Rabina, the last amora of the Academy of Sura, lived at Matah Meḥasya (see Yoma 86a; Ḳid. 33a; B. Ḳ., end). The Talmud refers to the destruction of Matah Meḥasya (Shab. 11a), but in post-Talmudic times the town lent its name to the Academy of Sura, as stated above.

S. S. W. B.

MATALON, JACOB BEN SOLOMON: Turkish rabbinical scholar; lived at Salonica in the sixteenth century. According to De Rossi ("Dizionario," i. 135) the name "Matalon" is the Hebrew equivalent of "one of Toulon," but Zunz (see Steinschneider, "Cat. Bodl." col. 1241) derives it from "Mataloni," the name of an Italian town. In spite of his premature death Matalon wrote several works, two of which were published (Salonica, 1597): "She'erit Ya'aḳob," sermons, and "Toledot Ya'aḳob," commentary on various haggadot in the Talmud and Midrashim.

E. C. M. SEL.

MATALON, MORDECAI: Rabbi of Salonica in the sixteenth century; uncle of Jacob b. Solomon Matalon. Besides being a prominent Talmudist, Matalon was, according to his companion Samuel di Modena, who quotes him frequently in his responsa, well versed in secular sciences (Responsa on Ḥoshen Mishpat, No. 40). He is quoted also by Isaac Adarbi in his "Dibre Ribot" (Nos. 217, 326). Matalon was the author of responsa inserted in the "Mishpeṭe Shemuel" of Samuel Ḳala'i (Venice, 1599).

MATER SYNAGOGUE. See PATER SYNAGOGUE.

MATHEMATICS: The science that treats of the measurement of quantities and the ascertainment of their properties and relations. The necessity of studying astronomy for calendric purposes caused the ancient Hebrews to cultivate various branches of mathematics, especially arithmetic and geometry, applications of which are frequent in the Mishnah and Talmud. With regard to arithmetic there occur the four rules, in both whole numbers and fractions; even the decimal system is alluded to by Rabba, who says that the Persians called the number 10 "one" (Ber. 60a). As to geometry, the treatises 'Erubin, Kelim, Ohalot, etc., contain many applications of planometry and stereometry. The terms "bigon," "trigon," "tetragon," and "pentagon" are found several times in the Talmud, both in their geometrical sense, signifying a figure of two, three, four, or five angles, and in their arithmetical sense, expressing the numbers 2, 3, 4, and 5. As early as the forty-ninth "middot" of R. Nathan $3\frac{1}{7}$ to 1 is given as the relation between the circumference and the diameter of a circle. The names which occur often in the Talmud in connection with mathematical propositions are Gamaliel, Joshua, Judah, and Samuel.

"Mishnat Middot."

Still, however rapid may have been the spread of mathematical knowledge among the Jews in the Talmudic times, no work on that science is known to have existed in Jewish literature prior to the Judæo-Arabic period, to which belongs probably the "Mishnat Middot," the oldest mathematical work in Hebrew known. According to Steinschneider, who first published it (Berlin, 1864), it is an imperfect endeavor to propound the elements of geometry.

With the expansion of the Greco-Arabic philosophy the Jews began to take part in the development of mathematics, which was regarded as a science introductory to philosophy. It was divided by the Arabian school into seven "disciplinæ"; namely, arithmetic (ח' החשבון), algebra (ח' התשבורת), geometry (ח' הנדסה or ח' המדידה), astronomy (ח' התכונה), astrology (ח' הנסיון), optics (ח' הראות), and music (זמרה). Of these only algebra and geometry are treated at length in this article, the others being dealt with under their respective names.

With the exception of the above-mentioned "Mishnat Middot," no work on algebra or geometry is known to have been written in Hebrew before the twelfth century; the few writings composed by Jews in these branches of mathematics, which in the Middle Ages were neglected in favor of astronomy and astrology, were in Arabic. The oldest Jewish writer on mathematics in its strict sense was the renowned astrologer Mashallah (more correctly Ma Sha Allah), who flourished at the end of the eighth century and at the beginning of the ninth.

Arabic Jewish Mathematicians.

A contemporary of his, Abu Othman Sahl ibn Bishr ibn Ḥabib ibn Ḥani, was the author of a work on algebra entitled "Al-Jabar wal-Muḳabalah." Another work on algebra, bearing the same title, and a commentary on the "Elements" of Euclid, were written about the same time by a Jewish convert to Islam, Sind ben 'Ali. To the same period belongs Sahl Rabban al-Ṭabari, who was considered one of the greatest geometers of his time. Among the writers of the tenth and eleventh centuries mention should be made of Bishr ben Phinehas ben Shu'aib and Jacob ben Nissim of Kairwan, the latter of whom wrote, under the title "Ḥisab al-Ghubar" (Hebr. חשבון האבק), a work on Indian mathematics. In the twelfth century works on algebra and geometry began to appear in Hebrew, mainly as translations from the Arabic.

The first known Hebrew writer on geometry was Abraham bar Ḥiyya ha-Nasi, who expounded its elements in a work entitled "Ḥibbur ha-Meshiḥah weha-Tishboret." This work, which probably formed a part of his encyclopedia "Yesode ha-Tebunah we-Migdal ha-Emunah," was edited by Steinschneider in the publications of the Meḳiẓe Nirdamim Society (1895, vol. xi.). A Latin translation of Abraham bar Ḥiyya's work was made about 1136 by Plato of Tivoli. Another prominent writer on geometry in that century was Samuel ibn 'Abbas, who, at the request of Sultan Abu al-Fatḥ Shah Ghazzi, composed in Arabic a work on the difficulties encountered by the geometer. As a translator of astronomical and mathematical works from the Arabic into Latin, in the same century, the Jewish convert known by the name of Johannes Hispalensis was distinguished. An English Jew is said to have written in Latin, in 1190, a work on mathematics under the title "Mathematica Rudimenta Quædam."

In the Thirteenth Century.

The thirteenth century was especially rich in mathematical productions. The writings of the Greek and Arabian mathematicians were translated into Hebrew and commented upon. Judah ben Samuel Cohen of Toledo (1238), in his encyclopedia—written originally in Arabic and translated by himself into Hebrew under the title "Midrash ha-Ḥokmah"—gives extracts from the "Elements" of Euclid. In 1278 Euclid's entire work was translated from the Arabic, probably by Moses ibn Tibbon. Another translation, entitled "Yesodot," or "Shorashim," and including Hypsicle's books, is supposed to have been made by Jacob ben Machir. Commentaries upon it by Arabian mathematicians, such as Al-Farabi and Ibn Haitham, were also rendered into Hebrew, probably by Kalonymus ben Kolonymus, who, according to the commentary of Simplicius, had translated Book xiv. and Ibn Haitham's commentary on the introduction to Book x. Among the other commentaries on the "Elements" still extant in manuscript in various European libraries are those by a pupil of Jacob ben Machir; by Abba Mari on the introduction to Book i.; by Levi ben Gershon on the propositions of Books i., iii., iv., and v.; by Abraham ben Solomon Yarḥi; and, according to Joseph Delmedigo, by Elijah Mizraḥi. Euclid's "Data" was rendered into Hebrew, from the Arabic version of Ḥunain ibn Isḥaḳ, by Jacob ben Machir, under the title "Sefer ha-Mattanah." Three new translations were made between 1775 and 1875. Euclid's works were published first by Abraham ben Joseph Minz, with annotations by Meïr of Fürth, under the title "Reshit Limmudim hu Sefer Iḳlides" (Berlin, 1795). Five years later a new translation of the first six books of the "Elements" was published by Baruch Schick (The Hague, 1780). In 1875 a new translation of Books xi. and xii. was published at Jitomir.

Translations from the Arabic.

Jacob ben Machir, in the thirteenth century, translated from the Arabic the work on spherical figures of the Alexandrian mathematician Menelaus. Kalonymus ben Kalonymus twice translated the works of Archimedes on conoids and spheroids and on the measure of the circle under the titles "Be-Kaddur ube-Iẓṭawwonot" and "Sefer Arkimedes be-Meshiḥat ha-'Iggulah." He made the following translations also: "Sefer Meshalim be-Tishboret," on algebraic propositions; "Sefer ha-Temunah ha-Ḥittukit"; a work on geometry by Thabit ibn Ḳurra entitled "Al-Shakl al-Ḳaṭṭa'": "Ma'amar be-Iẓṭawwonot webe-Ḥiddudim," a treatise on cylinders and cones by Abu al-Ḳasim Aṣbagh or Asba' ben Mohammed. In the fifteenth century Jewish literature was enriched with several important works on algebra and geometry. Mordecai Comtino, teacher of the rabbi and mathematician Elijah Mizraḥi, wrote a treatise, in two parts, on arithmetic and algebra, in which he followed partly the Greek and Latin authors, partly the Mohammedan; he also annotated the "Elements." Elijah Mizraḥi wrote on arithmetic, algebra, and geometry under the title "Meleket ha-Mispar." Mordecai ben Abraham Finzi translated from the Latin, under the title "Taḥbulat ha-Mispar," a work on algebra by Abu Kamil Shuja', and a work on geometry under the title "Ḥokmat ha-Medidah."

The most prominent representative of mathematical knowledge among the Jews in the sixteenth century was the historian David Gans, who wrote three works on mathematics—"Ma'or ha-Ḳaṭan," "Migdal

Dawid," and "Prozdor." Among the mathematicians of the seventeenth century the most renowned was Joseph Delmedigo, who in his "Bosmat Bat Shelomoh" gives a survey of geometry and devotes several chapters of his "Ma'yan Gannim" to trigonometry and algebra. In the eighteenth century the most noted mathematician among the Jews was Elijah Wilna, who wrote a work containing treatises on trigonometry, geometry, and some principles of astronomy and algebra. The following is a list of all the Hebrew works on algebra, geometry, and arithmetic published up to the last years of the nineteenth century:

Elijah Wilna.

אוקלידס, a new translation of Euclid, by Baruch Schick. The Hague, 1780.

אוקלידס, on Books xi. and xii. of the "Elements," by David Friesenhausen. Jitomir, 1875.

אילם, containing, among other scientific dissertations, treatises on arithmetic, algebra, geometry, and trigonometry, by Joseph Delmedigo. Amsterdam, 1629.

אנפאנגסגרינדע, arithmetic, in Judæo-German, by Faibus Hurwitz. Amsterdam, 1791.

ברורי המדות, on the geometrical propositions found in the Talmud, by Tobias Hurwitz. Prague, 1807.

ברית אברהם, arithmetic, according to Elijah Mizraḥi and non-Jewish sources, by Abraham Niederländer. Prague (1609?).

דרכי החשבון, arithmetic, by Jehiel Michael Epstein. Wilna, 1836.

חכמת המספר, arithmetic, by Moses Ḥayyim Eisenstadt. Dyhernfurth, 1712.

חכמת המספר, arithmetic and algebra, by Naḥman Hirsch Linder of Dubno. Warsaw, 1855.

חכמת השעורים, arithmetic, translated from the French by Jacob Eichenbaum. Warsaw, 1857.

ידיעת החשבון, arithmetic, in Judæo-German, by Aryeh Löb Shames. Amsterdam, 1690.

ידיעות השעורים, geometry, by Gabriel Judah Lichtenfeld. Warsaw, 1865.

יסוד עולם, containing, among other things, geometrical propositions, by Baruch Schick. Berlin, 1777.

יסודי ח' השעור, on the various branches of mathematics, by Ḥayyim Zelig Slonimski. Jitomir, 1865.

כליל החשבון, algebra, by David Friesenhausen. Berlin, 1797 (Zolkiev, 1835).

לוחות המגבילים, logarithms, by David Friesenhausen. Königsberg, 1854.

מבחר החשבון, arithmetic, by Letableau. Warsaw, 1866 (*ib.* 1875).

מוסדות תבל, proofs on the eleventh proposition of Euclid, by David Friesenhausen. Vienna, 1820.

מלאכת החשבון, arithmetic, by Moses Samuel Neumann. Vienna, 1831.

מלאכת מחשבת, arithmetic and algebra, by Elijah ben Gershon of Pintschow, Zolkiev, 1740.

מלאכת מחשבת, in two volumes: the first, entitled עיר החשבון, deals with arithmetic and the elements of algebra; the second, בירורי מדות, treats of geometry, by Gershon Elias. Berlin, 1765 (Frankfort-on-the-Oder, 1765; Ostrog, 1806).

מלאכת מחשבת, arithmetic, in Judæo-German, by Goldenberg. Berdychev, 1823 (Sdilkov, 1834).

מלאכת מחשבת, arithmetic and algebra, in Hebrew and Judæo-German, by Moses Zerah Eidlitz. Prague, 1775. (In Hebrew only, Zolkiev, 1837, 1845.)

מלאכת מחשבת החדש, on all branches of mathematics, in three volumes, by Shalom Blenker. Berdychev, 1834.

מלאכת המספר, arithmetic, algebra, and geometry, by Elijah Mizraḥi. Constantinople, 1534.

מפתח אלגיברא החדשה, algebra, by Asher Anshel Worms. Offenbach, 1722.

משנת המדות, on geometry, edited by Steinschneider. Berlin, 1864. (With a German translation and notes by Hermann Schapira, Leipsic, 1880.)

נאוה קודש, geometry and trigonometry, by Simeon Waltsch. Berlin, 1786.

עובר לסוחר, arithmetic, by Menahem Zion Porto. Venice, 1627.

עומק הלכה, on the mathematical propositions found in the Talmud, by Jacob Kopel. Cracow, 1598 (Amsterdam, 1710).

פרפראות לחכמה, dissertations on geometry, by Kopel Shacherles. Vienna, 1814.

צפנת פענח, criticisms on the mathematical works of Ḥayyim Zelig Slonimski, by Gabriel Judah Lichtenfeld. Warsaw, 1874.

צפנת פענח, arithmetic and algebra, by Joseph Schliffers. Wilna-Grodno, 1827.

קנה המדה, trigonometry, by Baruch Schick. Prague, 1784.

קצור מלאכת מחשבת, arithmetic. Wilna, 1830.

ראשית למודים, a commentary on the "Elements," by Abraham Joseph Minz. Berlin, 1775.

שבילי דרקיע, on the calendar, and on arithmetic and geometry, by Elijah Hechim. Warsaw, 1863.

שני ספרים בכרך אחד, logarithms, by Rabinowitsch. St. Petersburg, 1872.

J. I. BR.

——**Modern:** The number of mathematicians of Jewish origin in the nineteenth century is so great that a detailed list of all could hardly be given here. As there are, moreover, no data regarding the lives of the French, English, and Russian mathematicians the biographer frequently would be obliged to resort to conjecture. For example, it is believed that Lobatschewski, one of the discoverers of absolute geometry (pangeometry), was the son of Jewish parents, since his father, a native of Poland, is known to have been converted to the Orthodox Greek Church, and conversion from Catholicism is not likely. Similarly, the ancestry of the great astronomer Friedrich Bessel calls for investigation.

The following German mathematicians may be mentioned: M. Abraham (mathematical theory of electricity); Aronhold; Borchardt (algebra; editor of Crelles' "Journal für die Reine und Angewandte Mathematik"); Georg Cantor (author of the theory of transfinite numbers); Moritz Cantor (history of mathematics); Eisenstein; Fuchs; Gordan (basal principles of the theory of invariants); Hensel (continued Kronecker's investigations); Hurwitz (author of prominent works in various branches of mathematics); Hamburger (differential equations); Hirsch Meyer (source for all modern collections of elementary examples; properties of symmetrical functions); Jacobi; Jolles (geometry); König (algebra); Königsberger (transformation of hyperelliptical functions; biography of Helmholtz); Kronecker; Landau (theory of numbers); Landsberg (algebraic [Abel's] functions); Lipschitz (prominent in all departments of pure and applied mathematics); London (geometry); Minkowski (foremost living [1904] authority on the theory of numbers); Noether (algebra and Abel's functions); Pasch (critique of the principles of mathematics; important geometrical investigations on complexes); Pringsheim (modern theory of functions); Rosanes (geometrical transformation and apolarity); Rosenhain; Saalschütz (convergence; applied mathematics); Schlesinger (comprehensive text-book, and original investigations on differential equations); Schönflies (geometry); Schwarzschild (director of the observatory at Göttingen; mathematical astronomy); Wälsch (theory of invariants); Weingarten (foremost living authority on the theory of surfaces); Wolfskehl (theory of numbers).

Of Italian mathematicians the following are the most important, their chief distinction being won in analytic and synthetic geometry: Castelnuovo, Enriquez, Fano, Jung, Beppo Levi, Levi-Cività, Loria, Segre, Volterra (mathematical physics).

The most prominent Russian mathematicians are Schapiro (cofunctions; algebraic iteration) and Slonimski (inventor of a well-known counting-machine and editor of Jewish calendars).

Of the Jewish mathematicians of France those who have gained especial prominence are: Hadamard (Hadamard's theorem); Halphen (reduction of linear equations to integrable form [obtained a prize from the French Academy]; spatial curves [obtained a prize from the Berlin Academy]; compare Stieltjes' biography of him in Halphen's "Traité des Fonctions Elliptiques," vol. iii.); Maurice Lévi (mathematical physics; president of the Institute).

The most noteworthy English mathematician is James Joseph Sylvester.

J. S. G.

MATHIAS OF CRACOW. See Calahora.

MATRIARCHY: A system of society in which descent and property are traced solely through females. It has been suggested that the prominence given to the mothers of kings in the Books of Kings and to the wives of the Patriarchs are survivals of this system. The fact that the tribes can be divided into tribes descended from Rachel and tribes descended from Leah has also been urged in favor of this view, especially as the name "Rachel" means "ewe," and the name "Leah" has been traced by Robertson Smith to a Semitic root meaning "antelope." The view is thus dependent upon the theory that the early Israelites had a totemistic tribal system (see Totemism).

A. J.

MATTANIAH. See Zedekiah.

MATTATHIAS MACCABEUS: The originator of the Maccabean rebellion. His genealogy is given as follows in the First Book of Maccabees, the most authentic source: "Mattathias, the son of John, the son of Simeon, a priest of the sons of Joiarib, from Jerusalem; and he dwelt at Modin" (I Macc. ii. 1). Josephus ("Ant." xii. 6, § 1) traces the genealogy back for one generation further, mentioning Asamoneus (= Hasmonæus) after Simon. But this Hasmonæus should not be considered as Mattathias' great-grandfather, but merely as a distant ancestor of the whole house, since only so is it comprehensible why both Greek and rabbinical sources of the following period call the whole house that of the Hasmoneans. The fact, moreover, that the names John and Simeon recur in the family in the very next generation after Mattathias, while the name "Hasmonæus" is not found in historic times, is a proof that the first bearer of this name belongs to antiquity.

The rabbinical sources have a different account. In the Seder 'Olam Zuṭa, which, it is true, is not very reliable, Mattathias is given as the direct son of Hasmonai; and elsewhere also Hasmonai appears as a historic person who is very much in evidence. Thus, in Soferim xx. 8 occurs the reading: "Mattithiah, son of Johanan the high priest, and Hasmonai and his sons." The conjunction "and" must originally have stood also in the liturgical formula fixed for the Ḥanukkah feast, so that Mattathias and Hasmonai are to be regarded as two independent heroes who lived in the same period and who were probably relatives. In the Talmud, Hasmonai is even mentioned before Mattathias (Meg. 11a). A midrash to Deut. xxxiii. 11, quoted by Rashi, mentions the children of Hasmonai, among them Eleazar; as does also Jellinek "B. H." vi. 2. Hasmonai thus appears in these passages in the place of Mattathias.

Distinguished from Hasmonai.

The rabbinical sources never mention all of Mattathias' sons together, but only one at a time, sometimes Eleazar (who, according to most of the authentic sources, took only a subordinate part), sometimes John (who also is unimportant in the books of the Maccabees and in Josephus), and sometimes Judas. The First Book of Maccabees and Josephus enumerate the sons of Mattathias as follows: John Gaddis or Caddis (Johanan Gadi), Simon Thassi, Judas Maccabeus, Eleazar Avaran, and Jonathan Apphus. The Aramaic-sounding cognomens, which have not been fully explained, were probably given them by their father, with reference to contemporary events or to the respective characters of the sons themselves. The Second Book of Maccabees mentions still another brother, between Simon and Jonathan, called Joseph; but that is probably only a corrupt reading for "Johanan."

Refuses to Sacrifice to Idols.

Mattathias belonged to the priestly tribe of Joiarib (comp. I Chron. xxiv. 7); the name is badly preserved in Josephus. From the statement that he was from Jerusalem, but resided in Modin, it is certain that he actually officiated in Jerusalem. The rabbinical sources which make him high priest are mistaken. Mattathias was already old when the religious persecution under Antiochus Epiphanes broke out. The king's soldiers under Apelles, who is mentioned by Josephus but not in the Book of Maccabees, came to Modin, a small city in Judea. They set up an altar to the heathen god, and ordered Mattathias, as the most influential citizen, whose example would be followed, to sacrifice in accordance with the king's command. But Mattathias said: "Though all the nations that are under the king's dominion obey him, . . . yet will I, and my sons, and my brethren, walk in the covenant of our fathers" (I Macc. ii. 19–20). And when a certain Jew was about to obey the command, Mattathias, who was filled with holy wrath, killed the offender and destroyed the altar, while his sons cut down the king's officer. Thereupon Mattathias called out: "Whoever is zealous for the Law, and maintaineth the covenant, let him follow me." His countrymen, abandoning all their possessions, followed him and hid in the mountains and desert places. Others, who had hidden themselves before, joined them. When Mattathias learned that the pious ones would rather be cut down by the king's soldiers than defend themselves on the Sabbath he commanded them to fight, when necessary, on that day. This practise, says Josephus, was continued in later days. It is evident from this that Mattathias had authority in religious matters also.

From his hiding-place he scoured the neighboring districts of Judea, drove out small bands of the king's troops, punished the renegade Jews, destroyed the heathen temples and altars, and brought children, who through fear had not been circumcised, into the covenant of Abraham. Josephus, whose account otherwise agrees with that of I Maccabees, differs from it in stating that Mattathias reigned one year and then became ill. Also in "B. J." (i. 1, § 3) Josephus speaks of Mattathias as a prince chosen by the people. According to both authorities, Mattathias before his death urged his sons and the people to continue steadfast in the defense of their ancestral religion. Of his sons he designated Simon as counselor and Judah as general. He died in 146 of the Seleucid era (166 B.C.), and was buried in Modin, amid the lamentations of all Israel. Niese has tried to prove from the fact that Mattathias does not appear in the Second Book of Maccabees that he never existed. This has been refuted by Schürer and Wellhausen. The importance of Mattathias is attested by the fact that rabbinical tradition mentions his name and even puts it in the Ḥanukkah prayer. The name Mattathias recurs in the person of his grandson, a son of Simon (I Macc. xvi. 14).

G.* 4th ed., p. 257, note 1, Berlin, 1901; Krauss, in *R. E. J.* xxx. 215. For the sources of Josephus see Büchler, *ib.* xxxiv. 69–76.

G. S. KR.

MATTATHIAS B. SIMON: Son of the Hasmonean prince Simon, whom he accompanied on his last journey, together with his brother Judah and his mother. Simon, with his sons, was invited by his son-in-law Ptolemy to a banquet in the fortress of Docus, near Jericho, where he was murdered, his sons being first put in fetters and then killed. The accounts in I Maccabees and in Josephus do not agree as to whether Mattathias was slain at the same time as his father, or later; Josephus, however, probably reports the affair more correctly, as he refers also to other sources.

G. M. K.

MATTERSDORF, JOAB BEN JEREMIAH: Hungarian rabbi; died about 1807. Through the influence of Aaron Chorin, a disciple of his father, he became rabbi of Deutschkreuz, near Mattersdorf, Hungary. He wrote "Ḥen Ṭob" (Zolkiev, 1806), commentary on a part of the code Eben ha-'Ezer, to which is added "Zebed Ṭob," on the same code, by his son-in-law Isaac (Eisik) ben Lippmann Fränkel. Joab wrote also: "Sha'are Binah," novellæ to Isaac ben Reuben Alfasi's "Sha'are Shebu'ot," Vienna, 1792. Like Joseph Caro, Marcus Benedict, and others, Mattersdorf mistook this Isaac ben Reuben for a grandson of Isaac Alfasi (see JEW. ENCYC. i. 377, *s.v.* ALFASI, ISAAC BEN REUBEN).

MATTHÄI (SIMEON), ADAM RUDOLF GEORG: German convert to Christianity; born at Fürth 1715; died at Nuremberg 1779. After having studied Talmud at Prague under his father, Jaidel, who was lecturer on Talmud in the bet ha-midrash, Matthäi, whose name was then Simeon, returned to his native town. There he was appointed teacher in the Jewish high school and afterward lecturer in the bet ha-midrash. In April, 1748, Matthäi announced to the clergy of Fürth his intention of embracing Christianity, and on their advice he went to Nuremberg, where he was baptized on Sept. 20 of the same year, and where he was afterward appointed sacristan of the Dominican Church.

Matthäi wrote several works in German which, according to his admirers, were a defense of Christianity against the attacks of the Jews, but in reality were attacks on Judaism. It must be admitted, however, that he displayed in his writings a wide knowledge of rabbinical literature.

The following is a list of his works in their chronological order; with one exception they were published at Nuremberg:

Beschreibung des Jüdischen Sabbats. 1750.
Die Verderbniss des Heutigen Judenthums. 1752.
Beschreibung des Jüdischen Neujahrsfestes. 1755.
Beschreibung des Jüdischen Purimfestes. 1758.
Beschreibung des Jüdischen Jom Kippur. 1760.
Sammlung Talmudischer Lehrsätze. Schwabach, 1763.
Abhandlung von der Verleumdung. 1765.
Sendschreiben an Rabbi Peloni aus der Stadt Lo-Theda. 1766.
Erneuerung des Taufbundes. 1768.
Kurzgefasste Talmudische Lehrsätze von der Nothwendigkeit Sich in den Ebestand zu Begeben. N.d.
Beweis von der Uebereinstimmung der Alten Israelitischen Kabbala mit der Lehre des Apostels Paulus. N.d.
Beweisgründe von der Uebereinstimmung der Altjüdischen Lehre mit der Lehre der Christen. 1770.
Christlich Gesinnte Erklärung der Kabbalisten Ueber das Hohelied. 1776.

G. M. SEL.

MATTHEW. See NEW TESTAMENT.

MATTHIAS BEN MARGALOT: Associated with Judah ben Zippori in the instigation of an uprising against Herod the Great (Josephus, "Ant." xvii. 6, § 2; *idem*, "B. J." i. 33, § 2). See JUDAH BEN ZIPPORI.

S. S. KR.

MATTHIAS BEN THEOPHILUS: Name of two high priests. **1.** The successor of Simon ben Boethus, and, unlike the other high priests appointed by Herod, who were foreigners, a native of Jerusalem (Josephus, "Ant." xvii. 4, § 2). On the eve of a Day of Atonement—for the priest the most important time in the year—he had become ritually unclean, and consequently was unable to perform the duties of his office, which were discharged instead by his kinsman Joseph ben Ellem ("Ant." xvii. 6, § 4). This occurrence is mentioned in the Talmud (Tosef., Yoma, i. 4; Yoma 12b; Yer. Yoma 38d), although the name of Matthias ben Theophilus is omitted. His deposition, however, was not due to this cause, but to the fact that he was supposed to have been implicated in the insurrection when the golden eagle was pulled down from the gate of the Temple (see JUDAH BEN ZIPPORI). His tenure of office lasted only one or two years (5–4 B.C.).

2. A descendant, apparently, of the preceding, and the last high priest but one. He was in office in 65 C.E., when the war against the Romans broke out (Josephus, "Ant." xx. 9, § 7). During the troubles in Jerusalem which preceded the siege by Titus ("B. J." iv. 3, § 7) he was deposed, since he, like the other aristocrats, belonged to the peace party, one of his sons having even sought refuge with the Romans. Matthias was put to death as a dangerous character by the very Simon ben Gioras whom he had invited to Jerusalem to subdue the revolutionists ("B. J." vi. 2, § 2). According to Grätz, it is he who is referred to in a Talmudic story which relates that once, on a Day of Atonement, a high priest remained in the Holy of Holies a longer time than usual praying for the Sanctuary, which was in danger of destruction by the Zealots (Tosef., Yoma, ii. 5; Yoma 53b; Yer. Yoma 42c).

S. S. KR.

MATTITHIAH B. HERESH: Roman tanna of the second century; born in Judea; probably a pupil of R. Ishmael, and certainly a contemporary and friend of his pupils R. Josiah and R. Jonathan. After his ordination Mattithiah went to Rome, apparently on account of the persecution by Hadrian; there he founded a school and a Jewish court which soon became prominent. Halakic sentences by him have been preserved which show his desire to make the Sabbath laws less rigorous in so far as their fulfilment by the sick was concerned. He seems, however, to have devoted himself chiefly to the Haggadah; a number of his homiletic sentences, especially to Exodus, are extant. He has a maxim in the Pirke Abot: "Meet each man with friendly greeting; be the tail among lions rather than the head among foxes" (iv. 15). He associated with the Palestinian scholars who visited Rome and sought instruction from them—from R. Simeon b. Yoḥai and R. Eleazar b. Jose, for instance. A later legend in the Midrash Abkir represents him as victoriously resisting a temptation placed in his path by Satan.

E. C. I. E.

MATTITHIAH B. ISAAC OF CHINON (קינו): French scholar of the end of the thirteenth century. He was a pupil of R. Perez of Corbeil and a contemporary of Mordecai b. Hillel, martyred at Nuremberg in 1298. He is sometimes wrongly identified with Mattithiah, the teacher of Eliezer b. Joel ha-Levi, author of the ritual work "Abi Asaf," who lived at the beginning of the thirteenth century.

E. C. S. K.

MATTITHIAH B. JOSEPH THE PROVENÇAL (פרובינשי): Chief rabbi of Paris and of France from 1360 to 1385; son of Joseph b. Johanan of Treves, rabbi of Marseilles; pupil of Perez b. Isaac ha-Kohen and of Nissim b. Reuben of Gerona. In 1360 King Charles V. appointed him chief rabbi of the community of Paris and of all the newly organized communities of France, exempting him and Manecier of Vesoul from wearing the Jewish badge. Mattithiah founded a rabbinical school at Paris which soon attracted many pupils, eight of whom were called to various communities. He is probably identical with Mattithiah Treves (טרייבוש, the author of MS. No. 676, folio 147, containing a responsum, in the Paris Bibliothèque Nationale) and with Mattithiah "the Frank" (הצרפתי; author of a methodological treatise on the Talmud). Isaac ben Sheshet (Responsa, No. 271) applies to him the title of "Eben Boḥan" ("touchstone"), a term which has been held to imply that he composed a work bearin this name (Shabbethai Bass, "Sifte Yeshenim," x., No. 9). Zunz ("Literaturgesch.") mentions a liturgical poet by the name of Mattithiah b. Joseph "the administrator" ("ha-parnes"), but this latter epithet can apply neither to Mattithiah b. Joseph nor to his father.

S. S. K.

MATTITHIAH ḲARṬIN (known also as **Ibn Ḥarṭon**): Scholar of the fourteenth century. He translated into Hebrew verse the "Moreh Nebukim" of Maimonides in 1363 (comp. Wolf, "Bibl. Hebr." i., No. 1682). His work seems to have been lost, unless this Mattithiah is identical with Mattithiah b. Shabbethai of Monte Politiano, a work of whose, in verse, is found in the library of the Vatican (No. 258). Steinschneider, after having declared ("Cat. Bodl." col. 1897) that Mattithiah versified the "Moreh Nebukim," says, in his "Jewish Literature" (p. 147), that his work is a commentary, in Hebrew verse, on the "Moreh." In the Vatican Library (MS. No. 298) there is a poem of Mattithiah's, entitled "Mebine 'Am," which is an acrostic containing his name. Steinschneider thinks that this Mattithiah may be identified with the Italian liturgist called Mattithiah, whose three dirges are found in the library of Parma (MS. De Rossi No. 1205). Zunz ("Literaturgesch." p. 579) supposes that the latter was a poet of the sixteenth century.

BIBLIOGRAPHY: Steinschneider, *Hebr. Uebers.* p. 428.

J. M. SEL.

MATTITHIAH BEN MOSES BEN MATTITHIAH: Spanish Talmudist; lived toward the end of the fourteenth century and at the beginning of the fifteenth. He was a member of the Yiẓhari family of Narbonne. As he himself relates, his ancestors on being banished from France (1306) settled together with other scholars in Catalonia and Aragon. According to Neubauer, Mattithiah is identical with the rabbi of this name cited as one of those who took part in the disputation at Tortosa in 1413.

Mattithiah was the author of the following works: (1) "Derashot," homilies on the Pentateuch, no longer extant; (2) a commentary on Ps. cxix. (Venice, 1546; partly translated into Latin by Philippe d'Aquin, Paris, 1629); (3) a commentary on Pirke Abot, still extant in manuscript; (4) notes on Abraham ibn Ezra's commentary on the Pentateuch (Neubauer, "Cat. Bodl. Hebr. MSS." No. 236); (5) a philosophical commentary on the Pentateuch, still extant in manuscript; (6) "Parashiyyot," homilies; (7) "Derashot," no longer extant.

Bibliography: Loeb, in *R. E. J.* vii. 155, ix. 119; Neubauer, *ib.* vii. 154; Steinschneider, *ib.* ix. 118; Renan-Neubauer, *Les Ecrivains Juifs Français*, p. 432.

G. I. Br.

MATTITHIAH OF PARIS: Head of the Talmudic school of Paris in the eleventh century and doubtless identical with Mattithiah b. Moses, one of Rashi's pupils. He is occasionally called **Mattithiah the Great.** He corresponded with Samuel b. Meïr (RaSHBaM), who names him among the "ancients" of Paris.

MATUṚITY. See Majority.

MATZEL, ASCHER: Hungarian soldier and philanthropist; born 1763 at Stampfen, Hungary; died Nov. 22, 1842. At the age of seventeen he entered the service of the Jewish hospital in Vienna, of which he became the superintendent in 1799. Emperor Joseph II. appointed him during the war with the Turks superintendent of the hospital in the fortress of Leopoldstadt, which position he later exchanged for that of director of the hospital of Semlin. The emperor bestowed on him many tokens of his appreciation, among others a diamond ring with the emperor's initials.

After the close of the war Matzel returned to Vienna to resume charge of the Jewish hospital. In 1813 he received from Emperor Francis the gold medal of honor and from the Emperor of Russia the Order of Merit. In 1814 Matzel became manager of the military magazine of munitions, and in 1830, during the cholera epidemic, he became chief of the board of health of the Rossau, a suburb of Vienna.

Bibliography: *Jüdischer Plutarch*, ii. 194-196.

S.

MAURICE, CHARLES: Theatrical director; born at Agen, France, May 29, 1805; died in Hamburg Jan. 27, 1896. Maurice, who was of French descent, was educated in his native city, and until his twenty-second year, when he accompanied his father to Hamburg, was totally ignorant of the German language. Although unfamiliar with theatrical matters, Maurice assumed charge of a minor playhouse in Hamburg in 1831 and proved so successful that, when the great fire of 1842 destroyed the structure, aid came to him from all quarters, and he was enabled to replace it with the present Thaliatheater. In 1847 he assumed the management of the Stadttheater also, relinquishing it, however, in 1854. From that time on Maurice's energies were devoted to the Thaliatheater, which obtained world-wide fame under his direction. In 1885 he retired from active participation in its affairs, but in 1893 he was forced, by the death of his son and successor Gustav, to resume the management. Maurice celebrated in 1881 the fiftieth anniversary of his entry upon the theatrical field, and was the recipient of a series of remarkable felicitations.

Maurice was not merely a clever manager from the commercial point of view, but also a student of human nature remarkable for his discernment of histrionic talent. It was Maurice who developed the immature talent of Bogumil Dawison and of Friederike Gossman, and encouraged Emil Thomas, Marie Barkany, Franz Wallner, and others, when their fame was still embryonic.

S. E. Ms.

MAUROGONATO, ISACCO PESARO: Italian legislator; born in Venice Nov. 26, 1817; died in Rome April 5, 1892. He was a member of a prominent family of Ferrara. His father, Israel Pesaro, removed to Venice on his marriage, and the son took the name of Maurogonato in addition to the family name in consequence of an inheritance left him by one of his mother's relatives. He studied law, and afterward finance and political economy. Maurogonato took an active part in the organization of the Venetian revolution of 1848-49; on its outbreak he was elected to the assembly, and was later made minister of finance. He succeeded in supplying an empty treasury with funds for carrying on the war, and was Manin's and Tommaseo's right hand. When the Austrians examined the municipal accounts after regaining possession of the city they found them absolutely correct. General Gorskowski exclaimed in surprise, "I never could have believed the rascally Republicans were so honest!" On the collapse of the revolution Maurogonato was one of the forty excepted from the amnesty; with Manin and Tommaseo he was compelled to leave the country. He went to the Ionian Islands, but in a few years was allowed to return to Italy and engage in business at Vicenza.

In 1866 Maurogonato again entered public life as a member of the chamber. When in 1884 the recognition of the loans made to the Venetian revolutionary government of 1848-49 was proposed in Parliament, Maurogonato—who thought the proposition a just one, but did not feel that he could conscientiously advocate it to his own gain—turned over his claims, before the discussion began, to the municipality of Venice. They brought about 16,000 francs, and that sum became the foundation of a fund for furnishing annual subsidies to the veterans of the revolution. He became vice-president of the chamber and was for a number of years a member of the general budget commission. The portfolio of finance was several times offered to him, Victor Emanuel even personally urging him to accept, but he steadily refused. On Oct. 27, 1890, King Humbert made him a senator. Both houses of Parliament, the government, and the municipal councils of Venice and of Rome took official notice of his death, and King Humbert sent his condolences to his family. Imposing public funeral services were held at Rome and at Venice, in which latter city he was buried. Throughout his life Maurogonato was devoted to the interests of his coreligionists.

MAUSCHBERGER, LEOPOLD: Biblical scholar of the eighteenth century. He was the author of commentaries on the Pentateuch and the Earlier Prophets (Olmütz, 1757), and on the books of Chronicles, Ezra, Tobit, Judith, etc. (*ib.* 1758; Fürst, "Bibl. Jud."). T.

MAUTHNER, FRITZ: Austrian poet, novelist, and satirist; born in Horitz, Bohemia, Nov. 22, 1849. He attended the Piarist gymnasium in Prague and then ostensibly studied law at the university, though in reality he busied himself almost exclusively with philosophy and the history of art. He passed only the first state examination in jurisprudence, after which he was occupied for a short time in a lawyer's office in Prague. While there he published a collection of sonnets, under the title "Die Grosse Revolution" (1871), which almost brought upon him an indictment for treason. This was followed by "Anna" and several minor comedies, which were successfully produced. He then devoted himself exclusively to literature. After writing for a time for Prague publications, he removed, in 1876, to Berlin, where he wrote critical articles for various journals. Since 1895 he has written the dramatic articles for the "Berliner Tageblatt." Mauthner's works include: "Aus dem Märchenbuch der Wahrheit," satirical prose poems; "Nach Berühmten Mustern," parodies (Stuttgart, 1879); "Der Neue Ahasver," romance (Bern, 1881); "Dilettanten Spiegel. Travestie nach Horaz's Ars Poetica" (*ib.* 1883); "Credo" (Berlin, 1886); "Der Letzte Deutsche von Blatna" (*ib.* 1886); "Von Keller zu Zola" (*ib.* 1887); "Schmock, oder die Literarische Karrière der Gegenwart," a satire (*ib.* 1888); "Quartett Fanfare" (1888); "Xantippe" (Dresden, 1889); "Der Pegasus, eine Trago-Komische Geschichte" (Dresden, 1889); "Der Villenhof"; three romances published collectively under the title of "Berlin W" (1890); "Bekentnisse einer Spiritistin: Hildegard Nilson" (Berlin, 1891); "Hypatia," romance (Stuttgart, 1892); "Der Geisterseher," humorous romance (Berlin, 1894); "Kraft," "Die Bunte Reihe," and "Der Steinerne Riese," romances (1896); "Die Böhmische Handschrift" (1897); "Beiträge zu einer Kritik der Sprache: Sprache und Psychologie" (Stuttgart, 1901).

MAUTHNER, JULIUS: Austrian chemist; born in Vienna Sept. 26, 1852; educated at Vienna University (M.D. 1879), where he became privat-docent in experimental medical chemistry (1881) and assistant professor (June 3, 1885). He is a member of the Leopold and Caroline Academy of Naturalists and Chemists. He has published a number of scientific papers in the "Sitzungsberichte der Kaiserlichen Akademie der Wissenschaften," Liebig's "Annalen der Chemie," "Berichte der Deutschen Chemischen Gesellschaft," "Zeitschrift für Biologie," "Wiener Medicinische Blätter," and elsewhere.

S. N. D.

MAUTHNER, LUDWIG: Austrian ophthalmologist; born in Prague April 13, 1840; died in Vienna Oct. 20, 1894; educated at the University of Vienna (M.D. 1861). He was admitted to the medical faculty of his alma mater as privat-docent in ophthalmology in 1864, and became professor in the University of Innsbruck in 1869. This position he resigned in 1877, returning with the title of professor to Vienna, where he again became privat-docent. In 1890 he was appointed assistant-chief physician in the eye dispensary; and four years later he was appointed professor. In 1899 a monument was erected in his honor in the "Arcaden" of Vienna University.

Mauthner wrote many essays upon neuropathy and ophthalmology for the medical journals. Among his works may be mentioned: "Die Bestimmung der Refractionsanomalien mit Hilfe des Augenspiegels," Vienna, 1867; "Lehrbuch der Ophthalmoskopie," *ib.* 1868; "Recherches sur la Structure du Système Nerveux," Paris, 1868; "Die Optischen Fehler des Auges," Vienna, 1872 (2d ed. 1876); "Die Syphilitischen Erkrankungen des Auges," in Zeissl's "Lehrbuch der Augenheilkunde," 1873; "Die Sympathischen Augenleiden," Wiesbaden, 1879; "Die Funktionsprüfung des Auges," *ib.* 1880; "Gehirn und Auge," *ib.* 1881; "Die Lehre vom Glaukom," *ib.* 1882; "Die Lehre von den Augenmuskeln," *ib.* 1885 (2d ed. 1889); "Die Nicht Nuclearen Augenmuskellähmungen," *ib.* 1886; "Diagnostik und Therapie der Augenmuskellähmungen," *ib.* 1889.

S. F. T. H.

MAUTNER, EDUARD: German author and journalist; born at Budapest Nov. 13, 1824; died in Baden, near Vienna, July 2, 1889. His father, who was a merchant in Budapest, died when Eduard was seven years old, whereupon his mother, with her children, of whom Eduard was the oldest, removed to Vienna. There he attended the elementary school and the gymnasium. After attending lectures on philosophy at the University of Prague (1843), where he published several poems and a tale in Glaser's "Ost und West," he returned to Vienna, began the study of medicine, exchanged it for that of law, and then dropped law for literature. In 1844 he removed to Leipsic, studied philosophy and ethics, and renewed friendships begun at Prague with Moritz Hartmann, Uffo Horn, and Alfred Meissner. To Lewald's "Europa," Herlosssohn's "Komet," Kuranda's "Grenzboten," and Oettinger's "Charivari" Mautner contributed poems, tales, and critical and literary articles, all of which were well received by the critics. He returned to Vienna in the autumn of 1847.

While visiting his mother in Triest, the revolutionary movement of 1848 began. Mautner hastened to Vienna, and during the revolution was active as a journalist, writing especially for Frankl's "Sonntagsblatt." He next acted as feuilletonist and dramatic critic for the "Ostdeutsche Post," the "Presse," and the "Wanderer." In 1851 his comedy, "Das Preislustspiel," took the second prize at the Hofburg Theater competition. In 1853 he traveled in Germany, Belgium, France, and England, returning to Vienna in 1854, to publish a series of sketches in the "Ostdeutsche Post" and in the "Familienbuch des Oesterreichischen Lloyd." From 1855 to 1864 he was officially connected with the Staatsbahngesellschaft; during that period he published several poetical works, and some minor comedies that were produced in Vienna. Early in 1865 he became assistant in the Imperial Court Library at Vienna, and afterward was engaged in the literary bureau of the Ministry of Foreign Affairs. He wrote: "Gräfin Aurora" (Vienna, 1852); "Kleine Erzählungen" (*ib.* 1858); "In Catilinam, ein Kranz Geharnischter Sonette," against Napoleon (*ib.* 1859); "Während der Börse" (Berlin, 1863; played at the court theater); "Eine Frau, die an der Börse Spielt" (produced at the Vienna Carltheater); "Eglantine," drama (Vienna, 1863); "Die Sanduhr" (Berlin, 1871); "Eine Kriegslist," comedy (1878); "Von der Aar zur Donau," festival play (1881); "Ausgewählte Gedichte" (Vienna, 1889).

s. N. D.

MAXIMS (Legal): Short sayings in which principles of law of wide application are laid down. They are known to all systems of jurisprudence: thus, "Casus nocet domino" and "Ignorantia juris nocet" are maxims of Roman law; "Nobody can plead his own wrong" and "You can not come into a court of equity but with clean hands" are maxims of English law. Of the maxims which are current in the Talmud many belong to substantive law, others to the law of evidence and procedure. The following may be cited as examples:

כל שחבתי בשמירתו הכשרתי את נזקו ("I am bound to make good any damage caused by whatever I am bound to guard" [B. Ḳ. i. 2]). This applies to domestic animals, to a pit or any similar source of danger, and to fire. See Accident.

אדם מועד לעולם ("A man is always forewarned" [B. Ḳ. ii. 6]); that is, a man is, like the owner of a "forewarned ox," always liable for the whole damage arising directly from his acts.

חרש שוטה וקטן פגיעתן רעה ("A deaf man, a fool, and a child are bad to meet" [B. Ḳ. 87a]) because whoever harms them is liable for the damage done, while no compensation is recoverable from them for any damage done by them.

שלוחו של אדם כמותו ("A man's agent is, in effect, the man himself"). This is similar to the Roman principle "Qui facit per alium facit per se."

כל המשלם אינו לוקה ("Who pays is not flogged" [Mak. i. 2]); that is, wherever the law orders compensation paid for an unlawful act, and the payment is made, punishment by stripes can not be inflicted.

כל התדיר מחברו קודם לחברו ("Whenever one thing is more nearly permanent than another it has the preference" [Hor. iii. 6]) appears in the Gemara simply as תדיר קדים ("The permanent ranks first"), a rule derived from the often reiterated insistence of the Torah on the celebration of the daily sacrifice on festive days, when other sacrifices also are prescribed

אין מרחמים בדין ("They have no mercy in judgment" [Ket. ix. 2-3]) means that the courts do not act on the principle of modern equity known as "marshaling the assets," the principle of giving to the creditor having the weakest hold on other funds (הכושל) a stronger hold on the fund under dispute; every creditor must take his chance, according to the opinion of R. Akiba, which prevails over that of R. Ṭarfon.

חיזק ראייה שמיה היזק ("Damage by seeing is called damage" [Gemara; B. B. 2b]) expresses the right of a householder to privacy; that is, to be screened while in his house or courtyard from the view of his neighbors is a legal right.

אין בית דין אחד סותר דברי ב"ד חברו עד שגדול ממנו בחכמה ובמנין ("One court does not overrule the decision of another court unless it is greater in wisdom and numbers" ['Eduy. i. 5]) is a principle that, supplemented by the high regard in which the Tannaim (ending with R. Judah about 220) were held by succeeding generations, has done much to keep Jewish laws and customs in their old, sometimes obsolete, forms. See Aḥaronim.

יקוב הדין את ההר ("Let the judgment pierce the mountain" [Sanh. 6a, b]), corresponding to the Latin "Fiat justitia, ruat cœlum" (Let justice be done though the heavens fall), expresses a principle not much followed in practise, as the sages always desired a compromise between the litigants more than strict enforcement of the law.

Law of Evidence and Procedure.

אין אדם משים עצמו רשע ("No man can make himself out wicked" [Sanh. 25a]) means that no penalty, such as death, exile, or stripes, nor more than full restitution, nor even a fixed sum as damages to an injured party, can be awarded upon the admission or confession of the accused (see Accusatory and Inquisitorial Procedure; see Ket. iii. 9). Two competent witnesses are indispensable.

לא ראינו אינו ראיה ("'We have not seen' is no proof" ['Eduy. ii. 2]). This principle was carried further in the Talmudic than it is in modern law, as the former was averse to the establishment of any fact by indirect evidence.

נכסים בחזקתן ("Property [abides] in its status" [B. B. ix. 8-9; see Burden of Proof]). In the absence of evidence either way, property remains with the owner in possession, and his heirs.

המוציא מחברו עליו הראיה ("He who desires to take anything from his companion must furnish the proof" [B Ḳ. iii. 11; see Burden of Proof]); that is, the party seeking recovery of money or property must prove his case. The English rule is that the burden of proof rests upon the party having the affirmative in any issue; the Talmudic rule will often prove at variance with this practice.

מודה במקצת חייב בשבועה ("He who admits a part is bound to make oath" [Shebu. vi. 1-3]). One that is sued for a given sum or thing of value, and admits that he owes a smaller sum, or thing, than that claimed, or admits facts tending to such a conclusion, can not by his mere denial in regard to the balance put his adversary to proof; but he must, if the latter calls for it, confirm his denial by an oath.

הפה שאסר הוא הפה שהתיר ("The mouth which bound [forbade] is the mouth that also loosened" ["permitted"; 'Eduy. iii. 6]). This maxim is given with this illustration:

Where it is known of a woman only by her own account that she has been a captive, and she says she was not defiled, her statement is taken, and she may marry into the priesthood; but if the proof of her captivity rests upon witnesses, and she claims that she was not defiled, the court would say לא על פיה אנו חיים ("We do not live on what she says"; see also, for the rule, Ket. ii. 5, and, for its counterpart, Ket. i. 6–9).

The general principle known as כלל, with which the discussion of a branch of law in its details sometimes ends, is to be distinguished from the ordinary legal maxim. An example is found at the end of the treatise Shebu'ot, the last chapter of which states all the cases in which a depositary, by swearing to an untrue statement of fact, incurs guilt, and concludes with: "This is the general principle: 'Whoever swears in order to make it easier for himself, is guilty; to make it harder for himself, is not guilty.'" Legal maxims are to be distinguished from such sayings of worldly wisdom as: "He who has read the letter, let him carry out its purpose."

S. L. N. D.

MAY, ISAAC: Rabbi of Lublin, Poland, in the latter half of the sixteenth century. Gaining the favor of Count Jenchinsky, the starost of Lublin, he secured in 1556 a very considerable parcel of land which adjoined his house, and which had formerly been covered by a mill-pond. Having filled in this uneven area, May made it available for the growth of the overcrowded Jewish quarter of Lublin. In time most of the land became covered with Jewish houses; but May reserved a portion of it, which he presented to the community for the establishment of a yeshibah. In this way he was largely instrumental in founding the first high-grade rabbinical school in Poland. The royal decree, secured Aug. 23, 1567, by Isaac May and other representatives of the community, contains a passage which, freely translated, reads as follows: "In compliance with the representations of some of his advisers and the humble petition of the Jews of Lublin, King Sigismund August permits the Jews to build at their own general expense ["sumpto communi Judæis"] a gymnasium for the instruction of persons in the Jewish religion, and near the gymnasium a synagogue, on the land of Isaac May, rabbi of Lublin, situated between the Jewish houses, near Lublin Castle, in the Jewish quarter . . ."

H. R. J. G. L.

MAY, LEWIS: American merchant and banker; born in Worms Sept. 23, 1823; died at Dobbs Ferry, N. Y., July 22, 1897. He went to the United States in 1840, and in 1845 established an independent business in Shreveport, La. In 1850 he effected an important copartnership for the purpose of carrying on trade in San Francisco, Cal., Portland, Ore., and, later, in New York. He took up his residence in the last-named city in 1856. In 1869 he retired from mercantile life and established the banking firm of May & King. He turned his business talents toward other enterprises also, serving for many years as trustee, treasurer, or director of various New York corporations.

May was treasurer and director of Mt. Sinai Hospital for nineteen years, was one of the organizers and the first president of the Young Men's Hebrew Association, and was trustee and president of Temple Emanu-El for thirty-three years. In recognition of his services the congregation of Temple Emanu-El, in 1888, presented him with a valuable testimonial, and after his death dedicated a memorial window in the Temple to him.

A. J. S.

MAY, MITCHELL: Member of the American House of Representatives; born in Brooklyn, N. Y., July 10, 1871; educated at the Brooklyn Polytechnic Institute and Columbia Law School. He was a member of the 56th Congress (1899 to 1901) and has held several positions in Jewish communal organizations.

A.

MAY LAWS: Temporary regulations concerning the Jews of Russia, proposed by Count Ignatiev, and sanctioned by the czar May 3 (15), 1882. They read as follows:

> "(1) As a temporary measure, and until a general revision is made of their legal status, it is decreed that the Jews be forbidden to settle anew outside of towns and boroughs, exceptions being admitted only in the case of existing Jewish agricultural colonies.
>
> "(2) Temporarily forbidden are the issuing of mortgages and other deeds to Jews, as well as the registration of Jews as lessees of real property situated outside of towns and boroughs; and also the issuing to Jews of powers of attorney to manage and dispose of such real property.
>
> "(3) Jews are forbidden to transact business on Sundays and on the principal Christian holy days; the existing regulations concerning the closing of places of business belonging to Christians on such days to apply to Jews also.
>
> "(4) The measures laid down in paragraphs 1, 2, and 3 shall apply only to the governments within the Pale of Jewish Settlement [that is, they shall not apply to the ten governments of Poland]."

These regulations, as is apparent from their phraseology, were intended only as temporary measures; and the government itself when it issued them was aware of the fact that such legislation would not suffice for the permanent adjustment of the legal status of the Russian Jews. But public excitement due to the riots in South Russia ran high; there was no time to weigh the practical consequences of the new regulations either to the Jews themselves or to their non-Jewish neighbors. The regulations were to remain in force until the final revision of the laws concerning the Jews. This revision was assigned to a special commission, under the chairmanship of Count Pahlen, which soon afterward completed its task; but no further action has been taken in the matter, and the "temporary" regulations are still in force with no immediate prospect of their repeal.

The official motives for the enactments were stated

Ostensible and Real Motives.

as follows: "These laws are called into being by the effort of the government to improve the relations between the Jews and the native population in the Pale of Settlement, and to protect the former from the hostility of the latter, which has manifested itself in outbursts against the person and property of the Jews; also to lessen the economic dependence of the native population upon the Jews." In a resolution of the Senate (Nov. 28, 1888) the government admitted that "the existing relations between the Jews of the Pale and the native Russians can not be considered normal, and the determination of the legal status of the Jews in our country urgently calls for a decisive and early settlement, which, owing to its extent and complexity, and because of the importance of the interests involved, can be made only by a thorough revision of the entire existing legislation concerning the Jews." The enactments, while not changing essentially and permanently the existing laws concerning the Jews, were intended to remove the main motives for a conflict between the Jews and the native population ("Ryesheniya Obsch. Sobran. Senata," 1888, No. 25).

Such were ostensibly the reasons which led the government to pass the temporary regulations. As a matter of fact they were merely the outcome of the Panslavist policy for the repression of the Jews. The views of the Ultra-Conservatives have not been realized; nevertheless it is certain that the May Laws have resulted in great injury to the economic and political life of Russia.

Applications.

The temporary regulations have from the beginning given rise to different interpretations and endless misunderstandings and complaints. For instance, the phrase "to settle anew outside of towns and boroughs" has been a prolific source of official abuse. Some governments informed their officials that by this phrase must be understood not only change of residence by a Jew from one settlement to another, but also from one house to another in the same settlement. The Senate decided against this interpretation; but in the meantime it had become a source of much annoyance to the Jews. As to the removal from one settlement to another, it appears that every Jew became interned in the village in which he happened to be living at the time of the enactment. Thus, while he was still accorded the right to remove from village to city within the Pale, he lost the right to remove from village to village. In this wise petty officials acquired the power to annoy the Jews and to resort to extortion. Appeals to the Senate have usually resulted in decisions favorable to the Jews; but the expenditure of time and money involved in them detract considerably from their effectiveness.

A few examples will suffice to show to what lengths local officials have gone in the interpretation of the May Laws. If one who had the right to reside in a village left it temporarily, he encountered trouble on returning (see the decision of the Senate in the case of Engelmann, May 12, 1895, No. 5120). Jews who had served in the army encountered difficulties, at the expiration of their terms of service, in resettling in the villages in which they had dwelt (*idem*, May 23, 1884; case of Reznikov, Jan. 13, 1885). Similar difficulties were experienced by Jews living in villages and employed in cities, whither they went daily, sometimes remaining there for a few days (*idem*, case of Feigin, Jan. 30, 1895, No. 1253), and by Jews privileged to live anywhere in the empire (*idem*, case of Elkin, Oct. 2, 1885). Misunderstandings occurred in the case of Jews living in the suburbs of cities also (*idem*, 1888, No. 18). Difficulties arose through conflicting decisions of the Senate as to what constituted a townlet (*idem*, July 27, 1887, No. 8849). A frequent source of annoyance was the illegal change by local administrations, without the permission of the minister of the interior, of townlets to villages (*idem*, March 22, 1894; Feb. 13, 1896, No. 1591; July 3, 1896, No. 6557; and many others). There are also numerous cases on record where local officials refused permission to Jews to visit villages temporarily for business purposes, although the law expressly states that Jews are only forbidden to "settle anew" (*idem*, 1895, No. 4025). A further limitation created by the May Laws is that Jews possessing the right of residence in villages have not the right to execute leases or contracts to purchase, the absurd condition being thus created of compelling the Jews to live under the open sky. This absurdity was finally removed by the Senate, which decided that Jews having such right of residence might rent rooms or might build houses of their own on land leased for the purpose (*idem*, Sept. 28, 1892, No. 11702). The Senate likewise decreed that Jews might rent for grazing purposes lands belonging to cities and located within the city limits (*idem*, Oct. 10, 1890). On the other hand, it has been decreed by the Senate department of appeals that even Jews who are privileged to reside anywhere in the empire have not the right to lease lands situated outside of cities and townlets (*idem*, 1889, No. 24).

Relation to Stock Companies.

The May Laws also limit the rights of Jews to become shareholders in stock companies, or directors, managers, or superintendents of real property belonging to corporations and situated outside of towns or townlets in the Pale. Jews may be admitted as members by a majority vote of the stockholders, but they may not hold appointments as officers of such companies. Only a certain proportion of Jews, moreover, may be admitted, the number being limited to one-tenth of the total number of shareholders (Collection of Laws, May 20, 1897, No. 51, p. 674).

The administration of the May Laws by petty officials who were very often ignorant of their meaning intensified abuses. The Senate had to instruct the officials in the most simple principles of law; for instance, that a law is in force only from the day of its publication. The attempts to define the phrase "new settlement" led to the taking of censuses of the Jewish residents, sometimes by semi-illiterate police officials; and grievous blunders resulted. Jews were registered as living in a certain village when they really lived in another, while the names of actual residents were omitted altogether. For instance, because he was not included in the registry list, Gdaliya Zeigermacher was expelled from the village of Puzheikovo, although it was proved that he had lived there for sixteen years. One Bondarchick was improperly registered as residing in the village of Baksha, and was therefore expelled from the village of Kapustyanka, where he had lived for twenty years. The misspelling of names, a very frequent occurrence, led to annoyance and expulsion; *e.g.*, "Gruzman" was entered as "Ruzman"; "Garvich" as "Gurovich"; and "Shmerka Dorfman" as "Shlyoma." A slight error made by a petty official, not to speak of various evil motives, sufficed to bring about the expulsion of the unfortunate Jew from his home and to bring terror and despair upon him.

MAY MARRIAGE. See Omer.

MAYBAUM, SIEGMUND: Rabbi in Berlin; born at Miskolcz, Hungary, April 29, 1844. He received his education at the yeshibot of Eisenstadt and Presburg, at the lyceum in the latter city, and at the university and the theological seminary of Breslau (Ph.D., Halle, 1869). From 1870 to 1873 he was rabbi at Alsó-Kubin, Hungary; from 1873 to 1881, at Saaz, Bohemia; and since 1881 he has held a similar position in Berlin, where he is also docent at the Lehranstalt für die Wissenschaft des Judentums. As founder of the rabbinical society of Germany, whose president he at present (1904) is, he convened the first congress of German rabbis at Berlin in 1884. He is one of the most eloquent rabbis of Germany. In 1903 he received the title of professor.

Maybaum is the author of the following works: "Die Anthropomorphismen und Anthropopathieen bei Onkelos und den Späteren Targumim," Breslau, 1870; "Die Entwickelung des Altisraelitischen Priestertums," *ib.* 1880; "Die Entwickelung des Israelitischen Prophetentums," Berlin, 1883; "Predigten," *ib.* 1892–94; "Jüdische Homiletik," *ib.* 1894; "Methodik des Jüd. Religionsunterrichtes," Breslau, 1895; "Die Anfänge der Jüd. Predigt," Berlin, 1901.

S. F. T. H.

MAYENCE: German city in the grand duchy of Hesse-Darmstadt; on the left bank of the Rhine; the seat of an archbishop, who was formerly one of the prince-electors of the Holy Roman Empire. It has a population of 84,251, of whom 3,200 are Jews. Although there are no historical documents relating to Jewish settlements while Mayence was under Roman rule, it may be assumed that Jews followed the Roman legions to the Rhine in the first centuries of the common era. Legend reports that Charlemagne called Kalonymus of Lucca as rabbi to the congregation of Mayence, but documentary evidence of the existence of Jews in Mayence does not antedate the first half of the tenth century, when Archbishop Frederick (937-954) made an unsuccessful attempt to restrict Jewish commercial activity. In 1012 the peace of the Jews of Mayence was disturbed by a religious persecution instigated by Henry II., and which led to apostasy or banishment. After a few months, however, the exiles returned to the city, and most of the converts to Judaism. In the following period of peace the intellectual life of the Jews of Mayence flourished as never before, under various members of the Kalonymus family and under other Talmudic authorities, *including in particular* Gershom ben Judah.

Massacres During Crusades.

In 1084 the Jews were accused of having caused a conflagration which destroyed a large part of the city, and many emigrated in consequence. These refugees were received by Bishop Rüdiger Huozman of Speyer, who desired to build up his city. (The charter dated 1090 and supposed to have been issued by this bishop is a forgery of later times, based on a document of Henry IV.) Under the leadership of Emicho of Leinigen the Crusaders attacked the Jews of Mayence May 27, 1096, massacring more than eleven hundred in the city and fifty-three who had fled to the neighboring Rüdesheim, in spite of their brave resistance and of the protection of Archbishop Ruthard. Included by Henry IV. in the "king's peace" of 1103, the community slowly recovered, until in 1147 the Second Crusade claimed more victims, in consequence of the agitations of the monk Radulph. Persecutions which threatened the Jews in 1187 and 1188 were averted by the bishop and the emperor Frederick Barbarossa. Toward the end of the thirteenth century the accusation of ritual murder was raised at Mayence. In June, 1281, R. Meïr b. Abraham ha-Kohen was slain and the synagogue desecrated and burned; on April 19, 1283, ten Jews were slain by the populace. The persecutions spread throughout the vicinity, and in 1285 the Jews of Mayence, Worms, Speyer, Frankfort-on-the-Main, and the Wetterau decided to abandon their property and to emigrate to Palestine under the leadership of R. Meïr of Rothenburg. The real estate left at Mayence—in the most beautiful part of the city, the so-called "Judenerben"—was seized by the city in 1286, but was confiscated to the state by Archbishop Adolf II. in 1462. The Jews of Mayence escaped the massacres of 1298 under Rindfleisch and 1338-39 under Armleder. In August, 1349, at the time of the Black Death, nearly the whole community perished, and the ghetto was set on fire. The community gradually revived, however, and lived in peace for nearly ninety years, until the Jews were expelled from the city July 25, 1438, in consequence of municipal quarrels; their cemetery and synagogue were confiscated, and the tombstones were used for building purposes. When the old city government was overthrown in 1414 the Jews were permitted to return by Archbishop Diether, who claimed them as his property. Expelled again in 1462 by Archbishop Adolf, though soon readmitted, they were obliged to leave the city definitely in 1473, their synagogue being transformed into a chapel. On March 6, 1492, a Jew named Isaac was permitted to occupy and manage the "miḳweh" (ritual bath), which had been owned by the state for twenty years, and to bury in the "Judensand," mentioned as a cemetery as early as 1286, the Jewish dead brought into the city.

In the Archbishopric.

The sufferings of the Jews of the metropolis were shared by those in various localities in the archbishopric, where Jews had settled since the Carlovingian time. This is clear from the following partial summary of places which suffered: Aschaffenburg, persecutions in 1147, 1337, 1349; Amorbach, 1349; Bensheim, 1349; Bingen (mentioned in 1160–73), 1349; Dieburg, 1349; Eltville, 1349; Erfurt, 1221, 1266, 1349; Fritzlar, 1349; Heppenheim, 1349; Heiligenstadt-im-Eichsfeld, 1349; Klingenburg, 1298; Königheim, 1298; Königshofen, 1298, 1349; Krautheim, 1298; Külsheim, 1337; Lahnstein, 1287, 1349; Lorch, 1276, 1337; Miltenberg, 1349; Neudenau, 1298; Ostheim, 1298; Seligenstadt, 1349; Tauberbishofsheim, 1235, 1298, 1337, 1349.

Community Reorganized.

In the beginning of the sixteenth century only one Jewish family was living at Mayence. In the diocese of Mayence, outside the city, Jews were living under the protection of Archbishop Uriel of Gemmingen, who, on June 2, 1513, appointed the "Jews' doctor" Beyfus to the position of "rabbi, 'Hochmeister,' corrector, and chief judge" of all the Jews in the diocese, assigning him the village of Weisenau near Mayence as his residence. A movement inaugurated by Archbishop Albrecht of Brandenburg in 1516 to expel all Jews from western Germany failed through the intervention of the emperor Maximilian. The few who found a domicil at Mayence in the sixteenth century were obliged to leave in 1579, together with those of the district of the Rhine. A new community was founded in 1583, which received accessions from Frankfort-on-the-Main in 1614, after the Fettmilch insurrection in that city, and from Worms in 1615, on the expulsion of the Jews there. Elijah Loans, who brought with him refugees from Hanau, reorganized the community of Mayence. A rabbi was officially appointed in 1630, and a new synagogue was built nine years later. While the French held Mayence (1644–48) the community was subjected to heavy burdens, and scarcely were these trials passed when the elector Johann Philipp decreed, Dec. 8, 1662, that only twenty Jews should be protected and be permitted in the city, this number being reduced to ten in 1671. These were compelled to move into a new Jews' street and to submit to the most humiliating restrictions, while the Jews who were permitted to settle in neighboring localities were equally hampered. Although subsequent electors permitted Jews to go to Mayence, only 101 "protected" Jews were allowed there during the electorate.

The government, inspired by the tolerant legislation of Joseph II. of Austria, endeavored, even before the outbreak of the French Revolution, to ameliorate the condition of the Jews in the archbishopric. The first steps taken were the inquiry of 1782 and the rescript of July 29, 1783, while the general rescript of Feb. 9, 1784, was intended to bring about a complete change. After determining the salary of the rabbi and of the Jewish provincial board at Aschaffenburg, declaring the German language to be obligatory in bookkeeping, regulating the laws of dowry and guardianship, forbidding hasty burial, decreeing that every teacher must pass the state examination, and enacting the establishment of two or three Jewish schools in the electorate, the rescript continues: "In order to neglect nothing which may contribute to the education and the future welfare of the Jews, we permit, although we do not command, the Jewish youth of both sexes and all ages, like the Christian, to attend the Christian village and city ("Real und Normal") schools, especially in the electoral capital Mayence, and schools of all kinds." Further legislation beneficial to the Jews was checked by the outbreak of the French Revolution. From the capture of the fortress of Mayence on Oct. 21, 1792, by the French to its restoration to Germany by the terms of the Peace of Paris Nov. 3, 1814, the Jews of the city were free French citizens. The gates of the ghetto were removed on Sept. 12, 1798, by a decree of the municipal council. Members of the Mayence community were among the delegates sent to Paris in 1806 from the department of Mont Tonnerre, of which Mayence was the capital; the community sent delegates also to the Great Sanhedrin, held in the same city.

Interior of the Gemeinde Synagogue, Mayence.
(From a photograph.)

After civic liberty had been won, work on behalf of education and progress was undertaken. The regulation, introduced by Napoleon's decree of May 17, 1808, and providing that Jews must hold certificates of good character before being permitted to engage in trade, remained in force until 1847. After Mayence was incorporated with the grand duchy of Hesse June 16, 1816, full citizenship was guaranteed to the Jews therein by the law of Dec. 17, 1820, though this provision was not entirely kept. By the decree of Nov. 2, 1841, the community of Mayence, with the other communities of Hesse, was reorganized; on the establishment of the German empire they were granted full civic equality.

Social Condition.

In spite of occasional outbreaks of mob violence the lives and the property of the Jews of Mayence were generally protected by law, and they held property under the same conditions as the Christians, with whom they lived peaceably. In the twelfth century they were made KAMMERKNECHTE of the empire, a status that entailed many hardships. They were oppressed by persecutions, forcible conversions, the humiliating Jews' oath, which Archbishop Conrad (1160–1200) exacted, and other measures. Emperor Otto IV. declared in 1209 that the empire had no claim to the Jews of the archbishopric of Mayence. The archbishops, who acted as protectors of the Jews of Germany, representing the emperor by virtue of their office of imperial chancellors, were not always lenient masters. The council held at Mayence in 1233 excommunicated Christians who associated with Jews, while the provincial synod held at Fritzlar in 1259 imposed the badge upon the Jews of Mayence, and issued inimical regulations, which were aggravated by Archbishop Peter in 1310. In 1295 Archbishop Gerhard, in consideration of a yearly payment of 112 Aachen heller, assigned his Jews to the city with the privilege of taxing them at will; Archbishop Gerlach renewed this agreement on Sept. 3, 1366. Mayence had its own Jews' law, which was not entirely unfavorable to them; but this did not protect them under the emperors Wenzel, Rupert, and Sigismund. In 1385 Archbishop Adolf remitted the Jews' tax and abolished the dice-tax which had been instituted in the Rhine provinces. The following centuries show an unbroken series of oppressive and exclusive measures as well as heavy taxation—the Jews being compelled to pay imperial, state, and municipal taxes, protection money, and especially the LEIBZOLL, of which the last-mentioned was not abolished until 1792.

In days of peace as well as in days of oppression and persecution the Jews of Mayence preserved and cultivated their literature. An academy founded by the family of KALONYMUS in the tenth century—which reached its zenith under R. Gershom and his contemporaries and pupils Judah ha-Kohen, Eliezer b. Isaac, Jacob b. Yaḳar, Isaac ha-Levi, Isaac b. Judah, and others—competed with that of Worms, sending its pupils into all countries. The religious, marital, social, and industrial life of the Jews of the Middle Ages was regulated by the decrees of the rabbinical synods held at Mayence in 1150, 1223, 1245, 1307, and 1381, as it had formerly been governed by the decrees of the French synod held at Troyes in the beginning of the twelfth century, and still earlier by the "regulations" ("taḳḳanot") of R. Gershom. The affairs of the community were directed, probably down to the end of the fourteenth or the beginning of the fifteenth century, by the "Judenrat," under the presidency of a BISHOP OF THE JEWS (called in the documents also "Jews' pope") appointed by the archbishop. Religious affairs were conducted by the rabbi and his college. After the reorganization the Jews of Mayence lived under simple regulations, rarely being without spiritual leaders, a well-attended yeshibah, and all the usual institutions of a well-ordered community.

A list of the most prominent scholars and rabbis down to the middle of the fifteenth century, and a complete list beginning with 1583, are given below:

Scholars and Rabbis.

Members of the Kalonymus family; Gershom b. Judah, Me'or ha-Golah (*c.* 960-1028, or 1040); Simon b. Isaac ha-Gadol (beginning of the 11th century); Eliezer b. Isaac ha-Gadol (*c.* 1040); Judah ha-Kohen (author of a legal code; *c.* 1040); David b. Samuel ha-Levi (*c.* 1050); Abraham b. Judah ha-Kohen (*c.* 1060); Isaac b. Judah (*c.* 1080); Jacob b. Yaḳar (*c.* 1080); Isaac ha-Kohen ([b. Abraham?]; *c.* 1080); Isaac b. Eleazar ha-Kohen (1093); martyrs of the First Crusade (1096): David, Judah ha-Levi, Menahem b. David, Samuel b. Judah the younger, Samuel b. Judah ha-Kohen; Abraham b. Isaac ha-Kohen (*c.* 1100); Nathan b. Machir (*c.* 1100); Eliakim b. Joseph (*c.* 1130); Kalonymus b. Judah (*c.* 1140); Eliezer b. Nathan (*c.* 1150); Meshullam b. Kalonymus (*c.* 1150); Judah b. Kalonymus b. Moses (*c.* 1175); Moses b. Mordechai (*c.* 1175); Moses b. Solomon ha-Kohen (*c.* 1175); Solomon b. Moses ha-Kohen (*c.* 1200); Samuel b. Solomon (13th cent.); Baruch b. Samuel (*c.* 1220); Judah b. Moses ha-Kohen (*c.* 1250); Meïr b. Baruch of Rothenburg (1230-93); Yaḳar b. Samuel ha-Levi (later in Cologne, 1270); Abraham b. Meïr ha-Kohen (murdered in 1281); Jacob b. Isaac (d. 1318); Isaac b. David (d. 1329); Samuel b. Yaḳar (called "Bonfant"; ḥazzan; d. Sept. 23, 1345); Joseph b. Isaac of Thann (slain 1349); Eliezer b. Samuel ha-Kohen (d. 1357); Jacob of Nordhausen (*c.* 1365); Jehiel b. Moses ha-Levi (d. Nov. 14, 1380); Moses b. Jekuthiel ha-Levi (1381); Todros (*c.* 1400); Zalman Runkel (*c.* 1420); Jacob b. Moses ha-Levi (Maharil; *c.* 1355-1427); Moses Minz (left Mayence 1455); Judah Minz (brother of Moses; left Mayence; d. Padua 1508); Joshua Moses b. Solomon Luria (d. 1591); Reuben b. Solomon (d. 1598); Joseph (d. 1603); David b. Isaac (d. 1613); Eli Nathan b. Joseph Moses (d. 1631); Judah Löwe of Frankfort (1630-33); Löb Rofe (1634-44); Nathan, son of Isaac Jacob Bonn of Frankfort (1644-50); Saul Judah b. Moses Naphtali (1650-56); Simon Goldisch (1656-62); Jacob Simon (1662-68); Jacob of Ostrog (1668-74); Samuel Sanwil of Lublin (1675-78); David b. Aryeh Löb of Lida (1679-83); Wolf Traub (1683-87); Judah Löb b. Simon (1687-1714); Isaac Seckel b. Immanuel (1715-21); Bernhard Gabriel Eskeles (1721-23); Isaac Seckel Ethausen (1723-29); Bernhard Wiener (1730-32); Moses Brandeis (Moses Ḥarif; 1733-67); David (Tewele) Scheuer (1768-82); Noah Ḥayyim Ẓebi Berliner (1783-1800); Herz Scheuer (1800-10, and 1814-22); Samuel Wolf Levi (1810-14); Löb Ellinger (Schnadig; 1823-47); Joseph Aub (1853-66; later in Berlin; d. 1880); Benedict Cahn (until 1879; d. 1886); Marcus Lehmann (rabbi of the Religionsgesellschaft; 1854-90); Julius Fürst (until 1881); Siegmund Salfeld (since 1880); Jonas Bondi (rabbi of the Religionsgesellschaft since 1890).

Recent Developments.

After the French period the conditions for a time were as they had been under the electorate; but in 1830 the Hessian government undertook to regulate the affairs of the Jewish community. The internal development of the community proceeded slowly. In 1836 instruction in the Jewish religion was made obligatory in the high schools. In 1853 R. Joseph Aub was called to the rabbinate, with R. Benedict Cahn as assistant rabbi and teacher of religion; and in the same year the new synagogue was dedicated. The reforms introduced in this synagogue caused a number of the Orthodox members of the community to form a separate congregation—the Religionsgesellschaft, which built its own synagogue and organized a school. It continued to participate in all the affairs of the community, and as few of the members of this separate congregation left it when the law of 1878 was promulgated, a large part of the communal taxes is remitted to it annually for its religious expenses. Mayence is the birthplace of Michael Creizenach, Isaac Bernays, Joseph Derenbourg, Ludwig Bamberger, and other notable men.

Following is a list of the synagogues and other communal institutions of Mayence: principal synagogue, dedicated in 1853 (see illustration); synagogue of the Religionsgesellschaft, dedicated in 1879 (see illustration); school, founded Nov. 11, 1880; elementary and religious school of the Religionsgesellschaft, founded in 1859; ritual bath (miḳweh), rebuilt in 1888; the old cemetery—first mentioned in 1286, closed in 1880 (see illustration); the new cemetery, opened in 1881 (see illustration); hospital and poorhouse, opened in 1904; various other charitable and religious societies, including a society for Jewish literature, a Zionist society, and a Bene Berit lodge. In April, 1904, while certain excavations were being made in the city, a remarkable building was discovered, which has been named the "House of Kalonymus."

The grand-ducal rabbinate of Mayence, in charge

The Rabbinate.

of Dr. Siegmund Salfeld, includes the communities of the following places: Bodenheim, Bretzenheim-Finthen, Dalheim, Dolgesheim, Ebersheim-Harxheim, Essenheim, Guntersblum, Hahnheim, Kastel, Mayence, Mommenheim, Niederolm, Oberolm, and Oppenheim-Nierstein (where Jews have been living since the middle of the thirteenth century; see Kayserling, "Die Juden in Oppenheim," in "Monatsschrift," ix. 295 *et seq.*), Sörgenloch, and Weisenau.

D. S. Sa.

MAYER, ABRAHAM: Belgian physician; born at Düsseldorf July 10, 1816; died at Antwerp March 1, 1899. After studying medicine at Bonn (M.D. 1839) he settled in Antwerp in 1848, where he practised as a physician until his death. He took an active part in public life and in the medical activities of his adopted country. For some years he was assistant surgeon in the Belgian regiment of the Hussars of the Guard; and he became a member of the board of medical inspectors to the schools at Antwerp, and president and vice-president of various medical societies in Belgium. Mayer contributed many essays to the medical journals of Belgium, including the following: "Un Cas de Mort par Suite de Brûlure (Perforation Duodénale)," 1866; "Un Cas d'Eclampsie Puerpérale au Commencement du Neuvième Mois de la Grossesse: Enfant né Vivant à Terme," 1868; "Quelques Observations sur les Hôpitaux de Londres," 1869; "Une Cause Insolite de l'Intoxication Saturne: par le Tabac à Priser," 1870; "Deux Cas d'Intoxication Puerpérale," 1878; "Une Note sur le Traitement du Choléra," 1885. Most of these were published in the proceedings of the Société de Médecine and the Société Médico-Chirurgicale, both of Antwerp.

Bibliography: *Jew. Chron.* March 10, 1899; *Annales de la Société Médico-Chirurgicale d'Anvers*, pp. 89 *et seq.*, Antwerp, Feb., 1899.

S. F. T. H.

MAYER, CONSTANT: French painter; born at Besançon Oct. 4, 1832. He became a pupil at the Ecole des Beaux-Arts and of Léon Cogniet in Paris. In 1857 he went to America and settled in New York, but later returned to Paris, where he now (1904) resides. He is an associate of the National Academy of Design in New York and a member of the Société des Artistes Français of Paris; he became a member of the Legion of Honor in 1869 and is "Hors Concours" at the exhibitions of the Paris Salon. His subjects are genre and portraits. Among his paintings are: "Consolation" (1864); "Love's Melancholy"; "Maud Müller" (1867); "Episode in the Campaign of 1863" (1869); "Song of the Shirt" (1875); "Song of the Twilight" (1879); "Good News" (1882); "First Grief" (1885). Among the portraits painted by him are those of General Grant, General Sherman, and Mme. de Lizardi (exhibited in the Salon of 1903).

A. F. N. L.

MAYER, ELKAN: German army physician; born in Frankfort-on-the-Main (where his father was a physician), and took his degree at a German university. In 1753 he applied to the council of Frankfort for permission to practise, but the petition was refused. In 1760, however, he was appointed military physician of the imperial infantry regiment, under general master-of-ordnance Count von Macquard, whose regimental commander, Angelo de Pasquali, commended Mayer highly. Debates on the subject of the right of Jews to practise medicine took place for years between the council and the Jewish congregation.

Bibliography: Landau, *Gesch. der Jüdischen Aerzte*, 1895, p. 124.

S. N. D.

MAYER, HENRY: American caricaturist; born at Worms July 18, 1868. Mayer is the son of a Jewish merchant of London, but was educated at Worms. In 1885 he went to Mexico, and subsequently to Texas. There he discovered his ability to draw, and developed his talent without the aid of a teacher. Mayer next went to Cincinnati and thence to Chicago, where he began his career as caricaturist and illustrator.

He has published most of his sketches, including the following: "The Autobiography of a Monkey" (1898); "In Laughland" and "Fantasies in Ha! Ha!" (1899); "Trip to Toyland" (1900); "The Adventures of a Japanese Doll" (1901). Mayer has contributed to "Fliegende Blätter" (Munich), "Black and White" and "Pall Mall Magazine" (London), "Life" and "Puck" (New York), "Le Rire" (Paris), and to many other publications. His cartoons on the "Dreyfus affair" in English periodicals attracted wide-spread attention.

Bibliography: *Jew. Chron.* Oct. 29, 1899; *Brush and Pencil* (Chicago), June, 1901.

MAYER, MORITZ: German rabbi; born at Dürckheim-on-the-Hardt, Germany, Dec. 16, 1821; died at New York Aug. 28, 1867. He studied law at Munich, and entered on the practise of his profession in his native city, when the revolution of 1848 broke out, and he, being forced to flee, emigrated to America. Arriving in New York, he taught at Dr. Lilienthal's institute up to 1851, when he was called as rabbi to Charleston, S. C., where he remained until 1856. Failing health and differences with his congregation owing to his radical views compelled him to leave Charleston; and he returned to New York, intending to practise law. For a short time he officiated as rabbi in Albany, and then, again returning to New York, he became secretary of the Grand Lodge of the Independent Order B'nai B'rith (1863), which office he held until his death.

Mayer contributed frequently to the Jewish press, and translated various German works into English; *e.g.*, Samuel Adler's catechism; Geiger's lectures on Jewish history; Ludwig Philipson's pamphlet on the Crucifixion; and Fanny Neuda's "Hours of Devotion."

Bibliography: *The American Israelite*, Sept. 13, 1867; *Allg. Zeit. des Jud.* 1867, pp. 800, 842.

A. D.

MAYER, SAMUEL: German rabbi and lawyer; born at Hechingen Jan. 3, 1807; died there Aug. 1, 1875. He studied at the Talmud Torah in his native town, entered the bet ha-midrash and the lyceum at Mannheim in 1823, and went to the University of Würzburg in 1826, where he attended at the same time the Talmudic lectures of Chief Rabbi Abraham Bing. Mayer then went to Tübingen, where he took his degree. In 1830 he was called to the rabbinate of Hechingen, which he occupied until his death. He took up also the study of law and was admitted to the bar in 1849. He was the only rabbi in Germany combining the offices of rabbi and lawyer. Mayer was a prolific writer; his chief work, the fruit of twelve years of labor, is entitled "Die Rechte der Israeliten, Athener und Römer, mit Rücksicht auf die Neuen Gesetzgebungen" (vol. i., "Das Oeffentliche Recht"; vol. ii., "Das Privatrecht," Leipsic, 1862–66; vol. iii., "Das Strafrecht," Treves, 1876). He edited the "Israelitisches Samstagsblatt" (1837) and the "Israelitischer Musenalmanach" (Dinkelsbühl, 1840). He wrote also "Gesch. der Israeliten in Hohenzollern-Hechingen" (published in "Orient, Lit." 1844).

S. M. K.

MAYER, SIGMUND: Austrian physician; born at Bechtheim, Rhein-Hessen, Dec. 27, 1842. He studied at the universities of Heidelberg, Giessen, and Tübingen (M.D. 1865) and took a postgraduate course at the universities of Heidelberg and Vienna, becoming privat-docent in the latter in 1869. In 1870 he removed to Prague, where he became privat-docent at the German university and assistant at the physiological institute. He was appointed assistant professor in 1872; became chief of the histological institute in 1880; and was appointed professor of histology in 1884.

Mayer has written many essays (about 60), which have been published in the medical journals of Austria and Germany, in the reports of the Vienna Imperial Academy of Sciences, in Stricker's "Handbuch der Lehre von den Geweben," and in Hermann's "Handbuch der Physiologie." He is the author also of "Histologisches Taschenbuch," Prague, 1887. He was one of the first to introduce the use of methylene blue in microscopy and to describe the chromaffin cells in the sympathetic nerve, the degeneration and regeneration of the nervous system, the sarcolysis, etc.

MAẒLIAḤ BEN ELIJAH IBN AL-BAẒAḲ: Italian Talmudist of the eleventh century. The surname, Ibn al-Baẓaḳ, the meaning of which is unknown, shows that Maẓliaḥ came from a family of Eastern Jews. Maẓliaḥ knew Arabic well. After having been dayyan in Sicily, he went to Pumbedita, where he attended the lectures of Hai Gaon; after Hai's death he returned to Europe. Maẓliaḥ at that time gave Samuel ha-Nagid an Arabic work entitled "Sirat R. Hai Gaon," in which he had recorded the most noteworthy features of Hai's life; this work is quoted by Moses ibn Ezra ("Kitab al-Muḥaḍarah wal-Mudhakarah," ch. vii.) and by Joseph ibn 'Aḳnin (commentary on Canticles). Maẓliaḥ relates in this work that he was particularly struck at the friendship which existed between Hai Gaon and the Catholicos, whom Hai did not hesitate to consult in regard to questions of exegesis.

A Maẓliaḥ was one of the teachers of Nathan b. Jehiel, who quotes him in his "'Aruk" (particularly *s.v.* אנפיקינון) and declares that he studied under him. Geiger and Kohut identified this Maẓliaḥ with Maẓliaḥ ben Elijah. Kohut even suggested that it was from his teacher that Nathan learned Hai's interpretations of Arabic and Persian words.

MAẒLIAḤ, JUDAH B. ABRAHAM PADOVA: Italian Talmudist, cabalist, and poet; rabbi of Modena, where he died Aug. 10, 1728. He was the author of two works: "Tokaḥat Megullah" and "'Oẓerot Sheleg" (the latter cabalistic in nature); and of the following poems: רבון כל העולמים מאציל כל נאצל, Teḥinah; ואתה היודע ועד, an acrostic containing the words ושם שלע"ב ("the name of seventy-two letters"); and עולם הפוך, an epigram on human mortality, an epitaph in the cemetery at Pinale. Only a few of his many responsa have been printed.

Judah had two sons: **Manasseh Joshua** of Modena, brother-in-law of Isaiah Bassani (*c.* 1750), some of whose responsa have been preserved; and **Menahem Azariah,** rabbi of Florence (*c.* 1775), an authority in the Law and a prolific preacher, who also wrote various poems, many of which were liturgical. The genealogy of the family is traced to Abraham b. Samuel of Padua, who married in 1530.

MAZOVRA (MASSURIA). See POLAND.

MAẒẒAH (plural, **Maẓẓot**): Bread that is free from leaven or other foreign elements. It is kneaded with water and without yeast or any other chemical effervescent substance, and is hastily prepared to prevent the dough from undergoing the process of spontaneous fermentation, which would make it "ḥameẓ" (leavened bread). The word is derived from the Hebrew root מצץ ("to compress" or "to extract"). "Maẓẓah," in the singular form, is found only in Leviticus (ii. 5, viii. 26) and Numbers (vi. 19); elsewhere it occurs in the plural. The maẓẓah was the primitive form of bread. The discovery of the leavening process not only resulted in an increase in the mass of the dough, but made the bread more palatable. Maẓẓah, however, still remained the poor man's bread, as he could not afford to wait even twenty-four hours for it to leaven; and it was called therefore "leḥem'oni" (the bread of the poor; Deut. xvi. 3). Maẓẓah was necessary, also, when a meal was to be prepared at short notice for an unexpected guest; for example, at the reception of the angels by Abraham (Gen. xviii. 6), or at Sodom by Lot (Gen. xix. 3), or for Saul by the witch of Endor (I Sam. xxviii. 24). The usual form of the plain maẓẓah was that of a round cake ("ugah"); this is the usual form of bread eaten to-day in Syria and Palestine.

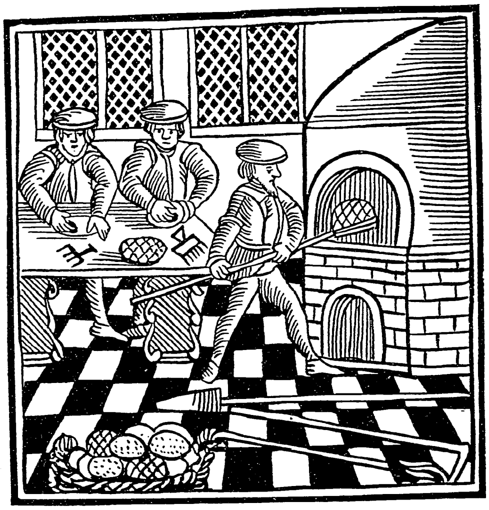
The Use of Maẓẓah.

The maẓẓah offered at sacrifices was of various forms—"leḥem" (lit. = "bread"), "ḥallah" (= "loaf"), "raḳiḳ" (= "wafer"); the latter two were mixed or spread with oil (Ex. xxix. 2). Maẓẓot were required to be absolutely pure, as neither leaven nor honey was permitted in connection with sacrifices (Lev. ii. 11). The reason assigned is that maẓẓah is a symbol of purity, while leaven represents the evil impulse of the heart (Ber. 17a). Maẓẓah was partaken of with the lamb on Passover eve (Ex. xii. 8) because the lamb was considered an offering to the Lord. The eating of maẓẓot during the seven days of the Passover festival is intended to recall the hurried departure from Egypt, which event must be commemorated (Ex. xii. 14, 17, 39; Deut. xvi. 4) on every anniversary.

A Symbol of Freedom.

The Zohar calls maẓẓah "naḥama 'illa'ah" (heavenly bread), an antidote to the Egyptian slavery and corruption and a symbol of freedom and idealism. Maẓẓah was to cure Israel and prepare him for the acceptance of the Torah (Zohar, Teẓawweh, p. 183b, Wilna, 1882).

Nevertheless, the eating of maẓẓah during Passover, unlike the prohibition against eating ḥameẓ, is not imperative; it is a voluntary act ("reshut"). That is, a Jew may abstain from eating both ḥameẓ and maẓẓah, except on the first eve, when the eating of maẓẓah is obligatory ("ḥobah"). This is deduced from the passage, "Six days thou shalt eat unleavened bread" (Deut. xvi. 8), though the other passages command that maẓẓot shall be eaten seven days (Pes. 120a). In accordance with this distinction, the maẓẓah of the first night is called "maẓẓat miẓwah" (= the "precept maẓẓah") or "maẓẓat shemirah" (= the "observance maẓẓah," based on Ex. xii. 7); it must be specially prepared and preserved for Passover eve (Pes. 38b). The special care of the "shemirah" consists in watching the wheat during harvesting, milling, and baking, that it shall not become leavened, either by rain swelling the grains or dampening the flour, or by too much kneading and slow baking. The shemirah is used principally for the Seder nights, while the more pious use such maẓẓot every day of the Passover festival. The ordinary maẓẓah is prepared of "ḳemaḥ min ha-shuḳ" (flour purchased at the market), and the bakers are careful only during the process of kneading and baking. The ordinary maẓẓah may be used for the first night's meal, when eating maẓẓah is obligatory. Yet even the market flour must be made only of wheat, barley, spelt, oats, or rye (Pes. ii. 5), rice and a species of millet being excepted (Pes. 35a).

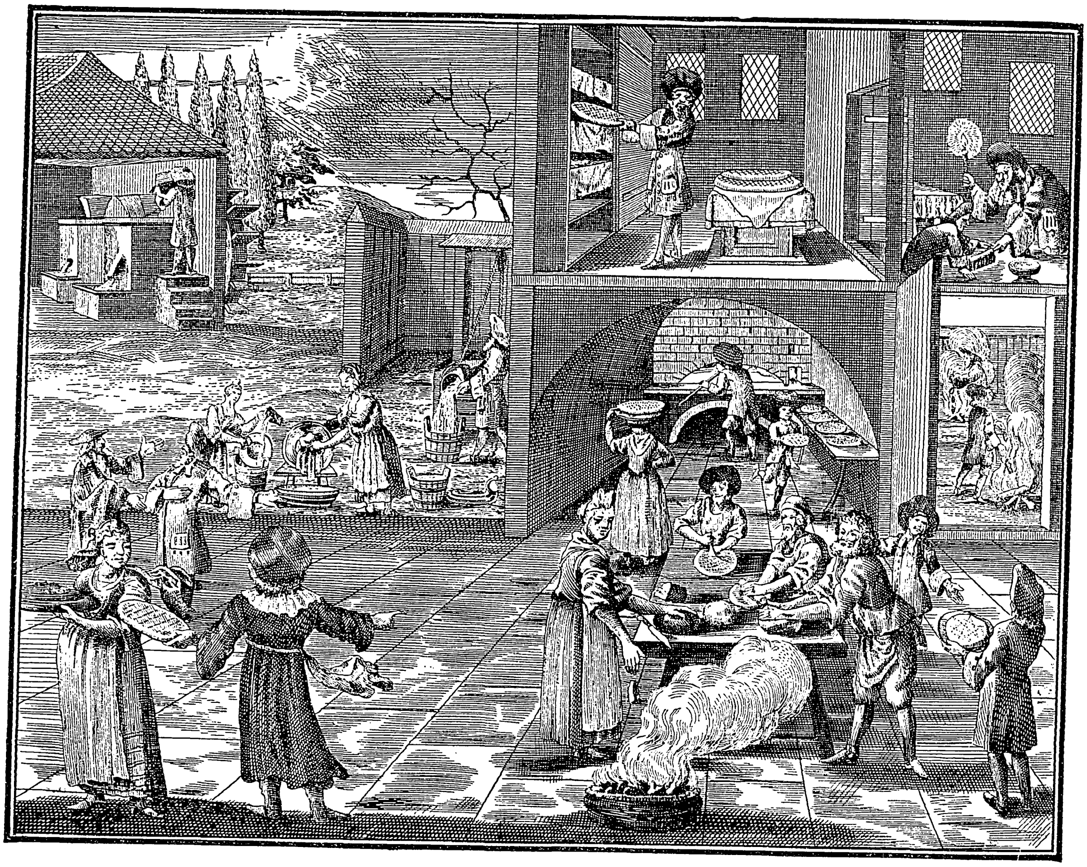


Making Maẓẓot.
(From a Passover Haggadah, Amsterdam, 1695.)

"Mayim She-Lanu."

On the theory that at night the sun underneath the earth warms the wells and rivers below and makes the water tepid (Pes. 94b), R. Judah ordered that the kneading for maẓẓah shall be done with "mayim she-lanu" (water that has "lodged" overnight at home and has been exposed to the cold night air). The aim is to have the water for kneading as cold as possible in order to prevent the fermentation of the dough (Shulḥan 'Aruk, Oraḥ Ḥayyim, 455, 2). Although not necessarily against the Law, it is the custom to omit salt or seasoning from the maẓẓah (*l.c.* 455, 5).

The size of each mass of dough for maẓẓah may not exceed one-tenth of an ephah, equal to $43\frac{1}{5}$ medium-sized hens' eggs, and the time allowed for preparing it is the time required for a journey of a mile (= 2,000 cubits), that is, about twenty-seven minutes (*l.c.* 456, 1; 459, 2). However, a continuous kneading and frequent hand-washings in cold water may extend the time. According to R. Gamaliel, the preparation of the maẓẓah was performed by three women: one kneaded the dough, another formed the maẓẓah, and the third baked it (Pes. iii. 4).



Preparation of Maẓẓot.
(From Kirchner, "Jüdisches Ceremoniel," 1726.)

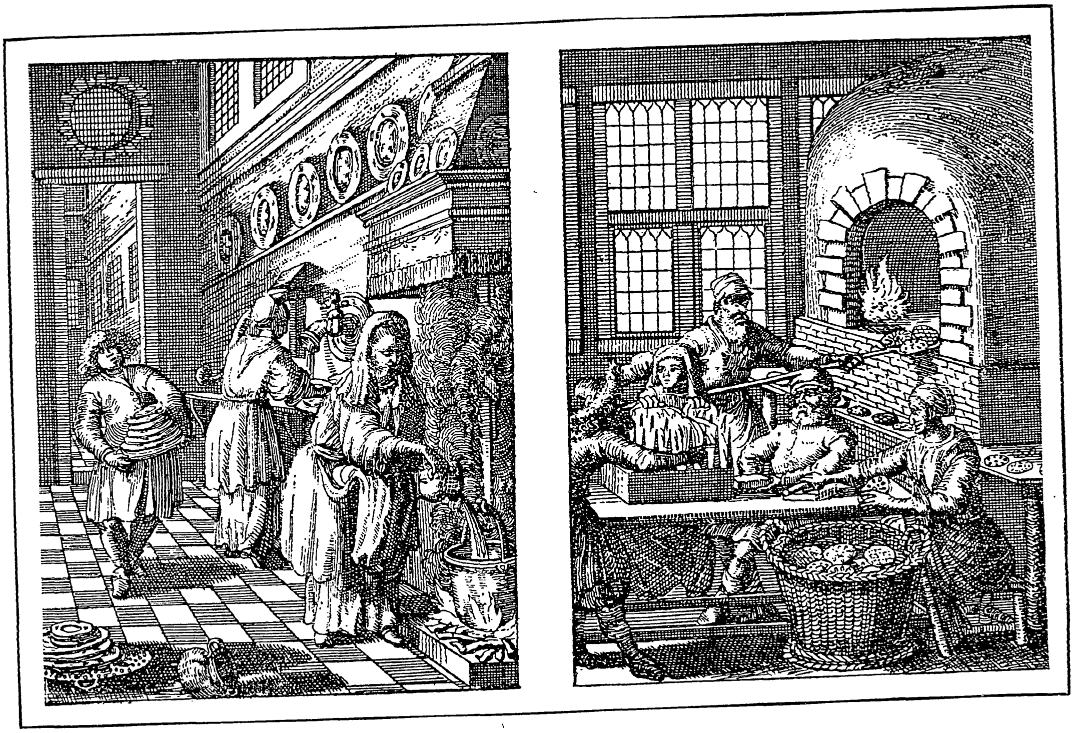
Size and Shape.

The thickness of the maẓẓah must not exceed the size of a closed fist, four fingers or four inches, which was the thickness of the showbread. A later custom was to make maẓẓah one finger thick ("Bet Hillel," Yoreh De'ah, No. 96). In modern times the maẓẓah is much thinner, varying from four to five maẓẓot to the inch, and is made in round form about twelve inches in diameter. In about 1875 maẓẓah-baking machinery was invented in England, and soon after introduced in America. Some rabbis opposed the innovation, claiming that the corners of the machine-made maẓẓah were trimmed round in a subsequent operation, thus prolonging the time and causing fermentation; as a result of their protest the form of the maẓẓah was changed to a square. Still, there are a great many, perhaps a majority, who use round, machine-made maẓẓot, while there are many pious ones who would use no other than hand-made maẓẓot. Eisenberg, at Kiev, Russia, recently invented a maẓẓah-machine capable of baking 15 poods (about 541 pounds) of dough in one or two hours ("Der Jud," 1902, No. 9).

The perforation of the maẓẓah, after being rolled into shape, and before baking, was for the purpose of keeping it from raising and swelling in baking. It appears that in the early centuries the perforation of the maẓẓah was quite artistic. In the house of R. Gamaliel the perforations of the maẓẓot represented figures. Evidently the perforating was done with an implement that looked like a comb, as the word "seriḳin" indicates. The figures were those of animals, flowers, etc. Artistic perforation was later prohibited, as it consumed too much time and caused fermentation. Baytus b. Zonin suggested stamping the maẓẓah with ready-made figured plates, but was opposed on the ground that no discrimination must be made in favor of any particular kind of perforation (Pes. 37a). R. Isaac b. Gayyat says the figures represented Greeks, doves, and fishes. Maimonides permits any fancy design if made by a professional baker, as he does it quickly ("Yad," Ḥameẓ u-Maẓẓah, v. 15). In later periods the perforating implement was a wheel, called the "reidel," provided with sharp teeth and attached to a handle. The perforator, usually a youth, would run his reidel through the maẓẓah in lines crossed at right angles and about one inch apart. The maẓẓah-machine has an automatic perforator that makes lines at intervals of a half inch.

The "Reidel."

The baking of pudding, fillings, or sponge-cake out of ordinary flour is prohibited during Passover for fear of fermentation in consequence of the delays in preparation. But it is permitted to make all kinds of pastry out of maẓẓah-flour, as no fermentation is possible after the flour is baked. For baking and cooking with maẓẓah-flour see Cookery. Ordinary flour may be kneaded with pure fruit-juices, with eggs, or with honey, as no fermentation is possible with them. This is called "rich maẓẓah," and may be eaten on Passover, except on the first night, when the regular maẓẓah, or leḥem 'oni, is obligatory (Pes. 36a). In the early centuries maẓẓah-baking was done by the wife daily, for the household's use. In the Middle Ages preparations were made to bake maẓẓot thirty days before Passover, except the maẓẓah shemirah, which was baked in the afternoon of the 14th of Nisan, at the time when the Passover lamb was formerly sacrificed (Oraḥ Ḥayyim, 453, 4). Still later, when the community had a communal oven, it was incumbent on the "lord of the house" to superintend the maẓẓah-baking for his family (see "Am. Jew. Hist. Soc." ix. 70).



Preparing Maẓẓot.

(From Leusden, "Philologus Hebræo-Mixtus," Utrecht, 1657.)

Maẓẓah-Baking as an Industry.

In America maẓẓah-baking is an important industry. In New York city alone, in 1904, 10,000 barrels of flour were used in making about 1,700,000 pounds of maẓẓah, distributed among fifteen bakers, one of them making maẓẓah by hand, and one small bakery making maẓẓah shemirah. The larger bakeries commence work four or five months before Passover. New York supplies many cities in the United States and Canada with maẓẓah. Other large maẓẓah-making centers are Chicago, Pittsburg, Boston, Philadelphia, and Baltimore. Maẓẓot have become popular among non-Jews, who use them as tea-biscuits. R. Jacob Möln (d. 1420), in his "Sefer Maharil," mentions the custom, in baking maẓẓot, of starting the fire with the willows used for Hosha'na and for the lulab.

It is forbidden to eat maẓẓah on the day before Passover, in order that it may be more palatable on the evening of Passover. The three maẓẓah-cakes used at the Seder service on Passover eve are placed one on the other in a plate or in a threefold cover specially made for the occasion. The three maẓẓah-cakes are distinguished as "Kohen," "Levi," and "Israel." The fourth order of the Seder is Yaḥaz, in which the middle maẓẓah ("Levi") is broken into two parts, the larger being put aside as afiḳomen, with which the meal is finished; the smaller part is

At the Seder.

left between "Kohen" and "Israel." When the Haggadah is recited the maẓẓot are uncovered and exposed to view. The eighth order of the Seder is Maẓẓah; in it a piece of the "Kohen" and a piece of the "Levi" are eaten after the benedictions "Ha-Moẓi" and "Maẓẓah." The "Israel" is eaten during the tenth order, Korek, with the bitter herbs, as practised by Hillel.

An ancient custom, which still prevails in some parts of the Orient and in Europe, is to keep a single maẓẓah hanging on the interior wall of the synagogue all the year in strict observance of the passage "That thou mayest remember the day when thou camest out of the land of Egypt all the days of thy life" (Deut. xvi. 3). See Afiḳomen; Blood Accusation; Leaven; Passover; Seder.

MAẒẒEBAH. See Stone and Stone-Worship.

McCAUL, ALEXANDER: English Christian missionary and author; born at Dublin May 16, 1799; died at London Nov. 13, 1863. He was educated at Trinity College, Dublin. Becoming interested in the Jews, he was sent as a missionary to Poland in 1821, where he studied Hebrew and German at Warsaw. In 1822 he went to interview the czar in regard to the conversion of the Jews. He continued to live at Warsaw for ten years, interesting the grand duke Constantine, the crown prince of Prussia, and Sir Henry Rose in his work. In 1837 he produced an elaborate attack upon Jewish legalism under the title "Old Paths"; it was published weekly for over a year. This created considerable interest among Jews, and was translated into several languages, including Hebrew ("Netibot 'Olam"). An answer in Hebrew ("Netibot Emet"), was published by Judah Middleman in 1847, a translation by Stanislaz Hoga having appeared in the preceding year. McCaul wrote vigorously against the blood accusation, and refused the Protestant bishopric of Jerusalem, on the ground that it should be held by a Jew by birth, recommending M. S. Alexander for that post. He became professor of Hebrew and rabbinical literature at King's College, London.

MEAH. See Hammeah, Tower of.

Name and Early History.

MEAL-OFFERING: Comprehensive term for all sacrifices from the vegetable world; to designate these in the Old Testament the Hebrew word "minḥah" is used, which, as a probable derivative of the Arabic verb "manaḥ" = "to give" properly signifies "gift" or "present." The desire of offering to God oblations of vegetables or cereals is presupposed in the Bible to be as general a human one as that of pleasing God by animal sacrifices. The earliest example of a meal-offering is undoubtedly the sacrifice that Cain tendered from the fruit of his field (Gen. iv. 3-5). Gideon added to a meat-offering maẓẓot made of an ephah of flour (סלת; Judges vi. 19). Maẓẓot were probably also baked from the flour (קמח) that Hannah took to Shiloh (I Sam. i. 24); for it is not likely that flour alone was sacrificed, it being in the unprepared state not an article of human food. A vegetable sacrifice is referred to also in the second member of the phrase זבח ומנחה (*ib.* ii. 29, iii. 14). Loaves of bread (ככרות לחם) were laid before God (*ib.* x. 3). Mention is made of their being placed in the sanctuary of Yhwh at Nob (*ib.* xxi. 7). In the term מנחת הערב (I Kings xviii. 29, 36) the second member (הערב) is added not as a new distinction qualifying this מנחה as different from the others or as a fixed regular institution, but merely in view of the preceding fixation of time, "and when midday was past." Leavened bread (חמין) likewise was sacrificed (Amos iv. 5). Vegetable sacrifice is also designated as "minḥah" when it is connected with a thank-offering (Amos v. 22), a meat-offering (Isa. xix. 21), or a burnt offering (Jer. xiv. 12; Ps. xx. 2). The foregoing shows that cereal oblations are mentioned only sporadically in the early historical books.

Regulations of the Law.

The Law ordains: (*a*) as regards the material of the meal-offering that it must consist, except in the case of the jealousy-offering (Num. v. 15), of fine flour (סלת; Lev. ii. 1), oil (*ib.*), salt (*ib.* verse 13), and incense (*ib.* verses 1 *et seq.*, 15 *et seq.*), while leaven and honey must be kept strictly separate (*ib.* verse 11), the latter probably because it fermented easily (comp. the Neo-Hebraic הדביש = "to ferment," in Dalman, "Aramäisch-Neuhebräisches Wörterb. zu Targum, Talmud, und Midrasch," 1901, p. 86). (*b*) This material might be offered in the following forms: (*α*) barley flour (קמח) without oil or incense was brought for the so-called jealousy-offering (Num. v. 15); (*β*) fine flour (סלת), even in its original state, must have oil poured over it, and be sprinkled with incense, the last alone being lighted (Lev. ii. 1-3); (*γ*) the meal-offering might consist of different kinds of cakes (verses

4-7); (*δ*) the first-fruits of the field were offered in the shape of roasted ears or ground grains of fresh corn (verse 14, where גרש כרמל is a later addition; comp. König, "Syntax," § 333 t). It is an interesting detail that the meal-offering which was baked on a flat tin pan (מחבת) was broken into small pieces (פתים; Lev. ii. 6, vi. 14). (*c*) The meal-offerings, according to the purposes they served, might be divided into two groups: (*a*) those offered alone as a substitute in the case of the poor (Lev. v. 11 *et seq.*) for the sin-offering; as the daily meal-offering ("tamid") of the priests (Ex. xl. 29; Lev. vi. 12-16; comp. I Chron. ix. 31); and as the jealousy-offering (Num. v. 15 *et seq.*), which "reminds of sin" (comp. the sheaf offered in recognition of the beginning of harvest [Lev. xxiii. 9 *et seq.*], the loaves of the Feast of Weeks [*ib.* xxiii. 16 *et seq.*], and the showbread [*ib.* xxiv. 5 *et seq.*]); and (*β*) meal-offerings added to the animal-offerings. These "musaf" offerings were added to the thank-offering (Lev. vii. 11-13, etc.), to the sacrifice of purification of the Israelites (Lev. ix. 3) and of the lepers (*ib.* xiv. 10-20), and to the burnt offering (Num. xv. 1-16); and they were combined with a drink-offering. The unqualified statement that the unconsumed portion of the meal-offering should belong to the priests (Lev. ii. 3) refers probably also to the accompanying meal-offerings (comp. Franz Delitzsch in Riehm's "Handwörterb." cols. 1519b, 1520a). Not every burnt offering, however, is to be supplemented by a meal-offering, as Lev. xii. 6 shows.

BIBLIOGRAPHY: For the earlier views see Franz Delitzsch, in *Speiseopfer*, in Riehm's *Handwörterb. des Biblischen Alterthums*; the later view of the history of vegetable sacrifices is supported by Benzinger, *Arch.* §§ 62 *et seq.*; Baentsch, *Exodus-Leviticus*, in *Handkommentar*, 1900; Bertholet, *Leviticus*, in *Kurzer Handkommentar*, 1901.

E. G. H. E. K.

ME'ASHA: 1. Palestinian tanna, to whom one reference occurs in the Mishnah (Peah ii. 6), from which it appears that he lived in the time of Hillel's descendants (comp. Heilprin, "Seder ha-Dorot," ii.).

2. Palestinian haggadist; grandson and pupil of Joshua b. Levi (Yer. Ber. ii. 3; Yer. Beẓah i. 6 *et al.*). From the few details concerning him it appears that on Saturdays he used to have himself carried to the synagogue in order to preach (Yer. Beẓah *l.c.*), that he was not rich, and that he died suddenly in the time of Ammi (Ket. 85b). Me'asha is particularly noted for the vision which he is reported to have seen during a trance lasting three days, and concerning which he said: "I have been in a world of confusion where people who are honored here are held in contempt" (Ruth R. iii. 1). In Pes. 50a this vision is ascribed to Joseph b. Joshua b. Levi; Joseph was probably Me'asha's father. Me'asha inferred from Isa. xxxiii. 15-17 that when one shuts his eyes to things indecent he is worthy to view the face of the Shekinah (Pesiḳ. R. 24 [ed. Friedmann, p. 125a]; Derek Ereẓ i.; Lev. R. xxiii. 13).

3. Palestinian amora of the fourth century; mentioned as a companion of Samuel b. Isaac and Zera (Yer. Ber. ii. 9 *et al.*). His halakic and haggadic sentences are met with in both Talmudim.

ME'ASSEFIM ("collectors"; from אסף = "to collect"; hence the name of the periodical "Ha-Me'assef" = "The Collector"): Name designating the group of Hebrew writers who between 1784 and 1811 published their works in the periodical "Ha-Me'assef," which they had founded. In 1782 Moses Mendelssohn's German translation of the Pentateuch had appeared. In the "bi'ur" or commentary which he added to this translation, he dwelt on the beauty of the Hebrew language, its wealth of imagery, and its adaptability for poetic expression. By his comments on Scripture, also, he largely stimulated Hebrew, grammatical, and exegetic studies. The seeds he thus scattered bore fruit even in his lifetime. While reading and discussing Mendelssohn's Scriptural expositions, Isaac Abraham Euchel and Mendel Bresslau, who were at that time tutoring in the house of David Friedländer at Königsberg, conceived the idea of causing Hebrew as a literary language to be used more widely among the Jews. Assured of the material support of Simon and Samuel Friedländer, they issued in the spring of 1783 an appeal to all Jews to assist in establishing a society for the study of Hebrew (Ḥebrat Doreshe Leshon 'Eber). The periodical "Ha-Me'assef" was projected as a rallying-point for all those who were interested in and able to contribute to the work.

The undertaking met with a cordial reception in many quarters, especially in Berlin; Mendelssohn and even the aged Naphtali Herz Wessely promising their support and contributing to "Ha-Me'assef," the former anonymously. The first number of the periodical was announced April 13, 1783, in a prospectus, "Naḥal ha-Besor," signed by Euchel, Bresslau, and Samuel and Simon Friedländer. The first volume appeared in 1784, being the earliest successful periodical published in Hebrew. The first three volumes were issued in monthly numbers at Königsberg (the frontispiece to vol. iii. being Naphtali Herz Wessely's portrait); vols. iv.-vi. appeared in quarterly numbers at Königsberg and Berlin; vol. vii. (one number only) at Breslau; vol. viii. at Berlin; the first two numbers of vol. ix. at Altona, and the last two at Dessau; vol. x. (two numbers only) also at Dessau. The new "Collector" ("Aḥare ha-Me'assef" or "Ha-Me'assef he-Ḥadash"), edited by S. Cohen, may be regarded as a continuation of "Ha-Me'assef." Vol. i. appeared at Berlin in 1809; vol. ii. at Altona in 1810; and vol. iii. at Dessau in 1811.

In addition to articles on Hebrew prose and poetry "Ha-Me'assef" printed general scientific articles, interesting papers on mathematics and natural science, biographies of eminent Hebrew scholars, and articles on the history of the Roman emperors; responsa on religious questions, *e.g.*, on the speedy burial of the dead, have also been collected in its pages. The attitude of "Ha-Me'assef" was by turns Orthodox or Reform, according to the views of the collaborator. It was often very aggressive toward the strictly Orthodox view, although Wessely had from the very beginning advised a purely objective point of view.

The principal collaborators on "Ha-Me'assef" were Ben Zeeb, Bras, Bresslau, Cohen, Dessau, Euchel, Franco-Mendez, Friedländer, Friedrichsfeld, Herz, Joseph Hirsch, Lindau, Löwe, Löwisohn, Mendelssohn, Wessely, Witzhausen, and Wolfsohn.

MEASURES. See Weights and Measures.

MEAT-TAX: In Austria, as everywhere else, the Jewish communities imposed a tax on meat, the revenue from which was used for communal purposes. During the eighteenth century, however, the national government used this method of raising a revenue from the Jews in order to support educational institutions. Such was the case in Galicia after 1791. In the congregations belonging to the kingdom of Bohemia the meat-tax, with the tax on wine and fish, was used to compensate the government for the loss of revenue attending the abolition of the toleration-tax in 1782. It was about two kreutzer on one pound of meat and ten kreutzer on a goose. The tax was levied in such a way that the butchers had to give with every pound of meat a receipt for the payment of that duty, while in the case of fowl the shoḥeṭ was not permitted to kill unless the party requiring his services handed him such a receipt. This tax was farmed out to a contractor; he paid the government a fixed annual sum for the whole province and had his subcontractors in every town. The latter were almost invariably Jews, and exacted their money with merciless rigor. Those who attempted to evade the tax were heavily fined. The hardships entailed by the cruelty of these tax-farmers are vividly presented in Eduard Kulke's novels.

For the meat-tax in Russia see Korobka.

ME'ATI, HA- (המאתי)**:** Family of translators which flourished at Rome in the thirteenth and fourteenth centuries.

Nathan b. Eliezer ha-Me'ati: Earliest known member of the family; called the "Prince of Translators" and the "Italian Tibbonide"; lived in Rome from 1279 to 1283. His native place seems to have been Cento, whence his name "Me'ati," which is the Hebrew equivalent of "Cento" (= 100). After acquiring many languages during his long wanderings, he settled at Rome, where he translated scientific and especially medical works from Arabic into Hebrew, to take the place, as he declared, of the medical literature of the Jews which had existed even at the time of Solomon but had been lost, and to silence the mockery of the Christians, who said that the Jews had no such literature. His translations are: (1) 'Ammar ben 'Ali al-Mausuli's "Al-Muntaḥib fi 'Ilaj al-'Ain," on the treatment of the eye; (2) the "Canon" of Avicenna; (3) the aphorisms of Hippocrates with Galen's commentary (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1588); (4) the aphorisms of Maimonides, a selection from various authors, chiefly from Galen, published under the title "Pirḳe Mosheh," Lemberg, 1804.

Many anonymous translations are attributed to Me'ati, among them: (1) Razi's treatise on bleeding, "Ma'amar be-Haḳḳazah"; (2) Zahrawi's "Kitab al-Taṣrif" (Hebrew title, "Ẓeruf"); (3) Ibn Zuhr's "Kitab al-Aghdhiyah" (Hebrew title, "Sefer ha-Mezonot"); (4) an anonymous work on the causes of eclipses entitled "Ma'amar 'al Sibbot Liḳḳut ha-Me'orot."

Samuel ha-Me'ati: Son of Solomon ha-Me'ati. He concluded the translation of an extract from Galen's commentary to Hippocrates' work "On Regimen in Acute Diseases," and, some time after 1306, the translation of a medical work by Ibn Zuhr.

Solomon ha-Me'ati: Son of Nathan b. Eliezer ha-Me'ati. He completed (1299) the translation, begun by his father, of Galen's commentary to Hippocrates' work "On Airs, Waters, and Places."

MECHNIKOV. See Novachovich, L.

MECIA (MATTHEW) DE VILADESTES: Jewish chartographer of Majorca at the beginning of the fifteenth century. He was the author of a map, dated 1413, formerly in the convent of Val de Cristo, near Segorbe, but now in the Bibliothèque Nationale at Paris. In it he gives special prominence to the navigation in African waters of Jacme Ferrer, also of Majorca. It fills six sheets in Marcel's "Choix de Cartes et de Mappemondes des XIVe et XVe Siècles" (Paris, 1896). The map is based upon the work of Jaffuda Cresques, the probable author of the atlas of Charles V. Mecia therefore belonged to the Judæo-Catalan school of chartographers. Don Miguel Bonet has discovered in the archives of Majorca a permit of the governor's lieutenant allowing the "convert Macia" to debark in Sicily. This is dated Jan. 20, 1401, and probably refers to Mecia.

MECKLENBURG: Territory in North Germany; bounded on the north by the Baltic Sea. Formerly it constituted one duchy, but since 1701 it has been divided into Mecklenburg-Schwerin and Mecklenburg-Strelitz, forming two separate grand duchies of the German empire. However, their governments are still intimately connected. Mecklenburg-Schwerin has (1900) 607,770 inhabitants, among whom are 1,763 Jews, divided into 36 congregations; Mecklenburg-Strelitz has 102,602 inhabitants, including 331 Jews, divided into 6 congregations. It is possible that the settlement of Jews in Mecklenburg dates from 1243, when Brandenburg expelled its Jews; but it is equally probable that the first Jewish settlers arrived from western Ger-

Early Settlement.

many, where the Jews were frequently persecuted. It is certain, however, that Jews lived in Mecklenburg as early as 1266, for in a document dated April 14, 1266, in which Henry I. (the Pilgrim) conferred upon Wismar the Lübeck rights, Jews are mentioned together with the private servants and officials of the prince. Thus Wismar seems to contain the oldest settlement of Jews in Mecklenburg. By and by they are heard of in other cities: in Boizenburg, 1267; Rostock, 1279; Cracow and Güstrow, 1325; Malchin, 1332; Schwerin (now the center of the Jewish communities in Mecklenburg), about 1340; Friedland and Parchim, 1350; Neubrandenburg, 1440.

The Jews of Mecklenburg were compelled to pay a considerable sum annually for the privilege of living there and for protection by the prince. The several estates looked with great disfavor upon their presence and never neglected an opportunity of injuring them. They had no right to own real estate, and their residence, as a rule, was confined to the most neglected quarters of the city they dwelt in. In Wismar, for instance, they inhabited the Altböterstrasse, which was called "Platea Judæorum"; here they had a synagogue, called "Domus Judæorum." Naturally their fate was bound up with that of their protector. Thus when Henry undertook a pilgrimage to Palestine, where he remained for twenty-four years in Mohammedan captivity, the Jews were expelled from Wismar (1290), and were not readmitted until the succession of Henry II. (the Lion-Hearted). During his reign a Jew named Nathan (1310)—was permitted to own real estate in Wismar. Under Albrecht II. their position changed for the worse; only two Jewish families were permitted to reside in Wismar, and they became subject to the jurisdiction of the city magistrates instead of to that of the prince, thus being exposed to the fanaticism and hatred of the people. Some Jews were admitted into Wismar in 1349, but they were expelled again in 1350, and since then and for 500 years thereafter there was no trace of Jewish residence there.

In the other cities matters were worse. Jews at Cracow and Güstrow suffered martyrdom three times within 167 years. A baptized Jewess accused her brother-in-law Eleazar of having desecrated the host; all the Jews were seized and burned, the synagogue was destroyed, and in its place was erected a "chapel of the Holy Blood" (1325). Two Christians of Rostock who were found guilty of having robbed and murdered a Jew and Jewess were punished with banishment only (1320). In 1350 the widespread accusation that the Jews had poisoned the wells was made in Mecklenburg, and nearly all the Jews there were driven out. They seem, however, to have resettled there within a few decades.

The Sternberg Burning.

Mecklenburg's cruel treatment of the Jews reached its climax in 1492, in connection with a charge of desecrating the host. A Jew was accused of having persuaded a priest to become a convert to Judaism and of having induced him to steal the sacred host for the purpose of desecrating it. The matter being brought before the duke, he ordered all the Jews to be placed under arrest and brought to Sternberg. There they were subjected to horrible torture in order to extort from them a confession. But though they persistently denied the charge, the sentence to burn them alive was pronounced. On Oct. 24, 1492, twenty-four Jews and two Jewesses were taken to a hill near the city of Sternberg—since then called the "Judenberg"—where they died on the pyre. Those not burned were banished from the land. The prominent rabbis of the time declared the ban against any Jew who would settle in cruel Mecklenburg, and there is no evidence that any Jew settled there until the second half of the seventeenth century.

In the meantime Protestantism had taken root in Mecklenburg, and religious fanaticism was no longer so rampant as in former days. Yet it was during the reign of the Catholic prince Christian I. (1658–1692) that the second movement of Jews to Mecklenburg began. In 1676 he called to his court the Jews Abraham Haym and Nathan Benedix of Hamburg, gave them special privileges, and granted them a tobacco monopoly, the first in Mecklenburg. At the intervention of the court Jews, Duke Frederick William abolished the poll-tax. But his successor, Charles Ludwig (1747–56), who had special political reasons for wishing to please the people, issued an edict that all unprivileged Jews should leave the land within four weeks; this left only about thirty "Schutzjuden" in Mecklenburg. The same prince called to his court the brothers Philip and Nathan Aaron, who became the real founders of the present Jewish communities in Mecklenburg. Through their influence the Jewish population there so increased that they were able in 1752 to call a convention to deliberate upon their religious needs. They decided, among other things, to request the chief rabbi of Frankfort-on-the-Oder to remove the ban of 1492 and to establish a Jewish tribunal. The latter, however, did not receive the sanction of the government, and was abolished (1755) by a rescript of the duke. In 1764 they held another convention, with the sanction of Duke Frederick the Pious, who vested in the rabbis the power of judges among the Jews. In 1765 one Marcus Moses graduated as a physician, and an edict of the duke permitted him to practise. This was the first graduation of a Jew in Mecklenburg. One Marcus Isaac (who distinguished himself during the occupation of Mecklenburg by Frederick the Great) and a certain Hirsch were the first in the commercial field; they began about this time to export wool, thus encouraging the raising of sheep, which occupation has greatly contributed to the prosperity of the country.

Under this mild government the community developed rapidly. Two synagogues were dedicated—one on Sept. 5, 1763, at Altstrelitz, the community of which numbered 130 families; the other at Schwerin in 1773. Still the populace was hostile toward the Jews and often insisted on the strict enforcement of the constitutional provisions by which the dukes of the Mecklenburg duchies pledged themselves to grant no privileges to Jewish settlers to the detriment of Christian citizens. Duke Frederick Francis I. was the first prince that earnestly desired their emancipation. On Feb. 22,

Their First Emancipation.

1811, the Jews petitioned him on that subject, and he consulted the estates at the following convention. They acknowledged the justice of the petition, but argued that the Jews were not as yet ready for emancipation. But Professor Tychsen of the University of Rostock, who was consulted on the matter, declared himself in favor of the petition. After some hesitation the duke finally decided in favor of the Jews, and issued, Feb. 22, 1813, a constitution which declared that his Jewish subjects, with their wives and children, were citizens of Mecklenburg; leaving future legislation to decide whether or not they were to be admitted to government positions. The Jews soon had an opportunity to show their gratitude; the Jewish youth enthusiastically responded to the duke's call to arms in 1813. But the reaction which set in after Waterloo and the ill-will of the states brought about a suspension of this law in 1815. In 1829 the Jews were first admitted to the practise of law, with the limitation that they could practise only in the city courts. Mecklenburg adopted in 1848 the "Grundrechte" (constitution) of the Frankfort Parliament abolishing all disabilities on account of religion, but repealed it two years later.

But times had changed. While in former days the people opposed the emancipation of the Jews, in 1867 the municipal boards of various cities in Mecklenburg petitioned the Reichstag for it, and a member of the Reichstag, Wigger by name, was the most ardent advocate of the passage of a law abolishing all disabilities based on differences of religion. The Reichstag passed that law by a large majority March 12, 1869, and King William of Prussia, as the head of the North German Federation, confirmed it July 3, 1869. With the passage of this law and its insertion in the constitution of the German empire in 1871, the last political disability resting on the Jews of Mecklenburg, as on Jews throughout the empire, was removed.

Bibliography: Donath, *Gesch. der Juden in Mecklenburg*, Leipsic, 1874.

D. I. War.

Of the internal conditions of the Mecklenburg Jewry during the first settlement, up to 1492, nothing is known. During the second settlement, in the seventeenth century, the community was too small to show any spiritual activity. The first sign of such is in the case of Nathan Aaron, who maintained Joshua Spira in his house as a chaplain. The first rabbi appointed by the duke was Jeremiah Israel (1763), whose chief duty consisted in acting as judge for the scattered communities of the duchies. He was succeeded by the above-mentioned Joshua Spira, author of "Panim Masbirot" (or "'Arba' Shiṭṭot li MeHaRISh"), novellæ and responsa (Frankfort-on-the-Oder, 1770).

Spiritual Activities.

During the latter part of the eighteenth and at the beginning of the nineteenth century the differences between R. Marcus Lazarus Jaffe and R. Joshua Falk Albu and their congregations frequently occupied the attention of the authorities. As these rabbis were Poles and not in sympathy with the educational movement which had won the allegiance of the Jews of Mecklenburg, as of other communities in Germany, an attempt was made about 1828 to establish in Güstrow a normal school where Jewish teachers might be trained, but the movement failed for lack of means. The congregation of Altstrelitz, however, established a parochial school, which at one time flourished under the famous German lexicographer Daniel Sanders.

The movement for emancipation which began about 1830 resulted in the foundation of a society for promoting the adoption of manual occupations by Jews (1836). Three years later the government took steps toward improving the condition of the Jews by giving them a constitution. An "Oberrath" was organized consisting of two government officials, the "Landrabbiner," and five representatives of the communities. The "Landrabbiner," who was required to have academic training, was to raise the intellectual standard of the congregation and introduce certain reforms. The first to hold this office was Samuel Holdheim, elected in 1840. He resigned in 1847 to take charge of the Berlin Reform congregation. He organized parochial schools and instituted Reform services; his reforms, however, were all of a moderate character, although they aroused considerable opposition.

A far stronger opposition was experienced by Holdheim's successor, David Einhorn (1847–53), when he blessed in the synagogue a child whose father refused to permit its circumcision. In the ensuing controversy Franz Delitzsch, then professor at Rostock, participated, publishing in a Rostock daily a series of articles to which Einhorn replied in very heated terms.

With Einhorn's resignation the government decided to strengthen the Orthodox party by calling Baruch Lipschütz, who was to effect a restoration of historic Judaism. The rigidity of his views, however, caused the government to dismiss him in 1858, when he was succeeded by another exponent of strict Orthodoxy, Solomon Cohn, who in 1876 was succeeded by the present (1904) incumbent, G. F. Feilchenfeld.

The smaller principality of Mecklenburg-Strelitz had a rabbi in the middle of the eighteenth century—Marcus Levin Süsskind, who published a German sermon preached at the dedication of the synagogue in 1763. He was succeeded by R. Sanwil of Brandenburg; the present (1904) incumbent, Jacob Hamburger, has officiated since 1852. The rabbinical author Judah Löb lived in Altstrelitz; his treatise on resurrection was translated by Professor Tychsen under the title "Die Auferstehung der Todten aus dem Gesetze Mosis Bewiesen" (1766). Later, Judah Löb was rabbi of Birnbaum, and then of Stockholm.

The University of Rostock had a famous Orientalist in Tychsen, who taught first in Bützow (1760) and then in Rostock (from 1779). A. T. Hartman, the opponent of the emancipation of the Jews, also taught in Rostock (1811–38). Among the prominent Jews who are natives of Mecklenburg may be mentoned: I. Marcus, alternate deputy to the Frankfort Parliament in 1848; the lexicographer Daniel Sanders; and the journalist Emil Jonas, translator of Scandinavian poetry into German. D.

MEDALS: Soon after the revival of the art of engraving medals, about the middle of the fifteenth century, a few Jewish specimens were struck in Italy, although the number was very small on account of the general oppression of the Jews at that period. The number gradually increased during the eighteenth century, keeping pace with the improvement of Jewish conditions; and in the second half of the nineteenth century, when the Jews had been emancipated in nearly all civilized countries, medals were struck so frequently that one or more appeared nearly every year. The following list contains the principal Jewish medals known. Those issued in honor of comparatively unimportant private persons and numerous miscellaneous and cabalistic medals are not included. The symbol ° designates medals which are described in works mentioned in the bibliography and * those in the illustrations.

1503. Benjamin b. Elijah Beer: obverse, bust; reverse, inscription; 167 mm.
1552.*° Elias and Rica Delatas: bust on both sides; 49 mm.
1556.*° Gracia Nasi: engraved on one side only; bust; 66 mm.
1659. Baptism of the Jew Michael of Prague: oval; obverse, baptism (in the Jordan); reverse, inscription; 82 × 69 mm.
1670. Three hundredth anniversary of the alleged desecration of the host at Brussels: obverse, the Holy Sacrament; reverse, inscription: 39 mm.
1670. *Idem*: obverse, the Holy Sacrament; reverse, escutcheon; 32 mm.
1686. Participation of the Jews in the defense of Buda: obverse, smelting-furnace; reverse, inscription; 2 sizes, 41 and 47 mm. respectively.
1711.*° Conflagration in the ghetto of Frankfort: obverse, the fire; reverse, inscription; inscription about the edge; 44 mm.
1735.° Eliezer ben Samuel Shmelka: obverse, bust; reverse, inscription.
1738. Süss Oppenheimer's execution: obverse, bust; reverse, gallows; 38 mm.: "Schraub" medal; 42 mm.
1745.*° Edict of exile at Prague: obverse, audience; reverse, Solomon's Temple; 64 mm.
c. 1775.*° Moses Mendelssohn: obverse, bust; reverse, skull and butterfly; 43 mm.
c. 1775. *Idem*: one-sided cast medallion; bust, skull, etc.; 99 mm.
1781. Edict of Toleration by Emperor Joseph II.: obverse, bust; reverse, obelisk and genius; 45 mm.
1782.* *Idem*: obverse, bust; reverse, clericals of the three confessions; 43 mm.
1790.* Medal presented by the Hessian Jews to Landgrave Ludwig X.: obverse, man sacrificing; reverse, inscription; 37 mm.
1790.° Medal presented by the Hessian Jews to the Landgravine Caroline Henrietta: obverse. palm-tree; reverse, inscription; three variants, 34, 34, and 29 mm. respectively.
1791.* Wilhelmschule at Breslau: obverse, grafted trunk; reverse, inscription; two sizes, 18 and 11 mm. respectively.
1793.*° Daniel Itzig's seventieth birthday: obverse, bust; reverse, allegorical group; 52 mm.
1803.° Lippmann Meyer's seventy-third birthday: obverse, bust; reverse, inscription; 38 mm.
c. 1803.*° Marcus Herz: obverse, bust; reverse, Pallas; 41 mm.
1805.*° Emancipation of the Russian Jews: obverse, bust; reverse, man sacrificing; 46 mm.
1806.*° Napoleon and the Sanhedrin: obverse, bust; reverse, Napoleon and a Jew; 41 mm.
1808.*° Emancipation of the Westphalian Jews: obverse, thank-offering; reverse, two geniuses; 42 mm.
1810. Building of the synagogue at Bordeaux: inscriptions on both sides; 35 mm.
c. 1816. Gershom Mendes Seixas: obverse, bust and inscription.
1820. Four hundred and fiftieth anniversary of the alleged desecration of the host at Brussels: obverse, the Holy Sacrament; reverse, inscription; 32 mm.
1824. Laying of the corner-stone of the synagogue at Munich: obverse, bust; reverse, engraved inscription; 26 mm.
1826. Dedication of the same synagogue: obverse, the synagogue; reverse, inscription; 39 mm.
1827. Court commission of the Dutch Jews: obverse, altar and symbols: reverse, plain; 59 mm.
1828. Giuditta Pasta: one-sided medallion; head; 113 mm.
1829. *Idem*: obverse, head; reverse, inscription; two variants, 43 and 35 mm.
1830. *Idem*: obverse, homage; reverse, inscription; 47 mm.
1830. Ludwig Börne: one-sided medallion; head; 159 mm.
1836.* Gabriel Riesser: obverse, allegorical group; reverse, inscription; 59 mm.
1836. Death of N. M. von Rothschild: obverse, head; reverse, inscription; 62 mm.
1836. Court commission of the Dutch Jews: observe, symbolic picture; reverse, plain; 47 mm.
1837. Elias Henschel and the Jews of Breslau: obverse, head: reverse, inscription; 39 mm.
1840. Montefiore and Crémieux at Damascus: obverse, audience; reverse, inscription: 43 mm.
1841. The king in the synagogue at Mastricht: obverse, the synagogue; reverse, inscription; 41 mm.
1841. Jewish Home for the Aged at The Hague: obverse, the building; reverse, inscription; 40 mm.
1841.* Jewish hospital at Hamburg (Solomon Heine): obverse. head; reverse, the building; two sizes, 45 and 12 mm. respectively.
1841.* Jewish loan institute at Hamburg: obverse, beehive; reverse, inscription; 45 mm.
1841.* Montefiore and the Jews of Hamburg: obverse, escutcheon; reverse, inscription; 42 mm.
1842. R. Solomon Herschell: obverse, bust; reverse, Torah scroll and inscription; 62 mm.
1843. Hebrew school at Birmingham; obverse, the building; reverse, inscription; 45 mm.
1843. First Jewish confirmation at Warsaw: obverse, seven-branched candlestick and tables of the Law; reverse, inscription; 42 mm.
1844. S. M. von Rothschild's seventieth birthday: obverse, head; reverse, escutcheon; 59 mm.
1846.* Isaac Bernays' jubilee: inscriptions on both sides: 51 mm.
1846. Rachel (Felix): obverse, head; reverse, inscription; 53 mm.
1847. Medal dedicated to Giacomo Meyerbeer by the Concordia Society: obverse, bust; reverse, inscription; 46 mm.
1848. Destruction of Rothschild's castle, Surenne: inscriptions on both sides; 69 mm.
1848. Medal given by the Italian Jews to B. d'Azeglio: obverse, bust; reverse, inscription; 51 mm.
1848. Daniel Manin: obverse, bust; reverse, homage of the people; 57 mm.
1850. Society for the Emancipation of the Oriental Christians and Jews: obverse, group; reverse, inscription; 62 mm.
1850. General de Meza: obverse, bust; reverse, trophy; 45 mm.
1850. August Neander: obverse, bust; reverse, inscription; 45 mm.
1851. Dr. Gruby: obverse, snake of Æsculapius; reverse, inscription; 50 mm.
1852. Orthodox synagogue at Frankfort: obverse, the synagogue; reverse, inscription; 39 mm.
1853. Engraver Samuel Jesi: obverse, head; reverse, inscription; 68 mm.
1854. Giacomo Meyerbeer: obverse, head; reverse, lyre; 41 mm.
1855. Medal presented by the Italian Jews to Albert Cohn: obverse, temple vessels; reverse, inscription; 55 mm.
1855. Similar medal presented to Ludwig Philippson.
1856. Laemmelschule at Jerusalem: obverse, palm-tree; reverse, inscription; 33 mm.
1858. Death of Rachel (Felix): obverse, head; reverse, inscription; 53 mm.; token, 23 mm.
1858 (?). M. G. Saphir: one-sided medal; bust; 47 mm.
1859. R. Henri Loeb's jubilee: obverse, bust; reverse, inscription; 59 mm.
1860. Right conferred upon the Austrian Jews to possess real estate: obverse, allegorical picture; reverse, inscription; 73 mm.
(c. 1860). Société J. R. Pereire, prize medal: obverse, Pereire teaching; reverse, inscription: 54 mm.
1861 (?). Historical painter B. Ullmann: one-sided medallion; bust; 123 mm.
1861. Synagogue at Cologne: obverse, the synagogue; reverse, interior view; 59 mm.

COMMEMORATIVE MEDALS.

7. Emancipation of Westphalian Jews, 1808. 8. Emancipation of Russian Jews by Alexander I., 1805. 9. Napoleon and Sanhedrin, 1806. 10. Marcus Herz, 1805. 11. Wilhelmschule at Breslau, 1791. 12. Daniel Itzig's Seventieth Birthday, 1793. 13. Moses Mendelssohn's "Phaedon," 1775.

(In the collection of Albert Wolf, Dresden.)

1861. Numismatist Oberndoerfer's seventieth birthday: obverse, bust; reverse, inscription; 40 mm.

1863. Preacher Mannheimer's seventieth birthday: obverse, bust; reverse, inscription; 50 mm.

1864. Moses and Judith Montefiore: obverse, busts of both; reverse, inscriptions; 68 mm.

1865. Jewish orphan asylum for boys at Amsterdam: obverse, allegorical group; reverse, building; 68 mm.

1867. Dr. M. H. Romberg: obverse, head; reverse, inscription; 62 mm.

1867. Joseph Wertheimer retiring from office: obverse, bust; reverse, inscription; 45 mm.

1867. Cantor Pereles' jubilee of office; inscriptions on both sides; 32 mm.

1868. Deputy Dr. Max Hirsch: octagon; obverse, bust; reverse, two hands; 25 mm.

1868. The astronomer H. Goldschmidt: obverse, three heads; reverse, allegorical figure; 69 mm.

1868.* Oppenheimer foundation at Hamburg: obverse, bust; reverse, building; 44 mm.

1870. Crémieux at Tours: obverse, head (on another an escutcheon); reverse, inscription; 46 mm.

1870. Franchetti's heroic death: two variants: (1) obverse, escutcheon; reverse, inscription; 33 mm.; (2) obverse, head; reverse, inscription; 24 mm.

1875. Synagogue at Pribram (Przibram): obverse, the synagogue; reverse, shield of David; 33 mm.

1875. Jubilee of the Portuguese synagogue at Amsterdam: obverse, escutcheon (pelican); reverse, inscription; 36 mm.

1876. Two hundredth anniversary of the Ḥebra Ḳaddisha, Gailingen: inscriptions on both sides; 34 mm.

1876. Death of the painter S. L. Verveer: obverse, bust; reverse, easel; 60 mm.

1877. Portuguese synagogue at Paris: obverse, tables of the Law; reverse, inscription; 28 mm.

1877. Salomon H. von Mosenthal's death: obverse, head; reverse, genius; 59 mm.

1879. Minister of Justice Godefroi: obverse, bust; reverse, inscription; 69 mm.

1879. Joseph Pizza's death: obverse, bust; reverse, masonic emblems; 42 mm.

1880. Medal presented by the officials of the Jewish community of Vienna to Ludwig August Frankl: obverse, head; reverse, escutcheon; 39 mm.

1880. R. E. A. Astruc's jubilee of office: obverse, bust; reverse, inscription; 55 mm.

1881. N. Montefiore: prize medal for military surgeons; obverse, field-hospital; reverse, escutcheon; 60 mm.

1881. Adolphe Crémieux's death: obverse, bust; reverse, inscription; 68 mm.

1881. Anti-Semitic movement at Berlin: four variants: (1) obverse, escutcheon; reverse, inscription; (2) obverse, caricature; reverse, sticks and hat; (3 and 4) inscriptions on both sides; 24 mm.

1881. Jubilee of the Edict of Toleration: obverse, bust; reverse, inscription; 30 mm.

1881. Adolf Sonnenthal's jubilee: obverse, bust; reverse, theater; 60 mm.; also in form of a thaler.

1881. Jubilee of the theater director Ch. Maurice: obverse, bust; reverse, inscription.

1882. Preacher Jellinek's jubilee of office: inscriptions on both sides; 44 mm.

1882. New synagogue at Frankfort: obverse, the synagogue; reverse, inscription; 36 mm.

1883. Prix Osiris: obverse, fencing-weapons; reverse, wreath; 34 mm.

1884. Architect Max Fleischer: obverse, bust; reverse, synagogue; 104 mm.

1884. Montefiore's one hundredth birthday; struck three times (London, Corfu, and Manchester): obverse, bust; reverse, inscription; 42, 41, and ? mm.

1884. Ignaz Kuranda: one-sided medallion; bust; 145 mm.

1886. Medal presented by the Jewish Aid Society at Luxemburg to Engenie Bloch: obverse, allegorical group; reverse, inscription; 50 mm.

1887. New synagogue at Munich: obverse, the synagogue; reverse, inscription; 40 mm.

1888. Founding of a Frankfort lodge: obverse, shield of David; reverse, tables of the Law; 25 mm.

1888. R. Abraham Alexander Wolf's sixtieth anniversary of office: obverse, bust; reverse, inscription; 38 mm.

1888. Numismatist Donebauer's death: obverse, bust; reverse, inscription; 58 mm.

1889. Gerson von Bleichröder: obverse, bust; reverse, escutcheon; 25 mm.

1889. Court choirmaster H. Levi: one-sided medallion; bust; 115 mm.

1889. Editors of the "Neue Freie Presse" (Bacher, Benedikt, and Werthner): obverse, three busts; reverse, newspaper; 85 mm.

1890. Liquidation of the Deutsch-Israelitische Gemeinde of Hamburg: obverse, Torah cabinet; reverse, allegorical group; 42 mm.

1890. Ludwig Barnay's jubilee: obverse, bust; reverse, inscription; 45 mm.

1890. M. R. von Mises' ninetieth birthday: obverse, bust; reverse, escutcheon; 45 mm.

1891. M. R. von Mises' death: obverse, bust; reverse, escutcheon; 40 mm.

1891. M. von Wilmersdoerffer's jubilee: obverse, bust; reverse, escutcheon; 49 mm.

1891. Prof. E. H. Kisch's fiftieth birthday: obverse, bust; reverse, Hygeia; 55 mm.

1892. Numismatist Adolph Meyers-Gedanensis: oval; obverse, bust; reverse, buildings; 71 × 57 mm.

1892. Prof. Th. Gomperz's sixtieth birthday: obverse, bust; reverse, allegorical group; 46 mm.

1893. Jubilee of the Nächstenliebe Society, Vienna: obverse, hands; reverse, inscription; 37 mm.

1893. State councilor T. M. C. Asser: obverse, bust; reverse, inscription; 65 mm.

1893. Preacher Adolf Jellinek's death: obverse, bust; reverse, inscription; 55 mm.

1894. Karl Marx: one-sided medallion; bust; 189 mm.

1894. Dr. Adolf Fischhof's death: obverse, bust; reverse, allegorical group; 55 mm.

1895. Jubilee of the factory of Ludwig Löwe: obverse, bust; reverse, allegorical figure; 56 mm.

1896. R. Isaac Elhanan Spektor: obverse, bust; reverse, chapel; 29 mm.

1896. Synagogue at Galatz: obverse, the synagogue; reverse, masonic emblems; 40 mm.

1896. Prof. Moritz Benedikt's jubilee: square plaque; bust; 60 × 44 mm.

1896. Charlotte Furtado-Heine: horticultural prize medal, founded by a will.

1897. Michael Fischhof, founder of "Austria": obverse, bust; reverse, view of city; 50 mm.

1897. Prof. Joseph Gruber's seventieth birthday; plaque; bust; 60 × 45 mm.

1897. Zionist leader Architect O. Marmorek: plaque; bust; 118 mm.

1898. Second Zionist Congress: obverse, allegorical group; reverse, inscription; 63 mm.

1899. Israelitische Religionsgesellschaft to Wilhelm Carl and Mathilde von Rothschild: obverse, interior view of synagogue; reverse, inscription; 40 mm.

1899. Reunion of the Frankfort Israelitische Realschule: obverse, view of city; reverse, inscription; 39 mm.

1899. Choir prize of the Religionsgesellschaft of Frankfort: obverse, interior view of synagogue; reverse, musical instruments; 39 mm.

1899. Prof. James Joseph Sylvester, prize medal for mathematics: obverse, bust; reverse, inscription; 58 mm.

1900. Stepney Jewish School: obverse, allegorical figure; reverse, inscription.

1900. Dr. K. Lippe's seventieth birthday: obverse, bust; reverse, flaming shield of David; 30 mm.

1900. Dr. Ludwig von Guttmann's death: obverse, bust; reverse, mine-inspector; 35 × 31 mm.

1900. Composer Carl Goldmark's seventieth birthday: obverse, bust; reverse, oak and laurel; 55 mm.

1900. *Idem*: plaque; bust; 200 × 155 mm.

1900. Fiftieth anniversary of the Stern Conservatorium: obverse, bust; reverse, allegorical figure; 42 mm.

1901. Salo Cohen, director of the Jewish community of Vienna: plaque; bust; 168 × 115 mm.

1901. Enlargement of the synagogue at Frankfort: obverse, old and new synagogues; reverse, inscription; 39 mm.

1902. Composer Ignaz Brüll: plaque; head; 200 × 135 mm.

1902. Virtuoso Alfred Grünfeld: plaque; head; 70 × 50 mm.

1903. Synagogue at Szegedin: obverse and reverse, building; 29 mm.

1903. Musician Siegfried Ochs: obverse, bust; reversé, lyre; 50 mm.

1904. Centenary of the Frankfort Philanthropin: obverse, sower; reverse, beehive; 50 mm.

1904. M. von Wilmersdörffer's death: plaque; bust; 100 mm.
1904. Artist Joseph Israels' eightieth birthday.

A. W.

A.

MEDEBA (modern name **Madeba**): A town east of the Dead Sea and a few miles south of Heshbon. It was wrested from the Moabites by Sihon, King of the Amorites (Num. xxi. 30); and after the conquest of Palestine it was assigned, together with the plain in which it lay, to the tribe of Reuben (Josh. xiii. 9, 16). During the war of the Ammonites against David, the Syrian allies of the former encamped at Medeba, which seems at that time to have been under Ammonite control (I Chron. xix. 6–15). Later it was seized by the Moabites again; for, according to the MOABITE STONE (line 8), "Omri annexed [all the land] of Medeba, and Israel occupied it, his days and half his son's days, forty years." This statement is confirmed by Isa. xv. 2, which mentions Medeba as a city of Moab, under whose control it remained until the Moabites were driven south of the Arnon by Jeroboam II.

During the Maccabean period John, brother of Jonathan and Simon Maccabeus, was murdered by a robber clan, led by Jambri or Ambri, who lived in Medeba, and who in revenge were ambushed and slain while taking part in a marriage procession near the town (I Macc. ix. 35–42; Josephus, "Ant." xiii. 1, §§ 2, 4). It was later taken by John Hyrcanus after a stubborn siege (*ib.* xiii. 9, § 1), and finally was captured by Alexander Jannæus, although Hyrcanus II. promised to restore it to Aretas, King of Arabia, (*ib.* xiii. 15, § 4; xiv. 1, § 4).

J. L. H. G.

Medeba, after lying desolate for some centuries, was reoccupied by a colony of Greek Christians about 1880; to this colony a smaller one of Latin Christians has since been added. In erecting the necessary buildings for this new occupation many beautiful mosaics which belonged to churches and monasteries of the fourth, fifth, and sixth centuries have been uncovered. Many of these may still be seen in hovels, stables, and farmyards. The most noteworthy of these is the mosaic map of Palestine, some remains of which may still be seen in the floor of the Greek church at Medeba. The discovery of this map was announced in Dec., 1896, but there is reason to believe that it had been known to a small circle of ecclesiastics for some time before this, and that when it was first discovered it was in a much better state of preservation than at present. Toward the end of 1896 efforts were made to make accurate charts of the remains of it and to give to the world some knowledge of this remarkable production. The publications in reference to it will be found in the bibliography at the end of this article.

The artistic and technical difficulties which the makers of the map had to overcome were very great, but they surmounted them with surprising success. Exact proportions and perspective were of course not attained, but the general relations of the sacred sites were graphically pictured; much valuable information as to the condition of the land at the time at which the mosaic was made (fifth or sixth century C. E.) is given, and the traditions then current concerning the location of Biblical sites found expression. Thus the statements of Eusebius and Jerome in their onomastica are illustrated and in some cases supplemented.

Jerusalem Map.

Jerusalem is pictured on the map as being bisected by a long colonnaded street. The wall of Jerusalem did not enclose the southern end of the two hills on which the city stands. After enclosing the Church of Mt. Zion on the site of the present Cœnaculum it turned sharply to the northeast. Traces of another wall, approximately on the line of the present one, are also visible; this latter wall is, no doubt, that built by Hadrian, while the extension which includes the Church of Mt. Zion pictures a period before the time of Eudoxia, who rebuilt the wall on the line of that of Nehemiah. This not only throws light on the topography of Jerusalem for that period, but helps to date the map. Prominent buildings like the Church of the Holy Sepulcher are pictured on the map with sufficient clearness to afford considerable information concerning their architecture at that time.

The makers of the mosaic were especially interested in Christian themes. They accordingly pictured the Sea of Galilee as bearing a ship containing the disciples, and Peter endeavoring to walk on the water (Matt. xiv. 25–31).

One easily recognizes on the map the names of many sites which are well known, such as Baitin (Bethel), Jifna, Jibia, Beer-sheba. Sites in southern Palestine and on the Philistine plain are given with considerable fulness. Gerar is shown close to Beer-sheba and to the west of it—a location which conflicts with the usual identification of Gerar with Umm Jarar, five miles to the south of Gaza. The Philistine Gath is placed near the site of the modern Ramleh.

On the south the map extends far enough to show Lower Egypt. Witnesses quoted as reliable by Father Cléopas, the librarian of the Convent of the Holy Sepulcher, said that they saw the mosaic some years before it was so badly mutilated and declared that they recognized Ephesus and Smyrna thereon. It would seem, therefore, that when intact the map included Asia Minor as well as Egypt.

Tradition in the fourth century was not always more reliable than it is now, a fact to which this map sometimes bears witness. For example, the thrashing-floor of Atad, which Gen. l. 10 places east of the Jordan, is on this map identified with Beth-hogla ("thrashing-floor of Atad, which is now Beth-hogla"). Beth-hogla, however, is the modern 'Ain (Ḳasr) Ḥajlah in the plain southeast of Jericho, west of the Jordan, where a Greek monastery is situated.

MEDES. See Media.

In Bible.

MEDIA (Latin, *Media*; Greek, Μηδία; Old Persian, *Māda*; Hebr. מדי): Ancient name of a country which is located south and west of the Caspian Sea, and is associated with events in Jewish history. The confines of Media anciently embraced territory corresponding roughly to the present Azerbaijan, the southern borders of the Caspian, the province of 'Iraḳ-'Ajami, and the districts of modern Persia which adjoin the mountains of Kurdistan and Luristan. In the Hebrew Scriptures Media and the Medes are mentioned more than a dozen times. The antiquity of the name is believed to be shown by its having been borne by Noah's grandson Madai, son of Japheth (Gen. x. 3 [A. V. 2]), who is commonly regarded as the progenitor of the Median race, Mount Ararat being within the ancient Median borders. From the Bible, furthermore, it is known that Israelites were placed in cities of the Medes by Shalmaneser, King of Assyria, after his conquest of Samaria (II Kings xvii. 6, xviii. 11); and Media is referred to under the form "Amada" or "Madai" in the records of this king and of Tiglath-pileser. Allusions to Media in connection with Persia are not rare in certain books of the Scriptures; and the laws of the Medes and Persians became a synonym for all that was fixed and unalterable (Esth. i. 3, 14, 18, 19; x. 2; Dan. v. 28, vi. 8, viii. 20). The part taken by Media and Elam, meaning Persia, in the overthrow of Babylon forms a portion of the prophecy of the elder Isaiah (Isa. xiii. 17, xxi. 2; comp. also Jer. xxv. 25). At Ecbatana, in the province of the Medes, moreover, was found the famous edict of Cyrus granting a decree for the building of the Temple at Jerusalem (Ezra vi. 2; I Esdras vi. 23). The same capital is prominent likewise in the Book of Judith (Judith i. 1 *et seq.*); and the ancient Median city Rhages figures elsewhere in this book and strikingly in the narrative of Tobit (Judith i. 5, 15; Tobit i. 14, v. 5, vi. 10). On the identification of "Darius the Median" and on Daniel's position under his rule (Dan. v. 28, vi. 8, viii. 20, ix. 1, xi. 1), see Daniel; Darius.

Ctesias' Account.

With regard to Media as a factor in the world's history, the antiquity of the people as an Iranian nation is conceded, even though the existence of a so-called Median empire in very remote times may be open to some doubt. According to the fragments of Berosus of Babylon, however, the Median royal line extended back almost two thousand years before the time of Alexander the Great; and the historian Ctesias pretends to give a list of kings and their reigns running back nearly to 1000 B.C. For historic purposes, however, the story of Media begins with Dejoces (Δηιόκης), whom Herodotus ("Hist." i. 16 *et seq.*) describes as the founder of the empire. This monarch is mentioned as "Dayaukku" in the inscriptions of Sargon; and he ruled over Media from 709 to 656 B.C. or, more exactly, from 700 to 647. He was succeeded by Phraortes (Old Persian, "Fravartish"), who extended the boundaries and sway of Media and ruled from 647 to 625. Phraortes in turn was followed by Cyaxares (Old Persian, "[H]uvaxshatara"; Babylonian, "Uvakuishtar"), whose reign (625-585 B.C.) formed the culmination of the Median ascendency. It was under this ruler, in alliance with Nabopalasar, King of Babylon, that the destruction of Nineveh and the overthrow of the Assyrian empire took place (*c.* 607-604 B.C.). His successor was Astyages (Bab. "Ishtuvegu"), whom Oriental tradition erroneously identifies with the legendary Azh-Dahak of Babylon. With the rule of Astyages (585-550 B.C.) came the decline and final overthrow of Media by Persia under Cyrus. The Median supremacy was lost sight of in the greater glory of Persia. Thenceforth the two nations came to be regarded as one, their names being often united and used interchangeably, although divisions were recognized. After the death of Alexander the Great, for example, Media Minor, which corresponds roughly to Azerbaijan, was distinguished from Media Major, which became a part of the Syrian empire; and, again, Media Major was later comprised in the Parthian domain and was finally included in the great empire of the Sassanians.

From the religious standpoint also Media is important because Zoroaster is believed to have arisen in that country; and the similarities between Zoroastrianism and Judaism are many and striking. See Avesta; Persia.

G. A. V. W. J.

MEDIATOR (Greek, Μεσίτης): An agent that goes between; one who interposes between parties at variance; in particular, an intercessor between God and man. Judaism recognizes in principle no mediatorship between God and man. "The Lord alone did lead him [Israel], and there was no strange god with him" (Deut. xxxii. 12). "See now that I, even I, am he, and there is no god with me: I kill, and I make alive; I wound, and I heal" (*ib.* 39). "In his love and in his pity he redeems them; and he bare them and carried them" (Isa. lxiii. 9). "What nation is there so great, who hath God so nigh unto them, as the Lord our God is in all things that we call upon him for?" (Deut. iv. 7). When told by God that Israel should henceforth be led by an angel, Moses replied: "If thy presence go not with me, carry us not up hence" (Ex. xxxiii. 15). Still for the people the distance between the Deity and frail humanity was too great to be overcome by the spiritual effort of the multitude or of the common individual. Hence the prophet, believed to be in constant communion with God, is viewed in Scripture as the fit person to intercede on behalf of men in trouble. Thus Abraham is empowered by God to pray for pardon and restored health for

Mosaic Map of Palestine, Probably of the Fifth Century, Found at Medeba. (Plan of Jerusalem, Enlarged, in Upper Right-Hand Corner.)

Abimelech (Gen. xx. 7, 17; comp. *ib.* xviii. 23-33). Moses intercedes on behalf of Pharaoh and the Egyptians (Ex. viii. 5-8, 24-26; ix. 28-33; x. 17-18) and also on behalf of his own people (*ib.* xvii. 11, xxxii. 11; Deut. ix. 18); likewise Samuel (I Sam. vii. 5; xii. 19, 23; comp. Ps. xcix. 6), Jeremiah (Jer. xv. 1), and Job (Job xlii. 7; comp. Ezek. xiv. 14-20). Noah, Daniel, and Job save their generations by their righteousness.

In Apocryphal and Hellenistic Literature.

In the Apocryphal and Hellenistic literature the idea of mediatorship is more pronounced. Jeremiah is frequently mentioned as the one who "prayeth much for the people" (II Macc. xv. 14); "whose works are to this city [Jerusalem] as a firm pillar and whose prayers as a strong wall" (Apoc. Baruch, ii. 2; "Rest of the Words of Baruch," i. 2, ii. 3; comp. Jer. vi. 27; Pesiḳ. 115b). According to Tobit (iii. 26), angels bring the prayers of men before God's throne. Enoch is asked by the fallen angels to intercede for them (Enoch, xiii. 4-7). Abraham is described as interceding for the sinners in a state of suspense (Testament of Abraham, xiv.; comp. Luke xvi. 24). Moses was "the advocate of Israel who bent his knees day and night in prayer to make intercession for his people" (Assumptio Mosis, xi. 17, xii. 6). The Patriarchs in heaven were believed to be intercessors for the living (Philo, "De Execrationibus," § 9; Lam. R., Introduction, 25; comp. Josephus, "Ant." i. 13, § 3); for all the righteous souls (Sibyllines, ii. 331). Remarkable is the warning of Enoch to his children: "Say not our father stands before God and prays for us to be released from sin; for there is no person there to help any man that hath sinned" (Slavonic Enoch, liii. 1; comp. Isa. lxiii. 16).

In Rabbinical Literature.

In principle the Rabbis were against prayers to angels for intercession. Says R. Judan: "A man in trouble who has a great man for a patron stands at the door awaiting the answer the servants will bring, whether or not he will be permitted to approach him for aid. He who needs God's help ought not to ask the assistance of either Michael or Gabriel or any other angel, but should turn immediately to God; for whosoever shall call on the name of God shall be delivered" (Yer. Ber. ix. 13a, after Joel iii. 5 [A. V. ii. 32]). "However exalted the Most High is, let but a man enter His house and whisper a prayer and the Almighty listens as a friend to whom a secret is confided" (Yer. Ber. *l.c.*).

Nevertheless, to judge from the early Christian writers (Col. ii. 19; Origen, "Contra Celsum," i. 26, v. 6; Clement, "Stromata," vi. 5, 41; Aristides, "Apologue," xiv.), angels were often invoked by certain (Gnostic?) classes of Jews. The passage in Job xxxiii. 23 (comp. v. 1) also led the Rabbis to assume that angels plead for men at the throne of God (Yer. Ḳid. i. 61d). Shab. 12b reads: "He who prays in the Aramaic language will lack the aid of angels, whose language is Hebrew," while from Tosef., Ḥul. ii. 18 (comp. Mek., Yitro, Ex. xx. 4) it may be learned that angel-worship was not unknown in certain Jewish circles. And this led eventually, notwithstanding the opposition of many rabbinical authorities (see the passages in Zunz, "G. V." pp. 147-149), to the introduction even into the liturgy of prayers addressed to the angels and seeking their mediation. The Ineffable Name, the divine attribute of mercy, the thirteen attributes of God (see Middot; Shelosh 'Esreh), the holy throne, the gates of heaven, and the Torah were also appealed to in the liturgy (see Zunz, *l.c.*). A great sinner in the Talmud invokes the mountains and the stars to pray for him ('Ab. Zarah 17a).

Especially was Michael invoked as intercessor for the Jewish people (Dan. xii. 1; see Lücken, "Michael," 1898, pp. 11-25). Meṭaṭron (Mithra) also is frequently mentioned in Gnostic circles together with Michael as mediator of the Revelation (Sanh. 38b, with reference to Ex. xxiii. 21; Gen. R. v.; comp. Tan., Mishpaṭim, ed. Buber, p. 12). Righteous souls also appear as intercessors (Tanna debe Eliyahu R. iii.).

The Rabbis, however, insisted upon not allowing God's absolute sovereignty and power to be infringed through the interference of angels. "The angels were created on the second day so that it should not be believed that they had a share in the creation of the world" (Gen. R. i., iii.). The Lord Himself, and no angel, or seraph, or other messenger of His, smote the Egyptians at the time of Israel's redemption from Egypt (Passover Haggadah; Mek., Bo, 7); though in the destruction of Sodom, Gabriel assisted (Gen. R. li. 3).

Moses the Mediator of the Law.

That the Law was given to the people or to Moses through angels is a belief ascribed to the Jews by Josephus ("Ant." xv. 15, § 3), by Paul (Gal. iii. 19; Heb. ii. 2), and by Stephen (Acts vii. 38, 53; comp. Apoc. Mosis, i.; Book of Jubilees, i. 27; Hermas, "Similitude," viii. 3, 3, where Michael is mentioned as mediator of the Book of the Law). Rabbinical teaching, on the other hand, consistently opposed the idea of such a mediatorship. "When the Lord spoke with Moses the angels who stood between them did not hear a word" (Num. R. xiv., end; comp. Sifre, Num. 58). Moses alone is viewed in rabbinical literature as the mediator ("sirsur" = "go-between") between God and Israel (Pesiḳ. R. vi.; Ex. R. iii. 6, vi. 3; Num. R. xi. 5). In Hellenistic literature also Moses is called "mediator," Μεσίτης (Philo, "De Vita Moysis," iii. 19; Assumptio Mosis, i. 14, iii. 12; Gal. iii. 19). The Samaritans call Moses the "Mesites" (see Baneth, "Marqah," 1888, p. 48), and he is actually invoked as intercessor by them (see "J. Q. R." viii. 604). At the same time the Midrash (Leḳaḥ Ṭob on Deut. xxxiii. 4) says: "No one knows the place where Moses is buried, so that no one should ever sacrifice at his grave, or worship him, or bring incense-offerings to him." "Wherefore criest thou to me?" (Ex. xiv. 15) is thus explained by the Rabbis: "There is no need of asking God concerning His children, as He Himself is in distress when His children suffer." "My children have already prayed to Me, and I have heard their prayer," said God to Moses (Ex. R. xxi.; Cant. R. i. 2; Mek., Beshallaḥ, 3).

Philo, however, speaks of "The Word" ("Logos") as the mediator between two worlds. "The Father who created the universe has given to His archangelic and most ancient Word a preeminent gift to stand on the confines of both; while separating the created things from the Creator he pleads before the immortal God on behalf of the mortal race which sins continually, and is the ambassador sent by the Ruler to the subject race. He exults in this office and boasts of it, saying: 'I stood in the midst between the Lord and you'" (Num. xvi. 48). From this it was but one step to claim for Jesus the same cosmic mediatorship, as Paul and his followers did while presenting him as the mediator of the new covenant and the restorer of the relations between man and God which had been broken through sin (I Tim. ii. 5; Heb. viii. 6, ix. 15, xii. 24). Against this teaching R. Akiba declares: "Happy are ye Israelites! Before whom do ye cleanse yourselves, and who cleanses you from sin? None but your Father in Heaven; for Scripture says: 'I shall sprinkle upon you clean waters, and ye shall be clean' (Ezek. xxxvi. 25), and 'Israel's hope ["miḳweh"] is the Lord' (Jer. xvii. 13). Like the miḳweh, 'the Fountain of Water,' so is the Lord the source of purification for all impurities" (Yoma viii. 9).

Philo's Logos.

Regarding the function of the priests, Judaism is also very outspoken in denying to any human being the power of conferring any blessing upon the people. The words "And they shall put my name upon the children of Israel, and I will bless them" (Num. vi. 27) are thus commented upon (Sifre, Num. 43; Num. R. xi., end): "Israel is not to believe that its blessing depends upon the priests, nor should the priests claim the power of blessing for themselves; but God alone is He who confers the blessing."

Maimonides in the fifth article of his creed lays especial stress upon prayer being offered exclusively to God and to no other being; and in his commentary (Sanh. xi.) he points out particularly that the angels should not be appealed to as mediators or intercessors between God and man. In the same manner Naḥmanides declares it wrong to pray to angels as intercessors (see his discourse "Torat Adonai," ed. Jellinek, pp. 30-31). Lipman of Mühlhausen in his "Niẓẓaḥon," pp. 12, 132, writes: "Our rabbis have rejected every kind of mediatorship, referring to the Scripture: 'Him alone shalt thou worship, and to him shalt thou cleave' (Deut. x. 20). Every appeal to intercessors leads to idolatry and to impurity." The remark of Abraham ibn Ezra (commentary on the Pentateuch, Introduction), "The angel that mediates between man and God is reason," is characteristic of the spirit of Judaism.

K.

MEDICINE.—In Bible and Talmud: The ancient Hebrew regarded health and disease as emanating from the same divine source. "I kill, and I make alive; I wound, and I heal" (Deut. xxxii. 39), said the Lord through His servant Moses; and therefore they who minister to the health of their fellows are regarded as the messengers of God, as the executors of His will. Although Yhwh is the physician of Israel (Ex. xv. 26), yet the practise of medicine is sanctioned by the Law: "If men strive together, and one smite another . . . and . . . he keepeth his bed . . . he shall pay for the loss of his time, and shall cause him to be thoroughly healed" (*ib.* xxi. 18-19). Joseph employed house physicians (Gen. l. 2); and Isaiah mentions especially a surgeon or wound-dresser (Isa. iii. 7). Among the Jews, unlike other primitive nations, the priests did not monopolize the art and science of healing. Moses assigned to them only the task of police supervision in cases of contagious diseases. The Bible does not mention a single instance of a priest having performed the functions of a physician. The Prophets, however, practised occasionally the art of healing. Elijah brought to life a child apparently dead (I Kings xvii. 17-22); and his disciple Elisha performed a similar miraculous cure (II Kings iv. 18-20, 34-35). A man of God restored the paralyzed hand of King Jeroboam (I Kings xiii. 4-6). Isaiah cured King Hezekiah of an inflammation by applying a plaster made of figs (II Kings xx. 7).

At a later period physicians were held in high esteem by the people, as may be gathered from Ben Sira: "Honor a physician with the honor due unto him for the uses which ye may have of him, for the Lord hath created him. . . . The Lord has created medicines out of the earth; and he that is wise will not abhor them. . . . And He has given men skill that He might be honored in His marvelous works. . . . My son, in thy sickness be not negligent; . . . give place to the physician; . . . let him not go from thee, for thou hast need of him" (Ecclus. [Sirach] xxxviii. 1-12). Afterward the status of the medical profession became still more exalted. The court of justice ("bet din") employed in certain cases the services of a physician ("rofe"), whose expert testimony was decisive in criminal matters. In cases of assault, for instance, it was his duty to give his opinion ("umdena") as to the danger to the life of the assaulted (Sanh. 78a; Giṭ. 12b). Corporal punishment was inflicted under the supervision of a physician (Mak. 22b). No physician was permitted to practise without a license from the local judicial council (B. B. 21a; Mak. 20b). Every city was required to have at least one physician; and to live in a city that had none was considered hazardous (Sanh. 17b).

Sources of Medical Knowledge.

The medical knowledge of the Talmudists was based upon tradition, the dissection of human bodies, observation of diseases, and experiments upon animals ("'issuḳ be-debarim"; Ḥul. 57b). When making their rounds physicians used to take their apprentices with them (Deut. R. x.). In the majority of cases the art of healing was transmitted from father to son (Yer. R. H. i. 3, 57b). The numerous medical aphorisms preserved in the Talmudim and Midrashim, and the fact that physicians took part in the discussion of many important religious questions by the Rabbis, indicate that the latter were not unacquainted with the science of medicine (Naz. 52a; Nid. 22b). That the demand upon the skill of physicians was considerable may be adduced from the statute law prohibiting the part owner of a house from renting his part to a physician on account of the noise and disturbance caused by the visiting patients (B. B. 21a). Physicians received for their services comparatively large fees. A current saying was: "A physician who takes nothing is worth nothing" (B. Ḳ. 85a).

What was the sum total of medical knowledge possessed by the ancient Hebrews can not be stated definitely, for the reason that neither the Bible nor the Talmud contains medical treatises as such. The Mishnah mentions a medical book, "Sefer Refu'ot," which was attributed to King Solomon and expurgated by King Hezekiah (Pes. iv. 9), and the Talmud cites a treatise on pharmacology, "Megillat Sammanin" (Yoma 38a); but neither of these has been preserved. Medicine was an integral part of the religion of the Jews; and medical subjects are treated of or alluded to only in so far as they concern or elucidate some point of law.

Anatomy.

There are in the Bible but few direct references to the internal organs. Biblical poetry, however, abounds with expressions in which the names of such organs are used metaphorically, *e.g.*: "His archers compass me round about, he cleaveth my reins asunder, and doth not spare; he poureth out my gall upon the ground" (Job xvi. 13); "His vessels are full of healthy fluid, and the marrow of his bones is well moistened" (*ib.* xxi. 24, Hebr.); "I am weary; . . . my throat is dried" (Ps. lxix.). See ANATOMY.

The laws concerning clean ("ṭohorah") and unclean ("ṭum'ah") afford means for ascertaining in part the familiarity of the ancient Hebrews with certain branches of anatomy. According to the Mosaic law (Num. xix. 14), any one who comes in contact with a dead body or any part thereof, or who remains in a tent wherein a corpse is found, is considered infected ("unclean") for seven days. The Mishnah teaches that this tent-infection ("ṭum'at ohel") takes place in the presence either of a complete corpse, or of an anatomical unit or member ("eber"), *i.e.*, a bone covered with its soft parts. A bone stripped of its soft parts does not infect. Should, however, a collection of such bones, by either their bulk or number, represent more than half of the skeleton ("sheled"), their infecting power is equal to that of a complete corpse (Oh. i. *et seq.*). This law made it imperative that the number of bones in the human body should be ascertained. Oh. i.-viii. gives the number as 248: and the following bones are recognized and named: hand ("pissat ha-yad") 30; forearm ("ḳaneh") 2; elbow-joint ("marpeḳ") 2; arm 1; shoulder-joint ("kataf"), including shoulder-blade ("kanaf"), 4; foot ("pissat ha-regel") 30; ankle-joint ("ḳarsol") 10; leg 2; knee-joint ("'arḳub"), including knee-cap ("piḳah") 5; thigh 1; hip-joint ("ḳoṭlit"), including head of femur ("buḳa de-iṭma") and innominate bone ("ḳeliboset"), 3; spinal column ("shedrah") made up of vertebræ ("ḥulyot") 18; ribs 11; breast-bone ("mafteaḥ shel-leb") 6; sacrum and coccyx ("'uḳaẓ") 6; and head 9, in which were recognized the vertex ("ḳederah"), two condyloid processes, the foramen magnum, the fontanels, maxillary bone, maxillary arch ("gabbot ha-zaḳan"), and the nasal bone ("'eẓem ha-ḥoṭam"). This enumeration gave rise to numerous disputes as to the number of bones constituting a normal skeleton.

Osteology.

The disciples of R. Ishmael, in order to settle this question, obtained the body of a young harlot who had been put to death, and, having subjected it to prolonged boiling ("shelikah"), counted the bones and found the number of them to be 252 (Bek. 45a). Neither of the numbers given agrees with modern anatomical knowledge. The explanation of the discrepancy is to be found in the youthful age of the subject used, many of the bones not having become completely ossified; also the prolonged boiling caused them to be separated into their original component parts, so that the Talmudists counted the epiphysis and diaphysis as separate bones. As an expert osteologist is mentioned Theodos, a well-known physician (Naz. 52a).

Myology.

The Bible speaks of muscles under the general term "flesh" ("basar"). The abdominal muscles are mentioned in Job xl. 16. The psoas muscle is mentioned in the Talmud (Ḥul. 93a); and Rab Ḥisdai made the remarkable observation that the psoas in all clean animals, *i.e.*, those that chew the cud and whose hoofs are cleft, has two accessory muscles whose respective fibers run longitudinally and transversely (*ib.* 59a). Tendons are frequently mentioned under the term "giddim."

The salivary glands or "fountains" (Niddah 55b) are situated in the cavity of the mouth (Ab. R. N. xxxi.) and under the tongue (Lev. R. xvi.). The capacity of the pharynx ("bet ha-beli'ah") was found by experiment to be larger than it seems. A hen's egg can easily be swallowed whole (Yoma 80a). The esophagus ("wesheṭ") and larynx ("ḳaneh") have their respective origins in the pharynx. The structure of the esophagus is composed of two layers ("orot")—an outer, muscular one and an inner, serous one (Ḥul. 43a). The inner layer has longitudinal folds throughout its length, except at the upper part, which is called "tarbeẓ ha-wesheṭ" (*ib.* 43b). The lower portion of the inner layer is supplied with hair-like projections (*ib.* 44a).

The larynx ("ḳaneh," "gargeret") is composed of a large ring of cricoid cartilage ("tabba'at gedolah"), thyroid cartilage ("koba'," "piḳah shel-gargeret"), and the epiglottis ("shippuy koba'"; Ḥul. 18b). The trachea is composed of incomplete cartilaginous rings ("ḥulyot"), and membranous ones ("bene ḥulyah").

The alimentary canal of ruminating animals is thus described:

"The food passes from the mouth into the pharynx, thence into the esophagus ["isṭomka"], thence into the reticulum ["bet ha-kosot"], thence into the psalterium ["ha-masas" or "hemses"], thence into the abomasum ["karsa"], thence into the duodenum ["resh mayah"], thence into the small intestines ["kerukah ḳaṭṭinah"], thence into the blind gut ["sanya debe"], thence into the large intestines ["kerukit 'ubya"], thence into the rectum ["peṭaroka"], whence it makes its exit through the *sphincter ani* ["iskutha"]" (Lev. R. iii.).

According to R. Samuel, there are no hair-like projections ("milot") below the pylorus ("meẓar"). The gastro-intestinal tract throughout its length is covered externally with the peritoneum ("ḳerum niḳlaf") except the posterior surface of the lower portion of the rectum ("ḥilḥolet"; Ḥul. 49b). The peritoneum forms the greater omentum ("peder"), which is attached to the greater curvature or "bow" ("Ḳashta") of the stomach (*ib.* 50a) and the beginning of the small intestines (*ib.* 93a).

The liver is attached to the diaphragm ("ṭarpesha") by a fold of the peritoneum (*ib.* 46a). It is united also with the gall-bladder ("marah") by means of a narrow tube ("simpona"; *ib.* 48b). The pancreas is considered an accessory organ of the liver, and is called the "finger of the liver" ("eẓba' ha-kabed"). Its relations to the abdominal organs are described correctly (Tamid 31a). The anterior abdominal wall is divided into an inner, peritoneal layer ("keres penimit") and an outer, muscular one ("keres ḥiẓonah"). The spleen and kidneys are frequently mentioned in Talmud and Midrash, but no description is given (see below).

The Lungs and Heart.

The lungs are composed of two "rows" ("'arugot"), right and left, divided vertically by a septum ("ṭarpesh ha-leb") which rises from the pericardium ("kis ha-leb") and is attached to the spinal column. The large bronchi ("bet ha-simponot") enter respectively the inner side of each row (*ib.* 50a). Alongside of the bronchi enter also the large blood-vessels ("mizraḳim"; *ib.* 93b). The number of lobes in each lung is given correctly (*ib.* 47a). The pleura is composed of two layers, an outer, rough one ("ḳerama 'illaya") and an inner, rose-colored one ("ḳerama tatta'a," "kittuna de-warda"; *ib.* 46a). The heart is composed of two ventricles ("ḥalal"), the right being larger than the left (*ib.* 45b). It is situated to the left of the median line (Men. 37b). Rab expressed a radical view for his time, namely, that the aorta ("ḳaneh shel-leb") contains blood, not air (Ḥul. 45b). The large veins are called "weridim"; the small ones, "ḥuṭe dam."

The brain is not mentioned in the Bible. According to the Talmudists, it has two coats, an outer (the *dura mater*) and an inner coat (the *pia mater*), the one being hard ("ḳashshish"), the other thin ("daḳḳiḳ"). The spinal cord begins outside of the condyloid processes (Ḥul. 45a). The Zohar gives a somewhat more detailed description: "The skull contains three cavities in which the brain is lodged. From the brain issue thirty-two paths. These paths spread over the body connecting it with the brain" (Zohar on Lev. xxvi.).

The Generative Organs.

From the laws relating to circumcision, flux, menstruation, etc., which are discussed at length in the Bible and especially in the Talmud, may be gathered some idea of the knowledge which the ancient Jews possessed concerning the anatomy of the generative organs. Of the male genitals the anatomical parts are mentioned as follows: The scrotum ("kis") is divided by a septum into two sacculi (Bek. 40a); the testes ("beẓim," "ashakim") have two coats (Ḥul. 45a); each testicle has an appendix, the epididymis ("ḥuṭe beẓah"; Yeb. 75a); it is supplied with blood-vessels ("gide paḥad"; Ḥul. 93a) and nerves (*ib.* 45b), and it contains a viscid fluid (Yeb. 75a). It was held that the spermatic fluid and the urine had each a separate canal for their exit (Bek. 44b).

Besides the uterus only the visible parts of the female generative organs ("reḥem"), there being many synonyms, are mentioned in the Bible. The Talmud mentions the following: *Mons veneris* (Hebr. "kaf tappuaḥ"; Yer. Yeb. 1-2); *vulva* ("'erwah"); *rima pudendorum* ("bet ha-setarim"; Niddah 66b); *vestibulum vaginæ* ("bet ḥiẓon"; *ib.* 41b); *orificium urethræ* ("lul"; *ib.* 17b); *hymen* ("betulim"); *ostium vaginæ* ("bet shinnayim"; *ib.* 46b); *vagina* ("bet toref," "bet ha-reḥem"; Shab. 64a); *septum vesico-vaginalis* ("gag prosdor"; Niddah 18a); *septum vagina-rectalis* ("karka prosdor"; *ib.*); *uterus* ("reḥem"; *ib.*); *canalis cervicis uteri* ("maḳor; *ib.* 41a); *cavum uteri* ("ḥeder" [*ib.* 17b]; "bet herayon" ['Ar. 7a]).

Embryology.

According to the Mosaic law (Lev. xii. 2-5), a woman after giving birth to a male child remained unclean for seven days thereafter; in the case of a female child, fourteen days. Then followed a period of purification—for a male thirty days, and for a female sixty-six days. According to the Mishnah, miscarriages fell under the same law, provided, however, the fetus ("shefir") was completely formed ("meruḳḳam") and its features were well differentiated ("mi-ẓorat adam"). Monstrosities and all fetuses not viable were exempt from the above-named law (Niddah iii.). This interpretation of the Biblical law served as an impetus to the Talmudists for the diligent study of embryology.

The esteem in which were held those who occupied themselves with this study is shown in the legend that King David devoted a great deal of his time to these investigations (Ber. 4a). R. Samuel, it is said, was able to tell the exact age of a fetus (Niddah 25b). The fetus, it was held, is completely formed at the end of the sixth week. Aba Saul, a grave-digger by occupation, but also an embryologist, describes an embryo at the end of the sixth week as follows: "Size, that of the locust; eyes are like two specks at some distance from each other, so are the nostrils; feet like two silken cords; mouth like a hair. . . . The soles are not well defined." He adds that the embryo should not be examined in water, but in oil, and only by sunlight (Niddah 25b). R. Samuel (*l.c.*) contended that it was impossible to differentiate the sex before the end of the fourth month, which, by the way, is the opinion of modern embryologists. At certain autopsies it was found that the male embryos were completely formed at the end of the forty-first day, and the female embryos at the end of the eighty-first day. The Rabbis contended that the autopsies had not been free from error (Niddah 30b). The soft parts are formed first, then the bones (Gen. R. xiv.). Monstrosities like cyclopia, monopsia, double back with double spinal column, and *artresia œsophagi* ("weshet aṭum"), etc., are mentioned (Niddah 23b, 24a, b).

The Bible identifies the blood with the soul (Gen. ix. 4). The Talmudists regard blood as the essential principle of life (Ḥul. 125a). The relation between strength and the development of muscles is mentioned in the Bible (Job xl. 16). The Talmudists noted the fact that the muscles change their form

Physiology.

when in motion (Ḥul. 93a). Respiration is compared to burning. Expired air can not sustain life (Sanh. 77a). The life of all the organs of the body depends upon the heart (Yer. Ter. viii. 4). Each gland secretes a fluid peculiar to itself, although all the glands derive their material from the same source (Num. R. xv.). The difference in the structure of the teeth in herbivorous and carnivorous animals is noted (Ḥul. 59). Saliva, besides moistening the tongue, adds to the palatability of food (Num. R. xv.). The stomach performs a purely mechanical function, that of churning the food; it is compared to a mill. Digestion proper ("ikkul") is carried on in the intestines. The time occupied in digestion is not the same in all individuals. The end of the digestive period is made manifest by the return of a desire for food (Bek. 52b). Eating when the bowels are full is likened to the making of a fire in a stove from which the ashes have not been removed (*ib.* 55a). Normal defecation hastens digestion. Birds digest their food rapidly (Shab. 82a); dogs, slowly (Oh. xi. 7). The reasoning faculties are lodged in the brain (Yeb. 9a). The movements of the body depend upon the integrity of the spinal cord (Ḥul. 58). Rabbi Isaac holds that the liver elaborates blood (Shab. 82a).

There are numerous references to the influence of climate, customs, trade, etc., upon the development of the organism as a whole, and upon certain groups of muscles (Ab. R. N. xxxi.; Yeb. 103a; M. Ḳ. 25b).

The phenomena preceding the period of menstruation are described in detail (Niddah xi. 8). The menstrual fluid is considered by Rabbi Meïr as an extra nutritive material which is discharged periodically when of no use, but which is converted into milk during the period of lactation (*ib.*). Absence of menstruation indicates sterility. Fear and cold may arrest the flow (*ib.* 66).

Pathology.

That medicine was an integral part of the religion of Israel is made more evident from the pathological studies of the Rabbis than from any other branch of medical science. It is indeed remarkable that the Rabbis seem to have been the first to recognize practically what is at present the prevailing theory, namely, that the symptoms of all diseases are merely outward manifestations of internal changes in the tissues—a theory never advanced by their contemporaries, *e.g.*, Hippocrates and his disciples, and only vaguely hinted at by Galen ("De Locis Affectis," i., ch. ii.). Their pathological studies were a direct outgrowth of the law concerning the "flesh that is torn of beasts in the field," which becomes unfit ("ṭerefah") for food (Ex. xxii. 30 [A. V. 31]). Certain rules concerning this infection are enjoined upon those who come in contact with the flesh of an animal that "dieth of itself or is torn with beasts" (Lev. xxii. 8). The Talmudists went a step further, and declared that the word "unfit" included the flesh of animals afflicted with any disease which would have sooner or later caused the death of the animal (Ḥul. iii. 1).

In order, therefore, to determine the condition of the internal organs, each slaughtered animal was subjected to an autopsy; this is the practise even to-day. The pathological changes of the lungs have been most diligently studied as to color, consistency, cavities, and vegetable growths. Redness of the lungs indicates hyperemia (Ḥul. 47b), a condition which is not fatal (*ib.* 46b); blue and light-green discoloration is not considered dangerous (*ib.* 47b); black indicates that the object has begun to disintegrate ("laḳah"); and the part of the lungs thus affected can not return to its normal state. Bright yellow ("yaroḳ") is considered the color indicative of the most fatal condition. If, on inflating the lungs, it is found that air does not enter into a certain part of them ("oṭem be-re'ah"), it is then important to find out whether the obstruction is caused by pus or mucus ("mugla") in the bronchi, which might have been expelled by coughing, or is due to thickening of the tissues. In the latter case the animal is unfit for food. Caseous degeneration ("re'ah she-yabeshah"), "in which there is no blood and it crumbles under the nail," makes the flesh of the animal unfit for food. Softening of the lung ("re'ah she-nitmasmesah") is fatal. In the case of an animal with collapsed lungs ("re'ah she-ẓameḳah") the following rule is given by the Talmud: if after they have been immersed in water they can be inflated with air, the flesh of the animal is fit for food; if they can not be so inflated it is unfit. A pitcher-shaped cavity in the lung ("re'ah she-nish-pekah ke-ḳiton"), filled with fluid, renders the animal unfit for food. An empty cavity ("re'ah she-nimmoḳah") is not dangerous to life (*ib.*). The Rabbis speak of vegetable growths ("ẓemaḥim") on the lungs in connection with adhesions of the lung to the thorax ("dofen"); and they describe several forms, all of which are not considered dangerous.

Perforation of the outer coat of the brain is not fatal; but the slightest perforation of the inner coat is. Rabbi Jacob held that an injury of the spinal cord is fatal; the editor of the Mishnah said that it is fatal only when the injury extends to more than one-half of its transverse diameter (Ḥul. iii. 1). A sheep that dragged its hind legs was diagnosed by Rabbi Yemar as suffering from ischiagra ("shigrona"); but Rabina contended that it was a paralysis due to the solution of continuity of the spinal cord. The sheep was killed, and the diagnosis of Rabina was corroborated (Ḥul. 51a). This is the only case on record in ancient literature where a diagnosis was made during life and was verified at a postmortem examination. Rabbi Levi saw one who suffered from tremor of the head, and he remarked that the man was suffering from softening of the spinal cord. Abaya said that such cases were not fatal, but the patients lost their reproductive functions (*ib.*).

Perforation of the heart is considered fatal. No other pathological changes of the heart are mentioned. A transverse division of the trachea is not considered fatal, provided it is less than one-half of its circumference. Longitudinal wounds in the trachea heal quickly (*ib.* 45a, 54a, and 57b). Loss of substance is not considered fatal (*ib.* 18b). Perforation of the esophagus is fatal, since the food may escape into the mediastinum (*ib.* 45b). Volvulus is considered fatal (*ib.* 56b). Perforation of the stomach or of the intestines is fatal. Extirpation of the spleen in animals and in man is not considered fatal (Ḥul. 2). Rupture or wounding of the spleen is considered fatal. Ablation of the uterus is mentioned and is not considered fatal (Bek. vi. 4). Atrophy and abscess of the kidney are fatal (Ḥul. 55a, b). Accumulation of transparent fluid in the kidney is not fatal (*ib.* 53b).

The pathological changes in the liver mentioned in the Talmud are: that in which the organ becomes dry and bloodless and "crumbles under the nails"; abscess; and stone-like hardening. Extirpation of the liver is not considered fatal if there is left intact the part which surrounds the biliary duct and "that place from which the liver receives its vitality." Absence of one testicle is mentioned, and the subject is considered sterile (Bek. vi. 6). Hypertrophy and atrophy of the testicles (*ib.* 40b), scrotal hernia ("ruaḥ ba-ashakim"), and *elephantiasis scroti* (the sufferer being called "me'ushkan"; *ib.*) are also mentioned. Various forms of hypospadias and epispadias are described (Niddah 13a; Yeb. 76a). The Mishnah enumerates 140 pathological conditions which in the eyes of the Law make a man a "cripple" ("mum") and therefore unfit to perform any religious service in the Temple. Fifteen of these describe various osteologic deformities of the head, spine, and extremities (Bek. vii.). The rare cases of individuals having a tendency to hemorrhage are related, and the fact that this affection is hereditary is noted (Yeb. 64b).

Surgery.

Wounds in different parts of the body, caused by different weapons—sword, arrow, hammer, etc.—are mentioned in the Bible (II Sam. ii. 23, iii. 27, iv. 6, xviii. 14, xx. 10; Num. xxv. 8; Judges iii. 21, v. 24; I Kings xxii. 34; II Chron. xxxv. 23; and often elsewhere). Inflammation and abscesses (Deut. xxviii. 27, 35), gangrene and putrid discharges (Ps. xxxviii. 6; Prov. xii. 4, xiv. 30; II Macc. ix. 9) are also referred to. Wounds were treated by the application of wine or oil, bandages or sutures (Isa. i. 5; Jer. viii. 22, xlvi. 11, li. 8; Deut. xxviii. 27). The surgical operations mentioned in the Bible are those of CIRCUMCISION and castration, the latter being prohibited (Deut. xxiii. 1).

During the Talmudical period surgery attained a high degree of development. Many physicians devoted themselves exclusively to it. Surgeons ("ummanim"; Sanh. 91b), when operating, used to wear a tunic over their dress (Kelim xxvi. 5). They used various surgical instruments (*ib.* xiii. 2). In major operations the patients were given an anesthetic or a sleeping-potion ("samme de-shinta"; B. M. 83b). Venesection was extensively used upon the healthy and the sick alike. Mar Samuel Yarḥinai went so far as to recommend its use once in thirty days (Shab. 129b). After the age of fifty venesection should be employed less frequently (Giṭ. 70a). It is not to be performed during inclement weather; and a careful dietetic régime should be followed for some time after the operation (Shab. 129a). Bleeding by means of leeches ("'aluḳah," "nime shel mayim"; 'Ab. Zarah 12b) and by means of cupping (the cup being called "ḳarna de-ummana"; Shab. cliv. 2) is frequently mentioned. Dislocation of various joints ('Ab. Zarah 29), fractures, amputations (Ker. 66a; Sem. 28; Shab. 66a), and trephining (Ket. 77b) are discussed in the Talmud. Artificial teeth, made of hard wood, gold, or silver, were used (Shab. 65a; Ned. 66b). Extirpation of the spleen was successfully performed upon man ('Ab. Zarah 44a). The following forms of castration are mentioned: *Amputatio membri*; *extirpatio testiculorum* (Deut. xxiii. 2 [A. V. 1]); subcutaneous stretching or cutting of the cord (Lev. xxii. 24; Bek. 39b); and obliteration of the testicle by means of gradual pressure. Intubation of the larynx was practised upon animals (the tube was called "ḳerumit shel ḳaneh"); and a plate ("ḥidduḳ shel ḳarweyah") was used in a case of loss of substance of the cranium. A uterine speculum was used (Niddah 66).

Operations.

The practise was adopted of freshening up the borders of old wounds in order that union might be effected (Ḥul. 77). The operation for imperforate anus in the new-born is described (Shab. 134b). Wounds exposed to air do not heal as readily as protected ones (Ḥul. 46). In an accident in which the abdominal viscera were protruding through a wound the reposition of the organs was effected automatically by frightening the patient, which caused the abdominal muscles to relax; after this the external wound was closed by sutures (Shab. 82a). Nasal polyps are said to cause *fetor ex ore* (Ket. 77). Crutches and various other orthopedic appliances are mentioned (Shab. 65a). Intestinal parasites and hydatids are frequently mentioned (Ḥul. 48a). Extraction of the fetus through an incision made in the abdomen was an operation known to the Talmudists (Niddah 40b). See BATHS, BATHING; CIRCUMCISION; MIDWIFE; MIRACLES; HEALTH LAWS.

S. S. C. D. S.

——**In Post-Talmudic Times:** During the fifth and sixth centuries of the common era the sciences languished in the Orient owing in part to disturbed political conditions, to superstitions, and to the attention which was being paid to pseudo-sciences. The persecutions of the Jews under Honorius (in 404 and 419), Theodosius the Great (493), and Kobad in Persia (520) resulted in the promulgation of laws forbidding Jews to hold any office, to follow any handicraft or liberal art, or to practise medicine.

With the spread of Mohammedanism in the seventh century a great revival of the sciences took place in Asia Minor. The califs opened colleges which included medical schools at Bagdad, Kufah, and Bassora, and these were well equipped and were furnished with the best of teachers. Among both the teachers and the students were to be found many who bore Jewish names. Science then was free to all; but in 853 a law was promulgated in Bagdad which prohibited the Jews from teaching or studying medicine in any language other than Hebrew or Syriac. The Mohammedans, being able to fill all positions themselves, were no longer in need of the help of the Jews. The earliest Jewish physicians mentioned during the golden age under the Arabs were: Abu Ḥafṣah Yazid (*c.* 643), physician to the calif Omar, Mohammed's successor; Masarjawaih (Messer Jawait) in Bassora about 883, physician to the calif Mu'awiyyah I., whom he induced to procure translations of works written in foreign languages, and who himself translated from the Syriac into Arabic the pandects of Aaron the Archdeacon, upon medicinal plants and foods; Isḥaḳ ben Amram (d. 799; not to be confounded with the Kairwan physician of the same name), who wrote a treatise on poison; Sahl, called "Rabban al-Ṭabari," who lived about 800 at Taberistan on the Caspian Sea, was an eminent physician and mathematician, and translated into Arabic the "Almagest" of the Greek astronomer Ptolemy; his son Ali ibn Sahl ibn Rabban al-Tabari (Abu al-Ḥasan), who lived at Irak about 850, became a convert to Mohammedanism, and was court physician to the califs Al-Mu'taṣim and Al-Mutawakkil.

Bagdad.

Harun al-Rashid (786-809) was the founder of the university at Bagdad, the most flourishing institution of its time, possessing hospitals, a medical school, and holding medical examinations. The professors included Joshua ben Nun (*c.* 800), a physician of high repute and translator, one of whose pupils was Yusuf Ya'ḳub ibn Isḥaḳ (*c.* 850); much later Hibat Allah Abu al-Barakat b. 'Ali b. Malka, who lived about 1150 and who pursued his studies under the greatest difficulties on account of the laws prohibiting Jews from studying medicine (later he became a convert to Mohammedanism); Ibn Zakariyya (died at Aleppo 1190); Sa'ad al-Daulah, court physician to the Mongolian khan Arghun (1284-91) when in Bagdad (killed in 1291 for not curing his lord). The calif Ma'mun, Harun al-Rashid's son (813-833), established the universities of Bassora and Samarcand.

Egypt and Northern Africa.

After the beginning of the fourteenth century the center of Mohammedan learning moved westward, and no more Jewish physicians are met with in 'Iraḳ after that date. The sciences followed the conquering armies of the Arabs from Asia Minor through Egypt and the Mediterranean countries of Africa to Spain and southern France, to Sicily, and thence to Italy. Alexandria, Cairo, and Kairwan became the seats of colleges with medical schools. At Kairwan about 793 lived the Jewish physician Shammakh, who poisoned the imam Idris by order of Harun al-Rashid; at Algiers, about 900, Isḥaḳ ibn 'Imran, court physician to the emir Ziyadat Allah II., and Isḥaḳ ibn 'Imran the Younger, court physician to the last Aghlabite emir, Ziyadat Allah III. 'Imran the Younger's successor was Isaac ben Solomon Israeli (*c.* 832-932), who later became oculist and physician to the Fatimite calif 'Ubaid Allah al-Mahdi at Kairwan. Israeli's works written in Arabic were translated into Latin in 1087 by the monk Constantine of Carthage, who claimed them as his own. In 1515 they were reprinted in Latin in Leyden under the title "Opera Omnia Isaci Judæi," the subjects treated including fever, dietetics, urine, drugs, dropsy, therapeutics, and aliments; the last part appeared in Hebrew under the title "Sefer ha-Mis'adim." The Leyden edition contains not only Israeli's works, but also those of other physicians falsely attributed to Israeli (Steinschneider doubts if Israeli really existed). Israeli's pupil was Dunash ibn Tamim (Abu Sahl), also court physician (*c.* 950), who is said to have been a convert to Islam. Jewish physicians in Egypt were: Ephraim ibn al-Za‘faran (d. 1068), celebrated through his library; Abu Sa‘id ibn Ḥusain (Al-Ṭabib), about 1050; Abu Manṣur (*c.* 1125), one of the physicians of the calif Al-Ḥafiẓ; Nathanael Israeli (the Egyptian), at Cairo (*c.* 1150), court physician to the last Fatimite calif of Egypt and to the great Saladin; Abu al-Barakat (*c.* 1150); Abu al-Faḍa'il ibn al-Naḳid (d. 1189), a celebrated oculist; Abu al-Bayyan al-Mudawwar (d. 1184), also physician to Saladin, and David ben Solomon (1161–1241), connected with the hospital Al-Naṣiri in Cairo, both Karaite physicians; the Karaite Sadid b. Abi al-Bayyan (*c.* 1160); Abu Ja‘far Joseph Nathanael Israel (*c.* 1175); and Abu al-Ma‘ali, brother-in-law of Maimonides, also in the service of Saladin.

Maimonides.

In 1166 Maimonides himself (1135–1205) went to Egypt and settled in Fusṭaṭ. Born at Cordova, Spain, he left his native land on account of the disfranchisement of the Jews by the Mohammedan rulers. He became court physician to the sultan Saladin. Of the descendants of Maimonides the following were physicians: his son Abraham (1185–1254), his grandson David (1212–1300), also the two sons of the latter, Abraham Maimonides II. (1246–1310) and Solomon, all of whom held the office of nagid also. In Aleppo lived a pupil of Maimonides, Yusuf al-Sabti (d. 1226); while in Fez practised another pupil of his, Abu al-Ḥayyuj Yusuf. In Cairo lived ‘Imran al-Isra'ili (1165–1239); Samuel Abu Naṣr ibn ‘Abbas (*c.* 1165); Abu al-Ḥasan (d. 1251); Jacob b. Isaac (*c.* 1250); the Karaite Solomon Cohen and Al-Asad al-Maḥalli (about the end of the twelfth century); Ibn Abi al-Ḥasan al-Barkamani and the pharmacologist Abu al-Muna al-Kuhin al-‘Aṭṭar (*c.* 1325); in Egypt, the encyclopedist Abu Manṣur al-Haruni (*c.* 1375); at Algiers, Simon ben Ẓemaḥ Duran (1360–1444); Samuel and his son Jacob (*c.* 1425); the Samaritan Abu Sa‘id al-‘Afif (*c.* 1450); Solomon ben Joseph (*c.* 1481), nagid of Egypt, and physician to the sultan Al-Malik al-Ashraf.

Spain.

When the Arabs crossed the Straits of Gibraltar the influx of culture from Arabia into Spain was important. Here again the califs supported the universities, as those of Cordova, Seville, and Toledo, and again Jewish physicians are found, *e.g.*: Ḥasdai Abu Yusuf ibn Shapruṭ (915–970), who lived in Cordova, was appointed physician to ‘Abd al-Raḥman III., and became prime minister to that calif, for whom he translated the works of Dioscorides into Arabic; Harun at Cordova (*c.* 975); Amram ben Isaac (d. 997) at Toledo; Jonah (Abu al-Walid Merwan ibn Janaḥ; at Cordova 995–1045). The physician Abu Bekr Mohammed ben Merwan ibn Zuhr (d. 1031 at Talabira) and his grandson, the celebrated Abu Merwan ibn Zuhr, who lived in Bagdad, Cairo, and Spain, are considered by many to have been Jews, but this has been frequently denied, and no positive proof of their Jewish descent has been presented. Abu Merwan was the most important physician of his time, opposing the Arabic physician Avicenna (980–1037), who in his "Canon" gave the "rules of medicine," superseding the works of Hippocrates and Galen, although he himself adopted the fundamental ideas of these two great physicians. Other Jewish physicians of note were: Judah ha-Levi (b. 1085); Sulaiman ibn al-Mu‘allim, court physician to the calif Ali at Seville (1106–45); Abraham ibn Ezra (1092–1167) at Toledo; Maimonides, mentioned above; at Randa, Elias ibn al-Mudawwar (*c.* 1150); in Toledo, Jacob; in Aragon, Joseph Constantin; in Barcelona, Judah ben Isaac, Judah ben Joseph ibn al-Fakhkhar, court physician to Ferdinand III.; in Saragossa, Baḥiel ben Moses and his brother Solomon Baḥiel (*c.* 1225); in Madrid, Solomon ben David; in Gerona, Moses b. Naḥman (1194–1267) and Shem-Ṭob ben Isaac of Tortosa (1206–66). About 1250 lived Judah Moria; Ibrahim ben Sahl; Nathanael ben Joseph al-Maliḥ; Samuel Benveniste; Jacob ben Shoshan; Joseph ibn Sason (d. at Toledo 1336); Abner of Burgos (1270–1348), a convert to Christianity; Samuel Ibn Waḳar (d. *c.* 1333), physician to King Alfonso XI.; Todros Abulafia; Abraham ben David Caslari (d. 1349); Vidal Crescas de Caslar (*c.* 1327); Eliezer Cohen ibn Ardot; Nissim ben Reuben Gerundi (at Barcelona 1340–80); Abraham ibn Machir; Abraham ibn Zarzal (d. at Toledo 1362); Shem-Ṭob ben Jacob; Meïr Alguadez (d. about 1415); Joseph ibn Vives (Joseph al-Lorqui); Solomon ben Abraham ibn Daud; Jacob of Toledo; Todros ibn Davor; Isaac b. Solomon; Abraham of Lerida, oculist to John II. of Aragon (*c.* 1470); in Catalonia, Gallab (Galled).

The Arabs had lost Spain forever, and the intolerance of the Christian rulers forced many Jewish physicians to leave that country. In 1335 the synod of Salamanca had declared that the Jewish physicians offered their services only to kill as many Christians as possible (Döllinger, "Die Juden in Europa," in "Akademische Vorträge"). In 1412 John II. prohibited Jews from practising in Spain. Some immigrated into France, *e.g.*, Judah ibn Tibbon, Joseph ben Isaac ben Ḳimḥi, Isaac ben Shem-Ṭob, Solomon ben Joseph ben Ayyub; some into Algiers, as Simon bar Ẓemaḥ Duran; and others into Italy, as Joshua ben Joseph Ibn Vives al-Lorqui (Hieronymus de Santa Fé) about 1400.

Portugal.

In Portugal lived Gedaliah ibn Yaḥya the Elder (*c.* 1300), physician to King Diniz; Solomon ben Moses Solomon; Moses, the physician to Ferdinand I. and John I.; Profiat Duran (*c.* 1400; he emigrated to Palestine); at Lisbon, Gedaliah ibn Yaḥya the Younger, physician to Alfonso V. (*c.* 1476; emigrated to Turkey); Joseph and Rodriquez, physicians to John II. of Portugal (1481–90), who were members of the commission appointed to examine Columbus' plans.

At the time the Jewish Arabic physicians were practising in Egypt, they are found in Sicily also. Shabbethai ben Abraham ben Joel (Donnolo) (913–982), who wrote a small work on pharmacology, which has been republished by Steinschneider, lived in Oria. From Sicily they came to southern Italy and settled in Salerno. The ancient University of Salerno is said to have been founded by the Benedictine monks of Monte Cassino in the sixth century, the monks being priests and physicians, as the

Italy.

rabbis of old. But it was not until the ninth century that it rose to prominence and became for the Occident what Bagdad had been for the Orient, the leading medical school. In 848 Joseph taught there, and in 855 Joshua, both Jewish physicians. In the eleventh century lectures are said to have been delivered in Greek, Arabic, Hebrew (with Elinus as teacher), and Latin. The medical school of Salerno became celebrated under the name of "Civitas Hippocratica." Elinus' successor as teacher of Hebrew was Copho, the editor of the "Compendium Salernitanum," the first medical encyclopedia. It is not known positively that both were Jews—Steinschneider thinks they were not — but tradition ascribes to them a Jewish origin, as it does to Copho II. (who wrote a book on the "Anatomica Porci" —which certainly makes the ascription dubious, dedicating it to Robert, eldest son of William the Conqueror). He was followed by Hillel ben Samuel of Verona (1220–95), who translated into Hebrew Brunó's work on surgery, known only under the title "Chirurgia Bruni ex Latina in Hebræam Translata."

From Salerno the Jewish physicians can be traced through Italy. From this school proceeded: Hananeel of Amalfi; Abu al-Hakim of Turin; and Faraj ben Salim (Faragut), who lived in Salerno about 1250. The last-named was physician to Charles of Anjou, King of Sicily, and was one of the first physicians who translated—not into Hebrew, but into Latin. Other physicians of note were: in Rome, Nathan ha-Me'ati, a noted translator, who rendered the "Canon" of Avicenna into Hebrew in 1279; Isaac, the court physician of Pope Boniface VIII.; Zerahiah ben Isaac ben Shealtiel of Barcelona (*c.* 1275); several members of the Anaw family (Benjamin, Abraham, Judah, Zedekiah, Jekuthiel, Menahem Rofe [about the fourteenth century]); Manuele and Angelus Manuele, physicians to Boniface IX.; Judah ben Solomon Nathan (En Bongodos); and Moses ben Isaac (Gajo) of Rieti (1388–1460); at Naples, Samuel ben Jacob of Capua, court physician to Charles II., and Isaac, court physician to King Robert of Anjou; at Palermo, David; at Verona, Michael ben Abraham; at Padua, Gentili da Foligno (died of the plague 1348); at Venice, Leo (*c.* 1330), and the following members of the Astruc family: Judah Solomon, Isaac Solomon, Abraham Solomon, Jacob Rofe, and many others.

As the school of Salerno grew in importance it was able to rely on its own pupils for teachers, and could, as Bagdad had done before it, discard Jewish assistance. The connection of the Jews with its further development diminished; in later years they did not exercise a great influence on the history of medicine in Italy, and their rôle became insignificant.

France.

While the University of Salerno was flourishing, certain Jewish schools, where medicine also was taught, are said to have existed in the south of France. About the year 1000 Rabbi Abon was principal of the Jewish school at Narbonne; and one of his pupils founded the Jewish medical school at Montpellier (*c.* 1025). Independent of these unimportant schools, however, were the beginnings of the great universities of France—Paris, Narbonne, and Montpellier—which soon were to compete with Salerno. In Paris, always a seat of Orthodox Christian theology, a few Jewish physicians are met with at the end of the thirteenth century: Copin and Moses, Rabbi Isaac and his son Vital. In 1301 this school was closed to the Jews. In Montpellier, where the earliest professors are said to have taught at first in Arabic and Hebrew, the use of Latin was introduced in the twelfth century only, when the fame of that university was at its zenith. Among the teachers and pupils were: Isaac ben Abraham; his pupil Judah, whose pupil was Moses ben Naḥman; Jacob ha-Ḳaṭon, who was dean of the medical faculty; Meshullam the physician (1043–1108), a contemporary of Rashi; Samuel ibn Tibbon, the well-known translator; Jacob ben Abba Mari of Marseilles, later court physician to the German emperor Frederick II. at Naples; Judah ben Samuel ibn Tibbon (1120–1190). Moses ibn Tibbon (1230–85), and Jacob ben Machir ibn Tibbon, called Profatius Judæus, dean of the medical faculty about 1306 (this family produced three generations of eminent physicians; see Ibn Tibbon); and Abraham Abigdor (b. 1350).

Montpellier.

As at Bagdad and Salerno, so at Montpellier laws were promulgated against the Jews as teachers and practitioners of medicine, *e.g.*, in the edict of Count William in 1180; of the Council of Béziers in 1246, and of Alby in 1254. In 1293 a law was enacted punishing with three months' imprisonment Christian patients who accepted treatment from Jewish physicians. Philip of Arlois expelled Jewish physicians altogether from Montpellier in 1306. At the school of Marseilles were Shem-Ṭob ben Isaac of Tortosa (1206–66) and his son Abraham b. Shem-Ṭob. In southern France practised also Isḥanan Yarḥuni, Nathan ben Samuel, and the oculist Abraham of Aragon at Toulouse; in Narbonne, David Caslari (*c.* 1275); at Avignon, Israel Caslari (*c.* 1325). The councils of Avignon (1326 and 1337) and that of Rouergue also declared against Jewish physicians.

Recall of the Jews to France.

In 1350 the Jews were permitted to return to France; but a law was passed whereby only graduated and licensed physicians could practise. Again some names of Jewish doctors, especially as court physicians, are to be found, *e.g.*: Samuel and Meshullam ben Abigdor again at Montpellier; Elias of Arles (*c.* 1407) at Valence; Jacob Lunel and the surgeon Dolan Bellan at Carcassonne; Nathan Tauros (*c.* 1446) at Tarascon; Jekuthiel Judah ben Solomon and Moses ben Joshua (Maestre Vidal Blasom; died after 1362) at Narbonne; Crescas Salannas, Ḥayyim Bendig, Abraham Abigdor (*c.* 1402), Bendig of Caneto, Bellanti (*c.* 1415), Solomon Mordecai (*c.* 1431), Moses Carcassonne (*c.* 1468), all at Arles; Abraham ben Solomon and Abraham Astruc (*c.* 1446) of St. Maxim; Cohen (*c.* 1446) at Marseilles ("Revue des Etudes Juives," April and June, 1904, pp. 265 *et seq.*).

From France the Jewish physicians passed into Belgium, where in the fourteenth century are found Abraham le Mirre, Magister Sause, Lyon, Ely, Isaac of Amessi, and Jacob of Chambery.

In England at this time only three Jewish physicians call for mention: the young physician who was the last victim of the massacre at Lynn in 1190; Isaac Medicus of London (Jacobs, "The Jews of Angevin England," pp. 114, 340, London, 1893); and Abraham Motun of London (1260–90).

Germany.

In Germany the influence of Jewish physicians at this time was small. Harun al-Rashid's great contemporary was Charlemagne, in whose dominion are said to have practised the physicians Meshullam ben Kalonymus, Joseph ben Gorion, Moses ben Judah, Todros of Narbonne, and Joseph ha-Levi. Under Louis the Bald a certain Zedekiah was court physician. They were probably from the Orient. Many Jews were living in Germany, a number of whom had migrated from Spain and France; but the universities were founded comparatively late, and they were not open to Jews. The Jews therefore studied Talmud and Cabala, and took no part in the renaissance of science. Horowitz says that there are no records of the Frankfort community before 1241; and this is the most important German community. That there must have existed Jewish physicians is shown by the decree of the Council of Vienna of 1267 forbidding Jews to treat Christian patients. During the ravages of the plague in 1348 and 1349 Jewish physicians were accused of having poisoned the wells; and at Strasburg a Jewish surgeon named Balavignus was executed in 1348 for an alleged crime of this nature. The Jewish physicians of this period included the following: Jacob of Strasburg at Frankfort (*c.* 1378); Baruch (*c.* 1390); the city physician Solomon Pletsch of Ratisbon (1394), who received as stipend 36 florins and six yards of cloth and was required to treat the servants of the city council and the sick Jews; his successor, Isaac Friedrich, who received only 20 florins; in Speyer, Lembelin; in Schweidnitz, Abraham; in Bohemia, Simon; in the Palatinate, Godliep; at Basel, Jossel, who held the office of city physician at an annual stipend of 25 silver pounds; Gutleben, his successor, who received only 18 pounds; at Würzburg, Seligmann (*c.* 1407), physician to Bishop John I.; his successor, John II., permitted a woman named Sarah to practise medicine in the bishopric of Würzburg, who, with the Jewess Zerlin (*c.* 1475), oculist at Frankfort-on-the-Main, was the earliest Jewish woman physician in Germany of whom there is record.

In addition to those above mentioned there were: in Tirol, Rubein (*c.* 1432); in Graz, Niklas Unger (*c.* 1439); in Würzburg, Heylmann (*c.* 1450); Jacob ben Jehiel Loans, physician to the emperor Frederick III. (*c.* 1450), who, with Obadiah Sforno, was Hebrew teacher of Reuchlin; Michael, surgeon to Frederick III.; at Frankfort, Solomon of Zynonge (*c.* 1450); his son Joseph (*c.* 1500); and Moses of Aschaffenburg.

In the opening years of the sixteenth century persecutions of the Jewish physicians began. In 1509 appeared Victor of Carben's "Opus Aureum ac Novum," the third part of which treats of Jewish physicians. In 1505 Lorenz of Bibra prohibited Jews from practising in Würzburg (the edict was reenacted in 1549). Up to 1517 the physicians who wished to practise in Vienna had to acknowledge under oath their belief in the "immaculate conception."

In 1422 Pope Martin V. in a bull exhorted all Christians to treat the Jews with kindness, and permitted the latter to practise medicine. But at the end of the fourteenth and at the beginning of the fifteenth century Jewish physicians found the greatest difficulty in practising medicine. Papal decrees and Church councils (as at Basel, 1434) decided against them. The Arabian influence in southern Europe had disappeared.

Retrospect from 622 to 1492.

Hippocrates and Galen ruled supreme in the medical world up to the thirteenth century. The Arab physician Avicenna (980–1037) wrote his celebrated "Canon," which work took rank next to the writings of Hippocrates and Galen. But their works were translated into Arabic, a language which, in Europe, was known only to the Jews, who retranslated them into Hebrew and Latin, and thus held the key to medical science. Learning from these great scholars, the Jewish teachers and physicians wrote works of their own. They excelled in surgery and medicine (including ophthalmology), in therapeutics, pharmacology, and toxicology. The connection of the Jews with the drug-trade of the East helped them to contribute also to a practical knowledge of pharmacology at a time when every apothecary posed as a doctor; but with these branches of the true science of medicine there was during the first millennium of the common era combined also a knowledge of pseudo-science, astrology, and Cabala. Superstition was still an important factor. Against these pseudo-sciences Maimonides wrote. Astrology was to him not based on science, but on superstition; and in his works he warns against its use.

——**In Modern Times:** Human anatomy, the basis of all medicine, had not been studied scientifically by the physicians of the Talmud (they seem only to have boiled human bodies as the physicians of other countries had done, and, counting the bones, to have come to erroneous conclusions), by Hippocrates, by Galen (who used monkeys for his subjects), by Avicenna, or by their respective followers. The Jewish and Mohammedan religions and the Christian Church were all opposed to a desecration of the human body such as proper anatomical investigations would have required. The German emperor Frederick II. (1212–56) permitted dissection; but Pope Boniface VIII. prohibited it.

Luigi Mondino de' Luzzi, professor at Bologna (d. there 1326), dissected three female bodies. From that time anatomy received, with little interruption, the attention it deserved, and medicine, from being a more or less pseudo-science, commenced to be a real science, although half a millennium had still to pass before it was entirely liberated from superstition.

While the popes, such as Eugenius IV., Nicholas V., Calixtus III., and the temporal sovereigns promulgated decrees against the Jews, they still employed Jewish physicians themselves. Many of these Jews became converts to Christianity, among them Josiah Lorki of Spain, physician to Benedict XIII.

Josiah took the name of "Hieronymus de Santa Fé," and became a great enemy of his former coreligionists, who gave him the name "the Calumniator." He persecuted especially Jewish physicians and apothecaries.

Italy.

There were, however, some important Jewish physicians in Italy, namely: Elijah Delmedigo (1460–97), professor at Padua and Florence; Obadiah Elias ben Judah at Tivoli; Isaac d'Albadi (1450) at Barletta; Joseph ha-Levi of Naples; Messer Leon of Mantua; his son Messer David of Naples; Judah (Laudadeus) de Blanis at Perugia (*c.* 1520); Abraham de Balmes (d. 1523) at Padua; Solomon Vidal of Venice at Corfu; Vidal Balso at Reggio; Vitale (*c.* 1550) and Bonajuto (*c.* 1610) Alatino at Spoleto; and Teodoro de Sacerdoti at the court of Julius III. Popes Paul II. and Alexander VI. favored Jewish physicians through privileges, *e.g.*, Samuel Ẓarfati and Isaac Ẓarfati (*c.* 1530), physicians to Pope Clement VII., whom Isaac saved from burial alive; Joseph ha-Kohen, physician to the doge Andrea Dorea of Venice (*c.* 1540); Obadiah Sforno (d. 1550 at Bologna), the Hebrew teacher of Reuchlin; Judah ibn Yaḥya at Bologna; Benjamin, also at Bologna; Raphael at Sarzena. Several important physicians were included in the Portaleone family, *e.g.*, Benjamin at Naples, his grandson David of Pavia, his great-grandson Abraham (1542–1612) at Mantua, and Isaac Cohen at Sienna. From these names it may be seen that while Jewish physicians were more or less prohibited by the popes from practising in the east of Europe, in Italy they flourished.

Bonet de Lates of Provence, when the Jews were expelled from that district in 1498, went to Rome as physician to Pope Leo X. He is well known also through the part he took during the Pfefferkorn persecutions. From Spain emigrated Judah Abravanel and Jacob Mantino. Judah Abravanel (Leo Hebræus) was minister at the court of Ferdinand and Isabella; expelled from Spain in 1492, he went to Italy. His brother lived as physician in Ferrara about 1549. Jacob Mantino settled in Rome as court physician to Pope Paul III. He acted also as ambassador of Charles V. at Venice. Paul IV. (1558) was a great persecutor of the Jews, enacting laws against them, some of which were repealed only in the nineteenth century, and on account of which many Jews emigrated to Turkey. During this period lived Juan Rodrigo de Castel-Branco, surnamed "Amatus Lusitanus" (1511–68), at Ancona and Salonica; David d'Ascoli, who defended the Jewish physicians in an essay published at Strasburg in 1559; David de Pomis (b. 1525 at Spoleto; d. at Venice 1588), also a great defender of his colleagues ("De Medico Hebræo Enarratio Apologica," Vienna, 1588). These were succeeded by the following: Moses ben Samuel Cases (*c.* 1600); Kalonymus ben Judah (*c.* 1575), Joseph Ḥameẓ, and Jacob Lombroso at Venice; Samuel Meldola at Mantua; David Ḥayyim Luria and three Cantarinis at Padua (Kalonymus, 1593–1631; Isaac Ḥayyim, 1644–1723; Judah, 1650–94); Ezekiel de Castro at Verona; Moses ben Jacob Cordovero at Leghorn; Jacob ben Isaac Zahalun at Ferrara, celebrated through his "Oẓar Ḥayyim" ("Thesaurus Vitæ") at Venice (1683); Hananiah ben Menahem Cases at Florence (*c.* 1700); Isaac Cardoso, emigrated to Italy from Spain, where he had lived as a Marano; Manuele di Cesena, physician to Pope Sixtus V.

To the eighteenth century belong: Shabbethai Vita Marini of Padua; Isaac Lampronti (d. 1756); Isaac Borgo; Mordecai Zahalun; Jacob Heilprin; Aaron Cases (d. 1767); Israel Gedaliah Cases (d. 1793), all of Ferrara; Solomon Levi and Isaac Levi Vali, of Verona; at Mantua, the Konia family: Joseph, Solomon, Moses Benjamin, Wolf, and Israel; at Leghorn, Isaac Foa, known also as a printer; Elias Concile; Adam and his sons Jacob and Azariah Ḥayyim Bondi; at Friaul, Isaac Luzzatto, 1730–1803; his brother Ephraim (b. 1729), who practised for more than thirty years in London, and died (1799) while traveling in Lausanne; Graziado Nepi (1759–1836), rabbi and physician at Cento, who belonged to the great French Sanhedrin of 1806.

France.

In France are to be found very few Jewish physicians during this period, as unbaptized Jews were allowed only in papal Avignon: Pierre de Notre Dame (a baptized Jew) at Arles (1500); Joseph Colon at Perries; Mordecai Nathan and Joseph de Noves at Avignon; Elias Montalto (d. at Paris 1615), court physician to Maria de Medici, by whose order his body was embalmed and sent to Holland for burial in a Jewish cemetery; his son Isaac, at Paris; at Bordeaux, John Baptist de Silva (1686–1742), who had the best consulting practise in Europe, and was physician to Louis XIV., by whom he was knighted; at Nancy, Isaac Assur and Jacob Beer (*c.* 1775).

Though Jewish physicians were not allowed to practise in France, their skill was so well known that Francis I. (1515–47) during a severe sickness asked the Emperor of Germany for a Jewish physician. When one arrived the king, thinking he was a Christian, sent him back. The king then asked the Sultan of Turkey for another Jewish physician, who cured him (Cabanis, "Révolution de la Médecine," p. 128, Brussels, 1844).

In the Turkish Dominions.

While the Mohammedans lost Spain, they captured Constantinople (1453), and Jewish physicians were allowed to practise in Turkey, as in the other Mohammedan possessions. From Spain, Portugal, Italy, and France Jews emigrated to Turkey. Among them were the following: in Constantinople, Solomon Almoli (*c.* 1517); Joseph Hamon; his son Moses (1490–1567), physician to Sulaiman the Magnificent; and his grandson Joseph (d. 1578); Ibn Yaḥya; Abraham ha-Levi ibn Migas; Abraham Nahmias; Leo Siaa (*c.* 1636); Israel Conegliano (*c.* 1680); Ephraim Penseri; Abraham ben Yaish; Abraham Samuel Solomon; and Isaac Jabez (*c.* 1700); at Salonica, Samuel Uzziel (*c.* 1550); Abraham Cohen (*c.* 1700); at Jerusalem, Elijah of Ferrara (*c.* 1460); David ibn Shoshan, head of the Sephardic yeshibah in 1552; Jacob ibn Amram; Jacob Aboab; and Samuel ha-Levi (*c.* 1625); the physician Jacob Ḥayyim Ẓemaḥ was chief rabbi in 1645. In Corfu lived Samuel Valerio (*c.* 1550); in Zante, Jacob ben Uzziel (*c.* 1600); Abraham Cohen (1670–1722).

In the Netherlands and England.

In the Netherlands, which during this period was mostly under Spanish rule, Jewish physicians were few: Abraham Zacuto (Zacutus Lusitanus), an emigrant from Portugal about 1600; at Amsterdam the Bueno family (Abraham, Ephraim Hezekiah, Jacob, Joseph, and Solomon); Balthazar de Castro (1620–87); somewhat later Joseph Israel Mendes; Samuel de Silva; Samuel Jeshurun; and Samuel de Mercado (*c.* 1650); Samuel de Misa (*c.* 1725); Johanan van Embden and Naphtali Herz (*c.* 1750).

In England during this period there were very few Jewish physicians, *e.g.*, Sabot Elias (*c.* 1410); Rodrigo Lopez (b. 1525 in Portugal), court physician to Queen Elizabeth 1580, for attempting to poison whom he was executed in 1594. When Cromwell permitted the Jews to settle openly in England there immigrated thither Abraham de Mercado about 1655; Joseph Mendes Bravo about 1675; Ephraim Isaac Abendana, in Cambridge and Oxford (d. 1710), and his brother Jacob (1630–95); David Nieto, in London (*c.* 1710); Jacob de Castro Sarmento, in London (1692–1762); Fernando Mendez (d. 1724); Isaac de Sequera Samuda (b. 1721); Israel Lyons (1739–75); Samuel Nunez (*c.* 1750); Joseph Hart Myers (1758–1823); Abraham Nonski (*c.* 1785; writer on vaccination); the three Schombergs (Isaac, d. 1781; Meïr Löw, d. 1761; and Ralph, d. 1792); Isaac Henriques Sequera (1738–1816); Abraham van Oven (d. 1778); Joshua van Oven (1766–1838); Solomon de Leon (*c.* 1775); George Gompertz Levisohn (d. 1797); Elias Friedberg; and a Doctor Jeremias (*c.* 1775).

Germany.

While before 1500 there had been very few Jewish physicians in the German-speaking countries, in the later centuries many were to be found, among whom were especially the under-mentioned—in Frankfort-on-the-Main: Joseph bar Ephraim Levi (d. 1532); Abraham ben Joseph Levi (d. 1581); Jacob ben Samuel and Aaron (*c.* 1600); Shelomoh (d. about 1631); his son Löw Leo Shelomoh; Isaac Heln (d. 1654); Joseph Solomon Delmedigo (b. 1591 at Candia; practised in Candia, Cairo, Lithuania, Hamburg, Amsterdam, Frankfort-on-the-Main, Worms, and Prague, where he died 1655); his son-in-law Solomon Bing (b. about 1615); Jonas ben Moses Bonn; Abraham ben Isaac Wallach; Leo Simon; Abraham Heln (*c.* 1650); Benjamin Levi Buchsbaum (1645–1715); his sons Gutman Wolf (1678–1770) and Lipman (b. 1677); Amshel Gutman (d. 1743), son of Gutman Wolf; Issachar Bär Liebman (d. 1753); Anselm Schloss Beifuss (d. 1793); and Adolf Worms (d. 1812). In Hamburg are to be mentioned: Rodrigo de Castro (1550–1627), an eminent gynecologist; his sons Benedict de Castro (1597–1684), court physician to Queen Christina of Sweden, and Daniel (Andreas) de Castro (b. 1599), court physician to King Christian IV. of Denmark; Jacob Rosales, who practised in Hamburg from 1637 to 1645; and Benjamin ben Immanuel Musaphia (1606–75). At Schaffhausen lived the physician David (*c.* 1550); at Mühlheim, Solomon ben Boaz; at Colmar and Rappoltsweiler, Judah Carmoly (1700–85); at Colmar, Anshel Meyer (*c.* 1750); at Coblenz, Emanuel Wallich (*c.* 1750); at Bingen, Abraham Bing (*c.* 1550), father of Solomon Bing of Hamburg; at Mayence, Selkeles Grotwahl (*c.* 1675) and his son Meier; Lippmann Levi and Phoebus Cohen (*c.* 1775); at Bonn (also at Neuwied), Benjamin Croneburg (*c.* 1750); Wolf and his two sons Heinrich and Solomon (also at Düren); at Düsseldorf, Gottschalk Lazarus van Geldern (1726–95) and his son Joseph (1765–96), Heine's grandfather; at Cologne, Naphtali ben Joseph Levi (*c.* 1625); at Metz, Isaac (*c.* 1650); Naphtali Herz; Solomon ben Baruch; Mayer and Isaac Wallich (*c.* 1700); Jacob Wallich; Marcus Cosman Gompertz Wolf; and Enoch Levin (*c.* 1750); the two brothers Willstadt (*c.* 1775); Elkan Isaac Wolf; and Jacob Aronsohn (*c.* 1790); at Hanover, Meier Cohen and Jacob Marx (*c.* 1775); at Bamberg, Adalbert Friedrich Markus (1753–1816). In the principalities of the Hapsburg family were only a few Jewish physicians; at Innsbruck, Lazarus (*c.* 1560); at Vienna, Isaac (Günzburg?) and his son Judah Löb Winckler (*c.* 1625; both left Vienna 1670 and settled in Posen); Joseph Oesterreicher (1756–1832). At Prague were: Isaac ben Joshua (*c.* 1550); Abraham Kisch (1720–1803); Jonas Mischel Jeiteles (1735–1806) and his son Benedict (1762–1813); at Berlin, Lippold (*c.* 1535), court physician to the elector Joachim II.; Hector, executed 1573 for having poisoned his master; Löbel (*c.* 1693); the dentist Veit Abraham (*c.* 1699); Marcus Eliezer Bloch (1723–99); Aaron Solomon Gumperz (1723–69); Markus Herz (1747–1803), husband of Henriette Herz; Georg Levison (d. 1797); at Königsberg, Isaac May and Michael Abraham (*c.* 1550); at Breslau, Zadok (*c.* 1775); at Lissa, Mordecai Rofe.

Medical Education of German Jews.

Although at the beginning of the eighteenth century conditions in Germany were not favorable for Jewish physicians, at the middle and end of the same century most of the Jewish practitioners received degrees from German universities. In 1700 the universities of Rostock and Wittenberg counseled Christians against employing Jewish physicians, who, they declared, were incompetent (meaning that they had not received a university education). In 1725 King Frederick William I. of Prussia prohibited Jews not having diplomas from practising medicine, and in 1745 appeared at Frankfort a book by Johann Helfrich Pfeil exposing the ignorance of Jewish physicians.

In Poland.

When the kings of Poland permitted Jews to settle in some parts of their dominions, physicians appeared there also. At Cracow lived Ezekiel (*c.* 1503); Isaac Jacob (d. about 1510), physician to King Sigismund I.; Solomon ben Nathan Ashkenazi (1520–1602), physician to Sigismund II. and to the sultan Sulaiman II.; Solomon Luria in Lublin; Tobias Cohn (1652–1729), who practised in Poland, Adrianople, Constantinople, and Jerusalem, and was court physician to five Turkish sultans; Jonas Casal (*c.* 1675), physician to John Sobieski; Philipp Lubelski at Cracow (1788–1879); Elias Pinschow (*c.* 1775); at Thorn, Morgenstern (*c.* 1567); at Posen, the Wincklers (the father Leo [Judah Löb] emigrated from Vienna about 1670); his sons Jacob and Isaac and his grandson Wolf, all four important physicians and leaders of the community; Levi Elias Hirschel (1741–72).

Russia.

In Moscow practised Magister Anton (Ehrenstein). The first Jewish physician in that city probably came from Rome. He was court physician under Ivan III. and was executed in 1485 by the servants of Prince Karakucza, whose son he had failed to cure. He was succeeded by Leo, who was executed in 1490, also for not having cured one of Ivan's sons. In the fifteenth century lived Solomon Calvaire; Stephan von Gaden, also court physician (executed in 1682). At St. Petersburg lived the court physician Antonio Ribeiro Sanchez (1699–1783). The greater number of Jewish physicians are found in the larger communities, *e.g.*, at Hasenpoth, Issachar Falkensohn Behr (b. 1746), Judah ha-Levi Hurwicz, Jacob Löbschutz, David Abrahamson (*c.* 1775), Aaron Solomon Tobias (d. 1782), Lazar Isaac Kume (*c.* 1800); at Wilna, Löb Gordon (*c.* 1725); at Mitau, Elrich (d. 1809); at Bausk and Odessa, Eliezer Elias Löwenthal (*c.* 1775); also at Bausk, Lachmann.

The foregoing lists of physicians are certainly not complete. There probably lived many a good Jewish practitioner whose name has not been recorded.

Review (1495–1800).

With very few exceptions the Jewish physicians of the period 1495–1800 did not excel. They were usually general practitioners, very often combining the offices of rabbi and physician. A few are cited as great consulting physicians, as the above-mentioned John Baptist de Silva of Paris and the gynecologist Rodrigo de Castro of Hamburg. Only a few left important medical works. As a rule their influence upon medicine was only slight. They suffered with their brethren expulsion from many countries. They were very often prohibited from practising among Christians and were allowed to follow their profession among their brethren only. The universities were often closed to them; and popes and princes issued edicts against them.

——**In Recent Times:** The French Revolution brought a great change in the status of Jewish physicians. Jews were admitted to citizenship in nearly every country of western Europe, and were permitted to study at all universities and to practise their profession. Even in Russia to-day (1904) there are many Jewish physicians to be found; but it is especially in Germany, Austria, and the United States that Jews have become prominent as general practitioners, specialists, university professors of medicine (since 1848), and medical journalists. It is only possible to enumerate some of those who have obtained prominence in medical circles during the nineteenth century, beginning with those who have died.

General Practitioners.

Physicians: Solomon Ludwig Steinheim (Altona, 1789–1866); Bernhard van Oven (London, 1797–1860); Martin Steinthal (Berlin, 1798–1892; at his death the oldest physician in Germany), reeditor of Hufeland's "Macrobiotik"; Daniel Peixotto (London, 1800–43); Hananeel de Leon (*ib.* *c.* 1825); J. L. Levinson (*ib.* 1800–74); Raphael Kosch (Berlin, 1803–72); Jonathan Pereira (London, 1804–53); Maximilian Heine (St. Petersburg, 1805–79), brother of Heinrich Heine; Johann Jacoby (Königsberg, 1805–77); Jonas Grätzer (Breslau, 1806–89); Moritz Rapoport (Lemberg, 1808–80); Isaac A. Franklin (London, 1812–80); David Gruby (Paris, 1810–98), known through his free public lectures; Eleazar Meldola (London, 1810–79); Ludwig Güterbock (Berlin, 1814–95); Moritz Adolph Unna (Hamburg, 1813–88); Julius Barasch (Bucharest, 1815–63); Sigismund Sutro (London, 1815–86); Jacob Eduard Polak (Vienna, 1818–91), court physician at Teheran to the Shah of Persia; Ferdinand Falkson (Königsberg, 1820–1900), known through a lawsuit which was due to his marriage to a Christian woman; Samuel Kristeller (Berlin, 1820–1900); Hermann Hirschfeldt (Colberg, 1825–85), to whose memory a monument was erected at Colberg; Henry Behrend (London, 1828–93); Wilhelm Lubelski (Warsaw, 1832–90); Ernest Abraham Hart (London, 1836–1898); and L. G. Gold (Odessa, d. 1902).

Deceased Specialists.

Anatomists: Friedrich Gustav Jacob Henle (Göttingen, 1809–85), one of the leading anatomists of his time; Jacob Herz (Erlangen, 1816–71), whose monument is to be seen in Erlangen—one of the three monuments erected to Jews in Germany, the other two being those of Moses Mendelssohn at Dessau, and Hermann Hirschfeldt at Colberg; Ludwik Maurycy Hirschfeld (Warsaw, 1816–1876); Siegmund Spitzer (Constantinople, 1839–1894), physician to Sultan 'Abd al-Majid.

Physiologists: Simone Fubini (Palermo, 1841–98), friend and pupil of Moleschott; Ernst Fleischl von Marxow (Vienna, 1846–91); Moritz Schiff (Geneva, 1823–96); Gabriel Gustav Valentin (Bern, 1810–83), one of the leading physiologists of his age.

Microscopists: Gottlieb Gluge (Brussels, 1812–1898), one of the pioneers of microscopy; Ludwik Mandl (Paris, 1812–81).

Embryologists: Robert Remak (Berlin, 1815–65), the first Jewish privat-docent in Prussia, admitted to the Berlin faculty in 1847, and well known through his discoveries in neurology, embryology, and electrotherapy; Leopold Schenk (Vienna, 1840–1892), well known through his theory.

Pathologists: Karl Friedrich Canstatt (Erlangen, 1807–50), founder and editor of the well-known "Jahresbericht über die Fortschritte der Gesammten Medizin Aller Länder," begun in 1841 and continued after his death by Virchow; Julius Cohnheim (Leipsic, 1839–84), author of the theory of emigration of white corpuscles as the origin of pus and of inflammation, and demonstrator of "Cohnheim's areas"; Felix Victor Birch-Hirschfeld (Leipsic, 1842–99); Moritz Heinrich Romberg (Berlin, 1795–1873), the eminent neurologist; Simon Samuel (Königsberg, 1835–99); Solomon Stricker (Vienna, 1834–98), the founder of microtomy; Karl Weigert (Frankfort-on-the-Main, 1845–1904).

Clinicians: Jonas Freund (London, d. 1880), founder of the German Hospital, London; Heinrich Jacobson (Berlin, 1826–90); Hermann Lebert (Lewy) (Breslau, 1813–78); Ludwig Traube (Berlin, 1818–76), the father of experimental pathology; Daniel Maduro Peixotto (New York, about 1850).

Surgeons: Michelangelo Asson (Venice, 1802–77); Leopold von Dittel (Vienna, 1815–98), who performed over 800 operations for calculus; Joseph Gruber (*ib.* 1827–1900); Aaron Jeiteles (Olmütz, 1799–

1878); Michel Lévy (Paris, 1809-72); Germain Sée (Paris, 1818-96); Lewis Oppenheim (London, 1832-1895); Julius Wolff (Berlin, 1836-1902); Paul Güterbock (Berlin, 1844-97).

Gynecologist: David Haussmann (Berlin, 1839-1895).

Pharmacologist: Hermann Friedberg (Breslau, 1817-84).

Aurists: Joseph Gruber (Vienna, 1827-1900) and Solomon Moos (Heidelberg, 1831-95).

Ophthalmologists: Isaac Hays (Philadelphia, 1796-1879), editor of the "American Journal of Medical Science"; Ignaz Hirschler (Budapest, 1823-91); John Zechariah Laurence (London, 1828-70); Aaron Friedenwald (Baltimore, 1836-1902); Max Landesberg (New York, 1840-95); Ludwig Mauthner (Vienna, 1840-94), to whose memory a monument was erected in the arcades of Vienna University, the only monument dedicated to a Jew in Austria.

Laryngologists: Jacob Gottstein (Breslau, 1832-1895); Abraham Kuhn (Strasburg, 1838-1900); Johann Schnitzler (Vienna, 1835-93); Elias Heyman (Stockholm, 1829-89); Karl Stoerk (Vienna, 1832-1899); Louis Elsberg (New York, 1836-85); Isaac Michael (Hamburg, 1848-97); G. Ash (New York, d. 1902).

Neuropathist: Oscar Berger (Breslau, 1844-85).

Dermatologists: Moriz Kapósi (Kohn) (Vienna, 1837-1902); Oskar Simon (Breslau, 1845-82); Hermann von Zeissl (Vienna, 1817-84), defender of the dual theory of syphilis.

Psychiatrist: Ludwig Meyer (Göttingen, 1827-1900).

Hygienists: Nikolaus Heinrich Julius (Hamburg, 1783-1862); Michel Lévy (Paris, 1809-72); Levi Ali Cohen (Groningen, 1817-89).

Electrotherapist: Moritz Meyer (Berlin, 1821-93).

Balneologist: Gottfried Schmelkes (Teplitz, 1807-1870).

Biologist: Ludwig Lewin Jacobson (Copenhagen, 1783-1843).

Encyclopedists: Friedrich Jacob Behrend (Berlin, 1803-89); Samuel Guttmann (Berlin, 1839-93).

Miscellaneous: Authority on forensic medicine: Johann Ludwig Caspar (Berlin, 1796-1864). Hydrotherapist: Ludwig F. Fränkel (Berlin, 1806-1872). Dental surgeon: Ludwig Heinrich Holländer (Breslau, 1833-97), one of the German pioneers of scientific dentistry.

Medical History and Journalism.

Historians of medicine: August Hirsch (Berlin, 1817-94), still an undisputed authority; Abraham Hartog Israels (Amsterdam, 1822-1883); Franz Romeo Seligmann (Vienna, 1808-79).

Journalists: Louis Posner (Berlin, 1815-68), editor of the "Berliner Klinische Wochenschrift"; Leopold Wittelshöfer (Vienna, 1818-89), editor of the "Wiener Medizinische Wochenschrift"; Paul Guttmann (Berlin, 1833-93), editor of the "Journal für Praktische Aerzte"; Julius Grosser (Prenzlau, 1835-1901), editor of the "Deutsche Medizinal-Zeitung"; Louis Waldenburg (Berlin, 1837-81), editor of the "Berliner Klinische Wochenschrift"; Johann Jacob (Joseph Isidor) Sachs (Nordhausen, 1803-46), publisher and editor of medical journals. The champion of homeopathy in Austria is Emil Altschul (Prague, 1812-65), who founded and published (1853) the first homeopathic magazine in Austria.

Of living physicians, the following list gives the names of some of the more important, especially of those who have held official positions:

Living Physicians in Europe.

Austria: The alienist Arnold Pick; the physiologist Sigmund Mayer; the pathologists Philipp Joseph Pick and Alfred Pribram, all four of Prague; the aural surgeon Adam Politzer; the electrotherapists Moritz Benedikt and Gustav Gärtner; the pathologist Anton Weichselbaum; the pediatrists Alois Epstein and Max Kassowitz; the clinicians Moritz Heitler, Leopold Oser, Alois Pick, Wilhelm von Winternitz, Emil Zuckerkandl; the dermatologist Isidor Neumann; the ophthalmologist Isidor Schnabel; Samuel von Basch, body-physician to the emperor Maximilian of Mexico; the journalist Alexander Fränkel; Leopold von Seligmann, retired colonel-surgeon of the Austrian army, all of Vienna; the balneologists Enoch Heinrich Kisch of Marienbad and Josef Seegen of Carlsbad.

Denmark: The pathologist Karl Julius Salomonsen of Copenhagen.

England: The ophthalmologist Richard Liebreich; the laryngologist Sir Felix Semon; the pathologist Bertram Abrahams, all three of London; to these may be added the bacteriologist Waldemar Haffkine of Calcutta, India.

France: The inventor of color photography Gabriel Lippmann; the bacteriologist Alexander Marmorek; the physician Anselme Weill; the surgeon Marc Sée; the clinicians Julius Goldschmidt, Georges Hayem, and Louis Mandl; the laryngologists Benjamin Benno Loewenberg, Louis Lucien Dreyfus-Brisac, all of Paris; the neurologists Hippolyte Bernheim of Nancy and Max Nordau of Paris.

The number of Jewish physicians in **Germany** is very great: the anatomist Gustav Schwalbe of Strasburg; the physiologists Julius Bernstein of Halle, the brothers Hermann and Immanuel Munk and Nathan Zuntz of Berlin, Isidor Rosenthal of Erlangen; the histologist Gustav Jacob Born of Breslau; the pathologists Ludwig Brieger and Oskar Israel of Berlin; the clinicians Imar Boas and Wilhelm Ebstein of Göttingen, Albert Fränkel and Julius Lazarus of Berlin, Ludwig Lichtheim of Königsberg, Martin Mendelsohn of Berlin, Oscar Minkowski of Strasburg, Carl Posner, Ottomar Rosenbach, Hermann Senator, Georg Anton Solomon, all of Berlin; the dermatologists Gustav Behrend, Heinrich Köbner, Oskar Lassar, Georg Richard Lewin, all likewise of Berlin, Albert Neisser of Breslau, Paul Gerson Unna of Hamburg; the surgeons Robert Kutner, James Israel, William Levy, all of Berlin; the pediatrists Adolf Baginsky and Livius Fürst of Berlin and Eduard Heinrich Henoch of Dresden; the gynecologist Ernst Fränkel of Breslau, Leopold and Theodor Landau of Berlin, Julius Schottländer of Heidelberg, Paul Zweifel of Leipsic; the neuropathists Hermann Oppenheim, Emanuel Mendel, Albert Moll, and Ernst Julius Remak, all of Berlin; the bacteriologist Paul Ehrlich of Frankfort-on-the-Main; the orthopedist Leopold Ewer of Berlin; the ophthalmologists Julius Hirschberg of Berlin, Hermann L. Cohn of Breslau, Ludwig L. Laqueur of Strasburg, Max Solomon of Berlin, Leopold Weiss of Heidelberg; the pharmacologists Max Jaffé of Königsberg, Oskar Matthias, Eugen Liebreich and Louis Lewin of Berlin; the otologists Ludwig Katz and Ludwig Löwe of Berlin; the laryngologists Paul Heymann and B. Fränkel of Berlin; the encyclopedist Albert Eulenburg of Berlin; the forensicist Adolf Lesser of Berlin; the hygienist Ernst Levy of Strasburg; the historian Julius Leopold Pagel of Berlin; the anthropologist Abraham Lissauer of Berlin.

Hungary: The neuropathist Otto Schwartzer von Babarcz; the oculist Nathaniel Feuer; the clinician Friedrich Korányi, all of Budapest.

Italy: The specialist of forensic medicine Salvatore Ottolenghi of Sienna; the clinician Beniamino Luzzatto of Padua; the great alienist Cesare Lombroso and the pathologist Pio Foà, both of Turin.

The Netherlands: The clinician Samuel Siegmund Rosenstein of Leyden.

Rumania: The physician Karpel Lippe.

Russia: Isaac Dembo of St. Petersburg, author of "Ha-Sheḥiṭah weha-Bediḳah"; the ophthalmologist Max (Emanuel) Mandelstamm; the hygienist and court physician Joseph Vasilievich Bertensohn and his nephew Lev Bertensohn of St. Petersburg; the physician Joseph Chazanowicz of Byelostok, founder of the Abarbanel Library at Jerusalem; the clinician W. Manassein of Kasan; Isidorus Brennson at Mitau. Of the physicians at present practising in Courland 19.2 per cent are Jews.

Switzerland: The pathologist Moritz Roth of Basel.

Turkey: Elias Cohen Pasha of Constantinople.

United States: The first Jewish physician mentioned in colonial times in the United States is Jacob Lumbrozo, who practised about 1639 in Maryland.

In the United States.

The number of Jewish physicians in the United States to-day (1904) is very large, but only a few—mainly those who have acquired official positions—can be mentioned here: the general practitioners Mark Blumenthal, Simon Brainin, David A. D'Ancona, Julius Friedenwald, Boleslav Lapovski, Maurice T. Lewi, Samuel J. Meltzer, Alfred Meyer, William Moss, Max Rosenthal, Arthur F. Sampson, J. F. Schamberg, Lazarus Schöney, C. D. Spivak, Richard Stein, Jacob Teschner; the physiologist David Riesman; the pathologists Albert Abrams, Isaac Adler, Simon Flexner, and Bernard S. Talmey; the hydrotherapist Simon Baruch; the microscopist Isidore Berman; the surgeons G. W. Birkowitz, Nathan Jacobson, Howard Lilienthal, William Meyer, Joseph Ranschoff, and Lewis N. Steinbach; the jurisprudent N. E. Brill; the aurists William Cowen, M. D. Lederman, and Max Toeplitz; the gynecologists Joseph Brettauer, Louis Ladinsky, and S. Marx; the laryngologists Jacob da Silva Solis-Cohen, Max Freudenthal, and Emil Mayer; the clinicians Henry W. Bettmann, Solomon da Silva Solis-Cohen, Joseph and Julius Eichberg, Max Einhorn, A. A. Eshner, Joseph Oakland Hirschfelder, G. A. Knopf; the pediatrists S. Henry Dessau, Frederick Forchheimer, Henry Illoway, Abraham Jacobi, Henry Koplik, and Nathan Oppenheim; the dermatologists William Gottheil and Sigismund Lustgarten; the ophthalmologists Harry Friedenwald, Emil Gruening, Charles H. May, and H. Scharpringer; the neurologists Joseph Frankel, G. W. Jacoby, Bernhard Sachs, and William Leszynski; the biologist Jacques Loeb; the bacteriologist Milton Joseph Rosenau; and the dentists Leopold Greenbaum and John I. Hart.

J. F. T. H.

MEDINA: Second sacred city of Islam; situated in the Hijaz in Arabia, about 250 miles north of Mecca. It is celebrated as the place to which the Hegira (Mohammed's flight from Mecca) was directed, and as the capital and burial-place of Mohammed. According to Arabic tradition, Yathrib and the Hijaz were originally peopled with Amalekites, who were displaced by the Israelites. There are different accounts as to when this displacement was effected: some say that it occurred under Moses (comp. "Kitab al-Aghani," iv. 263); some, under Joshua; and some, under David, who it is stated resided in the Hijaz during Absalom's rebellion.

Jews may have settled in the Hijaz after the sack of Jerusalem by Nebuchadnezzar; and it is probable that they came in successive colonies, *e.g.*, after Pompey's attack upon Judea (64 B.C.), after Titus' conquest of Jerusalem (70 C.E.), and again after Hadrian's persecution of the Jews (in 136 C.E.; see Arabia).

The Jews had a very rich and flourishing settlement at Yathrib and built strongholds in the city and vicinity. The principal families were the Banu Ḳainuḳa', the Banu Ḳuraiẓa, and the Banu al-Naḍir. The latter two were known as the "Al-Kahinan," because they traced their descent from Aaron. In the fourth century Arab tribes from Yemen began to encroach upon the Jews in Medina. They were divided into two clans, the Banu Aus and

Jewish Tribes at Medina.

the Banu Khazraj. By calling in outside assistance and treacherously massacring at a banquet the principal Jews, these Arab clans finally gained the upper hand at Medina toward the end of the fifth century (for date see "J. Q. R." vii. 175, note). From this time the Jews retired into the background for about a century. About four or five years before the Hegira the Jews took an active part in the battle of Bu'ath between the Banu Aus and the Banu Khazraj. The Banu Naḍir and the Banu Ḳuraiẓa fought with the Banu Aus, while the Banu Ḳainuḳa' were allied with the Banu Khazraj. The latter were defeated after a long and desperate battle.

Mohammed's Attitude Toward Jews of Medina.

It is probable that the presence of Jews in Medina did much to prepare the way for Mohammed's teaching. When the prophet first went to Medina he was inclined to be friendly toward the Jews. They were included in the treaty between him and the inhabitants of Medina. He also made certain concessions to them on the ground of religion, and adopted their ḳiblah—Jerusalem—in the hope of winning them to his cause. They, however, ridiculed him, and delighted in drawing him into arguments to expose his ignorance; so that his conciliatory attitude was soon changed to enmity. A few Jews were converted to Islam, among them Abdallah ibn Salam, whom Mohammed called the "servant of God," and of whose conversion the prophet made much.

Mohammed Attacks Jews.

Finally Mohammed began to use actual violence toward the Medina Jews. After the battle of Bedr a woman called Asma, said by some to be a Jewess, wrote satirical verses, and was killed in her sleep, probably with Mohammed's consent. Not long before, Abu 'Afak of the Banu Amr, who had been converted to Judaism, had been assassinated for having displeased Mohammed by writing verses ridiculing the new religion. Mohammed then seems to have decided to get rid of the Jews in a body, since they were a constant menace to his cause. He began with the Banu Ḳainuḳa', who were goldsmiths, and lived by themselves in a fortified suburb. He first summoned them to accept his religion, and they refused. Soon a pretext was found for an open attack. A Moslem girl was insulted by a Jew of the Banu Ḳainuḳa'; the Jew was killed by a Moslem, and the latter in turn was killed by the brothers of the murdered Jew. Mohammed immediately marched against the Banu Ḳainuḳa' and besieged them in their stronghold. After a siege of fifteen days they surrendered, and their lives were spared only at the urgent request of Abdallah ibn Ubai, the influential leader of the Arab opposition, whose pleading Mohammed dared not ignore. Being allowed to leave the country, they emigrated toward the north. Their departure weakened the Jews, who if they had been united might have withstood Mohammed's attacks.

About a month after the emigration of the Ḳainuḳa', Abu Sufyan, the leader of the Meccan opposition, visited Ḥuyayy of the Banu al-Nadir, but, being refused admittance by him, spent the night with another influential man of the same tribe and obtained information from him concerning the state of Medina. Another Jewish poet was assassinated about this time at Mohammed's desire. This was Ka'b ibn al-Ashraf of the Banu Naḍir, who had been stirring up the Ḳuraish at Mecca by his verses after the battle of Bedr. Ibn Sanina, a Jewish merchant, was killed on the day after Ka'b; and the Jews now began to fear to leave their houses. In the summer of 625 Mohammed attacked and besieged the Banu al-Naḍir. There appears to have been no satisfactory pretext for the attack. Mohammed claimed that he had received a revelation telling him of the treachery of the Jews. After a siege of fifteen or twenty days Abdallah ibn Ubai prevailed on the Naḍir to surrender. They were exiled, being allowed to take their goods with them, and emigrated toward the north, settling in Khaibar and in Syria.

Fate of Medina Jews.

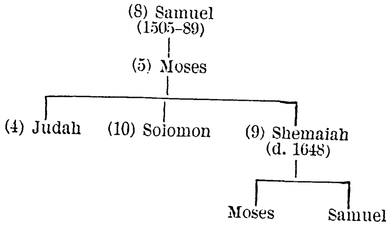
There were now left only the Banu Ḳuraiẓa, and Mohammed soon found a pretext to attack them. Some of the Jewish exiles, chief among them being the above-mentioned Ḥuyayy, had stirred up the Ḳuraish and other Arab tribes against Mohammed, and they persuaded the Banu Ḳuraiẓa to join them in their plans. Mohammed, however, succeeded in making the Jews and their Arab allies suspicious of each other; and the allies, who had been besieging Medina, suddenly departed in the midst of a storm, thus leaving the Ḳuraiẓa unsupported. Mohammed marched against them, claiming to have received a special revelation to that effect, and laid siege to their fortress, which was a few miles to the southeast of the city. They surrendered after a month's siege, without having risked a fight. Their fate was left to the decision of Sa'd ibn Mu'adh of the tribe of Aus, who, in spite of the pleading of his own tribe, condemned the men to death and the women and children to slavery. The sentence was executed; and 750 Jews were killed in cold blood. Ḥuyayy was the last to die, with his last breath denouncing Mohammed as an impostor. The prophet wished to make a beautiful woman of the tribe, by the name of Riḥanah, his wife, but, tradition says, she preferred to be his slave instead. Thus the last of the powerful Jewish tribes in Medina was destroyed. Neither Mohammed, however, nor his successor drove all the Jews out of the country. That extreme measure was taken by Omar, who claimed to have heard the prophet say that all Jews should be exiled. Medina is one of the Moslem cities that neither Jews nor Christians may enter. See Banu Ḳainuḳa'; Banu Ḳuraiẓa; Banu al-Naḍir.

Bibliography: Caussin de Perceval, *Essai sur l'Histoire des Arabes*, passim; Grätz, *Gesch.* iv. 66, 75 *et seq.*, 81-83; Hirschfeld, *Essai sur l'Histoire des Juifs de Médine*, in *R. E. J.* vii. 167 *et seq.*, x. 10 *et seq.*

J. M. W. M.

MEDINA: Prominent Jewish family, members of which lived during the sixteenth and seventeenth centuries chiefly in Turkey and Egypt. Most probably it took its name from one of the two Spanish cities named Medina.

The following is a genealogical tree of those members of the family whose relationship is established (the numbers in parentheses correspond to those given in the text):



1. David b. Moses di Medina: Cabalistic author; flourished at the beginning of the eighteenth century. He wrote: "Nefesh Dawid" (Constantinople, 1736), a cabalistic commentary on the Pentateuch and the Five Scrolls; and "Ruaḥ Dawid we-Nishmat Dawid" (Salonica, 1747), in two parts, the first being a commentary on the part of the Zohar called "Iddera Rabba," and the second a cabalistic commentary on Canticles.

Bibliography: Benjacob, *Oẓar ha-Sefarim*, pp. 400, 544; Steinschneider, *Cat. Bodl.* s.v. *Samuel Medina*; Zedner, *Cat. Hebr. Books Brit. Mus.* p. 516.

2. Isaac Ḥayyim di Medina: Editor of a prayer-book for the congregation of Sienna, arranged and published by him with the cooperation of Jedidiah Levi under the title "Seder Zemirot," Leghorn, 1786.

Bibliography: Benjacob, *Oẓar ha-Sefarim*, p. 160; Zedner, *Cat. Hebr. Books Brit. Mus.* pp. 484, 516.

3. Jacob di Medina: Son of Isaac Ḥayyim (No. 2); author of liturgical poems published under the title "Yashir Yisrael" (Leghorn, 1805), and of a poem in the collection of congratulatory poems "'Et ha-Zamir" (*ib.* 1794 ?), published on the occasion of the wedding of E. M. Recanate.

Bibliography: Benjacob, *Oẓar ha-Sefarim*, pp. 232 (where "son of Moses" is erroneous, as the latter was only the co-editor), 434; Zedner, *Cat. Hebr. Books Brit. Mus.* pp. 475, 516, 651, s.v. *Recanate* (where the name "Medina" is missing), and p. 675, s.v. *Samuel b. Moses, the Priest.*

4. Judah di Medina (surname **Comprado** or **Conrado**)**:** Son of Moses (No. 5); mentioned by Conforte as a scholar. His wealth aroused the enmity of a non-Jew, who killed him at the door of his own house. The Jews of Salonica seized the murderer, and hanged him at the scene of his crime.

Bibliography: Conforte, *Ḳore ha-Dorot*, pp. 43b, 50a; Steinschneider, *Cat. Bodl.* col. 3004.

5. Moses di Medina: Son of Samuel (No. 8); lived at Salonica. He is praised for his Talmudic learning and for the generous use which he made of his wealth in the interest of Hebrew literature. He published the responsa of his father and wrote a preface thereto. A list of his published works is given in Steinschneider, "Cat. Bodl." col. 3004 (see also Conforte, *l.c.* p. 43b).

6. Moses Medina: Talmudic scholar; lived at Constantinople, and later (*c.* 1650) at Jerusalem (see Conforte, "Ḳore ha-Dorot," p. 49a; Steinschneider, "Cat. Bodl." *s.v.* "Samuel Medina."

7. Moses Medina: Rabbi of the Portuguese congregation at London; contemporary of David Nieto. He wrote "Della Divina Providencia" (London, 1705), a defense of Nieto's work of the same title and published together with it.

Bibliography: Fürst, *Bibl. Jud.* ii. 339; Steinschneider, *Cat. Bodl.* No. 8910; Wolf, *Bibl. Hebr.* iii., No. 1593b.

8. Samuel b. Moses di Medina (RaShDaM): Talmudist and author; born 1505; died Oct. 12, 1589, at Salonica. He was principal of the Talmudic college of that city, which produced a great number of prominent scholars during the sixteenth and seventeenth centuries. His teachers were the noted Talmudists Joseph Taitazak and Levi ibn Ḥabib, and among his schoolmates were Isaac Adarbi, Joseph ibn Leb, and Moses Almosnino. While on a mission to Constantinople he met the noted grammarian Menahem di Lonsano, who studied under him for some time and who therefore speaks of him as his teacher (Conforte, "Ḳore ha-Dorot," ed. Cassel, p. 44a).

Among Samuel's many disciples who attained prominence were Abraham de Boton and Joseph Ibn Ezra. He had a controversy with Joseph Caro and other rabbis at Safed, against whom he wrote a polemical letter ("Ketab Tokaḥah"; see Azulai, "Shem ha-Gedolim," *s.v.*). A grandson of his was Samuel Ḥayyun, author of "Bene Shemuel," novellæ and responsa (Salonica, 1613?).

Samuel's works include: "Ben Shemuel," Mantua, 1622, thirty sermons on various subjects, published with a preface by his grandson Shemaiah; "Ḥiddushim" (unpublished), novellæ on some Talmudic tractates (Benjacob, "Oẓar ha-Sefarim," p. 183); a collection of 956 responsa in four parts, of which the first two were published during the lifetime of the author (1578-87?) under the title "Piske RaShDaM" (Benjacob, *l.c.* p. 491; Conforte, *l.c.* p. 38a, Cassel's note; Steinschneider, "Cat. Bodl." No. 7056). A complete edition of the last-named work was undertaken later by the author's son Moses, who added a preface (Salonica, 1594-97; new ed. *ib.* 1798).

Bibliography: Steinschneider, *Cat. Bodl.* No. 8909; Zedner, *Cat. Hebr. Books Brit. Mus.* s.v.

9. Shemaiah di Medina: Son of Moses (No. 5); born at Salonica; died at Venice June 3, 1648. Being compelled to leave Salonica owing to a quarrel with certain influential men of that city, he emigrated to Venice, where he occupied a very respected position as a member of the rabbinate. Jacob Frances wrote an elegy on his death.

Shemaiah was the author of many liturgical poems, concerning which see Steinschneider, "Cat. Bodl." *s.v.* He wrote also "Ma'amar al 'Onshe Gehinnom" (unpublished), a treatise on punishment in hell, dedicated to Isaac Aboab, Jr. A commentary on Proverbs (Nepi-Ghirondi, "Toledot Gedole Yisrael," pp. 323, 352, 358) has been ascribed to him, but whether correctly so is doubtful (see Steinschneider, *s.v.*). He also edited "Ben Shemuel," a collection of sermons by his grandfather Samuel, and "Bene Shemuel," the work of his relation Samuel Ḥayyun, to which two books he wrote prefaces.

Bibliography: *Ben Shemuel*, Preface, Mantua, 1622; Benjacob, *Oẓar ha-Sefarim*, pp. 283, 331, 469; Conforte, *Ḳore ha-Dorot*, Index; Steinschneider, *Cat. Bodl.* cols. 2516, 3004; Wolf, *Bibl. Hebr.* iii., Nos. 2195c-2196; Zedner, *Cat. Hebr. Books Brit. Mus.* p. 696.

10. Solomon di Medina: Son of Moses (No. 5); lived at Salonica. He was personally acquainted with David Conforte, who obtained from him some biographical data concerning his grandfather Samuel, and who speaks of him with respect. He was, however, dead when Conforte wrote his "Ḳore ha-Dorot" (1674–83; see Cassel's introduction, p. iv.), as the latter adds to Solomon's name the eulogy נ"ע.

Bibliography: Conforte, *Ḳore ha-Dorot*, p. 38a; Steinschneider, *Cat. Bodl.* col. 3004.

The following Medinas seem to belong to a different family:

Benjamin di Medina: Talmudist; died at Monastir, Turkey, about 1650. He was a pupil of Daniel Estrosa (see Michael, "Or ha-Ḥayyim," No. 789), and schoolmate of David Conforte (see the latter's "Ḳore ha-Dorot," p. 52b).

David di Medina: Rabbi in Cairo about 1650. He wrote an approbation to Mordecai Levi's "Darke No'am," published at Venice in 1697 (see Conforte, *l.c.* p. 52a; Michael, *l.c.* No. 749; Steinschneider, "Cat. Bodl." col. 2451, *s.v.* "Samuel Medina").

Samuel b. Isaac di Medina, a scribe (1491), is mentioned in Neubauer, Cat. Bodl. Hebr. MSS. No. 30, 2542.

D. H. M.

MEDINA, SIR SOLOMON DE: English army contractor about 1711. He was a wealthy Jew who went to England with William III., and who attained some notoriety by his extensive dealings with the English government of his day. "The Jew Medina," as he was popularly called, held a position of prominence in connection with the English forces. During the War of the Spanish Succession (1702–14) he accompanied the Duke of Marlborough on his campaigns, advanced him funds, and furnished provisions for the troops. He also established a system of expresses which outstripped those of the government, so that his agents were in possession of important news before it reached the ministers of the crown. His negotiations were made evident in an attack on the Duke of Marlborough in Parliament in 1711 for receiving from the Jew a yearly payment of £6,000. Marlborough replied that the money had been expended in obtaining trustworthy information. It was said of Medina that every British victory contributed as much to his wealth as to the glory of England. For his services he was knighted, being the first Jew in England to receive that honor. Sir Solomon de Medina was at one time the largest contributor to the Bevis Marks Synagogue, and he remained faithful to his coreligionists to the last. His descendants, however, eventually abandoned Judaism.

MEDINI, ḤAYYIM HEZEKIAH (known also under his initials חמח): Palestinian rabbinical writer; born at Jerusalem 1833; son of Rabbi Raphael Eliahu Medini. At the age of nineteen, on completing his studies in his native city, he received the rabbinical diploma. He then went to Constantinople, where for thirteen years he was a member of a rabbinical court. In 1866 he was called as chief rabbi to Kara-Su-Bazar in the Crimea. In 1889 Medini returned to Palestine, staying first at Jerusalem, and going in 1891 to Hebron, where he has since been acting chief rabbi.

Medini's works include: "Miktab le-Ḥizḳiyahu" (Smyrna, 1865), Talmudic studies and responsa; "Or Li" (*ib.* 1874), responsa; "Paḳḳu'ot Sadeh" (Jerusalem, 1900); "Sede Ḥemed," his chief work, an encyclopedic collection of laws and decisions in alphabetical order, twelve volumes of which have appeared since 1890 (Warsaw).

Bibliography: Nahum Sokolov, in *Sefer ha-Shanah*, Warsaw, 1900.

MEGED YERAḤIM. See Periodicals.

MEGIDDO (מגדו; once **Megiddon** [מגדון, Zech. xii. 11]): Capital of one of the Canaanitish kings conquered by Joshua; assigned to Manasseh (Josh. xii. 21, xvii. 11; I Chron. vii. 29). Its Canaanitish inhabitants were only put to tribute, not driven out (Josh. xvii. 12–13; Judges i. 27–28). Megiddo is repeatedly referred to in Biblical history. It is mentioned in connection with Baana, one of Solomon's commissariat officers, who had to provision the king's household for one month in the year. Its fortifications, which were of ancient date (being mentioned in the inscription of Thothmes III.), were restored by Solomon (I Kings iv. 12, ix. 15). Ahaziah is said (II Kings ix. 27) to have died at Megiddo after he had escaped from Jehu; but in II Chron. xxii. 9 it is said that Ahaziah was found in Samaria, taken to Jehu, and slain. The most memorable occurrence connected with the city was the battle there or in the valley of Megiddo, between Pharaoh-necho and Josiah, in which the latter was slain (II Kings xxiii. 29–30; II Chron. xxxv. 22); "the mourning of Hadadrimmon in the valley of Megiddon" may have been on account of this battle (Zech. xii. 11; see Hadad). The same battle is mentioned by Herodotus (ii. 159), but under the name "Magdolum" instead of "Megiddo." The city is frequently mentioned in connection with Taanach (Josh. xii. 21, xvii. 11; Judges v. 19; I Kings iv. 12; I Chron. vii. 29), near the plain of Esdraelon; the expression in Deborah's song is "in Taanach on the waters of Megiddo."

Megiddo is mentioned on the El-Amarna tablets. Robinson ("Researches," iii. 177–300) identified the site of Megiddo with the modern Al-Lajjun, on the western border of the plain of Esdraelon. Other scholars have identified it with Al-Mujaidil, near Nazareth; with Majdal, near Acre; with Jida; and with Mujaddah, three miles south of Beth-shean.

J. M. Sel.

MEGILLAH: Name of a treatise in the Mishnah and in the Tosefta, as well as in the Babylonian and Jerusalem Talmuds. It is the tenth treatise in the mishnaic order Mo'ed, and includes four chapters, containing thirty-three paragraphs in all. Ch. i. 1–4 treats of the portion of the month Adar in which the Megillah is to be read, and, in case of a leap-year containing two months of Adar, it designates which month is to be chosen. The 15th of Adar, or in a leap-year the same day of the second Adar, is the day appointed for walled cities, and the 14th of Adar for unwalled cities and for villages. The inhabitants of the latter, however, when living in districts where they meet weekly in the neighboring city, may read the roll on the 13th, 12th, or 11th of Adar, if the gathering takes place on one of these days. Since this distinction is made between the two months of Adar of a leap-year, while both months are alike in all other respects, ch. i. 5-11 notes several other groups of objects and cases which differ from one another in one point only; one such group, *e.g.*, consists of the sacred books, the tefillin, and the mezuzah, the first two of which may be written in any language and script, but the last only in Hebrew and in square script. Greek is given the preference over all other foreign languages, since, according to R. Gamaliel, even the sacred books may be written in it.

Ch. ii. deals with the proper manner of reading the Megillah; with the language (mishnah 1), stating that those who do not understand Hebrew may read it in their own tongue; and with the problems whether it shall be read in whole or in part, which portions are to be read (mishnah 3) and at what time of the day. The statement that it may be read during the entire day is supplemented by the enumeration of many other regulations and customs which may be observed throughout the day if they are assigned to the daytime, or throughout the night if assigned to the night (mishnayot 5-6).

Ch. iii. discusses the sale of sacred objects, the synagogue and its furnishings, and the sacredness which still attaches in many respects to the ruins of a synagogue which has been destroyed (mishnayot 1-3). It further discusses the sections which are to be read on the Sabbaths in Adar in addition to the customary weekly sections, and what is to be read on each feast-day (mishnayot 4-6.). From the standpoint of contents this chapter does not belong to the treatise Megillah, being connected with it only by its fourth paragraph.

Interpolations and Digressions.

Ch. iv. begins with certain rules concerning the reading of the Megillah (mishnah 1a); then follow rules referring to other ritual readings from the Law and the Prophets (mishnayot 1b-2). One of these regulations holds that ten persons must be present at each reading; and in this connection many other religious ceremonies are enumerated as requiring the presence of ten persons (mishnah 3). Mishnah 4 defines the relation of the reader to the translator; mishnayot 5-7 determine who may read, who may lead in prayer, and which priest is entitled to lift up his hands for the blessing; mishnah 8 discusses unseemly dress of the prayer-leader and unseemly behavior regarding the tefillin; mishnah 9 enumerates incorrect expressions in prayer, designates the persons who must be silenced in public prayer, and contains various allusions to the views and customs of the sectarians ("minim") of the time; mishnah 10 enumerates the passages in the Torah which may be read but not translated, and the passages in the Prophets which may not be read as hafṭarot.

The sequence of chapters here given is that of the Palestinian Talmud in the manuscript of the Mishnah edited by Lowe, and is also the one found in most of the editions of the Mishnah, in the Tosefta, and in the codices of the Babylonian Talmud at Munich (MS. No. 140) and Oxford (Neubauer, "Cat. Bodl. Hebr. MSS." No. 366). The sequence of chapters in the printed editions of the Babylonian Talmud, on the other hand, corresponds with that of MS. Munich No. 95. Here the chapter cited above as the fourth, "Ha-ḳore et ha-megillah 'omed," precedes the chapter which has been designated as the third, "Bene ha-'ir." R. Hananeel offers a sequence differing from both; making "Ha-ḳore et ha-megillah 'omed" the second chapter, "Ha-ḳore et ha-megillah le-mafrea'" the third, and "Bene ha-'ir" the fourth.

Variations in MS.

The Tosefta to this treatise omits many of the passages contained in the Mishnah, but, on the other hand, it discusses in full detail much that is not found therein. Noteworthy is the enumeration of the passages in the Bible in which a euphemistic word is read instead of an objectionable one (iv. 39), while the condemnation of any translation of the Scriptures is also a striking feature (iv. 41).

Tosefta and Gemara.

The Gemara of the Babylonian Talmud contains in its first chapter, besides explanations of the various mishnayot, many important comments, of which the most interesting are: (1) on the origin of the final letters ך, ם, ן, ף, and ץ (pp. 2b-3a); (2) on the origin of the targumim, that of the Torah being ascribed to the proselyte Onḳelos, and that of the Prophets to Jonathan b. Uzziel (p. 3a; no targum of the Hagiographa seems to have been known at that time); (3) on the origin of Purim, which is said to have been originally merely a local festival at Shushan; the objections raised to its introduction that it might rouse the hatred of the Gentiles against the Jews; the hesitation at including the Book of Esther in the canon, and the reasons why it was finally admitted (p. 7a). The Gemara contains also the legend of the origin of the Septuagint (p. 9a, b). King Ptolemy called together seventy-two elders, assigned each one a separate house, and had them translate the Torah individually and without consultation. All these translations were found to agree absolutely, even to the changes made in certain passages. Pages 10b to 17a of the Gemara form a haggadic midrash to Esther.

The second chapter of the Gemara discusses the several mishnayot, gives an account of the origin of the Shemoneh 'Esreh prayer, and explains the sequence of the several benedictions. In the Gemara on ch. iii. the most noteworthy feature is the remark on the pronunciation of Hebrew current among the inhabitants of Bet-She'on, Bet-Ḥefa, and Tibonin, who confounded "alef" with "'ayin," and "he" with "ḥet." The Gemara to ch. iv. contains, in addition to the notes on the mishnayot, some important regulations regarding public worship. The Gemara of the Palestinian Talmud mentions certain other feast-days in the month of Adar, which were similar to Purim, including the Day of Trajan (טיריון), the 12th, and the Day of Nicanor, the 13th (i. 5). Especially noteworthy is the remark on the origin of square script and on the translation of Aquila (i. 9). The passage in the Palestinian Talmud on Aquila's version compels the assumption that "Onkelos" in the Babylonian Talmud (3a) is merely a corruption of "Aquila," and that the reference in this latter Talmud also is to the Greek and not to the Aramaic translation.

MEGILLAT ANṬEYOKOS. See ANTIOCHUS, SCROLL OF.

MEGILLAT SETARIM ("Concealed Roll"): Name of a roll supposed to have been found in the bet ha-midrash of R. Ḥiyya, and which contained halakot recorded by him. Three passages from it, which are maxims of R. Ise b. Judah, are quoted by Abba Arika in the Talmud (Shab. 6b, 96b; B. M. 92a) with the introductory phrase: "I found a hidden roll in the bet ha-midrash of R. Ḥiyya."

According to Rashi (Shab. 6b), although it was not permissible to record halakot, the scholars were accustomed to write in rolls (which were then hidden) such sentences and maxims of various tannaim as were seldom repeated in the schools, and which were, therefore, liable to be forgotten; and he declares the Megillat Setarim was such a roll. This explanation is not satisfactory, however; for according to it R. Ḥiyya could not have been the only one to make such a roll, and yet no manuscript of this character by any other scholar is mentioned. Moreover, it is not easy to see how Rab could have had access to the scroll if it was kept in concealment merely because it was forbidden to write halakot. Rashi's assumption that the interdiction against recording halakot still existed at the time of R. Ḥiyya is wholly incorrect; for Judah ha-Nasi I. abrogated it by committing the MISHNAH to writing. R. Ḥiyya did not conceal his Megillah, therefore, because it contained halakot, but because of their nature, inasmuch as his roll comprised sentences which Judah ha-Nasi had excluded from his Mishnah, besides additions and emendations to Rabbi's Mishnah most of which were contrary to that author's opinions.

R. Ḥiyya hid his Megillah during Rabbi's lifetime that he might not offend him; but after Rabbi's death this reason no longer existed, and Rab was permitted to see the scroll. This explanation of the origin and contents of the Megillat Setarim is also indicated by its name, "concealed roll," which implies that there were rolls containing halakot which were not kept secret, among them Rabbi's Mishnah collection. This view also invalidates the assumption of Lebrecht ("Handschriften und Erste Ausgaben des Talmuds," p. 10), who, in reading "Megillat Sedarim" instead of "Megillat Setarim," infers that this roll contained the six orders ("sedarim") of the Mishnah.

MEGILLAT TA'ANIT ("Scroll of Fasting"): A chronicle which enumerates thirty-five eventful days on which the Jewish nation either performed glorious deeds or witnessed joyful events. These days were celebrated as feast-days. Public mourning was forbidden on fourteen of them, and public fasting on all. In most of the editions this chronicle consists of two parts, which are distinct in language and in form, namely: (1) the text or the Megillat Ta'anit proper, written in Aramaic and containing merely brief outlines in concise style; (2) scholia or commentaries on the text, written in Hebrew. The days are enumerated, not in the chronological order of the events they commemorate, but in the sequence of the calendar, the Megillat Ta'anit being divided into twelve chapters, corresponding to the months of the year. Each chapter contains the memorial days of a single month, the first chapter dealing with those of the first month, Nisan, and so on to the twelfth chapter, which treats of those of the twelfth month, Adar.

Five Groups of Feasts.

The festal occasions which these days were intended to keep alive in the memory of the people belong to different epochs: and on this basis the days may be divided into five groups, namely: (1) pre-Maccabean; (2) Hasmonean; (3) ante-Sadducean; (4) ante-Roman; and (5) of the Diaspora, the last-named comprising memorial days admitted after the destruction of the Temple. There are also a few days which do not refer to any known historical event, and are, therefore, chronologically uncertain.

These memorial days did not become festivals by being incorporated and recorded in the Megillat Ta'anit, as J. Schmilg has attempted to prove ("Ueber die Entstehung und den Historischen Werth des Siegeskalenders Megillat Ta'anit," pp. 11-20), but had been known and celebrated by the people long before that time, as he himself is obliged to admit in the case of some of them; indeed, the celebration of these festivals or semi-festivals evidently existed as early as the time of Judith (Judith viii. 6). The compilers of the Megillat Ta'anit merely listed the memorial days and at the same time determined that the less important should be celebrated by a mere suspension of fasting, while public mourning was to be forbidden on the more important ones.

Authorship.

In an old baraita (Shab. 13b) the question as to the authorship of the work is answered as follows: "Hananiah b. Hezekiah of the Garon family, together with a number of others who had assembled for a synod at his house, compiled the Megillat Ta'anit." According to an account in the "Halakot Gedolot, Hilkot Soferim" (ed. Vienna, p. 104; ed. Zolkiev, p. 82c), the members of this synod were the "Ziḳne Bet Shammai" and "Ziḳne Bet Hillel," the eldest pupils of Shammai and Hillel. The Megillat Ta'anit must have been composed, therefore, about the year 7 of the common era, when Judea was made a Roman province to the great indignation of the Jews (comp. Schmilg, *l.c.* pp. 20-36). This calendar of victories was intended to fan the spark of liberty among the people and to fill them with confidence and courage by reminding them of the victories of the Maccabees and the divine aid vouchsafed to the Jewish nation against the heathen.

The scholium to Megillat Ta'anit, xii., end, evidently quoting an old baraita, says: "Eleazar b. Hananiah of the family of Garon together with his followers compiled the Megillat Ta'anit." This Eleazar is identical with the Zealot general Eleazar, who took a noteworthy part in the beginning of the revolt against the Romans, vanquishing the garrison at Jerusalem, as well as Agrippa's troops, and Menahem's Sicarian bands. According to this account, therefore, the Megillat Ta'anit was composed by the Zealots after the year 66 of the common era, during the revolution (Grätz, "Gesch." iii., note 26), although it is not necessary to correct the Talmudic account to agree with the scholium, and to read, as does Grätz, in Shab. 13b, "Eleazar b. Hananiah," instead of "Hananiah." On the other hand, the view of Schmilg (*l.c.*) that the scholium is incorrect is erroneous, since there is both internal and external evidence in favor of its authenticity. The account in the Talmud and that in the scholium may both be accepted, since not only Hananiah the father, but also Eleazar the son, contributed to the compilation of the work. Eleazar, one of the central figures in the war against the Romans, endeavored to strengthen the national consciousness of his people by continuing his father's work, and increased the number of memorial days in the collection, to remind the people how God had always helped them and had given them the victory over external and internal enemies.

Interpolations.

Eleazar did not, however, complete the work, and several days were subsequently added to the list which was definitely closed in Usha, as is proved by the fact that the 12th of Adar is designated as "Trajan's Day," and the 29th of that month as "the day on which the persecutions of Hadrian ceased" (comp. Brann in "Monatsschrift," 1876, p. 379). Furthermore, R. Simon b. Gamaliel, who was nasi at Usha, says in the baraita Shab. 13b: "If we should turn all the days on which we have been saved from some danger into holidays, and list them in the Megillat Ta'anit, we could not satisfy ourselves; for we should be obliged to turn nearly every day into a festival" (comp. Rashi *ad loc.*). This sentence clearly indicates that the work was definitely completed at Usha in the time of R. Simon, in order that no further memorial days might be added.

Hebrew Commentary.

The Hebrew commentary on the Megillat Ta'anit was written much later, the author, who did not live earlier than the seventh century, having before him the text of both the Talmudim as well as that of Bereshit Rabbah (comp. Brann, *l.c.* pp. 410-418, 445-451). The commentator collected those baraitot of the Talmud which contained comments on the Megillat Ta'anit, and jumbled them uncritically with accounts from other, unreliable sources. The references of Schmilg's (*l.c.* pp. 36-41) merely prove that the scholiast endeavored to make his work pass for a product of the tannaitic period. As a matter of fact, however, the Talmud knows only the Aramaic text, which alone is meant by the term "Megillat Ta'anit." This text, which had been committed to writing and was generally known ('Er. 62), was explained and interpreted in the same way as the Bible (Yer. Ta'an. ii. 66a). The many quotations from the Megillat Ta'anit in the Talmud are all taken from the Aramaic text and are introduced by the word "ketib" = "it is written," as in Ḥul. 129b; Meg. 5b; Ta'an. 12a and 18b; there is not a single quotation from the scholium. In Ta'an. 12a, the single passage, "bi-Megillat Ta'anit," from which Schmilg tries to prove that the Talmud quotes the scholium as well as the Megillat, is a later addition (comp. Brann, *l.c.* pp. 457 *et seq.*), and is not found in the Munich manuscript (comp. Rabbinowitz, "Ha-Meassef," iii. 63). Although the comments found in the scholium are mentioned in the Talmud, they are not credited to the Megillat Ta'anit, but are quoted as independent baraitot, so that the scholium took them from the Talmud, and not vice versa.

The Text and the Scholium.

As the text and the scholium of the Megillat Ta'anit are distinct in form and in language, so do they differ also in value. The text is an actual historical source, whose statements may be regarded as authentic, while its dates are reliable if interpreted independently of the scholium. The scholium, on the other hand, is of very doubtful historical value and must be used with extreme caution. Although it contains some old baraitot which are reliable, the compiler has mixed them with other, unhistorical, accounts and legends, so that even those data whose legendary character has not been proved can be credited only when they are confirmed by internal and external evidence.

Editions and Commentaries.

The Megillat Ta'anit is extant in many editions, and has had numerous commentaries. The best edition of the Aramaic and Hebrew text is that by A. Neubauer, which is based on the editio princeps and the Amsterdam edition of 1711, compared with the codex De Rossi (Parma MS. 117) and some fragments of a manuscript in the Bodleian Library, Oxford (Neubauer, "M. J. C." ii. 3-25, Oxford, 1895).

Of commentaries the following may be mentioned: Abraham b. Joseph ha-Levi, double commentary (Amsterdam, 1656); Judah b. Menahem, double commentary (Dyhernfurth, 1810); Johann Meyer, Latin translation published in his "Tractatus de Temporibus," etc. (Amsterdam, 1724). Derenbourg and Schwab have made French versions of the Aramaic text.

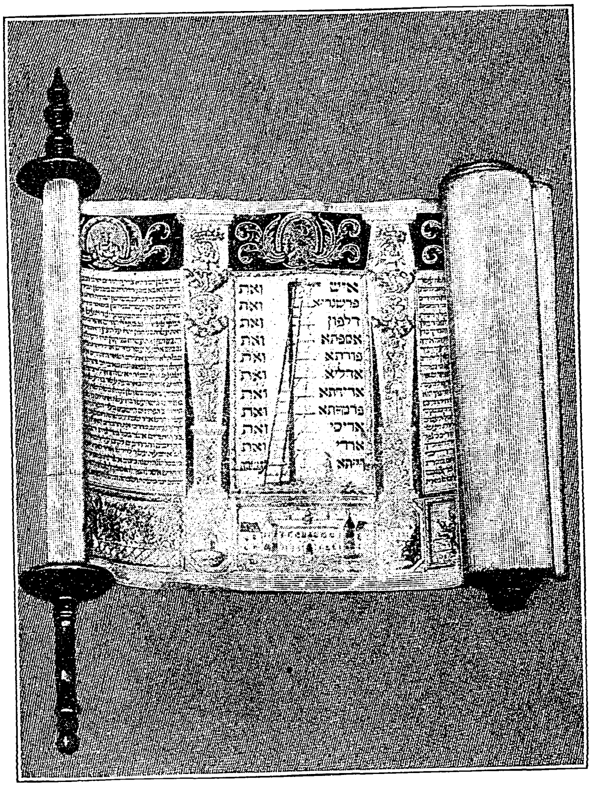
MEGILLAT YUḤASIN (= "Scroll of Genealogies"): A lost work to which several references are made in the Talmud and Mishnah. In Yeb. 49b Ben 'Azzai, in support of a point in law, says: "I found a 'Megillat Yuḥasin' in Jerusalem wherein it was written that . . . is a bastard born of a married woman." On the same page two other citations from the "Megillat Yuḥasin" occur: "The Mishnah of Rabbi Eliezer ben Jacob comprises but a cab, but it is clear"; and "Manasseh killed Isaiah." In Yer.

Ta'an. iv. 2 and in Yeb. ii. the following occurs: "They found a 'Megillat Yuḥasin' in Jerusalem, and therein it is written, 'Hillel was a descendant of David; Yannai, of Eli.'" From these allusions it seems that the "Megillat Yuḥasin" was a record of principal events, of genealogies, and of facts pertaining to the Law, haggadic and halakic. Pes. 62b mentions a "Sefer Yuḥasin," which may be identical with the "Megillat Yuḥasin." It must have been a secret book that was still extant at the beginning of the third century, for R. Johanan bar Nappaḥa refused to teach it to R. Simlai: "We do not teach it to the people of Lydda and Nehardea." Later in the same century it became lost, and Rab laments the fact with the words (Pes. 62b): "Since the 'Sefer Yuḥasin' has been lost the strength of the sages has been weakened and the light of their eyes dimmed."

Rashi says the "Sefer Yuḥasin" was a history, but if it was the same as the "Megillat Yuḥasin," it must have contained laws and family records also. Eliakim Milzahagi, the author of "Sefer Rabiah," proposes the explanation that the "Megillat Yuḥasin" contained genealogies, and the "Sefer Yuḥasin" history and laws, but the exact nature of the work, lost even in Talmudic times, can not now be ascertained.



Megillat Esther, Dutch, Early Eighteenth Century.

E. C.

MEGILLOT, THE FIVE: The "five rolls" (חמש מגלות)—Song of Solomon, Ruth, Lamentations, Ecclesiastes, and Esther. At the time of the formation of the canon of the Hagiographa these five books were not regarded as a unit, nor is the name "Megillah" as applied to them collectively found either in the Talmud or in the Midrash. In the oldest two modes of arrangement of the Hagiographa, the Talmudic and the Masoretic, they do not follow one another, at least in the order in which they stand in the first five editions of the Bible (comp. Jew. Encyc. iii. 144). During the Talmudic period only the Esther roll was called "Megillah," as is shown by the treatise which bears that name; but since the word assumed the meaning of "a small roll," it was applied to the other four books when they were received into the liturgy in post-Talmudic times (Blau, "Althebräisches Buchwesen," pp. 66 *et seq.*). The sequence of the Song of Solomon and of Ecclesiastes, and probably of Esther, in the canon of the Hagiographa did not escape criticism (see Jew. Encyc. iii. 149); and in the earliest arrangement Ecclesiastes seems to have stood at the end of the group (*ib.* 145a).

The oldest sources for the liturgy mention Ruth, Song of Solomon, Lamentations, and Esther, but not Ecclesiastes (Soferim xiv. 3). It is clear from Soferim xiv. 8, where the last-named roll is again ignored, that this is no chance omission. On the other hand, its name is found in the Maḥzor Vitry (p. 440, below): "The entire congregation while seated read the book [ספר, not מגלה] of Ecclesiastes [at the Feast of Tabernacles]." That this custom was of late development is shown by the fact that the entire congregation read—that the book was not read to them. At the time of the Mishnah only Esther was read publicly. In the Talmudic period Lamentations was read privately; while the other three megillot were admitted into the liturgy only in post-Talmudic days, Ecclesiastes being the last of all.

Late Use in Liturgy.

Liturgical usage necessitated manuscripts which should contain not only the Torah and the Haftarot from the Prophets, but also the Five Rolls. For the same reason the so-called Midrash Rabbah was gradually collected for the five Megillot as well as for the Torah. The allusions to the individual feasts which Müller ("Soferim," p. 187) finds in the Haggadah furnish no proof that the rolls in question were read at these particular festivals; for by the same process of reasoning it might be inferred from Yer. Meg., end, that the Song of Solomon instead of Ruth was read on the Feast of Pentecost. But Yalk., Ruth, 994, says: "Why is Ruth read at Pentecost? Because the Torah was given only through suffering." This statement is not found, however, in any of the parallel passages; and it is, therefore, evidently a later addition, and not an ancient midrash. The late origin of this usage ("minhag") is reflected in the discussions of scholars up to the sixteenth century regarding the form of the benediction and other questions (Isserles, "Oraḥ Ḥayyim," p. 490, end; *idem*, Responsa, No. 35). Soferim xiv. 18 states that at the terminations of the festivals the proper rolls were read twice on the two evenings (Song of Solomon at the Passover; Ruth at Pentecost), or on the Sabbath of each demi-festival, the latter being the custom among the people. It is now customary in Jerusalem to write the Five Rolls on parchment like the other Biblical books, and in reading them to pronounce over all the benediction which is generally used in the case of the roll of Esther, making the proper changes (see further on the Song of Solomon at Passover and Ruth at Pentecost, Maḥzor Vitry, ed. Hurwitz, pp. 304, 344).

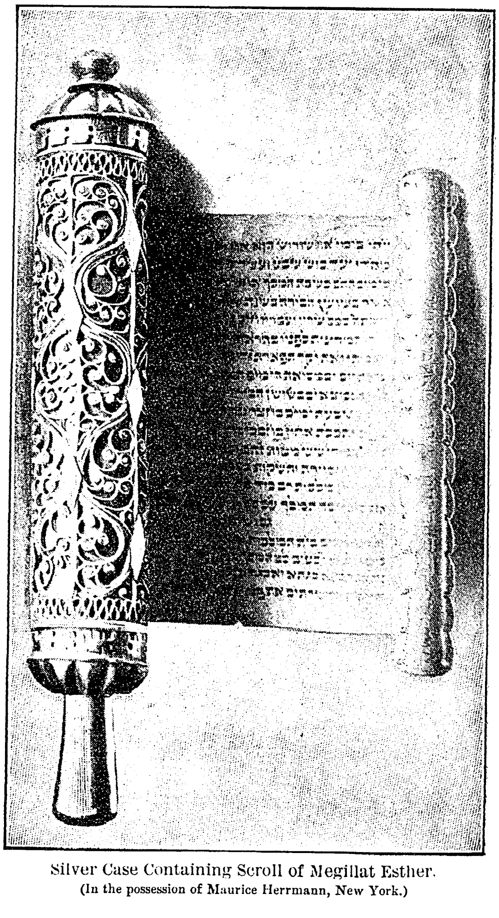
(In the possession of Arthur E. Franklin, London.)

The Roll of Esther.

Although the Feast of Purim was celebrated long before the present era (II Macc. xv. 36; Josephus, "Ant." xi. 6, § 13; comp. John v. 1), it is doubtful when the custom of reading the roll of Esther publicly was introduced; but it was at all events before the destruction of the Temple (Tosef., Meg. i. 6, where Zechariah ben ha-Ḳaẓẓab is quoted). Although the oldest tannaim are not mentioned in the rules for reading Esther, yet the detailed character of these regulations, and the fact that there is a special tractate on them, show that the usage was developed before the common era. On the other hand, the license allowed villagers on the day of reading, the discussions among scholars as to whether one was required to read only from ii. 5 or iii. 1 or iv. 1 (Meg. ii. 3; Tosef., Meg. ii. 9), together with many concessions as compared with the lessons from the Torah (*e.g.*, minors might read; *ib.* ii. 11, iv. 1), and the fact that even in later times large scope was granted to popular custom, justify the conclusion that the origin of the reading of the roll of Esther must not be dated too remotely (Meg. 2a). The custom of reading it in the month of Adar had become general probably by the third century of the common era, and had been sanctioned (Yer. Meg. 70a, 2); but the public reading of the book for those unable to read had apparently been introduced a century before. In the third century (*ib.* 73b, 28) the entire roll was usually read, but only once and in the daytime (Meg. ii. 4, 5), while during the persecution by Hadrian a scribe read it at night (Tosef., Meg. ii. 4). In many places in Palestine it was read on two days (Yer. Sheḳ. 46a, 8). The custom of reading in both the evening and the morning, which now generally prevails, was not established until the post-Talmudic period (Soferim xxi. 8; comp. also Maḥzor Vitry, pp. 207 *et seq.*). The Karaites read the roll at the ends of the two Sabbaths which precede Purim, a reminiscence of the original custom of reading it throughout Adar until the fifteenth. The Megillah was wrapped about a rod (the Maḥzor Vitry mentions two rods); and in the Middle Ages it was often illuminated.



Silver Case Containing Scroll of Megillat Esther.
(In the possession of Maurice Herrmann, New York.)

In the Talmudic period Lamentations formed no part of the service; and, strictly speaking, it has

Lamentations.

never become such. In Ta'an. 30a, below, the baraita states that on the Ninth of Ab the Bible may not be read nor the tradition studied, but that "Job, Lamentations, and the sections of Jeremiah which deal with calamity," may be recited. In post-Talmudic times, however, the custom of reading Lamentations had become general (Soferim xiv. 3). The book was also read responsively (Maḥzor Vitry, p. 226); and in many synagogues, because the Ninth of Ab is a day of mourning, only one light was lit by which it might be read (R. Asher, Ta'an. 9, end). The persecutions of the Crusades strongly influenced the gloom of Tish'ah be-Ab and its liturgy (see Maḥzor Vitry, p. 227, and Oraḥ Ḥayyim, § 554). MEHLSACK, ELIAKIM. See SAMILER, A. G.

MEIER, MORITZ HERMANN EDUARD: German philologist; born at Glogau, Silesia, Jan. 1, 1796; died at Halle Dec. 5, 1855. He was educated at the Graue Kloster in Berlin and at the universities of Breslau and Berlin (Ph.D. 1818). He embraced Christianity in 1817. In 1819 he became privat-docent in the University of Halle; in 1820, assistant professor at Greifswald; and in 1825, professor of ancient philology at Halle.

Of Meier's many works may be mentioned the following: (with Schömann) "Der Attische Process" (Halle, 1827), which received the prize from the Berlin Academy of Sciences; "De Gentilitate Attica," *ib.* 1835; "De Andocidis Oratione Contra Alcibiadem," *ib.* 1836; "De Crantoris Solensis Libro Deperdito," *ib.* 1840; "De Proxenio sive de Publico Græcorum Hospitio," *ib.* 1843; "Fragmentum Lexici Rhetorici," *ib.* 1844; "Die Privatschiedsrichter und die Oeffentlichen Dieten Athens," *ib.* 1846; "De Vita Lycurgi et de Lycurgi Orationum Reliquiis," *ib.* 1847. In 1832 he published (at Halle) an edition of Demosthenes' speech against Midias.

From 1828 Meier was coeditor of the "Allgemeine Litteraturzeitung." He edited also (from 1830 with Kämtz; from 1842 alone) the third section of Ersch and Gruber's "Allgemeine Encyklopädie der Wissenschaften und Künste," and from 1852 also the first section of that work. Eckstein and Haase published in Leipsic (1861-63) a collection of Meier's essays under the title "Opuscula Academica."

ME'ILAH ("Trespass in Regard to a Holy Thing"): Treatise of Seder Ḳodashim in the Mishnah, Tosefta, and the Babylonian Talmud. In the Mishnaic order this treatise is the eighth, and contains six chapters comprising thirty-eight paragraphs in all. It deals chiefly with the exact provisions of the Law (Lev. v. 15-16) concerning the trespass-offering and the reparation which must be made by one who has used and enjoyed a consecrated thing. Its contents may be summarized as follows:

Ch. i.: Sacrifices in which trespass can occur; in what parts: in the most holy sacrifices ("ḳodshe ḳodashim") in all parts and in the partly holy ("ḳodashim ḳallim") in certain parts only. Cases in which trespass can occur and those in which it can not occur. Rule of R. Joshua that if the priests have once had the right to eat of a sacrifice no trespass can take place (§ 1). In this connection the question is raised whether there can be a trespass in the case of those parts of the sacrifice which have been removed from the sanctuary before the sprinkling of the blood (§§ 2-3). Effects of the sprinkling upon the sacrificial animal with regard to trespass (§ 4).

Ch. ii.: The time after which a trespass can take place in the various meat-offerings, the different offerings of food, the Pentecostal bread, and the showbread. Closely allied with this is the determination of the time after which the different sacrifices may be invalidated by certain errors, and the period after which one may become guilty of "piggul" (abomination), "notar" (leaving something over from the sacrifice), and "ṭame" (impurity) in connection with them (§§ 1-9).

In the Mishnah.

Ch. iii.: An enumeration of many things of which one may not partake, although if he does so, he is not guilty of trespass. This leads to a discussion of other regulations concerning certain of these things, as well as of the question whether and in what case one may be guilty of trespass in connection with objects belonging to or found upon certain consecrated things, such as grass in a consecrated field, the fruit of a consecrated tree (§ 6), and the foliage in a consecrated wood (§ 8).

Ch. iv.: The combination of various sacrifices in reckoning the minimum amount necessary to be used in order to constitute trespass (§§ 1-2). In this connection many more kinds of combinations are given with relation to other legal and ritual questions.

Ch. v.: Determination of a peruṭa, the smallest coin, as the minimum value which the use of holy objects must have to make one guilty of trespass. Discussion of the question whether the use made of a consecrated object must be worth a peruṭa or whether the amount of the object consumed by this usage must equal a peruṭa; in connection with which a distinction is made between different objects (§ 1). The commission of trespass by various persons successively upon the same object.

Ch. vi.: Cases in which the trespass has been committed by proxy. The principle is laid down that if the agent has acted precisely in accordance with his orders, the person who gave such orders is guilty of the trespass; but if the agent has not so acted, he himself is guilty of the trespass. Enumeration of different examples (§§ 1-5). Cases in which neither of the two is guilty of trespass and instances in which both trespass (§ 4).

In the Tosefta and Gemara.

In the Tosefta, Me'ilah is the seventh treatise and has but three chapters. These, however, contain all that is in the six chapters of the Mishnah, with a few omissions and amplifications.

The Gemara to this treatise is devoted almost exclusively to elucidations of the mishnayot, there being only one haggadah in the treatise, bearing on the story of BEN TEMALION.

There is no gemara of the Jerusalem Talmud to this treatise, nor in fact to any treatise of the order Ḳodashim (comp. Buber, "Die Angebliche Existenz eines Jerusal. Talmud zur Ordnung Kodaschim," in Berliner's "Magazin," 1878, pp. 100–105).

S. S. J. Z. L.

MEINEK, MOSES SÄKEL (called also **Moses Isaac ben Baruch of Redwitz**): German scholar and editor; lived at Offenbach at the beginning of the eighteenth century. He published in 1715, under his own name, Naphtali Pappenheim's "Teutsche Apothek," and in 1717 a riddle in Judæo-German verse composed by an anonymous author. This riddle was reproduced, with a German transcription, by Schudt in his "Jüdische Merckwürdigkeiten" (iv., continuation iii. 108–109), Schudt referring to Meinek as a printer. In 1722 Meinek edited the anonymous "Siyyumah ha-Parashiyyot meha-Torah," a guide for the reader of the Law. He was probably himself the author.

J. M. Sel.

MEÏR (MEÏR BA'AL HA-NES = "Meïr the miracle-worker"): Tanna of the second century (fourth generation); born in Asia Minor. The origin of this remarkable scholar, one of the most striking figures of his age, is wrapped in obscurity. According to a haggadah, he was a descendant of Nero, who, says a Jewish legend, escaped death at the time of his deposition and became subsequently a convert to Judaism (Giṭ. 56a). The mystery of Meïr's origin extends to his name, for according to the Talmud the name "Meïr" (= "one who enlightens") was given to him because he instructed the wise in the Law ('Er. 13b); as to his original name, the Babylonian Talmud (*l.c.*) gives it as "Me'asha," but the Jerusalem Talmud seems not to know it. Sometimes he is called "Nehorai," the Aramaic equivalent of "Meïr." Meïr began to study very early in life. At first he entered the school of Akiba, but, finding himself not sufficiently prepared to grasp the lectures of that great master, he went to the school of Ishmael, where he acquired an extensive knowledge of the Law. He then returned to Akiba, who, recognizing his dialectical powers, ordained him over the heads of his other disciples ('Er. *l.c.*). This ordination, which was considered invalid on account of Meïr's youth, was confirmed by Judah ben Baba (Sanh. 14a; see Rashi *ad loc.*).

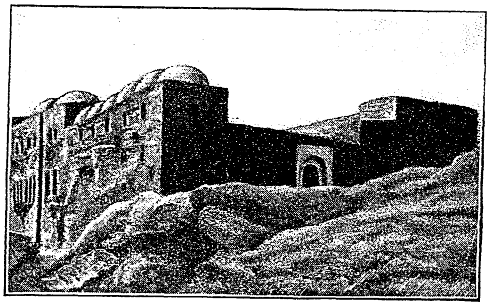
Ordained in Youth.

Unlike his master Akiba, Meïr seems to have kept aloof from the revolutionary movement of Bar Kokba. Nevertheless he suffered greatly from its consequences. His father-in-law, Hananiah ben Teradion, fell a martyr to the Hadrianic persecutions, and his sister-in-law was taken to Rome and sold to a keeper of a house of ill fame. A tale of her rescue by Meïr, though embellished with legend, may have a foundation in fact. Urged by his wife to attempt the rescue of her sister, who, she asserted, would rather forfeit her life than her virtue, Meïr journeyed to Rome. Attired as a wealthy Roman, he went to the house to which she had been taken, and asked to see her. "She is very beautiful," said the keeper, "but no man has as yet gained her favor." Overjoyed, Meïr offered him a large sum of money to permit her to be carried off. The keeper hesitated, fearing that it might cost him his head. "Fear not," said the rabbi; "when danger threatens thee say, 'Meïr's God, help me!'" Still the man hesitated. To convince him of the efficacy of his advice, Meïr approached a number of savage watch-dogs at the gate and by a mystic word made them cringe at his feet. His fears allayed, the keeper yielded ('Ab. Zarah 18a; Eccl. R. vii. 12).

At Usha.

During the Hadrianic persecutions Meïr lived abroad, but he returned to Judea after the repeal of the oppressive edicts, and took a prominent part in the reestablishment of the Sanhedrin in the city of Usha. Shortly afterward Simeon ben Gamaliel II. was elected patriarch, and Meïr was raised to the dignity of ḥakam, in which office he was charged with the duty of preparing the subjects to be discussed in the Sanhedrin. To his activity and influence was due the adoption of the laws known as the "Institutions of Usha." To his duties in connection with the Sanhedrin Meïr added the establishment of academies of his own in Bethsan, Ammaus near Tiberias, etc., where he successively lived and lectured. A wonderful feat of memory displayed by him on one of his travels is mentioned in the Talmud. On the eve of the Feast of Purim, Meïr found himself in a small Jewish community where no copy of the Book of Esther could be found; he thereupon wrote out the book from memory without a mistake (Tosef., Megillah, ii.).

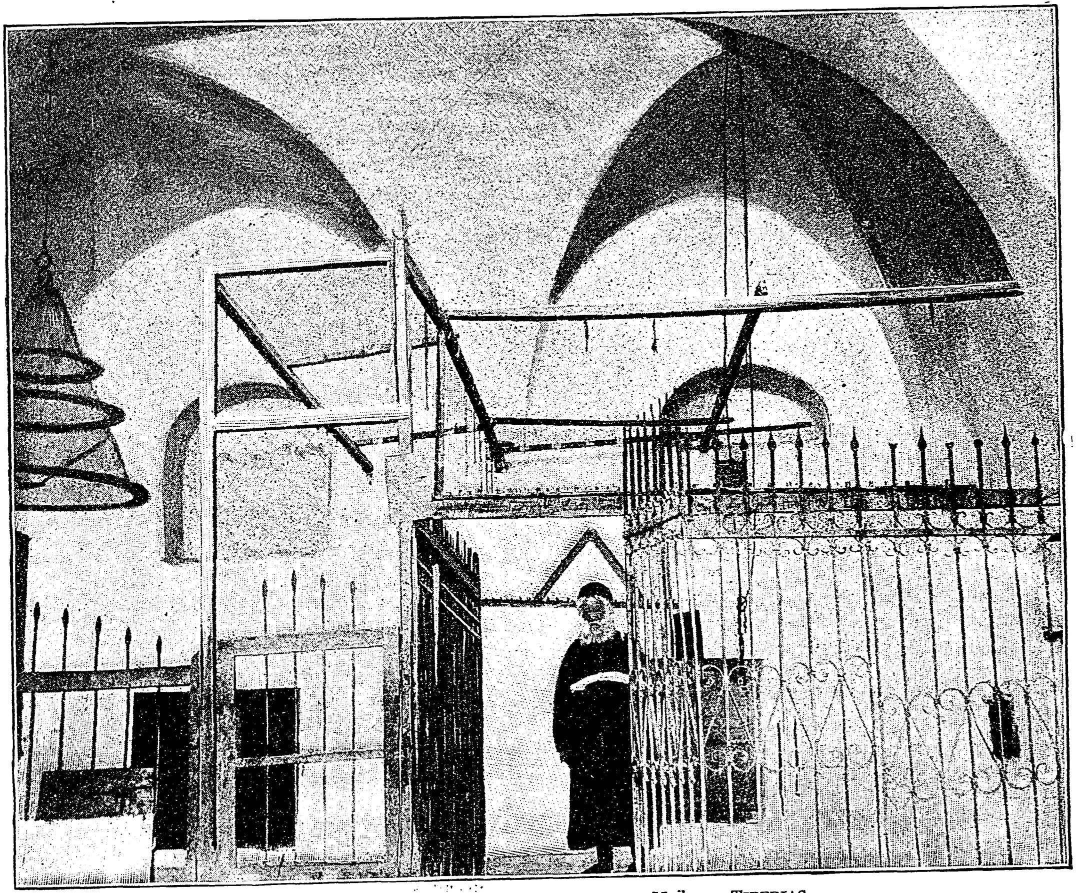
Meïr infused new life into the development of the Halakah. He introduced the rule of testing the validity of a halakah on rational grounds. The dialectical power displayed by him in halakic discussion was so great that most of his hearers followed him with difficulty. "He was able," says the Talmud, "to give a hundred and fifty reasons to prove a thing legally clean, and as many more reasons to prove it unclean" ('Er. 13b). This excess of dialectics is given in the Talmud as the only reason why his halakot did not receive the force of law; the *pros* and *cons* offered by him were so nearly equal in strength that one never knew his real opinion on a subject. In the deduction of new halakot from the Biblical text Meïr used with great caution the hermeneutic rules established by his teacher Ishmael, regarding them as unreliable; and he rejected Aki-



Synagogue at the Alleged Tomb of Rabbi Meïr at Tiberias.
(From a photograph.)

ba's method of deducing a new halakah from a seemingly superfluous particle in the Scriptural text (Soṭah 17a; Sifre, Balaḳ, 131). Meïr's greatest merit in the field of the Halakah was that he continued the labors of Akiba in arranging the rich material of the oral law according to subjects, thus paving the way for the compilation of the Mishnah by Judah ha-Nasi.

Meïr's haggadot won by far the greater popularity; in this direction he was among the foremost. place with the traditional sayings of the Fathers are these: "Have little business, and be busied in the Torah"; "Be lowly in spirit to every man"; "If thou idlest from the Torah, thou wilt have many idlers against thee"; "If thou laborest in the Torah, He hath much to give unto thee" (Ab. iv. 14). Other maxims of his, on study and the fear of the Lord, have been transmitted by Johanan: "Learn the ways of the Lord with thy whole heart and with thy whole soul"; "Watch at the gates of the Law"; "Keep the Law in thy heart"; "Let the fear of the Lord be always before thine eyes and keep thy tongue from evil words"; "Cleanse and make thyself pure that thou mayest stand without sin before the Lord, and He will be with thee" (Ber. 17a).



INTERIOR OF THE ALLEGED TOMB OF RABBI MEÏR AT TIBERIAS.
(From a photograph by Elkan N. Adler, London.)

Well versed in the Greek and Latin literatures, he would quote in his haggadic lectures fables, parables, and maxims which captivated his hearers. To popularize the Haggadah he wrote haggadic glosses on the margin of his Bible and composed midrashim. Both glosses and midrashim are no longer in existence, but they are quoted in the midrashic literature, the former under the title "Torah shel [illegible] [illegible]" or "Sifra shel Rabbi Meïr," and the la[illegible] [illegible] [illegible]calogue, under the title "Midrash Anok[illegible] [illegible] Meïr" (Gen. R. ix. 5). To Meïr is attrib[illegible] [illegible] collection of three hundred fables, three of [illegible] are referred to in the Talmud (Sanh. 38b; see ÆSOP'S FABLES AMONG THE JEWS). Among those of Meïr's ma[illegible] [illegible] have found a

His Haggadah.

An instance of Meïr's humility and love of peace is related in the Midrash. Among his hearers was a woman who never missed a lecture of his. Once, the discourse being more prolonged than usual, the woman returned home late in the evening. This infuriated her husband, who turned her out-of-doors and swore that he would not take her in until she had spat in Meïr's face. Refusing to do this, she lived separated from her husband. When Meïr was informed of the incident he went to the woman and, pretending to have a sore eye, requested her to spit in it to heal it (Lev. R., Deut. R.). Meïr was noted for his hatred of ignorance. "He that gives his daughter to an 'am ha-areẓ is as though he put her before a lion" (Pes. 56a). "He who leaves an 'am ha-areẓ in his house asleep and returns to find him awake may be sure the house has been polluted" (Ṭoh. 8a). Still he would rise before an old man, even if he were an 'am ha-areẓ (Yer. Bik. 65c).

Hatred of Ignorance.

Meïr's experience of the world was wide and varied, and the Haggadah records several of his social maxims: "Love the friend who admonishes thee and hate the one who flatters thee; for the former leads thee to life and the future world, while the latter puts thee out of the world." "Conciliate not thy friend in the hour of his passion; console him not when his dead is laid out before him; question him not in the hour of his vow; and strive to see him not in the hour of his disgrace" (Ab. R. N. xxix.; comp. *ib.* xxxvi. and Ab. iv. 18, where these maxims are given in the name of Simeon ben Eliezer). Meïr was fond of discoursing upon traveling. "When thou art in Rome do as the Romans do" (Gen. R. xlviii.). "Travelers should go in threes, for a single traveler is likely to be murdered; two are likely to quarrel; but three will always make their way in peace" (Eccl. R. iv.). Meïr exalts work and recommends parents to instruct their children in a clean trade (Ḳid. 82a). "He who does not work on week-days will end by being compelled to work even on Sabbaths; for idleness leads to misery, and misery to crime; and once a prisoner, the idler will be forced to labor even on the Sabbath" (Ab. R. N. xxi.). "It is not the trade followed but the merit of the workman which makes him rich or poor" (Ḳid. *l.c.*). Those who run after riches are reproved by Meïr in the following saying: "Man comes into the world with closed hands as though claiming ownership of everything; but he leaves it with hands open and limp, as if to show that he takes nothing with him. Yet if man has sought the best course in life, his reward awaits him beyond the grave; there he finds the table set for a feast of joy that will last through eternity" (Eccl. R. i.).

Maxims and Views.

Meïr's generosity and confidence in God are illustrated by the following details of his private life given in the Midrash (Eccl. R. ii. 18). By successfully following the calling of public scribe he earned three shekels a week. Of these two were spent on his household and one was given to poor fellow students. When asked why he did not save something for his children he answered, "If my children are good the Lord will provide for them, for it is said, 'I was young and I am old, yet I have never seen the righteous forsaken nor his seed demanding bread' [Ps. xxxvii. 25]. If my children are not good they deserve nothing, and it would be aiding the enemies of the Lord if I left them wealth." With all his piety, Meïr showed a spirit of great tolerance. He declared that a heathen who occupied himself with the Torah was as worthy of Judaism as a high priest, for it is said, "Ye shall therefore keep my statutes . . . which if a man do, he shall live in them" (Lev. xviii. 5). He explained this to mean that eternal happiness was not the heritage of the Jews exclusively (Sifra to Lev. *l.c.*). Thus Meïr is said to have lived on friendly terms with heathen scholars, with whom he had religious controversies; he was especially intimate with the Greek philosopher Euonymus of Gedara, to whom he paid a visit of condolence on the death of the latter's parents (Gen. R. lxv.; Lam. R., proem, 2).

Meïr's tolerance, however, is best shown by his attitude toward the apostate Elisha ben Abuyah (Aḥer), his teacher. Of all Elisha's colleagues he alone, perhaps in the hope of reclaiming him for Judaism, continued to associate with him and discuss with him scientific subjects, not heeding the remonstrances of some pious rabbis who regarded this association with some suspicion. Meïr's attachment for Elisha was so great that on the death of the latter he is said to have spread his mantle over his friend's grave. Thereupon, according to a legend, a pillar of smoke arose from it, and Meïr, paraphrasing Ruth iii. 13, exclaimed, "Rest here in the night; in the dawn of happiness the God of mercy will deliver thee; if not, I will be thy redeemer" (Ḥag. 15b). The same haggadah adds that at the death of Meïr smoke ceased to issue from Elisha's grave. Notwithstanding his tolerance, Meïr's treatment of the Samaritans was very severe; and he enacted several laws that were destined to widen the breach between them and the main body of Judaism (Ḥul. 6a). The Midrash (Gen. R. xv.; Pesiḳ. R. 23) reports several religious controversies between Meïr and Samaritan scholars concerning creation, resurrection, and similar subjects.

Relations with Aḥer.

The later part of Meïr's life was saddened by many misfortunes. In one day he lost two promising sons, who died suddenly on a Sabbath while he was at the house of study. A story is related in a midrash (quoted in Yalḳ., Prov. 964) of the fortitude shown on that occasion by Meïr's learned wife, Beruriah. Controlling her feelings, she withheld the knowledge of their death from her husband during the Sabbath in order that the day should not be profaned by weeping and lamentation, and on the conclusion of the Sabbath sought to console her husband with a parable. Shortly after the death of his sons Meïr lost his wife. According to a legend, she committed suicide after having been dishonored by one of her husband's pupils (Rashi to 'Ab. Zarah 18a).

Opposes the Patriarch.

The last years of Meïr's life were passed in Asia Minor. He was induced to leave Palestine because of the conflict that arose between him and the patriarch. The origin of this conflict was the change introduced by Simeon in the ceremonial of the Sanhedrin. Custom required its members to rise when the president, the judge, or the reader entered the academy. Simeon, having an exaggerated idea of his dignity, issued an order that the assembly should rise as a body onl[illegible] own entrance, while on the entrance of [illegible] only the first row, and on that of the rea[illegible] second row, should rise. Meïr and Nath[illegible]) felt justly offended at this new arrang[illegible] determined to show Simeon's unfitness for [illegible] office by puzzling him with difficult halakic questions which he would be una[illegible] answer. Informed of this conspiracy, Simeon expelled them from the Sanhedrin, but he could not prevent them from writing difficult questions and distributing them among its members. Compelled to readmit both Nathan and Meïr, he contrived that their names should not be recorded in the ordinances enacted by him. Nathan submitted, but Meïr continued to embarrass the patriarch by addressing to him difficult questions. When, at last, the patriarch threatened excommunication, he answered, "I do not care for your sentence unless you can prove to me on whom, on what grounds, and under what conditions excommunication may be imposed," and left the Sanhedrin (Yer. M. Ḳ. iii. 81a).

Meïr died somewhere in Asia Minor. "Bury me," said he to his pupils, "by the shore, that the sea which washes the land of my fathers may touch also my bones" (Yer. Kil., end). Though during life Meïr had many adversaries, after his death the tribute paid to his virtue and greatness was universal. "He opened the eyes even of the wise in the Law" is said of him in the Talmud ('Er. 13b). An amora said: "The Creator of the world knows that Meïr had not his equal in his time" (*ib.*). R. Jose, in pronouncing Meïr's funeral sermon at Sepphoris said: "He was a great man and a saint, and was humble withal" (Yer. Ber. ii. 56b). Of all the Tannaim, Meïr's name is most widely known among the people. In the house of every pious Jew there is a money-box hung on the wall in which the inmates deposit their alms for the poor of Palestine; this box is called "Meïr Ba'al ha-Nes Pushke."

MEÏR (MAESTRO BENDIG) OF ARLES. See Bendig, Meïr.

MEÏR BEN BARUCH HA-LEVI: Rabbi at Vienna from 1360 to 1390; a native of Fulda (Isserlein, "Terumat ha-Deshen," No. 81). His authority was acknowledged not only throughout Germany, but even by the Spanish rabbis (Isaac b. Sheshet, Responsa, No. 278). He acquired great celebrity through his introduction into Germany of the rabbinical system of ordination. Owing to persecutions, the number of competent rabbis had decreased, and persons unqualified were inducted into rabbinates. To prevent this Meïr issued an order to the effect that no Talmudical student should officiate as rabbi unless he had been ordained and had acquired the title of "morenu" (Isaac b. Sheshet, *l.c.* Nos. 268–272). At first the order provoked the opposition of many rabbis, who accused Meïr of a desire to rule, but they afterward accepted it. Later Meïr assumed authority over the French rabbis, and sent t[illegible] Isaiah b. Abba Mari with authority to ap[illegible] rabbis there.

Alth[illegible] Meïr left no work, it appears from Jacob Mölln, who frequently mentions him in his "Minhagim," that he collaborated with his contemporaries Abraham Klausner and Shalom of Neustadt in the compilation of a work on ritual customs. Two "teḥinnot" for the 10th of Adar and the 23d of Iyyar respectively are ascribed to Meïr.

D. M. Sel.

MEÏR OF CLISSON: French Talmudist of the first half of the thirteenth century. He is mentioned in an extract from "Pa'neaḥ Raza" (MS. Halberstam) on Gen. ii. 23 as a Bible commentator. Gross takes him to be identical with Meïr ben Baruch, who emigrated to Jerusalem in 1211 together with his brother the tosafist Joseph of Clisson and many other French rabbis.

Bibliography: Gross, in *R. E. J.* vi. 128; idem, *Gallia Judaica*, p. 596.

S. S. A. Pe.

MEÏR B. DAVID: Grammarian of the last third of the thirteenth century. He wrote, under the title "Hassagat ha-Hassagah," a criticism of Ibn Janaḥ's "Kitab al-Mustalḥaḳ." Meïr's work is known, however, only through passages quoted by Profiat Duran ("Ma'aseh Efod," pp. 116, 173). Joseph ibn Kaspi, who knew Meïr b. David personally, quotes, in his supercommentary on Ibn Ezra, an explanation which he heard from Meïr's lips (see Dukes, "Naḥal Ḳedumim," p. 9). Meïr is probably identical with the grammarian R. David, whose note on Job vii. 4 is quoted by Abraham Bedersi in his work on synonyms, "Ḥotam Toknit" (p. 189; comp. Introduction, p. x.).

T. W. B.

MEÏR BEN ELEAZAR (known also as **Meïr Lombard** [לונבורט, למברט] **ha-Darshan**)**:** French liturgical poet of the first half of the thirteenth century. He wrote: (1) a series of poems to be recited on the seventh evening of Passover, some of which are arranged in alphabetical order; (2) a dirge beginning "Ẓiyyon ẓefirat pe'er," giving at the end in an acrostic "Meïr Ḥazaḳ"; (3) an alphabetical introduction to the Targum of Ex. xiii. 21, a passage which is read on the seventh day of Passover. The last-named poem is composed of six strophes, of four verses each, beginning with "It ḥazuta we-dugma." According to Landshuth ("'Ammude ha-'Abodah," p. 159), Meïr was the author of the dirge beginning "Aḥbirah millin," which is recited on the Ninth of Ab; but Zunz ("Literaturgesch." p. 360; Supplement, p. 38) ascribes it to Meïr of Rothenburg (comp. *ib.* p. 469).

G. M. Sel.

MEÏR BEN ELIAKIM: German liturgist; probably lived at Posen toward the end of the seventeenth century; author of "Meïr Elohim" (n.p., n.d.), a collection of Biblical passages to be recited on entering the synagogue, and ethical directions for prayer. Meïr says in this work that he wrote two "Menorot" containing collections of prayers, and Steinschneider thinks that the "Menorah" printed at Prague in 1696 may be one of them.

MEÏR BEN ELIJAH OF NORWICH: English poet; flourished about 1260 at Norwich. One long elegiac poem and fifteen smaller ones by him are found in a Vatican manuscript, from which they were published by A. Berliner (London, 1887). It is possible that Meïr was a son of Elias Levesque (Jacobs and Wolf, "Bibl. Anglo-Jud." No. 102; A. Berliner, in "Hebräische Poesien von Meïr ben Eliah aus Norwich," Introduction). J.

MEÏR (MOSES MEÏR) B. EPHRAIM OF PADUA: Scribe and printer at Mantua; died in Nov., 1583. After practising various professions he settled in Mantua as a scribe. He was well versed in Talmud, and was a friend of Moses Provençal. There were forty-three of his scrolls among the Italian communities, the first being completed Oct. 23, 1541; the last was begun April 5, 1582. His standard scroll, which served as a model for his other work, was used by the community of Mantua, where it is still preserved. It contains a long colophon, in which all who gave him commissions and the dates of the completion of his scrolls are mentioned. For a time he wrote tefillin also. His method of writing gave rise to a learned controversy among the Italian rabbis, which was finally decided in his favor by R. Meïr KATZENELLENBOGEN. He was the author of a treatise on the "Taggin," and was likewise active as a teacher of the Bible, his system of instruction being praised by Abraham Portaleone. In 1556 he founded a printing establishment at Mantua, which was continued after his death, doing good service at a time when the Inquisition was active and Hebrew books were interdicted. He published, among other works, the first edition of the Zohar (1558–60), the Mishnah, the Shulḥan 'Aruk, Dei Rossi's "Me'or 'Enayim," the "Mishneh Torah," and the Talmudic treatises, all these being issued in handy volumes.

MEÏR B. GEDALIAH OF LUBLIN. See LUBLIN, MEÏR B. GEDALIAH.

MEÏR BEN ISAAC OF ORLEANS: French liturgical poet and, possibly, Biblical commentator of the end of the eleventh century. Meïr and his son **Eleazar** are quoted in the commentary to I Chron. (xxix. 11) wrongly ascribed to Rashi. He composed several piyyuṭim, the best known of which are "Torah ha-Temimah" (a supplication interspersed with many Aramaic and Talmudic words and having the general rime in מה, and in which he expresses his horror of apostasy) and "Almanot Ḥayyot," a seliḥah for Yom Kippur. Both piyyuṭim are signed מאיר בר יצחק חזק and are acrostics containing the name "Eleazar." The second piyyuṭ was translated into German by Zunz ("S. P." p. 184). There is a seliḥah beginning "Mi yodea' yashub," referring to a massacre of 3,000 Jews by the Crusaders, which, though it is signed מאיר בר יצחק חזן and is an acrostic containing the name "Eleazar," is supposed by Zunz to have been composed a century later.

MEÏR B. ISAAC OF TRINQUETAILLE: French scholar of the twelfth century; a member of the family of Menahem Meïri of Perpignan. He was a native of Carcassonne, whence his father took him to Provence, where he soon became one of the most distinguished pupils of Abraham David (RaBaD) of Posquières. After settling at Trinquetaille, a suburb of Arles, he composed the following two works: "Sefer ha-'Ezer," a defense of Alfasi against the attacks of Zerahiah b. Isaac ha-Levi Gerondi; "Ḥibbur ha-Muḳẓeh," a treatise enumerating all the things that may not be touched on Sabbaths and feast-days.

J. S. K.

MEÏR IBN JAIR: Italian (?) Talmudist and grammarian of the sixteenth century. His family name seems to have been "Meïri"; for he is always mentioned under the name of "Meïr le-Bet Meïr" (= "Meïr of the house of Meïr"). He is called "Ibn Jair" because ן״יאיר is written after his name in the manuscript sources; it may, however, be an equivalent of "Meïr" or may mean "May his light continue." Meïr was the author of: "Yaïr Natib," or, according to Nepi-Ghirondi ("Toledot Gedole Yisrael," p. 255), "Meïr Natib" (Sabbionetta, 1553), a treatise on the law concerning the slaughtering of animals, frequently quoted by Ḥayyim Benveniste in his "Keneset ha-Gedolah"; a treatise on the eight conjugations in Hebrew grammar, under the title "Simane kol Shemonah Binyanim" (*ib.* 1554), a work which was afterward revised by the author and published under the title of "Diḳduḳ" (*ib.* 1597).

MEÏR BEN JOSEPH BEN MERWAN HA-LEVI: French scholar; flourished at Narbonne in the twelfth century; brother of the nasi R. Moses ben Joseph ben Merwan, and pupil of Isaac ben Merwan, head of the Narbonne academy in the early part of the twelfth century. He was held in great respect and associated with Abraham ben Isaac, ab bet din, who presided over the rabbinical college of Narbonne about 1165. According to the conjecture of Gross ("Gallia Judaica," p. 414), Meïr ben Joseph is identical with Meïr ben Jacob, who is mentioned, with the rabbinical scholars Todros ben Moses, Abraham ben Isaac, Moses ben Joseph Meshullam ben Nathan, and Moses ben Todros, at the end of a rabbinical responsum dated at Narbonne in the middle of the twelfth century.

BIBLIOGRAPHY: Abraham ben David, *Sefer ha-Kabbalah*; *Ahimaaz Chronicle*, p. 84; *Temim De'im*, p. 122; *Kol Bo*, No. 120; Benjamin Auerbach, Introduction to the *Sefer ha-Eshkol*, p. viii.

G. S. K.

MEÏR KADOSH (MEÏR BEN JEHIEL BRODA): Moravian Talmudist; born at Ungarisch-Brod in 1593. He is known for his "Megillat R. Meïr" (Cracow, 1632), in which he narrates an adventure which happened to him when he was fifteen years old, and on account of which he acquired the epithet "Kadosh" (= "saint" or "martyr"). In 1608 he left his native town with eight other students in order to attend a yeshibah in Poland. On the way he was kidnaped by the waywode of Auspitz, who kept him in prison for fifteen weeks, and endeavored to torture him into accepting Christianity. Meïr remained firm, and was finally ransomed by the Jews of Cracow and placed in the yeshibah of Moses Meisels.

D. M. SEL.

MEÏR HA-KOHEN: French scholar of the thirteenth century; born at Narbonne; died at Toledo, Spain, whither he had emigrated in 1263 (Israeli, "Yesod 'Olam," ii. 35, ed. Berlin, 1846). Meïr occupied himself particularly with the study of the Masorah; and, according to Menahem Meïri ("Kiryat Sefer"), he was one of the five rabbis who, by comparing a great number of manuscripts, endeavored to establish a correctly revised Pentateuch for France and Germany.

Meïr's identity has been frequently mistaken: Bartolocci ("Bibl. Rab. Magna," iv. 20) identifies him with the author of the "Haggahot Maimuniyyot," a German scholar of the end of the thirteenth century; Zunz ("Literaturgesch." p. 283), confounding him with Moses ha-Kohen of Lunel, attributes to him the "Hassagot," or strictures on Maimonides; while Carmoly ("Ha-Karmel," vii. 58) identifies him with Meïr Zarfati, the supposed author of a poem against the "Moreh," beginning with the words "Anshe minut" (comp. Steinschneider, "Hebr. Bibl." xiii.). It may be added that S. Sachs ("Cat. of the Günzburg Library," p. 46) attributes to Meïr ha-Kohen the "Sefer ha-Me'orot," which in reality is the work of Meïr b. Simeon.

MEÏR BEN LEVI: Austrian Talmudist and Biblical commentator of the beginning of the eighteenth century; a native of Zolkiev. Under the title "Likkute Shoshannim" (Jessnitz, 1722), he compiled the comments and novellæ of the Geonim on the Pentateuch and arranged them in the order of the weekly lessons. Meïr afterward revised the work, and, having added thereto notes of his own, published it under the new title "Miksheh Zahab." From the preface to the second edition (Frankfort-on-the-Oder, 1733), the first edition seems to have been printed at Zolkiev (n.d.).

MEÏR OF OSTROWO. See MARGOLIOTH, MEÏR B. ZEBI HIRSCH.

MEÏR OF ROTHENBURG (MEÏR B. BARUCH; frequently called in brief מור"ם מרוטנבורג or מוה"רם מרוט'): German tosafist, codifier, and liturgical poet; born at Worms about 1215; died in the fortress of Ensisheim, Alsace, May 2 (April 27 old style), 1293. He belonged to a family which was noted for its scholars; and in his responsa he designates about a dozen Talmudic authorities of his time as his relatives. The epitaph, still extant, of his father, who died (1275) at a very advanced age, praises the latter's extraordinary piety, eminent scholarship, brilliant gift of oratory, and great popularity. It may be assumed, therefore, that Meïr received his earliest instruction from his father, though his first teacher proper was Isaac b. Moses of Vienna, under whom, as well as under Samuel b. Menahem, he studied at Würzburg. Meïr studied at the French yeshibot also, his teachers there being Jehiel b. Joseph of Paris, Samuel b. Solomon of Falaise, and Samuel of Evreux. On his return to Germany he quickly gathered around him a band of devoted pupils, including many married men, who left their families for a time in order to listen to so brilliant a teacher.

It is difficult to determine Meïr's actual official position among the German rabbis of his time. Modern historians maintain that he was chief rabbi of Germany, elected by the communities and confirmed by Emperor Rudolph. It is very doubtful, however, whether at this time the office of chief rabbi existed in Germany; and even if it did, there is nothing to prove that Meïr occupied it. The designations "Chief" (Responsa, ed. Prague, No. 946), "Father of Rabbis," etc., merely indicate that on account of his great scholarship he was everywhere recognized as the spiritual leader, whose decrees and institutions were considered as authoritative. As far as is known, he officiated as rabbi in the following communities: Kostnitz, Augsburg, Würzburg, Rothenburg, Worms, Nuremberg, and Mayence. This order of enumeration is probably chronological; but nothing is known of Meïr's terms of office in the different cities. As he is generally called Meïr "of Rothenburg" (Rothenburg-on-the-Tauber), he probably stayed longest in that city. Meïr was well-to-do, perhaps rich; for, according to his own account, he had in his house at Rothenburg separate apartments for winter and summer, with an airy dining-room, and separate rooms for each of his pupils.

Meïr's decisions in questions of taxation regulated the financial conditions of the Jewish communities of Germany. Thus he decided that no member of a community should be permitted to negotiate with the authorities in matters of taxation, as this might be detrimental to the community (*ib.* No. 134). When Emperor Rudolph presented his son Albrecht in 1282 with Austria, Styria, and Carinthia, the communities of those districts refused to pay their portion of the taxes to the federation of communities of the empire, on the ground that they now belonged to a different state. Meïr decided that the refusal of the communities to contribute to the general tax fund could be justified only if the emperor gave up those countries entirely

Official Activity.

without claiming any part of their revenues (*ib.* No. 131). Another important decision of Meïr's had reference to the ransom of Jews, who were frequently imprisoned at that time for the purpose of extorting money from them. He decided that the ransomed Jews must reimburse the community in every case; and that the latter, in case of need, was not only justified in taking, but was in duty bound to take, the property of the prisoners, even against their will, for ransom. He based his decision on the ground that in such cases the ransom was not a private matter, but concerned the Jewish communities, and that the individual ought therefore to be compelled to give up his property for his release, although he personally might prefer prison to poverty.

Meïr himself was soon to experience what life in prison meant. His seizure, imprisonment, and sad death have made too deep an impression on the Jews to be a matter for doubt; moreover, contemporaneous Christian writers confirm the chief incidents of the story. However, as some highly important points are not clear, it may be best to give here the following concise account: "R. Meïr b. Baruch was about to go abroad with his wife, his daughters, his sons-in-law, and all his family, and had proceeded as far as a city in the mountains of Lombardy, where he intended to stay until all his traveling companions had gathered about him, when suddenly the wicked Bishop of Basel passed through the city on his journey from Rome, accompanied by a baptized Jew named Kneppe [קינפפא]. The latter recognized Meïr and informed the bishop, who brought it about that the lord of that city, Count Meinhard of Görz, seized Meïr on the fourth of Tammuz [= June 28], 1286, and delivered him to Emperor Rudolph, who cast him into prison" (marginal glosses to folio 85 of the "Minhagbuch" of Worms, written in 1625, quoted by Lewysohn, "Sechzig Epitaphien," p. 36; comp. also S. Back, "R. Meïr ben Baruch," pp. 62 *et seq.*). Neither the object of his journey nor the actual reason for the imprisonment is given in any source; but modern historians have attempted various explanations. The condition of the Jews of Germany was such toward the end of the thirteenth century that they were not for a moment sure of their lives and property. Murder, pillage, arson, and extortion were of daily occurrence. Under these circumstances many Jews emigrated; and Palestine especially attracted the fugitives from Germany, as in that country very favorable conditions obtained for the Jews during the reign of the Mongolian khan Argun and his Jewish minister Sa'd al-Daulah. It is assumed that Meïr was leading such a band of emigrants, and that he was imprisoned by the government in order to put a stop to this movement, which, if continued, would have materially injured the imperial treasury.

Supposed Reasons for Imprisonment.

The account of a young contemporary of Meïr, who was in very close relations with him, seems to indicate, however, that Meïr had entirely different reasons for emigrating. He says that the emperor demanded a great sum of money from the Jews, which the latter would not or could not pay, and that consequently their leader feared—and justly so, as the sequel showed—that the emperor would seize him as a hostage ("Ẓawwa'at R. Yehudah b. Asher," ed. Schechter, in "Bet Talmud," iv. 374). After his seizure Meïr was probably first taken to Wasserburg (ווישרבורג), a German locality that can not now be identified, and then transferred to the fortress of Ensisheim in the district of Colmar, Upper Alsace. The Jewish communities of course did everything to secure the liberation of their greatest teacher; but the ransom demanded by the government—30,000 marks, according to one report—was such an exorbitant one that the negotiations dragged. A later authority, frequently well informed in matters of history (Solomon Luria, "Yam shel Shelomoh," to Giṭ. iv., No. 66), says that Meïr himself prevented any such high sum being paid for his liberation lest the government should repeat this expedient of imprisoning important men for the purpose of extorting money. He therefore remained in prison from June 28, 1286, until his death (1293). He bore his seven years of captivity heroically. In the beginning he was consoled by the hope of a speedy release; and later on he submitted in the thought that it was the will of God, whose ways are always just. Even in prison he was occupied solely with studying and teaching. He wrote, or revised, a large part of his works; and his responsa now took the place of oral instruction.

Literary Activity.

Meïr was a voluminous writer. His works include: (1) Tosafot to several Talmudic treatises. Passages are quoted therefrom to Berakot, Shabbat, 'Erubin, Yoma, Giṭṭin, Nedarim, Baba Ḳamma, Baba Mezi'a, Baba Batra, Shebu'ot, Menaḥot, and Ḥullin. The tosafot to Yoma in the editions are those of R. Meïr, and are the only tosafot of his that have been printed. (2) Responsa, of which various parts have appeared (Cremona, 1537; Prague, 1608; Lemberg, 1860; Berlin, 1891). (3) "Hilkot Berakot," or "Seder Berakot," regulations for the various formulas of blessings to be pronounced in performing certain actions. The book is frequently cited in the works of Meïr's pupils, and is probably identical with the "Birkot MaHaRaM," issued in 1558 in Riva di Trento. (4) "Hilkot Sheḥiṭah," regulations for the ritual slaughtering and subsequent examination ("bediḳah") of animals, in manuscript in the Bodleian Library, Oxford (Neubauer, "Cat. Bodl. Hebr. MSS." Nos. 1171, 2275). (5) "Hilkot Abelut," or "Hilkot Semaḥot," on mourning customs. This work, somewhat abbreviated, is included also in the "Mordecai" to Mo'ed Ḳaṭan; but in all the passages where the author speaks in the first person, the third person has been substituted, so that here Meïr's work appears everywhere in quotation. Judah b. Nathan ha-Levi edited and published this work under the title "Sefer Maḥaneh Lewiyyah," Leghorn, 1789. (6) "Halakot Pesuḳot," decisions on various subjects, in manuscript at the Bodleian (Neubauer, *l.c.* No. 781, 2a). This library contains also various collections of Meïr's decisions (Neubauer, *l.c.* Index). (7) "Piske 'Erubin," short summary of the Talmudic-rabbinical regulation of the 'erub. (8) "Ḥiddushim," novellæ to various treatises of the Talmud. Azulai possessed a copy of this work. (9) Minhagim of ritual ceremonies in the synagogue, in manuscript in the Vatican and Bodleian libraries. (10) Treatise on the marital duties of husband and wife, in manuscript in the Vatican Library. (11) Commentary on the sixth order of the Mishnah, of which there have been published in Romm's edition of the Talmud (Wilna, 1897) the commentaries to the treatises Negaʻim and Oholot, from an Oxford manuscript, and fragments of the rest from citations in Lippman Heller's Mishnah commentary. (12) Masoretic notes, in manuscript in the Vatican and Oxford libraries. It is not improbable that Meïr was the author also of the "Liḳḳuṭe ha-Maimuni," found in the Austrian manuscript of the "Mordekai" (see Mordecai b. Hillel), and consisting of very brief extracts from Maimonides' "Yad," with occasional decisions by other authors referring to the subject or short remarks by the author himself. Meïr is not, however, the author of the cabalistic-ethical works "Sefer Emunot" and "Be'er Mayim Ḥayyim," which are ascribed to him by some scholars.

As Payyeṭan.

Meïr was also a voluminous liturgical poet, nineteen of his poems being included in the German Maḥzor. On account of his great authority as a Talmudist, his compositions were included even in the liturgy of the Day of Atonement and of the Ninth of Ab. Although Meïr was a German, he modeled his poems upon those of Judah ha-Levi, without, however, equaling them. Still his piyyuṭim show great command of language, and to a certain extent true poetic inspiration also. The best-known among his poems is his dirge on the public burning of Hebrew books at Paris in 1244, composed in the strophic rime of Judah ha-Levi's "Zionide," and rivaling its model in warmth of imagination and depth of feeling, though much inferior to it in purity of language and in versification. Meïr likewise wrote commentaries on earlier piyyuṭim, being probably encouraged to do so by his father, who himself wrote such comments (Zunz, "Ritus," pp. 195, 199).

His Historical Importance.

The great authority which Meïr enjoyed during his life increased rather than lessened after his death. Aside from Rashi and Rabbenu Gershon, he is the only one upon whom the honorary title "Me'or ha-Golah" (= "Light of the Exile") has been conferred. It would be difficult to overestimate his influence on the development of the religious life of the Jews of Germany. He is also one among the few Germans whose authority extended far beyond the limits of their own country, and that not only during their lives—even Solomon ben Abraham Adret, the greatest Spanish Talmudist, consulted Meïr on difficult questions—but also for generations afterward. Meïr's renowned pupil, Asher ben Jehiel, introduced the teachings of his master into Spain and Portugal. The great influence which Meïr exercised upon the religious life of the Jews was chiefly personal, acting directly upon his pupils, who on their part endeavored to perpetuate the authority of their master. In addition to Asher ben Jehiel, especially noteworthy among Meïr's pupils were Mordecai b. Hillel and Meïr ha-Kohen, who were largely instrumental in establishing his authority through their widely circulated compendiums of the Law. Through the works of these pupils it is possible to form an opinion of Meïr's importance, although most of his works, with the exception of the responsa, either have perished or remain unpublished. The tosafot to Yoma, of which, as has been said above, Meïr is the author, show him to have been a most clear and logical thinker; and it is easy to see how his methods of Talmud study became the model for his pupil Asher b. Jehiel, who in his "Halakot" follows directly in his master's footsteps. These tosafot show also Meïr's fine insight into methods and system, as evidenced by his frequent references to the composition and methods of the Mishnah (comp., *e.g.*, Yoma 2a, catchword "Shibeʻat," and *ib.* 73b, catchword "Yom ha-Kippurim").

Tendencies.

Although Meïr was well versed in the works of his predecessors and studied them in detail, he was very independent in his views and often combated with vigor those of the old authorities. Meïr was the representative of uncompromising Talmudism, which looked upon the Talmud as the norm and rule of life. For this reason he was opposed to mysticism, which had flourished in Germany from the time of Eleazar of Worms, as well as to the philosophic trend of the Spanish school. It is especially noteworthy that he showed a marked independence of the superstition then prevailing in Germany among Jews as well as non-Jews. Thus he paid no regard to the "danger" of so-called pairs (see Zugot), *i.e.*, of using or partaking of things in pairs ("Tashbeẓ," No. 552); he trimmed his nails in the sequence of the fingers (*ib.* No. 560); and he advised that Jews might go bareheaded (*ib.* No. 549). He admitted that he knew nothing of eschatological secrets, of which the mystic books of his time were full (*ib.* No. 247), and declared emphatically against indiscriminate emigration to Palestine. Only those should go there, he claimed, who could support themselves well, and would be able to lead a holy life in the Holy Land (*ib.* Nos. 559-562). Where the Halakah, according to him, demanded onerous observance, this must be carried out: for he held that the Talmudic regulations must not become an object of derision, meaning thereby that they must be enforced by the authorities, so as not to lose their significance (Responsa, ed. Cremona, No. 194). Next to the Halakah, he assigned to religious practises a great authority, and endeavored to put them upon a firmer basis than their existing one. Meïr is cited as an authority for many religious customs of the house and the synagogue, as his influence gave stability to usages which hitherto had been variable.

In moral as well as ethical questions he inclined to the rigorous interpretation. The following sentence in one of his responsa is characteristic: "Cursed be the woman who has a husband and does not adorn herself; and cursed be the woman who has no husband and adorns herself" (Responsa, ed. Prague, No. 199). The question whether a lawyer could bring into court arguments which he was convinced were false, he answered as follows: "No Jew may become guilty of such an ignominious sin against truth and justice" (Responsa, ed. Cremona, No. 246). Meïr's importance lies in the fact, therefore, that he led the

German Jews away from the mysticism to which they were trending, and toward a rational, thorough study of the Talmud; also in that he endeavored to put their variable religious practises upon a firm basis, his principle being to decide religious questions in conformity with the conclusions at which he had arrived by independent study of the Talmud ("Tashbez," No. 531).

When Meïr was imprisoned in Alsace, many of his relatives also went to that country, members of his family being found there for centuries (Neubauer, "La Famille de Meïr de Rothenburg," in "R. E. J." xii. 91-94). The Weil family of southern Germany claimed Meïr as its ancestor; and there were also many Jews at Prague who designated themselves as ממשפחת מהר"א מרוטנבורג.

MEÏR BEN SAMUEL (RaM): French tosafist; born about 1060 in Ramerupt; died after 1135. His father was an eminent scholar. Meïr received his education in the Talmudical schools of Lorraine, his principal teachers being Isaac ben Asher ha-Levi and Eleazar ben Isaac of Mayence (Pardes, ed. Constantinople, p. 33a; comp. Neubauer in "Monatsschrift," 1887, p. 503), with whom he later carried on a correspondence ("Or Zarua'," ii. 75b; "Sefer ha-'Ittur," ed. Lemberg, i. 52).

Meïr married Rashi's second daughter, Jochebed, by whom he had three sons (Conforte, "Ḳore ha-Dorot," ed. Cassel, p. 14a), Samuel ben Meïr (RaSHBaM), Isaac ben Meïr (RIBaM), and Jacob ben Meïr (Rabbenu Tam), all of them well-known scholars. According to Gross, Meïr had also a fourth son, Solomon. Samuel ben Simḥah of Vitry, father of the tosafist Isaac the Elder, was Meïr's son-in-law. Meïr's son Isaac, the often-quoted tosafist, died in the prime of life, leaving seven children (see Rabbenu Tam, "Sefer ha-Yashar," ed. Vienna, No. 616, p. 72b; ed. Rosenthal, No. 41, p. 71). This loss distressed the father to such an extent that he felt indisposed to answer a halakic question addressed to him by his friend Eleazar ben Nathan of Mayence (*ib.*).

Meïr attained a very great age, and is sometimes designated as "the old" ("ha-yashish"; *ib.*; "Sefer Seder ha-Ḳabbalah," in Neubauer, "M. J. C." p. 184; Eliezer b. Nathan, p. 148a). From the fact that his grandson, Isaac ben Samuel, born about 1120, speaks of religious customs which he found conspicuous in his grandfather's house, and from other indications, it has been concluded that Meïr was still alive in 1135.

Meïr was one of the founders of the school of tosafists in northern France. Not only his son and pupil Rabbenu Tam ("Sefer ha-Yashar," ed. Vienna, No. 252, p. 27a), but also the tosafot (Tos. Ket. 103b; Tos. Ḳid. 15b, 59a; Tos. Men. 100a) quote his ritual decisions. It was Meïr ben Samuel who changed the text of the Kol Nidre formula (see "Sefer ha-Yashar," ed. Vienna, No. 144, p. 17a). A running commentary on a whole passage of the Gemara (Men. 12a *et seq.*), written by him and his son Samuel in the manner of Rashi's commentary, is printed at the end of the first chapter of Menaḥot. Meïr composed also a seliḥah beginning "Abo lefaneka," which has been translated into German by Zunz ("Synagogale Poesie," p. 183), but which has no considerable poetic value (*idem*, "Literaturgesch." p. 254; Landshuth, "'Ammude ha-'Abodah," p. 168).

Rosin, *Samuel ben Meïr als Schrifterklärer*, in *Jahresbericht des Jüdisch-Theologischen Seminars*, pp. 3 *et seq.*, Breslau, 1880; Weiss, *Dor*, iv. 336; idem, *Sefer Toledot Gedole Yisrael (Toledot R. Ya'aḳob ben Meïr)*, p. 4, Vienna, 1883; Zunz, *Z. G.* p. 31; see also Isaac ben Meïr of Narbonne; Jacob ben Meïr Tam; and Samuel ben Meïr.

G. M. Sc.

MEÏR B. SAMUEL OF SCZEBRSZYN: Hebrew author of the seventeenth century. In the disastrous years of 1648-49 he lived at Sczebrszyn, Russian Poland, an honored member of the community, whence he escaped, on its invasion by the Cossacks, to Cracow; there he published his "Ẓoḳ ha-'Ittim" (1650), an account, in Hebrew verse, of Jewish persecution during the Cossack uprising. This book was afterward published by Joshua b. David of Lemberg under his own name; Steinschneider was the first to discover this plagiarism. Meïr wrote also "Mizmor Shir," a Sabbath hymn, in Aramaic and Judæo-German (Venice, 1639).

Bibliography: Gurland, *Le-Ḳorot ha-Gezerot*, iv. 3; Steinschneider, *Cat. Bodl.* No. 6324; Fürst, *Bibl. Jud.* ii. 345.

H. R. A. S. W.

MEÏR BEN SIMEON OF NARBONNE: Talmudist and controversialist; lived at Narbonne in the second half of the thirteenth century. He was a disciple of Nathan ben Meïr of Trinquetaille, and a contemporary of Naḥmanides, with whom he maintained a scientific correspondence. Meïr enjoyed a high reputation as a commentator. Asher ben David invokes his authority in his (Asher's) commentary on the thirteen attributes (יג" מדות); and the anonymous commentator on the Targum Onḳelos highly praises Meïr in his "Patshegen."

Meïr was the author of a controversial work entitled "Milḥemet Miẓwah" (Parma MSS. No. 2749). It is divided into five parts: (1) an account of a religious disputation held in 1245 before the bishop En Guillem de la Broa and in the presence of the Jewish notables of Narbonne and Capestang; (2) controversies with Christian ecclesiastics; (3) conversations of an apologetic nature, and explanations of Biblical passages concerning the Messiah and of Talmudical haggadot interpreted by Christians in favor of their belief; (4) commentary on the "Shema'" and on the thirteen attributes of God; and (5) letter on the "Sefer ha-Bahir," which work Meïr declares to be a forgery.

Another work by Meïr, entitled "Meshib Nefesh," defending the first chapter of Maimonides' "Yad ha-

Ḥazaḳah" against the attacks of an anonymous writer, is also extant in manuscript (MS. Ginzburg, No. 572, 10).

According to Neubauer ("Isr. Letterbode," iii. 57), Meïr is identical with the Meïr ben Simeon mentioned in a Talmudical compilation (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1558, 2, § 665) and in other works, where he is sometimes called "Ha-Me'ili."

Bibliography: Steinschneider, *Hebr. Bibl.* xvi. 44, 67; Neubauer, in *Archives des Missions*, 3d series, i. 556; Lubetzki, Introduction to *Sefer Hashlamah*; Gross, in *Monatsschrift*, 1874, p. 571; idem, *Gallia Judaica*, pp. 423–425; Renan-Neubauer, *Les Rabbins Français*, pp. 558 *et seq.*

S. S. I. Br.

MEÏR B. SOLOMON B. DAVID: Grammarian of the end of the thirteenth century. He wrote a short but interesting grammatical work, which is extant only in a manuscript formerly in the possession of Halberstam, but now in the Montefiore Library (No. 410, 3; see "R. E. J." xiv. 788). In the preface he states that the author of the Hebrew grammar entitled "Petaḥ Debarai" was his grandfather. Purposing to summarize some of the elements of Hebrew grammar, Meïr discusses, in seven chapters, transitive and intransitive verbs, the meaning of the "hif'il," the "pi'el," and the other derived stems, and the pronominal suffixes of the verbs. As he says in the preface, he intended thereby to prepare for his own use an aid to study, and to consider problems which had not been treated in the work of his grandfather, referred to above.

MEÏR BEN TODROS. See Abulafia.

ME'IRI, MENAHEM BEN SOLOMON: Provençal Talmudist and commentator; born at Perpignan in 1249; died there in 1306; his Provençal name was **Don Vidal Solomon.** He was a disciple of Reuben ben Ḥayyim of Narbonne. Me'iri is regarded as one of the most brilliant commentators of the Middle Ages. His works are clear and concise and bear the stamp of a scientific and logical mind. Me'iri was the author of many works, most of which are still extant. These are: a treatise on penitence entitled "Ḥibbur ha-Teshubah," or "Meshibat Nefesh," still extant in manuscript (MS. de Rossi, No. 1313); "Bet ha-Beḥirah," containing commentaries on most of the books of the Talmud, several of which were published, namely, those on Megillah (Amsterdam, 1769), Yebamot (Salonica, 1794), Shabbat (Leghorn, 1794), Nedarim, Nazir, and Soṭah (*ib.* 1795), Yoma (*ib.* 1760), Abot (with Me'iri's historical and literary introduction and a short biography of the author by G. Stern; Vienna, 1854); "Ḳiryat Sefer," a Masoretic work on the method of writing scrolls of the Law, in two parts (Smyrna, 1863–81); commentaries on the Bible, of which only those on Proverbs and the Psalms are extant (the former was published at Leiria, 1492; the latter is in manuscript; Neubauer, "Cat. Bodl." p. 69). Azulai mentions three other works by Me'iri which are no longer in existence: "Bet Yad," on the obligation of washing the hands before meals and in the morning; "Magen Abot"; and "Ohel Mo'ed." In the commentary on Sanhedrin, Me'iri quotes another work of his entitled "Ketab Dat," which, judging from the title, must have been a catechism.

Me'iri was too much of a philosopher himself to interdict the study of philosophy. Thus, when solicited by Abba Mari to give his adhesion to the excommunication launched against the secular sciences, Me'iri wrote him a letter in which he emphatically defended science, the only concession he made being to forbid the study of secular sciences by any one before he has thoroughly studied the Talmud.

MEISACH, JOSHUA: Russian Hebrew author; born at Sadi, government of Kovno, 1848. Meisach has written and edited over one hundred works in Yiddish and Hebrew. He began his literary career in 1861 with the weekly "Ha-Karmel," since which year he has contributed to a great number of Hebrew and Yiddish periodicals, has edited the magazine "Gan Peraḥim" (i.–iii., Wilna-Warsaw, 1881–93), and has written various novels, essays, etc. Among these are the following: "Ha-Emunah we-Haskalah," essays (Wilna, 1874); "Miktabim mi-Sar shel Yam," essays (Warsaw, 1885–89); "Ṭefaḥ Megullah," criticisms (*ib.* 1886); "Bamat Yiẓḥaḳ," on the theater (*ib.* 1889); "Oẓar Ḥadash," anecdotes and narratives from the Talmud and the Midrash, alphabetically arranged (Wilna, 1898). Meisach now (1904) resides at Warsaw.

H. R. A. S. W.

MEISEL: Bohemian family which became famous chiefly through Mordecai Marcus b. Samuel Meisel, "primate" of Prague. The family seems to have come originally from Cracow, to whose community Mordecai Meisel bequeathed large sums for charitable purposes; and there, toward the end of the sixteenth century, the printer **Menahem Nahum b. Moses Meisel** flourished. As early as 1477, however, the name of "Meisel" is mentioned in documents relating to Prague (Lieben, "Gal 'Ed," p. 15).

Frummet Meisel: Second wife of Mordecai Meisel; died Shebaṭ 23, 1625. She contributed with her husband to the building of the Meisel synagogue, and some of the gifts which they presented on the occasion of its dedication (see Mordecai Marcus Meisel) are still exhibited on the anniversary of her death. On her tombstone she is described as a woman distinguished for piety and morality. It is furthermore stated that every synagogue of Prague possessed votive offerings of hers, the most noteworthy gift being a golden cup weighing 100 crowns; that she supported scholars liberally; and that she was hospitable and very philanthropic. David Gans likewise praised her noble character and her fidelity to her husband. It seems strange, then, to read in the "'Emeḳ ha-Baka" (ed. Wiener, p. 141), that she objected so strongly to the last will and testament of Mordecai Meisel that he divorced her while he lay dying. Although this statement has been often questioned, there must be some truth in it, for on her gravestone she is designated as the daughter of the famous elder Isaac Rofe (Lékarz), not as Meisel's wife.

Judah Löb ben Simḥah Bonim Meisel: Printer and author at Cracow in the seventeenth century. Meisel reopened, in 1663, the printing establishment of his father-in-law, Nahum Meisel, and continued it until 1670. The first work printed by him was Jacob Weil's "Sheḥiṭot u-Bediḳot"; the last one, the Eben ha-'Ezer and Ḥoshen ha-Mishpaṭ of the Shulḥan 'Aruk. Meisel was the author of a work entitled "Ṭa'ame ha-Massoret," a commentary on the Masorah, at the end of which there are some novellæ on the Talmud (Amsterdam, 1728).

Tombstone of Mordecai Meisel at Prague.

(From Jerabék, "Der Alte Prager Judenfriedhof.")

Mordecai Marcus Meisel (Miška Marek in Bohemian documents): Philanthropist and communal leader at Prague; son of Samuel Meisel; born at Prague 1528; died there March 13, 1601. The persecution of the Jews of Prague by the fanatical Ferdinand I. occurred while Mordecai was a youth. In 1542 and 1561 his family, with the other Jewish inhabitants, was forced to leave the city, though only for a time. The source of the great wealth which subsequently enabled him to become the benefactor of his coreligionists and to aid the Austrian imperial house, especially during the Turkish wars, is unknown. He is mentioned in documents for the first time in 1569, as having business relations with the communal director Isaac Rofe (Lékarz), subsequently his father-in-law. His first wife, **Eva,** who died before 1580, built with him the Jewish town-hall at Prague, which is still standing, as well as the neighboring Hohe Synagoge, where the Jewish court sat. With his second wife, Frummet, he built (1590–92) the Meisel synagogue, which was much admired by the Jews of the time, being, next to the Altneusynagoge, the metropolitan synagogue of the city; it still bears his name. The costly golden and silver vessels with which he and his wife furnished this building either were lost during the lawsuit over his estate or were burned during the conflagrations in the ghetto in 1689 (June 21) and 1754 (May 16). The only gifts dedicated by Meisel and his wife to this synagogue that have been preserved are a curtain ("paroket") embroidered with hundreds of pearls, a similarly adorned wrapper for the scroll of the Law, and a magnificent bronze ornament for the almemar. Jacob Segre, rabbi of Casale-Monferrato, celebrated the dedication of the synagogue in a poem which is still extant, and his contemporary David Gans, the chronicler of Prague, has described in his "Ẓemaḥ Dawid" the enthusiasm with which the Jewish population received the gift.

Meisel enlarged the old Jewish cemetery of Prague by purchasing adjoining uncultivated land, on which he erected a house for washing the dead, a miḳweh, a bet ha-midrash, a Klaus, and a hospital (still in existence). He spent much money also in ransoming Jewish prisoners; paved the ghetto of

His Benefactions.

Prague, which had been much enlarged at that time; often provided clothing, of a uniform pattern, for all the poor of his community; presented large dowries every year at Ḥanukkah to two poor brides chosen by lot; lent large sums without interest to needy merchants; and provided for the widows and orphans of the community. He presented costly synagogal vessels and adornments to other communities, including those of Cracow, Posen, and Jerusalem. He presented and loaned altogether the sum of 20,000 thalers to the community of Posen when it was burned out June 11, 1590; gave generously to Christian philanthropics, contributing a considerable amount toward the completion of the Church of the Savior; and repeatedly lent large sums to the empress as well as to the emperor, being rewarded with considerable privileges, many of which affected the Meisel synagogue. This synagogue had a standard with an escutcheon; it might not be entered by any officer of the law; it was exempt from taxation for all time. Although Meisel had no children, the emperor granted him the right to dispose of his estate; but after his death the heirs were involved in difficulties as a result of this privilege. He had the right also to mint shekels for ritual purposes ("pidyon ha-ben" and "maḥaẓit ha-sheḳel"), and one of these coins, dated 1584, is still in existence.

Meisel's last will and testament, which he drew up in the presence of Chief Rabbi Löw (Judah Löw b. Bezaleel), the communal director Joachim Brandeis, and Meïr Epstein, leaving his estate to his two nephews, Samuel the Elder and Samuel the Younger, is still extant in manuscript. He was interred with the highest honors. Immediately after his burial the Bohemian treasury, at the instance of the emperor, confiscated his estate, consisting of 516,250 gulden in money together with many houses. Whatever was found was carried off; one of the chief heirs was tortured into revealing the hiding-place of what had been concealed, which also was claimed. Meisel's wealth and philanthropy have become proverbial among the Jews, and many anecdotes are connected with his name.

D. A. Ki.

Moses b. Mordecai Meisel: Russian scholar and communal worker; born in Wilna about 1760; died in Hebron, Palestine, after 1838. He was shammash of the community in his native town and was in his younger days one of the followers of Elijah Gaon. Later he joined the Ḥasidim, but did not participate in the bitter controversies concerning them which disturbed the Polish Jewry in those times. He was a great admirer of Moses Mendelssohn and approved Solomon Dubno's bi'ur of Genesis (1783). There is also an approbation by Meisel of Samuel Gershoni's "Debar Shemuel" (Byelostok, 1814). He left Wilna for Palestine in 1813 and settled in Hebron. Dr. Löwe, who met him there in the summer of 1838, describes him as an old man well acquainted with German literature.

Meisel was the author of "Shirat Mosheh" (Shklov, 1788), a poem on the 613 precepts, each line beginning with a letter from the Ten Commandments. His son **Aryeh Löb** (d. 1835) was a leader among the Ḥasidim of Wilna.

H. R. P. Wi.

Samuel Meisel (the elder): Nephew of Mordecai Marcus b. Samuel; born in 1585; died in 1630. He was wealthy and prominent in affairs. In 1616 he received an imperial privilege. The printing-press of Abraham Heide (Lemberger) was situated in his house. After Mordecai Meisel's death the settlement of his estate involved his family in a tedious suit with the government, and from the records of this suit is derived the information regarding the members of this family. One of the houses belonging to the estate was awarded, in 1610, to a nephew, **Jacob**, and his wife, Johanka; and three years later, King Matthias, successor of Rudolf II., gave the remaining real estate to another nephew, **Samuel Meisel** (the younger; d. 1625), son of Simon. The Meisel synagogue and other property were awarded to the Jewish community. As the state had confiscated all the money (more than 500,000 gulden) and most of the real estate, the family sued the community for the income from the synagogue, the baths, institutional buildings, etc., amounting to 800 florins a year. The rabbinate thereupon excommunicated the entirely impoverished family (*c.* 1670), and this led to indescribable persecutions and scandals. Decent burial was refused to **Marek**, son of the younger Samuel Meisel, in 1674, and the funeral cortège was insulted. His daughter was attacked in her house by the mob, and the family had to pay large sums in order to secure honorable burial for the heir **Joachim Meisel.** It did not appear until the final verdict rendered in this suit by the magistrate of Prague Sept. 13, 1684, that through the machinations of the notorious apostate Philipp Lang, chamberlain to the emperor until 1608, the record of Meisel's privileges had been secretly stricken from the official register in 1601, on the ground of their having been obtained by fraud, and that the sums subsequently paid to the widow and to the heirs, and the two houses given them, were alleged to have been merely gifts. The heirs, naturally, were not satisfied with this decision; but the great fire in the ghetto of Prague, in 1689, which destroyed the Meisel synagogue and the other buildings of the estate, terminated the controversy. The family flourished at Prague down to modern times; and branches of it are found at Warsaw, Budapest, Breslau, and Berlin.

D. A. Ki.

Wolf Alois Meisel: Hungarian rabbi; born at Roth-Janowitz July 16, 1815; died at Budapest Nov. 30, 1867. Owing to his father's conversion to Christianity, the family relations were so inharmonious that he reached the age of seventeen before he was able to begin definite preparation for the future. In 1832 he went to Hamburg, where he applied himself to the study of the Talmud and graduated from the gymnasium. He entered the University of Breslau in 1838, where he continued his study of the Talmud and attended lectures on rhetoric. In 1848 he was called to the rabbinate of Stettin, and on May 11, 1859, to that of Budapest. Here he was in constant conflict with his congregation owing to the state of transition, both in religion and in politics, through which the Hungarian Jews passed during his administration. His "Homilien über die Sprüche der Väter" (Stettin, 1851; Hungarian transl. by Bauer Márkü Lörincz, Budapest, 1862) are models of Jewish pulpit-literature. His "Prinz und Derwisch," poems (Stettin, 1847; 2d ed., Budapest, 1860), and "Der Prüfstein," poems (published posthumously by the Meisel-Wohlthätigkeitsverein, Budapest, 1878), are translations. He died suddenly while preaching a sermon, which Simon Bacher and his son Wilhelm Bacher published in German and Hebrew under the title "Die Brunnen Isaak's" (*ib.* 1867).

MEISEL SYNAGOGUE. See Meisel, Mordecai Marcus; Prague.

MEISELS, DOB BERUSH B. ISAAC: Polish rabbi and statesman; born in Szczekoeiny about 1800; died in Warsaw March 17, 1870. He was a scion of one of the oldest families in Cracow, and was brought up in Kamenetz, Podolia, where his father (d. 1832) was rabbi. After marrying the daughter of the wealthy Solomon Bornstein of Wielicka, he settled as a banker in Cracow, of which city he became rabbi in 1832. He occupied the rabbinate for nearly a quarter of a century, but was not recognized by the entire community, a considerable part of which adhered to his opponent, R. Saul Landau. Meisels always took a conspicuous part in the civic life of his place of residence; and in the stormy times of 1846 he was chosen one of the twelve senators of Cracow. In 1848 he was elected, with the aid of Catholic votes, to represent the city in the provisional Austrian Reichsrath, meeting at Kremsier. He took his seat among the radicals, and when the president expressed his surprise at seeing a rabbi seated on the "left," Meisels gave the reply: "Juden haben keine Rechte" (Jews have no right!).

In 1856 Meisels became rabbi of Warsaw, where he soon gained the respect and confidence of the entire population. In 1861, during the riots and excesses which preceded the outbreak of the second Polish insurrection, he did everything in his power to induce the Jews to sympathize with the cause of Poland. He accompanied the Archbishop of Warsaw to the funeral of the victims of the first outbreak and marched together with Father Wyszynski at the head of a delegation to the city hall. Later he was appointed by the Russian vice-regent a member of the provisional municipal council of Warsaw; but he remained loyal to the cause of the Polish patriots, thereby, it is believed, preventing massacres of Jews which some Polish leaders had planned and which the Russian government was not anxious to avert ("Allg. Zeit. des Jud." 1861, p. 227). Late in 1861 Meisels, together with Dr. M. Jastrow, was arrested and thrown into prison; after several months' confinement both were expelled from the country. Meisels was invited to settle in London; but in 1862 he was permitted to return to Warsaw, where he remained until his death.

Meisels was the author of novellæ on the "Sefer ha-Miẓwot" of Maimonides, which appeared together with the text as "Ḥiddushe MaHaRDaM" (Warsaw, 1870). One of his sons, **Israel Meisels**, was dayyan in Cracow and rabbi of Siedlce, Poland, from 1858 to 1867. He died in Cracow Nov. 17, 1875, aged 58 ("Ha-Maggid," xix. 407). Another son, **Solomon Meisels**, was living in Vienna in 1871.

MEISSEN. See Saxony.

MEKILTA (plural, **Mekilata**): The halakic midrash to Exodus. The name "Mekilta," which corresponds to the Hebrew "middah" (= "measure," "rule"), was given to this midrash because the Scriptural comments and explanations of the Law which it contains are based on fixed rules of Scriptural exegesis ("middot"; comp. Talmud Hermeneutics). The halakic midrashim are in general called "middot," in contrast to the "halakot," or formulated laws; and an interpreter of the Midrash was termed "bar mekilan" = "a man of the rules" (Lev. R. iii.). Neither the Babylonian nor the Palestinian Talmud mentions this work under the name "Mekilta," nor does the word occur in any of the passages of the Talmud in which the other halakic midrashim, Sifra and Sifre, are named (Ḥag. 3a; Ḳid. 49b; Ber. 47b; etc.). It seems to be intended, however, in one passage (Yer. 'Ab. Zarah iv. 8), which runs as follows: "R. Josiah showed a mekilta from which he cited and explained a sentence." His quotation actually occurs in the Mekilta, Mishpaṭim (ed. Weiss, p. 106b). It is not certain, however, whether the word "mekilta" here refers to the work under consideration; for it possibly alludes to a baraita collection—which might also be designated a "mekilta" (comp. Pes. 48a; Tem. 33a; Giṭ. 44a)—containing the sentence in question. On the other hand, this midrash, apparently in written form, is mentioned several times in the Talmud under the title "She'ar Sifre debe Rab" = "The Other Books of the Schoolhouse" (Yoma 74a; B. B. 124b). A geonic responsum (Harkavy, "Teshubot ha-Geonim," p. 31, No. 66, Berlin, 1888) in which occurs a passage from the Mekilta (ed. Weiss, p. 41a) likewise indicates that this work was known as "She'ar Sifre debe Rab." The first person to mention the Mekilta by name was the author of the "Halakot Gedolot" (p. 144a, ed. Warsaw, 1874). Another geonic responsum refers to it as the "Mekilta de-Ereẓ Yisrael" (Harkavy, *l.c.* p. 107, No. 229), probably to distinguish it from the Mekilta of R. Simeon bar Yoḥai, which was generally known in the Babylonian schools (Hoff-

First Mention.

mann, "Zur Einleitung in die Halachischen Midraschim," p. 36).

The author, or more correctly the redactor, of the Mekilta can not be definitely ascertained. R. Nissim b. Jacob, in his "Mafteaḥ" (to Shab. 106b), and R. Samuel ha-Nagid, in his introduction to the Talmud, refer to it as the "Mekilta de-Rabbi Yishmael," thus ascribing the authorship to Ishmael. Maimonides likewise says in the introduction to his Yad ha-Ḥazaḳah: "R. Ishmael interpreted from 'we'eleh shemot' to the end of the Torah, and this explanation is called 'mekilta.' R. Akiba also wrote a mekilta." This R. Ishmael, however, is neither an amora by the name of Ishmael, as Frankel assumed (Introduction to Yerushalmi, p. 105b), nor Rabbi's contemporary, Rabbi Ishmael b. R. Jose, as Gedaliah ibn Yaḥya thought ("Shalshelet ha-Ḳabbalah," p. 24a, Zolkiev, 1804). He is, on the contrary, identical with R. Ishmael b. Elisha, R. Akiba's contemporary, as is shown by the passage of Maimonides quoted above. The present Mekilta can not, however, be the one composed by R. Ishmael, as is proved by the reference to R. Ishmael's pupils and to other later tannaim. Both Maimonides and the author of the "Halakot Gedolot," moreover, refer, evidently on the basis of a tradition, to a much larger mekilta extending from Ex. i. to the end of the Pentateuch, while the midrash here considered discusses only certain passages of Exodus. It must be assumed, therefore, that R. Ishmael composed an explanatory midrash to the last four books of the Pentateuch, and that his pupils amplified it (Friedmann, "Einleitung in die Mechilta," pp. 64, 73; Hoffmann, *l.c.* p. 73). A later editor, intending to compile a halakic midrash to Exodus, took R. Ishmael's work on the book, beginning with ch. xii., since the first eleven chapters contained no references to the Law (Friedmann, *l.c.* p. 72; Hoffmann, *l.c.* p. 37). He even omitted passages from the portion which he took; but, by way of compensation, he incorporated much material from the other halakic midrashim, Sifra, R. Simeon b. Yoḥai's Mekilta, and the Sifre to Deuteronomy. Since the last two works were from a different source, he generally designated them by the introductory phrase, "dabar aḥar" = "another explanation," placing them after the sections taken from R. Ishmael's midrash. But the redactor based his work on the midrash of R. Ishmael's school; and the sentences of R. Ishmael and his pupils constitute the larger part of his Mekilta. Similarly most of the anonymous maxims in the work were derived from the same source; so that it, also, was known as the "Mekilta of R. Ishmael" ("Mekilta de-Rabbi Yishmael"). The redactor must have been a pupil of Rabbi, since the latter is frequently mentioned (comp. Abraham ibn David in "Sefer ha-Ḳabbalah," in Neubauer, "M. J. C." p. 57, Oxford, 1887, who likewise ascribes it to a pupil of Rabbi). He can not, however, have been R. Hoshaiah, as A. Epstein assumes ("Beiträge zur Jüdischen Alterthumskunde," p. 55, Vienna, 1887), and as might be inferred from Abraham ibn David's reference; for Hoshaiah is mentioned in the Mekilta (ed. Weiss, p. 60b). Rab (Abba Arika) therefore probably redacted the work, as Menahem ibn Zeraḥ says in the preface to "Ẓedah la-Derek" (p. 14b). Rab, however, did not do this in Babylonia, as Weiss assumes ("Einleitung in die Mechilta," p. 19), but in Palestine, taking it after its completion to Babylonia, so that it was called the Mekilta of Palestine "Mekilta de-Ereẓ Yisrael").

Mekilta of R. Ishmael.

Quotations in the Talmud.

Baraitot from the Mekilta are introduced in the Babylonian Talmud by the phrases "Tena debe R. Yishmael" = "It was taught in the school of R. Ishmael," and in the Palestinian Talmud and the haggadic midrashim by "Teni R. Yishmael" = "R. Ishmael taught." Yet there are many baraitot in the Talmud which contain comments on Exodus, and which are introduced by the phrase "Tena debe R. Yishmael," but are not included in the Mekilta under discussion. These must have been included in R. Ishmael's original Mekilta, and the fact that they are omitted in this midrash is evidence that its redactor excluded many of the passages from R. Ishmael's work (comp. Hoffmann, *l.c.* p. 42).

The Mekilta begins with Ex. xii., this being the first legal section found in Exodus. That this is the beginning of the Mekilta is shown by the "'Aruk," *s.v.* טמא, and by the "Seder Tannaim we-Amora'im" (ed. Luzzatto, p. 12, Prague, 1839). In like manner R. Nissim proves in his "Mafteaḥ" (to Shab. 106b) that the conclusion of the Mekilta which he knew corresponded with that of the Mekilta now extant.

In the editions the Mekilta is divided into nine "massektot," each of which is subdivided into "parashiyyot." The nine massektot are as follows: (1) "Massekta de-Pesḥa," covering the pericope "Bo" (quoted as "Bo"), Ex. xii. 1–xiii. 16, and containing an introduction, "petikta," and 18 sections; (2) "Massekta de-Wayeḥi Beshallaḥ" (quoted as "Besh."), *ib.* xiii. 17–xiv. 31, containing an introduction and 6 sections; (3) "Massekta de-Shirah" (quoted as "Shir"), *ib.* xv. 1–21, containing 10 sections; (4) "Massekta de-Wayassa'" (quoted as "Way."), *ib.* xv. 22–xvii. 7, containing 6 sections; (5) "Massekta de-'Amalek," consisting of two parts, (*a*) the part dealing with Amalek (quoted as "Am."), *ib.* xvii. 8–16, containing 2 sections, and (*b*) the beginning of the pericope "Yitro" (quoted as "Yitro"), *ib.* xviii. 1–27, also containing 2 sections; (6) "Massekta de-Baḥodesh" (quoted as "Baḥ."), *ib.* xix. 1–20, 26, containing 11 sections; (7) "Massekta de-Neziḳin," *ib.* xxi. 1–xxii. 23; and (8) "Massekta de-Kaspa," *ib.* xxii. 24–xxiii. 19; these last two massektot, which belong to the pericope "Mishpaṭim," contain 20 sections, consecutively numbered, and are quoted as "Mish."; (9) "Massekta de-Shabbeta," containing 2 sections, (*a*) covering the pericope "Ki Tissa" (quoted as "Ki"), *ib.* xxxi. 12–17, and (*b*) covering the pericope "Wayaḳhel" (quoted as "Wayaḳ."), *ib.* xxxv. 1–3. The Mekilta comprises altogether seventy-seven, or, if the two introductions be included, seventy-nine sections. All the editions, however, state at the end that there are eighty-two sections (comp. Weiss, *l.c.* p. 28; Friedmann, *l.c.* pp. 78–80).

Although the redactor intended to produce a halakic midrash to Exodus, the larger portion of the Mekilta is haggadic in character. From Ex. xii.

Haggadic Elements.

the midrash was continued without interruption as far as Ex. xxxiii. 19, *i.e.*, to the conclusion of the chief laws of the book, although there are many narrative portions scattered through this section whose midrash belongs properly to the haggadah. Furthermore, many haggadot are included in the legal sections as well. The halakic exegesis of the Mekilta, which is found chiefly in the massektot "Bo," "Bah.," and "Mish.," and in the sections "Ki" and "Wayak.," is, as the name "mekilta" indicates, based on the application of the middot according to R. Ishmael's system and method of teaching. In like manner, the introductory formulas and the technical terms are borrowed from his midrash (comp. Hoffmann, *l.c.* pp. 43–44). On the other hand, there are many explanations and expositions of the Law which follow the simpler methods of exegesis found in the earlier halakah (comp. Midrash Halakah).

The haggadic expositions in the Mekilta, which are found chiefly in "Beshallah" and "Yitro," are in part actual exegeses, but the majority of them are merely interpretations of Scripture to illustrate certain ethical and moral tenets. Parables are frequently introduced in connection with these interpretations (*e.g.*, "Bo," ed. Weiss, p. 1b; "Besh.," pp. 36a, b, 37a), as well as proverbs (*e.g.*, "Bo," p. 2b; "Way.," p. 60b) and maxims (*e.g.*, the apothegm of the ancient Zekenim, "Besh.," p. 62b; "Shir," p. 46b). Especially noteworthy are the haggadot relating to the battles of the Ephraimites ("Besh.," p. 28b) and to Serah, Asher's daughter, who showed Joseph's coffin to Moses (*ib.* p. 29a), besides others, which are based on old tales and legends.

It must also be noted that some of the tannaim mentioned in the Mekilta are referred to only here and in Sifre, Num., which likewise originated in R. Ishmael's school (comp. Hoffmann, *l.c.* pp. 38–39). On the earlier editions of the Mekilta and the commentaries to it see Weiss, *l.c.* pp. 25–26, and Friedmann, *l.c.* pp. 12–14. The following are more recent critical editions: J. H. Weiss, "Mechilta" (with introduction and commentary), Vienna, 1865; M. Friedmann, "Mechilta de-Rabbi Ismael" (with introduction and commentary), *ib.* 1870.

S. J. Z. L.

MEKILTA DE-RABBI SHIM'ON: Halakic midrash on Exodus from the school of R. Akiba. No midrash of this name is mentioned in Talmudic literature; but medieval authors refer to one which they call either "Mekilta de-R. Simeon b. Yohai," or "Mekilta Ahrita de-R. Shim'on," or simply "Mekilta Aheret" = "another mekilta." From it passages are cited, especially by Nahmanides in his Pentateuchal commentary on Gen. xlix. 31; Ex. xiv. 19, xxi. 3, xxii. 12; Lev. xxiii. 24; and by R. Todros ha-Levi in his works "Sefer ha-Razim" and "Ozar ha-Kabod" (MSS. in the Königliche Hof- und Staatsbibliothek, Munich; comp. M. H. Landauer in "Orient, Lit." 1845, vi. 182 *et seq.*). Until recently, aside from these quotations and some given by certain authors of the sixteenth century, as Elijah Mizrahi in his commentary on Rashi's commentary on the Pentateuch, R. Shem-Tob b. Abraham in his "Migdal 'Oz" to Maimonides' "Yad," and R. Meïr ibn Gabbai in his "Tola'at Ya'akob" (p. 63b, Cracow, 1570), the only other extract of any length from the Mekilta de-R. Shim'on which was known was the one published by R. Isaac Elijah Landau from a manuscript of R. Abraham Halami, as an appendix to his edition of the Mekilta (Wilna, 1844). There were, therefore, various erroneous opinions regarding this lost work. Zunz ("G. V." p. 419, note *a*) considered it as a cabalistic work ascribed to R. Simeon b. Yohai. M. H. Landauer (*l.c.*) identified it with the Mekilta de-R. Yishmael, while J. Perles (in "Monatsschrift," 1858, pp. 145 *et seq.*) held that the medieval authors applied the name "Mekilta de-R. Shim'on" merely to his maxims which were included in the Mekilta de-R. Yishmael, since separate sentences could be called "mekilta". M. Friedmann was the first to maintain, in his introduction to the Mekilta of R. Ismael (pp. 54 *et seq.*, Vienna, 1870), that, in addition to R. Ishmael's work, there was a halakic midrash to Exodus by R. Simeon, which was called the "Mekilta de-R. Shim'on," and that this Mekilta formed part of the Sifre mentioned in Babli (Sanh. 86a; Ber. 47b; Meg. 28b; Kid. 49a; Sheb. 41b; Hag. 3a). This assumption of Friedmann's was subsequently confirmed by the publication of a geonic responsum (Harkavy, "Teshubot ha-Ge'onim," p. 107, No. 229, Berlin, 1888), where a baraita from the Sifre de-Be Rab to Exodus is quoted, which is the same passage as that cited by Nahmanides from the Mekilta de-R. Shim'on b. Yohai, in his commentary on Ex. xxii. 12. This extract designates the work of R. Ishmael as the "Mekilta of Palestine," in contradistinction to R. Simeon b. Yohai's midrash. It is clear, therefore, that the Mekilta of R. Simeon was implied in the title Sifre de-Be Rab (comp. Hoffmann, "Einleitung in die Halachischen Midraschim," p. 46); and it is mentioned in the Midrash Tehillim (ed. Buber, Wilna, 1891), p. 252 (comp. Buber's note there), under the Hebrew name "Middot R. Shim'on b. Yohai." It is possible also that Simeon himself intended to refer to his midrash in his saying: "Learn my middot" (Git. 67a). The Palestinian sources, the Yerushalmi and the haggadic midrashim, introduce baraitot from this Mekilta with the phrase, "Teni R. Shim'on" = "R. Simeon has taught" (comp. Friedmann, introduction to his edition of the Mekilta, pp. 55 *et seq.*; Hoffmann, *l.c.* p. 48). The phrase "Tena de-Be R. Shim'on" is extremely rare, however, in Babli, where this midrash ranks as one of the "Sifre de-Be Rab" (Hoffmann, *l.c.* p. 50). Many sentences of R. Simeon are quoted there in the name of his son Eleazar, so that Hoffmann has very plausibly concluded (*l.c.* p. 51) that Eleazar edited his father's midrash.

The Mekilta de-R. Shim'on has disappeared; but some extracts from it have been preserved in the collection known as "Midrash ha-Gadol," as I. Lewy first pointed out ("Ein Wort über die Mechilta des

R. Simon"). These fragments have been collected by D. Hoffmann and published under the title "Mechilta des R. Simon b. Jochai" in the Hebrew monthly "Ha-Peles" (vols. i. to iv., *passim*).

This Mekilta compiled from the Midrash ha-Gadol preserves abundant material from the earliest Scriptural commentaries, quoting, for instance, a sentence from the "Doreshe Reshumot" on Ex. xxi. 12 ("Ha-Peles," iii. 258) which is found nowhere else. It contains also much from post-Talmudic literature (comp. Hoffmann, *l.c.* p. 387, note 19), for the collector and redactor of the Midrash ha-Gadol had a peculiar way of dressing sentences of such medieval authorities as Rashi, Ibn Ezra, "'Aruk," and Maimonides in midrashic garb and presenting them as ancient maxims (comp. Schechter, Introduction to "Midrash ha-Gadol," p. 13, Cambridge, 1902).

S. J. Z. L.

MEKILTA LE-SEFER DEBARIM: A halakic midrash to Deuteronomy from the school of Rabbi Ishmael. No midrash by this name is mentioned in Talmudic literature, nor do the medieval authors refer to such a work. Although Maimonides says in his introduction to the Yad ha-Ḥazaḳah, "R. Ishmael explained from 'we-eleh shemot' to the conclusion of the Torah, that is, the Mekilta," he did not see this midrash, which also includes Deuteronomy, since he does not quote any Mekilta passages to that book of the Pentateuch in his "Sefer ha-Miẓwot," although he draws upon the halakic midrashim in discussing most of the commandments. Maimonides probably knew, therefore, merely through an old tradition which he had heard that such a midrash by R. Ishmael existed.

But there are other circumstances which prove that there was once such a work. Many midrashic baraitot to Deuteronomy are introduced in the Talmud with the words "Tena debe R. Yishmael," and may be recognized in form and substance as Ishmael's midrashim (comp. Hoffmann, "Zur Einleitung in die Halachischen Midraschim," p. 77; *idem*, "Ueber eine Mechilta zu Deuteronomium," in the "Hildesheimer Jubelschrift," German part, pp. 83-98). B. B. 124b quotes a passage to a verse in Deuteronomy from the "She'ar Sifre de-Be Rab," a term by which the Mekilta de-Rabbi Yishmael is designated (comp. Hoffmann, *l.c.* p. 40). This clearly indicates that there was a midrash to Deuteronomy by R. Ishmael at the period of the Amoraim. This work, which was called also "Mekilta," disappeared at an early date, and was therefore unknown to the medieval authors. The editor of the Midrash ha-Gadol, however, knew it and included many passages from it in his collection. The citations from R. Ishmael's Mekilta to Deuteronomy which are contained in the Midrash ha-Gadol have been collected by D. Hoffmann and printed under the title "Liḳḳuṭe Mekilta: Collectaneen aus einer Mechilta" in the "Hildesheimer Jubelschrift," Hebr. part, pp. 3-32, and separately under the title "Liḳḳuṭe Batar Liḳḳuṭe: Neue Collectaneen aus einer Mechilta zu Deuteronomium" (Berlin, 1897). It appears from these passages that this midrash contained much valuable material from the earlier halakic exegetes. Especially noteworthy is the statement that R. Simon Gamaliel, together with R. Johanan b. Zakkai, addressed a circular letter to the Galileans and other communities ("Liḳḳuṭe Mekilta," p. 30), a statement which certainly antedates the parallel passage in Tosef., Sanh. ii. 6.

Hoffmann's collection of extracts from the Mekilta includes also many quotations from Maimonides' "Yad" (comp. Hoffmann, "Ueber eine Mechilta," p. 85, and his preface to the "Liḳḳuṭe Mekilta," p. 4). Aside from the passages included in the Midrash ha-Gadol, some fragments of the Mekilta have been preserved in the Cairo GENIZAH; these were discovered by Schechter and published by him in the "J. Q. R."

MEḲIẒE NIRDAMIM: International society for the publication of old Hebrew books and manuscripts. It was established first at Lyck, Germany, in 1864, under the direction of Rabbi Nathan Adler, Sir Moses Montefiore, and Joseph Zedner (London), Albert Cohn (Paris), S. D. Luzzatto (Padua), M. Sachs (Berlin), Eliezer Lipman Silberman (Lyck), and M. Straschun (Wilna). It was reestablished at Berlin in 1885 under the supervision of Abraham Berliner (Berlin), Moses Ehrenreich (Rome), J. Derenbourg and David Ginsburg (Paris), S. J. Halberstam (Bielitz), A. Harkavy (St. Petersburg), M. Jastrow (Philadelphia), David Kaufmann (Budapest), and M. Straschun (Wilna).

The society has published the following works:

1864.	'Eṭ Sofer, by David Ḳimḥi.
1864-88.	Paḥad Yiẓḥaḳ, by R. Isaac Lampronti, letters ב-ח. Lyck-Berlin.
1864-98.	Teshubot ha-Ge'onim: one hundred and twenty responsa of the Geonim. Lyck.
1864-1902.	Diwan le-R. Yehudah ha-Levi. Lyck-Berlin.
1866.	Melammed ha-Talmidim, by Jacob Anatoli.
1866.	Eben Sappir, by Jacob Safir.
1868.	Pesiḳta ha-Yeshanah, attributed to Rab Kahana.
1868-71.	Imre Shefer, by N. H. Wessely.
1871.	Wikkuaḥ 'al ha-Ahabah, by Judah Abravanel.
1871.	Sefer Toledot Rabbenu Yiẓḥaḳ Lampronṭi.
1871.	Sefer ha-Musar, by Ephraim of Modena.
1874.	Tagmule ha-Nefesh, by Hillel b. Samuel of Verona.
1874.	Sefer ha-'Ibbur, by Abraham ibn Ezra.
1874.	Perush 'al Shir ha-Shirim, by Moses ibn Tibbon.
1874.	Yiḥuse Tanna'im we-Amora'im, by a contemporary of Rashi.
1881.	Ha-Sarid weha-Paliṭ, by Saadia Gaon.
1881-83.	Sefer Ḥasidim.
1882.	Meteḳ Sefatayim, by R. Immanuel Frances.
1885.	Perush 'al Sefer Yeẓirah, by Isaac Barcelona.
1885-87.	Teshubot ha-Ge'onim.
1885-1904.	Ḳobeẓ 'al Yad, a series of collected smaller works; collections of old documents.
1886.	Tarshish, diwan of R. Moses b. Ezra.
1886-92.	Maimonides, commentary on Seder Ṭohorot.
1887.	Sefer ha-Galuy, by R. Joseph Ḳimḥi.
1887-92.	Halakot Gedolot.
1888.	Sefer Zikkaron, by Joseph Ḳimḥi.
1889.	Ma'yan Gannim, commentary on Job, by Samuel b. Nissim Masnuth.
1889-93.	Maḥzor Vitry, by R. Simḥah, pupil of Rashi.
1890.	Yehudah Ya'aleh, by Judah Cologna and Isaac Hirschenson.
1891-92.	Teshubot MaHaRaM, responsa of R. Meïr of Rothenburg.

1893–96.	Sefer ha-Shorashim, by R. Jonah ibn Janah.
1894.	Midrash Zuta, on the five Megillot.
1895.	Megillat Sedarim, by Abraham Brody.
1895.	Seder ha-Hakamim.
1898.	Minhat Kena'ot, by R. Jehiel of Pisa.
1898.	She'elot u-Teshubot she be-Sefer ha-Yashar le-Rabbenu Tam.
1899.	Midrash ha-Torah, commentary on the Pentateuch, by Solomon Astruc of Barcelona.
1899.	Kebod Hakamim, by David Messer Leon of Mantua.
1899-1901.	Orhot Hayyim, by Aaron ha-Kohen of Lunel.
1900.	Tashlum Abudarham, Jose b. Jose's "Abodah" and other ritual poems, with notes by Abudarham.
1900–01.	Midrash Sekel: Tob, by Menahem b. Solomon.
1902.	Sefer ha-'Ittim, by Judah b. Barzilai of Barcelona.

Bibliography: H. D. Lippe, *Bibliographisches Lexicon*, i. 451 *et seq.*, Vienna, 1881; new series, i. 391, Vienna, 1899; *Verzeichniss der Schriften des Verein Mekize Nirdamim*, 1885–95, 1896, 1898.

G. A. S. W.

MELAMMED ("teacher"): A term which in Biblical times denoted a teacher or instructor in general (*e.g.*, in Ps. cxix. 99 and Prov. v. 13), but which in the Talmudic period was applied especially to a teacher of children, and was almost invariably followed by the word "tinokot" (children; B. B. 21a). The Aramean equivalent was "makre dardeke" (*ib.*). The melammed was appointed by the community, and there were special regulations determining how many children he might teach, as well as rules governing the choice of applicants for the office and the dismissal of a melammed (*ib.*). These regulations were extended and augmented in the post-Talmudic period.

Besides the teachers appointed by the community there were others who were privately engaged by the parents of children; hence it became necessary to define accurately the mutual rights and duties of the melammed and of the parents. While giving instruction the melammed was not allowed to do any other work (Shulhan 'Aruk, Hoshen Mishpat, 333, 5). If he was ill, and therefore unable to teach for a time, as much was deducted from his wages as the lessons for that time would have cost (*ib.*); but if, on the other hand, the pupil was ill and could not take his lessons, the melammed received full payment (*ib.* 335, 1). The melammed was not allowed to punish his pupils too severely; and he had to teach both in the daytime and during part of the night (Shulhan 'Aruk, Yoreh De'ah, 245, 10–11). He might not leave his pupils alone, nor neglect his duties; and he was required to be pious and to understand his vocation (*ib.* 245, 17). Only a married man might be a melammed (*ib.* 245, 20–21). In addition to these regulations many others concerning the melammed are given in Yoreh De'ah (*l.c.* and 246), as well as in Hoshen Mishpat (*l.c.*), but some of them are not observed at present.

Regulations for Private Tutors.

A distinction is now made between the village melammed, who is engaged as a private tutor by a Jew living in a village, and who teaches the child in the house of its parents, and the melammed in a town, who teaches in his own home, which serves at the same time as a schoolroom (see Heder). A distinction is likewise drawn between the "melammed dardeki" and the "melammed gemara." The former teaches children of both sexes to read and write Hebrew, and also a chapter or two of each weekly lesson from the Pentateuch, and he generally has one or more assistants (in German "behelfer"). The gemara melammed, on the other hand, teaches Bible and Talmud to the boys, and, when they are older, the Shulhan 'Aruk as well. Searching questions are seldom asked concerning the melammed's pedagogical fitness; and it frequently happens, moreover, that parents, for charity's sake, send their children for instruction to persons who are unfit for any other vocation, but who possess more or less knowledge of the Talmud. As the profession of a melammed is not an enviable one, it is mostly practised by people who can not find any other employment. In Russia and Poland, therefore, the word "melammed" is, in slang, synonymous with "good-for-nothing" or "dolt." Among the Karaites, however, the term denotes, like "rab" among the Rabbinites, "teacher" and "master," and is regarded as a title of honor. Consequently there are among the Karaites many learned men who are called by the title "ha-melammed ha-gadol" (the great master), or merely "ha-melammed" (the master; comp. Pinsker, "Likkute Kadmoniyyot," Index; Gottlober, "Bikkoret le-Toledot ha-Kara'im," pp. 195, 207, Wilna, 1865).

Bibliography: Lampronti, *Pahad Yizhak*, s.v., in addition to the authorities cited in the article.

MELBOURNE: Capital of the British colony of Victoria. Attempts were made to hold services in Melbourne in the house of M. Lazarus in 1839 and in that of Solomon Benjamin in 1841; but the first congregation of the city was that entitled "The Holy Congregation of a Remnant of Israel," which was formed in 1844 with A. H. Hart as president. A synagogue, under the presidency of the above-mentioned Solomon Benjamin, was built on land granted by the government in 1847. The first minister was the Rev. Moses Rintel, a native of Edinburgh, who was called from Sydney to fill the position. In 1858 a trivial difference split the community and led to the formation of a so-called "Polish" section in opposition to the English congregation. The division was led by Rabbi Rintel himself, with whom the president had quarreled because the former had not been robed in his canonicals when attending the funeral of the wife of a leading member of the congregation. Rabbi Rintel began to hold services in a small hall in Lonsdale street, which was afterward abandoned for a new location in Stephen (Exhibition) street.

The existence of the second congregation, called the "Mikra Yisrael," had the good effect of stimulating Judaism in Melbourne through the spirit of rivalry which was created between the two sections. In 1875 the "foreign," now known as the East Melbourne, congregation built a synagogue in Albert street, where it still continues to hold well-attended services. Rabbi Rintel arrived in Melbourne in 1847, and he continued in his work there till his death in 1880. During his later years he exercised a considerable influence over the community. In 1865 he utilized the hall in Lonsdale street for a Jewish denominational school, which was placed under the control of a Mr. Curtis. The school had a short life, owing to the suppression of denominational by secular education.

The original congregation with its synagogue in Bourke street was looked upon for many years, and indeed is still regarded, as the leading Jewish religious organization. It was ministered to successively by the Revs. M. Rintel, A. Marks, A. F. Ornstein, Raphael Benjamin, and Dattnar Jacobson. Joseph Abrahams, present (1904) incumbent, arrived from London in 1884, and has helped in the establishment of the United Jewish Education Board, of which he is president as well as of the bet din of Victoria. In the latter position Abrahams has taken a firm stand on the admission of proselytes. In East Melbourne Rintel was succeeded by Revs. M. Grünbaum, A. D. Wolinski, I. Myers, and J. Lenzer. In 1873 the Bourke street congregation established a Hebrew denominational school, where both Hebrew and English subjects were taught. It was carried on with great success for about twenty years, after which time the congregation was compelled to close it on account of an insufficiency of funds.

Intimately connected with the Bourke street congregation and for many years regarded as the leading representative Jew of Victoria was the late Hon. Edward Cohen. Mayor of Melbourne on three occasions, he was elected by East Melbourne to the Legislative Assembly, continuing to represent this constituency till his death in 1877. His successor in Parliament was the late E. L. Zox, who also took a keen interest in synagogal and communal affairs, being at different times the president and treasurer of the Bourke street congregation. Among the living public men who maintain an interested connection with the synagogue is Sir Benjamin Benjamin.

The highest official position hitherto occupied by a Jew in Victoria was the attorney-generalship, held by the Hon. I. A. Isaacs during the Turner ministry from 1894 to 1899. His brother, J. I. Isaacs, was a member of Parliament, having been elected by the district of Owen in 1894. In addition to the above-named Jews who have sat or are still sitting in the Victorian Parliament, there are the Hon. N. Steinfeld of Ballarat, the Hon. Joseph Steinberg of Bendigo (ex-president of the Bendigo congregation), the Hon. F. J. Levien (whose parliamentary career has extended over a longer period than that of any other Jewish member and who was the first president of the Geelong congregation), Theo. Fink, B. J. Fink, and D. B. Lazarus, the last-named of whom was at one time an ardent supporter of the Jewish community in Bendigo.

The congregation of **St. Kilda,** a suburb of Melbourne, came into existence in the sixth decade of the nineteenth century. The synagogue was erected in 1872. For many years past the congregation has been composed for the most part of members of middle-class families in easy circumstances. The Michaelis family was for a long period among its chief supporters. The post of minister has been held by the Rev. E. Blaubaum since 1873. He is joint editor of the "Jewish Herald," a fortnightly publication which chronicles the doings of Australian Judaism generally. In communal matters the St. Kilda congregation, as a rule, cooperates with the Melbourne institutions. In its district are situated the almshouses and Montefiore Hall. There is a federated board, appointed from the Bourke street, Albert street, and St. Kilda congregations, to deal with the question of mixed marriages—the most difficult of all the problems engaging the attention of the Melbourne community.

The oldest charitable institution in Melbourne is the Philanthropic Society, founded in 1856. In 1863 the Jewish Friendly Society was formed; it still does good work. A very useful society, founded in 1888, is known as the "Jewish Mutual Aid." It was the parent of the Sydney Mutual Aid, the object of both being to grant substantial loans without interest. The founders of the Melbourne society were P. Blashki, J. P., and the Rev. I. Myers; the son of the latter founded the Sydney society.

J. D. I. F.

MELCHIOR, MORITZ GERSON: Danish merchant; born in Copenhagen June 22, 1816; died there Sept 19, 1884. At the age of twenty-four he entered the firm of Moses & Son G. Melchior, established by his grandfather. His father and one of his brothers, with whom he was associated in business, died a few years after, and left the management of the firm in his hands until, in 1850, he was joined by his younger brother **Moses Melchior** (b. Jan. 29, 1825, at Copenhagen). Together they enlarged the business greatly and founded a branch in Melbourne, Australia, in order to establish a market for Danish products.

Melchior filled several important public offices in Copenhagen. He was alderman from 1851 to 1869, a member of the Maritime and Commercial Court (Sö og Handelsretten) from 1862 to 1883, and a member of the Landsthing (Upper House) from 1866 to 1874. In 1861 he was one of the founders of the free-trade society, of which he later became the director. He was one of the founders also of Privatbanken (1857), and leader of the Chamber of Commerce (Grosserersocietetet) from 1873.

Within the Jewish community also Melchior was prominent; he was a member of its representative committee from 1849 to 1852, of which during the last year he was the leader.

Hans Christian Andersen (the well-known author of fairy tales) was often a guest in Melchior's house, where he spent his last days.

S. F. C.

MELCHIOR, NATHAN GERSON: Danish physician; born in Copenhagen Aug. 2, 1811; died there Jan. 30, 1872; brother of Moritz G. and Moses Melchior. Nathan graduated from the University of Copenhagen in 1835. In 1836-37 he traveled, studying ophthalmology at the universities of Berlin, Leipsic, Dresden, and Prague, and on his return made the treatment of diseases of the eye his specialty. In 1842 he became a member of the Medical Society of Brussels, and in 1843 of that of Mechlin. During the war with Germany (1848-50) he served as an army surgeon at a lazaretto in Copenhagen. In 1853 the title of "professor" was conferred upon him; in 1855 he was appointed privat-docent in ophthalmology at Copenhagen University; two years later he became a member of the board of directors of the newly founded Ophthalmological Institute in Copenhagen; and in the same year he acted as vice-president of the ophthalmological congress at Brussels. In 1856 he was sent abroad by the king to study the means adopted by foreign countries against the contagious Egyptian eye-disease then ravaging a great part of Europe.

Melchior published a number of essays in Danish medical journals, among which may be mentioned "Et Tilfælde af Heldig Overskærelse af Musculus Rectus Internus paa begge Öjnene" and "Nogle Ord med Hensyn til Prof. Switzer's Bemærkninger om Operation for Skelen." To the "Annales d'Oculistique" he contributed (1844) an article entitled "Om Pupillens Dilatation i Sund og Sygelig Tilstand."

MELCHIZEDEK (מלכי־צדק = "king of righteousness"): King of Salem and priest of the Most High in the time of Abraham. He brought out bread and wine, blessed Abram, and received tithes from him (Gen. xiv. 18–20). Reference is made to him in Ps. cx. 4, where the victorious ruler is declared to be "priest forever after the order of Melchizedek." The story is neither an invention nor the product of a copyist's error, as Cheyne ("Encyc. Bibl.") thinks, but rests upon ancient Jerusalemic tradition (as Josephus, "B. J." vi. 10, affirms; comp. Gunkel, "Genesis," 1901, p. 261), "Zedek" being an ancient name of Jerusalem (probably connected with the Phenician Συδυκ = "Zedek" = "Jupiter"; comp. Shab. 156a, b; Gen. R. xliii.; Pesiḳ. R. 20: see Baudissin, "Studien zur Semitischen Religionsgesch." 1876, i. 14–15). Hence "'ir ha-ẓedeḳ" (Isa. i. 21. 26). "neweh ẓedeḳ" (Jer. xxxi. 23, l. 7), "sha'are ẓedeḳ" (Ps. cxviii. 19). The city's first king, accordingly, was known either as "Adoni Zedek" (Josh. x. 1 *et seq.*; comp. Judges i. 5–7, where "Adonizedek" is the correct reading) or as "Malkizedek." The fact that he united the royal with the priestly dignity, like all ancient (heathen) kings, made him a welcome type to the composer of the triumphal song (Ps. cx.).

Type of Ancient Monotheism.

But to the Jewish propagandists of Alexandria, who were eager to win proselytes for Judaism without submitting them to the rite of circumcision, Melchizedek appealed with especial force as a type of the monotheist of the pre-Abrahamic time or of non-Jewish race, like Enoch. Like Enoch, too, he was apotheosized. He was placed in the same category with Elijah, the Messiah ben Joseph, and the Messiah ben David (Suk. 52b, where "Kohenẓedeḳ" should be corrected to "Malkiẓedeḳ"). The singular feature of supernatural origin is ascribed to all four, in that they are described as being "without father and without mother, without descent, having neither beginning of days nor end of life, but made like unto the son of God abiding forever" (Heb. vii 2–3; comp. Ruth. R. v. 3, where the original text [see "Pugio Fidei," p. 125] referred also to Ps. cx. 4, Isa. liii. 2, and Zech. vi. 12, comp. Yalḳ., Reubeni Bereshit, 9d; Epiphanius, "Hæresis," lv. 3). According to Midr. Teh. to Ps. xxxvii., Abraham learned the practise of charity from Melchizedek. Philo speaks of him as "the logos, the priest whose inheritance is the true God" ("De Allegoriis Legum," iii. 26).

The Samaritans identified the city of Salem with their sanctuary on Mount Gerizim (see LXX., Gen. xxxiii. 18; comp. Eusebius, "Præparatio Evangelica," ix. 17).

The Melchizedekites.

The rabbis of later generations, rather antagonistic to the cosmopolitan monotheism of Alexandria, identified Melchizedek with Shem, the ancestor of Abraham (Ned. 32b; Pirḳe R. El. xxiii.; Targ. to Gen. xiv. 4). A singular story is told of Melchizedek in the Ethiopian Book of Adam and Eve, which, before it was turned into a Christian work, seems to have presented a strange combination of Jewish and Egyptian elements emanating from a sect afterward known as the Melchizedekites. There (iii. 13-21) Noah tells his son Shem before his death to take "Melchizedek, the son of Canaan, whom God had chosen from all generations of men, and to stand by the dead body of Adam after it had been brought from the ark to Jerusalem as the center of the earth and fulfil the ministry before God." The angel Michael then took away Melchizedek, when fifteen years of age, from his father, and, after having anointed him as priest, brought him to (Jerusalem) the center of the earth, telling his father to share the mystery only with Shem, the son of Noah, while the Holy Spirit, speaking out of the ark when the body of Adam was hidden, greeted Melchizedek as "the first-created of God." Shem went, carrying bread and wine, and, assisted by the angel, brought the body of Adam to its destination. Melchizedek offered the bread and wine upon the altar they built near the place where Adam's body was deposited, and then Shem departed, leaving the pure lad in his garment of skins under the sole protection of the angel, no one on earth knowing of his whereabouts until, at last, Abraham met him. Compare also "Die Schatzhöhle" (Bezold's transl. 1883, pp. 26–28), where the father of Melchizedek is called "Malki" and the mother "Yo-Ẓedeḳ"; and see the notes to Malan's "Book of Adam and Eve" (1882, pp. 237–238). Against the opinion of Roensch (Das Buch der Jubiläen," 1874, p. 502), that the story of Melchizedek has been intentionally omitted from the Book of Jubilees, see Charles in his Commentary to Jubilees (xiii. 25). A remnant, probably, of these Melchizedekites appears in early Christian literature as a heretic sect which regarded Melchizedek as a great heavenly power and as a son of God, superior to Jesus (Epiphanius, "Hæresis," lv. 1–9; Hippolytus, "Refutatio Hæresium," vii. 36, x. 20; pseudo-Tertullian, 48; Augustinus, "De Hæresibus," 34; see also Herzog-Hauck, "Real-Encyc." *s.v.* "Monarchianismus").

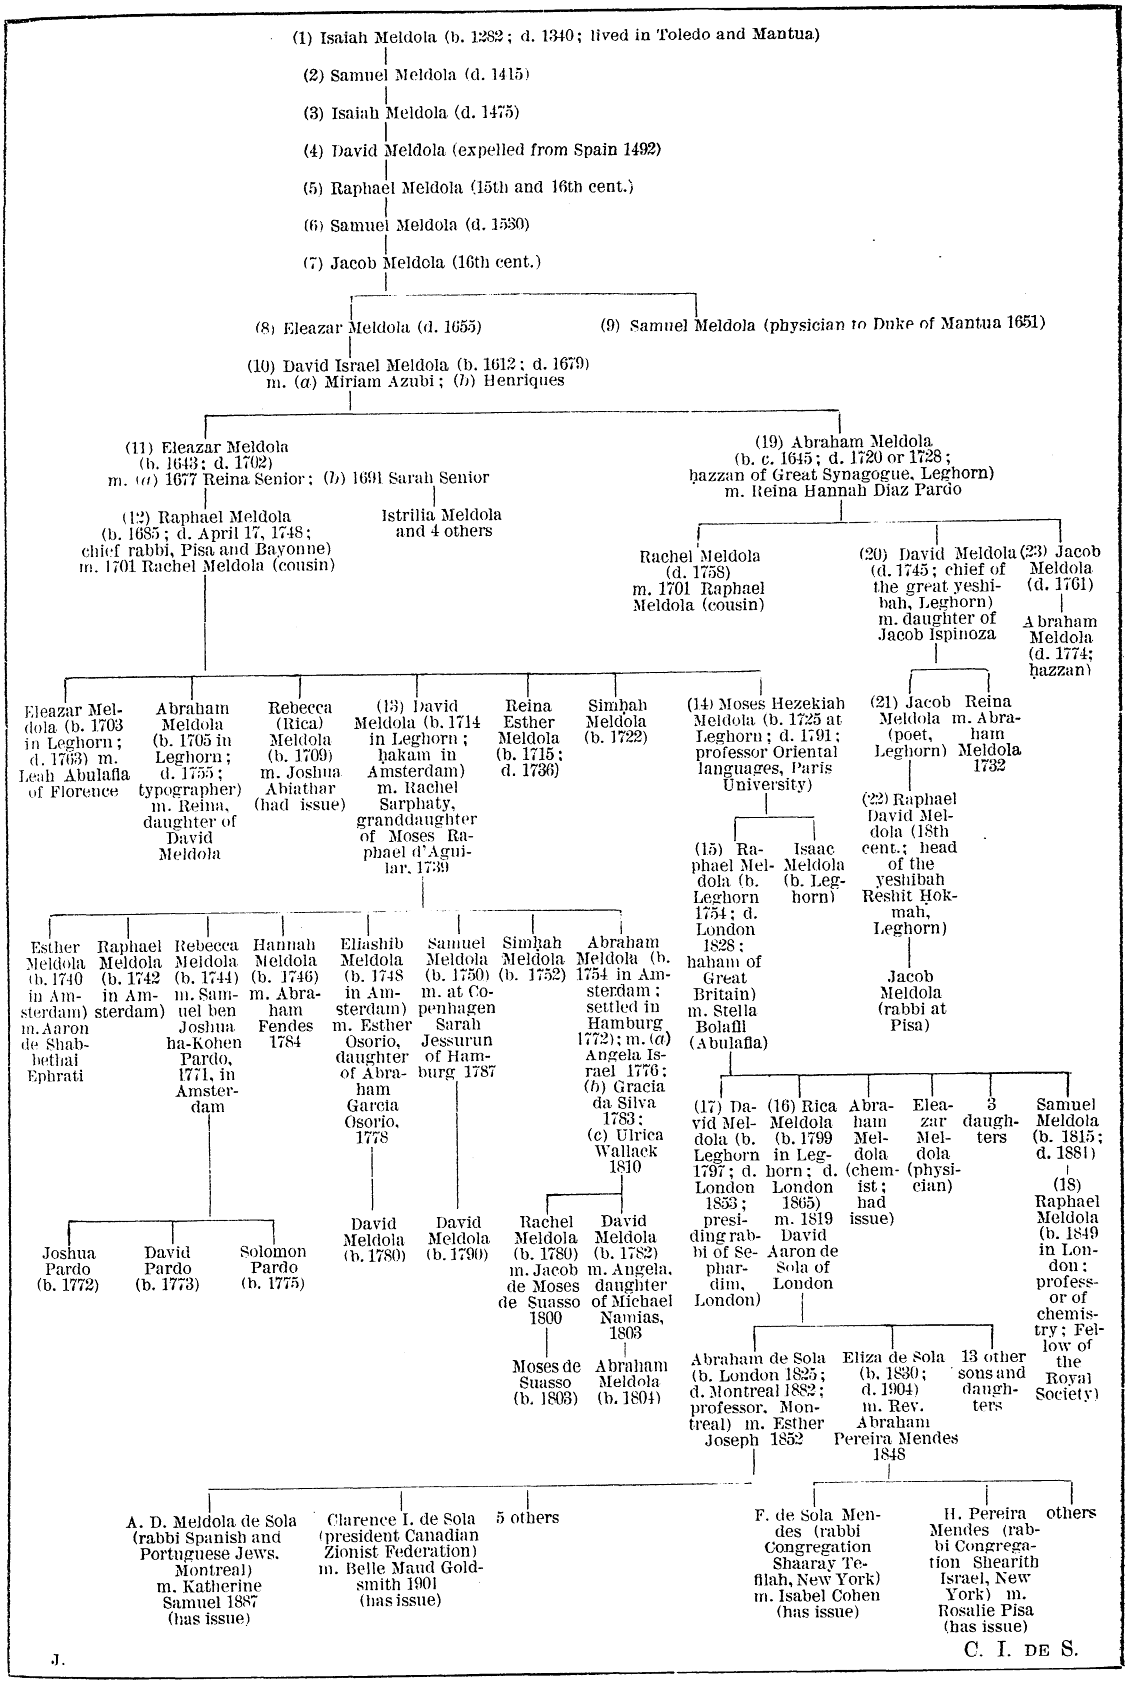
MELDOLA: Ancient Sephardic family whose genealogy can be traced through sixteen genera-



(1) Isaiah Meldola (b. 1282; d. 1340; lived in Toledo and Mantua)
(2) Samuel Meldola (d. 1415)
(3) Isaiah Meldola (d. 1475)
(4) David Meldola (expelled from Spain 1492)
(5) Raphael Meldola (15th and 16th cent.)
(6) Samuel Meldola (d. 1530)
(7) Jacob Meldola (16th cent.)
(8) Eleazar Meldola (d. 1655)
(9) Samuel Meldola (physician to Duke of Mantua 1651)
(10) David Israel Meldola (b. 1612; d. 1679) m. (a) Miriam Azubi; (b) Henriques
(11) Eleazar Meldola (b. 1643; d. 1702) m. (a) 1677 Reina Senior; (b) 1691 Sarah Senior
(19) Abraham Meldola (b. c. 1645; d. 1720 or 1728; hazzan of Great Synagogue, Leghorn) m. Reina Hannah Diaz Pardo
(12) Raphael Meldola (b. 1685; d. April 17, 1748; chief rabbi, Pisa and Bayonne) m. 1701 Rachel Meldola (cousin)
Istrilia Meldola and 4 others
Rachel Meldola (d. 1758) m. 1701 Raphael Meldola (cousin)
(20) David Meldola (d. 1745; chief of the great yeshibah, Leghorn) m. daughter of Jacob Ispinoza
(23) Jacob Meldola (d. 1761)
Abraham Meldola (d. 1774; hazzan)
Eleazar Meldola (b. 1703 in Leghorn; d. 1763) m. Leah Abulafia of Florence
Abraham Meldola (b. 1705 in Leghorn; d. 1755; typographer) m. Reina, daughter of David Meldola
Rebecca (Rica) Meldola (b. 1709) m. Joshua Abiathar (had issue)
(13) David Meldola (b. 1714 in Leghorn; hakam in Amsterdam) m. Rachel Sarphaty, granddaughter of Moses Raphael d'Aguilar, 1739
Reina Esther Meldola (b. 1715; d. 1736)
Simhah Meldola (b. 1722)
(14) Moses Hezekiah Meldola (b. 1725 at Leghorn; d. 1791; professor Oriental languages, Paris University)
(21) Jacob Meldola (poet, Leghorn)
Reina m. Abraham Meldola 1732
(22) Raphael David Meldola (18th cent.; head of the yeshibah Reshit Hokmah, Leghorn)
Jacob Meldola (rabbi at Pisa)
(15) Raphael Meldola (b. Leghorn 1754; d. London 1828; haham of Great Britain) m. Stella Bolafli (Abulafia)
Isaac Meldola (b. Leghorn)
Esther Meldola (b. 1740 in Amsterdam) m. Aaron de Shabbethai Ephrati
Raphael Meldola (b. 1742 in Amsterdam)
Rebecca Meldola (b. 1744) m. Samuel ben Joshua ha-Kohen Pardo, 1771, in Amsterdam
Hannah Meldola (b. 1746) m. Abraham Fendes 1784
Eliashib Meldola (b. 1748 in Amsterdam) m. Esther Osorio, daughter of Abraham Garcia Osorio, 1778
Samuel Meldola (b. 1750) m. at Copenhagen Sarah Jessurun of Hamburg 1787
Simhah Meldola (b. 1752)
Abraham Meldola (b. 1754 in Amsterdam; settled in Hamburg 1772); m. (a) Angela Israel 1776; (b) Gracia da Silva 1783; (c) Ulrica Wallack 1810
(17) David Meldola (b. Leghorn 1797; d. London 1853; presiding rabbi of Sephardim, London)
(16) Rica Meldola (b. 1799 in Leghorn; d. London 1865) m. 1819 David Aaron de Sola of London
Abraham Meldola (chemist; had issue)
Eleazar Meldola (physician)
3 daughters
Samuel Meldola (b. 1815; d. 1881)
(18) Raphael Meldola (b. 1849 in London; professor of chemistry; Fellow of the Royal Society)
Joshua Pardo (b. 1772)
David Pardo (b. 1773)
Solomon Pardo (b. 1775)
David Meldola (b. 1780)
David Meldola (b. 1790)
Rachel Meldola (b. 1780) m. Jacob de Moses de Suasso 1800
David Meldola (b. 1782) m. Angela, daughter of Michael Namias, 1803
Moses de Suasso (b. 1803)
Abraham Meldola (b. 1804)
Abraham de Sola (b. London 1825; d. Montreal 1882; professor, Montreal) m. Esther Joseph 1852
Eliza de Sola (b. 1830; d. 1904) m. Rev. Abraham Pereira Mendes 1848
13 other sons and daughters
A. D. Meldola de Sola (rabbi Spanish and Portuguese Jews, Montreal) m. Katherine Samuel 1887 (has issue)
Clarence I. de Sola (president Canadian Zionist Federation) m. Belle Maud Goldsmith 1901 (has issue)
5 others
F. de Sola Mendes (rabbi Congregation Shaaray Tefilah, New York) m. Isabel Cohen (has issue)
H. Pereira Mendes (rabbi Congregation Shearith Israel, New York) m. Rosalie Pisa (has issue)
others

C. I. de S.

Genealogical Tree of the Meldola Family.

tions without a break to Isaiah Meldola of Toledo (born in 1282). Under Spanish names it long flourished in Toledo, and produced many men of note and of learning. The name "Meldola" seems to have been assumed when some of the family first established themselves in Italy, prior to the going of Isaiah Meldola to Mantua. One branch, however, took the name "Montalto"; and from this branch was descended the Portuguese Marano family of Montalto, including Elihu Montalto (physician to Marie de Medici, queen of Henry IV. of France, and counselor to Louis XIII.), as well as the painter G. S. D. Montalto.

Subjoined is the genealogical tree of the Meldola family. The numbers in parentheses correspond to those given in the text.

1. **Isaiah Meldola:** One of the sages of Castile; born in Toledo, Spain, 1282; died at Mantua, Italy, in 1340. He was ḥakam of Toledo after having previously served as dayyan. Owing to politico-religious troubles he left Spain for Italy, where some of his relatives had already settled, and he was appointed chief rabbi of Mantua and head of the college there.

2. **Samuel Meldola:** Son of Isaiah (No. 1); born in the earlier half of the fourteenth century; died in 1415. He succeeded his father as ḥakam of Mantua and as head of the college. He was distinguished as a preacher, and was the author of several theological works.

3. **Isaiah Meldola:** Son of Samuel (No. 2); born in Mantua toward the close of the fourteenth century; died 1475. He was ḥakam and dayyan, and was the author of "Ḥazon Yesha'yahu," a commentary on Isaiah, printed in Mantua. He also practised medicine and wrote a work on physiology.

4. **David Meldola:** Son of Isaiah Meldola (No. 3); born at Mantua in the early part of the fifteenth century; died about 1505. He went to Spain, where he made efforts to maintain the Spanish Jewish colleges, but returned to Italy in 1492. Rejoining his relatives in Mantua, he was received at court with favor. He devoted his declining years to the writing of a number of Jewish theological works.

5. **Raphael Meldola:** Son of David Meldola (No. 4); born about the middle of the fifteenth century; died during the earlier half of the sixteenth century. He was ḥakam of the Jewish community of Mantua, and also a court councilor.

6. **Samuel Meldola:** Son of Raphael Meldola (No. 5); born during the latter part of the fifteenth century; died 1530. He was physician to the Duke of Mantua, winning eminence by his skill as a practitioner; and he wrote a work on medicine. He was also ḥakam and dayyan of Mantua.

7. **Jacob Meldola:** Son of Samuel Meldola (No. 6); born about the beginning of the sixteenth century; died about 1580; one of the chief rabbis of Mantua. He was the father of two sons, Eleazar (No. 8) and Samuel (No. 9).

8. **Eleazar Meldola:** Elder son of Jacob Meldola (No. 7); born in the sixteenth century; died, according to most authorities, in 1655, but one authority places the date much earlier. He succeeded his father as ḥakam of Mantua, and was very distinguished as a preacher, his oratorical powers securing for him renown throughout Italy. A volume of his orations was published in Venice.

9. **Samuel Meldola:** Italian physician; lived during the seventeenth century; younger son of Jacob Meldola (No. 7) and brother of Eleazar Meldola (No. 8). He was physician to the Duke of Mantua, and was the author of a work on medicine, entitled "Refu'ot Te'alah." He devoted attention also to religious and metaphysical studies and was the author of "Ḳeri'at Shema'" and "Debar Shemuel."

10. **David Israel Meldola:** Son of Eleazar Meldola (No. 8); born at Mantua 1612; died, according to most authorities, in 1679 at Florence, while one source gives an earlier date. He was trained for the rabbinate in his native city, but on account of the war, famine, and pestilence he fled to Florence. He went thence to Leghorn, where he was head of the college for more than twenty years, and was then persuaded to return to Florence to accept office as ḥakam and ab bet din.

Meldola was the author of a commentary on Scriptural passages, and of "Emunah Omen," a work on the Jewish faith. He married Miriam Azubi, and after her death espoused a grandniece of Elihu Montalto. He was survived by two sons: Eleazar (No. 11), from whom springs the elder branch of the family, and Abraham (No. 19), from whom is descended the younger branch.

11. **Eleazar Meldola:** Elder son of David Israel Meldola (No. 10); born 1643; died 1702 (one authority states 1704). He went from Florence to Leghorn with his younger brother, and became head of the Talmud Torah, and chief rabbi of Leghorn. He was noted as a grammarian and as the author of a work entitled "Halakah we-Haggadah." He married in 1677 Reina Senior, daughter of Jacob Senior, by whom he had seven children. After her death he married (1691) Sarah Senior, by whom he had five children.

12. **Raphael Meldola:** Italian rabbi; born at Leghorn in 1685; died April 17, 1748; fifth child of Eleazar Meldola (No. 11) by his wife Reina Senior. He was originally named **Samuel Jacob Meldola,** but on his recovery from a dangerous illness his name was changed to Raphael. He was elected rabbi of Pisa in 1722. In 1729 he was elected to succeed Isaac da Costa as chief rabbi of Bayonne and St. Esprit, and he remained ḥakam of these congregations until 1741, when he returned to Leghorn.

Meldola was the author of a large number of theological and ethical works, the most important being "Mayim Rabbim" (Amsterdam, 1737), and his responsa, in several volumes, which gained for him a European reputation, and which were afterward published by his son David in Amsterdam. He wrote also a poem in honor of Mendelssohn's "Jerusalem." He married in 1701 Rachel Meldola, the daughter of his uncle Abraham, by whom he had seven children. His third son, David (No. 13), and his youngest son, Moses Hezekiah (No. 14), became very distinguished. His second son, Abraham, born in Leghorn 1705, was a noted typographer.

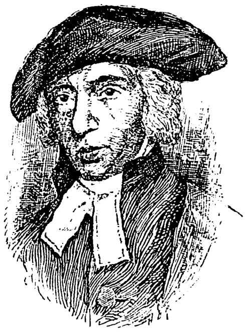
13. **David Meldola:** Third son of Raphael Meldola (No. 12); born at Leghorn 1714; died (it is

said) at the age of 104. He went with his father to Bayonne, left that city in 1735, and settled in Amsterdam, where he undertook the publication of his father's works, as well as some of his own writings. He was appointed ḥakam of several of the religious societies and philanthropic organizations.

Meldola was the author of: "Mo'ed Dawid" (Amsterdam, 1740), an astronomical and mathematical work, including a poem giving the rules of the calendar (first published in the ritual work "Tefillat Yesharim," *ib.* 1740); "Dibre Dawid" (*ib.* 1753); "Darke Yesod ha-Limmud," on the methodology of the Talmud (*ib.* 1754); "Darke Dawid" (Amsterdam and Hamburg, 1793–95); and many others preserved in manuscript (Nepi-Ghirondi, "Toledot Gedole Yisrael," p. 79). He married in 1739 Rachel Sarphaty (or Sarfatti), daughter of Eliashib Nathanael Sarphaty of Amsterdam and granddaughter of Moses Raphael d'Aguilar, by whom he had eight children, born in Amsterdam. His youngest son, **Abraham,** born 1754, removed to Hamburg in 1772, and was the author of many works, including "Traduccion de las Cartos Mercantines y Manuales," Hamburg, 1784, and "Nova Grammatica Portugueza," Leipsic, 1785.

14. Moses Hezekiah Meldola: Youngest son of Raphael Meldola (No. 12); born at Leghorn 1725; died 1791. Though trained in the banking business, he abandoned commercial pursuits to follow a professional career. He won renown as a philologist, and was the author of a number of books on Semitic languages; he likewise attained to the rank of ḥakam and was appointed professor of Oriental languages in the University of Paris. He was the father of two sons, Raphael (No. 15) and Isaac.

15. Raphael Meldola: Elder son of Moses Hezekiah Meldola (No. 14); born in Leghorn 1754; died in London June 1, 1828; one of the most prominent members of the Meldola family. He received a thorough university training, both in theological and in secular branches, and displayed such remarkable talents that when only fifteen years old he was permitted to take his seat in the rabbinical college. He was preacher in Leghorn for some years, and in 1803 he obtained the title of rabbi.



Raphael Meldola.

In 1805 Meldola was elected haham of the Spanish and Portuguese Jews of Great Britain, and proved a worthy successor of Sasportas and Nieto. His name will ever be indissolubly associated with that of Bevis Marks, London. Possessed of a remarkably virile mind, he was a dominant factor in the British Jewry of his generation. He was the author of "Ḳorban Minḥah," "Ḥuppat Ḥatanim" (1796), and "Derek Emunah," published by his son after his death. He left several other works in manuscript. His scholarship attracted around him a circle in which were many of the most distinguished men of his day, including Benjamin D'Israeli and Isaac D'Israeli; and it is noteworthy that he opposed the policy which produced the famous rupture between the latter and the mahamad (see D'Israeli, Isaac). He maintained a literary correspondence with many of the most prominent Christian clergymen and scholars of his time; and his acquaintance with the Archbishop of Canterbury and the Canon of Windsor led to his being received by King George III.

Meldola married Stella Bolaffi (Abulafia), by whom he had four sons and four daughters.

16. Rica Meldola: Eldest daughter of Raphael Meldola (No. 15); born at Leghorn 1799; married (May 20, 1819) **David Aaron de Sola,** senior minister and preacher of Bevis Marks Synagogue, London, and became the mother of a large family. Of her sons, **Abraham de Sola** was professor of Semitic languages and literature in McGill University, Montreal, Canada, and rabbi of the Sephardic congregation in that city. He was the father of the Rev. **A. D. Meldola de Sola** and of **Clarence I. de Sola** of Montreal. One of Rica's daughters, **Eliza,** married the Rev. **Abraham P. Mendes** of Birmingham and London, England, and afterward of Newport, R. I. She was the mother of the Revs. F. de Sola Mendes and H. Pereira Mendes of New York.

17. David Meldola: Eldest son of Raphael Meldola (No. 15); born at Leghorn 1797; died in London 1853. He obtained the rabbinical degree at Leghorn, and after the death of his father was elected presiding officer of the bet din of the London Sephardic community. Although not given the title of haham, he was the acting chief rabbi from 1828 until his death. It was during his incumbency that the London Jewish community passed through the stormy period of the early Reform movement. Meldola was the founder, in conjunction with Moses Angel, of the London "Jewish Chronicle." A profound Hebraist and Talmudist, he was the author of a number of writings, including several works in manuscript on Jewish theology and prayers, besides elegies, orations, and poems in Hebrew.

18. Raphael Meldola: Son of **Samuel Meldola,** youngest son of Raphael Meldola (No. 15); English naturalist and chemist; born in London in 1849. In 1875 he was sent by the Royal Society to the Nicobar Islands in charge of an eclipse expedition. Since 1885 he has been professor of chemistry at the Finsbury Technical College. He has made many discoveries of important compounds and coal-tar dyes. He is the author of a large number of scientific works, among them the article on "Organic Chemistry" in the "Encyclopædia Britannica," and "The Chemistry of Photography," London, 1884; and he has translated and edited Weismann's "Studies in the Theory of Descent," published in 1882. In 1895 and 1896 he was president of the Entomological Society. Meldola has accomplished much for the diffusion of technical instruction, being a member of the Technical Instruction Committee of the Essex County Council. In recognition of his services to science he was elected fellow of the Royal Society.

The line of Abraham, younger son of David Israel Meldola (No. 10), is as follows:

19. Abraham Meldola: Chief ḥazzan of the

Great Synagogue, Leghorn; died 1720 or 1728. Meldola was the author of two works on "ḥazzanut" and Hebrew music. He married Reina Hannah, daughter of Jacob Diaz Pardo, by whom he had a daughter, **Rachel,** and two sons, David (No. 20) and Jacob (No. 23).

20. David Meldola: Elder son of Abraham Meldola (No. 19). He was ḥakam and chief of the great yeshibah at Leghorn, and was the author of several volumes of Hebrew poems. He married the daughter of Jacob Ispinoza, by whom he had a son, Jacob (No. 21), and a daughter, **Reina.**

21. Jacob Meldola: Italian poet; flourished during the eighteenth century; son of David Meldola (No. 20). He was also minister of the Leghorn synagogue.

22. Raphael David Meldola: Son of Jacob Meldola (No. 21); lived during the latter half of the eighteenth century. He was president of the Reshit Ḥokmah College, Leghorn, and gained celebrity as a poet and humorist. He published several volumes of verse. He was the father of **Jacob Meldola,** who occupied the rabbinate of Pisa some time in the nineteenth century.

23. Jacob Meldola: Younger son of Abraham Meldola (No. 19); died in 1761. He was a noted theologian, and the author of "Sefat Ḥayyim." His son, **Abraham Meldola** (d. 1774), was ḥazzan in Italy, and was the author of two volumes of discourses.

G. C. I. de S.

MELIḤAH ("salting"): The process of salting meat in order to make it ritually fit (kasher) for cooking. The prohibition against partaking of blood was extended by the Rabbis to include, under certain conditions, flesh containing blood (based on Gen. ix. 4; see Blood). Hence various regulations are prescribed in the rabbinic codes which tend toward the elimination of blood from the meat before it becomes fit for use. The prohibition against blood, however, applies only to the blood of mammals and birds, not to the blood of fishes or of locusts, and even in mammals and birds only the blood which is contained in the veins or which is congealed on the surface, or which has begun to flow from the meat, is forbidden; as long as the blood is a part of the meat it may be eaten. For instance, one may cut off a piece of raw meat, wash off all the blood that may have gathered on its surface, and eat it (Ker. 20b, 21a; Shulḥan 'Aruk, Yoreh De'ah, 67, 1). When, however, meat is to be used for cooking, during which process it will certainly discharge a great deal of its blood, it is necessary to salt it, in order to let the blood flow freely for a time before cooking it. Meat that is to be roasted over an open fire need not be salted, for all the blood that will be discharged during roasting will be consumed in the fire. The custom, however, is to salt it a little even in this case (Ḥul. 14a, and Tos., *s.v.* "We-Nasbin"; Yoreh De'ah, 76).

The Process.

In preparing meat for cooking the following process is observed: The meat is first soaked in water for about half an hour in order that the pores may be opened to emit the blood. If it is left in the water longer than twenty-four hours, both the meat and the vessel containing it become unfit for use, for the meat is then regarded as if it had been cooked (כבוש הרי הוא כמבושל), and meat cooked without previous salting is forbidden. It is customary not to use for any other purpose the vessel in which meat is soaked before salting, although if it is used (after it has been washed) the food cooked in it, even if placed in it hot, is permitted for food (Yoreh De'ah, 69, 1). The meat is next placed on a wicker basket, or on straw, or on a slanting board, and thickly salted on all sides. In the case of poultry the body should be opened and the entrails removed before it is salted. The meat is left in the salt for about an hour, or, if urgent, for about twenty minutes. The salt is then shaken off, and the meat is rinsed twice, after which it may be cooked (*l.c.* 69, 4–8). If the meat is cooked before the salt is washed off, the pot and all that it contains are forbidden, unless the quantity in the pot is sixty times greater than the quantity of the salt and the moisture of the blood upon it. If the meat is cooked before it is salted, the pot and all that it contains are forbidden, unless the quantity in the pot is sixty times greater than the piece of unsalted meat, and even then, according to some authorities, the piece itself is forbidden (*l.c.* 69, 9, 11; see also "Be'er Heṭeb").

Details.

Three days from the time the animal is slaughtered the meat does not discharge its blood through salting, and therefore may not be cooked except by roasting over an open fire. If, however, water has been poured over it during that time, it may be salted within three days from the time the water was poured over it, and may then be used in cooking (*l.c.* 69, 12, 13). The liver, because of the abundance of blood it contains, must be cut open and roasted before it may be cooked (Ḥul. 111a; Yoreh De'ah, 73). Before salting the head must be cut open and the brains removed; the horny parts of the legs must be removed (*l.c.* 71); the heart must be cut open; and it is also customary to open the large veins of the lungs before salting (*l.c.* 72).

Many pieces of meat, even if some are beef and some poultry, may be placed one on the top of the other in salting. Fish and meat, however, should not be salted together, for the fish, after discharging all its blood, will absorb the blood discharged by the meat (*l.c.* 70). The intestines should not be salted with other parts, although if this be done they may still be used in cooking (*l.c.* 75). Eggs found in the body of a fowl need salting, but must not be salted with other meat (*l.c.* 75, 1, Isserles' gloss).

MELLI: Family of scholars and rabbis that derived its name from Melli, an Italian village in the province of Mantua. The family can be traced back to the fifteenth century.

Eliezer Melli: Rabbi of Venice in the sixteenth century. He is mentioned in the responsa of Moses Provençal (No. 194).

Elijah ben Abraham Melli: The earliest known member of the family; rabbi of Parma in the second half of the fifteenth century. Among the Italian manuscript responsa in the possession of Mortara there is one of Elijah Melli's, addressed (1470) to Joseph Colon, concerning the divorcing of a baptized Jew. It was issued at Parma, where Melli was rabbi. Appended to it is the answer of Joseph Colon approving the bill of divorce.

Jehiel Melli: Rabbi of Mantua in the beginning of the seventeenth century; author of "Tappuḥe Zahab" (Mantua, 1623), an abstract of Elijah de Vidas' book on religious ethics, "Reshit Ḥokmah"; appended are annotations concerning ritual laws. It was published with the "Hanhagot" of Asher ben Jehiel by Melli's son-in-law, David Portaleone.

Phinehas Elijah ben Ẓemaḥ Elijah Melli: Rabbi in Mantua in the sixteenth century. He received the degree of chief rabbi Jan. 15, 1581. He was distinguished as a Talmudist, and is quoted by Lampronti ("Paḥad Yiẓḥaḳ," iv. 24) and Moses Provençal (Responsa, Nos. 97, 112). Responsum No. 231 of the 260 responsa of the Italian rabbis is his.

Ẓemaḥ Elijah b. Phinehas Elijah Melli: Rabbi in Mantua in the sixteenth century. He received the degree of chief rabbi on the same day as his father. Responsa of his, addressed to various contemporaries, are among the manuscripts in the possession of Mortara.

MELO, DAVID ABENATAR: Rabbi and poet; born in Spain about 1550. His translation of some of the Psalms into Spanish verse brought him under the suspicion of the Inquisition, and he was imprisoned. When, after several years of torture, he was acquitted (1611), he left Spain and emigrated to Amsterdam. He soon gained a reputation as a stylist and scholar; became a member of the academy "De los Pintos"; and was finally appointed rabbi of the Portuguese synagogue Bet Yisrael in Amsterdam. There are many allusions in his verses to the tortures he underwent while imprisoned by the Inquisition.

G. W. M.

MELOL or **MELUL** (מילול), **MOSES ḤAY:** Compositor and translator in Leghorn (1777–93); son of Jacob Raphael Melol and brother of David Ḥayyim Melol. He translated or edited the "Sefer Azharot ha-Ḳodesh" and the Book of Ruth (Leghorn, 1777), and translated into Ladino "Seder Hattarat Nedarim," the ritual for dissolving an oath, "como suelen practicar en la Yesiba de Gemiluth Ḥasadim" (*ib.* 1792). **Mordecai Melol,** a relative of his, edited "Alegria de Purim" (*ib.* 1792).

G. M. K.

MELS, ALFRED (pseudonym of **Martin Cohn**): German author; born at Berlin April 15, 1831; died at Summerdale, near Chicago, July 22, 1894. He studied at the University of Berlin, but in 1848 ran away to join the Foreign Legion of Algiers. He was severely wounded while on the way to Oran in charge of a detachment of recruits. Tiring of this life, he went to Paris, where he found literary employment with Alexandre Dumas.

In 1850 Mels as a private joined the rebel army of Sleswick-Holstein against Denmark, and at Idstadt was again wounded. Recovering, he returned to Paris as correspondent for various journals. Later he went to Madrid to become the editor of "Las Novedades." This position he resigned in order to join the Spanish army, in which he rose to the rank of captain. In 1864 Mels returned to Germany to become a contributor to the "Gartenlaube" and, later, to the "Daheim." In 1866 he published anonymously "Der Feldzug der Main-Armee," an account of the progress of the Prussian army operating in the vicinity of the Main in 1866. In 1869 he went to the Paris Exposition as representative of "Daheim" and "Ueber Land und Meer."

On the outbreak of the Franco-Prussian war Mels was appointed by the London "Times" one of its correspondents with the German army; but after the fall of Sedan he resigned in order to accompany Napoleon III. to Wilhelmshöhe. Thence he went to Vienna, where he became the feuilletonist of the "Wiener Tageblatt." In 1873 he published, under the nom de plume "Don Spavento," an exposé and a satirical criticism of Viennese journalists and their methods: "Typen und Silhouetten von Wiener Schriftsteller und Journalisten." From Vienna he went successively to Graz, Zurich, Paris, Italy, and Chicago.

Mels's best-known work is the comedy "Heine's Junge Leiden" (1872), which has been performed more than 2,000 times. An equal measure of success was achieved by "Der Neue Frühling" (1877), after two other plays, "Der Staatsanwalt" (1875) and "Das Letzte Manuscript" (1876), had been only moderately successful. Among Mels's other works are: "Erlebtes und Erdachtes" (1869); "Herzenskämpfe" (1869); "Gebilde und Gestalten" (1870); "Seltsame Schicksale" (1872); "Unsichtbare Mächte" (1875); and "Ferne Horizonte" (1876–78). Mels embraced Christianity in 1859.

MELUN (Hebrew, מילאון, מליאון, מילון, or מיילאון): Principal town of the department Seine-et-Marne, France. There was a very important Jewish community here as early as the twelfth century. The scholars connected with the Talmudic school of the city took part in the synod held at Troyes about 1160 under the direction of Rashbam and R. Tam ("Kol Bo," No. 117, where חכמי מיליאון must be read instead of חכמי ליאון). A Jew of Melun, Vivant, was appointed in 1202 to collect the taxes of his coreligionists; another, Leo Crossius, obtained permission in 1204 to live at the Châtelet in Paris. In Dec., 1230, Saint Louis, King of France, together with the barons at a meeting held at Melun, promulgated the following decrees: (1) henceforth Jews will not be permitted to make contracts; (2) they will be considered the property of the barons in whose territory they live; (3) in cases of migration they may be forcibly returned to their former homes; (4) debts due to them shall become void if not collected within nine legal terms, and shall no longer bear interest; (5) the vouchers for their credits shall become worthless if not submitted to the barons before All Saints' Day.

The Jews occupied a special quarter at Melun, called "La Iviferie," which is mentioned in the documents of the years 1206, 1212, and 1218, preserved in the archives of Notre Dame of Melun. In a document dated Jan. 5, 1307, there is a reference to the sale of a house and barn, situated in the Jews' street, that had belonged to the Jew Donin and his nephews. Another document, of the year 1311, refers to the sale of a house situated in the manor of the "hopital S. Jean de Hierusalem, rue de la Iviferie, iouxte la maison qu'on appelle l'eschole aux Juifs." In the library of Melun there is a manuscript of the fourteenth century entitled "Breviarium Judaicum," being a maḥzor (partly unedited), according to the French ritual, for the holy-days of Rosh ha-Shanah and Yom Kippur (described in detail by M. Schwab in "R. E. J." xiii. 296-299). Like the Jews in other parts of France, those of Melun were forced in 1306 by King Philip the Fair to leave the city without hopes of ever returning.

The most prominent scholars of Melun include: (1) Meshullam b. Nathan, identical, according to Z. Kahn (*ib.* i. 236), with the Narbonne scholar of the same name. Meshullam is known to have gone in 1150 from Narbonne to Melun, where he soon acquired a high reputation. He corresponded with R. Tam and the most famous rabbis of his time. He is quoted in the tosafot to Beẓah (16a), 'Abodah Zarah (29b), and Pesaḥim (105a). (2) Nathan b. Meshullam, son of the preceding; was living at Etampes in 1180. (3) Jedidiah, teacher of Abraham ben Nathan of Lunel. (4) Menahem Sire Léon, or Messer Leon (13th cent.). (5) The tosafist David of Melun, and (6) his son Judah, who in 1225 directed the Talmud school and was one of the four French rabbis who took part in 1240 in the religious controversy at Paris against Nicholas Donin.

MELVILLE, LEWIS (LEWIS S. BENJAMIN): English author; born in 1874. He is the author of the following works: "Life of Thackeray" (1899); "Thackeray's Stray Papers" (1902); "In the World of Mimes" (1902); and "Introduction to Thackeray's Works" (1903-4). He is a contributor to the "Fortnightly Review," "The Bookman," "Temple Bar," and to other English periodicals.

Bibliography: *Literary Year-Book*, 1904.

J. I. L. B.

MEM: Thirteenth letter of the Hebrew alphabet; the meaning of the name is "water," the primitive shape of the letter resembling waves (see Alphabet). "Mem" has two forms: one for the beginning or middle of a word (מ), and one for the end (ם). Its numerical value (in post-Biblical writings) is 40. Being a labial, it interchanges in the Semitic group of languages with other labials, that is to say, with פ, ו, ב, and sometimes also with the liquids ר, נ, ל. In composition it appears as a prefix, denoting place, time, instrument, or agent, and is employed to form all participles except the "ḳal" and "nif'al," and numerous substantives.

T. M. Sel.

MEMEL: City in the district of Königsberg, East Prussia. It has a population of 19,796, including 1,214 Jews (1900). The earliest mention of the Jews of Memel occurs in connection with the adjournment of the diet by Duke Albrecht April 20, 1567, when he decreed their expulsion from the city. In 1664 the Great Elector granted the Dutch Jew Moses Jacobsohn de Jonge the right of residence in the city. De Jonge, who carried on an extensive business, was finally compelled by financial difficulties to leave, and after that Jews were permitted to enter only during the fairs. Furs and Hebrew books were important articles of trade. The Prussian edict of 1812 enabled the Jews again to settle in Memel, and the extensive commerce in wood carried on with Russia attracted many Polish and Russian Jews, among others, to the city. The community was not organized until 1862, when the ḥebra ḳaddisha was established. The first rabbi was Dr. Isaac Rülf (1865-98), who established the parochial school and the hospital, as well as the method of religious instruction, and was actively interested in behalf of the Russian Jews. He was succeeded by Dr. Emanuel Carlebach.

Bibliography: Rülf, *Zur Gesch. der Juden in Memel*, in the first *Bericht der Israelitischen Religionsschule*, Memel, 1900.

D. H. V.

MEMOR-BOOK (German, "Memorbuch"): A manuscript list of localities or countries in which Jews have been persecuted, together with the names of the martyrs, and necrologies. Memor-books are devoted primarily to the learned and influential, although others may be included for special reasons, particularly Jews distinguished for their noble character, or who performed their duties toward the community with especial faithfulness or who gave or bequeathed gifts to its institutions. These memorials to the dead, which were intended to serve as inspirations to the living, were read wholly or in part at the memorial services (see Hazkarat Nesha-

MOT). The so-called "memmern"—the reading of the lists of martyrs and of places of martyrdom—was heard in the synagogue on the Sabbath before the Ninth of Ab and on the Sabbath before Pentecost also.

Memor-book of Nuremberg.

The earliest memor-book extant is that of the community of Nuremberg. It was begun in 1296, and is so complete that it must have had predecessors which served as models for it. At all events, notwithstanding their name, the memor-books are not borrowed from the Christian Church, but are a product of Jewish piety; for it has always been customary in Israel to remember the dead, to pray and to present offerings for them, and to hand their names down to posterity. Indeed, the Christian Church adopted this custom, which developed into the ritual observance of All Souls' Day, from Judaism. Although the different memor-books occasionally show a resemblance to a certain form of literature produced by the Catholic Church—the diptychs borrowed from the Romans, the "libri vitæ" or "libri viventium" used until the Carolingian period, the later calendars, necrologies, and martyrologies—yet many passages in the Church Fathers indicate that the prayers for the dead were Jewish in origin, and date from the time of the Apostles, who were Jews (comp. Bautz, "Das Fegfeuer," p. 76, Mayence, 1883; Propst, "Liturgie der Ersten Drei Christlichen Jahrhunderte," pp. 304 *et seq.*).

After it had become customary to remember scholars, martyrs, benefactors, and others in prayers on the Sabbath and on feast-days, the names of the dead were entered in special books, with the formulas for the "hazkarah" or the "hashkabah" (see HAZKARAT NESHAMOT), generally beginning with the words: "Yizkor Elohim nishmat . . ." (May God remember the soul of . . .). These books contained, in addition to the general part—the introductory prayers and the names of the noble and beneficent—a simple list of the dead, with notes on their works and the sums spent for the repose of their souls. A list of localities and countries where persecutions had taken place either preceded the necrologies or was added to them.

Name.

The original name of the memor-book was taken from the Bible, and it was called either "Sefer Zikkaron" (= "Book of Remembrance," after Mal. iii. 16) or "Sefer ha-Zikronot" (= "Book of Commemorations"). The later title, "Sefer Hazkarat Neshamot" (= "Memorial Book of Souls"), was soon superseded by the general name "Memorial Book" or "Memor-Book," which was applied to similar works in Christian circles also. The names "pinḳes" (= "book," from the Greek πίναξ), "Selbuch," and "Totenbuch" occur but seldom. The word "memor-book" (מאמרבוך, ממערבוך, מימורבוך) is derived from the Latin "memoria" (see Salfeld, "Martyrologium," p. xii., note 5).

So-Called Memor-Book of Mayence.

The memor-book of the community of Nuremberg, which was formerly designated by the misleading term "Memor-Book of Mayence," on the authority of Carmoly (in "Israelit," 1865, 1866), Grätz ("Gesch."), Neubauer (in "R. E. J." iv. 1 *et seq.*), and others, was begun in 1296 by a skilful scribe, Isaac b. Samuel of Meiningen, as a gift to be presented to the community of Nuremberg at the dedication of a new synagogue (Nov. 15, 1296). It was then taken to Mayence, where it was stolen and sold. Subsequently it was acquired by Carmoly, after whose death the Israelitische Religionsgesellschaft of Mayence obtained possession of it. It consists of three parts: (1) the first necrology of the community of Nuremberg, a list of deaths and of gifts from about 1280 to 1346; (2) the martyrologium, a list of martyrs from 1096 to 1349; and (3) the second necrology of the synagogue of Nuremberg, a memor-book and list of deaths and of gifts from 1373 to 1392. The entire work was edited by Salfeld (1896 and 1898); the necrologies by Stern and Salfeld ("Nürnberg im Mittelalter," pp. 95–205, Kiel, 1894–96); and the martyrology at Berlin, 1898, text, translation, introduction, etc.

Contents.

The first necrology, which was probably preceded by forty-four pages containing a history of the persecutions or a cycle of elegies, is prefaced by a prayer on the announcement of the New Moon; a benediction for the members of the community who undertake to keep the fast-day called "Sheni we-Ḥamishi we-Sheni"; a benediction for the benefactors and persons attending the synagogue; a prayer for the sick; and the "Ab ha-Raḥamim," a prayer for the martyrs of Israel. This is followed by a poem referring to the book, the building, and the dedication of the synagogue, and closing with the words: "The names of the donors have been entered in the Book of the Beloved, who sleep in the grave." Then come the prayers, found in nearly all the memor-books, for the souls of the spiritual heroes of Israel and of individual benefactors, and the prayers for the dead ("yizkor"), in Hebrew and Old French, for the individual martyrs and the persecuted communities. The martyrology is introduced by a summary of the persecutions of 1096 to 1298, the names of the martyrs between 1096 and 1349, a list of cities and villages in which persecutions took place under Rindfleisch (1298) and Armleder (1336–39), and at the time of the Black Death (1348–49). The second necrology is introduced by the ritual for the New Moon and a prayer for the members of the community ("Misheberak," almost in the present form), to which are added the same lists and other material as in the first necrology.

As illustrations of the nature of the memor-book there follows a translation of the oldest portion thereof (*i. e.*, the portion which, amplified according as time and circumstance required, is common to all memor-books) and of two yizkor from the Hebrew and one from the Old French:

> "The following souls are remembered [in prayer] on all Sabbaths of the year: Mar Solomon and Mistress Rachel, who have done much for the welfare of the community and have averted persecutions; our teacher R. Gershom, who by his teachings was the light of the eyes of the Israelites in the Diaspora; our teacher R. Simon the Great, who has done much for the communities and has averted persecutions; our teacher R. Solomon [b. Isaac, *i.e.*, Rashi], who through his commentaries was the light of the eyes of the Israelites in the Diaspora; our teacher R. Jacob and his brother R. Samuel, whose love spread

the study of the Word of God in Israel; Mar Isaac and Mistress Bela, through whose efforts the toll was repealed at Coblenz; our teacher R. Meïr b. R. Baruch, who has spread the study of the Word of God in Israel."

"May God remember, as He has remembered the souls of Abraham, Isaac, and Jacob, the souls of all members of communities who have been killed, stoned, burned, strangled, slaughtered, drowned, broken on the wheel, hanged, or buried alive because they remained true to their belief in the One God. Since they have suffered this grievous pain, may God remember them, together with all pious men and women who rest in paradise. To this we respond: Amen!"

"May God remember, as He has remembered the souls of Abraham, Isaac, and Jacob, the souls of all members of communities who have striven for the welfare of the congregation, have averted persecutions, have secured the repeal of taxes, and have recovered scrolls of the Law from unworthy hands. Whether a pious gift has been vowed for them or not, may God remember them for their deeds."

"May God remember the soul of . . . together with the souls of Abraham, Isaac, and Jacob, because he bequeathed . . . to the cemetery (Rememra Dé spirteine . . . comme spirteine . . . ki ad layés . . . pour amour ki fesis, cil le memred . . .); because he did this, may God remember him together with the pious who dwell in paradise. Amen!"

The formulas in French were added later, probably after 1306, when a number of French exiles settled at Nuremberg.

Several of the extant memor-books, single lists from manuscripts and printed texts, as well as works dealing with the subject, have been used by Salfeld in his edition of the Nuremberg memor-book (see his "Martyrologium," pp. xxvi. *et seq.*), and a discussion of their form, contents, and importance for the history of scholars and of persecutions will be found there. The following list gives a survey of his material:

Hebrew Codex No. 45 of the Landes- und Universitäts-Bibliothek in Strasburg, pp. 15–16, with lists of the martyrs of Worms of 1096 and 1349.

Hebrew Codex No. 87 (42) of the municipal library, Hamburg, fols. 31 *et seq.*, with 165 places of persecution in 1298 *et seq.* (Salfeld, *l.c.* p. xxvii.).

Extract from a memor-book of 1313–14, formerly in the possession of Chief Rabbi Charleville-Versailles, containing a list of places in which persecutions occurred between 1298 and 1303 (Jellinek, "Kontres Hamkonen, Märtyrer- und Memorbuch," p. 9, Vienna, 1881).

Maḥzor, MS. Oxford, Neubauer, "Cat. Bodl. Hebr. MSS." No. 1108, with a list of places of the persecutions of 1349 (reprinted in "R. E. J." iv. 29).

Oxford MS., Neubauer, "Cat. Bodl. Hebr. MSS." No. 1171, with lists of 1349 (reprinted in "R. E. J." iv. 29, 30).

Codex Epstein in Vienna (formerly in the possession of Halberstam of Bielitz), prayer-book according to the German ritual, with a list of communities in which martyrdoms took place (first ed. "Isr. Letterbode," viii. 89; republished in "Martyrologium," p. 79; comp. also pp. xxiii., 272).

Wibel, translation of an old fragment of a Jewish martyrology ("Unschuldige Nachrichten auf das Jahr 1740"), dating from the second half of the fifteenth century.

Two anonymous memor-books of German communities ("Martyrologium," p. xxviii.).

Manuscript of Carmoly, in possession of Dr. Brann at Breslau (*ib.*).

Memor-books of the following places: Alsheim, eighteenth century; Bayersdorf, written in 1689; Bergheim-on-the-Erft, begun in 1677; Bingen, in 1787; Bödigheim, 1745; Bonn, 1725; Bretten, between 1716 and 1742; Coblenz, 1580; Deutz (Cologne), beginning with 1581; Dittigheim, 1746; Flörsheim, nineteenth century; Frankfort-on-the-Main (first entry 1627); Fürth, memor-book of the Neuschule, of the Waisenverein, of the Klaus, and of the Altschule (edited by Löwenstein in Geiger's "Zeitschrift," i. 274, ii. 91 *et seq.*); Gailingen, 1842; Gross-Gerau, seventeenth century; Hagenau, 1800; Hanau, part i., 1601; Kastel, 1785; Kirchhain, 1773; Kochendorf, 1732; Kreuznach, 1638; Kriegshaber; Mayence communal memor-books of 1583 and 1837, Krankenpflege-Verein No. 3, beginning of eighteenth century, and Religionsgesellschaft, 1853; Mannheim, 1784; Michelstadt, beginning of eighteenth century; Minden, beginning of seventeenth century; Nieder-Ehnheim; Nuremberg (necrology of 1349; ed. Lowe, "The Memor-Book of Nürnberg," London, 1881); Ober-Ehnheim; Oppenheim, 1795 (after an earlier copy); Partenheim, 1738; Pfersee (comp. Perles in "Monatsschrift," xxii. 503 *et seq.*); Rheinbach near Bonn, one necrology of 1650; Sontheim; Strasburg; Treves, 1664; Vienna; Weilmünster, 1708; Weisenau near Mayence, 1782 (after an earlier copy); Worms, i., ii., iii.; Xanten, on the lower Rhine, one part of 1776.

Many other valuable memor-books exist besides those used by Salfeld. That of Buttenwiesen has been edited by Lamm in "Monatsschrift," xlv. 540 *et seq.*, while those of Binswangen, Edenheim, Ehrenbreitstein (formerly called Thal; first entry 1647), Emden, Harburg (Swabia), Höchberg near Würzburg, Oettingen, Steppach, Wallerstein, Wittelshofen, and many others are still unedited. The memor-book of Misslitz belonging to the Klaus Synagogue of Zechariah Lewi of Vienna has been described by Kaufmann (in Berliner's "Magazin," xvii. 289 *et seq.*), who used also the one of Düsseldorf ("Aus Heinrich Heine's Ahnensaal," p. 274), while that of Mamelsdorf has been mentioned by Zunz ("Literaturgesch." p. 112) and others.

Further study on the subject, together with scientific editions of the memor-books, would probably yield valuable data for statistics, economics, genealogies of scholars and families, nomenclature, diplomatics, ritual, and liturgy, as well as for Jewish history in general. See MARTYROLOGY.

J. S. SA.

MEMORIAL DATES: Jewish communities, as a rule, have taken no note of birthdays of any of their members and only in rare cases of the dates of death. One of these cases is the anniversary of the day on which Gedaliah was assassinated (3d Tishri), upon which a fast is observed by Jews in all parts of the world; and on the 18th Iyyar (Lag be-'Omer), Jews living in Palestine visit the tomb of Simon ben Yoḥai, believing this date to be the anniversary of the latter's death. Jews of eastern Europe, furthermore, record the days on which eminent rabbis die, because on every "Jahrzeit" (anniversary of the day of death) they make it a practise to visit the graves of such rabbis, and to ask for their intercession in heaven.

Besides these "Jahrzeiten" there are a number of days which, although they have acquired a religious aspect, have also a historical significance, and are observed either by the Jews as a whole or by local communities. Thus the Ninth of Ab is observed as a fast-day, for on that day the Temple was twice destroyed. On the twenty-fifth of Kislew the Feast of Ḥanukkah begins, because on that day Judas Maccabeus consecrated anew the Temple at Jerusalem (165 B.C.).

The communities of Cologne, Worms, Mayence, and a few other cities in the Rhine district observed fast-days in memory of the martyrs who died during the First Crusade (Zunz, "Ritus," p. 127). Polish Jews fast on the 20th of Siwan on account of the Cossack atrocities of 1648 (see FASTING AND FAST-DAYS). In Crete and Frankfort-on-the-Main as well as in certain communities in Egypt, special feasts or Purims are celebrated in commemoration of miraculous events. The Alexandrian Jews observed a memorial day in honor of the translation of the Bible into Greek (Philo, "Vita Mosis," ii., § 7; see also Festivals).

In imitation of these memorial days sanctified by religion, other dates of Jewish interest have been recorded from time to time, and are used in calendars, almanacs, and at times in the Jewish press. In recent years large collections of notable dates have been made by Jewish scholars and historians, beginning with L. Zunz. The following list gives in calendric order the more important and interesting of these:

January.

1. Jair Ḥayyim Bacharach, German rabbi, died, 1702. Several thousand Jews killed by an earthquake at Safed and Tiberias, 1837.
2. Persecutions of Jews at Lauda and Bischofsheim, 1235.
3. "Neue Stättigkeit" for Frankfort-on-the-Main makes right of domicil perpetual, 1617. Rachel, French actress, died, 1858.
4. Moses Mendelssohn, philosopher and religious reformer, died, 1786. Wilhelm Beer, German astronomer, born, 1797.
5. Joseph Salvador, Jewish historian, born, 1796. Edward Lasker, German statesman, died, 1884.
6. First auto da fé held at Seville, 1481.
7. Disputation at Tortosa, Joseph Albo being one of the participants, 1413. Sir Julian Goldsmid, English member of Parliament, died, 1896.
8. Samuel Cahen, translator of the Bible into French, died, 1862.
9. Liebmann Adler, American rabbi, born, 1812.
10. David Nieto, haham of London, died, 1728. Poll-tax abolished in France, 1784.
11. Abraham Mapu, Russian Hebrew writer, born, 1808. Lelio della Torre, Italian Jewish theologian, born, 1805.
12. Edict of Juan II. of Castile, withdrawing civil jurisdiction from the Jews, confirmed, 1412.
13. Law of Baden forms Jews into special religious community with all privileges, 1809. Alexander I. of Russia issues edict removing Jews from villages to towns and cities in the governments of Moghilef and Vitebsk, 1825.
14. Hebrew books, confiscated under bull of Feb. 28, 1593, burned at Rome, 1601. Great fire in the Frankfort ghetto, 1711.
15. Leopold Dukes, Hungarian Jewish scholar, born, 1810.
16. Johann Jacob Raabe, translator of the Mishnah, born, 1711.
17. Marcus Herz, physician and philosopher, born, 1747.
18. Solomon Sulzer, reformer of synagogal music, died, 1890.
19. Marcus Herz, physician and philosopher, died, 1803. Isaac D'Israeli, English litterateur and father of the Earl of Beaconsfield, died, 1848.
20. Moritz Oppenheim, German painter of Jewish family life, born, 1800.
21. Jews expelled from France, 1306. Nathan Marcus Adler, chief rabbi of the British empire, died, 1890.
22. David Cassel, Jewish historian, died, 1893. English Zionist Federation founded, 1899.
23. Abraham ibn Ezra, Bible exegete and poet, died, 1167.
24. Ferdinand Julius Cohn, German botanist and zoologist, born, 1828. Isaac Artom, Italian statesman and senator, died, 1900.
25. Disputation at Paris on the Talmud, 1240.
26. First edition of the Hebrew Pentateuch printed at Bologna, 1482.
27. Jerome Napoleon grants full civil rights to Jews of Westphalia, 1808.
28. Lippold, master of the Brandenburg mint, executed, 1573. Theodor Benfey, German Sanskritist and philologist, born, 1809.
29. Abraham Furtado, president of the Sanhedrin summoned by Napoleon, died, 1817.
31. Henry III. issues regulations for English Jewry, 1253.

February.

1. Bogumil Dawison, German actor, died, 1872. Mass-meetings held at New York and London expressing sympathy with the persecuted Jews of the Russian empire, 1882. Perez Smolenskin, Russian Hebrew writer, died, 1885.
3. Felix Mendelssohn-Bartholdy, composer, born, 1809. Charles the Bourbon, King of Naples and of the two Sicilies, invites the Jews back for fifty years, 1740.
4. "Resettlement Day" in England. Oliver Cromwell grants Carvajal and other Jews right of residence, 1657. Joseph Süss Oppenheimer executed; many Jews driven from Württemberg in consequence, 1738.
5. Rashi on the Pentateuch, the earliest dated printed Jewish book, issued at Reggio, 1475. The disappearance of Father Tomaso (Thomas) gives rise to the Damascus Affair, 1840. Nehemiah Brüll, Jewish scholar, died, 1891.
6. Solomon Munk, French Arabic scholar, died, 1867. Elijah Benamozegh, Italian rabbi and cabalist, died, 1900.
8. Shabbethai Cohen (Shach), died, 1663. Berthold Auerbach, German novelist, died, 1882.
9. Opening of the Sanhedrin at Paris, 1807. Isaac Adolphe Crémieux, French statesman, died, 1880.
11. Societät Felix Libertate founded at Amsterdam, 1795.
12. Auto da fé at Toledo at which 740 Jews were reconciled, 1486. Ludwig Börne, German writer, died, 1837. Isaac Baer Levinsohn, the Mendelssohn of Russia, died, 1860.
13. Zacharias Frankel, Jewish scholar and theologian, died, 1875.
14. Two thousand Jews burned at Strasburg, 1349. Jews ordered to leave Vienna, 1670.
15. Carel Asser, Dutch jurist, born, 1780.
16. Emancipation of the Jews of Sweden, 1870. Commission appointed to revise the laws concerning the Jews of Russia, 1883.
17. Heinrich Heine, German poet, died, 1856.
18. "Ḥaṭṭi Humayun" issued, granting full civic rights to Turkish Jews, 1856. Congregation of the Holy Office declares forcible baptism of Jewish children by Christian nurses effective, 1705.
19. Peter Beer, Austrian educator, born, 1758. Henry IV. grants Jews of Speyer protection to life and property, 1090.
21. Johann Christopher Wolf, Christian bibliographer of Jewish books, born, 1683.
22. Johann Reuchlin, champion of the Jews and defender of the Talmud, born, 1455. Isaac Marcus Jost, Jewish historian, born, 1793.
23. Franz Delitzsch, Christian Hebraist, born, 1813. Sir George Jessel, master of the rolls, England, born, 1824.
24. Moritz Oppenheim, German painter of Jewish family life, died, 1882.
25. Bull of Nicholas V. prohibiting Christians from having social intercourse with Jews and Saracens, 1451.
26. Jews expelled from all Papal States except Rome and Ancona, 1659.
27. Benedict Spinoza, philosopher, died, 1677. Paulus Cassel, Jewish scholar and convert to Christianity, born, 1821.
28. Vincent Fettmilch and his chief accomplices executed, Frankfort, 1616. Berthold Auerbach, German novelist, born, 1812. Rachel, French actress, born, 1820.

March.

1. About four thousand Jews burned at Worms, 1349.
4. Gregory IX. issues bill forbidding Christians to dispute on matters of faith with Jews, 1233. "Rights of Man" declared in Holland, 1795. Religious freedom proclaimed in Austria, 1849.
5. The states of Austria demand that no Jews be permitted to dwell there, 1460.
6. Massacre of Jews at Navarre, 1328.
7. Mordecai Jaffe, codifier of rabbinical law, died, 1612. Joseph Almanzi, bibliophile and poet, died, 1860.
9. Julius Fürst, Hebrew philologist and Jewish bibliographer, died, 1873.
10. Ignaz Moscheles, German composer, died, 1870.
11. Bull of Benedict XIII. against the Talmud and any Jewish books attacking Christianity, 1415. Edict giving the Jews of Prussia citizens' rights, 1812.
12. Judah Löb Bensew, Jewish grammarian and lexicographer, died, 1811. Ludwig Augustus Frankl, German writer and poet, died, 1893.
13. Aaron of Neustadt (surnamed Blumlein), uncle and chief instructor of Isserlein, died, 1421.
14. Mob attacks the Jewish quarter at Cordova, slaughtering many Jews and Maranos, 1473. Heyman Steinthal, linguist and philosopher, died, 1899. Ludwig Bamberger, German deputy and political economist, died, 1899.
15. Albert Cohn, Orientalist and philanthropist, died, 1879. Peddling prohibited in Rumania; 20,000 Jews are thus deprived of a livelihood, 1884.
16. Jews of York slay themselves in order to avoid baptism, 1190.

17. Napoleon institutes the system of consistories in France, 1808. Jacques-François-Fromenthal-Elie Halévy, composer, died, 1862. Judah P. Benjamin becomes secretary of war of the Confederacy of America, 1862.
18. Leopold Zunz, Jewish scholar, died, 1886.
19. Jews of Brest-Litovsk granted free trade and occupation and half of the tolls, 1527.
20. Riots in many cities of Germany, 1848.
21. Leo da Modena, Italian rabbi and author, died, 1648. Three Jews executed at Wilna on a false blood accusation, 1691.
22. Charter granted to Jews of England by Richard I., 1190. Jews permitted to return to Lithuania, 1503. Michael Beer, German poet, died, 1833.
23. Talmuds burned in Rome at the Feast of Pentecost, 1322. Naphtali Herz Wesel (Hartwig Wessely), died, 1805. Isaac Artom elected senator in Italy; first Jew to hold such an office, 1877.
24. Joseph Caro, codifier of rabbinical Judaism, died, 1575. Solomon Halberstam, Jewish scholar, died, 1900.
25. Joseph Almanzi, bibliophile and poet, born, 1801.
26. Isaac M. Wise, American Reform rabbi, died, 1900.
27. Wilhelm Beer, German astronomer, died, 1850.
28. Lazarus Bendavid, German philosopher and reformer, died, 1832. James Darmesteter, French Orientalist, born, 1849. Jews expelled from Moscow by order of the governor-general, 1891.
29. Meïr ben Todros ha-Levi Abulafia (RaMaH), nasi and Talmudist, died, 1244. Jews who served in Russian army permitted by edict to settle in Finland, 1858.
30. Moses ben Maimon (Maimonides), philosopher, born, 1135. Solomon Sulzer, reformer of synagogal music, born, 1804.
31. Edict of expulsion of Jews from Spain issued by Ferdinand and Isabella, 1492.

APRIL.

1. Disappearance of Esther Solymosi gives rise to a blood accusation at Tisza-Eszlár, 1882. Baroness Clara de Hirsch, philanthropist, died, 1899.
2. Jews expelled from Genoa, 1550.
3. Charles V. of Germany issues edict against blood accusations, 1544. Hirsch Kalischer, founder of modern Zionism, born, 1795.
4. Isaac da Fonseca Aboab, ḥakam at Amsterdam, died, 1693. Opening of the Anglo-Jewish Historical Exhibition in the Royal Albert Hall, London, 1887.
5. Moses Ephraim Kuh, first German Jewish poet, died, 1790.
6. Aaron Bernstein, German publicist, born, 1812.
7. Emancipation of the Jews of Prussia, 1848.
8. Ferdinand III. grants Bohemian Jews right of residence in all royal towns, 1648. One hundred and twenty-eight Jews killed by soldiers and populace at Bucharest as the result of a blood accusation, 1801.
10. Karl Isidor Beck, Austrian poet, died, 1879.
11. First anathema against Ḥasidim issued at Wilna, 1772. Ferdinand Lassalle, socialist agitator, born, 1825.
12. Jews of Cracow plundered and many murdered by soldiers, 1464.
13. Sabbato Morais, American rabbi, born, 1823. Edict of Nicholas I. founding agricultural colonies in Russia; general Jewish regulations issued in Russia, 1835.
14. Deutsch-Israelitischer Gemeindebund founded, 1869.
15. Dankmar Adler, American architect, died, 1900.
16. Menahem ben Jacob, poet and teacher at Worms, died, 1203.
17. Frederick the Great issues a "General-Privilegium" for the Prussian Jews, 1750. Pope Pius IX. issues edict to remove the walls of the Roman ghetto, 1848.
18. Charge of host desecration at Prague leads to massacre of Jews, 1389. Earl of Beaconsfield, English premier, died, 1881.
19. Massacre of Jews at Cordova by soldiers of Sulaiman ben al-Ḥakim, 1013. Jacob Emden, German rabbi, died, 1776.
20. Levi ben Gershon, philosopher and commentator, died, 1344. Proselyte Nicholas Anthoine burned at Geneva, 1632.
21. Baron Maurice de Hirsch, philanthropist, died, 1896.
22. Isaac Adolphe Crémieux, French statesman, born, 1796. Uriah Phillips Levy, American commodore, born, 1792.
23. Louis XIII. of France issues edict forbidding Christians, under penalty of death, to shelter Jews or converse with them, 1615. Elijah ben Solomon of Wilna, the "Gaon," born, 1720. Poll-tax in territories of Brunswick-Lüneburg abolished, 1803.
24. First recorded auto da fé held at Troyes, 1288.
25. Anti-Semitic league of Germany presents a petition with 255,000 signatures to Bismarck, 1881.
26. Dutch West India Company directs Peter Stuyvesant to allow Jews to dwell and trade in New Netherlands, 1655. Jews expelled from Russia and the Ukraine by Catherine, 1727.
27. Meïr of Rothenburg died, 1293. Anti-Semitic riot at Elizabethgrad begins a series of excesses against the Jews in South Russia, 1881.
29. Antony Samuel Adam-Salomon, French sculptor, died, 1881.
30. Decree ordering Jews to leave Spain publicly announced, 1492.

MAY.

1. Moses Isserles, Polish rabbi and code annotator, died, 1572. Johann Jacoby, German statesman, born, 1805. Sir Francis Henry Goldsmid, M.P., first English Jewish lawyer, born, 1808.
2. All the Jews of England thrown into prison, 1287. Giacomo Meyerbeer, composer, died, 1864.
3. Jews of Speyer massacred by the Crusaders, 1096.
4. Benjamin II., Rumanian traveler, died, 1864.
6. Ludwig Börne, German writer, born, 1786. Judah P. Benjamin, statesman and lawyer, died, 1884.
7. Attack on the Alcana (smaller Jewry) of Toledo by the enemies of Samuel ha-Levi; 1,200 injured, 1355.
8. Anti-Jewish riots in different parts of Russia, especially in Kiev, 1881.
10. Great auto da fé at Lisbon, 1682.
11. Bull of Benedict XIII. against Talmud and any Jewish books attacking Christianity, 1415. Abraham Geiger, Jewish scholar and theologian, born, 1810.
12. Massacre of the Jews of Worms by Crusaders, 1096. Synod of Vienna under Cardinal Guido orders Jews to wear pointed hats, 1267.
14. Solomon Munk, French Orientalist, born, 1803.
15. Bogumil Dawison, Polish-German actor, born, 1818. Russian "May Laws" issued, 1882.
16. Emancipation of the Jews of Holland, 1796. Heyman Steinthal, philosopher and linguist, born, 1823.
17. First Jewish school in Hungary opened at Alt-Ofen, 1784. William Steinitz, chess-player, born, 1836.
18. Anti-Jewish riots in Algeria, 1897.
19. Isaac Alfasi, Talmudic author, died, 1103.
20. Samuel Alatri, Italian philanthropist, died, 1889.
21. Thirty Jews burned at Bösing, near Presburg, 1529.
22. Martyrdom of Brussels Jews charged with host desecration, 1370. Israel ben Eliezer Baʻal Shem-Ṭob (BeSHT), founder of the sect Ḥasidim, died, 1760. Mordecai M. Noah, American diplomat and communal worker, died, 1851.
23. All the Jews of Austria seized, 1420.
24. Riot at Frankfort-on-the-Main on account of a Jewish pervert: 180 killed and Jewish quarters destroyed, 1241. Abraham Geiger, Jewish scholar and reformer, born, 1810.
25. Louis Philippe issues regulations for the internal organization of the French Jews, 1844.
26. Martyrdom of Jews at Blois, 1171.
27. Jews of Mayence massacred by Crusaders, 1096. Jacques-François-Fromenthal-Elie Halévy, composer, born, 1799.
29. Lelewel, Polish geographer and friend of Jews, died, 1861.
30. Massacre of Jews at Cologne by Crusaders, 1096. Ignaz Moscheles, German composer, born, 1794.

JUNE.

1. "Privilegium Fredericianum" issued by Duke Frederick II. of Austria, 1244.
2. Tolerance edict of Joseph II. of Austria issued, 1782. Grace Aguilar, English novelist and writer on Jewish history, born, 1816.
4. Outbreaks against Jews of Seville, 1391.
5. Jews of Rome forbidden to practise usury, 1570. Sir Julius Benedict, composer and conductor, died, 1885.
6. Henry II. imposes on Jews of Toledo a tax of 20,000 gold "dollas" (= $9,630,000), 1369.
7. Louis Jacoby, German engraver, born, 1828. David Kaufmann, Hebraist and Orientalist, born, 1852.
8. Riots at Posen lasting to July 4, on account of a false murder charge, 1696. Fanny von Arnstein, society leader at Vienna, died, 1818.
9. Jacob Tam, most prominent of French tosafists, died, 1171. Samuel Mohilever, rabbi and Zionist, died, 1898.
10. Six thousand Jews of Nemirov slaughtered by the Cossacks, 1648.
12. Jews of France ordered to wear a yellow badge, 1269.
15. Jews expelled from Genoese territory, 1567.
16. Many Jews murdered in Erfurt, 1221. Joseph Solomon del Medigo born, 1591.

17. Twenty-four wagon-loads of Talmuds and two hundred other manuscripts burned at Paris, 1244. Eighty Maranos imprisoned by Alexander VI. at Rome, 1503.
20. Four thousand Jews slain at Toledo, 1391. Cossacks slay thousands of Jews at Homel, Poland, 1767.
21. Rabbinical synod held at Ferrara, 1554. Jacques Offenbach, composer, born, 1819.
23. Martyrdom of Jews of Weissenburg, 1270.
24. Jews treacherously murdered at Tulchin by Cossacks, 1648. Edgar Mortara forcibly taken from his family, giving rise to the "Mortara Case," 1858.
25. Religious disputation before Louis IX. of France, 1240. Two hundred and fifty Jews murdered in Rothenburg-on-the-Tauber, 1298.
26. Lipmann Heller forced to leave his post as rabbi at Prague, 1629. Adolf Jellinek, Jewish scholar, born, 1821.
27. Jews of Xanten massacred by Crusaders, 1096. Joseph Israels, Dutch painter, born, 1824.
28. Meïr of Rothenburg imprisoned at Rotevil by Bishop Henry of Basel, 1286. Jew badge introduced into Venice, 1366.
29. Blood accusation at Xanten, 1891.
30. Edict forbidding Maranos to leave Portugal, 1557. Jews expelled from Prague, 1745.

JULY.

1. Elijah ben Samuel burned at Rome, 1298. Bernard Beer, German-Jewish scholar, died, 1861.
2. Anglo-Jewish Association founded, 1871.
3. Mansion House meeting in London protests against the outrages of the Damascus Affair, 1840. Religious freedom proclaimed in Germany, 1868. Theodor Herzl, Zionist leader, died, 1904.
4. Judah ben Asher, Talmudist, died, 1349. Isabella Nuñez Alvarez burned in auto da fé at Madrid, 1632.
5. Pope Innocent IV. issues bull against blood accusation, 1247.
6. Three hundred Jews murdered at Tarrega, Catalonia, 1348.
7. Gregory X. issues bull against blood accusation, 1274. Ludwig Chronegk, German theatrical manager and actor, died, 1891.
8. Seligmann Heller, German poet, born, 1831.
9. Julius Oppert, Orientalist, born, 1825. Lord Rothschild takes his seat as first Jewish peer in the British House of Lords, 1884.
11. Czarina Anne expels the Jews from Little Russia, 1740. E. H. Lindo, Jewish historian, died, 1865.
13. Godfrey of Bouillon takes Jerusalem, and nearly all the Jews there are slaughtered, 1099. Solomon Yiẓḥaḳi (Rashi), commentator, died, 1105. Berlin Congress inserts clause 44 into its treaty, 1878.
14. United Synagogue of London established by Act of Parliament, 1870.
15. Pope lays down principle that Jews were doomed to perpetual servitude because they had crucified Jesus, 1205. Royal decree expelling Jews from Portugal issued, 1508. Act permitting Jews to trade in New Netherlands issued, 1655.
16. Graziadio Isaiah Ascoli, Italian philologist, born, 1829.
17. Anti-Semitic riots at Neustettin, lasting two days, 1881.
18. Nathan Rothschild, founder of the London banking-house, died, 1836.
19. Thirty-eight Jews burned at Berlin, 1510.
20. Religious disputation at Barcelona, Naḥmanides defending Judaism, 1263.
21. Shabbethai ben Joseph Bass, founder of Jewish bibliography, died, 1718.
22. First expulsion of Jews from France, 1306. About 10,000 Jews slain at Polonnoye, near Jitomir, 1648.
23. Shabbethai Ẓebi, pseudo-Messiah, born, 1626.
24. Jean de Bloch, Russo-Polish financier, born, 1836.
25. Jews expelled from Vienna, 1670. Johann Christopher Wolf, bibliographer of Jewish books, died, 1739.
26. Pope Paul IV. establishes the ghetto at Rome, 1556. First sitting of the Assembly of Notables, 1806.
27. Benedict Spinoza excommunicated, 1656.
28. Emancipation in Hungary, 1849. Eduard Lasker secures the passing of the "Austritt-Gesetz," permitting persons in Prussia to sever connection with any religious community, 1876. Sir Moses Montefiore, philanthropist, died, 1885.
29. Max Nordau, writer and Zionist, born, 1849. Joseph Derenbourg, Orientalist, died, 1895.
30. Auto da fé at Toledo, 1488.
31. Little St. Hugh of Lincoln disappeared, 1255. Nachman Krochmal, Galician scholar, died, 1840.

AUGUST.

1. Mordecai ben Hillel killed during the massacre of Jews at Nuremberg, 1298. Two Jews elected to the National Assembly of Holland, 1797. Last auto da fé at which a Jew was burned held at Valencia, 1826.
2. Jews expelled from Spain, 1492. First Portuguese synagogue at Amsterdam dedicated, 1675.
3. Patent for Bohemia removes all Jewish disabilities, 1797. Carel Asser, Dutch jurist, died, 1836.
4. Samuel Cahen, translator of the Bible into French, born, 1796. Max Ring, German poet, born, 1817.
5. Great massacre of Jews at Barcelona, 1391. Maria Theresa, for an annual consideration of 3,000,000 gulden, suspends for a period of 10 years the edict expelling Jews from Austria, 1748.
6. Marcus Eliezer Bloch, naturalist, died, 1799.
7. Bolko I. of Silesia grants Jews "Privilegium Fredericianum," 1295.
8. Bull of Pius IV. permits Jews to lay aside the yellow hat on journeys, 1561. Jacob Christian Basnage, Christian historian of the Jews, born, 1653.
9. Jews settle in Pinsk and secure lands for synagogue and cemetery, 1506. Anti-Jewish riots at Frankfort; house of the Rothschilds attacked, 1819.
10. Leopold Zunz, Jewish scholar, born, 1794. Alexander I. of Russia prohibits foreign Jews from settling permanently in Russia, 1824.
11. Jonah Abravanel, Hebrew poet, died, 1667. Restriction on the use of Christian prænomens removed in Bohemia, 1836.
12. Naḥmanides visits Jerusalem, 1267. Jossel von Rosheim obtains from Charles V. an extension of the Alsatian privileges to the whole Holy Roman Empire, 1530. William Steinitz, chess-master, died, 1900.
13. Johannes Buxtorf II., Christian Hebraist, born, 1599.
14. Baruch Auerbach, educator and philanthropist, born, 1793.
15. Simon ben Asher, astronomer, died, 1342.
16. Johannes Buxtorf II., Christian Hebraist, died, 1664.
17. Papal edict forbids Jews to admit Christians into synagogue, 1592.
19. Michael Beer, German poet, born, 1800.
20. Maranos of the Basque Provinces ordered to leave the Jewish streets and to live among Christians, 1493.
21. Joseph Derenbourg, Orientalist, born, 1811.
22. Six thousand Jews slaughtered in Mayence, 1349.
24. Three thousand Jews slaughtered in Erfurt, 1349. Aaron Chorin (Choriner), Hungarian rabbi, died, 1844.
25. Samuel David Luzzatto, Italian Jewish scholar, born, 1800. David Gans, Jewish historian and mathematician, died, 1613.
28. "'Alenu" prayer forbidden in Prussia, 1703. Isaac Samuel Reggio, Jewish theological writer, died, 1855. Opening of the first Zionist Congress at Basel, 1897.
30. Ẓebi Ashkenazi, rabbi in London and Amsterdam, died, 1658.
31. Joseph Pichon of Seville, chief royal tax-gatherer, executed by order of Jewish judges, 1379. Ferdinand Lassalle, socialistic agitator, died, 1864.

SEPTEMBER.

1. Jews of Brest ordered to obey court of Rabbi Mendel Frank, 1531. Anti-Jewish riots at Frankfort-on-the-Main, under Fettmilch, 1614.
2. Jews of Holland declared by the National Assembly citizens of the Batavian republic, 1796.
3. Coronation massacre at London, 1189. James Joseph Sylvester, English mathematician, born, 1814. Anti-Jewish riots at Stockholm, 1852.
4. Michael Sachs, German rabbi, born, 1808.
5. Henrietta Herz, leader of Berlin salon, born, 1764.
6. Moses Mendelssohn, philosopher and religious reformer, born, 1729.
7. Hirsch (Heinrich) Graetz, Jewish historian, died, 1891.
8. Israelsky, accused of ritual murder at Konitz, acquitted, 1900.
9. Captain Alfred Dreyfus condemned a second time, 1899.
10. Jewish community founded at Berlin, 1671. Shabbethai Ẓebi, pseudo-Messiah, died, 1676.
11. Jewish Colonization Association founded by Baron de Hirsch, 1891.
12. David Oppenheim, bibliophile, died, 1736.
13. Johannes Buxtorf I., Christian scholar, died, 1629. Shabbethai Ẓebi embraces Mohammedanism, 1666.
14. Albert Cohn, Jewish scholar and philanthropist, born, 1814.
15. Akiba Eger the Elder, rabbi and Talmudic author, died, 1780. Giacomo Meyerbeer, composer, born, 1791.

16. Grace Aguilar, English novelist and writer on Jewish history, died, 1847.
17. Decree ordering Jews to leave France issued, 1394. Pedro Arbues, inquisitor, "the darling of Torquemada," died, 1485.
18. Jonathan Eybeschütz, rabbi and author, died, 1764. Sultan of Morocco grants religious liberty to Jews and Christians, 1880.
19. Mayer Rothschild, founder of the Frankfort banking-house, died, 1812. Capt. Alfred Dreyfus "pardoned," 1899.
20. Gedaliah Yaḥya, writer on history, died, 1487. Ghetto at Rome abolished, 1870.
22. Dedication of the Mayence synagogue, 1104.
24. Moses Sofer, rabbinical author, born, 1762.
27. Emancipation of the Jews of France, 1791.
28. First congregation founded at Stockholm, 1775.
29. Jews of Krems massacred, 1349. Fanny von Arnstein, society leader at Vienna, born, 1757. Samuel David Luzzatto, Italian Jewish scholar, died, 1865.
30. Zacharias Frankel. Jewish scholar and theologian, born, 1801.

OCTOBER.

1. About 7,000 Jews expelled from the government of Kiev, Russia, 1898.
2. Thousands of Jews killed at Lublin by Cossacks, 1656.
3. Blood-accusation riot at Galatz; ninety Jews injured and four synagogues destroyed, 1868. Moses Schreiber (Sofer), Orthodox leader and rabbi, died, 1839.
4. Emancipation of the Jews of Baden, 1862.
5. Jacques Offenbach, French composer, died, 1880.
6. Abraham Firkovich, Karaite scholar, born, 1787.
7. Eleazar of Brody, rabbi at Amsterdam, died, 1741.
8. Jacob Eduard Polack, physician to the Shah of Persia, died, 1891.
9. Casimir III., the Great, of Poland, grants Jews "Privilegium Fredericianum," 1333. Adolf Franck, French philosopher, born, 1809. Abraham Mapu, Russian Hebrew writer, died, 1867.
10. Elijah ben Solomon of Wilna, the "Gaon," died, 1797.
11. *Ninety Jews massacred at Munich, 1285.*
12. Akiba Eger, rabbi and Talmudic author, died, 1837.
13. Victor Emanuel emancipates the Jews of Rome, 1870. Leopold Löw, rabbi and critic, died, 1875.
14. Eduard Lasker, German politician, born, 1829.
15. Moritz Hartmann, Austrian poet, born, 1821.
16. Joseph Solomon del Medigo, physician and scientist, died, 1658. Jewish quarter of Kossow, Galicia, attacked; ten Jews killed, 1898.
17. Bull appointing Tomaso Torquemada inquisitor-general of Aragon, Valencia, and Catalonia, 1483. Senatorial decree grants privileges to baptized Jews in Russia, 1776.
18. Lazarus Bendavid, German philosopher and reformer, born, 1762.
19. James Darmesteter, French philologist, died, 1894. Giulio Bartolocci, Italian Christian student of Jewish literature, died, 1687.
20. Emin Pasha (Ed. Schnitzer), African traveler, killed, 1892.
21. Israelitische Theologische Lehranstalt of Vienna founded, 1893.
22. Roman Curia decides that a Jewish child once baptized must be brought up under Christian influences, 1587. Henriette Herz, leader of the Berlin salon, died, 1847.
23. Abraham Geiger, Jewish scholar and religious reformer, died, 1874. Inquisition at Rome refuses permission to Jews to put gravestones or inscriptions over their dead, 1625.
24. Moses Montefiore, philanthropist, born, 1784. Decree of Crémieux naturalizes the Jews of Algeria, 1870.
25. Asher ben Jehiel (Rosh), died, 1327.
26. Anti-Jewish riots at Cracow, 1407.
28. 'Abd al-Majid receives Moses Montefiore in regard to the Damascus Affair, 1840. Moses Naḥmanides, philosopher and commentator, died, 1270. Emanuel Deutsch, English Jewish Talmudic scholar, born, 1829.
29. Jews of Kur-Hessen granted full emancipation (first in Germany), 1833. Conference of Jewish notables of western Europe at Brussels, to discuss Rumanian question, 1872.
31. Jews expelled from Portugal, 1497. Heinrich Graetz, Jewish historian, born, 1817.

NOVEMBER.

1. Jews of England imprisoned by King John, 1210. Jews banished from England, 1290. Isidore Loeb, French Jewish scholar, born, 1839.
2. William II. of Germany receives a Zionist deputation headed by Dr. Theodor Herzl, at Jerusalem, 1898.
3. Third and final expulsion of the Jews from France, 1394. Ludwig Chronegk, German actor, born, 1837.
4. Auto da fé held at Seville, 1481. Felix Mendelssohn-Bartholdy, composer, died, 1847.
5. David Sassoon, Indian financier, died, 1864.
6. Firman issued by Sultan 'Abd al-Majid against blood accusation, 1840. Abraham Azulai, cabalistic author, died, 1643.
8. Rabbinical synod of Mayence regulates the payment of Jewish taxes, 1223. Peter Beer, educational writer, died, 1838.
10. David Einhorn, American Reform rabbi, born, 1809.
11. Sabbato Morais, American Orthodox rabbi, died, 1897.
12. Law regulating the adoption of family names by Jews in Austria, 1787.
13. Talmud burned at Kamenetz-Podolsk by the Frankists, 1757. Benjamin Peixotto, American diplomat, born, 1834.
15. Act passed by General Assembly of New York permitting Jews to omit "upon the faith of a Christian" from the oath of abjuration, 1727.
16. Riot at Paris; many Jews plundered, several killed, and the rest forced to flee, 1380. Jews executed for imaginary crime at La Guardia, 1491.
17. Simḥah Pinsker, Hebrew author, died, 1864.
18. First meeting of English Jewish Board of Deputies, 1760. "Lehrerseminar" founded at Berlin, 1840.
19. Emma Lazarus, American poetess, died, 1887.
20. Manasseh ben Israel, died, 1657. Anton Rubinstein, Russian composer and pianist, died, 1894. Isaac M. Jost, Jewish historian, died, 1860.
22. Solomon Maimon, German philosopher, died, 1800.
23. Leopold Kompert, ghetto poet and novelist, died, 1886.
24. Benedict Spinoza, philosopher, born, 1632.
27. Abraham ben David of Posquières (RaBaD III.), French Talmudic commentator, died, 1198. Sir Julius Benedict, English composer, born, 1804.
29. Jews of Augsburg massacred, 1349.
30. Bull of Honorius IV. to archbishops of York and Canterbury, against the Talmud, 1286. Anton Rubinstein, Russian composer and pianist, born, 1830.

DECEMBER.

1. Manuel Fernando de Villa Real, Portuguese Jewish statesman, executed by the Inquisition at Lisbon, 1652.
2. Ukase of Elizabeth expelling Jews from Great Russia, 1742.
3. Eduard Bendemann, German painter, born, 1811.
4. Opening of the Whitehall conference of English notables on the question of the readmission of Jews into England, 1586.
6. David Friedländer, religious reformer and scholar, born, 1750. Anselm Mayer von Rothschild, financier, died, 1855.
9. Jews expelled from Breslau, 1738. Nathan Ghazzati, warm adherent of Shabbethai Ẓebi, excommunicated, 1666. Baron Maurice de Hirsch, philanthropist, born, 1831.
10. Guildhall meeting protests against the persecution of Russian Jews by the "May Laws," 1890. Auto da fé held at Toledo; nine hundred Jews "reconciled," 1486.
11. Napoleon issues decree dividing the whole French empire into Jewish consistories, 1808.
12. Isaac Leeser, American Orthodox rabbi, born, 1806.
13. Moses ben Maimon (Maimonides), philosopher, died, 1204. Emperor Charles IV. makes an agreement with Rudolph IV. of Austria and John of Bohemia not to receive Jews expelled from Austria, and *vice versa*, 1360. Heinrich Heine, German poet, born, 1797.
14. Mattithiah Straschun, Talmudic scholar, died, 1885.
15. Ludwig Dessoir, German actor, born, 1810.
17. Three hundred Jews of Bychow, near Moghilef, slaughtered, 1659. Ḳalman Schulman, Russian Hebrew writer, died, 1898.
18. Jews expelled from Bohemia, 1744.
19. Poll-tax abolished in Austria, 1781.
20. Mefiẓe Haskalah founded in Russia, 1863.
21. Benjamin Disraeli, afterward Earl of Beaconsfield, English premier, born, 1804. Adolf Sonnenthal, German actor, born, 1834. Emancipation of Jews of Austria, 1867.
22. Jacob Christian Basnage, Christian historian of the Jews, died, 1725.
23. Paulus (Selig) Cassel, Jewish scholar and convert to Christianity, died, 1892.
24. King Emanuel orders all Jews to leave Portugal, 1496. Anti-Semitic riots at Warsaw, lasting three days, 1881.

25. Johannes Buxtorf I., Christian Jewish scholar, born, 1564. David Friedländer, religious reformer and scholar, died, 1834. Jean de Bloch, Russo-Polish financier, died, 1901.
27. Judaizing followers of R. Zechariah of Kiev burned at Moscow, 1503. Eduard Bendemann, German painter, died, 1889.
28. Ludwig Philippson, Jewish publicist, born, 1811. Full civil rights and privileges granted to the Jews of Frankfort, 1811.
29. Ludwig Philippson, Jewish publicist, died, 1889. Jewish Emancipation Act passed in Hungary, 1867. Adolf Jellinek, Jewish scholar, died, 1893.
30. Jews of Granada, among them Joseph ibn Nagdila, massacred, 1061. Ludwig Dessoir, German actor, died, 1874.
31. Isaac Artom, Italian senator, born, 1829. Sampson Raphael Hirsch, Jewish theologian, died, 1888.

J. I. G. D.

MEMORIAL SERVICE: Prayer for the dead is mentioned as early as the last pre-Christian century (see II Macc. xii. 44), and a sacrifice for the dead, probably given in the form of charity, was known in Talmudic time (Sifre, Deut. 210; Hor. 6a). The reading of the chapter "Aḥare Mot" on the Day of Atonement suggested the idea of offering on that day a special prayer for the memory of the dead (comp. Pesiḳ. 174b with the interpolated sentence in Tan., Yelammedenu, Ha'azinu, and Kol Bo, lxx.). Regarding the extension of the prayer for the dead to other holy days, see the literature in Bet Yosef, Ṭur Oraḥ Ḥayyim, 621; M. Brück, "Pharisäische Volkssitten und Ritualien"; L. Löw, "Gesammelte Schriften," i. 129, v. 29; I. Levi, "La Commémoration des Ames dans le Judaïsme," in "R. E. J." xxix. 43-60; Hamburger, "R. B. T." ii., *s.v.* "Seelenfeier"; HAZKARAT NESHAMOT (in which article the memorial service for Orthodox congregations is treated).

Reform Judaism remolded the old liturgy, laying special stress on the idea of the immortality of the soul, thereby affording a source of comfort to mourners in their grief. In the new form, the memorial service, which dwells mainly on the awful solemnity of death and the hope of a future life, and which is written to a great extent in the vernacular, has become one of the most prominent and impressive features of the Day of Atonement. Among those who composed elaborate and solemn memorial service liturgies Leopold Stein and David Einhorn may be specially mentioned.

There is a certain uniformity in the Reform rituals with regard to the elements of which the memorial service consists: a recitation or intonation of the verses Ps. cxliv. 3-4, xc. 6, 3; Deut. xxxii. 29; Ps. xlix. 18 (A. V. 17), xxxvii. 3, xxxiv. 23 (A. V. 22), forms the introduction to a meditation dwelling on the fleetingness of life; this is followed by a psalm, like Ps. xxiii.; selected poems from Ibn Gabirol, Judah ha-Levi, and Baḥya ben Joseph, translated into the vernacular, lead up to the prayer for the memory of the departed, in which, finally, mention is made, as in the old "Hazkarat Neshamot," of the great martyrs of the past. In many congregations the death-roll for the year is read, and persons distinguished in Israel who died during that period are also remembered. The reciting of the "Ḳaddish" by the entire congregation closes the service, to which elaborate and befitting music lends great solemnity.

A. K.

MEMPHIS: City of ancient Egypt, situated about ten miles south of modern Cairo. "Memphis" is the Greek form of the Egyptian "Menfe," and is used in Hos. ix. 6, A. V., and in Isa. xix. 13, R.V., margin (comp. Judith i. 10). The Hebrew form is "Mof," and occurs in Hos. ix. 6; in all other places it has been corrupted to "Nof," which the versions, however, render correctly by "Memphis."

As the capital of Egypt, Memphis seems to be mentioned in Hos. ix. 6; Ezek. xxx. 13, 16 (where, however, some critics alter the name in accordance with the Septuagint); Cornill, by making certain corrections, reads it also in Ezek. xxx. 15 and Isa. xix. 13. Jer. ii. 16 places it parallel with other large Egyptian cities, especially of the Delta. According to Jer. xliv. 1, xlvi. 14, the Jews fleeing from the Babylonian war to Egypt had formed a colony there.

A part of Memphis, called "the White Wall" (later forming the citadel of the city; see Herodotus, iii. 91; Thucydides, i. 104), existed at a very early period, and the residences of many Egyptian kings of the third to the sixth dynasty were built near it. From its temple the city always retained the sacred name "Temple of Ptaḥ" ("Ḥat-ka-ptaḥ," whence, probably, the name "Egypt" has been taken). The civil name and an account of the development of the city are derived from the funeral pyramid of King Ppy (vocalized "Apopy" ?) I. of the sixth dynasty, called "Men-nofer" = "good resting." Hence the later abbreviations "Menfe," "Menbe" ("Mempi" in Assyrian; Delitzsch, "Wo Lag das Paradies?" p. 314), etc. Other etymologies found in Greek writers are unwarranted.

Memphis remained from the sixth dynasty to the Arab conquest perhaps the first, certainly the second, city of Egypt; and it frequently was the capital. The Arabs, however, soon caused its depopulation by founding new capitals a little to the north of it, for which the stones from the ruins of Memphis were used so exhaustively that only a few traces, near modern Mitrahineh and the large necropoles on the border of the desert (the pyramids of Gizeh, etc.), bear witness to the former existence of the city.

E. G. H. W. M. M.

MEMPHIS: Largest city of the state of Tennessee in the United States of America. Although the year 1845 is designated as the date of the earliest settlement of Jews in Memphis, it appears that a few had lived there temporarily before that time. Among the most prominent of the earlier settlers was Joseph J. Andrews, a former resident of Charleston, S. C., and Philadelphia. In 1847, when his brother died, he donated several acres of land to the Israelites of Memphis to be used as a burial-ground. This caused his resident coreligionists to organize in 1850 a Hebrew Benevolent Society. Divine service was then held only on Rosh ha-Shanah and Yom ha-Kippurim.

By 1853 there was a considerable increase in the Jewish population, and a congregation was organized under the name "B'nai Israel," with M. Simon

First Congregation.

as president and Solomon Hess as secretary. A hall was leased in a building on Front street; and Jonas Levy, formerly of Little Rock, Ark., was engaged as ḥazzan and shoḥet. A Hebrew school, under the direction of the Rev. L. Sternheimer, was established, and a lot was bought with $2,000 donated by Judah Touro in 1853. At the beginning of 1858 greater interest was manifested in communal affairs. A building, known as "The Farmers' and Mechanics' Bank," was purchased and dedicated (March 26, 1858) as a house of worship. At the same time the Rev. J. J. Peres was elected ḥazzan. In 1860 the Rev. Simon Tuska of Rochester, N. Y., was chosen as rabbi. His views were those of moderate Reform; but when an organ, a mixed choir, and family pews were introduced into the synagogue a considerable number of members seceded and formed (1862) an Orthodox congregation called "Beth-El Emess." The numerical strength of the B'nai Israel congregation was reduced; but the members held their own, and when, after the close of the Civil war, many Israelites from the West and the East settled in Memphis, most of them affiliated with the Reform congregation. Rabbi Tuska died suddenly on Dec. 30, 1870; and the congregation elected as his successor the Rev. M. Samfield, formerly rabbi of the B'nai Zion congregation, Shreveport, La. He was installed Aug. 15, 1871, and still (1904) occupies the rabbinate.

Orthodox Congregation Formed.

Some years later a consolidation of the Beth-El Emess congregation with B'nai Israel was effected, and in 1883 a lot on Poplar street was bought for the site of a temple. The building was dedicated Jan. 18, 1884. Another Orthodox congregation, established in 1862, had no permanent place of worship until 1890, when the members bought a church and converted it into a synagogue, giving their organization the name of "Baron Hirsch Congregation." The number of members is at present (1904) eighty-five. Another orthodox congregation was founded in 1904, under the name of "Anshai S'fard," with a membership of fifty.

The number of Jews in Memphis is estimated at 2,500 in a total population of 120,000. The following societies are in existence: Hebrew Ladies' Benevolent Society, United Hebrew Relief Association, Young Ladies' Aid Society, Jewish Ladies' Aid Society (Orthodox), Young Men's Hebrew Association, Ladies' Salon Circle (literary), B'nai B'rith Lodge, Free Sons of Israel Lodge, Kesher shel Barzel Lodge, Zionist Society, Memphis Club (social). The majority of Jews are merchants, but many are engaged in various trades as tailors, shoemakers, tinners, printers, opticians, carpenters, barbers, engravers, watchmakers, painters, butchers, and manufacturers of clothing, caps, shirts, and mattresses. There are also a considerable number following the various professions, as lawyers, musicians, teachers, physicians, and journalists.

A. M. Sa.

MEMRA (= "Ma'amar" or "Dibbur," "Logos"): "The Word," in the sense of the creative or directive word or speech of God manifesting His power in the world of matter or mind; a term used especially in the Targum as a substitute for "the Lord" when an anthropomorphic expression is to be avoided.

——**Biblical Data:** In Scripture "the word of the Lord" commonly denotes the speech addressed to patriarch or prophet (Gen. xv. 1; Num. xii. 6, xxiii. 5; I Sam. iii. 21; Amos v. 1-8); but frequently it denotes also the creative word: "By the word of the Lord were the heavens made" (Ps. xxxiii. 6; comp. "For He spake, and it was done"; "He sendeth his word, and melteth them [the ice]"; "Fire and hail; snow, and vapors; stormy wind fulfilling his word"; Ps. xxxiii. 9, cxlvii. 18, cxlviii. 8). In this sense it is said, "For ever, O Lord, thy word is settled in heaven" (Ps. cxix. 89). "The Word," heard and announced by the prophet, often became, in the conception of the seer, an efficacious power apart from God, as was the angel or messenger of God: "The Lord sent a word into Jacob, and it hath lighted upon Israel" (Isa. ix. 7 [A. V. 8], lv. 11); "He sent his word, and healed them" (Ps. cvii. 20); and comp. "his word runneth very swiftly" (Ps. cxlvii. 15).

——**In Apocryphal and Rabbinical Literature:** While in the Book of Jubilees, xii. 22, the word of God is sent through the angel to Abraham, in other cases it becomes more and more a personified agency: "By the word of God exist His works" (Ecclus. [Sirach] xlii. 15); "The Holy One, blessed be He, created the world by the 'Ma'amar'" (Mek., Beshallaḥ, 10, with reference to Ps. xxxiii. 6). Quite frequent is the expression, especially in the liturgy, "Thou who hast made the universe with Thy word and ordained man through Thy wisdom to rule over the creatures made by Thee" (Wisdom ix. 1; comp. "Who by Thy words causest the evenings to bring darkness, who openest the gates of the sky by Thy wisdom"; . . . "who by His speech created the heavens, and by the breath of His mouth all their hosts"; through whose "words all things were created"; see Singer's "Daily Prayer-Book," pp. 96, 290, 292). So also in IV Esdras vi. 38 ("Lord, Thou spakest on the first day of Creation: 'Let there be heaven and earth,' and Thy word hath accomplished the work"). "Thy word, O Lord, healeth all things" (Wisdom xvi. 12); "Thy word preserveth them that put their trust in Thee" (*l.c.* xvi. 26). Especially strong is the personification of the word in Wisdom xviii. 15: "Thine Almighty Word leaped down from heaven out of Thy royal throne as a fierce man of war."

Personification of the Word.

The Mishnah, with reference to the ten passages in Genesis (ch. i.) beginning with "And God said," speaks of the ten "ma'amarot" (= "speeches") by which the world was created (Abot v. 1; comp. Gen. R. iv. 2: "The upper heavens are held in suspense by the creative Ma'amar"). Out of every speech ["dibbur"] which emanated from God an angel was created (Ḥag. 14a). "The Word ["dibbur"] called none but Moses" (Lev. R. i. 4, 5). "The Word ["dibbur"] went forth from the right hand of God and made a circuit around the camp of Israel" (Cant. R. i. 13).

——**In the Targum:** In the Targum the Memra figures constantly as the manifestation of the divine power, or as God's messenger in place of God Himself, wherever the predicate is not in conformity with the dignity or the spirituality of the Deity.

Instead of the Scriptural "You have not believed in the Lord," Targ. Deut. i. 32 has "You have not believed in the word of the Lord"; instead of "I shall require it [vengeance] from him," Targ. Deut. xviii. 19 has "My word shall require it." "The Memra," instead of "the Lord," is "the consuming fire" (Targ. Deut. ix. 3; comp. Targ. Isa. xxx. 27). The Memra "plagued the people" (Targ. Yer. to Ex. xxxii. 35). "The Memra smote him" (II Sam. vi. 7; comp. Targ. I Kings xviii. 24; Hos. xiii. 14; *et al.*). Not "God," but "the Memra," is met with in Targ. Ex. xix. 17 (Targ. Yer. "the Shekinah"; comp. Targ. Ex. xxv. 22: "I will order My Memra to be there"). "I will cover thee with My Memra," instead of "My hand" (Targ. Ex. xxxiii. 22). Instead of "My soul," "My Memra shall reject you" (Targ. Lev. xxvi. 30; comp. Isa. i. 14, xlii. 1; Jer. vi. 8; Ezek. xxiii. 18). "The voice of the Memra," instead of "God," is heard (Gen. iii. 8; Deut. iv. 33, 36; v. 21; Isa. vi. 8; *et al.*). Where Moses says, "I stood between the Lord and you" (Deut. v. 5), the Targum has, "between the Memra of the Lord and you"; and the "sign between Me and you" becomes a "sign between My Memra and you" (Ex. xxxi. 13, 17; comp. Lev. xxvi. 46; Gen. ix. 12; xvii. 2, 7, 10; Ezek. xx. 12). Instead of God, the Memra comes to Abimelek (Gen. xx. 3), and to Balaam (Num. xxiii. 4). His Memra aids and accompanies Israel, performing wonders for them (Targ. Num. xxiii. 21; Deut. i. 30, xxxiii. 3; Targ. Isa. lxiii. 14; Jer. xxxi. 1; Hos. ix. 10 [comp. xi. 3, "the messenger-angel"]). The Memra goes before Cyrus (Isa. xlv. 12). The Lord swears by His Memra (Gen. xxi. 23, xxii. 16, xxiv. 3; Ex. xxxii. 13; Num. xiv. 30; Isa. xlv. 23; Ezek. xx. 5; *et al.*). It is His Memra that repents (Targ. Gen. vi. 6, viii. 21; I Sam. xv. 11, 35). Not His "hand," but His "Memra has laid the foundation of the earth" (Targ. Isa. xlviii. 13); for His Memra's or Name's sake does He act (*l.c.* xlviii. 11; II Kings xix. 34). Through the Memra God turns to His people (Targ. Lev. xxvi. 90; II Kings xiii. 23), becomes the shield of Abraham (Gen. xv. 1), and is with Moses (Ex. iii. 12; iv. 12, 15) and with Israel (Targ. Yer. to Num. x. 35, 36; Isa. lxiii. 14). It is the Memra, not God Himself, against whom man offends (Ex. xvi. 8; Num. xiv. 5; I Kings viii. 50; II Kings xix. 28; Isa. i. 2, 16; xlv. 3, 20; Hos. v. 7, vi. 7; Targ. Yer. to Lev. v. 21, vi. 2; Deut. v. 11); through His Memra Israel shall be justified (Targ. Isa. xlv. 25); with the Memra Israel stands in communion (Targ. Josh. xxii. 24, 27); in the Memra man puts his trust (Targ. Gen. xv. 6; Targ. Yer. to Ex. xiv. 31; Jer. xxxix. 18, xlix. 11).

Mediatorship.

Like the Shekinah (comp. Targ. Num. xxiii. 21), the Memra is accordingly the manifestation of God. "The Memra brings Israel nigh unto God and sits on His throne receiving the prayers of Israel" (Targ. Yer. to Deut. iv. 7). It shielded Noah from the flood (Targ. Yer. to Gen. vii. 16) and brought about the dispersion of the seventy nations (*l.c.* xi. 8); it is the guardian of Jacob (Gen. xxviii. 20–21, xxxv. 3) and of Israel (Targ. Yer. to Ex. xii. 23, 29); it works all the wonders in Egypt (*l.c.* xiii. 8, xiv. 25); hardens the heart of Pharaoh (*l.c.* xiii. 15); goes before Israel in the wilderness (Targ. Yer. to Ex. xx. 1); blesses Israel (Targ. Yer. to Num. xxiii. 8); battles for the people (Targ. Josh. iii. 7, x. 14, xxiii. 3). As in ruling over the destiny of man the Memra is the agent of God (Targ. Yer. to Num. xxvii. 16), so also is it in the creation of the earth (Isa. xlv. 12) and in the execution of justice (Targ. Yer. to Num. xxxiii. 4). So, in the future, shall the Memra be the comforter (Targ. Isa. lxvi. 13): "My Shekinah I shall put among you, My Memra shall be unto you for a redeeming deity, and you shall be unto My Name a holy people" (Targ. Yer. to Lev. xxii. 12). "My Memra shall be unto you like a good plowman who takes off the yoke from the shoulder of the oxen"; "the Memra will roar to gather the exiled" (Targ. Hos. xi. 5, 10). The Memra is "the witness" (Targ. Yer. xxix. 23); it will be to Israel like a father (*l.c.* xxxi. 9) and "will rejoice over them to do them good" (*l.c.* xxxii. 41). "In the Memra the redemption will be found" (Targ. Zech. xii. 5). "The holy Word" was the subject of the hymns of Job (Test. of Job, xii. 3, ed. Kohler).

The Logos.

It is difficult to say how far the rabbinical concept of the Memra, which is used now as a parallel to the divine Wisdom and again as a parallel to the Shekinah, had come under the influence of the Greek term "Logos," which denotes both word and reason, and, perhaps owing to Egyptian mythological notions, assumed in the philosophical system of Heraclitos, of Plato, and of the Stoa the metaphysical meaning of world-constructive and world-permeating intelligence (see Reizenstein, "Zwei Religionsgeschichtliche Fragen," 1901, pp. 83–111; comp. Aall, "Der Logos," and the Logos literature given by Schürer, "Gesch." i. 3, 542–544). The Memra as a cosmic power furnished Philo the corner-stone upon which he built his peculiar semi-Jewish philosophy. Philo's "divine thought," "the image" and "first-born son" of God, "the archpriest," "intercessor," and "paraclete" of humanity, the "arch type of man" (see PHILO), paved the way for the Christian conceptions of the Incarnation ("the Word become flesh") and the Trinity. The Word which "the unoriginated Father created in His own likeness as a manifestation of His own power" appears in the Gnostic system of Marcus (Irenæus, "Adversus Hæreses," i. 14). In the ancient Church liturgy, adopted from the Synagogue, it is especially interesting to notice how often the term "Logos," in the sense of "the Word by which God made the world, or made His Law or Himself known to man," was changed into "Christ" (see "Apostolic Constitutions," vii. 25–26, 34–38, *et al.*). Possibly on account of the Christian dogma, rabbinic theology, outside of the Targum literature, made little use of the term "Memra." See LOGOS.

K.

MENAHEM: King of Israel 748–738 B.C.; son of Gadi. Zachariah, the son of Jeroboam II., had at the end of six months' reign been slain by Shallum, a usurper. Menahem went from Tirzah, one of the government fortresses, to Samaria, cut down the usurper, and occupied the throne (II Kings xv. 8–14). Immediately thereafter he smote Tiphsah because it refused to yield to him, and inflicted the most barbarous punishment upon the women of the city and its borders (*ib.* verse 16). This Tiphsah has been identified, by a slight change of letters, with En Tappuah (Josh. xvii. 7), a city on the borders of Ephraim and Manasseh.

It was in the reign of Menahem that the great Tiglath-pileser III. appeared on Israel's horizon: "There came against the land Pul, the King of Assyria; and Menahem gave Pul a thousand talents of silver, that his hand might be with him to confirm the kingdom in his hand. And Menahem exacted the money of Israel, even of all the mighty men of wealth, of each man fifty shekels of silver, to give to the king of Assyria. So the king of Assyria turned back, and stayed not there in the land" (*ib.* verses 19-20, R. V.). The identification of Pul with Tiglath-pileser III. is beyond dispute. Israel at this time had 60,000 men of wealth, and was too powerful a kingdom to yield to Assyria without a struggle.

Among the tributaries of Tiglath-pileser, as described in his own inscriptions, are found the following: Kushtashpi of the city of Kummukh; Raṣunnu of Gar-imeri (that is, Rezin of Aram-Damascus); Mi-ni-ḥi-im-mi of the city of Sa-mi-ri-na-ai (that is, Menahem of Samaria); and Hirum of the city of Ṣur (Tyre). From this reference it is possible to assign Menahem to a date about 748-738 B.C. His complete subjection to the King of Assyria seems to have occurred about the close of his reign, so that his son and successor was obliged to carry the burden of Assyria's tribute.

Menahem was the only king in this anarchic period of the Northern Kingdom who died a natural death.

MENAHEM B. AARON IBN ZERAH: Spanish codifier; born in Navarre, probably at Estella, in the first third of the fourteenth century; died at Toledo July, 1385. His father, forced to leave France in 1306 through the expulsion of the Jews, went to Spain and settled in Estella, where Menahem passed his youth. In the massacre which took place in Estella in 1328, Menahem's parents and his four younger brothers were slain. Menahem himself was stricken to the ground, and lay all but dead from his wounds, when he was saved through the compassion of a knight, a friend of his father's. He then studied two years under Joshua ibn Shu'aib, after which he went to Alcala to join Joseph ibn al-'Aish, with whom he studied the Talmud and Tosafot. His chief teacher was Judah b. Asher, who went through the whole of the Talmud with him, with the exception of the third and fourth orders. In 1361 Menahem succeeded Joseph ibn al-'Aish as rabbi in Alcala, and held office for eight years, during which time he also taught the Talmud.

In consequence of the civil war which broke out in 1368, Menahem lost all his property, and he then went to Toledo, where Don Samuel Abravanel took him under his protection, and enabled him to continue his studies during the rest of his life. In honor and for the benefit of this protector Menahem wrote "Ẓedah la-Derek" (Ferrara, 1554). This work occupies a peculiar position among codes, and is in a certain sense unique. As the author states in the introduction (ed. Sabbionetta, p. 166), it is intended mainly for rich Jews who associate with princes and who, on account of their high station and their intercourse with the non-Jewish world, are not over-rigorous in regard to Jewish regulations. For such a class of readers a law-codex must not be too voluminous, but must contain the most essential laws, especially those that the higher classes would be inclined to overstep.

The "Ẓedah la-Derek" is divided into five parts (comprising altogether 372 sections), which may be summarized as follows: Part i.: The ritual and all that is related to it, as, for example, the regulations concerning phylacteries, ẓiẓit, etc. Part ii.: Laws concerning forbidden foods. Part iii.: Marriage laws. Part iv.: Sabbath and feast-days. Part v.: Fast-days and laws for mourning. As a supplement to the last part is a treatise on the Messiah and on the resurrection of the dead. Menahem sought to emphasize the ethical side of the Law in his work. He was not satisfied with merely stating the regulations like other religious codifiers: he tried also to give a reason for them. Deficient as the "Ẓedah la-Derek" is as a code, its author has succeeded remarkably well in bringing to light the religious element in the Jewish ceremonial. At the same time he is far removed from mysticism (comp. *ib.* ed. Sabbionetta, iv. 4, 1, p. 187), possessing an unusually wide mental horizon. Although his parents and brothers fell victims to religious hatred, he still maintained that the superiority of Israel as the "chosen people" is based upon their fulfilling God's word, and "that a non-Jew who lives in accordance with God's will is more worthy than a Jew who does not perform it" (*ib.* i. 1, 33, p. 39). In dogmatical questions Menahem was more inclined to a strictly Orthodox point of view than to a philosophical one, although he believed that the Biblical stories of the Creation and the Bible's teaching about the resurrection contained mysteries, which he did not venture to solve. In a Turin manuscript (A. iv. 37) are given laws by him on sheḥiṭah and bediḳah, perhaps excerpted from his larger work.

MENAHEM B. ABRAHAM. See BONAFOS, MENAHEM BEN ABRAHAM.

MENAHEM BEN ELIAKIM: German scholar of the fourteenth century; a native of Bingen. He was the author of "'Aruk Goren," a dictionary of the Talmud, with German translations of all the difficult words, particularly those taken from Arabic and Greek. The basis of this work is the "'Aruk" of Nathan ben Jehiel, from which Menahem made many extracts and to which he added new matter. The meaning of the title probably is "a condensed 'Aruk," but Wolf ("Bibl. Hebr." iv., No. 1426b) reads ערוך גוץ = "Short 'Aruk," and the Latin translation "Aruch Breve" is given by Emden in "Ḳohelet Dawid" (No. 195d), although it does not correspond to the Hebrew ערוך גרן given by Isaac Metz. Wolf concluded that, in spite of the similarity of contents, the "'Aruk Goren" is not to be identified with the anonymous "'Aruk ha-Ḳaẓer."

BIBLIOGRAPHY: Steinschneider, *Jewish Literature*, p. 74; Zunz, *Z. G.* p. 120.

G. M. SEL.

MENAHEM ELIEZER BEN LEVI: Lithuanian Talmudist; born at Wilna; died at Minsk Dec. 23, 1816. After studying Talmud under Solomon of Vilkomir he settled at Minsk, where he became head of the yeshibah. His "Ya'ir Ḳinno," a commentary on Ḳinnim, which he wrote when still a young man, was much appreciated by Elijah Wilna:

"Menahem Eliezer was aided by Heaven to find the meaning of this difficult treatise, in which so many commentators have failed." After the death of Elijah Wilna his pupils requested Menahem Eliezer to write a commentary on their teacher's notes to the Shulḥan 'Aruk, Oraḥ Ḥayyim. This commentary he began, but did not finish. He was the author of works on the Pentateuch and on the Mishnah, of novellæ, and of responsa, none of which has been published.

H. R. M. SEL.

MENAHEM BEN ELIJAH: Turkish liturgist of the fifteenth century; a native of Kastoria. He composed the following piyyuṭim: (1) "Mah yaḳeru re'im be-ḳum ashmoret," a "petiḥah"; (2) "Me'on ehyeh asher ehyeh," a "tokaḥah"; both giving in acrostic the names of himself, his father, and his native town; (3) "He middot kol hodot lebaddeka milleta," a hymn consisting of twelve strophes, each beginning and ending with the letter "he"; (4) a "tefillah" entitled "Shirat ha-Yad ha-Ḥazaḳah" or "Malkiel." This piyyuṭ is peculiar in that, in addition to a short introduction, it consists of 140 lines of five words each. Every word in the first ten lines begins with מ; in the next ten lines, with נ; and so on to the end of the piyyuṭ, which therefore gives the full name מנחם בן כ״ר אליה ז״ל fifty times over.

Among the Egyptian fragments published by Neubauer in "J. Q. R." ix. 26–28 is a letter from a certain Menahem b. Elijah which refers to the Crusades. At the end of the letter the writer says that he had intended to go to Syria, but was detained through fear of the German army. As he speaks so often of Salonica, in the district of which Kastoria is situated, one might be tempted to identify him with the subject of this article; but Zunz concluded that the liturgist lived in the second half of the fifteenth century.

G. M. SEL.

MENAHEM THE ESSENE: Prominent teacher of the Essene faction in the time of King Herod, about the middle of the first pre-Christian century. He was renowned for his prophetic powers. According to Josephus ("Ant." xv. 10, § 5), he was distinguished also for the saintliness of his life as well as for possessing knowledge of the future. Legend has it that when he saw young Herod going to school he clapped him on the back and addressed him as king, announcing to him that he would reign successfully, but without displaying the love and justice he ought toward men or the piety due to God, and that therefore his end would be one befitting his crimes. When afterward in the zenith of his power Herod recalled this strange prediction, he sent for Menahem and asked him how long his reign would be. As Menahem did not immediately answer, Herod urged him, asking whether his reign would last ten years; whereupon Menahem replied: "Yes, twenty; nay, thirty years." Pleased with this answer, Herod dismissed him with a clasp of the hand and thenceforth bestowed special honors upon the Essenes. This Menahem has been correctly identified with the one mentioned in the Mishnah as ab bet din and head of a school in association with Hillel ha-Nasi and as Shammai's predecessor; but the duumvirate of ab bet din and nasi is probably due to a misconstruction of history when the real issues between the Hasidæan or Pharisean and the Sadducean or Boethusian factions were no longer understood. A dim reminiscence of the relation of Menahem to Herod, however, has been preserved in a baraita, quoted in Ḥag. 16b, which states that "Menahem went out to join those serving the king, and eighty pairs of disciples attired in silk robes went with him." Another tradition is that he became an apostate (Yer. Ḥag. ii. 77d). The two traditions have been confounded and appear in two other forms also: according to one, Menahem was forced to leave the Pharisaic school, and when seen with his eighty pairs of disciples was told that they no longer had a share in the God of Israel; according to the other, he went from one degree ("middah") to another until he became a Gnostic (heretic?). See, however, Grätz, "Gesch." iii. 213.

K.

MENAHEM BEN ḤELBO. See ḲARA, JOSEPH BEN SIMEON.

MENAHEM BEN JACOB BEN SOLOMON BEN SIMSON: German synagogal poet; died at Worms April 16, 1203. He was a member of an old family of Jewish scholars connected with that city. His great-grandfather Simson, who was living in Worms at the time of the First Crusade and was surnamed "Ha-Darshan," is quoted by Rashi on Isa. lviii. 14 and Amos vi. 3. One of Simson's sons, Samuel, is also quoted by Rashi ("Ha-Pardes," p. 33a). Jacob, another son of Simson, died at Worms during the First Crusade (1096). In his epitaph Menahem is called "teacher of the Law," "preacher," and "payyeṭan." A responsum of his addressed to the German Talmudist Eliezer ben Joel ha-Levi is preserved among the responsa of Judah ben Asher (p. 48a).

Menahem is known principally through his synagogal poetry. Zunz credits him with thirty-one poems—among them being examples of "Ma'arib," "Yoẓer," "Ofan," "Ahabah," "Sulat," "Reshut," "Ḳedushshah"—as well as with a number of "seliḥot." Among his elegies the following deserve mention: "Me'one Shamayim" (which found a place in the German ritual for the 9th of Ab); "Alelai Ki Ba'u Rega'" (on the martyrs of Blois, 1171, and of Boppard, 1195; part of it has been translated into German by Zunz, "S. P." p. 250); a seliḥah on the ten martyrs; a seliḥah commemorating the victims of a persecution in 1147 or 1190. Another seliḥah, beginning "Anah ha-Shem ha-Nikbad," has been translated by Zunz into German ("S. P." p. 263). Corresponding to the condition of the Jews during this period, a tone of gloom and despondency pervades his poetry.

It has been supposed that Menahem is identical with the synagogal poet Menahem ben Jacob de Luṭra, quoted in De Rossi, Parma MSS., No. 1274, and with Menahem of Luṭra (לוטרא), who produced a rimed compilation of the thirteen articles of faith (see "Catalogus Librorum Manuscriptorum civ. Lipsiensis," p. 295). It has been maintained that Menahem was born in Kaiserslautern, and that therefore he was called Menahem de Luṭra; this supposition, however, does not seem tenable.

J. M. Sc.

MENAHEM BEN JAIR: Leader of the SICARII. He was a grandson of Judas of Galilee, the founder of the Zealot party, of which the Sicarii were a branch. Menahem checked the lawlessness of the Sicarii, who, under his leadership, in 66 C.E., stormed the fortress of Masada and slew the Roman garrison. Later they entered the fortress of Antonia, after its garrison had been forced to retreat by the Zealots under Eleazar ben Ananias, and ruthlessly murdered the maimed and helpless left behind by the Romans. Exulting in his successes, Menahem now demanded the leadership of the Zealots, sought recognition as the Messiah, and led his men into still more cruel acts of violence. Eleazar ben Ananias, realizing that the Sicarii were a menace, turned the Zealots against Menahem, who fled to Ophla, but was captured and executed. He was succeeded by his brother Eleazar.

S. S. A. S. W.

MENAHEM BEN JOSEPH OF TROYES: Liturgical compiler; lived at Troyes in the thirteenth century, succeeding his father, JOSEPH ḤAZZAN BEN JUDAH, as ḥazzan. The Jewish liturgy is indebted to him for collecting the order of prayers which was used in the community of Troyes and which is often quoted under the title "Siddur Troyes" (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1118; De Rossi, Parma MS. No. 403). His collection was arranged by his pupil Judah ben Eleazar, perhaps identical with the author of the commentary "Minḥat Yehudah" (written about 1313), which contains a quotation from Menahem's work.

E. C. M. Sc.

MENAHEM B. JUDAH: Roman halakist of the twelfth century. There are few data regarding his life, neither the year of his birth nor that of his death being determined. It is known, however, that he was descended from a family of scholars. He is mentioned by Benjamin of Tudela; and he was personally acquainted with Joseph ibn Plat. The only known date in his history is 1166, in which year he was director of the Talmudic academy at Rome. Menahem's father, Judah b. Menahem, a younger contemporary of Nathan, was a prolific liturgical poet, whose work is, for the most part, included in the Roman Maḥzor. Menahem Judah himself did not write, his studies being confined to the Halakah. The names of two of his contemporaries are known, Solomon b. Abraham and Abraham, called "Ezra b. Mattathias," who were his colleagues on the rabbinical board.

Menahem's responsum referring to the benedictions at circumcision and delivered on the occasion of the visit of Joseph ibn Plat of southern France, is the only one of his that has been preserved. It is possible that he answered the question addressed by the mishnaic commentator Isaac b. Melchizedek of Siponto to the "wise men of Rome"; in any case, the answer was delivered during his rabbinate. Thus he may also be identical with the Menahem celebrated by Abraham ibn Ezra in the poem "Ḥadashim Ma'ase El" (ed. Rosin, "Reime und Gedichte," i. 124 *et seq.*). He was the father of a single son, **Moses.** There is ground for the assumption that this Moses was identical with the author of the Roman "zulat" "Im Tekayyemu Miẓwotai," which he dedicated to his son Menahem in an acrostic.

S. H. B.—G. WE.

MENAHEM BEN MACHIR: German liturgist of the eleventh century; a native of Ratisbon. His grandfather, also called Menahem b. Machir, was a nephew of Gershom b. Judah, and he himself was a cousin of Isaac b. Judah, Rashi's teacher. He is quoted in Rashi's "Pardes" (21d, 33c) and in the "Liḳḳuṭe Pardes" (19b; comp. "Piske Rekanati," No. 589). Menahem witnessed the Jewish massacres of 1096 in Germany and commemorated them in a number of seliḥot. His piyyuṭim include: "Adam be-ḳum," for the Esther fast (quoted in Tos. to Ḥag. 11a); "Aḥalleh et pene Adonai," for Yom Kippur minḥah; "Amarer ba-beki," for the 17th of Tammuz; "Lammah Adonai ta'amod" (in ten strophes); a "ḳinah" for the 9th of Ab, beginning "Ebel a'orer"; five "yoẓerot," including one for the "Naḥamu" Sabbath and one for the "Shubah" Sabbath; three "ofannim"; three "zulatot"; "Kehosha'ta elim," a "hosha'na" for the Sabbath of Tabernacles; "Ma'arib," for the Feast of Tabernacles; "Nishmat," to be recited on Simḥat Torah; and a "reshut" for Ḥatan Torah, to be recited on the same day. Most of his piyyuṭim are alphabetically arranged, but all of them bear the author's signature.

MENAHEM MANN BEN SOLOMON HA-LEVI. See AMELANDER, MENAHEM MANN BEN SOLOMON HA-LEVI.

MENAHEM MANUELE B. BARUCH HA-LEVI: Polish rabbi and author; died in Lemberg 1742. He was a descendant of R. Joseph Cohen of Cracow (author of "She'erit Yosef"), of R. Isaac Shrenzel, and of R. Saul Wahl. He occupied the office of dayyan in Lemberg under the presidency of R. Ḥayyim Rapoport.

Menahem was the author of "Zera' Baruk" (Wandsbeck, 1730), novellæ on some tractates of the Talmud. Another work of his was "'Emeḳ Halakah we-Ṭa'am Man" (Frankfort-on-the-Oder, 1745), consisting of two parts: (1) discourses on the Halakah; (2) explanations of the Haggadah. It contains also an approbation by R. Moses b. Aaron of Lemberg (given in 1735) and novellæ by Naphtali Herz Ashkenazi and Moses Ḥarif, both rabbis of Lemberg. According to a statement of the author in his preface to the "'Emeḳ Halakah," he wrote also a book entitled "'Abodat ha-Lewi" on the order Ḳodashim.

Menahem's signature as dayyan is found in documents and deeds inserted in the Lemberg memorbook.

Bibliography: Buber, *Anshe Shem*, p. 142.
H. R. N. T. L.

MENAHEM MENDEL BEN BARUCH BENDET: Lithuanian Talmudist of the eighteenth century; born at Shklov; died in Palestine. He was a pupil of Elijah of Wilna, whose works he later helped to edit and publish. Elijah Gaon's commentaries on Proverbs, on the Shulḥan 'Aruk (Oraḥ Ḥayyim and Yoreh De'ah), on Abot, on the Sefer Yeẓirah, and on the Pesaḥ Haggadah, and his notes to the minor treatises, were published by him. After Elijah's death Mehahem Mendel went to Palestine and settled at Safed, where he became lecturer in Talmud in the bet ha-midrash established there in memory of Elijah of Wilna. He was the author of ten works, mystical in character, as yet unpublished (comp. Israel b. Samuel, "Pe'at ha-Shulḥan," Preface, Safed, 1836).

E. C. M. Sel.

MENAHEM OF MERSEBURG (מרזיבורק): German author; lived between 1420 and 1450. Of his life few details are known. Jacob Weil (Responsa, No. 133) speaks of him as a great and prominent scholar; and he is mentioned also by Judah Minz, and by Solomon Luria in his commentary on the Talmud. Both of them identify him with Menahem Meïl Ẓedeḳ, while Azulai distinguishes between the two Menahems. According to Jacob Weil's allusions, Menahem must have lived in the first half of the fifteenth century.

Menahem wrote a collection of halakic notes ("nimuḳim"), which forms an appendix to Weil's responsa. This work, which was regarded as authoritative in all the communities in Saxony, deals with the rabbinical marriage laws, the civil code, and the taxation of the communities. In contrast to the meager scientific contributions of the German Jews of the period, who discussed little besides petty liturgical questions, Menahem's book shows his lively interest in all matters that concern Judaism. Of great practical importance was his ruling in reference to the "mi'un," or the decision that if a girl has been married during minority at the instance of her mother or brothers but not at the command of her father, she has the right, when she attains her majority, to dissolve the union without a bill of divorce. Menahem, considering this immoral, repealed the law by virtue of his authority; but in the following century his ruling was set aside, and the Talmudic law again went into force.

S. G. We.

MENAHEM B. MICHAEL B. JOSEPH HA-ḲARA'I (called also **Menahem Girni ha-Goleh**): Karaite philosopher and poet; born in Babylon; a contemporary of Saadia. He corresponded with David al-Muḳammaṣ, whom he had met in Babylon, on philosophical subjects, and perhaps also regarding the Karaite "sheḥiṭah." Subsequently he went to Alexandria, whence he wrote to the Karaite community at Cairo asking aid. In his letter he touched also on philosophical topics, and quoted the Karaite philosopher Joseph al-Baṣir. Leaving Alexandria for Cairo, Menahem continued his correspondence with David al-Muḳammaṣ; for, although the latter was living in the same city, Menahem was restrained by poverty from approaching a man of such prominence. In one letter, written at Cairo, Menahem explained to David, in answer to the latter's reproach, that he believed both in the creation of the world and in the heavenly bodies.

Aside from the rules for slaughtering, written in verse, three of Menahem's piyyuṭim have been preserved in the Karaite siddur. Menahem is quoted as a grammarian in the "Sefer ha-Mibḥar" of Aaron b. Elijah the Elder, and probably also in the "'Eẓ ha-Ḥayyim" of Aaron b. Elijah the Younger. This Menahem must not be confounded with another who was likewise a contemporary of Saadia and who corresponded with the last-named in Arabic.

K. A. B.

MENAHEM B. MOSES TAMAR: Poet and commentator; probably a pupil of Mordecai Comtino of Constantinople; flourished in the fifteenth and sixteenth centuries at Adrianople or Philippopolis. He wrote commentaries to the books of Proverbs, Ruth, and Esther, a supercommentary to Abraham ibn Ezra's commentary to the Pentateuch, and a Hebrew grammar entitled "Rashe Besamim." He furnished a noteworthy contribution to Hebrew poetry in his "Azharot" (comp. Jew. Encyc. ii. 370-371), to which he wrote a commentary entitled "Tanḥumot El." He composed also other liturgical poems, including an imitation of Judah ha-Levi's "Zioniad," and a hymn for the commencement of Purim. It has not been proved—although the attempt has been made—that he is identical with Menahem b. Moses, the author of some liturgical poems found in the Roman Maḥzor, in the Maḥzor of Avignon, and in a manuscript of Abraham Bedersi's "Diwan," now in the British Museum.

MENAḤEM OBEL. See Mourning.

MENAHEM BEN PEREZ OF JOIGNY: French tosafist and Biblical commentator of the twelfth century. Zadoc Kahn ("R. E. J." iii. 7) identifies him with Menahem the Saint mentioned in Tos. Ḥul. 11b; and he conjectures that Menahem was killed at Bray-sur-Seine in the massacre of 1190. Gross, however, thinks this assertion doubtful, and concludes that Menahem died about 1180. Menahem ben Perez took an active part in the synod which was assembled at Troyes under the direction of the two brothers R. Samuel b. Meïr and R. Jacob Tam.

As a tosafist, Menahem ben Perez is quoted in Tos. Ber. 39b, 40a; 'Er. 68a; B. M. 60a; Yoma 6a; Pes. 116a, and by later authorities. Asher b. Jehiel had before him Menahem's tosafot (Asheri, Yeb. 3a). As a Biblical commentator, he is quoted in the "Da'at Zeḳenim," p. 29a, and in the "Minḥat Yehudah," p. 33b. Menahem was the author of a work entitled "Massorah Gedolah" or "The Great Masorah" (still unpublished), in which he completed the work bearing the same title by R. Gershom Meor ha-Golah. Joseph the Zealous mentions Menahem's controversy with a priest ("R. E. J." *l.c.*).

MENAHEM PORTO. See Porto.

MENAHEM OF RECANATI. See Recanati.

MENAHEM BEN SARUḲ (MENAHEM B. JACOB IBN SARUḲ): Spanish philologist of the tenth century. He was a native of Tortosa, and went, apparently at an early age, to Cordova, where he found a patron in Isaac, the father of the subsequent statesman Ḥasdai ibn Shaprut. At Isaac's death Menahem eulogized his protector's virtues in an inscription placed in the synagogue which had been built by Isaac at Cordova. He wrote also elegies on him, which were universally recited during the period of mourning. Menahem then returned to his native city, where he engaged in business.

Ḥasdai ibn Shaprut, however, recalled Menahem to Cordova and encouraged him to complete his life-work, a dictionary of the Hebrew language. In other ways also his new patron availed himself of his protégé's literary talents. Ḥasdai on his mother's death requested Menahem to compose a dirge; and when Ḥasdai addressed his questions to the king of the Chazars, Menahem was commissioned to write the letter, which has become an important historical document. Menahem, however, carried on his work amid great privations, as Ḥasdai did not prove a liberal patron.

Dispute with Dunash.

The dictionary had scarcely been completed when an opponent to its author arose in Dunash ben Labraṭ, who had come to Spain from Fez, and who wrote a criticism on the work, which he prefaced by a eulogistic dedication to Ḥasdai. The slanders of personal enemies likewise seem to have aroused Ḥasdai's anger against Menahem to such a pitch that the latter, at the command of the powerful statesman, suffered bodily violence, his house being destroyed. In a touching letter to Ḥasdai (a valuable source from which most of these statements have been taken) Menahem, who probably died shortly afterward, complained of the wrong done him. He seems to have made some impression on his patron. Menahem himself had not replied to Dunash, but his pupils defended their teacher, and in response to Dunash's criticism wrote a detailed refutation which was marked by polemical acumen and exact grammatical knowledge. Judah b. David Ḥayyuj, one of these three young scholars who so effectually defended their master, became the founder of scientific Hebrew grammar; another, Isaac ibn Gikatilla, was subsequently, as one of the most learned men of Lucena, the teacher of Abu al-Walid Merwan ibn Janaḥ. Thus the most flourishing period of Hebrew philology, whose chief representatives were Ḥayyuj and Ibn Janaḥ, began with Menahem ben Saruḳ.

Characteristics of His Dictionary.

The place to be assigned to the "Maḥberet," as Menahem entitled his dictionary, has been briefly discussed elsewhere (see Jew. Encyc. iv. 580, *s.v.* Dictionaries). This was the first complete lexical treatment of the Biblical vocabulary composed in Hebrew in which the view then prevailing, that there were both uniliteral and biliteral roots, was definitely systematized and worked out. This theory was set aside later by Menahem's own pupil, Ḥayyuj, who correctly assumed the triliteral character of Hebrew roots; but, because it was written in Hebrew, Menahem's dictionary remained for a long time the chief source of philological instruction for Jews who were unacquainted with Arabic, especially, therefore, for those in the Christian countries of Europe. Thus Rashi in the second half of the eleventh century refers to Menahem as a philological authority; Rashi's grandson, Jacob b. Meïr Tam, composed a work for the special purpose of vindicating Menahem against the attacks of Dunash; and (about 1140) Menahem b. Solomon composed in Italy a dictionary which was based for the most part on the "Maḥberet."

Regarding the grammatical importance of Menahem ben Saruḳ's work, it may be noted that, although he had no systematic knowledge of the forms of the language, and was unacquainted even with Saadia's grammatical works, yet he recognized throughout his lexicon that there are inviolable laws underlying the language, and that its forms and phenomena are subject to definite rules. This insight, which appears in the terminology he employs, bridges the apparent chasm between him and his pupil Ḥayyuj. As Menahem composed his work in Hebrew, he could not use the terminology of the Arabic grammarians; yet he tacitly adopted some of their terms, translating them into Hebrew, and explained some words, although without acknowledging it, on the analogy of kindred Arabic expressions. He avoids, however, any open comparison of the language of the Bible with that of the Koran, notwithstanding the precedent furnished him by Saadia and Ibn Ḳuraish, authors whom he quotes in his dictionary. He doubtless refrained from such comparison because of the narrow-minded religious prejudice which then prevented the Spanish Jews from engaging in such linguistic comparisons.

Editions.

Menahem ben Saruḳ's dictionary was edited by Filipowski (London, 1854), and addenda from the Bern manuscript of the "Maḥberet" were published by D. Kaufmann in "Z. D. M. G." xl. 367-409. The defense by Menahem's pupils was edited by S. G. Stern in "Liber Responsionum" (Vienna, 1870), where Menahem's letter to Ḥasdai ibn Shaprut (first edited by Luzzatto in "Bet ha-Oẓar") is reprinted (pp. xxiii.-xxxvii.).

MENAHEM BEN SIMEON: French Biblical commentator at the end of the twelfth century; a native of Posquières and a pupil of Joseph Ḳimḥi. The Bibliothèque Nationale, Paris (MS. No. 192, 1-2), contains Menahem's commentary to the books of Jeremiah and Ezekiel; the commentary to the former was completed in 1191; the commentary to the latter ends in the middle of ch. xl.

Bibliography: Gross, *Gallia Judaica*, p. 450.

J. M. Sel.

MENAHEM B. SOLOMON B. ISAAC: Author of the "Sekel Ṭob" and the "Eben Boḥan"; flourished in the first half of the twelfth century. The presence of twenty-five Italian glosses in his works indicates that he lived in Italy. The "Sekel Ṭob," written in 1139 at Rome, is a midrashic compilation on the Pentateuch. The substance of the old midrashim is quoted in smooth and ornate language, from which foreign words are excluded, the general method being that of Tobias b. Eliezer's "Leḳaḥ Ṭob," which is frequently quoted, both with and without acknowledgment. Menahem's sources, in addition to the Targumim, are the whole of the earlier midrashic literature as well as the literature of geonic mysticism. He interprets also halakic authors, especially Alfasi and R. Hananeel, explaining verses as well as single words literally, although he expressly states that the midrashic interpretation is deeper and more thorough. "Sekel Ṭob" is frequently quoted both for its exegesis and for its halakic decisions. In the Middle Ages it was still intact, but now only the portion from Gen. xv. 1 to Ex. xi. 2 (edited by Buber, Berlin, 1900) is in existence, in two separate manuscripts in the Bodleian Library. Fragments of his commentary to Leviticus are found in a Munich manuscript, and, according to Steinschneider, portions of a similar commentary to the Five Megillot are contained in a codex at Berlin.

Of Menahem's other work, the "Eben Boḥan," only fragments are extant (Munich MS. No. 55). A part of it has been translated by Dukes, and it has been analyzed in detail by Bacher. This work, completed at Rome in 1143, in five months, was intended to prepare the author's three young sons for the study of the Bible. Menahem undertook to prepare for the first time in Hebrew a comprehensive manual of the Hebrew language and of Biblical exegesis. The work was divided into fifty parts; the first part, by far the largest and most valuable, was a dictionary of the Hebrew language; the other parts, now known only by their chapter-headings, dealt with grammar. The author follows chiefly Menahem b. Saruḳ; occasionally, and with diffidence, however, he advances his own views, and the entire conception of the form and contents of the work shows a certain degree of independence. It was intended, according to Bacher, to uphold Menahem b. Saruḳ's system against the teachings of Ḥayyuj and Ibn Janaḥ, introduced about that time (1143) into Italy by Abraham ibn Ezra.

J. A. B.

MENAHEM OF TIKTIN (MaHaRaM TIKTIN; MENAHEM DAVID BEN ISAAC): Polish rabbi and author of the sixteenth century; pupil of Moses Isserles. Menahem occupied himself with emending and annotating various texts; his notes on the halakot of Isaac Alfasi and Mordecai b. Hillel have been published under the title "Haggahot Maharam Tiktin." These "haggahot" were first published by Menahem's son Asher (Cracow, 1597-1598), and have since been republished in the editions of Alfasi. According to Asher b. Menahem (preface to his edition of the "Haggahot"), Menahem wrote many other works, and particularly notes to the Targum, to the commentaries of Rashi and Naḥmanides, to the prayers and piyyuṭim, to the Zohar and other cabalistic works.

Bibliography: Fuenn, *Ḳiryah Ne'emanah*, p. 58; Fürst, *Bibl. Jud.* ii. 351-352; Steinschneider, *Cat. Bodl.* col. 1742.

E. C. M. Sel.

MENAHEM VARDIMAS BEN PEREZ THE ELDER: French tosafist and liturgist; died at Dreux 1224. The name "Vardimas," found in Talmud Babli (Shab. 118b) as a bye-name of Menahem bar Jose, was adopted by this tosafist probably to distinguish him from other persons bearing the name "Menahem." According to Gross, Menahem is identical with the person of the same name mentioned by Samuel of Falaise as having been his master, the epithet "Ha-Ḳadosh" given by Samuel meaning simply "the Pious" and not "the Martyr."

Menahem's authority in halakic matters is invoked by Moses of Coucy ("Semag," § 27) and by many others. He is mentioned among those who took part in the famous discussion on phylacteries, which, according to Gedaliah ibn Yaḥya ("Shalshelet ha-Ḳabbalah," p. 52a), was held in Menahem's house. In a manuscript commentary on the Pentateuch (Neubauer, "Cat. Bodl. Hebr. MSS." No. 270) Menahem is cited as a Biblical commentator. A liturgical poem of his on the sacrifice of Isaac is inserted in the ritual of Rosh ha-Shanah.

Bibliography: Zunz, *Z. G.* pp. 53, 193; idem, *Literaturgesch.* p. 328; Neubauer, in *R. E. J.* xvii. 153; *idem*, in Geiger's *Jüdische Zeit.* ix. 218; Gross, *Gallia Judaica*, p. 173.

S. S. I. Br.

MENAHEM BEN ẒEBI: German rabbi; died at Posen (?) in 1724. He was the pupil of R. Heschel and of Aaron Samuel Kaidanover (author of "Birkat ha-Zebaḥ"). He wrote: "Ẓinẓenet Menaḥem" (Berlin, 1719), an elucidation of difficult passages in the Haggadah; "Leḥem Menaḥem," responsa, and explanations of various Talmudic passages; and "Ṭa'ame Menaḥem," on Rashi's commentary on the Pentateuch.

MENAHEM ZIONI (ẒIYYUNI) B. MEÏR OF SPEYER: Cabalist of the middle of the fifteenth century; author of the cabalistic commentary "Ẓiyyuni," from which he derives his name. He based his work upon Rashi and Naḥmanides, and especially upon the old cabalistic literature of the geonic period. The "Ẓiyyuni" is introduced by poems in alphabetic and acrostic order. The division Bereshit begins with a preface on the importance of the assumption of the creation of the world, and in support of this view the arguments of Maimonides are quoted at length. Short poems serve as transitions to the several parashiyyot, and in conclusion there is an acrostic poem, to which, in the second edition, another poem is added. The verse of Zioni quoted by Dukes (" Orient, Lit." iv. 798) from a manuscript chrestomathy constitutes the last stanza of this final poem. The book is frequently quoted in the Yalḳuṭ Re'ubeni. It was printed by Vincentio Conti at Cremona in 1559, in rabbinic script, and after this edition was burned (in the same year) by marauding Spanish soldiers, it was reprinted there in the following year. Menahem is not to be identified with Menahem Zion b. Meïr מלא דבר (as does Heidenheim, "Pijjutim und Pajtanim," p. 8), a payyeṭan of the twelfth century well known under the name of "Menahem b. Machir" (Zunz, "G. V." 2d ed., p. 405).

H. R. M. SEL.

MENAḤOT ("Meat-Offerings"): Treatise in the Mishnah, in the Tosefta, and in the Babylonian Talmud. It discusses chiefly the more precise details of the regulations governing the different kinds of meat-offering mentioned in Lev. ii. 5, 11-13; vi. 7-11; vii. 9, 10; xxiii. 13, 16; Num. v. 11 *et seq.*, vi. 13-20, xxviii., and xxix. In the Mishnaic order Ḳodashim this treatise is second. It is divided into thirteen chapters, containing ninety-three paragraphs in all.

Ch. i.: The intention requisite to make an offering valid; the omissions through which a meat-offering becomes "pasul" (unfit) or "piggul" (an abomination: if the person sacrificing intends to eat it after the allotted time, it becomes piggul; if he intends to eat it outside the place appointed for it, it becomes pasul); how the handful ("ḳomeẓ") is to be taken; the oil necessary for the ḳomeẓ, and the incense.

"Pasul" and "Piggul."

Ch. ii.: Further details concerning pasul and piggul, according to the different kinds of offerings; how the various parts of an offering affect one another in regard to piggul.

Ch. iii.: The circumstances under which a meat-offering remains kasher; how the parts of an offering, or how different offerings presented together, affect one another in regard to pasul. In this connection many other things are enumerated which render one another invalid, *e.g.*, the two sections of the law ("parashiyyot") in the mezuzah, or the four in the tefillin.

Ch. iv.: Continued enumeration of those things which do or do not render one another pasul (this affords an occasion to explain how the Israelites in the wilderness sacrificed and how the altar, the table, and the candlesticks were consecrated); the meat-offering of the high priest.

Mode of Sacrifice.

Ch. v.: Preparation of the meat-offerings; the offerings which need additional ingredients, and what these must be; what offerings must be brought near the altar ("haggashah") and what offerings must be waved ("tenufah"); what offerings must be both brought near the altar and waved; what offerings may be neither waved nor brought near.

Ch. vi.: Offerings from which only a handful is taken and offerings which are placed entire upon the altar; further details concerning the preparation of the meat-offering.

Ch. vii.: Regulations concerning the sacrifice of thanksgiving ("todah") and concerning the offering of the Nazarites. Here it is stated that the measures were changed, and that the new so-called "Jerusalem" measure was one-sixth larger than the old one, termed "midbari" (from the desert).

Ch. viii.: Whence the materials were taken for the different meat-offerings (here are mentioned the places which produced the best flour and the best oil); how the best oil and flour was obtained; where the best wine was found and how it was tested.

Ch. ix.: The different measures used in the Temple to measure the flour, the oil, and the wine for the various offerings; drink-offerings; the sacrifices for which drink-offerings were requisite; the laying of hands upon the sacrificial animal ("semikah"); the sacrifices in which this takes place, and who may perform the semikah.

Ch. x.: The wave-offering ("omer"); when and whence it was brought; the ceremonial observed in the cutting of it and how it was offered; the regulation introduced by R. Johanan b. Zakkai after the destruction of the Temple.

Wave-Offering.

Ch. xi.: The preparation of the pentecostal bread and of the showbread; the size of the loaves and when they may be eaten; the placing of the showbread on the table and the distribution of it among the priests.

Ch. xii.: Exemption from meat- and drink-offerings; the time after which exemption is no longer possible; offerings from which no one may be exempted; vows of meat- and drink-offerings; how the vow may be fulfilled.

Intention of Sacrifice.

Ch. xiii.: Regulations concerning vows of offerings which are not strictly defined; sacrifices vowed for the temple at Jerusalem may not be offered in the temple of Onias, or vice versa; the priests of the temple of Onias are not permitted to serve in the temple at Jerusalem. The conclusion of the chapter and of the treatise runs: "It is immaterial whether one sacrifices much or little so long as his mind is intent on God."

The order given above is that of the editions of the Mishnah and of many manuscripts of the Talmud (comp. the observation of R. Bezaleel Ashkenazi at the end of the "Shiṭṭah Meḳubbeẓet" on Menaḥot, in the Wilna edition of the Talmud, p. 109b). On the other hand, all the printed editions of the Talmud have the chapter beginning "R. Ishmael," given above as the tenth, in the sixth place, the remaining chapters occurring in the order given above. Special attention should be given to the account in the Tosefta to this treatise of the acts of greed and violence committed by the priests during the time of the Second Temple, which was destroyed because of their rapacity and mutual hatred (xiii. 18–22). The Gemara contains, in the third chapter, interesting observations on the forms of Hebrew letters and on the regulations for the writing of the Torah, of tefillin, and of the mezuzah, while in the fourth chapter are regulations concerning the ẓiẓit.

Special Passages.

The following passages also are specially noteworthy: p. 53a, b—an instance of the peculiar style of R. Ezra's haggadic exegesis; the tradition as to how God justified Himself to Abraham for the destruction of the Temple and the exile of the people; the comparing of Israel to an olive-tree; p. 99b—the attitude of R. Ishmael toward Greek culture; p. 109b—the account of the origin of the temple of Onias. The last passage is important enough to be repeated here: "At the hour of his death the high priest Simon the Just appointed his younger but learned son Onias to be his successor. Onias renounced his claim in favor of his elder brother Shimei. Onias, however, secretly grudged him his position and endeavored to supplant him. Consequently when Shimei, who was inexperienced in the priestly service, asked Onias to instruct him in its duties, the latter misled him into putting on a woman's cap and girdle to officiate in, and then told the priests that Shimei had promised his beloved to officiate in her cap and girdle on the day of his installation in office. When the priests threatened to kill Shimei for thus trifling with the service, he told them how the matter really stood. Thereupon the priests sought the death of Onias, but he fled to Egypt and there built his temple." There is no Jerusalem Gemara to Menaḥot. The Tosafot to Menaḥot (109b, reference word, "nizdamen") refers to Yerushalmi Yoma (v. 2), where the passage cited is found.

Bibliography: Isaiah di Trani, *Tosafot* (in the Warsaw edition of the Talmud, 1861, wrongly designated as "Ḥiddushim" of Solomon ben Adret).

MENAḲḲER. See Porging.

MENANDER: **1.** Putative author of a collection of proverbs, in a Syriac manuscript in the British Museum, edited in 1862 by Land, and bearing the superscription, "The sage Menander said." Either this Menander was a real person, a Hellenistic Jew whose proverbs, probably written originally in Greek, are now extant only in this Syriac translation, or the name is a pseudonym, as Schürer assumes; similar collections of proverbs were frequently ascribed to the famous Attic comedian.

Frankenberg has recently proved that these Syriac sentences are of Jewish origin, and has pointed out numerous instances of relationship between them and sentences in the canonical Book of Proverbs and in Ecclesiasticus. A few sentences quoted from Land's edition may serve to make this kinship clear.

"Rejoice with thy children, O father, for these are the [true] joys" (p. 68, line 13; comp. Prov. x. 1; Ecclus. [Sirach] xxv. 7, xxx. 4). "Whosoever wrongeth his maid servant doth not escape the vengeance of God" (p. 71, line 5; comp. Ecclus. [Sirach] xli. 22).

"Whoever committeth adultery perisheth" (p. 69, line 12; comp. Prov. ii. 18, vii. 27).

"He who sleepeth at an untimely season hateth counsel and guidance: for such sleep bringeth death and destruction" (p. 66, line 3; comp. Prov. vi. 9-11, xix. 15, xx. 13). "If thou art about to take a wife, see that she hath no evil tongue, for a quarrelsome woman is hell, and an evil man is death" (p. 66, below; comp. Ecclus. [Sirach] xxv. 13, 19). "Fear God, and He shall save thee if thou shalt call upon Him in time of need" (p. 67, line 2; comp. Prov. xxiv. 16). "If thou sittest at meat with many, show them not thy filled purse, lest they borrow from thee without thought of repayment; or if thou remindest them, lest they provoke strife with thee, so that thou losest thy money and becomest their enemy" (p. 68, lines 7-9; comp. Ecclus. [Sirach] viii. 12; xxix. 4, 14). "Friendship is good and useful, since it endureth even to the house of death" (p. 72, line 10; comp. Ecclus. [Sirach] vi. 14, xxxvii. 2). "The heart of the fool rejoiceth in witchcraft, and the Chaldean art besotteth the understanding of the simple" (p. 70, line 6; comp. Ecclus. [Sirach] xxxi. 1). "Eat not with the wicked; for he filleth himself at thy table, and then speaketh evil of thee" (p. 70, below; comp. Ecclus. [Sirach] xi. 29). "Work diligently in youth, that thou mayest have wealth in thine age" (p. 71, lines 25 *et seq.*; comp. Prov. x. 22; Ecclus. [Sirach] xi. 10, 11). "Better one day under the sun than a hundred years in sheol" (p. 71, line 22; comp. Eccl. ix. 4). "Desirable are life, money, and the blessing of children; but of more worth is a good name" (p. 72, line 8; comp. Eccl. vii. 1).

The entire work consists of single disconnected sentences. There are no theoretical maxims on the value of wisdom, as in Proverbs and Ecclesiasticus, but only guides to practical life; concerning this there is hardly a theme in Menander that is not treated in the same spirit as in the two Biblical books. The ritual aspect of religion, however, is hardly mentioned.

The entire lack of Christian allusions in the collection may be held to confirm its Jewish origin. Pagan references are found only in the mention of Homer and in the rather long polemic against impious priests who despise their own gods and are gluttonous at banquets (p. 69). Frankenberg interprets this passage as referring to Jewish conditions, while Schürer regards it as a Gentile interpolation.

The only allusions to the date of composition point to the period of Roman rule, for gladiators are mentioned (p. 65, line 14) and crucifixion is declared to be the punishment for theft (p. 70, line 8), although the mention of priests and tithes implies the time of the Temple.

2. Historian; a native of Ephesus; lived probably at the time when the kingdom and the school of Pergamos were at their zenith, whence he was called also "the Pergamonian"; apparently, one of the pupils of Eratosthenes (276–195 B.C.). Menander wrote a history of Phenicia, taking his material from the original documents in the archives at Tyre. As he mentions the fact that King Hiram had wood taken from the forests of Lebanon for the building of the Temple, he is cited by Josephus ("Ant." ix. 14, § 2) as a witness for the verity of Biblical history; and also in connection with Assyrian history Menander has a curious reference, unknown elsewhere, to the younger son of a certain Abdemon, who is said to have vanquished Solomon in guessing riddles (Josephus, "Contra Ap." i. 18; *idem*, "Ant." viii. 5, § 3).

MENDE: Capital of the ancient county of Gévaudan; now chief town in the department of Lozère, France. In the twelfth century a Jewish community existed here, having a synagogue, whose ruins still (1904) remain. In 1307 a contention arose between Philip the Fair, King of France, and the Bishop of Mende on the question of the possessions of the Jews who had been expelled in the preceding year. In April, 1310, an arrangement between the king and the bishop was made by virtue of which Philip abandoned to the latter one-third of the confiscated goods of the Jews, as well as a house at Mende which had belonged to a Jew named Ferrier.

Other parts also of Gévaudan were inhabited by Jews in the Middle Ages, as **Marvejols** or **Marvège** (מרויש), where Jacob ha-Levi, the mystic, lived about 1203; **Villefort** (וילפורט), where the site of the old Jewish cemetery is still known ("Mémoires de la Société Royale des Antiquaires de France," viii. 334); and others. Even in their names several villages indicate the former residence of Jews there, as Salmon, formerly Salomon; Mont-David, Booz, Ruth, and Obed (*ib.* p. 320).

André, *Notice sur les Juifs en Gévaudan*, in *Bulletin de la Société Historique de Lozère*, 1872, historical part, pp. 85–91; Gross, *Gallia Judaica*, p. 364.

D. S. K.

MENDEL: Name of a prominent Hungarian family which flourished in the latter half of the fifteenth century and in the first half of the sixteenth in Ofen (Buda). Members of three generations of it are known; namely, **Jacob, Israel,** and **Isaac Mendel,** who held the office of "Princeps Judæorum," "Supremus Judæorum," or "Præfectus Judæorum" between 1482 and 1539. This office, which seems to have existed only during that period, was created by King Matthias in order to give the Jews an accredited representative at court, who at the same time should be responsible for the payment of their taxes. The "Præfectus Judæorum" was empowered to impose fines and other penalties on the Jews. As an official of the crown he was exempted from wearing the Jews' hat.

MENDEL, EMANUEL: German physician; born at Bunzlau, Silesia, Oct. 28, 1839; educated at the universities of Breslau, Vienna, and Berlin (M.D. 1860). In 1861 he took charge of a private insane asylum at Pankow, near Berlin. He served as surgeon in the Franco-Prussian war (1870–71), and gained the Iron Cross. In 1873 he removed to Berlin and became privat-docent in psychiatry at the university, and in 1884 was made assistant professor. From 1877 to 1881 he was a member of the German Reichstag.

Mendel is collaborator in psychiatry on Eulenburg's "Realencyclopädie der Gesammten Heilkunde," Ebstein-Schwalbe's "Handbuch der Praktischen Medizin," and Tuke's "Journal of Mental Science." He has written many essays in the medical journals, especially on psychiatry, and is editor of the "Neurologisches Centralblatt" and of the "Jahresbericht über Neurologie und Psychiatrie." Of his numerous works may be mentioned: "Progressive Paralyse der Irren," Berlin, 1880; "Die Manie," Vienna, 1881; and "Die Geisteskranken in dem Entwurf des Bürgerlichen Gesetzbuches für das Deutsche Reich," Berlin, 1889.

S. F. T. H.

MENDEL, HENRIETTE: Bavarian actress; born July 31, 1833; died at Munich Nov. 12, 1891. In early life she was noted for her beauty and histrionic talents. Having been created Baroness (Freifrau) of Wallersee in the peerage of Bavaria on May 19, 1859, she married, May 28, 1859, Duke Ludwig Wilhelm, eldest son of Duke Maximilian Joseph of Bavaria, who had renounced his rights of primogeniture in favor of his younger brother. The union was signally happy, and the issue of the marriage, Marie Luise, married Count Georg von Larisch. The baroness died after a protracted illness, and was buried according to the rites of the Catholic Church, in the city of Munich.

MENDEL, HERMANN: Music publisher and writer; born at Halle Aug. 6, 1834; died at Berlin Oct. 26, 1876. He received his musical education at Halle, Leipsic, and Berlin. In 1853 he entered the Berlin music-publishing house of Schlesinger, and later that of Bote & Bock. In 1862 he established a business of his own and conducted it until 1868, contributing at the same time to numerous periodicals, such as the "Echo," "Tonhalle," "Theaterdiener," "Berliner Montagszeitung," and "Deutsche Musikerzeitung," which last-named he conducted from its inception in 1870 until his death. He is best known as the projector of the celebrated "Musikalisches Konversations-Lexikon," which he began in 1870 with a large and distinguished staff of collaborators. At the time of his death, however, it had reached only the letter "M." As completed under the editorship of Dr. Reissmann, it consists of eleven volumes, and is one of the most comprehensive works of its kind. Prominent among the other publications of Mendel are his well-known biographies of Nicolai and Meyerbeer, and his edition of Mode's "Opernbibliothek," consisting of about ninety opera-libretti, with preface, etc.

Bibliography: Grove, *Dictionary of Music and Musicians*; Riemann, *Musik-Lexikon*.

MENDELSBURG, LEON: Russian teacher and writer; born at Hodava, Russian Poland, 1819; died at Warsaw March, 1897. He studied Talmud at Tomashov, where Phinehas-Mendel Heilprin exercised a beneficial influence on his education. In 1850 Mendelsburg was appointed government teacher at the Jewish public school in Novograd-Volhynsk; and in 1854 he was transferred to the rabbinical school at Jitomir, where he remained until the closing of that school by the government (July 1, 1873). He then settled in Koretz, and later removed to Warsaw. From 1850 Mendelsburg was a constant contributor in German to the "Allgemeine Zeitung des Judenthums," in which he published valuable papers on the life of the Jews in Russia. He published also "Dichtung und Warhheit" (Leipsic, 1862), a volume of sketches of Russo-Jewish life.

H. R. J. G. L.

MENDELSOHN, JOSEPH: German author; born at Jever Sept. 10, 1817; died at Hamburg April 4, 1856. He was admitted at an early age to the Jewish free school at Hamburg, and in 1831 entered a printing establishment at Brunswick as an apprentice, remaining there as journeyman until 1839. On his return to Hamburg he devoted himself to literature, but shortly afterward, aided by Solomon Heine, he went to Paris for further study. In 1841 he returned to Hamburg and resumed his literary work.

Mendelsohn was the author of the following works: "Blüthen. Gedichte und Novellen eines Schriftsetzers" (Brunswick, 1839), with a preface by F. K. von Strombeck; "Pariser Briefe" (1841); "Wilde Blumen" (1842); "Ueberall Jesuiten" (1846); and some comedies from the French, including "Er Muss Aufs Land" (1845) and "Ein Weib aus dem Volke" (1846).

Bibliography: Brümmer, *Lexikon Deutscher Dichter und Prosaisten*, ii. 29.
S. M. K.

MENDELSOHN, MARTIN: German physician; born at Posen Dec. 16, 1860; studied medicine at the universities of Leipsic and Berlin (M.D. 1885). After a year spent in Paris, where he took a postgraduate course, he established himself as a physician in Berlin, becoming assistant at the first medical clinic and later at the Charité Hospital. In 1895 he was admitted as privat-docent to the medical faculty of Berlin University, and received the title of professor in 1899.

Mendelsohn has collaborated on Eulenburg's "Realencyclopädie der Gesammten Heilkunde," and since 1894 has edited the "Zeitschrift für Krankenpflege." He has contributed many essays (about 100) to the medical journals, and is the author of: "Das Opium," Berlin, 1888; "Der Comfort des Kranken," *ib.* 1890 (2d ed. 1892); "Aerztliche Kunst und Medizinische Wissenschaft," Wiesbaden, 1893; "Einfluss des Radfahrens auf den Menschlichen Organismus," Berlin, 1896; "Krankenpflege für Mediziner," *ib.* 1899.

Bibliography: Pagel, *Biog. Lex.*

MENDELSOHN, SAMUEL: American rabbi and scholar; born in Shillelen, province of Kovno, Russia, March 31, 1850. He was educated at the rabbinical college, Wilna, at the rabbinic school, Berlin, and at Maimonides' College, Philadelphia, Pa. (1873). In 1883 he received the honorary degree of doctor of law from the University of North Carolina. Mendelsohn was rabbi of the Congregation Beth-El, Norfolk, Va., from 1873 to 1876, since which date he has served as rabbi of the Congregation Temple of Israel, Wilmington, N. C.

Mendelsohn has published "The Criminal Jurisprudence of the Ancient Hebrews" (Baltimore, 1891), in addition to several pamphlets and a large number of articles, on subjects of general Jewish interest and Talmudical research, in "Ha-Ẓofeh," the "Jewish Messenger," "Jewish Record," "South Atlantic Magazine," "American Israelite," and "Revue des Etudes Juives."

In 1879 he married Esther Jastrow, niece of the Rev. Dr. M. Jastrow. He has one son, **Charles Jastrow Mendelsohn**; the latter was fellow in classics in the University of Pennsylvania (1901–1903), where he also received the degree of doctor of philosophy in 1904. A.

MENDELSON, MORRITZ EMANUILOVICH: Polish physiologist and physician; born at Warsaw 1855. He studied medicine at the University of Warsaw, and received his doctor's degree from the University of Kharkov in 1884. From 1876 to 1887 he worked in various laboratories and clinics in Europe: at Berlin under Dubois-Reymond; at Erlangen under Rosenthal; and at Paris under Charcot and Mars of the Collége de France, where he was for some time assistant also. Since 1890 he has been privat-docent in physiology in the University of St. Petersburg.

Among the medical works of Mendelson the following may be mentioned: "Etude sur le Temps Perdu des Muscles," in "Publ. du Collége de France," 1879; "Recherches Cliniques sur la Periode d'Excitation Latente," in "Archives de Physiologie Normale," 1880; "Action de la Veratrine sur le Muscle," *ib.* 1883; "Excitabilité et Travail Mécanique du Muscle," in "Publ. de l'Académie des Sciences," Paris, 1883.

MENDELSON, MOSES (called also **Moses ben Mendel Frankfort**): German Hebraist and writer of the eighteenth and nineteenth centuries; born in Hamburg; died there at an advanced age in 1861; a relative of Samson Raphael Hirsch.

Mendelson lived in his native city as a private scholar. He translated into Hebrew the first book of Campe's "Die Entdeckung Amerika's," entitling it "Meẓi'at ha-Areẓ ha-Ḥadashah" (Altona, 1807), and wrote a poem in honor of Ḥakam Isaac Bernays on the occasion of his installation at Hamburg (*ib.* 1822). His "Baḳḳashat ha-Lammedin," printed by Meïr Hesse, appeared anonymously (*ib.* 1829). He also published: "Shushan 'Edut, d. i. die Erklärung der Fünf Bücher Moshe's" (Stuttgart, 1840-42), two parts, containing the Book of Genesis and representing, according to his own statement, the fruit of thirty years' labor. The Hebrew introduction to the second section (pp. iii.-lxx.) consists of two treatises, "'Awon ha-Doresh ha-Yashan" and "'Awon ha-Doresh he-Ḥadash," in which in diverting fashion he scourges the old "darshanim" and the modern preachers. Mendelson wrote also "Die Synagoge zu Hamburg, Wie Sie War und Wie Sie Sein Soll" (Copenhagen, 1842), dedicated to the president of the German Jewish congregation of Hamburg.

J. I. G. D.

Abraham Mendelssohn: Second son of Moses Mendelssohn; born at Berlin Dec. 10, 1776; died there Nov. 19, 1835; father of Felix Mendelssohn-Bartholdy. In 1803 he became cashier in Foulds' banking-house at Paris; but a year later he returned to Hamburg and went into partnership with his brother Joseph. At the same time he married Leah Salomon, a granddaughter of Daniel Itzig, and was persuaded by his brother-in-law, who at baptism had adopted the name of Bartholdy, to call himself "Mendelssohn-Bartholdy." During the siege of Hamburg by the French, Abraham and his brother were obliged to leave the city on a foggy night secretly and in disguise. They went to Berlin and founded there the banking firm of Mendelssohn & Co., from which Abraham later retired. In the year 1813 he equipped several volunteers at his own expense, and in recognition of his efforts for the public welfare he was elected to the municipal council of Berlin.

Dorothea (Brendel) Mendelssohn: Eldest daughter of Moses Mendelssohn; born at Berlin on Dec. 24, 1764; died at Frankfort-on-the-Main on Aug. 3, 1839. On account of her superior intelligence and her somewhat masculine nature she was even in her youth the leader in the circle of her friends. Early in April, 1783, she married a Berlin banker named Veit, an honest, worthy man, but of limited education and not prepossessing in appearance. After fifteen years of a married life far from happy, Dorothea became acquainted with Friedrich von Schlegel, at the house of Henriette Herz, a friend of her youth, who had advised her a few years after her marriage to Veit to separate from him. Schlegel, at that time young, handsome, and already famous, was captivated by the brilliant intellect of Dorothea, seven years his senior, despite her lack of beauty. She deserted Veit for Schlegel, being disowned by her family. In 1799 Schlegel took her to Jena, where he was unsuccessful. She shared his troubles and endured his moods, and in 1802 traveled with him to Paris, where she became a Protestant and married him. Six years later, on the return journey, she, with her husband and her son Philip, went over to Catholicism at Cologne.

Dorothea paid a severe penalty for her relations with Schlegel, and was often obliged to struggle against abject poverty. For several years she lived on the scanty income from her literary labors and from what her deserted husband sent her anonymously from time to time. In 1818 and 1819 she lived at Rome with her sons Johann and Philip Veit, who had become artists. The rest of her eventful, unhappy life was passed at Frankfort-on-the-Main, where Schlegel was councilor at the Austrian legation, and where, after his death (1829), she lived with her son Philip on a small pension.

While still Schlegel's mistress she had made a literary venture in the novel "Florentine," which was published by him anonymously (Lübeck and Leipsic, 1801), and which was considered the best production of the romanticists in the domain of fiction. Under Schlegel's name appeared her version of the old German metrical romance "Lother und Maller" (Frankfort-on-the-Main, 1805) and the translation of Madame de Staël's "Corinne" (Berlin, 1807). From Old French she translated the "Gesch. des Zauberers Merlin" in Schlegel's "Sammlung Romantischer Dichtungen" (Leipsic, 1804), and she furnished several articles, signed "D," for the magazine "Europa," which Schlegel edited. Later she exchanged the pen for the needle. "There are," she said, "too many books in the world; but I have never heard that there are too many shirts."

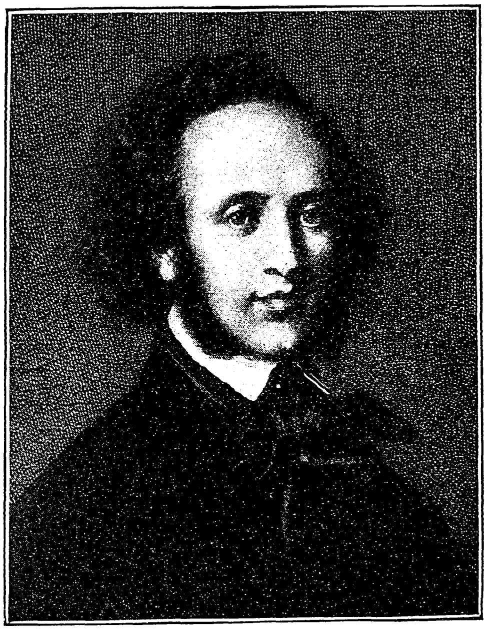
Prutz, *Deutsches Museum*, 1860, Nos. 49 *et seq.*; S. Hensel, *Die Familie Mendelssohn*, i. 45 *et seq.*, Berlin, 1879.

Fanny Mendelssohn: Eldest daughter of Abraham Mendelssohn; born at Hamburg Nov. 15, 1805; died there May 17, 1847. When very young she manifested an exceptional memory and talent for music. She, together with her brother Felix, received her musical training from Ludwig Berger and Zelter, while her education in other subjects was conducted by the philologist Karl Heyse, who was tutor in the Mendelssohn house. In the year 1829 she married the painter W. Hensel in Berlin. She was herself a composer, and many of her brother Felix's "Songs Without Words" are believed to be her work (Hensel, *l.c.* vols. i.-iii.).

D. M. K.

Felix Mendelssohn (full name, **Jakob Ludwig Felix Mendelssohn-Bartholdy**): German composer; born at Hamburg Feb. 3, 1809; died at Leipsic Nov. 4, 1847. He was a grandson of Moses Mendelssohn and a son of the banker Abraham Mendelssohn, who removed to Berlin in 1811. Felix received his early musical education from Ludwig Berger (piano), Zelter (thorough-bass and composition), and Henning (violin). At the age of ten he entered the Singakademie at Berlin as an alto, and in the following year composed the cantata "In Rührend Feierlichen Tönen" as well as several instrumental pieces.

The encouraging words of Cherubini, before whom Mendelssohn played while on a visit to Paris with his father in 1825, animated the young composer; on Aug. 6, 1826, he finished his overture to "Ein Sommernachtstraum" (A Midsummer Night's Dream, op. 21), which composition was publicly performed at Stettin in Feb., 1827. During this season Mendelssohn's opera "Die Hochzeit des Camacho" was produced at the Berlin Theater, but was soon withdrawn by Spontini, who at that time enjoyed almost unlimited authority as director of the opera, and is said to have had a personal antipathy to the young musician. During the following winter Mendelssohn began a propaganda in behalf of Bach's music, which culminated in the formation of a Bach Society and the publication of the masses of Bach as well as of all the church cantatas and other works of the great German composer.



Felix Mendelssohn.

On April 10, 1829, Mendelssohn left Berlin for London, where, in the following month, he made his début with much success at a concert of the Philharmonic Society. It was therefore from an English audience that he first received an acknowledgment of his genius. He gave five concerts in London, whence, in July, 1831, he set out upon a journey through Scotland, as a result of which he wrote one of his most beautiful overtures, "Die Hebriden" (The Hebrides, op. 26).

Conductor of Gewandhaus Orchestra, Leipsic.

Always somewhat unpopular in Berlin, he, on his return to that city in 1833, failed in competition with Rungenhagen to obtain the conductorship of the Singakademie. In May of the same year, however, he was invited to conduct the Lower Rhine Musical Festival at Düsseldorf, in which city he remained as musical director until 1835, when he accepted the conductorship of the Gewandhaus orchestra in Leipsic, a body with which his name was thenceforth inseparably associated. The concerts given by this famous orchestra under Mendelssohn's leadership, and with the assistance of the eminent concert-master Ferdinand David, soon enjoyed a world-wide celebrity and contributed to make Leipsic the musical center of Germany. Mendelssohn's oratorio "Paulus" (St. Paul) was performed at the Lower Rhine festival held at Düsseldorf May 22–24, 1836.

On March 28, 1837, Mendelssohn married Cécile Charlotte Sophie Jeanrenaud. A few months later he left for England to conduct "Paulus" at the Birmingham festival. On his return he devoted all his energies to the Gewandhaus concerts. At the request of Frederick William IV. of Prussia, to whom several of his compositions were dedicated, Mendelssohn in 1841 went to Berlin to act as director of certain concerts which were to be given in connection with an academy of arts planned by the king. Finding, however, that the musicians and the public were more or less hostile to him, he resigned, remaining only at the special request of the king to arrange the music in the cathedral. The body of singers selected for that occasion afterward became famous as the "Domchor" (cathedral choir). During this visit Mendelssohn conducted also the music to "Antigone," which he had composed in compliance with the king's express desire.

In conjunction with Falkenstein, Keil, Kistner, Schleinitz, and Seeburg as directors, and Schumann, Hauptmann, David, Becker, and Pohlenz as teachers, Mendelssohn in 1843 organized the Conservatorium at Leipsic, which institution, under the patronage of the King of Saxony, was opened Jan. 16, 1843. During the summer of 1844 Mendelssohn revisited London, where he conducted the last five concerts given by the Philharmonic Society in that year. He took part also as a pianist in various other musical events of the season, everywhere receiving a most enthusiastic welcome. In 1846 he once more visited England, upon which occasion he conducted the first performance of his oratorio "Elias" (Elijah) at Birmingham (Aug. 26). On April 2, 1847, he conducted "Paulus" at Leipsic, and soon afterward again went to England, where he gave four performances of "Elias" at Exeter Hall, London, besides one at Manchester and another at Birmingham.

Organizes Leipsic Conservatorium.

On May 9 Mendelssohn returned to Germany. While he was at Frankfort the news of the sudden death of his sister Fanny, to whom he had been greatly attached, gave a serious shock to a constitution already enfeebled, and after visiting various health resorts the great composer returned in September to Leipsic, where about six weeks later he died. Baptized early in life, he was interred in Trinity Cemetery, Berlin.

Mendelssohn's best productions are the oratorios "Paulus" and "Elias," the greatest works of their kind since Haydn. Besides the opera "Die Hochzeit des Camacho," Mendelssohn left the unfinished opera "Lorelei," the operetta "Heimkehr aus der Fremde" (op. 89), and several other unpublished operatic compositions. Among his other works are four symphonies; the symphony-cantata "Lobgesang"; six concert-overtures; several concertos; chamber-music; and pianoforte and vocal compositions.

s. J. So.

Georg Benjamin Mendelssohn: German geographer; born in Berlin Nov. 16, 1794; died at Horchheim, near Coblenz, Aug. 24, 1874; son of Joseph Mendelssohn. As a child he went to Hamburg with his parents, but he began his studies at Berlin in 1811, although they were interrupted by the campaigns of 1813 and 1815. After 1828, being appointed privat-docent in geography and statistics at the University of Bonn, he gradually rose to the position of regular professor there. He edited the "Gesammelte Schriften" of his grandfather with a biographical sketch (Leipsic, 1843–45), and also published "Das Germanische Europa" (Berlin, 1836) as well as "Die Ständischen Institutionen im Monarchischen Staat" (Bonn, 1846).

Henriette (Sorel) Mendelssohn: Youngest daughter of Moses Mendelssohn; born at Berlin 1768; died there Nov. 9, 1831. She was a woman of broad interests, clear judgment, and exquisite manners; she remained unmarried, being, like her father, slightly deformed. She first devoted herself to teaching in her sister Recha's school in Altona, but in 1799 entered a Jewish family in Vienna as governess. After a few years, however, probably on the invitation of her brother Abraham, she went to Paris, where she was at the head of a boarding-school. Her modest apartments were the rendezvous of scholars and artists: Spontini, Madame de Staël, and Benjamin Constant were among her frequent visitors, while the two Humboldts, Von Eskeles of Vienna, and others visited her whenever they were in Paris. In the year 1812 she became governess to the daughter of Count Sebastiani and remained in the count's house until the marriage of her pupil to the Duke of Praslin, who became the murderer of his wife. Henriette, "the deepest and most thoughtful," as Rachel Levin called her, was indignant at her sister Dorothea's change of faith. Yet the course of action which she could not forgive in her sister, she later chose for herself, becoming not only a Catholic, but a bigot.

Joseph Mendelssohn: German banker; born at Berlin Aug. 11, 1770; died there Nov. 24, 1848; the eldest son of Moses Mendelssohn. He was highly talented, and was educated in the Talmud by Herz Homberg and in languages and science by Fischer, Engel (the tutor of the two Humboldts), and others. He attended the "Morgenstunden" given by his father, and the lectures on physics by Markus Herz and those on chemistry by Klaproth. He established himself at Hamburg, and afterward, together with his brother Abraham, founded the banking firm of Mendelssohn & Co. at Berlin. From early youth he was an intimate friend of Alexander von Humboldt, who came one day and said that his landlord had served a notice on him to vacate, which was very inconvenient for him because of his natural-history collections. Joseph listened in silence. On the afternoon of the same day Humboldt received a letter saying he might live in his present house as long as he pleased, Mendelssohn having bought the house and become his landlord.

Even in his latter years Mendelssohn busied himself with literature and science. He published "Berichte über Rosseti's Ideen zu einer Neuen Erläuterung des Dante und der Dichter Seiner Zeit" (Berlin, 1840) and "Ueber Zettelbanken" (*ib.* 1846). His father's biography, published by his son G. B. Mendelssohn, was largely Joseph's own work.

His son **Alexander** (died at Berlin Oct. 25, 1871) was the last Jewish descendant of Moses Mendelssohn. He was at the head of the firm after his father's death. He was a noble and unusually philanthropic man, and was the first Jew to receive the title of privy commercial councilor ("Geheimer Commerzienrath").

Moses Mendelssohn

(From the drawing by Daniel Chodowiecki.)

Karl Mendelssohn-Bartholdy: German historian; born Feb. 7, 1838, in Leipsic; died Feb. 23, 1897, at Brugg, Switzerland; son of Felix Mendelssohn-Bartholdy. He was professor of history at Freiburg-im-Breisgau.

Moses Mendelssohn (Moses ben Menahem-Mendel; abbreviated RaMBeMaN); German philosopher, translator of the Bible, and commentator; the "third Moses," with whom begins a new era in Judaism. He was called also, after his birthplace, **Moses Dessau,** with which name he signed his Hebrew and Judæo-German letters; born at Dessau Sept. 6, 1729; died at Berlin Jan. 4, 1786. Mendelssohn's father was a poor Torah scribe, whose exacting occupation had a marked influence on the delicate sense of form and the fine handwriting of his son. In spite of poverty, the father carefully educated the child, whose first Hebrew teacher he was, although he later engaged Rabbi Hirsch, the son of a Dessau dayyan, to instruct him in the Talmud. The boy then continued his studies under the rabbi of Dessau, David FRÄNKEL, who introduced him to Maimonides' "Moreh Nebukim." His unremitting application to his studies brought on an illness which left him with curvature of the spine. In Oct., 1743, Mendelssohn went to Berlin, where Fränkel had been called as rabbi a few months earlier; but the desire for knowledge, which was being more and more awakened, could not be satisfied with the Talmud.

Early Influences.

A considerable influence was exerted upon the young Mendelssohn by a learned Pole, Israel Zamosz, who had been persecuted at home because of his liberal views. Zamosz instructed him in mathematics, and at the same time a young Jewish physician from Prague, Abraham KISCH, was his teacher in Latin. Mendelssohn had scarcely learned the principal rules of grammar when with his scanty earnings he bought a few of the Latin classics and an old Latin translation of Locke's "Essay Concerning the Human Understanding." This book, which had a profound influence on his future development, he tried with indescribable toil to decipher with the aid of a Latin dictionary. He found yet another teacher in Aaron Solomon GUMPERZ, a well-to-do Jewish medical student, who gave him lessons in French and English. Through him he acquired a taste for science and became interested in the Leibnitz-Wolffian philosophy. Gumperz, moreover, introduced him to several able young gymnasium teachers and to Maupertuis, the president of the Berlin Academy. After seven years of privation a better time came for Mendelssohn. A rich silk-manufacturer in Berlin, Isaac Bernhard (Bermann Zilz), engaged him in 1750 as tutor to his children; four years later he made him his bookkeeper, then his representative, and finally his partner.

Occupation as Book-keeper.

While conscientiously fulfilling his business duties, Mendelssohn continued unceasingly to acquire further knowledge. Without systematic schooling, almost without teachers and without guidance, he had attained great proficiency in languages, mathematics, philosophy, and poetry. "His integrity and philosophical mind make me anticipate in him a second Spinoza, lacking only his errors to be his equal," ran a letter of Oct. 16, 1754, written by Gotthold Ephraim Lessing, to whom Gumperz had introduced Mendelssohn as a good chess-player.

Friendship with Lessing.

This acquaintance developed into a most intimate friendship and deeply influenced Mendelssohn's development. Lessing, only a few months his senior, was the most liberal of German authors and the most uncompromising opponent of every form of intolerance. In 1749 he had placed a noble-minded Jew upon the stage in his comedy "Die Juden," which may be regarded as the forerunner of "Nathan der Weise." The claim which had been advanced by certain anti-Jewish critics, that a Jew could not possibly be worthy of respect, drove Mendelssohn to defend the honor of his race in his first literary attempt in German, a letter to Gumperz, which brought him before the public. He was then introduced into the world of letters by Lessing, who, without Mendelssohn's knowledge, published a small book which the latter had given him to read. This work, which appeared anonymously in 1755, was the "Philosophische Gespräche," wherein Mendelssohn declared himself a disciple of the school of Leibnitz and, despite his antipathy for pantheism, took sides with Spinoza. In the same year was published at Danzig the anonymous satirical treatise "Pope ein Metaphysiker," called forth by a prize offered by the Berlin Academy, and written by Mendelssohn and Lessing, both of whom eagerly defended the teachings of Leibnitz. The names of the authors did not long remain hidden. Several academicians, with whom Mendelssohn was acquainted, greeted him with marked respect; and even the court was eager to know "the young Hebrew who wrote in German." Almost contemporaneously with the "Philosophische Gespräche" he wrote the "Briefe über die Empfindungen" (Berlin, 1755; translated into French by Thomas Abbt, Geneva, 1764), which contains a philosophy of the beautiful, and which forms the basis of all philosophic-esthetic criticism in Germany. On the advice of Lessing he then made a German version of the "Discours sur l'Inégalité Parmi les Hommes," a prize essay by Rousseau, whom he greatly admired. This translation, with explanatory notes and a dedicatory letter to "Magister" Lessing, appeared at Berlin in 1756.

Friendship with Nicolai.

Through Lessing, Mendelssohn in 1755 made the acquaintance of the book-dealer Friedrich Nicolai, who in the course of a few months became his intimate friend, helping him in his study of modern languages and encouraging him to learn Greek. Together with Nicolai he took lessons from Rector Damm, who was known as a good Greek scholar; and in a short time he was able to read all the works of Plato in the original without assistance of any kind (G. Malkewitz, in "Vossische Zeitung," May 29, 1881, Supplement; G. A. Kohut, "Moses Mendelssohn and Rector Damm," New York, 1892). He and Nicolai also visited the "learned coffee-house," the meeting-place of a limited circle of scholars to which Mendelssohn belonged and in which each member read a mathematical or philosophical paper every fourth week. For this society Mendelssohn prepared a treatise containing observations "Ueber die Wahrscheinlichkeit" (On Probability), which he requested a fellow member to read for him, either out of modesty or because he stammered. The substance of this paper was repeated in his "Morgenstunden."

When Nicolai projected the "Bibliothek der Schönen Wissenschaften und der Freien Künste" in 1756, Mendelssohn was asked to join its staff, and he soon became not only one of the most diligent collaborators, but the very soul of the whole undertaking. In this magazine he reviewed the latest works on esthetics and literature, and also published his own studies on esthetics. Mendelssohn, Lessing, and Nicolai began a correspondence on the subject, in which they discussed the purpose of tragedy, and the meaning of pity and fear and of terror and admiration. Upon this correspondence, by which Mendelssohn influenced directly Lessing's "Laokoon," were based two treatises by the former which first appeared in the "Bibliothek," namely, "Die Hauptgrundsätze der Schönen Künste und Wissenschaften" and "Ueber das Erhabene und Naive in den Schönen Wissenschaften." These monographs—the first was translated into Italian by C. Ferdinandi (1779) and the other into Dutch by Van Goens (1769)—must be ranked among the most important contributions to pre-Kantian esthetics.

Contributions to Criticism.

At the end of the first year Mendelssohn retired from the "Bibliothek," which Nicolai soon discontinued, editing in its stead (after 1759) the "Briefe die Neueste Literatur Betreffend." The "Literaturbriefe," one of the most important publications of German journalism, were revolutionary in character. The criticism which Mendelssohn (upon whom a large part of the editorial work devolved), together with Lessing, introduced was positive, creative, and essentially German in character. Mendelssohn's judgment was always impartial, sound, and clear-sighted. He, the barely tolerated Jew, dared to use the columns of the "Literaturbriefe" to criticize even the poems of Frederick the Great (1760). The review attracted much attention; and an unprincipled scribbler, Von Justi, wishing to take revenge on the Jew and on the "Literaturbriefe" (which had criticized a book of his as it deserved), lodged a complaint against the journal. The "Literaturbriefe" were condemned; and legend has it that Mendelssohn was ordered to appear before the king at Sans Souci. He is said to have escaped the difficulty by a witty simile which inclined the king in his favor. "Whoever makes verses," he said, "plays at ninepins; and whoever plays at ninepins, be he king or peasant, must have the 'setter-up' tell him how he bowls."

His Marriage.

Mendelssohn had good cause to be satisfied with his position in life. He lived independently, had faithful friends, and had already acquired a fortune, small though it was. He now wished to have a home of his own. In April, 1761, he went to Hamburg, where he was welcomed by Christian admirers, while the chief rabbi of the city, Jonathan Eybeschütz, greeted him in a very flattering letter. There he became engaged to Fromet Gugenheim (b. Oct. 6, 1737; d. at Hamburg March 16, 1812), a plain, poor, and lowly girl, whom he married in June, 1762. During his honeymoon he began to work at the solution of a question proposed by the Berlin Academy of Sciences for a prize essay, "Ob die Metaphysischen Wissenschaften einer Solchen Evidenz Fähig Sind wie die Mathematischen." His monograph "Ueber die Evidenz der Metaphysischen Wissenschaften" received the prize of 50 ducats in June, 1763, and gained the victory over Thomas Abbt and Immanuel Kant, together with whose essays his was printed. A few months later (Oct., 1763) Mendelssohn received the privileges of a protected Jew. A very often-repeated legend tells that the privilege was given him upon the intercession of Marquis d'Argens, who said to the king: "A bad Catholic philosopher begs a bad Protestant philosopher to grant the privilege to a bad Jewish philosopher. There is too much philosophy in all this for justice not to be on the side of the request." At the same time the trustees of the Jewish community in Berlin honored him by exempting him from the payment of all Jewish taxes; and nine years later it passed a resolution that the "distinguished man" should be eligible to all positions in the community.

His "Phädon."

Partly owing to the "Literaturbriefe," of which he continued to be the chief collaborator until 1765, and partly because of the prize essay which had introduced him to philosophical circles, and also on account of his other literary works, his associations with poets and philosophers in Germany and Switzerland became more and more close. He stood in especially intimate relationship to the kindly and versatile young professor Thomas Abbt, in Frankfort-on-the-Oder, and to Rinteln, then "Consistorialrath" in Bückeburg. At the request of the former, who was constantly meditating upon death, Mendelssohn began a correspondence concerning the destiny of man, and on the soul and its fate after death. This correspondence, to which Mendelssohn himself published notes, was printed in Mendelssohn's "Gesammelte Schriften," v. 230-408, and in the third volume of Abbt's works. Abbt's questions and doubts confirmed his friend's decision, reached long before, to write on the immortality of the soul, and formed the basis of his chief philosophical work, "Phädon" (1767). This follows Plato's dialogue of the same name. Mendelssohn's argument is that in the body there must be at least one substance which is neither corporeal nor composite and which unites within itself all ideas and conceptions; the soul, as this self-existing, indivisible essence, can not be destroyed. The "Phädon" was the most widely read book of its time. Its special charm was its elegant and lucid style. Never before in Germany had philosophical questions been treated in such clear language; so that his contemporaries with justice called him the "German Plato." The "Phädon" is one of the best productions of classic German prose; it was reprinted fifteen times and translated into nearly all the European languages, while a number of Hebrew versions were made. The Crown Prince of Brunswick was so delighted with it that during a visit to his royal uncle in Berlin in the autumn of 1769, he invited the author to visit him at the castle, and expressed the wish that he might induce him to come to Brunswick.

The Count and Countess of Schaumburg-Lippe became well acquainted with Mendelssohn in Pyrmont, where he lived in 1773 on account of his health, and conversed with him about death and immortality. The Berlin Academy of Sciences proposed Mendelssohn as a regular member of the philosophical division, but Frederick the Great struck his name from the list, because the Empress Catherine of Russia also wished to be elected. The queen dowager, Luise Ulrika of Sweden, Frederick's talented sister, took pleasure in conversing with Mendelssohn. No stranger of importance who came to Berlin failed to pay his personal respects to the "German Socrates," as Mendelssohn was often called after the appearance of the "Phädon."

(In the collection of F. Lobo, Philadelphia.)

Controversy with Lavater.

Among those who corresponded with Mendelssohn and showed him great honor was Johann Kaspar Lavater, a preacher in Zurich, who visited the "Jew Moses" several times in 1763 and gave, in his "Physiognomik," a very interesting description of "this man with the Socratic soul." Lavater's most earnest wish was to convert the Jew who had spoken admiringly of Jesus (although with the limitation, "if Jesus of Nazareth had been content to remain only a virtuous man"), and who had demonstrated the immortality of the soul on the grounds of reason instead of the Bible. In 1769, therefore, Lavater translated the "Idées sur l'Etat Futur des Etres Vivants, ou Palingénésie Philosphique" of Charles Bonnet, a professor at Geneva, entitling his version "Untersuchung der Beweise für das Christenthum," and sent it to Mendelssohn with an introduction in which he challenged him "either to refute the book publicly, or, if he found it logical, to do what wisdom, love of truth, and honor required and what Socrates would have done if he had read the work and found it irrefutable." This rash step, distasteful to Bonnet and soon regretted by Lavater himself, made a painful impression upon the friends of Mendelssohn and upon all Berlin theologians, but it was most distressing to Mendelssohn himself. He, the avowed enemy of all religious disputes, owed it to his inmost conviction, to his honor, and to his reputation to make a public answer, after obtaining permission from the consistory. The latter willingly allowed him to reply, confiding in his "wisdom and modesty." Mendelssohn's answer is a model of Stoic calm and dialectic acuteness. He declared that his belief in the truths of his own religion was unshakable. "If I had changed my faith at heart," he says, "it would be most abject baseness not to wish to confess the truth according to my inmost conviction. If I were indifferent to both religions, and mocked or scorned all revelation, I should well know what wisdom would counsel, were conscience silent. What could keep me from it?" He declared, moreover, that Bonnet's book was not at all one which could convert him, and that he had read many other defenses of Christianity, written by Germans, which were far more thorough and philosophical. This "Schreiben an den Herrn Diaconus Lavater in Zürich" (Berlin, 1770; Hebrew translation with annotations by N. H. Wessely, edited by Solomon Fuchs, *ib.* 1892) was followed by the "Antwort an den Herrn Moses Mendelssohn zu Berlin," dated Feb. 14, 1770, with "Nacherinnerungen" by Mendelssohn (Berlin, 1770). Lavater regretted that he had involuntarily distressed "the most noble of men" and begged his forgiveness.

The dispute, however, continued. Although Bonnet regretted that he had been the innocent cause of Lavater's action, and although he assured Mendelssohn of his highest esteem, he tried to refute his arguments in a new edition which appeared in the same year, and claimed that "the Berlin Jew had copied his trashy statements from my foot-notes." Such a procedure impelled Mendelssohn to write his "Betrachtungen über Bonnets Palingenesie"; but the essay remained unfinished, and exists only as a sketch. In these observations as well as in letters to Lavater, to the Crown Prince of Brunswick, and to others, he expressed his views regarding the doctrines of Christianity. Meanwhile a succession of scribblers was meddling in the controversy, especially a Frankfort lawyer named J. B. Kölbele, who addressed to him two pamphlets (Frankfort-on-the-Main, 1770), in which spite and calumny rivaled each other. Mendelssohn made no reply. "Whoever is so obviously anxious to irritate me," he wrote to a friend, "ought to have much difficulty in succeeding." In this long controversy he found few defenders, although the theologian Semler in Halle and Professor Michaelis in Göttingen, as well as an anonymous citizen of Hamburg, who wrote "Dienstfreundlich Promemoriaes an die Welche Herrn Moses Mendelssohn Durchaus zum Christen Machen Wollen" (1771), and the satirist Lichtenberg in Göttingen, were his open partizans.

This controversy seriously affected Mendelssohn's health, and compelled him in 1771 to refrain for several months from all mental activity. In July of 1773 and 1774 he went to Pyrmont to regain his health, and there he won the friendship of the reigning prince and became acquainted with Herder, who satirically remarked that "Mordecai had as large a following as the grand vizier." After he had gradually regained his physical strength, Mendelssohn resolved to carry out a cherished plan of devoting more of his intellectual activity to the Jews and Judaism. On account of his interest in philosophy and in German and esthetic literature, and owing to the failure of his first attempt to publish a weekly called "Kohelet Musar" (1750), he had somewhat neglected Jewish interests. In 1757 he had written a sermon on the victory of the Prussians at Rossbach, and a thanksgiving address after the battle of Leuthen, while six years later he prepared a sermon to celebrate the peace of Hubertsburg. The first of these addresses purported to have been delivered by Rabbi Fränkel, and the last by Rabbi Aaron Mosessohn in the synagogue at Berlin, and they had been published without Mendelssohn's name as author (Kayserling, "Dankpredigt und Danklieder von Moses Mendelssohn, zum Ersten Male Herausgegeben und mit Einleitung Versehen," Berlin, 1866). This sermon was translated into English at Philadelphia in 1763 ("Publ. of Am. Jew. Hist. Soc." i. 63, ii. 31, iii. 116; "Allg. Zeit. des Judenthums," lviii. 451). Besides these sermons, the first ones written and published in German by a Jew, Mendelssohn had annotated Ecclesiastes (Berlin, 1770) and written a commentary to the famous "Logic" of Maimonides, entitled "Millot ha-Higgayon." He gave the work to Samson Kalir, a Jewish scholar of Jerusalem, who had it printed (Frankfort-on-the-Oder, 1761) as his own work, but the second and all following editions appeared under Mendelssohn's name.

Acquaintance with Herder.

The controversy with Lavater opened the second period of Mendelssohn's activity, which was concerned chiefly with Judaism and the Jews. Being universally honored not only as a man, but as a metaphysician and German writer, he became, almost unconsciously, the chief representative of his coreligionists. When the Jews in Endingen and Lengnau (see Jew. Encyc. i. 1–2, *s.v.* Aargau), the only places in Switzerland in which they were then tolerated, were threatened with new restrictions in 1774, they appealed to Mendelssohn, asking him to intercede with Lavater. Distasteful as it was for him to have any further relations with his former opponent, he wrote him a letter asking him to do all he could for the Jews of Switzerland, and as a result their rights were protected. When in 1777 several hundred impoverished Jews were about to be expelled from Dresden, where Mendelssohn still had to pay the poll-tax, the president of the community turned to him, and he at once wrote a successful appeal to Freiherr von Ferber, from whom a year earlier he had received an oral assurance of esteem. At the request of the chief rabbi of Berlin, Hirschel Lewin, Mendelssohn compiled in German the "Ritualgesetze der Juden" on Jewish civil law (Berlin, 1778; 5th ed. 1826). Likewise, at the instance of his friend Klein, judge and later on professor, he ren-

Jewish Activities.

dered into pure German, instead of the former Yiddish, the formula of admonition which was spoken on taking the Jewish oath and which remained in force until 1869.

Translation of the Bible.

Mendelssohn, who in his feelings was both Jew and German, wished to teach his coreligionists the German language and thus to prepare them for German culture. For his own children he began to translate the Pentateuch into German; at the urgent request of Solomon Dubno, however, who prepared a Hebrew commentary for the translation, he decided to publish it under his own name, and at his own expense, and a specimen soon appeared, entitled "'Alim li-Terufah" (Amsterdam, 1778). The undertaking was greeted with marked enthusiasm by the people, not only in Germany, but in Holland, France, and England, and was joyfully welcomed by such enlightened rabbis as Hirschel Lewin and his son Saul in Frankfort-on-the-Oder, while Hartwig Wessely and Joseph Haltern composed poems in honor of the translator. On the other hand, there were those who, like Raphael Kohen in Altona and his son-in-law Hirsch Janow, placed the German translation of the Pentateuch under a ban. Toward his opponents Mendelssohn displayed a philosophic calm; for he was opposed to all controversies and especially to those with theologians—"those pugnacious proclaimers of peace," as he called them. He knew only too well "how much opposition, hatred, and persecution are called forth at all times by the slightest innovation, no matter how beneficial." The King of Denmark and the princes and leading men of the kingdom were among the subscribers to his work. Early in March, 1780, the Book of Genesis appeared, to which Dubno had written the greater part of the commentary; but a few months later this collaborator, alienated by the opponents of Mendelssohn, left him, so that he himself was obliged to prepare the entire commentary to Exodus. As assistants for the remaining parts he obtained Hartwig Wessely, Aaron Jaroslav, and Herz Homberg. The whole Pentateuch was finished in 1783, and because of its remarkable merit it created a stir even in Christian circles. At the same time the translation of the Psalms appeared—the fruit of ten years' labor—first in German characters and then in Hebrew type with a Hebrew commentary by Joel Löwe. Mendelssohn's version of the Song of Solomon, which was found among his papers, was published in 1788 by Joel Löwe and Aaron Wolfson, with a Hebrew commentary.

Influence on German Judaism.

The translation of the Pentateuch had an important effect in bringing the Jews to share in the progress of the age. It aroused their interest in the study of Hebrew grammar, which they had so long despised, made them eager for German nationality and culture, and inaugurated a new era in the education of the young and in the Jewish school system. At Mendelssohn's suggestion the Jüdische Freischule was founded at Berlin in 1781, the first organized Jewish school in Germany, after which many similar institutions were modeled. There, according to the system planned by him, instruction was given not only in the Bible and the Talmud, but also in technical branches and in German and French.

Mendelssohn was also the first to advocate the emancipation of the Jews. When his coreligionists in Alsace, through their representative Cerfberr in Metz, requested him to prepare a petition for them to lay before the French council of state, he, seconded by Nicolai, persuaded his friend, the councilor of war, Chr. W. Dohm, to undertake the task. Thus originated the memorial "Ueber die Bürgerliche Verbesserung der Juden," which was the first monograph to discuss the question of emancipation scientifically, and in the drafting of which Mendelssohn appears personally to have had some share ("Zeitschrift für die Geschichte der Juden in Deutschland," v. 75 *et seq.*). The sensation produced by this work could not fail to call forth adverse criticism and new polemics against the Jews.

Plea for Emancipation.

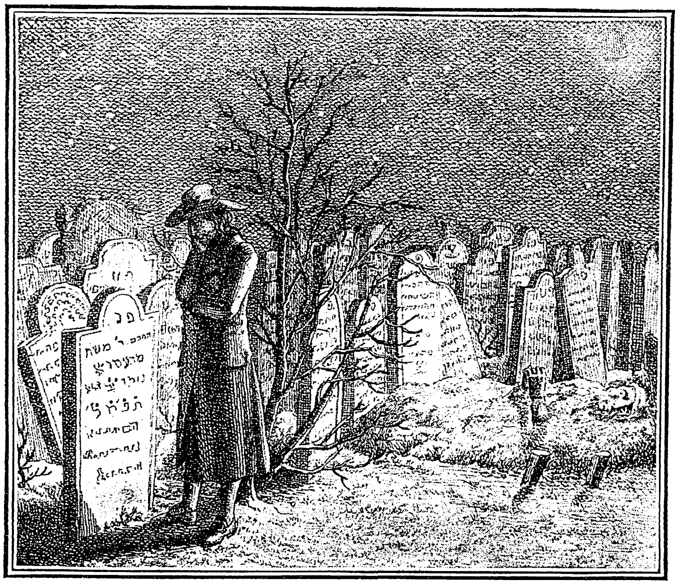
Thereupon Mendelssohn induced his friend Markus Herz to translate the "Vindiciæ Judæorum" by the Amsterdam rabbi, Manasseh ben Israel, from English into German (Berlin, 1782), and wrote for it a preface in which he replied to the critics of Dohm's work, remonstrated with Dohm himself, and energetically opposed the ban and the canon law. Attacks upon this preface appeared in periodicals and pamphlets. Cranz, the author of "Das Forschen nach Licht und Recht," who was supported by a certain Herr Mörschel, especially assailed Mendelssohn's principles and demanded a public reply. In answer Mendelssohn wrote his celebrated epoch-making work "Jerusalem, oder über Religiöse Macht und Judenthum" (Berlin, 1783; translated into Italian, Triest, 1799; into English by M. Samuels, London, 1838, and by Isaac Leeser, Philadelphia, 1852; into Hebrew by A. B. Gottlober, Jitomir, 1867, and by P. Smolenskin, Vienna, 1876).

His "Jerusalem."

Mendelssohn's "Jerusalem," which shows frequent analogies with Spinoza's "Tractatus Theologico-Politicus," but reaches diametrically opposite results, deals in the first section with the relation of State and Church, both of which, though having different objects and methods, should promote human happiness. According to Mendelssohn, the Church has no right to own property, and Church law is essentially contradictory to the nature of religion. He again opposed energetically the right of ban and excommunication, and was the first, at least in Germany, to plead for the separation of Church and State, and for freedom of belief and conscience. In the second part he deals with Judaism, which, according to him, has, in contradistinction to Christianity, no dogma whose acceptance is necessary for salvation. With Leibnitz he differentiated between eternal truths, which are based on reason and not on supernatural revelation, and temporary, historical truths. Judaism is no revealed religion in the usual sense of the term, but only revealed legislation, laws, commandments, and regulations, which were supernaturally given to the Jews through Moses. Mendelssohn did not recognize miracles as evidences of eternal truths, nor did he formulate articles of faith; hence he did not say "I believe," but "I recognize that to be true." "The spirit of Judaism is freedom in doctrine and conformity in action." Accordingly he very curiously defined the ceremonial law as "a kind of writ, living, quickening the mind and heart, full of meaning, and having the closest affinity with speculative religious knowledge." This is the indissoluble bond which is forever to unite all those who are born into Judaism. "What divine law has ordained can not be repealed by reason, which is no less divine," is Mendelssohn's reply to all those who wished to release the Jews from the Law by sophistry. "Jerusalem," on its appearance, met with little favor, yet Kant, then at the zenith of his reputation, called it an "irrefutable book" and regarded it as "the proclamation of a great reform, which, however, will be slow in manifestation and in progress," and which, as he wrote Mendelssohn, "will affect not only your nation, but others as well." A host of reviewers, among whom the Berlin theologians Zöllner, Uhle, and others, together with many insignificant scribblers, condemned "Jerusalem," while they decried its author as a rationalist or even as an atheist. The Jews were little more pleased. Since, on the one hand, he recognized the basal principle of Judaism to be freedom of thought and belief, and, on the other, placed its whole essence in the ceremonial law, both the Orthodox party and the reformers claimed him as their own.

Attitude Toward Reform.

He was conservative by nature, and wished to abolish religious abuses, such as untimely burial; but he stood immovably upon the foundation of the ancestral religion. It was through no fault of his that his disciples took different roads, and that several of his children renounced Judaism after his death.



Tombstone of Moses Mendelssohn.
(From the drawing by Daniel Chodowiecki.)

On Feb. 15, 1781, Lessing, Mendelssohn's best and dearest friend, died. Though in his last years he had written to Mendelssohn but seldom, yet he had erected a noble monument to his friend in "Nathan der Weise," taking as the model for his hero Mendelssohn himself (Kayserling, "Moses Mendelssohn," 2d ed., p. 344, and the bibliography on "Nathan," on p. 342). After Lessing's death Mendelssohn formed a close friendship with the brother-in-law of Elise Reimarus in Hamburg, Mendelssohn's best woman friend. This was the young August von Hennings, who lived for a few years in Berlin as secretary of the legation and who visited Mendelssohn almost daily, afterward carrying on an active correspondence with him (for his letters see Kayserling, "Moses Mendelssohn," 1st ed., pp. 519 *et seq.*, and "Zeitschrift für die Geschichte der Juden in Deutschland," i. 111 *et seq.*). For a short time Mendelssohn was intimate with Herder, to whom he first disclosed his intention of writing a biography of Lessing. He afterward learned through Elise Reimarus that the philosopher F. H. Jacobi, an admirer of Bonnet and a friend of Lavater, had revealed this plan to her, and told her that Lessing in his later years had been an ardent disciple of Spinoza. A new struggle with another opponent confronted him, but before entering upon a contest with Jacobi, Mendelssohn, now weak and sickly, wished to set forth his own fundamental metaphysical beliefs and to refute pantheism. He did this in the lectures which he delivered for his children, for the two Humboldts, and for others, and which appeared under the title "Morgenstunden oder Vorlesungen über das Dasein Gottes" (Berlin, 1785; second enlarged edition, *ib.* 1786; translated into Italian, Triest, 1843; into Hebrew, Königsberg, 1845).

His "Morgenstunden."

Before Jacobi had received this work, he had already published his "Ueber die Lehren des Spinoza, in Briefen an Herrn Moses Mendelssohn," in which he recklessly attacked Mendelssohn. Despite his dislike for personal quarrels, the latter could not leave this challenge unanswered, and he replied in an article, "An die Freunde Lessings," in which he once more defended his friend. On the very day on which he took the manuscript to his publisher he caught cold, and a stroke of apoplexy brought his life to a close.

The celebration of the hundredth anniversary of his birth, like that of his death, was general. The city of Dessau erected a monument to him, and one of his great-grandsons donated in his memory a scholarship-fund of 150,000 marks to the University of Berlin.

An incomplete collection of his works was published at Ofen 1819–21, and, in one volume, at Vienna 1838; the first complete edition, with a biography by Joseph Mendelssohn, which contains also many of Moses' letters, was published in conformity with the wishes of the family (Leipsic, 1843–45). A collection of his works on philosophy, esthetics, and apologetics was published by M. Brasch (Leipsic, 1880). There are several portraits of him by Graff, Frisch, Rode, and Chodowiecki.

Moses Mendelssohn left three sons, Joseph, Abraham, and Nathan, and three daughters, Dorothea, Recha, and Henriette, whose biographies, together with those of some of their children, are given here.

BIBLIOGRAPHY: Euchel, *Toledot Rambeman*, Berlin, 1786 (the first biography of Mendelssohn); Kayserling, *Moses Mendelssohn, Sein Leben und Seine Werke*, Leipsic, 1862 (2d ed. 1888); idem, *Moses Mendelssohn, Ungedrucktes und Unbekanntes von Ihm und über Ihn*, ib. 1883.

Nathan Mendelssohn: Youngest son of Moses Mendelssohn; born at Berlin Dec. 9, 1782; died there Jan. 9, 1852; married Henriette Itzig, youngest daughter of Daniel Itzig. He devoted himself to mechanics, and was the first German to pursue studies in this subject in England and France. He occupied a number of positions during his lifetime. From 1808 to 1813 he was a mechanician in Berlin; from 1813 to 1821, an officer in the militia; and from 1821 until 1825, a manufacturer in Silesia. He then became tax-collector in Glatz and Liegnitz, and in 1836 was appointed inspector of the chief mint in Berlin. Mendelssohn manufactured various instruments, some of which were of his own invention, and which much impressed Alexander von Humboldt by their excellence. At the instance of Humboldt he received a state subsidy for the construction of a dividing-machine which he completed in 1810.

Of a mechanical journal published by Mendelssohn, only a few numbers appeared. Until the end of his life he maintained an active interest in the promotion of industries and manufactures, as well as of art and science. He gave the first impulse to the foundation of the Polytechnic Society of Berlin, before which he lectured on photography, galvanoplastic art, electromagnetism, telegraphy, and kindred subjects.

BIBLIOGRAPHY: J. Löwenberg, in *Vossische Zeitung* (Berlin), Oct. 7, 1883.

Rebecka Mendelssohn: Daughter of Abraham Mendelssohn; born at Hamburg April 11, 1811. She was distinguished for her keenness of intellect and her brilliant wit. She was a gifted linguist and acquired such an exact knowledge of Greek that even in her later years she could read Homer and Plato without difficulty. In May, 1832, she married Lejeune-Dirichlet, professor of mathematics at the University of Berlin, who had been introduced into Mendelssohn's house by Humboldt (Hensel, *l.c.* vols. i.–iii.).

Recha (Reikel) Mendelssohn: Second daughter of Moses Mendelssohn; born at Berlin 1766; married Mendel Meyer, the son of her father's intimate friend, the court-banker Nathan Meyer, in Mecklenburg-Strelitz. The marriage was not a happy one and was soon dissolved. Recha, a bright and clever but sickly woman, then established a boarding-school for girls in Altona, and later lived at Berlin in close association with her brother Abraham (Hensel, *l.c.* i. 55).

BIBLIOGRAPHY: Kayserling, *Moses Mendelssohn*, p. 538.

D. M. K.

MENDES (MENDEZ): Netherlandish family; one of the thirty prominent Jewish families which emigrated from Spain to Portugal under the leadership of the aged rabbi Isaac Aboab, and to which King John II. assigned the city of Oporto as a residence. Persecuted by the Inquisition, the Mendeses left Oporto and settled in Holland and England, emigrating later to America.

Gideon Mendes: Consul of the Netherlands in 1703 in the republic of Zale, Barbary, which had entered into a treaty with the Netherlands in 1651 (Koenen, "Geschiedenis," p. 210).

Isaac (Francisco) Mendes: A learned Jew who, with his parents and his brother **Mordecai (Christoval) Mendes,** went from Oporto to Amsterdam in 1598. Isaac was highly respected by the Senate of Amsterdam. Through his efforts, it is said, the second synagogue of Amsterdam, Neweh Shalom, was erected, and that without occasioning dissension in the community, despite Grätz's assertion to the contrary ("Gesch." ix. 518; Barrios, "Casa de Jacob," pp. 6 *et seq.*).

Isaac Mendes: Poet and musician; lived at Amsterdam about 1665; a friend of Daniel Levi de Barrios. About 100 years later another **Isaac Mendes** lived there, who copied "Danielillo ó Respuestas à los Christianos."

Joseph Israel Mendes: Physician; brother of **Abraham Israel Mendes**; died at Amsterdam Jan. 7, 1619.

Joseph Mendes Bravo: Physician: practised in London in 1663.

Moses (Fernando) Mendes: Physician; son of Maranos in Portugal; professor in the faculty of medicine at Coimbra, and physician to King John IV. of Portugal; died, according to some sources, in 1725, or, according to others, Nov. 26, 1724. When the king's daughter Catherine, wife of King Charles II. of England, became seriously ill in Castile on her way to London, Fernando was sent to her, and at her request he accompanied her to London and remained there as her physician. His brothers **Andreas** and **Antonio** went there with him. In London Fernando and his wife openly confessed Judaism, he taking the name of Moses. A daughter was born to him in the royal palace, to whom the queen was godmother, and who was named **Catherine** (Rachel) after her. In 1698 this daughter married Moses (Antonio) da Costa. In 1687 Mendes was elected a member of the Royal College of Physicians and Surgeons. See COSTA, ANDREA MENDES DA.

D. M. K.

MENDES: One of the oldest Sephardic families. It continued in Spain and in Spanish possessions long after 1492, the year of the general expulsion. Many members of the family and its connections undoubtedly succeeded that year in joining the Jews of

Aquitaine. Others drifted to Holland, Italy, Turkey, etc. The French or Aquitaine branch settled chiefly in Bordeaux, Bayonne, and Came. It intermarried with such old families as Pereira, Da Costa, Gomez, Vaez, Osorio, Sola, Sespedes, Capote, Quiros, Henriques, Soares, Casado, Morro, Bonito, Fonsequa, Nunes, Corcho, Netto, etc. Among Bayonne notables of this family may be mentioned Edouard Mendes (member of the municipal council, president of the tribunal of commerce, chevalier of the Legion of Honor). Auguste Mendes ("inspecteur des postes"), and Elysée Mendes (member of the tribunal of commerce and of municipal council). The earliest Mendes tombstone now in existence in Bayonne is that of Rodrigues Mendes (1637).

The Holland branch produced some notable writers, such as David, son of Ataiyah Franco Mendes (author of "Gemul 'Atalyah," "Ḥanukkat ha-Bayit," "Peri 'Eẓ Ḥayyim," "Teshu'ot Yisrael"), Samuel Rodrigues Mendes, and Samuel da Silva Mendes (authors or editors of editions of the Sephardic ritual on which the modern editions of David Levi, Meldola de Sola, Leeser, and Gaster are based).

The West-Indian or American branch springs from David Pereira Mendes, who fled from Spain to Bayonne and who arrived in Jamaica in 1786. He died the same year, leaving one son, Samuel. This son had twelve children, from one of whom, Isaac, were descended Joseph and Abraham. Joseph was the father of Isaac Philipe and four daughters. Abraham was the father of Frederick de Sola Mendes and Henry Pereira Mendes.

Abraham Pereira Mendes: English rabbi and educationist; born in Kingston, Jamaica, Feb. 9, 1825; died in New York April 18, 1893. He was the first master of the Beth Limud School of Kingston, but resigned in order to prepare in London, England, for the vocation of preacher and rabbi. He studied under Dr. Meldola, the dayyan, and the Rev. D. A. de Sola, "the learned ḥazzan" of the Sephardic community, and received his diplomas. He returned to Jamaica and became for a short time assistant to the Rev. Isaac Lopez, minister of the Kingston Sephardic congregation, but was soon called from that position to be the minister of the Montego Bay community. There he stayed until his wife's failing health compelled him, in 1851, to return to her milder native climate. Mendes was then elected minister and preacher in the Birmingham (Eng.) congregation, and remained there until 1858, when he removed to London, became head of the Neveh Zedek for six years, and established Northwick College, a school for Jewish youth. He continued meanwhile his ministerial duties and literary labors, and on the death of Haham Artom acted as preacher and dayyan for the Sephardic community of London. He was called to the ministry in the Newport (Rhode Island) congregation by the guardian congregation Shearith Israel of New York in 1883, and continued its minister until his death ten years later.

He was the first among the Sephardim to publish a volume of sermons in English (1855). He translated the Daily Prayer-Book of the German Jews (Valentine's edition), and finished the translation of the Festival and Holy Day Books left incomplete by the death of Rev. D. A. de Sola. He published, besides, "The Law of Moses," "Post-Biblical History of the Jews" (to fall of Jerusalem), "Interlineary Translation of the Prayer-Book" (German), and the Haggadah. He married Eliza, a daughter of Rev. D. A. de Sola of London.

A. H. P. M.

Frederick de Sola Mendes: American rabbi, author, and editor; born at Montego Bay, Jamaica, West Indies, July 8, 1850; son of R. Abraham Pereira Mendes. He was educated at Northwick College and at University College School, London, and at London University (B.A. 1869). Subsequently he went to Breslau, Germany, where he entered the university and studied rabbinics at the Jewish Theological Seminary. Mendes received the degree of Ph.D. from Jena University in 1871. Returning to England, he was licensed to preach as rabbi by Haham Benjamin Artom, in London, 1873; in the same year he was appointed preacher of the Great St. Helen's Synagogue of that city, but in December removed to New York, where he had accepted a call to the rabbinate of Shaaray Tefillah congregation (now the West End Synagogue); he entered upon his duties there Jan. 1, 1874. Mendes was one of the founders of the AMERICAN HEBREW. In 1888 he took part in the Field-Ingersoll controversy, writing for the "North American Review" an article entitled "In Defense of Jehovah." In 1900 Mendes joined the staff of THE JEWISH ENCYCLOPEDIA as revising editor and chief of the translation bureau, which positions he resigned Sept., 1902. Associated with Dr. Marcus Jastrow and Dr. Kaufmann Kohler, he is one of the revisers of the "New Bible Translation" in course of publication by the Jewish Publication Society. He has also translated "Jewish Family Papers: Letters of a Missionary," by "Gustav Meinhardt" (Dr. William Herzberg). Of his publications the following may be mentioned: "Child's First Bible"; "Outlines of Bible History"; "Defense not Defiance." He contributed also the article on the "Jews" to "Johnson's Encyclopedia." In 1903 he became for a time editor of "The Menorah," a monthly magazine.

Henry (Haim) Pereira Mendes: American rabbi; son of Abraham Pereira Mendes; born in Birmingham, England, April 13, 1852. He was educated at Northwick College (rabbinics), at University College (London), and at the University of the City of New York, taking the degree of M.D. He became minister of the Manchester (England) Sephardic congregation in 1874, and in 1877 was called to the Congregation Shearith Israel of New York, of which he is still (1904) the minister. In 1881 he was one of the founders of the New York Board of Ministers, and acted as its secretary from its foundation up to 1901, when he became president. He joined Dr. Morais in helping to establish the Jewish Theological Seminary in 1886, of which he became secretary of the advisory board and professor of history. On the death of Dr. Morais he became acting president of the faculty until the appointment of Dr. S. Schechter. In 1884, the centennial of the birth of Sir Moses Montefiore, he moved his congregation to convene the leading

Jews of New York to mark the event by some practical work: the outcome was the Montefiore Home for Chronic Invalids, established in the same year. He was made vice-president of the Gild for Crippled Children in 1896, and in 1901 established the Jewish branch of that gild. He promoted the formation of the Union of Orthodox Congregations of the United States and Canada (1897) and was subsequently elected its president. Mendes was one of the founders of the Young Women's Hebrew Association of New York (1902), of whose advisory board he is chairman.

In Zionism, Mendes stands specially for its spiritual aspect; he served as vice-president of the American Federation of Zionists and was a member of the Actions Committee of Vienna (1898–99). The degree of D.D. was conferred upon him by the Jewish Theological Seminary of America (1904).

In conjunction with his brother Frederick de Sola Mendes, and others, he was one of the founders of "The American Hebrew" (1879), to whose columns, as to those of the general press, he is a frequent contributor. He is the author of "Union Primer and Reading Book" (1882); "Jewish History Ethically Presented" (1895); "Looking Ahead," a plea for justice to the Jew (1900); "The Jewish Religion Ethically Presented" (1904). Among his other writings are: "In Old Egypt," stories about, but not from, the Bible; "Esther"; "Judas Maccabæus"; and many essays in periodical publications.

Mendes Pedigree.—American Branch.

MENDÈS, CATULLE: French poet, dramatist, and art critic; born at Bordeaux May 22, 1841. Educated in his native city, he went in 1859 to Paris, where he has since resided. In 1861 he founded the "Revue Fantaisiste" and in 1864 the "Parnasse," later "La République des Lettres." Since 1893 he has published an annual, under the title "L'Art au Théâtre," containing the articles on music and the drama which he has contributed during the year as critic to the "Journal."

Mendès is the author of a large number of works both in prose and in verse. A perfect stylist, he is nevertheless inclined to the sensual; his "Le Roman d'une Nuit," which appeared in the "Revue Fantaisiste" (1867), was condemned as an immoral novel, and Mendès was sentenced to a month's imprisonment and a fine of 500 francs for publishing it. Of his works may be cited: In verse: "Philomène," 1863; "Odelettes Guerrières," 1871; "La Colère d'un Franc-Tireur," 1872; "Le Soleil de Minuit," 1876; "Nouveaux Contes Epiques," 1885; "Les Vains Amours," 1896. Novels: "Histoires d'Amour," 1868; "Les 73 Journées de la Commune," 1871; "Les Folies Amoureuses," 1877; "Le Roi Vierge," 1881; "Les Monstres Parisiens," 1882–85; "Grand Magnet," 1888; "Rue des Filles-Dieu," 1893; "Le Chercheur de Tares," 1897. Most of these works have passed through several editions. Dramas: "La Part du Roi," 1872; "Justice," 1877; "Gwendoline," 1886; "Isoline," 1888; "Fiammette," 1889; "Médée," 1898. All his pieces have been produced at the theaters of Paris, and have been well received.

In 1894 Mendès received the cross of the Legion of Honor.

MENDES, DAVID FRANCO. See Franco.

MENDES, FRANCISCO: Portuguese Marano; physician to Don Affonso, brother of the cardinal infante; lived in Lisbon in the sixteenth century. The shoemaker Luis Diaz, who proclaimed himself to be the Messiah, induced Mendes to undergo circumcision at the age of thirty-seven and to confess Judaism (*c.* 1541) together with other converts. Diaz was burned at the first auto da fé held at Evora toward the end of 1542, Francisco Mendes escaping the same fate by flight.

G. M. K.

MENDES, MAURITS BENJAMIN DA COSTA: Dutch philologist; born at Amsterdam May 16, 1851; entered the Athenæum (now the University) there in 1867 and studied classic philology. An accident at gymnastics aggravated for two years the deafness from which he had suffered since his boyhood and caused him to give up his regular studies. Mendes established himself as a private master of classical languages and soon became known for his pedagogical capacity. Since 1891 he has been curator of manuscripts in the University library.

Mendes has applied himself to the study of Greek, especially of Homer. In collaboration with his friend Dr. van Leeuwen (since 1884 professor at Leyden) he published the so-called "Editio Batavorum" of Homer ("Ilias," 2 vols., Leyden, 1887–89; 2d ed. 1895–96; "Odyssea," 2 vols., 1890–92; 2d ed. 1897–1898). In this edition not only has the letter "digamma" been restored at the beginning of words in which the study of comparative grammar proves it to have been originally pronounced, but even the greater part of the results of the latest researches in Homeric grammar have been applied in reconstructing the text. For the use of Dutch schools the same collaborators published: "Attische Vormleer" (*ib.* 1877; 6th ed. 1901), an Attic grammar, and "Taaleigen der Homerische Gedichten" (*ib.* 1883; 4th ed. 1898; translated into German 1886, and into French 1887), a grammar of the Homeric idiom. Mendes himself wrote a Latin grammar (*ib.* 1885; 4th ed. 1899).

On Jan. 8, 1898, Mendes was nominated "doctor honoris causa" of Amsterdam University in recognition of his services in classical philology. As curator he published a catalogue of manuscripts, "De Handschriften der Stedelijke Bibliotheek met de Latere Aanwinsten" (*ib.* 1902).

From his youth Mendes has always had a great admiration for the stage. He is the author of many translations for the Dutch theater, and of some original comedies and plays, *e.g.*: "De Schuld" (1882); "Gravin Sarah" (1883); "Tehuis Gebleven" (1883; 2d ed. 1892); "Zyn Model" (1888). His own reminiscences of the stage he collected in a volume entitled "Tooneelherinneringen" (*ib.* 1900), containing important materials for the history of the Dutch stage during the second part of the nineteenth century. With the students of the universities of Amsterdam and Utrecht, Mendes prepared performances of the following classic plays: "Antigone" (1885) and "Œdipus Rex" (1891) of Sophocles; "Aulularia" of Plautus (1892).

Mendes' brother **Henri**, born 1846, a chess-problem composer of reputation, is a deaf-mute.

Bibliography: Rössing, *Zondagsblad*, Dec. 26, 1897 (with portrait); *Mnemosyne*, 1898, xxvi. 205, 599.

S. E. Sl.

MENDES (MENDEZ), MOSES: English poet and dramatist; born in London; died at Old Buckenham, Norfolk, Feb. 4, 1758; son of James Mendes, a stock-broker of Mitcham, Surrey, and grandson of Fernando Mendes. He was educated partly at St. Mary Hall, Oxford (M.A. 1750). Subsequently he engaged in stock-broking, and, having accumulated a fortune, he bought an estate at Old Buckenham, and devoted himself to literary pursuits.

His first effort was "The Double Disappointment," a ballad-opera, produced with considerable success at Drury Lane Theatre, March 18, 1746, and revived at Covent Garden March 22, 1759. "The Chaplet," a musical "entertainment," the words by Mendes and the score by Boyce, scored a great success Dec. 2, 1749, because of both its merit and the clever acting of Mrs. Clive as *Pastora*. "Robin Hood," produced at Drury Lane Dec. 13, 1750, and "The Shepherd's Lottery," played Nov. 19, 1751, were not successful.

Mendes' only prose work was "Henry and Blanch" (1745), a tale taken from the French of "Gil Blas." It was dramatized the same year by Thomson, and was produced at Drury Lane Theatre. Other works were: "The Seasons" (1751), written in imitation of Spenser; "The Battiad" (1751), a satire on Dr. William Battie, written in collaboration with Paul Whitehead and Schomberg; "The Squire of Dames," another poem in imitation of Spenser. Mendes also translated Maphæus' continuation of Vergil's "Æneid" (1767). His "The Blatant Beast" was not published until 1792, when it appeared in the "European Magazine." Mendes' verses betray the dilettante; his humor, the mechanical fun of the playhouse of his day.

Mendes' two sons dropped their father's name after his death, assuming that of "Head" by royal warrant. His grandson **Francis Bond Head** was created a baronet July 14, 1838.

Bibliography: *European Magazine*, Oct., 1792, pp. 251 *et seq.*; *Dict. National Biography*, xxxvii. 248–249; *Jew. World*, Feb. 14, 1873.

J. E. Ms.

MENDES-NASI, FRANCISCO: Member of one of the richest and most respected Portuguese Marano families; died about 1536; husband of Beatrice de Luna. He owned a large banking-house in Lisbon, which had branches in Flanders and France, and which advanced money to Charles V. and other rulers. After Mendes-Nasi's death his brother **Diogo**, director of their Antwerp branch and husband of Beatrice de Luna's sister, was the richest Portuguese Marano, and, together with his sister-in-law, sacrificed great sums to prevent the introduction of the Inquisition into Portugal. Diogo died at Antwerp about 1546, leaving, like his brother, one daughter. A kinsman of both the Mendes was **Hector Mendes**, a very rich man, who, when asked by the King of Portugal what he called his own, replied: "The alms which I have given."

Bibliography: Herculano, *Da Origem e Estabelecimento da Inquisiçao em Portugal*, ii. 159, Lisbon, 1854; Grätz, *Gesch.* ix. 366 *et seq.*; Kayserling, *Gesch. der Juden in Portugal*, pp. 211, 266 *et seq.*

D. M. K.

MENDESIA, GRACIA (called also **Beatrice de Luna**): Philanthropist; born about 1510, probably in Portugal; died at Constantinople 1569; member of the Spanish family of Benveniste. As a Marano she was married to her coreligionist Francisco Mendes-Nasi. After the early death of her husband, Gracia no longer felt secure in Portugal, where the introduction of the Inquisition had endangered her life and property; and together with her only daughter Reyna and several relatives, she fled in 1536 to Antwerp, where many Maranos were then sojourning and where her brother-in-law Diogo Mendes was manager of the branch of the Lisbon banking-house, which was soon transferred entirely to Antwerp.

At Antwerp.

Gracia did not feel at ease in the capital of Flanders, despite the esteem in which she was held; for she could not endure the equivocation, imposed upon all Neo-Christians, of appearing to be a good Catholic, and she longed for a place where she could openly avow her religion. All preparations had been made for departure, when her brother-in-law Diogo, who had married her younger sister, died (*c.* 1545). Being appointed in his will manager of the business and trustee of the entire property, which the rulers indebted to the house had claimed and confiscated under the cloak of religion, Gracia was obliged to remain for some troublous years in Antwerp. It was not until 1549 that she was able to go with her daughter, her widowed sister, and the latter's daughter to Venice. Here she met with new difficulties, occasioned by her own sister, for Gracia had been appointed by her brother-in-law guardian of his minor daughter and trustee of her property until her marriage. The younger sister, who was anxious to escape from Gracia's tutelage, betrayed the latter as a secret Jewess to the Venetian authorities, alleging that she intended to flee with her wealth to Turkey and there openly to avow Judaism. At the same time the sister employed an anti-Semitic Frenchman to denounce Gracia to the French government, within whose territory a large part of her wealth was invested. In consequence of these machinations the King of France as well as the Senate of Venice confiscated the property of the Mendes family, and imprisoned Gracia at Venice in order to prevent her flight. Her nephews, especially the energetic Joaõ Miguez (or Joseph Nasi, as he called himself as a Jew), who was also Gracia's son-in-law, took steps to liberate her and to save the fortune. They appealed to Sultan Sulaiman, explaining to him that a widow had the intention of bringing great treasures into the Turkish empire, but that the republic of Venice prevented her from doing so. Moses Hamon, physician to the sultan, also took the matter up, hoping that the heiress of the wealthy Gracia would marry his son. Thereupon a Turkish ambassador was despatched to Venice, with a mandate to the signoria to grant the captive Marano woman free passage to Turkey, together with her property and suite, and Gracia thus became unwittingly the cause of war between Venice and the Porte.

Causes War Between Venice and Turkey.

In spite of the sultan's mandate, the negotiations dragged over two years. Meanwhile Gracia was liberated (*c.* 1550) and immediately went to Ferrara, where she acknowledged herself to be a Jewess. In 1552 she settled with her daughter Reyna at Constantinople and there also openly confessed Judaism. Her sister soon followed her, and although the two had become reconciled, she still had many difficulties with her and with a nephew.

Her Charities.

Gracia was one of the noblest of women and was honored like a princess. She spent her large fortune in relieving her suffering coreligionists. She made great sacrifices to prevent the introduction of the Inquisition into Portugal, and was the guardian angel of the Maranos. The poet Samuel Usque, who dedicated to her his Portuguese work, "Consolaçam as Tribulaçoes de Ysrael," praises her as "the heart of her people." She relieved the impoverished Maranos in Flanders and other countries, protected them, and "gathered them together in obedience to the prescriptions of their ancient faith"; and in the words of Immanuel Aboab, "Whosoever should undertake to tell of the noble deeds and rare virtues of Donna Gracia would have to write entire books" ("Nomologia," p. 304). Gracia appealed to the sultan against the cruelties of the fanatical Pope Paul IV., who condemned many Portuguese Maranos to the stake, and contemporary rabbis praise the piety, philanthropy, and nobility of soul with which she founded synagogues and aided Jewish scholars. A synagogue which she built at Constantinople still bears her name.

Gracia betrothed her niece, Gracia Mendesia II., to her nephew Samuel Nasi; the portrait of this Gracia at the age of eighteen was engraved by Giovanni Paolo Poggini of Ferrara on a medal which is now preserved in the Cabinet of Medals, Paris.

MENDL, SIGISMUND FERDINAND: English politician; born 1866. He was educated at Harrow School and University College, Oxford, and in 1888 was admitted to the bar at the Inner Temple, London. After unsuccessfully contesting the Isle of Wight in 1892, and Plymouth in 1895, he was elected member of Parliament for Plymouth in the Liberal interest in 1898, serving until 1900.

Bibliography: *Who's Who*, 1902; Harris, *Jewish Year Book*, 1901-2.

J. M. W. L.

MENDLIN, JACOB WOLF: Russian Hebrew economist; born at Moghilef-on-the-Dnieper 1842. He was the first of the Hebrew writers to treat of economic questions in their application to the condition of the Jewish masses in Russia. About 1862 he went to Germany, where he studied the labor movement under Lassalle. This movement roused his ambition to go more deeply into the study of economics and cooperation.

In 1879 Mendlin made his first appearance as a writer in "Ha-Meliẓ," with an article on the economic condition of the Russian Jews; and since then he has contributed articles on the same and allied questions to "Ha-Ẓefirah," "Ha-Meliẓ," "Russkii Yevrei," "Voskhod," and "Ulei." Mendlin has also written: “Ba-Meh Niwwashea‘” (St. Petersburg, 1883), four essays on the improvement of the economic condition of the Jews in Russia; “Meḳore ha-‘Osher” (Odessa, 1898), a politico-economic study; and “Quellen fun Selbsthilfe” (in Yiddish), *ib.* 1894. In these writings Mendlin points to the mutual aid and cooperative organizations as the most effective means of improving the wretched condition of the Jewish masses in Russia. Mendlin also effected the founding of certain charitable institutions in the Jewish community of Odessa, where he is now (1904) living.

H. R. A. S. W.

MENDOZA, DANIEL (nicknamed “Star of Israel”): English pugilist; born 1763 in Whitechapel, London; died Sept. 3, 1836. Champion of England from 1792 to 1795, he was the founder of a distinct school of boxing which marks a period in the history of pugilism. In Miles's “History of British Boxing,” London, n.d., the first period (1719–91) is described as “From the Championship of Fig to the Appearance of Daniel Mendoza” (i. 1–70). Mendoza entered the prize-ring April 17, 1787, at Barnet, where he defeated, in less than thirty minutes, Samuel Martin, a butcher of Bath. This victory led to his being matched against Richard Humphries, by whom he was defeated Jan. 9, 1788, at Odiham, Hampshire, after a contest that lasted twenty-nine minutes, and during which more skill and science were displayed than had been shown in any match hitherto in England. In another match, at Stilton, Huntingdonshire, May 6, 1789, Humphries in the twenty-second round dropped to the ground without being hit, and on a repetition of these tactics Mendoza was declared the conqueror. He fought a third battle with Humphries at Doncaster Sept. 29, 1790, and again defeated him. A popular ballad was composed on these encounters.

In 1791 Mendoza went on a sparring tour and, crossing over to Ireland, thrashed “Squire Fitzgerald,” an amateur, who had expressed a desire to test his skill with the champion (Aug. 2, 1791). On his return to England Mendoza was matched against William Warr (sometimes called “Ward”) of Bristol, whom he defeated in two encounters, at Smitham Bottom, near Croydon, May 14, 1792, and at Bexley Heath Nov. 12, 1794, respectively.

Mendoza was appointed sheriff's officer for the county of Middlesex in 1806, and later went on exhibition tours, the most successful being that made in the summer of 1819. After an absence of fourteen years from the ring, Mendoza was matched against Tom Owen, a Hampshire innkeeper, and met him July 20, 1820, at Banstead Downs. At this time Mendoza was in his fifty-seventh year, his opponent being six years younger. Owen, who had terribly “punished” his adversary, was declared the winner after twelve rounds. Advancing age and chagrin at his defeat led Mendoza to retire from the prize-ring, and to become the landlord of the “Admiral Nelson” in Whitechapel. It is clear that Mendoza introduced a more skilful method of defense than had been current before his time, and tended to make boxing more “scientific,” a contest of skill rather than a struggle of brute force.

MENE, MENE, TEKEL, UPHARSIN (מנא מנא תקל ופרסין): Words written by a mysterious hand on the wall of Belshazzar's palace, and interpreted by Daniel as predicting the doom of the king and his dynasty. The incident is described as follows: Once when King Belshazzar was banqueting with his lords and drinking wine from the golden vessels of the Temple of Yhwh, a man's hand was seen writing on the wall certain mysterious words. Frightened by the apparition, the king ordered his astrologers to explain the inscription; but they were unable to read it. Daniel was then summoned to the royal palace; and the king promised him costly presents if he would decipher the inscription. Daniel read it “Mene, mene, tekel, upharsin” and explained it to mean that God had “numbered” the kingdom of Belshazzar and brought it to an end; that the king had been weighed and found wanting; and that his kingdom was divided and given to the Medes and Persians (Dan. v. 1–28).

Talmudical Explanations.

The first question which presents itself to the critic—namely, why could the inscription be deciphered by Daniel only—engaged the attention of the Talmudists, who advanced various answers. Certain of them concluded that the Hebrew writing had been changed in the time of Ezra, so that even the Jews that were found in the royal court could not read an inscription written in archaic characters. But those who followed R. Simeon in maintaining that the writing had not been changed found other solutions for the problem; *e.g.*, it was written in the cryptographic combination of את בש, each letter of each pair being substituted by its companion, *e.g.*, יטת יטת אדך פוג חמט; or the words were written thus: ממתום ננקפי אאלרן, one above the other, having to be read vertically; or אנם אנם לקת ניסרפו, each word backward; or, again, נמא נמא קתל פורסין, the first two letters of each word being transposed (Sanh. 22a). It is evident that the author of the Book of Daniel meant that the inscription was written in characters familiar to the king and the wise men of Babylon, but that, as often happens with ancient inscriptions, the transposition of certain letters baffled every attempt to decipher them.

Various difficulties of the writing present themselves also in Daniel's interpretation: *e.g.*, the repetition of מנא is not explained, and instead of the plural ופרסין, the singular פרס without the conjunctive ו is translated. It is true that Theodotion and Jerome, by giving three words only to verse 25, make it uniform with verses 26–28 (Theodotion reading “Mane”), and that the Septuagint, though differing from Theodotion as to the meaning of the words, has also only three words, which it transfers to verse 17. Nevertheless the discrepancy in the Masoretic text as well as the grammatical construction of the words has greatly puzzled the modern critics. It may be noted that the author chose words which had a double meaning and that Daniel, accordingly, gave the king a dual interpretation,

Views of Modern Scholars.

applying both meanings of the words. Thus he interpreted מנא as "to count" and "to finish"; תקל, to "weigh" and "to be wanting"; פרס, "to divide" and "Persia." The question now arises as to the grammatical construction of these words. According to Theodotion, Jerome, and Josephus ("Ant." x. 11, § 3), they are substantives; but according to the Septuagint they are verbs in the perfect passive, which, owing to their vocalization, are difficult of explanation. Clermont-Ganneau, in a long article on this subject ("Journal Asiatique," series 8, viii. (1886), 36 *et seq.*), first advanced the opinion that they are names of weights, namely, a mina, a shekel, and a peras, which last-named in the Talmud means a half-mina (comp. the expression מנה ופרס in 'Eduy. iii. 3), and that ופרסין may be the dual form, "two half-minas." Thus the mina would be an allusion to Nebuchadnezzar; the shekel, which in value is a very small part of the mina, to Belshazzar; and the two half-minas to Media and Persia (comp. Ta'an. 21b). But as this interpretation does not show how the words predicted the fall of Babylon, Clermont-Ganneau admits the possibility of the first two words being verbs, but suggests that the ו of ופרסין should be affixed to the preceding word, which may be vocalized either תקִלוּ, "they weighed," or תקֻלוּ, "weigh"; in either case having פרסין as its direct object.

Among the many other suggestions offered by modern scholars that of J. Marquart may be mentioned ("Fundamente Israelitischer und Jüdischer Geschichte," 1896, p. 73). He thinks that the legend of Belshazzar's vision is connected with that of Heliodorus, and that possibly the writer of Dan. v. was of the Maccabean age. Marquart makes no emendation in the text of the passage in Daniel; but if his suggestion is well founded the sentence may be amended to read as follows: מחא מחא קטל פרש = "Smite, smite, slay, thou horseman!" As to the historicity of the inscription, Boissier points out that predictions written by a mysterious hand are referred to in a cuneiform tablet (see "Proc. Soc. Bibl. Arch." 1896, xviii. 237).

S. M. Sel.

MENELAUS (known also as **Onias**): High priest from 171 to about 161 B.C.; successor of Jason, the brother of Onias III. The sources are divided as to his origin. According to II Maccabees (iv. 23), he belonged to the tribe of Benjamin and was the brother of the Simeon who had denounced Onias III. to Antiochus IV. (Epiphanes) and revealed to the Syrians the existence of the treasure of the Temple; according to Josephus ("Ant." xii. 5), Menelaus was the brother of Onias III. and of Jason. Of these two conflicting statements the evidence is in favor of the former, first because it is unlikely that two brothers would be called by the same name, and secondly because the popular opposition to Menelaus in favor of Jason, though both belonged to the Hellenistic party, is more easily explained if the successor of Jason did not belong to the priestly family. It is possible that Josephus confounded Simeon, the brother of Menelaus, with Simeon, the father of Onias and Jason.

Hellenistic Tendencies.

Although during the three years of his pontificate Jason had given many proofs of his attachment to the Hellenistic party—by building a gymnasium in Jerusalem and by introducing many Greek customs—the zealous Hellenists of the stamp of the Tobiads plotted his overthrow, suspecting him of partiality to traditional Judaism. At their head stood Menelaus, who professed the utmost contempt for the religion of his fathers and was ready to commit any crime in order to gratify his ambition. Having been sent to Antiochus to pay the annual tribute, he took the opportunity to outbid Jason and secure for himself the office of high priest. An officer named Sostrates was sent by Antiochus with a troop of Cyprian soldiers to subdue any opposition that might be attempted by the followers of the deposed high priest Jason and to collect at the same time the sum Menelaus had promised.

Menelaus' first act was to seize the sacred vessels in the Temple stores in order to meet the pecuniary obligations he had incurred. This sacrilegious act, which was regarded even by the Greeks as heinous, came to the ears of the deposed high priest Onias III., who publicly accused Menelaus of robbing the Temple. The latter, afraid of the consequences of this accusation, induced the king's lieutenant Andronicus, who had had his share of the plunder, to get rid of Onias before a formal complaint had been lodged with the king. Accordingly Onias was decoyed from the sanctuary at Daphne, in which he had sought refuge, and murdered. Menelaus continued to plunder the treasures of the Temple until the people were aroused and scenes of violence ensued, in which his brother Lysimachus met his death. He then brought before the king an accusation against the people of Jerusalem, that they were partizans of the Egyptians and persecuted him only because he was opposed to their party intrigues. This accusation caused the execution of several Jews who, although they proved beyond any doubt that Menelaus and Lysimachus had desecrated the Temple, were sentenced to death.

Conflict with Jason.

Meanwhile Jason had not abandoned his claims to the high-priesthood, and while (170) Antiochus was waging war against Egypt he succeeded in making himself master of Jerusalem and in forcing Menelaus to seek refuge in the citadel. Antiochus regarded this proceeding as an affront upon his majesty, and, having been compelled by the Romans to leave Egypt, he marched against Jerusalem, massacred the inhabitants, and plundered the Temple; in this he is said to have been assisted by Menelaus.

According to II Maccabees, it was Menelaus who persuaded Antiochus to Hellenize the Jewish worship, and thereby brought about the uprising of the Judeans under the guidance of the Maccabees. During the first years of the restoration of the Jewish worship Menelaus still remained (though only nominally) high priest. He is said to have been put to death by Antiochus V. (Eupator) when the latter made definite concessions to the Jews, the reason assigned being that Menelaus, by his evil counsel, was indirectly responsible for the Jewish rebellion.

S. I. BR.

MENEPHTHA. See MERNEPTAH.

MENGS, ANTON RAFAEL: Austrian painter; born in Aussig, Bohemia, March 12, 1728; died in Rome June 29, 1779; son of Ismael Israel MENGS. Anton Mengs was early destined for an artist's career; and his father with much strictness kept him to his studies, although the boy at first evinced but little inclination or ability for that calling. In 1741 he was taken to Rome, where he studied the old masters, and upon his return to Dresden (1744) he was honored by King Augustus III. with the title of court painter. He obtained the royal permission to return to Rome to complete his studies, and in 1748 his first large canvas, "The Holy Family," appeared. A beautiful peasant girl, Margareta Guazzi, who had posed as a model for this painting, won his heart; and in order to marry her he abandoned the Jewish faith and was admitted into the Roman Catholic Church. Mengs again visited Dresden in 1749, but returned to Rome in 1752, where he spent the greater part of his life, and where most of his important works were painted. In 1754 he became the first director of the newly founded Painters' Academy in that city.

Mengs was an eclectic who endeavored to blend the peculiar beauties of the old masters Raffael, Titian, and Correggio. His taste was exquisite, his groupings and compositions simple and noble, his drawing always correct; while his coloring, with regard to which he took Titian for his example, was strong and true. Though his paintings lack the originality of genius, their force and beauty give them rank among the foremost works of art.

In Rome Mengs painted the following large pictures: "Saint Eusebius Surrounded by Angels" (on the ceiling of the Celestine Monastery; 1757); "Apollo and the Nine Muses on Parnassus" (on a ceiling in Cardinal Albani's villa); "History Writing on the Shoulders of Time"; "A Meeting of the Gods"; "Cleopatra." In 1761 Mengs was called to Madrid by King Charles III. of Spain to decorate the ceiling of the dining-hall in the royal palace. He painted "The Apotheosis of Trajan" and "The Hall of Fame," which latter is considered his masterpiece. In Madrid he completed also "The Ascension of Christ" for the altar of a new Catholic church in Dresden. Various other paintings by Mengs are in the possession of the art-galleries of many European capitals. Berlin has a "Holy Family"; Vienna, "St. Joseph's Dream," "The Virgin," "The Infant Savior," "The Annunciation," and "Infanta Maria Theresa"; St. Petersburg, "Andromeda Liberated by Perseus"; Dresden, "Cupid Sharpening an Arrow"; Madrid, "Christ's Release from Calvary" and "Mary of Magdala."

The "Opere di Antonio-Raffaelle Mengs" (2 vols., Parma, 1780) has been translated into German (by G. F. Prange, Halle, 1786), English (London, 1796), and French (by Jansen, Ratisbon, 1782; Paris, 1786). A young Englishman named Webb, to whom Mengs had expressed his ideas on art, published them for his own under the title "Untersuchungen über die Schönheit" (Zurich, 1771), which act of plagiarism gained him considerable fame.

Mengs had twenty children, seven of whom outlived him. Of these, five daughters were adopted by King Charles III. of Spain, who also accorded pensions to Mengs's two sons. Mengs bequeathed his valuable collections of drawings, vases, and gypsoplasts to the royal academies of art in Madrid and Dresden. Empress Catherine II. of Russia erected a monument to his memory in St. Peter's Church, Rome, where he was interred.

MENGS, ISMAEL ISRAEL: Danish portrait-painter; born in Copenhagen 1690; died in Dresden Dec. 26, 1765. He learned the art of miniature- and enamel-painting in Lübeck, and then traveled through Germany, Italy, and Austria, earning a scant livelihood until 1764, when he was appointed professor at the Academy of Art in Dresden, and court painter to King August III., from whom he received an annuity.

MENKEN: American family, the first known member of which was Solomon Menken.

Jacob Stanwood Menken: American merchant; born in Cincinnati 1838; youngest son of Solomon Menken. With his brother Nathan Davis he entered the Union army, and was captain of Company B, 27th Ohio Infantry. He is (1904) a member of the Military Order of the Loyal Legion.

Nathan Davis Menken: American merchant; born 1837 at Cincinnati; died 1878 at Memphis, Tenn.; second son of Solomon Menken. He entered the Union army at the outbreak of the rebellion in 1861, and was captain of Company A, 1st Ohio Cavalry. He was commander of General Pope's body-guard, and took part in thirty-seven battles and skirmishes in West Virginia, being mentioned for his "distinguished and soldier-like bearing" as a member of the supporting force in Colonel Brodhead's report (March 27, 1862) of the battle of Kernstown, Va. ("War of the Rebellion, Official Records,' first series, xii. 156, Washington, 1902). During the epidemic of yellow fever in Memphis in 1878 Menken assisted a number of his coreligionists to leave the city by supplying them with the necessary funds. He himself remained, and, while cooperating with the Howard Association of which he was a member, succumbed to the disease. Menken was also a member of the Military Order of the Loyal Legion.

Percival S. Menken: Eldest son of Jules A. Menken; born in Philadelphia 1865; educated at Columbia University (M.A., Ph.D., LL.B.). He is a member of the New York bar, and president of the Young Men's Hebrew Association of New York. For a number of years he was a trustee and secretary of the Jewish Theological Seminary Association, and is now (1904) a director of the Jewish Theological Seminary of America.

S. Stanwood Menken: Eldest son of Nathan D. Menken; born in Memphis 1870. He is a member of the New York bar and is active in civic affairs. In 1897 he was nominated for judge of the City Court on the Citizens' Union ticket as well as on the People's ticket. In 1896 he founded the Hall of Records Association, to properly house the public records in New York city.

Solomon Menken: Born in Westphalia, Prussia, 1787; died in Cincinnati, Ohio, 1853. He was sent to New York in 1821 as supercargo in a sailing vessel belonging to his uncle, a banker and shipowner of Amsterdam. In 1819 he settled in Cincinnati, Ohio, and founded in that city about 1825 the first wholesale dry-goods house, that of Menken & Milius. His sons, **Jules A.** (born in New York 1836; died at Watch Point, Vt., 1890; first lieutenant in the Home Guards, Cincinnati, during the Rebellion), Nathan Davis, and Jacob Stanwood Menken (for the last two see above), were merchants in Cincinnati (from 1855 to 1861) and Jules A. and Nathan Davis in Memphis, Tenn. (as Menken & Co. from 1862 to 1888, and as J. S. Menken & Co. from 1888 to 1899).

A. E. N. S.

MENKEN, ADA ISAACS: Anglo-American actress and writer; born June 15, 1835, at Milneburg, La.; died in Paris, France, Aug. 10, 1868. Her first appearance before the public was at the Opera-House, New Orleans, where she danced with her sister Josephine, the two being known as "The Theodore Sisters." From New Orleans Ada went to the Tacon Theater, Havana, as a dancer. Thence she went to Texas, where she had many thrilling experiences, among them being a capture by Indians. Next she tried her hand at literature, writing for various newspapers, and teaching languages.

In Aug., 1856, she was married to Alexander Isaacs Menken, publicly embracing Judaism; and she next played in Milman's "Fazio" at the Varieties, New Orleans, and at various theaters in the South and Middle West. While at Nashville (April 3, 1859) she was married to John C. Heenan, the prize-fighter, known also as the "Benicia Boy." With him she went to New York city, appearing at the National and the old Bowery theaters in "Soldiers' Danger" and "The French Spy." Next she joined the company of John E. Murdoch, with whom she went on tour, playing rôles entirely beyond her and even attempting *Lady Macbeth*.

She made her appearance in her best-known rôle, that of *Mazeppa*, at the Green Street Theater, Albany, N. Y., June 7, 1861. Her success was considerable, though the part was more acrobatic than histrionic. In Oct., 1861, she married R. H. Newell, better known as Orpheus C. Kerr. Her next step was to go to London, where on Oct. 3, 1864, she appeared at Astley's Theatre as *Mazeppa*. She failed to please, and went into temporary retirement, emerging Oct. 9, 1865, to play *Leon* in Brougham's "Child of the Sun." In the meantime she had divorced Newell and married James Barclay (Aug. 21, 1865). A year later she went to Paris, where she played at the Gaîté in Burgois and Dugué's "Les Pirates de la Savane" (Dec. 30).

Ada Menken published two books of poems: the first, "Memoirs" (1856), under the nom de plume "Indigena"; the second, "Infelicia," in 1868, dedicated "by permission" to Charles Dickens. She attracted considerable attention among English and French men of letters, *e.g.*, in London, Charles Dickens, Charles Reade, and Algernon C. Swinburne, and in Paris the elder Dumas, Théophile Gautier, and Victor Hugo.

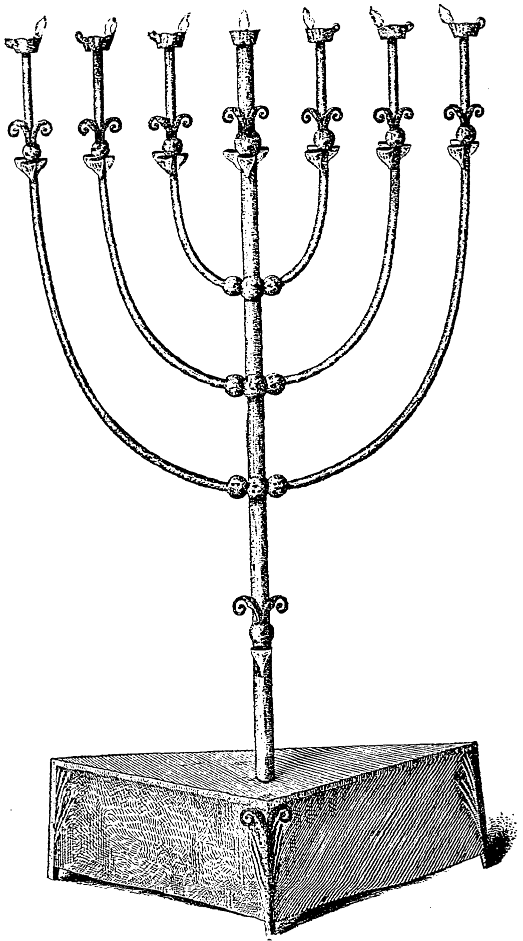
MENORAH: The holy candelabrum. For **Biblical Data** see CANDLESTICK.

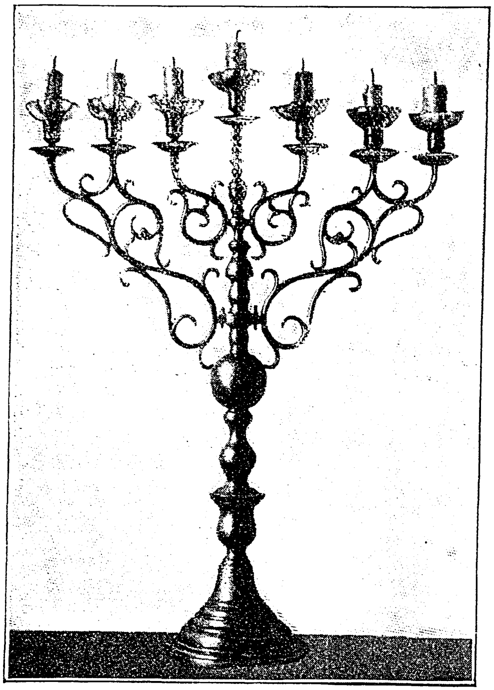
——**In Rabbinical Literature:** The Talmud speaks only of the menorah made by Bezaleel for the Tabernacle in the time of Moses (Ex. xxxvii. 17 *et seq.*), which was later placed in the Temple



The Mosaic Menorah as Described in Rabbinical Literature.
(After a sketch by J. D. Eisenstein, New York.)

(Tosef., Soṭah, xiii., beginning), between the ten menorot made by Hiram for Solomon's Temple (I Kings vii. 49). Each of these menorot was one denarius in excess of the required weight ("kikkar") of the Mosaic menorah (Men. 29a).

The Mosaic menorah, according to the Talmud, stood 18 "ṭefaḥim" (1 ṭefaḥ = 4 inches), or 72 inches, high, divided as follows: 3 ṭefaḥim for the tripod, including a "peraḥ" (blossom in relief); 2 ṭefaḥim space; 1 ṭefaḥ for a "gebia'" (cup or vase), "kaftor" (knob), and peraḥ; 2 ṭefaḥim space: 1 ṭefaḥ for a kaftor and branch on each side of the center shaft and a kaftor above the joint; 1 ṭefaḥ space; 1 ṭefaḥ for a kaftor and branch on each side and a kaftor above; 1 ṭefaḥ space; 1 ṭefaḥ for a kaftor and branch on each side and a kaftor above; 2 ṭefaḥim space; 3 ṭefaḥim for a cluster of three gebi'ot, a kaftor, and a peraḥ on each of the branches and the center shaft (Men. 28b).



A Modern Menorah.
(In the possession of Maurice Herrmann, New York.)

The gebia' is described as resembling an Alexandrian cup; the kaftor resembled the half of an apple; the peraḥ resembled a blossom carved on pillars. Altogether there were 22 gebi'im, 11 kaftorim, and 9 peraḥim (*ib.*; see accompanying illustration). Maimonides further explains that the gebia' was broad at the top and narrow at the bottom (probably in the style of a flower-vase); the kaftor was somewhat egg-shaped with pointed tops; the peraḥ looked like a dish with the brim doubled outward ("Yad," Bet ha-Beḥirah, iii. 1-11). The spread of the branches was 9 ṭefaḥim (36 inches), and there was the same measure for the tripod ("Shilṭe ha-Gibborim," ch. xxxi.).

The branches of the lamps had the apertures in which the wicks were placed turned toward the center lamp, which was known as "Ner ha-Ma'arabi" (= "the Western Lamp") because it was next to the branches on the east side (Rashi on Shab. 22b). **Position.** For, according to the Talmud, the menorah was so placed that its two branches pointed toward the east and west respectively. A similar rule applied to all vessels in theTemple (Men. xi. 7), except the Ark. Maimonides, however, holds the opinion, also expressed in the Talmud, that the menorah, like the Ark, was placed at right angles to the length of the Temple, *i.e.*, pointing north and south and facing east and west. But this theory appears to be untenable. It was opposed by Abraham ibn Daud (RaBaD) and was strongly attacked in "Shilṭe ha-Gibborim" (xxxi. 26b).

The cleaning and refilling of the lamps, except the two most easterly, were performed by a priest every morning. If the priest found them extinguished, he relighted them. The two eastern lamps were left burning till after the morning service, and were then cleaned and refilled (Tamid iii. 9; Yoma 33a). The Ner ha-Ma'arabi, also called "Ner Elohim" (I Sam. iii. 3), was left burning all day and was refilled in the evening. It served to light all the lamps. The Ner ha-Ma'arabi contained no more oil than the other lamps, a half-log measure (1 log contains the liquid of six eggs), sufficient to last during the longest winter night (Men. 89a); yet by a miracle that lamp regularly burned till the following evening (*ib.* 86b). This miracle, however, ceased after the death of Simeon the Righteous, who was high priest forty years before the destruction of the Temple (Yoma 39b).

There was a ladder of three steps 9 ṭefaḥim high and 9 ṭefaḥim wide in front of the menorah. On the second step were placed the tongs, shovels, dishes, and oil. This ladder or stool was made by Bezaleel out of shittim-wood; but in Solomon's Temple it was made of marble. The priest ascended the steps to fix and light the lamps (Men. and Tamid *l.c.*).

The menorah depicted on Titus' arch is probably a representation of one of Solomon's menorot, but not of the Mosaic menorah, which was concealed by the priests prior to the destruction of the First Temple and of which all trace has since disappeared.

Symbolic Significance.

Symbolically the menorah represented the creation of the universe in seven days, the center light symbolizing the Sabbath. The seven branches are the seven continents of the earth and the seven heavens, guided by the light of God. The Zohar says: "These lamps, like the planets above, receive their light from the sun" ("Beha'aloteka," beginning).

The design of the menorah is used for a Mizraḥ picture. The seven words of Ps. cxiii. 3 respectively designate the seven branches. Some derive the design of the branches from a seven-verse chapter in the Psalms, or from the seven-verse prayer of R. Neḥunya ben ha-Kanah beginning with "Anna, bekoaḥ gedulot." A tablet with such a design is sometimes placed in front of the prayer-desk, while others use the figure of the menorah as a decoration for the Ark. Others again, in writing amulets, arrange a formula of seven letters and seven verses in the form of a menorah; and it was employed also on tombs. See Amulet (illustration); Art in the Synagogue; Candlestick; Mizraḥ.

MENORAH. See Periodicals.

MENSTRUATION: The first appearance of the menses is known to depend on various factors—climate, occupation, residence in towns, etc.—of which racial affinities are the most important. Climate is of unquestionable influence, the earliest age varying from eleven in hot to fifteen years in cold climates. Oppenheim, from an investigation of the time of the first menstruation in Bulgarian, Turkish, Armenian, and Jewish girls, concluded that race is the most important factor; and Lebrun states that among 100 girls of Jewish and Slavonian extraction, the majority of the Jewish girls menstruated at thirteen, while only one Slavonian girl menstruated at that age. Weissenberg presents statistics for Jewesses in South Russia from which it is seen that the first onset of menstruation was on the average at the age of fourteen; the earliest appearance was in one girl at the age of ten; and in one it was as late as eighteen (Weissenberg, "Die Südrussischen Juden," p. 77).

F. Weber investigated the subject in St. Petersburg and found the following percentages, "early appearance" representing cases of fifteen years of age, and "late appearance" those of seventeen years:

	Russians.	Jewesses.	Germans.	Poles.	Finns.
Early appearance...	48.5	54.5	47.1	52.7	19.0
Late appearance....	6.36	3.7	2.9	2.9	19.25

Considering as "premature" those who had their first menstruation at the age of twelve, and as "delayed" those at eighteen years, Weber found the following percentages:

	Russians.	Jewesses.	Germans.	Poles.	Finns.
Premature..........	10.6	12.5	8.2	11.7	2.75
Delayed.............	2.86	1.2	3.8	2.9	0.0

It appears from this that the first appearance of menstruation is much earlier in the Jewish and in the Slavonian girls than in the others.

Joachim's statistics for Hungary show that the first menstruation takes place there as follows:

Magyar peasant girls.....................	15 to 16 years.
Jewish girls............................	14 " 15 "
Slovak girls............................	16 " 17 "

Stober ("Topographie et Histoire Médicale de Strassbourg," p. 266, Paris, 1864) found that in Strasburg the first onset of menstruation was at about the same age in Jewish girls as in the non-Jewesses. In no case did he observe it to occur before the twelfth year, and most had begun to menstruate between fourteen and seventeen. But he based his opinion on only a few observations. Raciborski ("Traité de la Menstruation," p. 630, Paris, 1868) found that the first menstruation appeared in Jewesses at the average age of 14 years, 3 months, 25 days, as against 15 years, 3 months, 9 days in Slavonian girls.

From the investigations of M. Fishberg in New York it appears that the first menstruation appears in Jewish girls of that city at the average age of 12 years, 7 months. Of the 483 girls thus investigated 390 were immigrants mostly from eastern Europe, and 93 were natives, of foreign parentage. In the American-born girls the first menstruation appeared at the average age of 12 years, 1 month; and among the foreign-born girls the average age was 13 years, 2 months. The earlier onset of menstruation in the daughters of immigrants as compared with their mothers has been observed by Engelman in other immigrant peoples in the United States (see "Age of First Menstruation on the North American Continent" in "New York Medical Journal," lxxv. 221-228, 270-277). After a careful study of statistical evidence he concludes that as regards the time of functional development the American girls are very much more precocious than those of other continents in the same region of the temperate zone, and more precocious than the peoples from whom they have sprung. It appears that the Jewish girls in the United States show similar characteristics when compared with their sisters in Europe. The cause of this precocity is to be looked for in the social and educational conditions surrounding Jewesses in the United States.

For laws concerning menstruation see Niddah.

MENZ, ABRAHAM JOSEPH BEN SIMON WOLF: Rabbi at Frankfort-on-the-Main at the beginning of the eighteenth century. He wrote an elementary text-book on mathematics entitled "Reshit Limmudim," in three parts: (1) "Kelale Handasah," the general rules of algebra; (2) "Yesodot ha-Gematriot," the elements of geometry; (3) "Yesod ha-Tekunah," on astronomy; the first part only has been published (Berlin, 1775). It contains the first book of Euclid, rearranged, with many original examples by the author.

MEPHIBOSHETH: Only son of Jonathan, son of Saul, first king of Israel. The chronicler gives him the name of Merib-baal (I Chron. viii. 34), meaning, perhaps, "Ba'al contends." The relation of the two names is similar to that existing between Ish-bosheth = "man of shame," and Esh-baal = "man of Baal" (*ib.* verse 33). Upon the slaughter of Saul and his sons on Mt. Gilboa, the nurse in Jonathan's house fled with Mephibosheth, and in the flight the child fell and became a permanent cripple (II Sam. iv. 4). When David came to the throne his former love for Jonathan impelled him to inquire whether any of Saul's house remained alive, that he might show them kindness for the sake of his former bosom friend. Through Ziba, who had been a servant of Saul, he learned of the cripple Mephibosheth. David had him brought to Jerusalem, restored to him the estate of Saul, and made him a perpetual guest at the royal table (*ib.* ix. 1-8).

When David fled from Absalom this royal heir remained in Jerusalem—according to Ziba's story (*ib.* xvi. 3), that he might be ready to take the throne which was about to be restored to his father's house. On David's triumphal return to Jerusalem Mephibosheth went out to meet and greet him. He was unwashed and unkempt. When David questioned him concerning his reason for having remained behind, Mephibosheth threw the blame on Ziba, and as evidence of his own sincerity pointed out his unkempt state (*ib.* xix. 24-30). The king was evidently perplexed at the conflicting stories; and he decided that the estate of Saul should be divided equally between the questionable characters with whom he had to deal. Mephibosheth had a son, Micah (I Chron. viii. 34, 35).

MEQUINEZ: Town in the interior of Morocco, about 35 miles west-southwest of Fez. It contains about 6,000 Jews in a total population of 50,000. But very little is known concerning the Jews there. The town was founded about 940 C.E. As was the case in other parts of Mauritania, it is probable that there were a few Jews in Mequinez before 1492, and that these were joined by many others at the time of the expulsion from Spain. It has been pointed out that of thirty family names in Mequinez at least eighteen, such as "Gozlan," "Toledano," "Pariente," "Sasportas," and "Verdugo," are Castilian in origin. Moreover, various customs, the mode of feminine dress, and the methods of preparing food, all seem to show the influence of the Spanish Middle Ages. Details of the history of the Mequinez Jews are accessible only for the years since the Alliance Israélite began to publish its bulletins. In 1878 the town suffered from a famine which ravaged all Morocco, and the Alliance Israélite, the Anglo-Jewish Association, and the Board of Deputies of London sent abundant relief to the suffering Jews. The following year the affliction was renewed through a drought and an epidemic, on which occasion Mequinez received relief from the Morocco Famine Relief Fund of London. According to the Bulletin of the Alliance for 1880, between 1864 and 1880 forty-two Jews in Mequinez were assassinated by Mohammedans. The appeal of the Alliance Israélite director of schools to the consular and diplomatic representatives of Morocco and the presence of one of these directors at Mequinez have helped to make the lives of the Jews there somewhat more secure.

Mequinez has nineteen synagogues, the oldest of which dates back 150 years. Each of these is named after its founder or else after the family which supports it (*e.g.*, the Synagogue of Mordecai Loubaton). The Alliance Israélite founded two schools (attendance 61 boys and 36 girls respectively) at Mequinez in 1901. There are also ten small Talmud Torahs, having about 800 pupils and known by the names of the teachers in charge of them. The custom of placing epitaphs upon graves is not general in Mequinez, except in the case of those who die without leaving male issue. In Mequinez, as in almost all the Jewish communities of Morocco, it is not customary to invest any one with the title of chief rabbi. Religious matters are placed in the hands of a triumvirate of dayyanim, the president of the present (1904) triumvirate being R. Salomon Verdugo. These three rabbis are assisted in the discharge of their duties by a "ma'amad," or council of notables; in case of necessity these constitute also a court of justice.

The revenues of the Jewish communal administration are raised by means of a tax of one "dours" (about 60 cents) per head for large cattle and one "peseta" (about 46¾ cents) per head for small cattle, and by contributions made by the wealthy families on the approach of the important holy days. These sources of revenue enable the communal administration to contribute to the schools of the Alliance Israélite, support the rabbis and the poor of the city, provide for funerals, pay the poll-tax, make gifts to the royal court and to the local authorities on the occasion of great Arabian fêtes, and purchase the privilege of using the public roads.

There are two societies in this populous community—the ḥebra ḳaddisha, which has charge of funerals, and the foundation of which dates back to ancient times, and the "ḥilluḳ," or the society charged with the weekly distribution of money and produce to the needy. The occupations of the Jewish population embrace all classes of mechanical labor and commerce. Some Jews are even employed as kitchen gardeners in the outskirts of the town. The Jews of Mequinez occupy the Mellah, a walled ghetto containing 250 houses, all belonging to Jews. The streets are wide, but are not paved.

From the standpoint of literature, Mequinez is the most fruitful community of Morocco. It has had at least thirteen rabbinical writers of note, of whom the following belonged to the family of Verdugo, the dates of death in each case being given in parentheses: Mordecai (1773); Moses (1783); Judah (1803); Mimun (1812); Raphael (1820); Pethahiah (1842); Jacob (1843); Joseph (1852). Of the Toledano family there may be mentioned Ḥayyim (1782); Jacob (1802); Moses Ḥabib (middle of the 19th cent.). David Hessin lived there toward the end of the eighteenth century.

The 'Isawites, members of a fanatical Arab sect, make annual pilgrimages to Mequinez to visit the tomb of Abu 'Isa, the founder of the sect. On the day of their arrival the gates of the Mellah are shut, and the government of the town places a guard there to prevent the pilgrims from pillaging and massacring its inhabitants. See MOROCCO.

MERAB (מרב): The elder of Saul's two daughters (I Sam. xiv. 49; xviii. 17, 19). Saul formally offered Merab's hand to David with the condition that the latter should distinguish himself in the war with the Philistines. David did so, but Saul broke his promise by giving Merab to Adriel the Meholathite (*ib.* xviii. 19).

MERCY. See Compassion.

MERECH: Russian town in the government of Wilna. The earliest mention of Jews there is dated 1539, when a dispute was adjudicated (July 8) between a Jew named Konyuk and a Christian in regard to a debt of the former. In 1551 the Jews of Merech were named among those of fourteen other towns to be exempted from the special tax ("Serebshchizna") levied upon all inhabitants, with the exception of villagers and Jews, at the Polish diet held in that year (Nov. 27) at Wilna. Merech produced in the nineteenth century some noted Hebrew scholars, as Mordecai Melzer, Isaac b. Elijah Margolis (d. New York 1887), and his son Max Margolis, of the University of California.

MERIBAH (מריבה = "strife"): **1.** A place in Rephidim in the wilderness; called also "Massah and Meribah, because of the chiding of the children of Israel, and because they tempted the Lord" (Ex. xvii. 7). It is certainly this Meribah which is alluded to in Ps. xcv. 8. **2.** A place at Kadesh in the wilderness, the name occurring either as "Me Meribah" (= "the water of Meribah"; Num. xx. 13, 24) or as "Me Meribath-Kadesh" (= "the water of Meribah in Kadesh"; Num. xxvii. 14; Deut. xxxii. 51). The latter name appears as the southern limit of the land of Canaan in Ezek. xlvii. 19, xlviii. 28 (= "the waters of strife in Kadesh"). It must be said, however, that the Septuagint invariably translates the word "Meribah" by *λοιδόρησις*; and that the Targumim and the later commentators regard it as a common noun.

It may be seen that the two narratives which give the origin of the name differ only in that in Ex. xvii. 7 Moses is ordered by God to strike the rock, while in Num. xxvii. 14 he is ordered to speak to the rock, and for disobeying God's order is punished by not being allowed to enter into the promised land. Otherwise they are similar. It is for this reason that some critics regard the one narrative as a duplicate of the other.

S. M. Sel.

MERIDIAN, DATE-: Imaginary line fixed upon as the one along which the reckoning of the calendar day changes. East of this line the day is dated one day earlier than the west of it. The date-meridian involves many Jewish questions, such as fixing the Sabbath and the holy days in the Jewish calendar, counting the days of mourning, and dating documents. While in civil matters the Jews probably would be guided by the international date-line 180° from Greenwich, as agreed to by the geographers of many civilized nations, in religious matters the Jewish law can not recognize an imaginary date-line of recent origin which has not even been adopted by the majority of nations.

In the "Cuzari."

The question does not appear in the Talmud nor in the early rabbinical literature. It is first mentioned in the twelfth century in the "Cuzari" of Judah ha-Levi (ii. 20). Jerusalem is generally accepted as the navel, or center, of the world, as adduced from Ps. l. 2 (Tosef., Yoma, iii.; Yoma 56[4]b). According to the "Cuzari," the Jewish date-line is 6 hours, or 90 degrees, east of Jerusalem, and 18 hours, or 270 degrees, west of Jerusalem. Judah ha-Levi's theory is based on the hypothesis that the date was fixed at midday when the sun was at its zenith, shedding light 90 degrees eastward and leaving 270 degrees westward to finish the day.

Jerusalem is in longitude 35° 13′ 25″ east of Greenwich, and according to this Judah ha-Levi's date-line would be in longitude 125° 13′ 25″ E., making China the Far East and separating it from Japan, which would be the Far West. Corea would be divided with Seoul (126° 35′ E.) to the west. Under the American date would come Kamchatka, eastern Siberia, and the whole of Australia. On the other hand, the Philippines, with Manila (120° 58′ 3″ E.), would come under the Asiatic date.

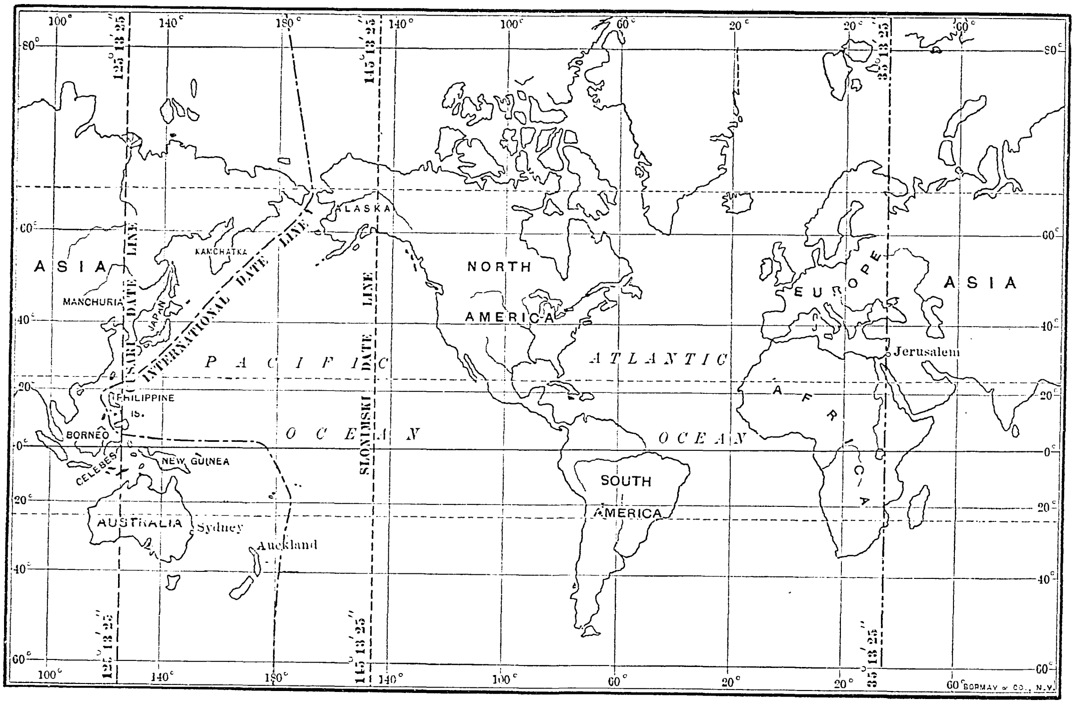
Phinehas Elijah, the author of "Sefer ha-Berit" (article iv., ed. Brünn, 1797), raised the question also regarding the latitudes near the north and south poles, where night and day may each cover six months. The author decided in that case to discard the sunlight as a distinction between night and day, and to figure 24 hours as a full day. As to the longitude he was aware that the Jews on the two hemispheres did not observe exactly the same day as Sabbath. He did not, however, attempt to locate the date-line.

Ḥayyim Selig Slonimski (d. May 15, 1904) published in "Ha-Ẓefirah," in 1874, an article addressed to the rabbinate and entitled "What Sabbath Shall the Jewish Traveler in the Far East Observe?" Several prominent rabbis took part in the discussion. R. Moses b. Ẓebi Lapidus of Raseyn, Russia, and R. Isaiah Meïr Kahana Schapiro of Czortkov, Galicia, accepted the meridian of Judah ha-Levi; Schapiro, however, marks it as passing through the Jordan instead of Jerusalem and thus moves the meridian about 20 miles eastward.

R. Benjamin Zeeb Wolf Weller of Yaroslav, Galicia, does not admit Judah ha-Levi's authority to establish a meridian and objects to any fixed date-line. In his opinion the method of dating must depend upon the order in which the countries were discovered. Hence far eastern Siberia, Japan, and Australia should retain the Asiatic or eastern date, while the Philippine Islands that were discovered from the American side should retain the American, or western, date.

R. Weller thinks that one crossing from land discovered from the Asiatic side to land discovered from the American side, or vice versa, must observe both his own Sabbath and that of his neighbors to make sure of the right date. The "natural" meridian, as R. Weller calls it, was criticized as impracticable, since discoveries of islands in the Pacific might be made from opposite coasts in such a way as to carry the Asiatic date farther west and the American date farther east. Slonimski, after reviewing the opinions of the rabbis, accepts Judah ha-Levi's view as to the location of the meridian at Jerusalem, which he advocates both from the Jewish-national and from the geographical standpoint. But he divides the distance equally, allowing 180 degrees on each side. According to his view, the date-line would be in longitude 145° 13′ 25″ west of Greenwich. Slonimski argues that by allowing an equal portion on either side of the meridian, the extreme difference from the meridian is but 12 hours, whereas Judah ha-Levi's division makes a difference of 18 hours. Besides, the equal division places the date-line in the most natural and convenient place in the Pacific, and gives the whole American continent, except a small part of Alaska near the Bering Strait, the same dating. This date-line, of course, excludes the Philippines, and even the Hawaiian Islands, from the American date, and the Jewish settlers on these islands ought to observe the American Sunday as the seventh day, or Sabbath.

Slonimski's Meridian-Line.



World on Mercator's Projection Showing Date-Meridians.

R. Samuel Mohilever of Byelostok coincides with Slonimski, holding, however, that any new Jewish settlement must accept the date adopted by the authorities of that place. But in case of dispute by the authorities regarding the correct date the Jewish settler must follow the Jewish date-line 180 degrees from Jerusalem. No change by the authorities thereafter can affect the date. Thus in the case of the Philippines, where the change of date occurred in the beginning of the year 1845, if the Jews living there prior to 1845 adopted the old date, they must follow it and keep Sunday as the Sabbath-day. This would apply also to Alaska, where the date was changed in 1867, when the United States purchased it from Russia. As to the Jewish traveler, Mohilever decided that privately he must observe his own Sabbath and in public he ought to observe also the Sabbath of the place he visits. But if the traveler intends to settle permanently in that place, he must adopt its date.

Halakic Points.

MERKABAH (lit. "chariot"): The Heavenly Throne; hence "Ma'aseh Merkabah," the lore concerning the heavenly Throne-Chariot, with especial reference to Ezek. i. and x. The conception of Yhwh riding upon cherubim, or fiery cloud-birds, upon the heavens or the clouds, is certainly genuinely Hebrew (see Ps. xviii. 11 [A. V. 10]; Deut. xxxiii. 26; Ps. lxviii. 5 [A. V. 4]; Isa. xix. 1); hence His "war-chariot" (Hab. iii. 8 and Isa. lxvi. 15, Hebr.) and the name "chariot" for the ark with the cherubim (I Chron. xxviii. 18). Just as the Assyrian sun-chariot with its horses is employed in the legend of the ride of Elijah to heaven (II Kings ii. 11; comp. Enoch lxx. 2, lxxii. 5, lxxiii. 2), so did the prophet Ezekiel in his vision, probably suggested by Babylonian sculpture, see Yhwh riding on the Throne-

Chariot when leaving the doomed Temple at Jerusalem (see Müller, "Ezechielstudien," 1895, pp. 8–11; Bertholet, "Das Buch Hezekiel," 1897, p. 12). To a later age Ezekiel's picture became a sacred mystery known by the term "Merkabah" as early as the time of Ben Sira (Ecclus. xlix. 8). The ancient Mishnah lays down the rule: "The Ma'aseh Merkabah should not be taught to any one except he be wise and able to deduce knowledge through wisdom ('gnosis') of his own" (Ḥag. ii. 1). Job beheld the throne of God, and his daughters sang the doxology of the Ma'aseh Merkabah (according to the Testament of Job, ed. Kohler, vii. 39, xi. 25; see Kohut Memorial Volume, pp. 282, 288). Quite characteristic is the story given in Tosef., Ḥag. ii. 1; Ḥag. 14b; Yer. Ḥag. ii. 77a:

> "R. Eleazar ben 'Arak was riding on a mule behind R. Johanan b. Zakkai, when he asked for the privilege of being initiated into the secrets of the Merkabah. The great master demanded proof of his initiation into the gnosis, and when Eleazar began to tell what he had learned thereof, R. Johanan immediately descended from the mule and sat upon the rock. 'Why, O master, dost thou descend from the mule?' asked the disciple. 'Can I remain mounted upon the mule when the telling of the secrets of the Merkabah causes the Shekinah to dwell with us and the angels to accompany us?' was the answer. Eleazar continued, and, behold, fire descended from heaven and lit up the trees of the field, causing them to sing anthems, and an angel cried out, 'Truly these are the secrets of the Merkabah.' Whereupon R. Johanan kissed Eleazar upon the forehead, saying, 'Blessed be thou, O father Abraham, that hast a descendant like Eleazar b. 'Arak!' Subsequently two other disciples of R. Johanan b. Zakkai walking together said to each other: 'Let us also talk together about the Ma'aseh Merkabah'; and no sooner did R. Joshua begin speaking than a rainbow-like appearance [Ezek. i. 28] was seen upon the thick clouds which covered the sky, and angels came to listen as men do to hear wedding-music. On hearing the things related by R. Jose, R. Johanan b. Zakkai blessed his disciples and said: 'Blessed the eyes that beheld these things! Indeed I saw myself in a dream together with you, seated like the select ones [comp. Ex. xxiv. 11] upon Mount Sinai; and I heard a heavenly voice saying: "Enter the banquet-hall and take your seats with your disciples and disciples' disciples, among the elect, the highest ('third') class"'" (πνευματικοί; see Joël, "Blicke in die Religionsgeschichte," 1880, pp. 133–135).

Symbolic Significance.

Obviously this is a description of an ecstatic state in which the pictures that the mind forms are beheld as realities (comp. Tosef., Meg. iv. 28 and Meg. 24—"Blind ones saw them"). The study of the Merkabah was theosophy; to the initiated the Ḥayyot and the Ofannim around the Heavenly Throne became beings that lived and moved before their eyes (see Joël, *l.c.* p. 152). It was in fact considered perilous to penetrate into these mysteries. "A youth who studied the 'Ḥashmal' [Ezek. i. 27, Hebr.] was consumed by the fire which sprang forth from it" (Ḥag. 13a; comp. Shab. 80a). Only the older men dared to be initiated into those mysteries. "I am not old enough," said R. Eleazar when R. Johanan b. Nappaḥa wished to instruct him in them. They were to be imparted in suggestions ("initial sentences," "rashe peraḳim") rather than in complete chapters (Ḥag. 13a). "The bird that flew over the head of Jonathan b. Uzziel as he studied them was consumed by the fire surrounding him" (Suk. 28a; comp. Meg. 3a). "Ben 'Azzai was seated meditating on the Torah, when, behold, a flame encircled him; the people told R. Aḳiba, and he went to Ben 'Azzai, saying, 'Art thou studying the mysteries of the Merkabah?'" (Cant. R. i. 10; Lev. R. xvi.). "In the future Ezekiel will come again and unlock for Israel the chambers of the Merkabah" (Cant. R. i. 4).

Glimpses of the mysteries of the Merkabah may be discerned in such rabbinical sayings as the following: "The angel Sandalfon towers above the rest of the angels the length of a five hundred years' journey; his feet touch the earth while his head reaches the holy Ḥayyot. He stands behind the Throne-Chariot binding wreaths for his Master" (Ḥag. 13b). To R. Ishmael b. Elisha is ascribed the saying that when offering the incense in the Temple as high priest he beheld the angel Akatriel ("the wreath-binding one"; Sandalfon?) seated on the Throne and asked him for a blessing (Ber. 7a; comp. Bacher, "Ag. Tan." i. 267). One of these great archangels is said to equal in size a third part of the world (Ex. R. iii.). Concerning the lion, the ox, the eagle, and the man as the four faces of the Ḥayyot, see Ḥag. 13b; on account of these four, which carry God's Throne-Chariot, the latter is called also "Tetramoulon" = "Quadriga" (Ex. R. iii. 3; comp. Jellinek, "B. H." iii. 92–95).

In the Enoch Literature.

The Merkabah mysteries, which remained the exclusive property of the initiated ones, the "Ẓenu'im" or "Ḥashsha'im" (see Essenes), have been preserved chiefly in the Enoch literature of the pre-Christian centuries, and in the "Hekalot" of the geonic time, known also as the "Merkabah" and "Enoch Books" (see Jellinek, "B. H." ii. 40–47, 114–117, and Introduction xiv.–xvii., xxx., xxxii.; iii. 83–108, 161–163, and Introduction xx.–xxv.; v. 170–190 and Introduction xli.–xliii.; Wertheimer, "Batte Midrashot," ii. 15–28; see Hekalot). Part of it has been embodied in the "payyeṭan-ḳedushshah" literature and has found its way also into other ancient apocrypha, such as the Testament of Abraham, the Ascensio Isaiæ, etc. Besides the descriptions of the seven heavens with their hosts of angels, and the various storehouses of the world, and of the divine throne above the highest heaven, the most remarkable feature is that the mysteries rest on the belief in the reality of the things seen in an ecstatic state brought about by ablutions, fasts, fervent invocations, incantations, and by other means. This is called "the Vision of the Merkabah" ("Ẓefiyat ha-Merkabah"), and those under this strange hallucination, who imagine themselves entering the Heavenly Chariot and floating through the air, are called "Yorede Merkabah" (= "those that go down into the ship-like chariot"; Jellinek, "B. H." iii. 90, 94 *et seq.*). In this chariot they are supposed to ascend to the heavens, where in the dazzling light surrounding them they behold the innermost secrets of all persons and things, otherwise impenetrable and invisible.

Particularly significant is the warrior-nature of the angels surrounding the Throne-Chariot; flames dart forth from their eyes; they ride upon fiery horses (comp. Zech. vi. 1–8) and are armed with weapons of fire (Jellinek, *l.c.*). In order to be allowed to pass these terrible beings the Merkabah-rider must provide himself with amulets or seals containing mysterious names ("Hekalot," *l.c.*

xvii.-xxii., xxx.), and in order to be able to step before the Throne he must recite certain prayers until God Himself addresses him, if he be worthy. The "Hekalot" mention especially either R. Akiba or R. Ishmael, and their associates of the Bar Kokba time, as types of the "Yorede Merkabah."

The central figure and chief actor in the theophany, however, is the "Prince of the Face," Meṭaṭron, the one next to the Throne, whose name, or whose seventy names, are like God's, and who is none else than Enoch translated to heaven and transformed into the highest angel. He is the one who imparted to man all the knowledge of heaven and of the past and the future (see especially Jellinek, *l.c.* v. 170-176), exactly as Enoch did in the Ethiopic and Slavonic Books of Enoch.

Origin of the Conception.

Concerning the origin of the Merkabah-ride, Jellinek ("B. H." iii. p. xxii.) expressed the opinion that Persian Sufism gave rise to its peculiar notions, and Bloch ("Monatsschrift," 1893, pp. 18-25, 69-74, 257-266, 305-311) endeavored to trace them all back to Arabic mysticism. But recent researches concerning the Mithra worship and the Mithra liturgy have cast altogether new light on the whole Merkabah lore. Mithra, the heavenly charioteer, with his Quadriga, a chariot drawn by four horses, who was worshiped in ancient Persia as the god of light and regarded in early Roman times as the prime mover of the world, formed of the four elements (Dio Chrysostomus, "Oratio," xxxvi.; see Cumont, "Die Mysterien des Mithra," 1903, pp. 87-88; Windischmann, "Zoroastrische Studien," 1863, pp. 309-312), was invoked under mysterious rites as the mediator between the inaccessible and unknowable Deity, in the ethereal regions of light, and man on earth (Cumont, *l.c.* pp. 95, 122). These rites bear such a striking resemblance to those by means of which the Merkabah-riders approached the Deity that there can scarcely be any doubt as to the Mithraic origin of the latter (see Dieterich, "Eine Mithrasliturgie," 1903, pp. 7-15). The only difference between them is that while the Mithra-worshipers, at least those of Roman times, had the coming forth of Mithra as the highest god their aim, the Merkabah-riders have the seeing of the Lord on high as their goal, Meṭaṭron-Mithra, the archangel, being the divine charioteer who ushers them into the presence of God. Otherwise there is the same hallucination at work which makes the ecstatic imagine that he is lifted up from the earth to heaven to see the sun, stars, and winds come forth from their places; to behold the sun (or sun-god) and the entire celestial household, the seven rulers of the celestial poles, or the archangels; and finally to gaze at the luminous youthful Mithra in all his beauty—the youthful Meṭaṭron of the Jewish mystics (see Cumont, *l.c.* pp. 117, 151, *et al.*).

Such spiritualistic experiences through mystic rites had their origin in Egypt rather than in Persia. Jamblichus ("De Mysteriis," iii. 4, 5) describes the optic and acoustic illusions under which the Egyptian mystic labored as if they were realities, and at the same time he states that in the ecstatic state brought about by magic songs and proper environment the soul is encompassed by a chariot of light and ether (*αἰθεριωδές χαὶ αὐγοειδὲς ὄχημα*), on which it beholds the heavenly things in the light reflected from above (iii. 14; see Von Harless, "Das Buch von der Aegyptischen Mysterien," pp. 53-54, 65-66). Neoplatonic ideas, accordingly, aided in rendering the Mithra worship the center of the mystic belief in which the world of antiquity sought relief during the period when the gods of classical antiquity were losing their authority and divinity; and Jewish wisdom, following the tendency of the age, embodied it, under the name of Enoch Meṭaṭron, as secret lore in its system (see Meṭaṭron).

Philo took the idea of the Merkabah with its charioteer Meṭaṭron and applied it to his Logos ("De Somniis," i. 25; "Quis Rerum Divinarum Heres Sit," §§ 42, 48; "De Profugis," § 19; "De Confusione Linguarum," § 28; "De Monarchia," i. 1; comp. Plato, "Phædrus," ii. 46). Maimonides ("Moreh Nebukim," iii. 1-7), in his antagonism to mysticism, went so far as to dissolve the whole Merkabah theophany of Ezekiel into mere physics, notwithstanding the rabbinical warning against disclosing these mysteries (see Pes. 119a). All the stronger, therefore, grew the zeal of the mystics, as is evidenced in the renewed form of the Cabala, which lent to the Merkabah lore and all the ecstatic visions and mystic operations connected therewith new life and vigor; of this the Book of Raziel and the later Cabala are ample proof. See Ma'aseh Bereshit.

K.

MERNEPTAḤ (Greek, Μενεφθὲς): Egyptian king, the fourth of the 19th dynasty; a prominent figure in the discussions concerning the historicalness and chronology of Israel's exodus from Egypt. He was the son and successor of the famous Rameses II. (Sesostris), who is known to have built the cities enumerated in Ex. i. 11. Consequently, no conclusion seemed more certain than this: Rameses II. was the Pharaoh of the oppression; Merneptaḥ, that of the Exodus, which thus would date from the middle or end of the thirteenth century B.C. The discovery of the famous Israel inscription by Petrie ("Six Temples," plates 13-14) has now made this conclusion very doubtful. Line 27 in this inscription, a song of triumph over all foreign enemies of Egypt (Libyans, Hittites, Canaan, Ashkelon, Gezer, Yenu'ama), closes with the words: "Israel ["Y-s-ir(a)-'a-ra"] is annihilated [pulled out], without any [further] growth; Palestine has become like a widow [*i.e.*, helpless] for Egypt." These words, dating from the fifth year of Merneptaḥ, seem to point most naturally to Israel as settled in Palestine; though they have been construed as an allusion to the twelve tribes still wandering in the desert or still being held under bondage in Goshen.

Merneptaḥ reigned for at least twenty-five years, the first five of which were filled with desperate attacks on Egypt by Libyan tribes and by pirates from Europe and Asia Minor. Palestine and central Syria remained tributary, however. The buildings of the king (at Karnak, etc.) are not considerable. His mummy has recently been found at Thebes, and is now in the Museum at Cairo.

E. G. H. W. M. M.

MERODACH-BALADAN: King of Babylon (712 B.C.), who sent letters and a present to Hezekiah, King of Judah, when the latter had recovered from his sickness. Hezekiah, delighted with the courtesy, shows the messengers all his treasures, withholding nothing from them. Whereupon the prophet Isaiah, hearing of the visit, comes to Hezekiah and reproves him for the display he has made of his riches. He foretells the destruction of Hezekiah's kingdom, and the Babylonian captivity (Isa. xxxix.). In the parallel account in II Kings xx. 12-19 the name of this king is given as Berodach-baladan.

According to the Talmud, Baladan's face was changed to that of a dog, he being thereby compelled to abdicate the throne in favor of his son Merodach. Out of reverence, Merodach in all his edicts and ordinances added his name to that of his father in order to indicate that he really was only the representative of the latter (Sanh. 96b).

S. S. L. G.—A. PE.

MEROM: "The waters of Merom" is given in Josh. xi. 5 as the name of the place at which the hosts of the peoples of northern Palestine assembled to meet the invader Joshua and his army. Merom is now commonly identified with the modern Lake al-Ḥulah, about fifteen miles north of the Sea of Galilee, and it is described as being of the shape of a pear with the stem pointing southward. It is three miles wide in its broadest part, and nearly four miles long, from the swamps to the outlet into the River Jordan. The lake is seven feet above the level of the Mediterranean, and varies from ten to sixteen feet in depth. Not far from its southwestern shores there is a considerable plain which seems to be the most probable location of the great battle between Joshua and the North-Canaanitish allies. The commander-in-chief of these forces, gathered from all parts of northern Palestine and even from the Jordan valley, was Jabin, King of Hazor. The great multitude of warriors is compared in numbers with "the sand that is upon the seashore . . . with horses and chariots very many."

The only hint as to Joshua's method of attack is the statement that he came against the enemy suddenly, and fell upon them. This probably indicates a night march and early morning attack as at Gibeon (Josh. x. 9, 10). The Israelites smote them, put them to flight, and pursued them in every direction. Their horses were hamstrung, and their chariots were burned, while their cities and the whole country were laid waste. This last great battle so reduced opposition that Joshua was now ready to partition among the tribes of Israel for a permanent possession the land with its unconquered individual fortresses.

E. G. H. I. M. P.

MERON or **MIRON:** City of Galilee, situated on a mountain, three miles northwest of Safed and four miles south of Giscala, with which city it is almost always mentioned in the Talmud. One of the passages is: "One may eat olives [the product of the Sabbatical year] till the last ones disappear from the trees of Giscala and Meron" (Yer. Sheb. ix. 2). The ascent to Meron was so narrow that two persons could not walk abreast (R. H. 15a), and this description may well be applied to the Meroth fortified by Josephus ("Vita," § 37; "B. J." ii. 20, § 6). Meron is spoken of as a city inhabited by priests (Yer. Ta'an. iv. 5), a fact alluded to by Eleazar ha-Ḳalir in one of his piyyuṭim (comp. Rapoport in his preface to Shalom ha-Kohen's "Ḳore ha-Dorot," *s.v.* "Meron"). It is stated in the Midrash (Eccl. R. xi. 3) that a quarrel resulting in blows broke out between the people of Meron and those of Giscala on account of the remains of R. Eliezer b. Simeon, which each party desired to bury.

To-day Meron is represented by the village of Merun (called in Hebrew writings "Kefar Miron"), celebrated for its very ancient synagogue and for the tombs of some prominent tannaim. Benjamin of Tudela, who visited it, describes a cave there containing the tombs of HILLEL and Shammai and many of their disciples; and he states that R. Benjamin b. Japheth and R. Judah b. Beterah also were buried there. But Benjamin does not mention the tombs of R. Simeon b. Yoḥai and his son Eleazar. Samuel b. Samson, who was at Meron in 1230, speaks of the school and tomb of Simeon b. Yoḥai which he saw there, as well as of the tomb of Eleazar. At the foot of the mountain, Samuel states, are 336 other tombs, and outside of the village are the tombs of Simeon Ḥaṭufah and of the prophet Obadiah (Carmoly, "Itinéraires," pp. 133–134). There is now a magnificent bet ha-midrash enclosing the supposed tombs of Simeon b. Yoḥai and Eleazar, which have become the place of an annual festival, held on Lag be-'Omer, and called "Hillula de-R. Shim'on ben Yoḥai" in commemoration of the death of the supposed author of the Zohar.

Meron is not to be identified with Shimron-meron of Josh. xii. 20, as the latter is called by the Rabbis "Simonia" (Gen. R. lxxxi.; comp. LXX. *ad loc.*), and is the modern Simuniyyah, a village west of Nazareth (Robinson, "Researches," ii. 344). It may, however, be identical with Madon (Josh. xi. 1), which is rendered "Meron" in the Septuagint; and some scholars identify it with Meroz, mentioned in Judges v. 23.

J. M. SEL.

MERV: District town in Russian Central Asia, on the River Murgab. The town sprang up when the district was annexed to Russia in 1884. It has a total population of 8,727, including 486 Jews (1899). The old historic Merv is now utterly in ruins, and lies about eight miles east of the present town, adjoining the manufacturing settlement of Bairam Ali, in the imperial domain of the czar.

The Jews seem to have enjoyed greater religious liberty in old Merv than in many other cities. Dr. Wolff ("Mission to Bokhara," pp. 144, 148, New York, 1848), who was in Merv in 1831, and visited it again in 1844 when engaged on his well-known mission to Bokhara, speaks of the Jews there as being in great favor with the calif. They were permitted to maintain the Jewish faith and practises which they had been compelled to abandon at Meshed, where they were obliged to profess Mohammedanism.

O'Donovan, writing in 1882, before Merv was annexed to Russia, speaks of there being but seven Jewish families there. They were mostly engaged in trade, he states, and were treated with considerable tolerance; yet "they were not allowed to call themselves 'Moussai,' their religious name in these Eastern countries, but were compelled to style themselves 'Jedid,' which signifies a convert to the Mussulman faith" ("The Merv Oasis," ii. 129). A writer in the "Jewish Chronicle" (May 12, 1899) has a note regarding the Jews at Merv under the Russian rule. He states that they came from Meshed, which most of them left in 1840 to escape the alternatives of persecution or conformity to the Moslem faith. He adds, however, that "although they openly acknowledge their religion—for the Russian authorities put no impediments in their way in this respect—they live in dread, and meet for prayer in a cellar which is surrounded by a high wall. There is no Ark in the synagogue, and the scrolls of the Law are kept in a separate room, which can be entered only through a secret door. The Jedids have a dejected appearance and fear everybody. They earn a precarious living as artisans."

H. R. A. V. W. J.

MERWAN HA-LEVI: French philanthropist of the second half of the eleventh century; one of the most prominent Jews of Narbonne, who devoted his time and fortune to that community. It seems that he was also in favor with the government, being thus enabled to check unfavorable measures against the Jews. He was the head of a family which produced several famous Jewish scholars, among whom were his son, R. Isaac of Narbonne, and his grandson, Nasi Moses ben Joseph of Narbonne.

MERZBACHER, ABRAHAM: German banker; born 1812 at Baiersdorf near Erlangen; died June 4, 1885, at Munich. He at first intended to follow a rabbinical career; but after an unsuccessful application for the office of rabbi in Ansbach, he settled as a banker in Munich. He was an enthusiastic champion of the moderate conservative Jewish party, and a member of the central committee of the Alliance Israélite Universelle.

Merzbacher was noted chiefly as a patron of Jewish science. He published at his own expense the work "Dikduke Soferim," in 16 volumes, by Raphael Nathan Rabbinovicz (d. 1888). In the interest of this learned protégé and friend, Merzbacher collected one of the largest private Jewish libraries in the world, which now forms part of the city library of Frankfort-on-the-Main. S.

MESERITZ. See MIEDZYRZECZ.

MESHA: King of Moab, tributary to Ahab, King of Israel. He was a sheepmaster, and paid the King of Israel an annual tax consisting of the wool of 100,000 lambs and of 100,000 rams (II Kings iii. 4). He rebelled against Israel and refused to pay tribute; whereupon Jehoram, King of Israel, uniting his forces with those of Jehoshaphat, King of Judah, and of the King of Edom, marched round the southern end of the Dead Sea and invaded the Moabitish territory. That route was chosen, as is mentioned in the MOABITE STONE, because the cities north of the Arnon were fortified by Mesha.

The invading army suffering from want of water, the prophet Elisha, who was present, was consulted upon the suggestion of the King of Judah. He bade them dig trenches in the sandy soil, which were speedily filled with water. The Moabite army, seeing the rays of the sun reflected in the water, imagined that the enemies had quarreled and massacred one another; they made a reckless rush to spoil the camp, only to be repelled, routed, and put to flight with great loss, the few who escaped entering Kir-haraseth. The combined armies advanced into the land unopposed, "marred" the fields with stones, stopped up the cisterns and fountains, felled the forests, and beleaguered the fortress. With 700 warriors Mesha attempted to break through the enemy's lines. Utterly failing in this, and reduced to desperation, he went to the top of the wall, and, in full view of the invaders, offered his eldest son, who should have reigned in his stead, as a burnt offering to propitiate the wrath of his god Chemosh. In consequence of this "there came great wrath upon Israel"; and the Israelites, without pursuing their successes further, at once evacuated the country, leaving Mesha in undisturbed possession of it (*ib.* iii. 6-27). See MOABITE STONE.

E. G. H. C. L.

MESHA (Me'asha): Palestinian amora; lived in the third century at Lydda, in Judea. He seems to have lost his parents when a child, for he was brought up by his grandfather, the eminent haggadist Joshua b. Levi. At an early age he displayed fine intelligence. His grandfather was fond of hearing him recite on Fridays the Biblical portion for the week; and the Midrash relates of him that once in his childhood he became ill and remained in a trance for three days, and that when he recovered his father asked him where he had been all that time; to this Mesha replied that he had been in a confused world and that persons held in honor in this world were there disgraced (Ruth R. iii. 1). Only a few halakot and sayings of his have been preserved in the Talmud.

MESHULLAM BEN DAVID: German tosafist of the twelfth or of the first half of the thirteenth century. He was the son of the tosafist and liturgist David ben Kalonymus of Münzenburg, and he corresponded with R. Baruch ("Mordekai," Ket.

ii. 149), with Simḥah of Speyer (*ib.* Ḥul. vi. 657, x. 737), and with Isaac Or Zarua' (Ḥayyim Or Zarua', Responsa, Nos. 103, 121). Gross ("Gallia Judaica," p. 196) thinks that the Meshullam mentioned in "Mordekai," Ḥul. vi. 657, is Meshullam of Melun.

Bibliography: A. Epstein, in *Monatsschrift*, xli. 468; Kohn, *Mardochai ben Hillel*, p. 141.
E. C. M. Sel.

MESHULLAM BEN ISAAC SALEM BEN JOSEPH: Italian poet; lived successively at Mantua and Venice at the end of the sixteenth century and at the beginning of the seventeenth. Like his father, he was a corrector in the Hebrew printing-offices at the above-named cities, which he often supplied with laudatory poems of his own composition. In addition to these, which were inserted at the head of several books, Meshullam was the author of three liturgical poems, namely: (1) "Ḳinah," an elegy on the conflagration at Mantua in 1610; (2) a poem on the Exodus from Egypt; and (3) a seliḥah forming a fourfold alphabetical acrostic.

Bibliography: Steinschneider, *Cat. Bodl.* col. 1751; Zunz, *Literaturgesch.* p. 424.
G. I. Br.

MESHULLAM BEN ISRAEL: Talmudic scholar of the sixteenth and seventeenth centuries; author of "Mar'eh Meḳom ha-Dinim" (Cracow, 1647), an alphabetical index to the Shulḥan 'Aruk. Fürst ("Bibl. Jud." ii. 369) records that he was known also as "Phoebus," and says he died at Amsterdam in 1652 and was praised by David de Barrios.

Bibliography: Steinschneider, *Cat. Bodl.* col. 1750.
E. C. M. Sel.

MESHULLAM BEN JACOB OF LUNEL: French Talmudist; died at Lunel in 1170. He directed a Talmudic school which produced several famous men, and was an intimate friend of Abraham b. Isaac, ab bet din of Narbonne, who addressed to him several responsa, and spoke of him in high terms. His Talmudic decisions are quoted in "Sefer ha-Terumot."

Meshullam was interested also in philosophy. According to Ibn Tibbon, whom he encouraged to translate Baḥya's "Al-Hidayah ila Fara'id al-Ḳulub" into Hebrew ("Ḥobot ha-Lebabot"), he wrote several works dealing with moral philosophy, advised and assisted other Jewish writers, and possessed a large library. Judah ibn Tibbon is never weary of praising Meshullam's zeal in investigating the various branches of knowledge.

Bibliography: Gross, *Gallia Judaica*, p. 229.
S. S. A. Pe.

MESHULLAM BEN JOEL HA-KOHEN: Galician Talmudist; died at Lemberg Sept. 25, 1809. At first rabbi at Zurawno (Galicia), he was called to Koretz to succeed his brother Isaac; he then went to Bolechow, and finally to Lemberg. Meshullam's Talmudic attainments are evident not only in his works, but also from the fact that the most famous among his contemporaries requested his responsa. One of these is contained in "Sha'ar ha-Hakanah" (Lemberg, 1794), the work of his ancestor Naphtali ha-Kohen, another in Elijah Gaon's "Shenot Eliyahu."

Meshullam was the author of "Pitḥe Niddah" (Lemberg, 1802), comments on the laws of Niddah. The book contains also a specimen of the author's work on the Pentateuch, entitled "Liḳḳuṭe Yom." One of his responsa is also found in "Zikron Kehunnah," a work by his brother Isaac.

Bibliography: Buber, *Anshe Shem*, p. 171.
D. A. Pe.

MESHULLAM BEN JONAH: Physician and translator of the thirteenth century. It appears that he lived in southern France. He occupied himself with medicine merely as a study, and seems never to have practised. At the desire of a friend named Ḥafeẓ or Shalem, Meshullam translated into Hebrew the medical work "Kitab al-Taẓrif," by Zahrawi. The translator's preface begins with a Hebrew poem in honor of Ḥafiẓ.

Bibliography: Steinschneider, *Hebr. Uebers.* p. 745; Neubauer, *Cat. Bodl. Hebr. MSS.* No. 2120.
S. J. Z. L.

MESHULLAM BEN KALONYMUS BEN TODROS: French scholar of the twelfth and thirteenth centuries; nasi of Narbonne. Meshullam sided with Judah al-Fakhkhar in his attacks on the works of Maimonides and the philosophers. Nevertheless, he blamed Al-Fakhkhar for the excessive ardor with which the latter fought the Maimonists, saying that among the latter there were many great and pious Jews. In a letter which he wrote to Al-Fakhkhar, Meshullam particularly asked him to be indulgent toward David Ḳimḥi. Al-Fakhkhar yielded to his friend's request, assuring him that he would write nothing against Ḳimḥi.

Bibliography: Geiger, in *Oẓar Neḥmad*, ii. 172; *idem*, in *Jüd. Zeit.* x. 285; Gross, *Gallia Judaica*, p. 408.
S. S. M. Sel.

MESHULLAM BEN MACHIR (DON BONET CRESCAS DE LUNEL): French scholar; settled at Perpignan, where he died in 1306. Abba Mari, who was a relative of Meshullam, lamented the latter's death in a letter of condolence which he sent to the community of Perpignan ("Minḥat Ḳena'ot," MS. No 132). Abba Mari also bewailed Meshullam's death in one of his liturgical pieces. Gross thinks that Meshullam b. Machir is to be identified with Sen Bonet de Lunel, who wrote a commentary on Ibn Ezra's Bible commentary.

Bibliography: Gross, *Gallia Judaica*, pp. 289, 464; *idem*, in *R. E. J.* iv. 205; Renan-Neubauer, *Les Rabbins Français*, p. 694.
S. M. Sel.

MESHULLAM BEN NATHAN OF MELUN (called also **Meshullam of Narbonne**): French tosafist; born at Narbonne about 1120. He was a member of the rabbinical college of Narbonne and, with Abraham ben Isaac, ab bet din, and other rabbis, was one of the signatories of a responsum issued there about 1150 ("Teshubot ha-Rambam," p. 4, Leipsic, 1859; "Kol Bo," No. 20). Not long after 1150 Meshullam settled at Melun, where he acquired considerable authority and where he corresponded with some of the greatest rabbis of France, including those of Paris. He obtained the title of "Rab," which had an official character in northern France. Meshullam was rather indulgent in his decisions, which much displeased R. Tam. A polemical correspondence ensued between these two scholars, and Meshullam, in spite of his clever dialectics, was obliged to submit in fear of excommunication (comp. R. Tam, "Sefer ha-Yashar," pp. 72-76; Tos. to Pes. 105a; Beẓah 16a; 'Ab. Zarah 29b; "Mordekai," Shab. iv. 334 *et passim*). Gross (in "Monatsschrift," xvi. 290) and Kohn (*ib.* xxvi. 143) declared that Meshullam b. Nathan of Melun and Meshullam of Narbonne were two different persons, though Gross afterward surrendered this opinion and identified them. Gross conjectures also that this Meshullam may be identical with the Biblical commentator quoted in the commentary to Chronicles (II Chron. xiii. 2) wrongly attributed to Rashi (comp. Zunz, "Z. G." p. 71), and that it is he who is spoken of by Yom-Ṭob of Joigny ("Mordekai," Shab. i. 250).

G. M. SEL.

MESHULLAM PHOEBUS BEN ISRAEL SAMUEL: Chief rabbi of Cracow; born about 1547; died at Cracow Oct. 17, 1617. Meshullam is first known as the head of a flourishing yeshibah at Brest-Litovsk, one of his pupils being Joel Sirḳes. The year of his arrival at Cracow is not recorded, but it is certain that he was there in 1605. He was a recognized authority in rabbinical matters and was consulted by Meïr Lublin (Responsa, No. 81) and by Sirḳes ("She'elot u-Teshubot ha-BaḤ," No. 102). A responsum of Meshullam to Joshua Falk ha-Kohen contains an explanation (to Niddah v. 1) which shows Meshullam to have possessed a thorough knowledge of anatomy and some knowledge of Latin ("She'elot u-Teshubot ha-BaḤ ha-Ḥadashot," No. 34). Two other responsa of his are extant (*ib.* No. 81 and "She'elot u-Teshubot Ge'one Batra'e," No. 44). Abraham Schrenzel in his "Etan ha-Ezraḥi" (Responsa, No. 29) mentions a work by Meshullam Phoebus entitled "Sefer Shemot Giṭṭin," a treatise on the proper names in a bill of divorce. From a manuscript in his possession Meshullam edited the responsa of Moses Minz (Cracow, 1617).

H. R. M. SEL.

MESHULLAM BEN SOLOMON (surnamed **En Vidas**): Poet; lived at the beginning of the thirteenth century. Although Jedaiah Bedersi, in his "Iggeret Hitnaẓẓelut," classes Meshullam among the Provençal poets, Meshullam's native country seems to have been Spain. According to Gross ("Gallia Judaica," p. 146), the name of the place דפאה, which is added to Meshullam's name in a Bodleian manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1970, fol. 201), is to be corrected to דפיירה (= "Da Piera"). In a Florence manuscript Meshullam is designated as "En Vidas de Gerona."

Meshullam ranged himself with the Orthodox in their struggle against the philosophers. He directed his attacks chiefly against the translator of that work, Judah al-Ḥarizi, and wrote several satirical poems on the "Moreh Nebukim." These poems have been published by Steinschneider in the "Sammelband Kleiner Beiträge aus Handschriften" (i. 3). Meshullam was a poet of talent; indeed, Abraham Bedersi, in his review of the principal Hebrew poets, classes him before Benveniste. The greater part of his poetical productions are extant in manuscript (Neubauer, *l.c.*, and the Florence MS. cited above). See DAPIERA.

MESHUMMAD. See APOSTASY.

MESHWI AL-'UKBARI: Founder of the Jewish sect **Al-'Ukbariyyah (Okbarites),** which derived its name from the city of 'Ukbara, near Bagdad, said to have been the place of residence of Meshwi. According to Ḳirḳisani, Meshwi lived after Ishmael Al-'Ukbari; his original name was Moses, but it was converted by his adversaries into Meshwi (= "one whose ideas are confused"). Meshwi differed in many points from both the Karaites and the Rabbinites. Because the Day of Atonement is termed in the Bible "Sabbath of Sabbaths" he affirmed that that feast must always occur on a Sabbath, which would make the Feast of Passover fall on Thursday. He ordered his followers to turn to the West in praying, instead of in the direction of the Temple. According to Meshwi, it was not allowable to offer sacrifices in the Temple on Sabbath. Contrary to the Biblical prohibition, Meshwi is said to have allowed his followers to eat fat. Hadassi ("Eshkol ha-Kofer," § 98), on the authority of David ibn Merwan al-Muḳammaṣ, gives the name of the founder of the sect as Moses of Baalbek, who is probably identical with Meshwi al-'Ukbari. From an obscure passage in the "Oẓar Neḥmad" of the Karaite Tobias ben Moses, Delitzsch concludes that Meshwi embraced Christianity in the later part of his life; but this is highly improbable, for the sect would not have survived the apostasy of its founder, and Meshwi still had followers at the time of Ḳirḳisani.

MESOPOTAMIA. See ARAM; ASSYRIA; BABYLONIA.

MESQUITA: Castilian family, members of which, during the period of the Inquisition, found their way to Holland, England, and America.

David Bueno de Mesquita was one of the wealthy merchants of Amsterdam about the middle of the seventeenth century. The family Bueno de Mesquita still exists in England; in American history also the name appears at an early date. **Luis de Amesquita** is mentioned in the course of the trial of Gabriel of Granada by the Inquisition in Mexico (1642-45). From Obregon it is learned that **Luis de Mesquita** (alias De Amesquita Sarmiento) was a native of Segovia, Castile, and a citizen and merchant of Mexico. The name is found also in the West Indies. **Benjamin Bueno de Mesquita** is mentioned as a Portuguese merchant, resident in Jamaica, who petitioned the king for letters of denization in 1664; he appears to have lived there several years before the date mentioned. Banished from the island shortly after 1664, he went to New York. He was buried in that city, and his tombstone in the old cemetery on New Bowery is the oldest Jewish tombstone existing in New York; it bears the date of 1683. Other members of the same family remained in Jamaica, and their name is repeatedly met with at later dates; thus **Jacob Fernandes Mesquita** was naturalized there in 1740 and **Moses Mesquita** in 1749. **Abraham Bueno de Mesquita** was a resident of the island of Nevis early in the eighteenth century, though administration of his estate was granted in New York, to his daughter Blancha in 1715. Members of this family appear repeatedly in the records of the New York congregation, but the name disappears during the nineteenth century.

MESQUITA, MOSES GOMEZ DE: Haham of the Spanish and Portuguese Jews of England; born in 1688; died May 8, 1751. Mesquita was appointed haham in 1744, in succession to Isaac Nieto, who had resigned, and held the office until his death. He solemnized the second marriage of Isaac Nieto in 1747, and the marriage of his own daughter, in 1749, to Moses Cohen Dazevedo Ferme, who became haham in 1760.

MESSENGER. See Agency, Law of.

MESSER, LEON (JUDAH BEN JEHIEL ROFE): Italian rabbi, physician, and philosopher; flourished in Mantua in the latter half of the fifteenth century. He is said to have been born in Naples. The name "Leon" is the usual equivalent of "Judah" and "Messer" (= "Maestro"), the title usually given to physicians. He was rabbi in Mantua, where he had a conflict with his colleague Joseph Colon, in consequence of which both were expelled from the city (1475). Leon wrote a text-book on logic entitled "Miklal Yofi" (see Luzzatto in "Kerem Ḥemed," v. 48), a grammar under the title "Libnat ha-Sappir," commentaries to the "Logic" and the "Ethics" of Aristotle, and a text-book of rhetoric under the title "Nofet Ẓufim." The last-mentioned is the only one of his works which has been printed; it was published in Mantua before 1480 and was reedited by Jellinek in 1863 (Vienna). The object of the work was both apologetic and propagandic. The author desired to demonstrate to the non-Jewish world that the Jews were not devoid of the literary sense, and he wished to prove to his coreligionists that Judaism is not hostile to secular studies, which contribute to a better appreciation of Jewish literature. His theories follow chiefly those of Cicero and Quintilian. The book, as is evident from the fact that it was not reprinted within 400 years, had only a small circle of readers, but within this circle it was highly appreciated. Azariah dei Rossi quotes Leon as a witness to the value of secular studies (ch. ii., in "Me'or 'Enayim," ed. Benjacob, i. 75, Wilna, 1863), and Joseph Solomon Delmedigo recommends the book to the Karaite Zarah ben Nathan (Geiger, "Melo Chofnajim," p. 19, Berlin, 1840). Messer Leon's son, **David,** also a physician of Mantua, is the author of "Tehillah le-Dawid," a book on philosophy, edited by his grandson Aaron ben Judah (Constantinople, 1577).

D.

The Name.

MESSIAH (Hebr., "Ha-Mashiaḥ"; Aramaic, "Meshiḥa" = "anointed one"): The name or title of the ideal king of the Messianic age; used also without the article as a proper name—"Mashiaḥ" (in the Babylonian Talmud and in the midrash literature), like Χριστός in the Gospels. The Grecized Μεσσιας of the New Testament (John i. 41, iv. 25) is a transliteration of the Aramaic form, Aramaic being the spoken language of Palestine in the time of Jesus. "The Messiah" (with the article and not in apposition with another word) is, however, not an Old Testament expression, but occurs for the first time in apocalyptic literature. Similarly, in all probability the use of the word "Mashiaḥ" to denote the Messianic king is not found earlier than the apocalyptic literature. In the Old Testament the earliest use of the word is with Yhwh (or with a pronominal suffix referring to Yhwh) as a title of the ruling sovereign Meshiaḥ Yhwh ("God's anointed one"; I Sam. ii. 10, 35; xii. 3, 5; xvi. 6; xxvi. 9, 11, 16, 23; II Sam. i. 14, 16; xix. 21; II Chron. vi. 42; Ps. xviii. 51 [A. V. 50]; xx. 7 [A. V. 6]; cxxxii. 17 [applying to David]; Lam. iv. 20). In post-exilic times, the high priest, filling the place formerly occupied by the king, is spoken of as "ha-Kohen ha-Mashiaḥ" (the anointed priest; Lev. iv. 3, 5, 16; vi. 5), also (Dan. ix. 25, 26) as "Mashiaḥ Nagid" (an anointed one, a ruler) and simply "Mashiaḥ" (an anointed one), referring to Onias III. As the anointing of the high priest consecrated him above all his brethren to God's service and gave him immediate access to God (comp. Lev. viii. 12, xxi. 10-12; Zech. iii. 7), so the anointing of the king made him Meshiaḥ Yhwh, placed him in a special relationship to God, and established him as the one chosen by God to represent His rulership in Israel and to bear witness to His glory before the nations (comp. II Sam. vii. 8-11, 14; Isa. lv. 4; Ps. lxxxix. 4, 21-29). As "God's anointed one" the king was sacrosanct and inviolable (comp. I Sam. xxvi. 9). Hence the later applications of the title "Meshiaḥ Yhwh" in the Old Testament.

In Isa. xlv. 1 Cyrus is called "God's anointed one," because God has called him and given him victory after victory for the distinct purpose of putting an end to the Babylonian kingdom and the worship of idols, of setting free exiled Israel, and thus introducing the new era of God's universal dominion. In Ps. cv. 15 the Patriarchs are called "God's anointed ones" because they are under the special protection of God and therefore inviolable. Finally, in Hab. iii. 13, Ps. xxviii. 8, lxxxiv. 10 (A. V.

9), and possibly in lxxxix. 39, 52 (A. V. 38, 51), the title is applied to Israel, God's chosen people. See Anointing.

"Mashiaḥ" (anointed one of God) in Ps. ii. 2, which was formerly thought to have Messianic reference, is now taken as referring either to a Hasmonean king or to Israel. The latter interpretation is that prevailing in the Midrash (comp. Midr. Rabbah and Tanḥuma, Emor; Yalḳuṭ, Toledot, near end; Midr. Shoḥer Ṭob, *ad loc.*), though the Messianic interpretation occurs in the eschatological description (Pesiḳ. Zuṭarta, Balaḳ).

The Ideal in Isaiah.

But though the name is of later origin, the idea of a personal Messiah runs through the Old Testament. It is the natural outcome of the prophetic future hope. The first prophet to give a detailed picture of the future ideal king was Isaiah (ix. 1–6, xi. 1–10, xxxii. 1–5). Of late the authenticity of these passages, and also of those passages in Jeremiah and Ezekiel which give expression to the hope in a Messiah, has been disputed by various Biblical scholars (comp. Hackmann, "Die Zukunftserwartung des Jesaiah"; Volz, "Die Vorexilische Jahweprophetie und der Messias"; Marti, "Gesch. der Israelitischen Religion," pp. 190 *et seq.*; *idem*, "Das Buch Jesaia"; Cheyne, "Introduction to Isaiah," and edition and transl. of Isaiah in "S. B. O. T.").

The objections of these scholars, however, rest principally on the hypothesis that the idea of the Messiah is inseparably bound up with the desire for universal dominion, whereas, in reality, this feature is not a characteristic of the Messianic hope until a later stage of its development. The ideal king to whom Isaiah looks forward will be a scion of the stock of Jesse, on whom will rest the spirit of God as a spirit of wisdom, valor, and religion, and who will rule in the fear of God, his loins girt with righteousness and faithfulness (xi. 1–3a, 5). He will not engage in war or in the conquest of nations; the paraphernalia of war will be destroyed (ix. 4); his sole concern will be to establish justice among his people (ix. 6b; xi. 3b, 4). The fruit of his righteous government will be peace and order throughout the land. The lamb will not dread the wolf, nor will the leopard harm the kid (xi. 8); that is, as the following verse explains, tyranny and violence will no longer be practised on God's holy mountain, for the land will be full of the knowledge of God as the water covers the sea (comp. xxxii. 1, 2, 16). The people will not aspire to political greatness, but will lead a pastoral life (xxxii. 18, 20). Under such ideal conditions the country can not but prosper, nor need it fear attack from outside nations (ix. 6a, xxxii. 15). The newly risen scion of Jesse will stand forth as a beacon to other nations, and they will come to him for guidance and arbitration (xi. 10). He will rightly be called "Wonderful Counselor," "Godlike Hero," "Constant Father," "Prince of Peace" (ix. 5).

The "Immanuel" Passage.

This picture of the future fully accords with Isaiah's view, that the judgment will lead to a spiritual regeneration and bring about a state of moral and religious perfection; and it agrees also with the doctrine, which, in his bitter opposition to the alliances with Assyria and Egypt, he preached to his people—the doctrine, namely, that their sole concern should be God and their sole reliance be on Him, for thus, and thus only, might they endure (vii. 9; comp. also v. 4, viii. 13, xxx. 15). The prophets advocated a government which would be in conformity with God's will and be regulated by His laws of righteousness. In connection with Isaiah's Messianic hope it remains to be observed that the "Immanuel" passage, Isa. vii. 14, which is interpreted in Matt. i. 23 as referring to the birth of Jesus, has, as Robertson Smith ("The Prophets of Israel," pp. 271 *et seq.*, 426 *et seq.*) and others have pointed out, no Messianic import whatever. The name has reference merely to events of the immediate present. He means to give a token by which the truth of his prophetic word may be tested, saying that any young woman giving birth to a son in the near future will call him "Immanuel" (= "God with us"), in remembrance of the withdrawal of the Syrian-Ephraimitic armies from the country (v. 16). "'Almah" does not mean "virgin" (as given in A. V. and other versions; the only word meaning this is "betulah"), but "a young woman sexually mature," whether married or unmarried; the article "ha-" of "ha-'almah" is the generic article.

In Jeremiah and Ezekiel.

The idea of a personal Messiah is not met with again until the time of Jeremiah and Ezekiel (the Messianic picture of Micah v. 1, 3–8, as is proved by the fact that in it Israel and the Messiah hold dominion over the nations, according to this view can not be a pre-exilic product of prophecy; in fact, it must have originated late in post-exilic times). Jeremiah's picture of the Messiah is not a detailed one; but, like his future hope in general, it agrees in all essentials with that of Isaiah. The Messiah will be "a righteous sprout of David," who will establish just judgment and wise government in the country, and whose name will be יהוה צדקנו (= "God is our salvation"; xxiii. 5, 6; these two verses recur in almost the same form in xxxiii. 15, 16, but in the latter verse the name is applied to Jerusalem, an application which did not originate with Jeremiah. Ch. xxx. 9 *et seq.*, 21 does not claim consideration here, as it is of later origin).

In Ezekiel, the Messiah is a purely passive figure, the only personal reference to him being in xvii. 23—"he will become a mighty cedar" (Hebr.). The regeneration of the people, like their restoration, is exclusively the work of God.

But in xxxiv. 23 *et seq.*, xxxvii. 24 *et seq.*, which passages date from exilic times, there is an entirely new feature—the prophecy that David will be the king of the future state. As after the decline of the Holy Roman Empire the saga arose of the return of the emperor-hero Barbarossa, so, after the fall of the nation, the Jews of the Exile dreamed of the coming of a second David, who would reestablish them as a glorious nation. So Ezekiel lays emphasis on the fact that the future Israel is to be a united nation as it was under David of old. The hope in the return of David is expressed also in the spurious passage mentioned above (Jer. xxx. 9) and in the gloss to Hos. iii. 5 ("and David their king"), and is met with sporadically also in Neo-Hebraic apocalyptic literature (see below).

In post-exilic prophetic literature the hope in a Messiah is found only in the first two prophets of the post-exilic community, Haggai and Zechariah, and in Deutero-Zechariah, ch. ix., which, probably, dates from the time of the Seleucids. Haggai and Zechariah see in Zerubbabel the promised "sprout of David"; but they state merely that he will rebuild the Temple and attain great eminence as a ruler (Hag. ii. 23; Zech. iii. 8, vi. 12).

Deutero-Zechariah's Messiah has much in common with Isaiah's. He is described (Zech. ix. 9, 10) as a righteous Prince of Peace, who will rise from the ranks of the pious and oppressed, who will ride into Jerusalem not in military splendor, but on an ass (comp. Jesus' entry into Jerusalem on an ass, and also Ibn Ḳutaibah's account of Salman, the governor of Medina at the time of the dissensions of the califs, who rode upon an ass in order to show his advocacy of peace). For, unlike worldly rulers, he will not maintain his dominion by the sword—he will destroy all the instruments of war (if, instead of הכרתי, is read in accordance with the LXX. הִכְרִת, 3d s. m.); but, by his jurisdiction, which will extend to the ends of the earth, he will establish peace among the nations. Thus Deutero-Zechariah's conception of the Messiah combines Isaiah's conception with the hope of world-dominion cherished by his own age.

Ideal of the Second Isaiah.

The personal Messiah does not figure at all in the future hope of Deutero-Isaiah, whose lofty universalism marks the final step in the development of the religious ideas of the Prophets. The salvation of mankind is the goal of history, and Israel's prerogative becomes but the privilege of suffering for the good of the whole world. God has called Israel for the realization of His purpose toward man. Israel, and not an individual, is "the servant of God" (Isa. xlii. 1-6, xlix. 1-6, l. 4-9, lii. 13-liii. 12), through whom the regeneration of mankind will be accomplished, who will spread the true religion among all nations, convert all men into willing servants of God, and lead all tongues to confess Him (xlv. 23). Naturally, not the actual Israel of the present is meant, but the ideal Israel of the future, risen to spiritual heights in consequence of his wonderful deliverance by God. For this high destiny Israel has been especially fitted by reason of the religious experience which God has stored up in him in the course of his history; and, by submitting, in accordance with God's will, to suffering and ignominy, he fulfils his mission and advances toward his final goal. In Isa. ii. 1-4 and Micah iv. 1-4 there is the same picture of the Messianic future as in Deutero-Isaiah—Jerusalem as the religious center of the world, whence salvation will radiate to all men—but contain the additional promise that universal peace will ensue in consequence thereof. In like manner the post-exilic prophets Trito-Isaiah, Malachi, and Joel, and the post-exilic Apocalypse of Isaiah, xxiv.-xxvii., have no personal Messiah. According to them, God Himself, without the instrumentality of a man, will redeem Israel from his present misery and bring about the new era of salvation. The conclusion, however, of Malachi (the authorship of which is doubtful) speaks of a messenger, Elijah, whom God will send to convert men and thus pave the way for His own coming.

In the Apocrypha.

As in the prophetic writings just enumerated, so in the Apocrypha of the Old Testament the figure of the Messiah has no prominence whatever. In I Maccabees there is a brief general reference to the promise given to David, that his throne would be reestablished (ii. 57), but Ecclesiasticus, Judith, Tobit, Baruch, II Maccabees, and the Wisdom of Solomon contain no mention of the Davidic hope. The Hellenistic author of the Wisdom of Solomon is so thoroughly universalistic that the idea of a Messiah is precluded. His eschatological picture shows no nationalistic feature whatever.

Alexander as Messiah.

The natural deduction from the facts thus far outlined is that while from the time of the Prophets the belief in an ideal future determined the character and tendency of Jewish religious life and thought to such an extent that this belief may be called the special characteristic of the Jewish genius, still, in the periods thus far covered, the idea of a personal Messiah is far from having that general prominence which one would, at first, be inclined to assume. Further, it has been seen how Deutero-Isaiah heralded Cyrus as the favorite of God, the hero called by God to introduce the new era of universal bliss. In like manner, no doubt, as Kampers has shown in his "Alexander der Grosse und die Idee des Weltimperiums in Prophetie und Sage," the Jewish contemporaries of Alexander the Great, dazzled by his glorious achievements, hailed him as the divinely appointed deliverer, the inaugurator of the period of universal peace promised by the Prophets. Proof of this is: (1) The legend related in Josephus ("Ant." xi. 8) and in the Talmud (Yoma 67b) of the audience of the high priest Jaddua (in the Talmud it is Simon the Just) with Alexander the Great in Gaza. Alexander recognizes in the high priest the man who had appeared to him in a dream, urging him to the conquest of Asia and promising him that he himself would lead his army and deliver the Persian kingdom into his hands; he prostrates himself to worship God, whose name he sees inscribed on the plate of gold on the high priest's cidaris, accompanies the high priest to Jerusalem to sacrifice to God in His Temple, and is there shown the Book of Daniel, in which it is written that the Persian kingdom will be conquered by a Greek—a prophecy which Alexander applies to himself. (2) The various sagas which sprang up about Alexander, chiefly among the Jews in Alexandria, and out of which the Alexander romance of pseudo-Callisthenes grew, the only explanation of which is that Alexander had once been the central figure in their future hope. (3) The apocalyptic traditions about Alexander the Great in medieval apocalyptic literature and also in the midrashic literature—for example, the tradition (mentioned by Josephus) of Alexander imprisoning Gog and Magog behind the mountains of darkness in the far north. The version of this legend given by Jacob of Serug (521 C.E.) and in the Koran, sura 18 (comp.

Kampers, *l.c.* pp. 73, 76 *et seq.*) leaves no doubt that it was purely of apocalyptic origin.

But while all these hopes centering in Alexander the Great bear witness to the liberality and broad-mindedness of the Jews of that time, they, on the other hand, corroborate the conclusion, expressed above, that the hope in the Messiah had, as yet, no definite form and can not have been commonly an article of faith. This is true, not only of the time of Alexander the Great, but even as late as the first period of apocalyptic literature, and is proved by the absence of a personal Messiah in the oldest apocalyptic writing, the Book of Daniel, as well as in the oldest part of the Book of Enoch ("The Apocalypse of the Ten Weeks") and in the Book of Jubilees, which also date from the Maccabean period, apart from the fact, pointed out above, that in the contemporaneous apocrypha there is but vague reference to the Messiah. The "one of the likeness of man" ("ke-bar enash") of Dan. vii. 13 (Hebr.), to whom the rulership in the divine world-monarchy will be entrusted, is, according to the author's own explanation (vii. 18, 22, 27), the nation of God's holy ones (*i.e.*, the faithful Jews). These constitute the earthly representatives of God in the "civitas Dei," and in contrast to the other nations of the world, who are represented under the figures of animals, they are represented under the figure of a man in order to signify that in them the divine ideal of manhood has preserved itself most faithfully.

Rise of Popular Belief in a Personal Messiah.

Not until after the fall of the Maccabean dynasty, when the despotic government of Herod the Great and his family, and the increasing tyranny of the Roman empire had made their condition ever more unbearable, did the Jews seek refuge in the hope of a personal Messiah. They yearned for the promised deliverer of the house of David, who would free them from the yoke of the hated foreign usurper, would put an end to the impious Roman rule, and would establish His own reign of peace and justice in its place. In this way their hopes became gradually centered in the Messiah. As evidence that in the Roman period the Messianic hope had become universal among the Jews may be adduced: (1) Jesus' conviction that he was the Messiah, a conviction inspired in him by the current belief in a Messiah, as is shown by the fact that on his entry into Jerusalem the populace hailed him as such; (2) the testimony of Josephus ("B. J." vi. 5, § 4), Tacitus ("Hist." v. 13), and Suetonius (Vespasian, iv.) regarding the Messianic belief of the Jewish people at that time; (3) the fact that even in Philo's picture of the future, in spite of its moralistic tendency, the Messianic king has a place (comp. "De Præmiis et Pœnis," § 16). It may be noted in this connection that the "Prayer for the Coming of the Messiah," as the version of it given both in the Babylonian and in the Palestinian recensions of the Shemoneh 'Esreh shows (see Nos. 14 and 15 respectively), can not have become an integral part of the daily prayers later than the time immediately following the destruction of the Temple, for in that period the "Shemoneh 'Esreh" received its present form. Hillel's assertion (Sanh. 98b) that there would be no future Messiah for Israel since the latter had had its Messiah in the days of Hezekiah, can have no weight as a contrary argument, as Hillel lived in the reign of Herod the Great, at the beginning of the period which marks the development of the popular belief in the Messiah.

Development of Conception.

As the future hopes of the Jews became Messianic in character the figure of the Messiah assumed a central and permanent place in apocalyptic literature; and as apocalyptic literature in general, so the Messiah-concept in particular, embodies a multitude of bizarre fantasies which can not possibly be reconciled or woven into anything like a connected picture. There are many factors which contributed to this manifold and variegated imagery. Not only was all the Messianic and quasi-Messianic material of the Scriptures collected, and out of it, by means of subtle combinations, after the manner of the Midrash, a picture of the Messiah sedulously drawn, but everything poetical or figurative in the Prophets' descriptions of the future was taken in a literal sense and expounded and dogmatized accordingly. Many foreign elements, moreover, crept in at this time and became part of the general pot-pourri of imagery relating to the Messiah. This being the case, an exceedingly complex and difficult question arises—where, in the Messiah-pictures, and, indeed, in the pictures of the future in general, presented by apocalyptic literature, has one to deal with organic development from prophetic ideas, and where with foreign religious elements? At present it is not possible to form a final judgment in regard to the place of origin of these foreign ideas. The material from the Assyro-Babylonian religion and mythology which has been offered in recent years by Assyriologists shows what an involved question is presented in this one point, and that a series of preliminary and exhaustive studies is necessary before a final decision can be reached regarding it or the various questions bound up with it. The one thing safe to maintain in this connection is, perhaps, that, according to the time at which the heterogeneous character of the conceptions becomes noticeable in the literature, Alexandria must have had a prominent part in the fusion of the native and foreign elements, since that city had been from the time of Alexander the Great the seat of religious syncretism as well as the intellectual metropolis of the civilized world.

For the better understanding of the Messianic pictures in apocalyptic literature it is important to point out that, although frequently interlaced, two distinct sets of ideas may be traced—the one set concerned with this world, hence realistic and national; the other directed to the world to come, hence transcendent and universalistic. The Messiah presents a correspondingly double character. Side by side with the traditional idea of an earthly king of the house of David is the new conception of a heavenly preexistent Messiah, from which it follows that in regard to the question of the Messiah the older apocalyptic literature, as well as the younger rabbinical branch, falls naturally into two groups.

In the Older Apocalyptic Literature.

In the older apocalyptic literature the first book to be mentioned in which the Messiah figures as an earthly king is "The Vision of the Seventy Shepherds of the Book of Enoch" (ch. lxxxv.–xc.) of the time of John Hyrcanus (135–105 B.C.). The Messiah appears under the figure of a white bull at the conclusion of the world-drama (xc. 37 *et seq.*) and commands the respect and fear of all the heathen, who eventually become converted to God. Yet he does not take any actual rôle. It is God Himself who wards off the last attack of the heathen against Israel, gives judgment, and establishes the world-dominion of Israel. Second in this group come those parts of the Sibylline Books whose date, as Geffken's recent critical analysis has established ("Komposition und Entstehungszeit der Oracula Sibyllina," pp. 7–13), is about the year 83 B.C. The Messiah is pictured (verses 652-666) as a king sent by God from the rising of the sun, who will put an end to war all over the earth, inasmuch as he will destroy some peoples and make permanent treaties with the others; in all his actions he will be solicitous not to follow his own counsel, but to obey the commands of God. The writer then describes at length the attack by the heathen nations on the magnificent Temple of God and on the Holy Land, and the annihilation of the nations by God; the Last Judgment, with the ensuing conversion of the heathen to God; the establishment of God's eternal kingdom over all men and the reign of universal peace; but, strange to say, throughout the description there is no mention of the Messiah. In fact, in verses 781 *et seq.* the Israelites are spoken of as the prophets of God, the judges of mankind, and the just kings who will put an end to the sway of the sword upon earth.

In the Psalms of Solomon.

"The Vision of the Seventy Shepherds" and Sibyllines, iii. 652 *et seq.* say nothing whatever about the lineage of the earthly Messiah, but in the Psalms of Solomon (xvii.), which were called forth by the conquest of Jerusalem by Pompey (63 B.C.), he is designated as the "son of David," who will appear at a time known only to God. These Psalms (*l.c.*) contain a more detailed description of his personality and of his reign than any other writing of that period. The Messiah will first crush the unjust rulers and rid Jerusalem of, and destroy, the impious heathen. Then he will gather the scattered ones of Israel, distribute them through the land according to their tribes, and found his own kingdom of peace and justice. No wicked person will be tolerated in his kindgom nor will foreigners be allowed to dwell there. He will subject the heathen nations to his rule, glorify the Lord before the whole world, and make Jerusalem pure and holy as of old, so that the nations will come from the ends of the earth to witness God's glory. The description which follows of his righteous reign shows the influence of Isa. xi. 1 *et seq.* Free from sin, strong in the divine fear, and filled with the spirit of God, of valor, and of justice, he will tend the flock of the Lord faithfully, hold the higher officers in check, and make sinners cease by the power of his word, so that injustice and tyranny will not be practised in the land. He will not rely upon horses and warriors, nor heap up gold and silver to wage war, nor keep armies. In God alone will he place his trust, and his strength will be in Him.

In the Apocalypse of Baruch (70–100 C.E.) the earthly Messiah will appear at the close of the fourth (*i.e.*, the Roman) world-empire and destroy it. The last ruler of the empire will, after his hosts have been destroyed, be brought in chains before the Messiah on Mount Zion, and there, after the impiousness of his rule has been pointed out to him, he will be put to death by the Messiah's own hand. Of the other nations, those hostile to Israel will be put to the sword and the remainder subjected to the rule of the Messiah, who will establish himself on the throne of his kingdom, inaugurate the reign of morality and bliss, and hold dominion until the end of time, that is, until the consummation of the present world (xxix. 3, xxxix. 5–xl. 3, lxxii.–lxxiii. 4. Ch. xxx. 1 is to be taken, with Volz ["Jüdische Eschatologie," pp. 37, 203], as Christian interpolation).

In the Testaments of the Patriarchs.

The Testament of Levi (ch. viii. and xviii.) shows a unique conception of the Messiah. He is not, as in the Testament of Judah (see below) and according to the popular belief, a descendant of David, but a priestly king of the tribe of Levi. His character and activity are altogether spiritual. The pouring out of the spirit and knowledge of the Lord over all mankind and the cessation of sin and evil will be the fruit of his ideal priesthood, which will last for all eternity. He himself will open the doors of paradise, cast aside the sword threatening Adam, and give the saints to eat of the tree of life. He will chain up Belial and will give his children power to trample on the evil spirits. The picture of the Messiah in the Testament of Judah (ch. xxiv.), although far more brief, resembles, in its spiritual character and in its universalistic tendency, that in the Testament of Levi. The sole mission of the Messiah will be the regeneration of mankind, and his kingdom will be one of justice and salvation for the whole world. If, as Bousset sought to prove ("Zeitschrift für die Neutestamentliche Wissenschaft," i. 193 *et seq.*), the Testaments of the Twelve Patriarchs date mainly from the time of the Maccabees, then the Messiah-conception of the Testament of Levi is easily accounted for; the author expects that the future Savior will be a prince of the reigning priestly house of the Maccabees.

The Heavenly Messiah.

The oldest apocalypse in which the conception of a preexistent heavenly Messiah is met with is the Messiological section of the Book of Enoch (xxxvii.–lxxi.) of the first century B.C. The Messiah is called "the Son of Man," and is described as an angelic being, his countenance resembling a man's, and as occupying a seat in heaven beside the Ancient of Days (xlvi. 1), or, as it is expressed in ch. xxxix. 7, "under the wings of the Lord of spirits." In ch. xlviii. 3, 6, xlix. 2b it is stated that "His name was called before the Lord of spirits before the sun and the signs of the zodiac were created, and before the stars of heaven were made"; that "He was chosen and hidden with God before the world was created, and will remain in His presence forevermore" (comp. also lxii. 6); and that "His glory will last from eternity unto eternity and his might from generation unto generation" (that "his name" in xlviii. 3 means really "son of man" is evident from verse 6; comp. the similar use of "Shem YHWH" for "YHWH" in Isa. xxx. 27). He is represented as the embodiment of justice and wisdom and as the medium of all God's revelations to men (xlvi. 3; xlix. 1, 2a, 3). At the end of time the Lord will reveal him to the world and will place him on the throne of His glory in order that he may judge all creatures in accordance with the end to which God had chosen him from the beginning. When he rises for the judgment all the world will fall down before him, and adore and extol him, and give praise to the Lord of spirits. The angels in heaven also, and the elect in the Garden of Life, will join in his praise and will glorify the Lord. "He will judge all hidden things, and no one will be able to make vain excuses to him"; he will judge also Azazel, with all his associates and all his hosts. The wicked ones of the earth, especially all kings and potentates, he will give over to damnation, but for the just and chosen ones he will prepare eternal bliss, and he will dwell in their midst for all eternity (xlv. 3, 4; xlvi. 4-6; xlviii. 4-10; xlix. 4; li. 3; lv. 4; lxi. 7-lxii. 14).

It is worthy of special note that in the appendix to the Messiological section of Enoch, the latter himself is the Son of Man = Messiah (lxxi. 14), and, as in the Slavonic Book of Enoch and the Hebrew Book of Enoch (see JEW. ENCYC. i. 676, *s.v.* APOCALYPTIC LITERATURE), as well as throughout rabbinical literature, Enoch is identical with METAṬRON = *Μετάθρονος* or *Μετατύρανος* (*i.e.*, the highest, ministering spirit, who stands next to God and represents His rulership over the universe), so there is an important connecting-link between the conception of the Son of Man = Messiah, and the Logos, which appears repeatedly in Philo in place of the earthly future king (comp., *e.g.*, his interpretation of "ẓemaḥ," Zech. vi. 12, in "De Confess." § 14; see MEMRA). The Fourth Book of Ezra (about 100 C.E.) presents both the preexistent and the earthly Messiah. The latter is seen in ch. vii. 28, xi. 37-46, xii. 31-34, where the Messiah is represented as the Lion "who will spring from the seed of David," will destroy the fourth (*i.e.*, the Roman) world-monarchy, will rule 400 years till the end of the Messianic interim, and then will die, together with all men. The former appears in the vision of the man rising from the sea (ch. xiii.). Here, as in the Messiological section, the Messiah is described as "one resembling a man" and is called "ille homo" or "ipse homo" (verses 3, 12). The statement is made also (under the influence of Dan. vii. 13) that he "flew with the clouds of heaven." Other points of contact with the Messiological Book are: the statement that "he is the one whom the Most High has reserved for many ages to deliver creation" (verse 26); the reference to his being hidden with God (verse 52)—"Even as no one can fathom nor learn what is in the depths of the sea, so none of the inhabitants of earth can see My son nor his escort [*i.e.*, the host of angels who will accompany him when he appears upon earth], unless it be at the appointed hour"; and, finally, the obvious reference to his preexistence in heaven, where the promise is given to Ezra, "Thou wilt be taken from among men [to heaven] and wilt dwell with My son and with thy comrades until the end of time" (xiv. 9).

Whether the Messiah in Sibyllines v. 415-430, where he is called "a blessed man coming from heaven," is the preexistent or the earthly Messiah can not be determined. In the Assumptio Mosis, however (*c.* 4 B.C.), it may be concluded, on the ground of the identification of the Son of Man = Messiah with Enoch = Metaṭron in Enoch lxxi. 14, that it is the preexistent Messiah who is referred to (x. 2), for it is stated that, at the end of the last tribulation, when God's dominion will be established over all creation, "the hands of the angel who stands in the highest place will be filled, and he will immediately avenge them [Israel] on their enemies." As the author of the Fourth Book of Ezra (xiii.), as well as the author of the Messiological Book, evidently had Dan. vii. 13 in mind when he described the preexistent Messiah, it may be mentioned here that, while the Messianic interpretation of this passage prevails in the rabbinic literature (the oldest example is the Messianic tradition in Sanh. 98a, for which Joshua b. Levi is mentioned as authority), the Greek text of Dan. vii. 13 presents not only the Messianic interpretation of "Bar Nash," but unmistakably also, in *καὶ ὡς παλαιὸς ἡμερῶν παρῆν* added after *ὡς υἱὸς ἀνθρώπου ἤρχετο*, the conception of the preexistent Messiah. Moreover, contrary to the view held by many, that all the passages concerning the Son of Man = Messiah in the Book of Enoch and IV Ezra are of Christian origin, it may be pointed out that the phrase "Bar Nash" (= "Son of Man") must have been a common name for an angel of the highest order among the Palestinian Jews of the first Christian centuries. Yer. Yoma v. relates that, when reference was made in the bet ha-midrash to Simon the Just's having, every year of the forty during which he was high priest, been accompanied into the Holy of Holies on the Day of Atonement by an "aged one," veiled and garbed in linen (*i.e.*, by a heavenly being; comp. the "labush ha-badim" in Ezek. ix. 1, 3 *et al.*), R. Abbahu objected: "Does not the prohibition, 'No man shall be present in the Tabernacle when the high priest enters the sanctuary,' extend to those of whom it is said, 'the appearance of their countenance was that of a man's countenance'?" (Lev. xvi. 17; Ezek. i. 10). Whereupon the rejoinder was made, "Who says that that being was Bar Nash? It was the All Holy Himself." It may be noted in passing that this haggadah is of importance for the Greek text of Dan. vii. 13 as well as for the identification of the Son of Man = Messiah with Enoch = Metaṭron.

In Rabbinic Literature.

In the rabbinical apocalyptic literature the conception of an earthly Messiah is the prevailing one, and from the end of the first century of the common era it is also the one officially accepted by Judaism. As proof of this may be given: (1) "The Prayer for the Coming of the Messiah," mentioned above, in which the Messiah is called "descendant of David." (2) The information given in the second century by Justin ("Dialogus cum Tryphone," ch. xlix.) and by the author of "Philosophumena" (ix. 30). Both writers state expressly that, contrary to the belief of the Christians, the Jews emphasize the human origin of the Messiah, and the author of "Philosophumena" adds that they expect him to be descended from David. (3) The liturgy of later times, which, like the Daily Prayer, calls him the descendant of David throughout. His mission is, in all essential respects, the same as in the apocalypses of the older period: he is to free Israel from the power of the heathen world, kill its ruler and destroy his hosts, and set up his own kingdom of peace (comp. the descriptions of him in Jew. Encyc. i. 675, *s.v.* Apocalyptic Literature, Neo-Hebraic).

Heavenly Preexistence.

The conception of the preexistent Messiah is met with in Pesiḳ. R. xxxiii., xxxvi. (pp. 152b, 162, ed. Friedmann; comp. Yalḳ. i. 339). In accordance with the Messiological section of Enoch the former of these two passages says: "At the beginning of the creation of the world was born the King Messiah, who mounted into God's thoughts before the world was made"; and in the latter passage it is related that God contemplated the Messiah and his works before the creation of the world and concealed him under His throne; that Satan, having asked God who the Light was under His throne, was told it was the one who would bring him to shame in the future, and, being then allowed, at his request, to see the Messiah, he trembled and sank to the ground, crying out, "Truly this is the Messiah who will deliver me and all heathen kings over to hell." God calls the Messiah "Ephraim, my righteous Messiah."

The preexistent Messiah is presented also in the Haggadah (Pes. 54a; Ned. 39a; Yalḳ. i. 20; *et al.*), where the name of the Messiah is included among the seven things created before the world was made, and where he is called "Yinnon," reference being made to Ps. lxxii. 17 (which passage probably was in the mind of the author of the Messiological section of Enoch when writing xlviii. 3). That, contrary to the view of Weber ("Jüdische Theologie," 2d ed., p. 355) and others, it is actual preexistence which is meant here, and not predestination, is evident from the additional remark—"According to another view, only the Torah and the Throne of Glory were [actually] created; as to the other [five] things the intention was formed to create them" (Yalḳ., *l.c.*; in regard to "the name of the Messiah" compare the comment above to Enoch, xlviii. 3). Finally, the preexistence of the Messiah in paradise is minutely described in "The Revelation of R. Joshua b. Levi" (see Jew. Encyc. i. 680), in Midrash Konen (Jellinek, "B. H." ii. 29), and in "Seder Gan Eden" (*ib.* iii. 132 *et seq.*, 195). In the first two, regardless of the apparent anomaly, the preexistent Messiah is called "Messiah ben David."

Earthly Preexistence.

The conception met with in the rabbinical literature of an earthly preexistence of the Messiah must be distinguished from that of his heavenly preexistence. It occurs in various forms, representing, probably, different stages of development. First, he is expected to lead a hidden life and then to step forth suddenly. (On this conception of the sudden, unexpected appearance of the Messiah comp. Matt. xxiv. 27, 43-44, where it is said that the Messiah will come like a thief in the night or like a flash of lightning.) This is the conception of him in Ex. R. i. and in Tan., Shemot, both of which say that as Moses, the first deliverer, was reared at the court of Pharaoh, so the future deliverer will grow up in the Roman capital; in agreement with this, in the Agadat ha-Mashiaḥ (Jellinek, *l.c.* iii. 142) it is said that the Messiah will suddenly be revealed to Israel in Rome. Then, again, the Messiah is represented as born, but not yet revealed. This conception appears as early as the second century in Justin Martyr's "Dialogus cum Tryphone" (ch. viii.), and in accordance with it is the passage Sanh. 98b, where R. Joshua ben Levi is quoted as saying that the Messiah is already born and is living in concealment at the gates of Rome. In Targ. Yer. to Micah iv. 8 the Messiah is on the earth, but because of the sins of the people he is still in hiding. Finally, the Messiah is thought of as born at a certain time in the past. This is the case in Yer. Ber. ii., which states that the Messiah was born at Bethlehem on the day the Temple was destroyed, and in the Apocalypse of Zerubbabel (see Jew. Encyc. i. 682), which declares he was born in the days of King David and is dwelling in Rome.

The notion, traceable to Ezek. xxxiv. 23 *et al.*, that David himself is the Messiah, is another variation of the conception of earthly preexistence. It occurs in the apocalyptic fragment of the "Siddur" of R. Amram (see Jew. Encyc. i. 678, *s.v.* Apocalyptic Literature, 2) and in Yer. Ber. ii. The latter states that whether the King Messiah belongs to the living or to the dead, his name is David.

Messiah ben Joseph.

Finally, there must be mentioned a Messianic figure peculiar to the rabbinical apocalyptic literature—that of Messiah ben Joseph. The earliest mention of him is in Suk. 52a, b, where three statements occur in regard to him, for the first of which R. Dosa (*c.* 250) is given as authority. In the last of these statements only his name is mentioned, but the first two speak of the fate which he is to meet, namely, to fall in battle (as if alluding to a well-known tradition). Details about him are not found until much later, but he has an established place in the apocalypses of later centuries and in the midrash literature—in Saadia's description of the future ("Emunot we-De'ot," ch. viii.) and in that of Hai Gaon ("Ṭa'am Zeḳenim," p. 59). According to these, Messiah b. Joseph will appear prior to the coming of Messiah b. David; he will gather the children of Israel around him, march to Jerusalem, and there, after overcoming the hostile powers, reestablish the Temple-worship and set up his own dominion. Thereupon Armilus, according to one group of sources, or Gog and Magog, according to the other, will appear with their hosts before Jerusalem, wage war against Messiah b. Joseph, and slay him. His corpse, according to one group, will lie unburied in the streets of Jerusalem; according to the other, it will be hidden by the angels with the bodies of the Patriarchs, until Messiah b. David comes and resurrects him (comp. JEW. ENCYC. i. 682, 684 [§§ 8 and 13]: comp. also Midr. Wayosha' and Agadat ha-Mashiaḥ in Jellinek, "B. H." i. 55 *et seq.*, iii. 141 *et seq.*).

When and how this Messiah-conception originated is a question that has not yet been answered satisfactorily. It is not possible to consider Messiah b. Joseph the Messiah of the Ten Tribes. He is nowhere represented as such; though twice it is mentioned that a part of the Ten Tribes will be found among those who will gather about his standard. There is a possibility, however, as has been repeatedly maintained, that there is some connection between the Alexander saga and the Messiah b. Joseph tradition, for, in the Midrash, on the strength of Deut. xxxiii. 17, a pair of horns, with which he will "strike in all directions," is the emblem of Messiah b. Joseph (comp. Pirḳe R. El. xix.; Gen. R. lxxv.; Num. R. xiv.; *et al.*), just as in the apocalyptic Alexander tradition in the Koran (referred to above) the latter is called "The Double-Horned" ("Dhu al-Ḳarnain"). See also ESCHATOLOGY; JESUS; JUDAISM.

MESSIAH, FALSE. See PSEUDO-MESSIAH.

MESSIANIC PROPHECY. See PROPHECY.

MESSIANIC YEAR. See CALENDAR.

MESSINA: Italian city, "at the point of Sicily, on the strait called Lunir, which divides Calabria from Sicily" ("Itinerary" of Benjamin of Tudela). Its Jewish community may have been founded even before the destruction of the Second Temple, although it is first mentioned in the letters of Gregory I. After a long silence the sources again refer to it, in connection with a royal decree of 1129, and about 1170 Benjamin of Tudela found 200 Jews there on his return from the Holy Land. The Jews of Messina had the same constitution, rights, and taxes as all the other Sicilian communities, though their lot may have been somewhat harder because the archbishop claimed a certain authority over them.

In 1347 several Jews were executed on the false charge of ritual murder, and their heads were publicly exposed; a marble inscription, "a monument to the faithless Jews," was subsequently placed in the cathedral to commemorate the event. On a similar occasion, in 1475, the Jews averted a riot only by the payment of a large sum of money. In 1492 they were expelled from Messina, as well as from the entire island, though thirty-seven years before, in 1455, they had in vain attempted to emigrate.

Messina occupied an exceptional position in virtue of being the seat of the highest court of appeal for all the Jews of Sicily; and in 1439 Moses Ḥefeẓ (Bonavoglio, who, as the representative of seventeen communities, had induced King Alfonso V., in 1430 and 1431, to repeal ordinances unfavorable to the Jews) was made chief justice ("naggid") of the supreme court. Being at the court in Naples when appointed, he deputed his brother to act as his proxy; the latter accordingly was invested with the new dignity in the synagogue of Palermo. Moses Ḥefeẓ died in 1447. Messina itself was not subject to the jurisdiction of the new chief justice, but formed a judicial district of its own.

The Messina community must have been one of the largest on the island, judging from the tax-returns. In addition to the imposts levied equally upon all the communities, it was required to furnish, after 1347, the standards for the galleys of the commanding officer. Wine and meat also were taxed. In 1170 the community numbered only 200 persons, but in 1453 there were 180 families there—about 3 per cent of the total population. It had several synagogues, one in the suburb of San Philip. There fragments of an inscription of the year 440 are said to have been found, but the reference is probably to one of much later date, in honor of a certain "Moses" (?) who built a synagogue or some similar structure. A considerable number of Jews living in the vicinity of Messina endeavored to evade the taxes and imposts of the community, and consequently were excluded by a royal decree of 1344 from its rights and privileges.

Little is known of the intellectual life of the Jews of Messina. About 1300 Abraham Abulafia, cabalist and magician, had two pupils there—Abraham and Nathan; some time later Aaron Facassi (Favi) officiated there as rabbi, and pronounced a sentence of excommunication upon a physician named Aaron (1340), which sentence was repealed by the government. Moses Ḥefeẓ (referred to above) officiated as rabbi about 1430, and succeeded in having the Jews released from compulsory attendance at Christian sermons.

The scholars of Messina who edited the manuscript of Naḥmanides' commentary on the Pentateuch, on which the Naples 1490 edition was based, are of somewhat later date. The Jewish physicians of Messina include Naccon de Fariono and Aaron (1367), Moses Spagnuolo and Bulfarachio (1375), Moses Yabe (1383), Joseph Factas and Gaudio (1396), Benedetto da S. Marco "Lugrossu" and Machaluffo Ayculino (1404), Isaac de Bonavoglia (1425), Vilelmo Saccas (1432), Aaron de Sacerdotu de Girachi and Raba (1448), Moses de la Bonavoglia (1477), and Vitali Aurifici. There were a number of Turkish scholars of the sixteenth century who bore the surname "Messini."

G. I. E.

MESSING: Prussian family, members of which in the nineteenth century settled in the United States of America.

Joseph Messing: Talmudist, exegete, and rabbi; born at Argenau, Prussia, April 30, 1812;

died in London, England, March 20, 1880. The only rabbinates he held were those of Gostyn and Witkowo, Posen. Messing was the author of: twelve homilies on Ḥanukkah (Breslau, 1862); "Gal Na'ul" (1864), a commentary on Megillah, containing a prefatory notice by Sir Moses Montefiore; "Abne Shayish" (1868), a commentary on the tractate Abot; "Perush'al Haggadah" (1869), a commentary on the Haggadah; and "Arono shel Yosef" (1876) on Bible exegesis.

Three sons of Joseph Messing, who received their training under Guttmacher at Grätz, and Öttinger and Zunz at Berlin, were called to fill prominent pulpits in the United States.

Aaron Messing: Eldest son of Joseph Messing; born 1843; rabbi at Mecklenburg (1859–67), New York (1867–70), San Francisco (1871–91). In 1891 Messing was called to the rabbinate of B'nai Sholom Temple, Chicago, which he still (1904) occupies. He has founded not less than twelve congregations and twenty-three Sunday-schools in Nevada, Oregon, and California. Messing is the author of several popular Sabbath-school text-books, especially "A Hebrew Primer" and "The Jewish Catechism."

Mayer Messing: Second son of Joseph Messing; born 1843. He is the oldest rabbi in continuous service with one congregation in the United States, having been minister to the Indianapolis Hebrew Congregation for thirty-seven years, since Oct. 21, 1867.

Henry Messing: Third son of Joseph Messing; born March 10, 1848. He has been rabbi of the United Hebrew Congregation, St. Louis, Mo., since March 8, 1878.

Abraham Joseph Messing: Youngest son of Aaron Messing; born Aug. 4, 1873, at Chicago, Ill.; was graduated from the Hebrew Union College in 1897, and has been rabbi of Temple Beth-Or, Montgomery, Ala., since Sept. 1, 1897.

A. S.

METALS: Although Deut. viii. 9 describes the Promised Land as one rich in ore, Palestine itself was really almost without metals, which had to be imported from neighboring countries. The passage in question is therefore taken by certain scholars to refer not to Palestine proper, but to Bashan, the present Hauran, whose rocks contain as much as 20 per cent of iron—hence the name "basalt." Nothing is known of mining among the Hebrews themselves (see MINES AND MINING); the description in Job xxviii., which shows a full knowledge of the technical process, probably refers to Egypt, which had engaged in mining on the Sinaitic Peninsula from earliest times. The existence of these mines in Sinai may account for the fact that the Jerusalem Pentateuch Targum translates "the wilderness of Zin" (Num. xiii. 21; xxxiv. 3, 4) by "mountain of iron." Josephus ("B. J." iv. 8, § 2; comp. Malala's "Chronicle," xviii. 182), however, places "the iron mountain" in Trachonitis and not in the vicinity of Sinai (comp. Derenbourg in "R. E. J." viii. 275). Another "mountain of iron" is mentioned (Suk. iii. 1); but this was in the vicinity of Jerusalem, and received its name not from its richness in iron, but from the fact that its rocks were hard as iron. Robinson ("Researches," i. 512) has shown that the country about the Red Sea is likewise entirely without iron deposits.

Sources of the Metals.

The Hebrews were aware of the existence of gold at Havilah, Ophir, and Uphaz; and they obtained the precious metal from these districts either by means of their own ships, as under Solomon (I Kings ix. 28) and Jehoshaphat (*ib.* xxii. 49), or through the markets of TYRE, where silver, iron, tin, and lead were brought (Ezek. xxvii. 12), probably by traders from Tarshish (*ib.* xxxviii. 13). Tarshish is mentioned as being under Tyrian dominion (Isa. xxiii. 10); but its location and even the meaning of its name are still disputed points. The same doubt attaches to two cities, Betah and Berothai, conquered by David, from which he "took exceeding much brass" (II Sam. viii. 8; in I Chron. xviii. 8 these cities are Tibhath and Chun). Copper utensils came also from Javan (which here probably means Cyprus), Tubal, and Meshech (Ezek. xxvii. 13). According to the ideas of the time, the people of the last-named country lived in the far north; and the expression "iron from the north" occurs in Jer. xv. 12. This iron seems to have been an especially good variety. The Rabbis mention the excellent Indian iron ('Ab. Zarah 16a; Ab. R. N., Recension A, xxviii.) and the Indian swords (Tan., Wa'etḥanan, 6). Since the Oriental trade was chiefly in the hands of the Phenicians, the Israelites could thus become directly acquainted with the metals and had opportunity to obtain possession of them.

A general name for "metal" does not occur in the Bible, but the following species are mentioned: gold, silver, copper, iron, tin, lead, antimony or stibium, and electrum.

Gold ("zahab," connected with the root "ẓahab," "to shine"): The various Biblical terms (see GOLD) employed to designate the color or the degree of purity of different varieties of the metal are in part identical with the terms used in the Talmud (Yer. Yoma iv. 41d; a little different in Yoma 44b) to characterize seven varieties: (1) good gold (with reference to Gen. ii. 12; comp. "good gold from Ophir"; Targum Sheni to Esth. ii. 1, ed. Lagarde, p. 227); (2) pure gold, *i.e.*, such gold as can be put into the fire without losing weight (the golden lamp of the Tabernacle is said to have been put into the fire eighty times without losing weight); (3) fine gold ("zahab segor"; comp. I Kings vi. 20); (4) "zahab mufaz," which, according to one explanation, looks like burning brimstone, and according to another and probably more correct explanation is so called from the place in which it was found (Solomon's throne was covered with this kind of gold; see I Kings x. 18); (5) unalloyed gold; (6) spun gold ("zahab shaḥuṭ"), flexible as wax (the emperor Hadrian is said to have had a piece of the size of an egg; Diocletian, one as large as a Gordian denarius); (7) Parvaim gold (II Chron. iii. 6), probably so called from an Arabian district. In the Babylonian Talmud gold of Ophir occupies the third place in the list; and "mufaz" gold is—apparently correctly—connected with "paz" (comp. Cant. v. 15). The word occurs with the same meaning in the Talmud (Giṭ. 11b, 58a). If "ufaz" (Jer. x. 9; Dan. x. 5) is not a proper name, it is likewise probably connected with the same root. Some commentators, referring to Targum, Peshiṭta, and manuscripts of the Septuagint, consider it to be corrupted from "Ofir." Almost all the names for gold here mentioned occur in I Kings x. Perhaps "eshkar" (Ps. lxxii. 10; Ezek. xxvii. 15) should also be connected with "sagur"; in Assyrian "hurasu sakru" means "massive" or "solid gold" (Delitzsch, "Assyrisches Handwörterbuch," p. 499b); and "sagur" and "eshkar" may be synonymous (Cheyne, in "Proc. Soc. Bibl. Arch." 1899, xxi. 246; comp. Barth in "Programm des Berliner Rabbinerseminars," p. 32, Berlin, 1901). The Assyrian "hurasu" explains the Hebrew "haruẓ" (Prov. viii. 10, xii. 27); the latter is used poetically for gold and really means "decided," *i.e.*, "declared a unit of value," which gold had been for a long time. Moreover, the Greek *χρυσός* (= "gold") is said to come from the Hebrew (perhaps Phenician; see "R. E. J." xvi. 276) word "haruẓ" (Bochart, "Hierozoicon," ii. 534; H. Lewy, "Die Semitischen Fremdwörter im Griechischen," p. 59). Poetically "ketem" (Lam. iv. 1; Job xxviii. 19, xxxi. 24, etc.) is used, and appears also in connection with "paz." The expression "beẓer" occurs only twice (Job xxii. 24, 25), and is usually interpreted to mean "bars of gold." The meaning "gold in rings" is also accepted for it (Hoffmann, in "Zeitschrift für Assyriologie," 1887, p. 48). "Ophir"—that is, gold of Ophir—is its parallel; and the writer of the Book of Job (Job *l.c.*) says that both of these kinds of gold shall be as of no value to those who fear God. In the Talmud "seething gold" is also mentioned ("zahab roteaḥ"; Sanh. 92b). See also Gold for Biblical passages.

Silver ("kesef"): This metal derives its name from its pale color. The denominative "hiksif" means "make pale" ("kasaf," like the Arabic "kasaf," = "desiderare"), although in Job xxii. 25 a comparison seems to be made between silver and something shining. The Greek *ἀργύριον* (= Latin "argentum") likewise goes back to *ἀργός* ("white"). "Kesef" was, in addition, a term for money in general among the Hebrews (see below). Silver has its veins (Job xxviii. 1). It is not found on the surface, nor in river-beds, like gold; but it must be taken with hard labor from the depths of the mountain. Strangely enough, the Septuagint translates "kasifya," in Ezra viii. 17, according to the meaning of the root: *ἐν ἀργυρίου τόπῳ*, "place of silver," that is, Ctesiphon.

Copper ("neḥoshet"): The Hebrews probably knew copper only in its natural state, and not as bronze, which is copper alloyed with tin, unless the copper ore was found mixed with tin. According to one hypothesis, the Biblical-Hebraic "sefer" means "brass" or "bronze" ("J. Q. R." xv. 102). The term ברונזא ("bronze") occurs only in a late Jewish work ("Seder ha-Dorot," *s.v.* דוד, following "Shalshelet ha-Ḳabbalah," ed. Amsterdam, p. 8b), where the metals collected by David for the building of the sanctuary are enumerated (comp. Eusebius, "Præparatio Evangelica," ix. 4). Bronze tablets are mentioned in I Macc. viii. 22; xiv. 18, 26; and in Antioch tablets of the same metal informed the Jews of their rights. The altar was covered with copper, which did not melt, although fire was continually burning upon it (Lev. R. vii.; Tan., Terumah, 11). A bronze serpent (Num. xxi. 9; II Kings xviii. 4) is mentioned, and the proper name "Nehushta" (II Kings xxiv. 8), the hyssop represented in bronze (Parah xii. 5), and shells of bronze (*κόγχη*; Yelammedenu, in "'Aruk," *s.v.* קונכי) are noteworthy. See Copper.

Iron ("barzel," "parzel"): The mountains of Palestine contained iron ore (Deut. viii. 9). Its value was less than silver and more than stones (Isa. lx. 17). As was also the case in early times among the Greeks and Romans, iron was little used by the Hebrews; and it is mentioned only four times in the first four books of Moses (see Iron). Many understand the word "paldah" (Nah. ii. 4) to mean "steel," a preparation of iron; but the correctness of this interpretation is uncertain. Iron can be broken in pieces with a hammer. In this it is a symbol of the Torah, which has numerous attributes and characteristics (Suk. 52b; see Tos. *ib.*). A teacher of the Law must be as hard as iron (Ta'an. 4a). To forge and harden iron it must be put red-hot into cold water (Shab. 41a). Iron was heated on coal; and there are halakic regulations for doing this on the Sabbath (*ib.* 130a). Iron as well as lead was used on the yokes of animals (Kelim xiv. 4, 5). The Rabbis were acquainted with the magnetic stone which attracts iron (Soṭah 47a, "eben sho'ebet").

Tin ("bedil," from a root meaning "to separate"): The name itself indicates that the metal is not a pure one, but consists of parts separated from other metals, perhaps the lead in bars of silver (so Delitzsch on Isa. i. 25, where the word is used in the plural with "sigim"; Ibn Ezra rightly observes that no other names of metals occur in the plural); compare the Latin "stannum" (Pliny, "Historia Naturalis," xxxiv. 47); German, "werk"; and English, "alloy." That "bedil" denotes some particular metal is evident from passages like Num. xxxi. 22 and Ezek. xxii. 18, 20; xxvii. 12, where it is mentioned along with other metals; and according to the Septuagint this metal was *κασσίτερος* = "tin," a translation which Luther has throughout his version. Among the Romans, until the fourth century, tin was called "plumbum album." The Jews were probably acquainted with tin through the Phenicians, who brought it from their European colonies (from Britain [?]; see Gutschmid, "Kleine Schriften," ii. 55). The instrument used in summoning the people to synagogue in Babylonia was of tin (Pethahiah of Regensburg, p. 14, ed. London, 1856). Beautiful tin Seder platters are still in existence.

Lead ("'oferet"; Aramaic and Neo-Hebrew in Mishnah and Talmud, "abar," "abra"): Lead is mentioned in Num. xxxi. 22; Ezek. xxii. 18, 20; also in Ezek. xxvii. 12, where it is referred to as an export of Tarshish. Lead was obtained direct from the mines (Ḥul. 8a). It is the symbol of weight (Ex. xv. 10). Tradition relates that the river-beds near Jerusalem were lined with lead (Letter of Aristeas, ed. Wendland, § 90; comp. "Seder ha-Dorot," i. 115, Warsaw, 1891). White lead (Persian, "sapidag" [see "Z. D. M. G." l. 6, 43]; Syriac, "aspedka") occurs in the "Halakot Gedolot" and elsewhere in the literature of the Geonim as "alsefidag" (see Kohut, "Aruch Completum," iv. 82). A wire of lead ("petilah shel abar"; Sanh. 52a) was used in killing those condemned to death by fire. The eaves of houses were made of lead (Miḳ. vi. 8).

Antimony or **Stibium** ("puk" = "eye-paint" [comp. "Z. D. M. G." v. 336]; now called "kuḥl" in the Orient; hence the verb "kaḥal" [Ezek. xxiii. 40]; often mentioned in the Talmud and Midrash [*e.g.*, Shab. viii. 3]): One spoke of "enlarging" the eyes with paint (Jer. iv. 30, R. V.) or of painting them (II Kings ix. 30). The meaning of Isa. liv. 11 is disputed. According to Saadia, paint is meant here also; thus the meaning would be that the stones shine like women's eyes. More modern scholars read "nofek." Wisdom xiii. 14 interprets it to mean that on feast-days the faces of the gods were colored red with minium.

Electrum: A translation given by many for "ḥashmal" (Ezek. i. 4, viii. 2); the English versions have AMBER. Bochart ("Hierozoicon," iii. 893) takes it to be the aurichalcum of the ancients. The Talmud has a haggadic interpretation for it (Ḥag. 13a; comp. Munk in "Guide des Egarés," ii. 229). Omitting "ḥashmal" as not being the name of a metal, Moses Cohen (on Ibn Ezra on Isa. i. 25) says that there are seven kinds of metals mentioned in the Bible.

Metals in the Talmud.

A general name for metals, "matteket" (plural, "mattakot"; Kelim xiii. 7, xiv. 1; Ḥul. i. 6), from the root "matak" = "natak" (Targ. to I Kings vii. 16, 23), is first found in the post-Biblical literature of the Jews. מטיל occurs in the Middle Ages ("R. E. J." xliii. 83). Roman "metalla" in Spain are mentioned in I Macc. viii. 3. By way of punishment Jews were often exiled to Roman "metalla," *i.e.*, mines. A rather comprehensive word is גרומי ("broken pieces of iron"; Jastrow, "Dictionary," p. 266), from which גרומני (B. B. 89b; comp. "Halakot Gedolot," ed. Hildesheimer, p. 421) would seem to mean "iron-monger." Other names for metals which occur are the following:

Argentum or **Argentarium** (Latin): Table-silver; occurs often in the Midrash (Krauss, "Lehnwörter," ii. 126). A similar word is "chrysargyrum," a kind of money (see below).

Arsenicon (Greek): A chemical element which occurs naturally together with sulfur and metals. In the Talmud (Ḥul. 88b), Syriac, and Arabic it is called "zarnikh."

Asimon (Greek, *ἄσημον*): In Mishnah, Talmud, and Midrash, an unstamped (silver) coin (Krauss, *l.c.* p. 86). The word may, however, be related to the Syriac "sema," which means simply "silver" (Payne Smith, "Thesaurus Syriacus," p. 2494). By "asem" the Egyptians indicated a compound of gold and silver (Greek, *ἤλεκτρον*); and the Septuagint translates the Hebrew "ḥashmal" (see above) similarly.

From tannaitic times dates a regulation forbidding the making of weights out of "ba'aẓ" (see below), lead, tin (*κασσίτερος*), and other metals, because they gradually wear away to the disadvantage of the buyer (Tosef., B. B. v. 9 [ed. Zuckermandel, p. 405]; B. B. 89b); in the text of the "Halakot Gedolot," p. 421, אספרדא also is found among the forbidden metals. Still Immanuel Löw reads more correctly אלספידאג (= "white lead"; see above) instead of אלא אספרדא.

Ba'aẓ: This metal, mentioned above, is probably a kind of tin (comp. Kelim xxx. 3; Targ. to Ezek. xxii. 18, and Targ. Yer. to Num. xxxi. 22). Ba'aẓ ranks above lead and *κασσίτερος* (Men. 28b). It is doubtful whether "abaẓa" (Targum for "bedil") is related to it (see commentators on Kelim x. 2). Ba'aẓ was used for sealing documents (Targ. to Jer. xxxii. 11, 14).

Ḥalḳoma (Greek, *χάλκωμα*): Brass or copper; mentioned often in the Targum (Krauss, *l.c.* p. 299); especially bows of brass are mentioned (comp. the cognomen "Haliḳopri" = *χαλκοπάρειος* = "the man with a brazen face" (Krauss, *l.c.* p. 251). A similar analogy was: "A scholar is firm as iron" (Ta'an. 4a). Corinthian brass, celebrated in antiquity (קלונית), is mentioned in the Talmud (Krauss, *l.c.* p. 543), as well as by Josephus ("Vita," § 13). The Syrian translates Ezra viii. 27 similarly. *Χαλκο Λίβανον*, in Rev. i. 15, ii. 18, can hardly mean anything else than "brass of Lebanon."

Gruti (Greek, *γρύτη*): Pieces of metal (Krauss, *l.c.* p. 183). Perhaps the above-mentioned גרומי came from it (comp. *γρυτοπώλης* = "dealer in old iron," in Wilcken, "Ostraka," i. 381).

Ḥararah (Kelim xi. 3): Lumps of metal after casting.

Karkemisha: An Aramaic word of unknown origin, occurring in the Targum (Targ. Yer. to Num. xxi. 22; Job xix. 24), and meaning "lead."

Milela (Ket. 67a): Gold ore as broken in the mine (Jastrow, *l.c.* p. 793).

Niska: A bar of gold or silver; occurs a dozen times in the Babylonian Talmud (Jastrow, *l.c.* p. 917). According to J. Halévy (in "M. Scienc. Ling." xi. 73), "niska" is Sanskrit, and means "money-bag." The Greek *βῶλος* also indicates "lumps" or "bars" (Krauss, *l.c.* p. 141; comp. the Greek *μύδρος* = Latin "massa" in Blümner, "Technologie," iv. 219).

For sheet metal there was likewise a term from the Greek, פיטלון (*πέταλον*; Krauss, *l.c.* p. 441), for which "ṭas" is used elsewhere. Still unworked pieces are called "golemim" (Kelim xii. 6).

'Eshet and **'Ashashit:** Especially frequent terms (Kohut, *l.c.* vi. 281; Jastrow, *l.c.* p. 1127), meaning "lumps" or "plates" or something similar (comp. Yoma 34b). Plates of iron were warmed (for the high priest); iron plates are spoken of also in 'Ab. Zarah 16a. It is therefore natural to connect these words with the Biblical Hebrew "'eshet" (Ezek. xxvii. 19) = "hard iron"; since the idea "hard" seems certainly to be contained in it. In Men. 28b it is stated that the lamp of the sanctuary might be made of "'eshet" as well as of gold; but "'eshet" can not mean "iron," since it is classed above silver, unless indeed iron on account of its rarity was more valued than silver or even than gold. The metal must also have cast a reflection; for the lamp itself ("candela") is called "'ashasit." The plates, whether of iron, silver, or gold, must, therefore, have been highly polished, somewhat like the ancient mirrors.

Obryzon (Greek, *ὄβρυζον*): Pure gold; a term occurring once in the Targum (Krauss, *l.c.* p. 14), and used also in Syriac and Arabic. Χρυσάργυρον, money called "gold-silver," occurs also in rabbinical writings (Krauss, *l.c.* p. 298).

Paliza (Arabic, "falaz"; but see Frankel, *l.c.* p. 153): A kind of bronze. Samuel (in the 3d cent.) bought a golden dish which was offered him as bronze (B. Ḳ. 113b).

Stomoma (Latin, from the Greek *στόμωμα*; in Ber. 62b, **אצטמא**): A term meaning sometimes the tempering of iron, sometimes steel itself. The expression is found also in Syriac, Mandæan, and Arabic; the genuine Arabic is "shaburkan" (Löw, in Krauss, *l.c.* p. 120; according to a passage quoted there, tin was also so tempered. Concerning the method see Blümner, *l.c.* iv. 343). Jäger, Reichenow, and Frenzel, in "Handbuch der Zoologie," etc. (ii. 510, Breslau, 1880), state that the art of changing iron to steel was practised by the Jews.

Sulfate of Iron: Used for ink; *χάλκανθος* = "vitriol"; often mentioned by the Rabbis (Krauss, *l.c.* p. 549).

Marteka: Silver-slag (Giṭ. 69b).

Manufacture.

For the working of metals the Hebrews had to rely wholly on the Phenicians, as the history of the building of Solomon's Temple indicates. In Saul's time the Hebrews had armorers who were very unpopular with the Philistines (I Sam. xiii. 19, 20); and at the fall of Jerusalem smiths and locksmiths ("ḥaras" and "masger"; II Kings xxiv. 10) are mentioned.

The tools used were: the hammer or ax ("pa'am"; Isa. xli. 7; comp. *ἀκμωμ* in Sirach [Ecclus.] xxxviii. 33; other tools are mentioned, *ib.* xxxviii. 13, xlviii. 17; also "maḳḳabah" in Isa. xliv. 12; "paṭṭish," *ib.* xli. 7; and "halmut" in Judges v. 26); tongs ("melkaḥayim"; Isa. vi. 6); hatchet ("garzen"; Siloam inscription and Deut. xix. 5; this makes the word "barzel" in II Kings vi. 5 mean "tongs," whereas it usually denotes only "iron"); bellows ("mappuaḥ"; Jer. vi. 29; comp. Isa. liv. 6); fining-pot ("maẓref") for silver and a (melting) furnace ("kur") for gold (Prov. xvii. 3), whence the designation "furnace," for Egypt (Deut. iv. 20; comp. Isa. xlviii. 10), is derived. A prophecy of Ezekiel's (Ezek. xxii. 18–22) rests wholly on the technical process of metal-casting.

In Talmudic times there was used the anvil ("saddan" = "block"; Gen. R. x.), the "base" ("taḥtit"; Kelim xvii. 17) for forging, which was beaten upon with a hammer. "To beat with the hammer" ("makah ba-paṭṭish") is a very frequent expression in rabbinical literature. In the opinion of the Rabbis, tongs ("ẓebet") were created directly by God as the final act of creation (Ab. v. 6); compare the tongs ("yattukin" and "parakin" in Kelim xii. 3) used in metal-casting. There were used also the spade ("ḳardos," in Ps. lxxiv. 5, 6; comp. Ab. iv. 5), the shovel ("mara" = *μαῤῥον*), the ax ("ḥaẓina"), and the hammer ("ḳornos" = *κέαρνος*). For grinding a peculiar tool was used ("mashḥezet"; Kelim xvii. 17; comp. "yaḥad" in Prov. xxvii. 17). Iron sledges ("masreḳot shel barzel"; Ber. 61b; comp. Giṭ. 57b) are mentioned as instruments of torture.

The passage quoted from Ezekiel (xxii. 18–22) illustrates the manipulation of metals. The ore was gathered and thrown into the furnace, and the fire was blown to melt it ("natak," substantive, "hittuk").

Manipulation.

To rid the cast of slag ("sig," "sigim") the metal was refined again in the fire ("ẓaraf," "zaḳaḳ"). To aid the process of melting, a kind of soap ("bar," "barit" = "sal alkali," "potash"; see Luzzatto on Isa. i. 25) was thrown into the furnace. Hence a distinction was made between unrefined silver ("kesef sigim" is probably the term; Ezek. xxii. 18) and refined silver ("kesef mezuḳḳaḳ" in I Chron. xxix. 4, or "ẓaruf" in Ps. xii. 7). After the metal had been purified it was tested ("baḥan"). Smelters and gold-workers in general were called "refiners" ("ẓorefim"; Neh. iii. 32; comp. *ib.* verse 31); there were also ironsmiths ("ḥarashe barzel"; II Chron. xxiv. 12) and coppersmiths ("ḥarash neḥoshet"; I Kings vii. 14). Copper could be worked in various ways; there were shining copper (yellow bronze?; "neḥoshet muẓhab" in Ezra viii. 27), polished copper ("neḥoshet ḳalal" in Ezek. i. 7; Dan. x. 6), and probably gilded copper also.

Perhaps certain places in Palestine derived their names from the foundries existing therein, *e.g.*, "Zarephat" (I Kings xvii. 9) and "Misrephoth" (Josh. xi. 8, xiii. 6). Malleable metals, such as gold, were made into plates (רקע) from which were cut threads or wires ("ḳiẓẓeẓ petilim"; Ex. xxxix. 3). The important art of soldering was also known ("debeḳ"; Isa. xli. 7). At the time of Solomon there was a special place for casting ("yaẓaḳ"; comp. "muẓẓaḳ" in Job xi. 15). For the sanctuary "scoured" copper ("moraṭ"; I Kings vii. 45, 46) was used, while for the Tabernacle in the wilderness the metal was not cast, but hammered into shape (comp. "miḳshah"). As the excavations at Mycenæ show, this process was known before casting, and was in use even in prehistoric times. The Hebrews knew also how to make gold and silver articles by incrustation ("ẓafah," "ḥafah").

Ornaments, Weapons, and Utensils.

Ornaments of gold and silver are frequently mentioned in the Bible (see COSTUME). The Hebrews had metal mirrors ("mar'ot"; Ex. xxxviii. 8; comp. Blümner, *l.c.* iv. 265). Several metal articles recorded in the Bible and Mishnah are mentioned together in Kelim xi. 8: *e.g.*, weapons (helmet, lance, *νικών*, greaves, cuirass), women's ornaments ("golden city," *i.e.*, a kind of crown with an image of Jerusalem), necklaces ("catellæ"), nose-rings, finger-rings with or without seals, metal threads, etc. Besides, there were the sword ("ḥereb," "sayif"), knife, dagger ("pugio"), sickle, scissors, hair-curlers (*καλλιγραφή*), etc. (Kelim xiii. 1, 2). The mortar ("maktesh"; Prov. xxvii. 22) was usually of copper, probably for sanitary reasons, because copper does not rust; the pestle (Biblical "'eli"; Aramaic, "bukna"), of iron. The iron pestle breaks the copper mortar ("asita"; Niddah 36b). Mention should also be made of: the hoe ("mafselet"), the cutting-knife (*σμίλη* = Hebr. "sakkin," "magrefah"), the metal funnel (*πρόχοος* = "aparkas"; Kelim xiv., end), and the furnace and hearth of metal (*ib.* v. 11). From this last arises the expression "copper bottom" of the furnace (*ib.* viii. 3).

History.

The wealth of the Patriarchs in gold and silver is often emphasized (Gen. xiii. 2, xxiv. 22). According to a legend, Abraham built himself a high iron tower (Soferim ix.). The Israelites took articles of silver and gold with them out of Egypt (Ex. xi. 2, xii. 35); and the Midrash on this passage (Tan., Bo) states that they melted the idols of the Egyptians into lumps of metal. For the golden calf and for the Tabernacle the precious metal was used in large quantities. Many fabulous stories are told of the wealth of Korah, as also of that of Joseph. David's and Solomon's wealth in gold has already been spoken of. Solomon's throne was especially costly (I Kings x. 18). On the other hand, some of the later Jewish kings were so poor that they often used copper instead of gold. The copper pillars of Solomon's Temple are said to have been taken to Rome; but those taken could have been only from Herod's Temple. Benjamin of Tudela, who saw them in Rome, states that on the day of mourning for Jerusalem they wept and exuded sweat. Moreover, the pillars of the Temple (Herod's) are described as of silver, gold, copper, tin (בדיל), and iron ("Seder ha-Dorot," ed. Warsaw, i. 92a). Antiochus IV. stole much gold and silver from the Second Temple (I Macc. i. 21–24); and Herod the Great enriched himself by plundering the alleged graves of the kings (Josephus, "Ant." vii. 15, § 3; xvi. 7, § 1). All the gates of Herod's Temple were of gold with the exception of the Nicanor Gate, the copper on which, however, shone like gold (Mid. ii. 3). It is said that Nicanor had copper gates made in Alexandria for the Temple, and that they reached Palestine only by a miracle (Yoma 38a; Yer. Yoma ii. 4). At the time of Herod, Menahem, the president of the Sanhedrin, brought eighty men in golden breastplates before the king (Ḥag. iii. 2). The Roman general Crassus took away a golden beam from the Temple of Jerusalem (Josephus, *l.c.* xiv. 7, § 1). The cymbals in the Temple at Jerusalem deserve mention (Ps. cl. 5; Sheḳ. v. 1, צלצל) as being made of metal. A golden grape-vine was placed on the gate of the Temple (Mid. iii. 8).

Miscellaneous Conditions.

The high priest John, *i.e.*, King John Hyrcanus, did away with "the noise of hammering" in Jerusalem (Ma'as. Sh. v. 15; otherwise interpreted in M. Ḳ. 11a). There are halakic regulations as to whether neighbors were required to endure the noise of hammering (see "Paḥad Yiẓḥaḳ," *s.v.* אומנות חבירו). Founders or gold-workers figure in later times also (*ib. s.v.* אומניות). When the table service broke at the court of King Jannæus it was replaced by the gold-workers in Jerusalem (*ib.*). Women liked to wear golden ornaments; hence it is said that "goldsmiths have much to do with women" (Ḳid. 82a). R. Ishmael b. Elisha had a golden tooth made for a Jewish maiden (Tos., Niddah, 4b, 66b). Earth instead of gold was put into the chest of Naḥman of Gimza. R. Joshua b. Hananiah was a maker of needles (Yer. Ber. 7d; Yer. Ta'an. 67d; see "'Aruk," *s.v.* פחמי). The teachers with the cognomen "Nappaḥa" were probably blacksmiths. The word "paṭṭish" (= "hammer") occurs also as a proper name; in the Talmud it has a symbolical meaning. At the time of Bar Kokba there were many Jewish smiths, and at Sichnim metal-workers were especially numerous (Grätz, "Gesch." 3d ed., iv. 136, 145). The workshops of the goldsmiths are mentioned in the time of the Mishnah (Tosef., Kelim, middle extract, vii. 10). At Jerusalem the gold-workers seem to have formed a separate gild ("zehabim"; Tosef., Suk. iv. 6). The word "ṭarsiyyim" was formerly translated "ironsmith" (Schürer, "Gesch." 3d ed., ii. 65, note 212).

In the Middle Ages.

In the Middle Ages there were makers of metal implements (Abraham, "Jewish Life in the Middle Ages," Index, London, 1896). It is interesting to note that Jews took part in the Bristol copper trade (*ib.*). The Jews engaged extensively in coinage also (see Minters). Strangely enough, the writings on alchemy in the Middle Ages circulated under the name of Moses; the word מי זהב (Gen. xxxvi. 39), really a proper noun, was explained to mean "the one who changes copper into gold" (Ibn Ezra, *ad loc.*; comp. a work on מי זהב in Steinschneider, "Hebr. Uebers." No. 577). Miriam, Moses' sister, is said to have been the discoverer of the chemical known as bain-marie (see Jew. Encyc. i. 329, *s.v.* Alchemy). A Jew taught the English how to smelt copper ("Tr. Jew. Hist. Soc. Eng." iii. 12). In northern Africa the Jews were the only locksmiths, goldsmiths, metal-founders, and minters (see Africa). An Italian traveler of the sixteenth century relates that the greater number of Karaites in Jerusalem had for a long time been metal-founders ("Jerusalem," v. 86). From the very beginning Jews took an active part in the art of printing; and in some instances the Rabbis themselves cast the type for the printing of their own works (*ib.* v. 286). Toward the end of the eighteenth century there were in Berlin many Jewish die-sinkers and engravers (see "Kaufmann Gedenkbuch," pp. 629–653; comp. "Mitteilungen . . . für Jüdische Volkskunde," ix. 12 *et seq.*). The word "Ghetto" is said to have been derived from the Venetian mint, beside which the Jews lived.

Halakic Bearing.

Just as on the occasion of the war with Midian the Bible established laws of cleanliness in regard to metals, so later in rabbinical literature metal vessels are discussed in their relation to the Levitical laws of cleanliness. Metal vessels, whether flat or hollow, become unclean (vessels of other materials, if flat, do not become unclean); if they break they become clean; but when mended the earlier uncleanness returns (Kelim xi. 1). Each metal dish which has a particular name may become unclean (*ib.* 2). If clean iron is united with unclean iron, the larger constituent decides as to purity (*ib.* 4). All implements of war, all ornaments worn by women may become unclean in so far as they have a hollowed part, thus constituting a vessel (*ib.* 8). The rule that a firmly fitting cover protects from uncleanness does not apply to ba'aẓ (see above) and lead, because the cover only lies on top, but does not close the vessel hermetically (*ib.* x. 2). If metal vessels which have become unclean from contact with a corpse receive the purificative sprinkling, then break and are melted together and resprinkled, all on the same day, they, in the opinion of some, become clean (*ib.* xiv. 7). But these rules become lost in a sea of details, and further information on the subject must be obtained from the codes (Maimonides, "Yad," etc.). See KELIM.

Value of Metals.

In the only passage in the Bible in which an almost complete list of the metals is given their order of value is as follows: gold, silver, copper, iron, tin, and lead (Num. xxx. 22). Generally, however, in the Bible, as also on the Egyptian monuments, silver is named before gold, to which metal it was preferred, owing to the greater difficulty in obtaining it. However, in estimating Solomon's wealth, it is said of silver that "it was nothing accounted of." Consequently, even at that early time gold must have been estimated at its true value (I Kings x. 21).

From the Talmudic description of the lamp (Men. 28b) the following classification of the metals according to their value results, beginning with the most precious: "'eshet" (see above), gold, silver, ba'aẓ (see above), lead, tin (*κασσίτερος*). The spears of the Hasmonean kings were of iron plated with ba'aẓ (*ib.*); hence iron stood at the foot of the list, but only in regard to value. In respect to usefulness it stood high among the Jews. Among the Greeks and Romans iron is always ranked above tin and lead (Blümner, *l.c.* iv. 8). The coinage of Oriental peoples rests on a gold basis; that of the Phenicians and the Greeks on a silver one; that of the Romans on one of copper (*ib.*). The Bible fixes silver as the medium of exchange (Levy, "Gesch. der Jüdischen Münzen," p. 8); so that in the matter of money, as in other things, the Hebrews were dependent on the Phenicians (comp. Schürer, *l.c.* ii. 53). A mishnah in this connection is instructive (B. M. iv. 1). It states which metal is to be regarded as a commodity, which as coin. "Silver buys gold (that is, as soon as the buyer has the gold coins—the commodity—in his hands, he must pay for them with silver coins); gold, however, will not buy silver. Silver will buy copper; but not vice versa. Stamped money ("maṭbea'") will buy asimon; but not vice versa."

Symbolic Meaning.

Among the figures of speech in the Bible in which metals occur, there is the elaborate symbolism of Dan. ii. and vii., where the kingdoms of the earth are compared to metals. This idea was thoroughly exploited throughout the Middle Ages (see Driver, "Daniel," pp. 94-97, Cambridge, 1900); comp. Ex. R. xxxv. 5: "Gold is Babylon; silver is Media; copper is Greece; iron is not mentioned either at the time of the First or of the Second Temple, since it symbolizes Edom [Rome], which had destroyed the Temple; hence Edom can bring God no present in the Messianic kingdom." Iron is the symbol of war (Mek., Yitro; Tosef., B. Ḳ. vii. 6); the relation between gold and copper altars should be judged accordingly (Midr. Tadshe, xi.). A phallus was made of copper, or of gold (Ezek. xvi. 17; Isa. lvii. 8). According to Philo, who developed at length the symbolism of metals, gold denoted wisdom (*σοφία*; Philo, "De Leg. Alleg." ed. Mangey, i. 25) or reason (*idem*, "De Vita Moysis" iii. 4); copper denoted perception (*αἴσθησις*; *ib.*). From this Bähr ("Symbolik des Mosaischen Cultus," i. 280) tried in vain to prove the existence of an elaborate symbolism of metals among the Hebrews. Maimonides says of the Sabians that they associated a particular metal with each of the planets and made their statues to the latter of the appropriate metal (Chwolson, "Ssabier und Ssabismus," ii. 658 *et seq.*). In ALCHEMY "moon" is equivalent to silver; "sun," to gold. In the Midrash iron is the symbol of war (Mek., Yitro, 11; B. Ḳ. vii. 6). The golden altar in the sanctuary symbolized the soul; the copper one, the body (Midr. Tadshe, xi.). "A scholar who is not hard as iron is no scholar" (Ta'an. 7a); R. Sheshet was such a hard scholar (Men. 95b). A scholar appears to an idiot like a golden pitcher; if he has spoken to the idiot once he seems like a silver pitcher; and if he derives benefit from the fool he is only an earthen one (Shab. 52b). The strict ban was called "iron fate" ("gizra de-farzela"; B. Ḳ. 81b).

In sorcery and superstition the metals were important agents. If any one was bitten by a mad dog he was to drink out of a copper tube for twelve months; in a severe case he was to use a golden one (Yoma 84a). Just as imprecations were usually written on leaden tablets in Rome (R. Wünsch, "Sethianische Verfluchungstafeln aus Rom," Leipsic, 1898), so the Jews wrote, and still write, their AMULETS preferably on metal tablets. Coins or gold ornaments were put in the shoes or clothing of a bridegroom, with the idea that gold would take away the power of witchcraft (responsum quoted in Glassberg's "Zikron Berit la-Rishonim," p. 149, Berlin, 1892). If copper, iron, tin, lead, or any other kind of metal is thrown into the fire and some of the pretended stone of wisdom is rubbed off into the metal, gold refined seven times will come out of the fire (Johanan Allemanno, in "Kerem Ḥemed," ii. 48; Glassberg, *l.c.* p. 204). Even to-day Jews give heed to the so-called "tekufah." Water may be kept from becoming poisonous if it comes in contact with iron (S. Landau, in "Aruch," p. 1665; Grünbaum, "Gesammelte Aufsätze zur Sprach- und Sagenkunde," pp. 102, 144, Berlin, 1901; "R. E. J." xli. 147). For sorcery with metals see also "Sefer Yuḥasin," ed. London, p. 234a.

In Yemen to-day most people wear iron bands on their arms and feet and claim to feel strengthened thereby. The children wear around their necks a thick band of seven kinds of iron ("Eben Safir," p. 58b, Lyck, 1866). With this should be compared the metal amulets ("lamina") representing the serpent of Moses, which a sect of Jews wore early in the common era (Philastrius, "Hæres," § 21). In an apocryphal work ascribed to Cham, prescriptions on copper plates are spoken of (Fabricius, "Codex Apocr. N. T." i. 301). Indeed, Korah is said to have engaged in chemistry (Grünbaum, "Neue Beiträge zur Semitischen Sprach- und Sagenkunde," p. 171).

METAṬRON (Hebr. מטטרון; Greek, Μητάτωρ; Latin, "Metator"): Name of an angel found only in Jewish literature. Elisha b. Abuyah, seeing this angel in the heavens, believed there were "two powers" or divinities (Ḥag. 15a, above). When God wept over the destruction of the Temple, Meṭaṭron fell on his face and said: "I will weep; but weep not Thou." God answered and said: "If thou wilt not suffer Me to weep, I will go whither thou canst not come, and there will I lament" (Lam. R., Introduction, § 24; comp. Jer. xiii. 17). Meṭaṭron bears the Tetragrammaton; for Ex. xxiii. 21 says, "My name is in him." Yet he may not be worshiped; for the same passage says, "Exchange Me not for him" (dialogue between a heretic and a Babylonian teacher, in Sanh. 38b, below; Targ. Yer. to Ex. xxiv. 1 has Michael instead of Meṭaṭron).

Moses begs Meṭaṭron to intercede with God for him, that he may not die; but the angel answers: "It is useless; for I heard the words behind the veil, 'Thy prayer will not be answered'" (both editions of Tan., Wa'ethanan, 6). When God sorrowed for the death of Moses, Meṭaṭron fell down before Him and consoled Him (Grünhut, "Liḳḳuṭim," v. 105a), and when Moses died, this angel with three others, "the princes of wisdom," cared for him (Targ. Yer. to Deut. xxxiv. 6). The early commentators with good reason identified the prince of the world (Ḥul. 60a; Zeb. 16b; Sanh. 94a) with Meṭaṭron (Joël, "Blicke in die Religionsgesch." i. 124 *et seq.*). God instructs children in the Torah during the last quarter of the day; Meṭaṭron, during the first three-quarters ('Ab. Zarah 3b). It was this angel who caused Shamhazai to say before the Flood, "God will destroy the world" (Yalḳ. i., § 44). He is, moreover, Enoch, the great scribe (Targ. Yer. to Gen. v. 24; in Ḥag. 15a he is likewise represented as a scribe).

In Later Records.

These statements, found in the earlier sources, contain all the characteristic traits ascribed to Meṭaṭron in the later mystical works. The latter call him the "prince of the presence" (Jellinek, "B. H." ii., pp. xvi., 55 *et seq.*, v. 171; "Responsen der Gaonen," ed. Harkavy, No. 373, p. 372; comp. Isa. lxiii. 9), and "prince of the ministering angels" (Jellinek, *l.c.* v. 172). He is the "mighty scribe" (*ib.* ii. 68), the lord of all the heavenly hosts, of all treasures, and of secrets (*ib.* ii. 114, v. 174), and bears the lesser divine name (*ib.* ii. 61, 114, 117; v. 175). The Zohar defines his nature exactly by declaring that he is little lower than God (after Ps. viii. 6; Yalḳ. Ḥadash, 7, No. 51; comp. especially Jellinek, *l.c.* v. 174). He is identical in all respects with Enoch; the "Hekalot" (*ib.* v. 170–190), in which he is the chief personage, is called also "The Book of Enoch" (comp. *ib.* ii., p. xvi. and vi. 58: "Enoch whose name is Meṭaṭron").

Identical with Enoch.

In the Apocrypha likewise Enoch appears as the heavenly scribe (Book of Jubilees, iv. 23; II Enoch liii. 2), although elsewhere he is called Michael (Ascensio Isaiæ, ix. 21), while, as noted above, Targ. Yer. to Ex. xxiv. 1 substitutes the name of Michael for Meṭaṭron, which is found in the other sources. In the Hebrew writings Meṭaṭron fills the rôle of Enoch in the Apocrypha in bearing witness to the sins of mankind. Since both sources represent him as a youth, it may be assumed that the first versions of the Hebrew mystical works, though they received their present form in the geonic period, originated in antiquity, so that the conception of Meṭaṭron must likewise date from an early period.

Views as to Origin.

The views regarding the source of this conception differ widely. The name "Meṭaṭron," which, as stated above, occurs only in Hebrew writings, is in itself striking. The derivation from the Latin "metator" (= "guide") is doubtless correct, for Enoch also is represented as a guide in the apocryphal work which bears his name; and the Hebrew Book of Enoch, in which, however, reference to Meṭaṭron is constantly implied, says: "He is the most excellent of all the heavenly host, and the guide [Meṭaṭron] to all the treasuries of my [God]" (B. H. ii. 117).

Mysticism prefers obscurity, and intentionally chooses a foreign word instead of the well-known name of Enoch. Kohut identifies Meṭaṭron with the Zoroastrian Mithra; but probably only a few traits were borrowed from the latter. Sachs, Grünbaum, Weinstein, and others think that Meṭaṭron is identical with Philo's Logos; but L. Cohn, the eminent Philonist, contradicts this view. M. Friedländer, on the other hand, takes Meṭaṭron to be, both in name and in nature, none other than Horus, the "frontier guardian" and "surveyor of the frontier" of the early Gnostics. These divergent views clearly indicate that Meṭaṭron combines various traits derived from different systems of thought. Grunwald (in "Jahrb. für Jüdische Gesch. und Literatur," 1901, pp. 127 *et seq.*) has yet another solution for the problem of Meṭaṭron. The ancients had already noticed that the numerical value of the letters in the word "Meṭaṭron" corresponded with those of the word "Shaddai" (= 314), and "Meṭaṭron" is also said to mean "palace" ("metatrion"), and to be connected with the divine name מקום ("place"), etc.

In medieval mysticism Meṭaṭron plays the same rôle as in antiquity and in the period of the Geonim (passages in Schwab, *s.v.*), thus furnishing a further proof of the tenacity and stability of mystic and superstitious conceptions.

METEMPSYCHOSIS. See TRANSMIGRATION OF SOULS.

State of the Question.

METER IN THE BIBLE: The question whether the poetical passages of the Old Testament show signs of regular rhythm or meter is yet unsolved; the question involves principally Psalms, Proverbs, Job, and most of the prophetical books, with many songs and speeches contained in the historical books. The subject of strophic arrangement is not treated here, since it relates as much to the divisions of thought as to those of metrical form (see PARALLELISM).

No one can establish the metrical character of the whole of this literature, and no one can successfully deny that it is metrical in part. The former of these statements will be generally accepted; for those who wish to find meter in the Old Testament are obliged to make many emendations of the text. As the second statement is often controverted, the appeal must be made to a trained and unprejudiced ear (not eye). The case might rest on a single Psalm, the 54th, which is as metrical throughout as some familiar English poems. The following translation of verse 3 imitates accurately the flow of the original:

"O my God! by Thy name now redeem me,
And by all Thine omnipotence free me."

Collocations of Regular Accent.

The rime is unessential, though it is perfect in the Hebrew. The important matter is the regularity of movement, indicated by the symbol 3 + 3, which means that the verse consists of two equal stichoi separated by a cesura, each stichos having three tones. The movement may be termed either "rhythmical" or "metrical," for the two are identical, as Sievers has shown ("Studien zur Hebräischen Metrik," p. 25, Leipsic, 1901). It is just as erroneous to call such a Hebrew verse a hexameter as it would be to apply that term to its English equivalent; it is convenient to call each tone-section a foot, but even that designation must be explained as referring to rhythm, not to syllabic division. That which gives these feet their metrical character is not the accent, which only marks, not makes, the rhythm; it is the flow of time, as measured in waves or pulse-beats recurring at regular intervals. The time being equal, it matters not whether the syllables in the different feet are alike in number or not. In the example given they happen to correspond; each foot has the form × × –́ except that the two riming feet are of the form × × –́ ×.

Every kind of foot in this psalm is frequently met with in English poetry; take, for example

Ps. liv. 3, 4: × × –́, × × –́ ×, × –́. (Comp. Tennyson: "That he shouts with his sister at play.")
Ps. liv. 8, 4: –́ × ×, × × × –́. (Comp. "All in the valley of death.")

There are but three more variations in the psalm: –́ ×, × –́ ×, –́, which all occur in two consecutive lines from Coleridge's "Christabel":

–́ × –́ –́ × × –́
"Is the night chilly and dark?"
× –́ × –́ × –́ × –́
"The night is chilly but not dark."

This same measure (3 + 3) holds in Psalms liv., lxvii., and lxxxii., and it is a curious coincidence that verse 5 in each is extended to 3 + 3 + 3 tones, while nearly all the other verses have 3 + 3. Psalm c. begins with a single 3, has a triple 3 in verses 3 and 4, and ends, as does Psalm lxxxii., with a kind of Alexandrine. The remaining feet are 3 + 3. All these are short psalms, but several long ones are almost as strictly regular (*e.g.*, Ps. lxxx., lxxxi., lxxxv., xci.). Others follow prevailingly the scheme 4 + 4 (*e.g.*, Ps. xlvi., liii.), and there are still other combinations, as 2 + 2, 3 + 2, and 4 + 3.

Outside the Psalms there are many poems and long sections either completely or measurably regular, as Deut. xxxii., Ex. xv., Isa. xli. 1-10, and large portions of the Book of Job. But the great majority of the Psalms are very irregular, and some of them defy all metrical rules (*e.g.*, Ps. xlv., lv., lxiv., lxxi., lxxxvi., xcv., cii.). The common practise is to be censured, which, by conjectural emendation, alters the text in such cases to fit the assumed meter. Conjectures that approve themselves on critical grounds give, to be sure, one more sign of their correctness when they smooth rough meters; but no metrical system thus far proposed has proved satisfactory. An example or two may serve to soften the apparent dogmatism of this judgment. One of the most elaborate metrical systems is that of Sievers (1901), who analyzes 93 poems. Of these, 20 are psalms, but not a single rhythmically difficult psalm is included. Baethgen's commentary on the Psalms (3d ed., 1904) attempts to give some metrical account of each of the 150 Psalms. In the case of those noted above as difficult (and of many more) he frankly admits the difficulty, often confesses that it is insoluble, and in most other cases offers conjectures resting on an assumed regularity of the meter, whereas the very question at issue is whether any such regularity can be shown.

So far as the evidence extends at present, it can only be asserted that the Hebrew poets were acquainted with meter, and employed it very freely, changing at will from one form to another, within the same composition, but making the substance of their thought so far paramount over its form that they were often unwilling to wait for a perfect rhythmical expression.

History of the Question.

Metrical systems published before the nineteenth century are so mingled with subjective fancies that none of them is now worth considering; they were all patiently examined and thoroughly refuted by J. L. Saalschütz ("Von der Form der Hebräischen Poesie," Königsberg, 1825). J. J. Bellermann's little book on the subject ("Versuch über die Metrik der Hebräer," Berlin, 1813) is sound in principle, and its only important defects relate to the "moræ" (units of time) and the "sheva." Saalschütz corrected these defects, but erred in contending for a rhythm that descends (–́ × ×, –́ ×, etc.) instead of one that ascends (× –́, × × –́, etc.). Ernst Meier ("Die Form der Hebräischen Poesie," Tübingen, 1853) returned to Bellermann, and reduced the matter to greater simplicity through his folk-lore studies. His contribution has been unduly belittled, even by Kuenen; its chief mistake was in applying to all poetry what is true only of a part. Julius Ley ("Grundzüge des Rhythmus in der Hebräischen Poesie," Halle, 1875) supplied that defect by a fundamental investigation which gave a scientific basis to the whole subject. His system was cumbersome at first (1866), but he improved it under the criticism of thirty-five years. Bickell held the untenable theory that Hebrew meter is syllabic, like the Syriac, and is written uniformly in regular trochees or iambi. Hubert Grimme ("Psalmenprobleme," Freiburg, 1902) built avowedly on Ley's basis, but added a new doctrine of the moræ which is an improvement on the old, but which he has not been able to establish. In his earlier work he held correctly that the structure of the feet may vary in the same composition; at present he holds the opposite theory and employs it freely in textual emendations. Sievers was the first to trace out thoroughly the relations of Hebrew metrics to general metrics. That part of his system possesses permanent value; but its practical application is marred by the attempt at an impossible simplicity and symmetry which derives every foot from the anapest.

METHODOLOGY. See Talmud.

METROLOGY. See Weights and Measures.

METUENTES (lit. "fearing"): Term used in the Latin inscriptions by Juvenal for Jewish proselytes. It corresponds to the Greek term *σεβόμενοι τὸν Θεόν*, which occurs in Josephus ("Ant." xiv. 72, ed. Niese) and in Acts x. 2, 22; xiii. 16, 26, 43, 50; xvi. 14; xvii. 4, 17; xviii. 7, and to the Hebrew "More Yhwh," which, at an early date, likewise seems to have denoted proselytes (see II Kings xvii. 28, xxxii. 33). In the Psalms the expression is used for the whole body of pious persons outside the house of Israel (Ps. cxv. 11, cxviii. 4, cxxxv. 20; comp. Esth. ix. 27; Isa. lvi. 6), or perhaps for certain Gentiles who had adopted some of the Jewish customs, notably the observance of the Sabbath and abstention from forbidden meat. Paul refers to such at Antioch, Thyatira, Thessalonica, and Athens. About the Black Sea a large number of inscriptions have been discovered relating to "worshipers of the Most High God" who were also of the same class, though possibly their Judaic practises were not so pronounced as in the cases nearer Palestine (see Hypsistarians). A mocking crucifix found on the Palatine Hill at Rome has the expression ΣΕΒΕΤΕ ΘΕΟΝ (see Jew. Encyc. ii. 222, *s.v.* Ass-Worship). Mek., Mishpaṭim explains Isa. lvi. 6 as "those who fear Heaven." See Proselyte.

S. J.

METURGEMAN ("interpreter"): With the return of the exiles from captivity the religious instruction of the people was put into the hands of the Levites (Neh. viii. 7-9; II Chron. xvii. 8, 9; xxxv. 3). These functionaries were called מבינים ("teachers"). In all probability the language of instruction was still Hebrew (Friedmann, "Onkelos," p. 81, to the contrary). How long the Levites continued in the office of teachers and how long the Hebrew language remained intelligible to the masses are unknown; but at a later time, when Aramaic had become the vernacular, and religious instruction had ceased to be the exclusive privilege of the priesthood, the Levitic מבין ("teacher") gave way to the lay מתורגמן ("interpreter," "translator"), called also תורגמן or מתרגם. The official was paid probably by the community (comp. Pes. 50b; Rashi *ad loc.*). This seems, however, not to have been always the case, since the Halakah speaks also of a minor acting as meturgeman.

The weekly lesson from the Pentateuch and the Prophets was read by a member of the congregation, and the meturgeman had to translate into the vernacular the Pentateuchal lesson verse by verse; from the Prophets he translated three verses at a time. While the reader of the Hebrew text was forbidden to recite by heart, the meturgeman was not permitted to read his translation from a book, or to look at the Hebrew text when translating, in order that the people should not think that the translation was contained in the text. The meturgeman was also forbidden to raise his voice higher than that of the reader of the text. He did not limit himself to a mere literal translation, but dilated upon the Biblical contents, bringing in haggadic elements, illustrations from history, and references to topics of the day. This naturally required much time, to gain which the weekly lesson had to be short, so that the Pentateuch was finished only in a cycle of three or three and one-half years; while the portion from the Prophets was frequently abbreviated.

The free handling of the text, which frequently changed the translation into a sermon or homily, gave the meturgeman ample opportunity to introduce his subjective views into the lesson; and with the multiplication of sects this became distasteful to the Rabbis. The increase in the opposition to the meturgeman led to the fixation of the Targumim and to the demand that the meturgeman keep strictly to mere translation. But a mere translation satisfied neither the public, who had known the text from early school-days, nor the meturgeman, who was deprived of an opportunity to parade his knowledge and to display his oratorical gifts. As a consequence the "darshan," or preacher, was introduced; and the literal translation fell gradually into disuse.

While the meturgeman as Bible interpreter was a purely Palestinian institution, as interpreter of the Mishnah he was known also in Babylonia, where he was called Amora. The head of the academy, while seated, would tell him in Hebrew and in a low voice the outline of his lecture; and the meturgeman would in a lengthy popular discourse explain it in the vernacular to the audience. It is noteworthy that the meturgeman, whether explaining Bible or Mishnah, was not held in much esteem by the public; and in Talmud and Midrash he is frequently referred to with contempt. See also Targum.

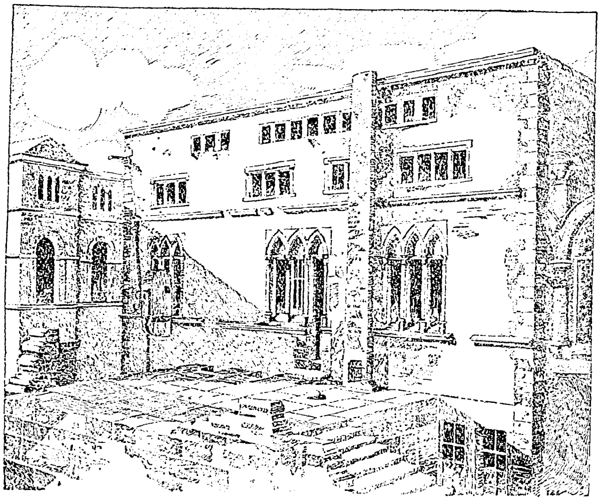
S. S. C. L.

METZ: German fortified city in Lorraine; it has a population of 58,462, including 1,451 Jews. According to ancient chronicles, Jews had settled in Metz in the year 221; they enjoyed municipal freedom, and lived on very good terms with the Christians. It is stated also that when St. Eucaire, Bishop of Toul, had undertaken to convert the Jews, the emperor Julian, who was at Metz at the time, condemned the bishop to prison for his untimely zeal.

Early Conditions.

Under the Merovingians and Carlovingians there were Jews at Metz, engaged as agriculturists, merchants, artisans, and especially as goldsmiths and physicians. Jews and Christians formed intimate friendships; the clergy dined in the homes of the Jews, and more than one intermarriage resulted from this friendly intercourse. The cordiality of these relations was increased by the efforts made by the Church councils to disturb it. At a council held at the monastery of St. Arnould at Metz May 1, 888, at which Balbodus, Archbishop of Trèves, presided, and which was attended by Dadou, Bishop of Verdun; Arnold, Bishop of Toul; and Robert, Bishop of Metz, on the complaint of the dean of the cathedral Jews were forbidden to drink or eat with, or to marry, Christians.



Ancient Synagogue at Metz.
(From Frauberger.)

These vexations lasted but a short time; under the successors of Charles the Bald, Jews might own real estate, and this would lead to the supposition that they had other municipal rights. Bishop Adalberon in 945 commanded David, a Jew of the diocese of Metz, to restore to the monastery of St. Glossinde a vineyard of which he had secured possession. This Adalberon, who occupied the episcopal see until 984, was always very favorable to the Jews, who revered him. According to the chronicles, at his death "the Jews wept aloud; and mourned and lamented." Some years later they showed similar feeling at the obsequies of another virtuous and tolerant archbishop—Mattard. The dukes of Lorraine also took them under their protection and treated them with the greatest consideration. Thanks to this social peace, they devoted themselves to study, and among them were scholars called "the sages of Lorraine" (חכמי לותר); celebrated rabbis, such as R. Simon ha-Gadol, R. Machir, Leontin, R. Eliezer (the author of the "Sefer Yere'im"), and especially Rabbenu Gershom Me'or ha-Gadol.

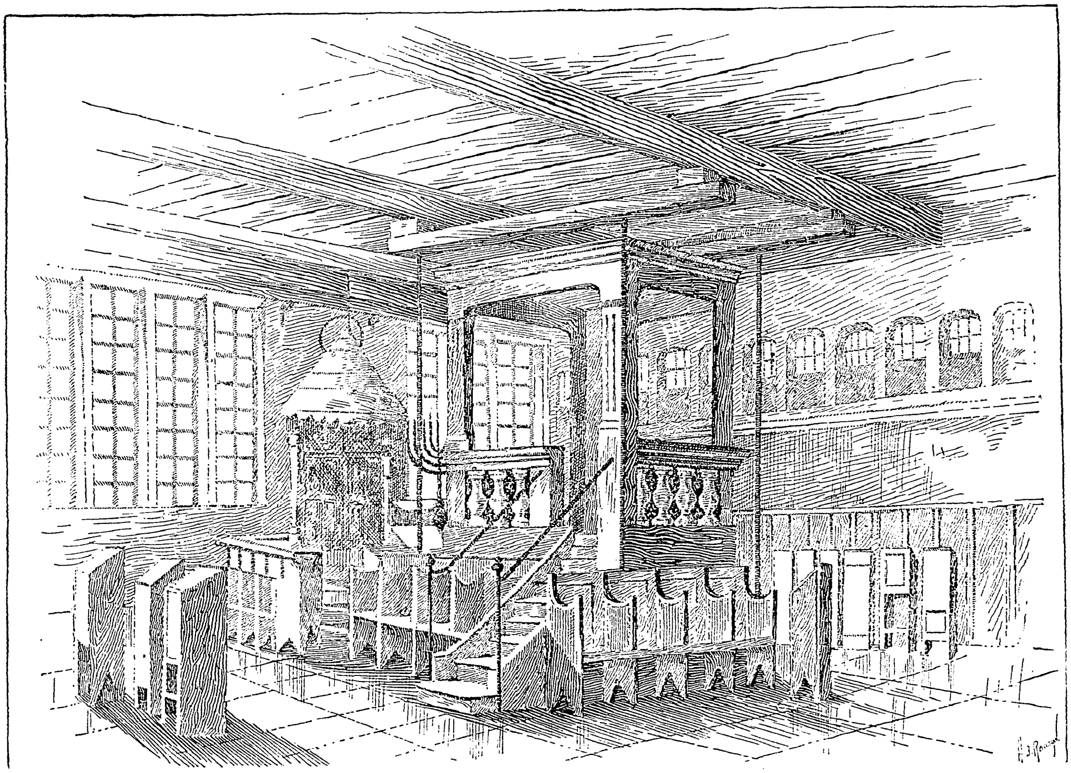
Period of Persecution.

Under French Rule.

Persecutions, especially during the Crusades, scattered the Jews of Metz. Those who afterward returned found a refuge there, for which they were obliged to pay thirty-four deniers, levied on them when they entered the city. Nevertheless, in 1365 they were expelled by the magistrates, who assigned their presence as the cause of the destruction by lightning of twenty-two houses. In 1567, after France had taken possession of Metz, some Jewish families were again admitted with the consent of the marshal of Vieilleville, and less than thirty years later they were organized into a community. In 1595 they met in general assembly and elected a communal board, to which they delegated all power and all authority in everything concerning administration and police, and the jurisdiction of civil cases. Of the six men composing this council the following three were rabbis: Isaac, son of Lazare Levy; Joseph Levy; and Solomon, son of Gershon Zay. The proceedings of this assembly, as well as those of the election, were submitted for the approval of the higher authorities, who on July 12, 1595, "by the grace of God, and with the consent of his majesty, and of Monsieur, the Duke of Epergnan," recognized those elected as the official representatives and the regularly appointed intermediaries of the Jewish community of Metz.

The community developed in influence and numbers; in 1614 it numbered 500; in 1624 there were 120 families, consisting of more than 600 individuals. The rabbi at that time was Moses Cohen of Prague. His nomination was confirmed by the Duke de Valette, peer and colonel-general of France and commanding general of the king in the city and citadel of Metz, "to undertake the above-mentioned charge and functions of rabbi." A fact that should be noticed is that throughout the Middle Ages the nomination of the rabbi required ratification by the state. In 1650 the rabbi was Moses Nerol; contrary to custom, and for some unknown reason, the council of the community did not ask the government to confirm his nomination. Louis XIV., during his visit to Metz Sept. 25, 1657, visited the synagogue and gave audience to the council of the trustees of the community as well as to the rabbi. The same day he signed letters patent for the privileges of the Jews, in which he warned them that in the future they would not be allowed to choose a rabbi without obtaining his consent.

As early as March 24, 1603, and Oct. 18, 1605, Henry IV. had granted the Jews letters patent, according to which he "took them under his protection, and permitted them to trade according to their franchises, liberties, and ancient customs." These letters patent were maintained, and the Jews' privileges were even increased, by Louis XIII. (Jan. 24, 1632), by Louis XIV., and by Louis XV. (July 9, 1718). Louis XIII. "rewarded them for their devotion and charity," and granted them a new law to remove all difficulties between them and the inhabitants of the city, in consideration of the services they had rendered the garrison of Metz during the civil wars. The letters patent granted by Louis XIV. and Louis XV. were ratified and registered by the Parliament of Metz (Sept. 3, 1718). Those of May 7, 1777, gave the Jews still greater liberties and spoke of them as citizens of the land. In 1782, when the Count of Provence, afterward Louis XVIII., went to Metz, he visited the synagogue, and the chief rabbi, Lion Asser (Aryeh Loeb ben Asher), in the name of the community, assured him of his homage and bestowed upon him the priestly benediction. This made a profound impression upon the count, and those about him were astonished to hear him praise the Jew. "Jew or Christian," he said, "what is the difference? I honor virtue wherever it is found."



Interior of an Old Synagogue at Metz.
(From Frauberger.)

The French Revolution was greeted with enthusiasm by the Jews of Metz. In 1792 the chief rabbi himself, Uri Cohen, already advanced in years, offered an example of patriotism by tendering his services for the defense of the city. It was he, also, who, after the victory of Valmy, set out at the head of the defenders of Thionville and, with Rolley, mayor of Metz, led them before the Ark, where, in an enthusiastic speech, he extolled the bravery of the Jews and declared the country had the right to count upon the cooperation of all its citizens. During the Reign of Terror the synagogue was closed, the sacred utensils used in the services were put under seal, and the courtyard was used for a pasture; the tombstones were taken from the cemetery and used for building purposes.

By the decrees of 1806 and of March 7, 1808, the Jewish creed was officially recognized, and in the creation of the seven consistories and grand rabbinates the district of Metz and the community of the city of Metz are mentioned.

In Recent Times.

The first chief rabbi was Mayer Charleville, who was followed by Joseph Gougenheim, Wittersheim, Aaron Worms, Lyon Lambert, and Lippmann. After the war of 1870 Lippmann, who was unwilling to surrender his allegiance to France, resigned his post. He was subsequently made chief rabbi at Lille. During this period Louis Morhange, formerly professor at the rabbinical school in Metz, served as chief rabbi until the installation of Bigard. In 1885 the latter was succeeded by Isaac Weill, who in 1890 succeeded Arnold Aron as chief rabbi at Strasburg. His successors at Metz were Adolphe Ury and the present (1904) incumbent, Nathan Netter.

By the royal decree of 1824 the rabbinical school that was transferred to Paris in 1859 was established at Metz. The synagogue was erected in 1840 and dedicated in 1845. The community possesses communal schools, an infant school, a hospital, a maẓẓah bakery, and numerous charitable societies, including a society of young people, which is recognized by the state and which gives aid without distinction as to creed.

METZ, ISAAC: German scholar; lived at Hamburg in the first half of the nineteenth century. He compiled a catalogue, entitled "Ḳehillat Dawid," of David Oppenheimer's library (translated into Latin by Lazar Embden, Hamburg, 1826). To this catalogue Jacob Goldenthal added an index (Leipsic, 1845). Metz published also an edition of Judah ha-Levi's "Cuzari" (Hanover, 1836), based upon the Venice 1547 and 1594 editions.

METZLER-LÖWY, PAULINE: Austrian contralto singer; born at Theresienstadt, Bohemia, Aug. 31, 1853. At the age of seven she entered the Prague Conservatorium, where she studied for four years. Graduating with honors, she immediately received an engagement at the theater in Altenburg. Her principal rôles at this time were in Gluck's "Orpheus," *Alcazene* in "Il Trovatore," and *Nancy* in "Martha." In 1875 she went to Leipsic at the invitation of Friedrich Hasse, then manager of the Stadttheater there, and after her début was at once permanently engaged. Here she remained for twelve years, singing with extraordinary success under three successive managers, Friedrich Hasse, Angelo Neumann, and Max Staegemann. She frequently appeared also at concerts and in oratorio at Hamburg, Bremen, Leipsic, Brunswick, and other cities, her appearance at the musical festival of the Allgemeiner Deutscher Musikverein in 1886 being especially memorable in this connection.

In 1881 Pauline Löwy married the piano-teacher Ferdinand Metzler. Since her retirement from the operatic stage (June 12, 1887) she has devoted herself principally to concert performances and later (from 1897) exclusively to vocal instruction.

MEYER, ADOLPH: American congressman; born at New Orleans, La., Oct. 19, 1842. He was a student at the University of Virginia when the Civil war broke out; and in 1862 he entered the Confederate army, serving until the close of the war on the staff of Brig.-Gen. John S. Williams of Kentucky, and holding finally the position of assistant adjutant-general.

Since the war Meyer has been largely engaged in the cultivation of sugar and cotton and in financial and commercial pursuits in New Orleans. In 1879 he was elected colonel of the First Regiment of the Louisiana State National Guard, and in 1881 was appointed brigadier-general to command the First Brigade, embracing all the uniformed corps of the state. He was elected as a Democrat to represent the First District of Louisiana in the Fifty-second Congress, and has been successively reelected up to and including the present (1904) Fifty-eighth Congress. Meyer has served on the committees on Naval Affairs and District of Columbia.

A.

MEYER, ALBERT: Danish tenor singer; born Oct. 29, 1839, at Sorö, Zealand. In 1860 he sang in the chorus of the Royal Theater, Copenhagen, where he received instruction from H. Rung. He subsequently appeared at several concerts, and had just received his first rôle in "The Hunter's Bride" ("Jægerbruden") at the Royal Theater, when the war between Denmark and Germany broke out (1864) and he was called to serve in the army. Upon his return in 1865 he gave a concert which procured for him the means for a year's study under Lamperti in Milan. In 1866 he received an engagement at Folketheatret in Copenhagen, where he remained as a soloist until 1873, when he decided to devote his whole time to giving instruction in singing. He wrote "Theoretisk-Praktisk Sangskole," which presents a theoretical-practical singing method based upon physiological studies of the human voice, and which appeared in Copenhagen, 1874, with a preface by Professor Panum. After a visit to the conservatories in Berlin, Leipsic, Brussels, and Paris, Meyer opened in 1876 a similar institution in Copenhagen.

In 1882 he was appointed conductor of the chorus of the Copenhagen Synagogue, for which he compiled "Synagogekorets Melodier ved Sabbathsgudstjenesten" (Copenhagen, 1892), melodies for use at the Sabbath services, among which are some compositions of his own.

MEYER, ANNIE (née **Nathan**)**:** American writer; born in New York city Feb. 19, 1867. She early revealed literary gifts, and articles from her pen appeared in "The Critic," "Harper's Bazar," "Lippincott's Magazine," and "The Bookman." The best-known of her shorter stories is "Vorbei." Some of her tales depict phases of Jewish life.

In 1887 she married Dr. Alfred Meyer. Her first books were "Helen Brent, M.D." and "My Park Book" (New York, 1899). Her most notable production is a novel, "Robert Annys, Poor Priest" (New York, 1901). She also edited "Woman's Work" (1898), the standard book on the subject.

Mrs. Meyer has further distinguished herself as an organizer, public lecturer, and woman of affairs. She was chairman of the Committee on Literatures at the World's Fair Congress at Chicago, and was at one time vice-president of an anti-woman suffrage movement. Her most valued communal service was in connection with the founding of Barnard College —the first women's college in New York. It was her energy that gathered together its promoters and secured the collection of funds for the first year. See also NATHAN.

A. M. H. H.

MEYER, ARTHUR: French journalist; born at Havre 1846. When still a youth he went to Paris and bought and edited the "Revue de Paris," which, however, was soon discontinued. For nearly twenty years he reported for "Le Gaulois" and "Paris Journal," becoming, in 1868, part owner of the former, which he made the organ of the Bonapartists. When Prince Louis died in 1879 Meyer left the "Gaulois" and bought the "Paris Journal," soon afterward "Le Gaulois," and finally the "Clairon." The three papers he then merged under the name of the "Gaulois," and made it the main organ of the Clerical-Monarchic party. Meyer was one of the most vehement adversaries of Captain Dreyfus.

MEYER, DAVID AMSEL: Danish financier; born in Copenhagen Jan. 18, 1753; died there Aug. 30, 1813. Meyer started in business for himself at a very early age, and during the period of general prosperity in the last decade of the eighteenth century his operations increased greatly, extending to transoceanic countries. On the death of his brother, who had for some time been his partner, Meyer associated himself with his nephew S. S. Trier, and founded the firm of Meyer & Trier, which occupied a prominent position in the world of finance. Several times the house had to face severe crises, as in 1795, when a fire devastated Copenhagen, and in 1799, when a general financial panic occurred. The firm, however, sustained no material injury to its commercial interests.

In 1806 Meyer criticized the way in which the finances of the country were being administered, and he especially denounced the reckless issue of unsecured paper currency. During the depression of the money market due to the Napoleonic wars, he was summoned by King Frederick VI. (1808), who consulted him on financial matters of state. Meyer is said to have exercised a great deal of influence on legislation in those days; and, in common with other unofficial advisers of the king, he had to bear his share of popular hatred, perhaps not unmixed with envy. During a financial crisis in 1811 Meyer acted as the agent of the government in endeavoring to avert pecuniary disaster. Enormous sums were placed at his disposal; and it was left to him to decide whether applicants for funds desired the money for legitimate business purposes or for speculation, and to grant or refuse the requests accordingly. The Danish merchants did not long submit to his arbitration, but sought other means of raising capital.

During the latter part of the year 1811 Meyer retired from active business, and in 1812 his firm received a letter of thanks from the king for its "arduous and self-sacrificing work in accordance with our will and desire." At the same time he received the title of "Hofraad."

Meyer left a fortune of 300,000 rigsbankdaler ($150,000), of which sum he bequeathed 200,000 kroner ($50,000) to Jewish schools and charities in Copenhagen, while the remainder was distributed among various other educational and charitable institutions.

S. F. C.

MEYER, EDVARD: Danish journalist and author; born Aug. 6, 1813, in Copenhagen; died there Aug. 4, 1880. He was the son of very poor parents and received little or no education during his boyhood, which he spent in a Jewish charitable institution. At the age of fourteen he was apprenticed to a wood-turner in Kjöge, and spent several years at this trade. In 1837 he established a weekly journal, the "Kallundborg Ugeblad," which in 1839 was incorporated with another paper. In 1841 Meyer returned to Copenhagen, where he started a humorous weekly, "Friskytten," and later a sensational daily, "Flyveposten," which latter for some years yielded him an annual income of nearly 50,000 Danish crowns. After many vicissitudes Meyer ended his days as he had begun them—in a Jewish charitable institution.

Of his many writings may be mentioned: "Poetisk Nysepulver" (Copenhagen, 1826); "Conversation" (*ib.* 1839), four pamphlets; "Danske Folkesange" (*ib.* 1839), Danish popular melodies; "Digte og Eventyr" (*ib.* 1842), poems and fairy-tales.

S. F. C.

MEYER, ERNST: Danish genre painter; born May 11, 1797, at Altona, Sleswick-Holstein; died in Rome Feb. 1, 1861. He studied at the Academy of Arts and in Lorentzen's Malerskole ("painters' school") in Copenhagen, and became, in 1814, a pupil of the Modelskolen, where he was twice awarded a silver medal (1816 and 1818). One of his first paintings was "Gretchen Kneeling Before the Holy Virgin," which was exhibited at the Academy of Arts in 1818 and which received much favorable comment.

Meyer aspired to become a historical painter, but after an unsuccessful attempt he abandoned this branch of the art. He spent three years (1821–24) in Munich, and then went to Rome, where he met Thorwaldsen, the sculptor, who was the animating spirit of the circle of Danish artists there.

Of Meyer's paintings the following may be mentioned: "Scene at a Well near a Capuchin Monastery," 1827; "A Neapolitan Fisher Family" (bought by Prince Christian Frederick), 1833; "A Fisherman Observing the Wind" and "Parents Leading Their Son to the Cloister" (painted between 1833 and 1837), both of which are now in Thorwaldsen's Museum. His most famous painting was "Sailors Landing Travelers at Capri," which was exhibited at the Copenhagen Academy of Arts in 1837 and became so popular that Meyer made several copies of it.

MEYER, FRIEDERICH CHRISTIAN: Jewish convert to Christianity; born at Hamburg in the second half of the seventeenth century; died in Belgium about 1738. After having been baptized at Bremen, he became a missionary and traveled for thirty years. He was the author of the following works: (1) "Licht zu Erleuchten die Juden," exalting the glory of Jesus (Leipsic, 1711); (2) "Me'irat 'Enayim," a pamphlet written in German, in which the author draws a parallel between Moses and Jesus, showing the supremacy of the latter (Amsterdam, 1713); (3) "Der Abscheuliche Mord Christi," in which he endeavors to demonstrate that the duration of the exile of the Jews can be attributed only to the crucifixion of Jesus (Hamburg, 1719); (4) "Vera Immanuelis Generatio," written in Hebrew and demonstrating the divinity of Jesus from the Prophets, especially from Isa. vii. 14.

MEYER, LEOPOLD: Danish physician; born in Copenhagen Nov. 1, 1852. After graduating from the university of that city (M.D. 1880) he went abroad to study obstetrics, and on his return became privat-docent in gynecology at his alma mater. In 1897 he was appointed professor of obstetrics and children's diseases in the same university.

Of Meyer's writings the following may be mentioned: "Det Normale Svangerskab, Födsel, og Barselseng," Copenhagen, 1882 (2d ed. 1891); "Menstruationsprocessen og dens Sygelige Afvigelser," *ib.* 1890; "Den Förste Barnepleje," *ib.* 1891. Since 1890 Meyer has been associate editor of the "Bibliothek for Læger," the leading Danish medical journal.

MEYER, LOUIS: Polish poet; born in the village of Sluzewo (Sluzhew), government of Warsaw, Russian Poland, 1796; died March 25, 1869. He was sent in 1810 by his father to Berlin, where he prepared himself for a business career, at the same time manifesting an unusual talent for poetry. In 1816 he returned to Poland, where he established himself in business, but still found ample time to continue his studies and to write German verse. In 1861 he was elected member of the County Assembly, which, however, on account of the Polish insurrection, did not convene.

Meyer's collected writings were published under the title "Hinterlassene Deutsche Schriften eines Polnischen Juden," Berlin, 1871. The book contains epic and dramatic poetry, pictures from Jewish life, and some aphorisms in prose.

Bibliography: *Hinterlassene Deutsche Schriften*, etc.

H. R.

MEYER, LUDWIG: German psychiatrist; born at Bielefeld Dec. 27, 1827; died at Göttingen Feb. 8, 1900. He studied medicine at the universities of Bonn, Würzburg, and Berlin (M.D. 1852), and became assistant at the Charité Hospital in the last-named city. Later he held the post of physician at the insane asylum in Schwetz, and was appointed chief physician at the city hospital, Hamburg, in 1856. In 1866 he became professor of psychiatry at the University of Göttingen, and director of the insane asylum connected with this university, which positions he continued to hold until his death.

Meyer founded with Griesinger in 1867 "Das Archiv für Psychiatrie." He wrote more than one hundred essays for the medical journals. He was an authority on psychiatry, and many hospitals have been built and furnished according to his suggestions and plans; among them are those of Hamburg, Göttingen, St. Urban, and Marburg.

MEYER, LUDWIG BEATUS: Danish author; born in Gandersheim, Brunswick, Jan. 3, 1780; died in Copenhagen July 28, 1854. From 1802 to 1805 he lived in the latter city as a private teacher, being subsequently appointed tutor in the family of Count Schimmelmann. In 1810 he became a naturalized citizen of Denmark, and entered the service of the government as chief of the bureau of the national debt. He resigned his appointment in 1821, receiving the title of professor.

Meyer now devoted his time exclusively to writing, his first work, "Haandbog i den Tyske Poetiske Literatur," appearing in Copenhagen in 1828. In 1837 he published a voluminous glossary of all foreign words and phrases occurring in the Danish language. This lexicon, which was entitled "Kortfattet Lexicon over Fremmede, i det Danske Skrift- og Omgangssprog Forekommende Ord, Kunstudtryk, og Talemaader," has, under the name of "Meyer's Fremmedordbog," become one of the leading authorities among Danish lexicographical works, and has passed through several editions (Copenhagen, 1837, 1841, 1899–1900).

MEYER, MORITZ: German physician; born at Berlin Nov. 10, 1821; died there Oct. 30, 1893. After studying at the universities of Heidelberg, Halle, and Berlin (M.D. 1844), he settled in Berlin in 1845, where he practised until his death. Meyer was a specialist in diseases of the nerves and in the use of electricity in their treatment. During his researches he invented the "Meyersche Unterbrecher," an instrument used in examining the reaction of muscles and nerves. He is the author of a well-known work entitled "Die Electricität in Ihrer Anwendung auf Practische Medizin" (Berlin, 1854; 4th ed. 1883). He furthermore wrote several articles on the paralysis induced by the constant use of snuff.

Bibliography: Pagel, *Biographisches Lexikon*.

s. F. T. H.

MEYER, M. WILHELM: German astronomer; born at Brunswick Feb. 15, 1853. He first engaged in the book-trade, but soon gave it up and pursued astronomical studies at the universities and observatories at Göttingen, Leipsic, and Zurich. In 1876 he established himself as privat-docent at Zurich; in 1877 he became a member of the staff of the observatory at Geneva, and in 1882 he lectured on astronomy at the Geneva University. In 1883 he removed to Vienna, and thence to Berlin, where he became (1888) director of the "Urania," a society for the popularizing of natural science, whose organ, "Himmel und Erde," he has edited since 1889. Together with Schwalbe he edited Diesterweg's "Populäre Himmelskunde" (18th ed., Berlin, 1893). He has published: "Die Königin des Tages und Ihre Familie" (Vienna, 1885); "Die Entstehung der Erde und des Irdischen" (Berlin, 1888); "Mussestunden eines Naturfreundes" (*ib.* 1891), etc.

BIBLIOGRAPHY: *Meyers Konversations-Lexikon.*

S.

MEYER, RACHEL: German authoress; born in Danzig March 11, 1806; died in Berlin Feb. 8, 1874. A few years after the death of her sister Frederika, she married the latter's husband. While devoting herself to charity and teaching, she found time to entertain noted men and to continue her own self-education. The publication of her first book, written while superintending the instruction of her children, was retarded by the death of a son. It appeared in Berlin in 1853 under the title "Zwei Schwestern"; it deals with the triumph of love over self and is an idealistic exposition of the marital relation. Her husband's business necessitated his removing to Vienna; here Rachel met Kompert and August Frankl, and here she produced her sketch of Vienna life entitled "Wider die Natur." Another work, entitled "Rachel" (Vienna, 1859), is a novel describing the life of the great actress Rachel. "In Banden Frei" (Berlin, 1869), her last novel, is a character study of her friend Lina Davidson. Rachel spent her last years in Berlin, with her daughters. Despite her idealism she was practical, and shortly before her death wrote a sketch of Stephenson, the inventor, with the express purpose of fostering in her nephew the practical spirit.

MEYER, SAMUEL: German rabbi; born in Hanover Feb. 26, 1819; died there July 5, 1882. He studied Talmud in his native city and at Frankfort-on-the-Main, and attended the University of Bonn. In 1845 he was chosen successor to Nathan Adler as district rabbi of Hanover and Lüneburg. He carried out in 1847 the plan, already projected by Adler, of founding a teachers' seminary in Hanover. Besides a few sermons he published "Gesch. des Wohlthätigkeits-Vereins der Synagogen-Gemeinde Hannover" (Hanover, 1862), and edited some unpublished poems of Abraham ibn Ezra, which he had discovered ("Orient, Lit." 1842).

BIBLIOGRAPHY: Steinschneider, *Hebr. Bibl.* vi. 32.

S. M. K.

MEYER, SARA (BARONIN VON GROTTHUSZ): German authoress, and leader of a salon; born in Berlin in the latter half of the eighteenth century; died at Oranienburg Dec. 11, 1828. She wrote many stories, dramas, and political and moral essays in German and French, her French work being especially well received. Among her many friends were Goethe, Lessing, and Schiller. Most of their letters to her were accidentally burned, only twenty-one letters from Goethe, written in the years 1797–1815, being saved; these were published by Varnhagen von Ense.

Sara Meyer was light-minded, susceptible to flattery, conceited, and lacked moral stamina. After severing her first marriage-ties she was baptized and married Baron von Grotthusz. Her younger sister, **Mariane,** after the death of Prince Reuss, Austrian ambassador to the Prussian court, was found to be his lawful wife. She never bore the title of princess, but resided in Vienna as **Frau von Eybenburg** (from 1799). Like her sister, she was well educated, but wrote indifferently. She left in manuscript a number of sketches of well-known characters.

S. S. J. L.

MEYER, VICTOR: German chemist; born in Berlin Sept. 8, 1848; died in Heidelberg in 1897. He was inclined toward literature and the stage, when a visit to his elder brother, then studying chemistry at Heidelberg, turned his thoughts into another channel, and he decided to become a chemist. He thoroughly prepared himself in mathematics and natural science in one of the gymnasiums of Berlin, spent one semester at the University of Berlin, and studied for some time with A. W. Hofmann. In 1865 he entered the University of Heidelberg, in whose faculty there were such men as Helmholtz, Kirchhoff, and Bunsen. The last-named made him his private assistant. In 1868 he returned to Berlin to increase under Bayer his knowledge of organic chemistry.

When only twenty-three years old he was appointed assistant professor at the Stuttgart Polytechnic School, and in 1872 was called to Zurich as the successor of Wislicenus. His brilliant work in Switzerland (1872–85), both in the laboratory and in the lecture-room, attracted students from many countries.

In 1885 he received a call from the University of Göttingen, and spent three years in reorganizing the laboratories there. In 1889 he was invited to Heidelberg, his alma mater, to succeed Bunsen. The latter regarded him as the brightest and most promising of the many eminent men who had studied under him, and it was his wish on his retirement that Meyer should be appointed as his successor.

Meyer's fame as a lecturer was world-wide; and his ingenuity and skill in devising and manipulating experiments, combined with his personal magnetism, attracted many hearers. Meyer's remarkable insight is illustrated by his discovery and studies of the thiophene group (1882). He discovered and described the type of oximes (1882), investigated the nitro- (1872), nitroso-, isonitroso-, and iodo-compounds (1892), and studied the organic derivatives of ammonia, and with these the stereochemistry of nitrogen. He published his important researches on the esterification of the acids of the aromatic series (1894–95).

Of great value are his investigations in physical chemistry, particularly those of vapor densities (1878–80) and the study of high temperatures. Together with Jacobson he wrote an excellent text-book on organic chemistry ("Lehrbuch der Organischen Chemie," 2 vols., Leipsic, 1891–95). Of his other works may be mentioned: (with Langer) "Pyrochemische Untersuchungen," Brunswick, 1885; "Die Thiophengruppe," *ib.* 1888; "Chemische Probleme der Gegenwart," Heidelberg, 1890; "Ergebnisse und Ziele der Stereochemischen Forschung," 1890; (with Treadwell) "Tabellen zur Qualitativen Analyse," 3d ed., Berlin, 1891; "Aus Natur und Wissenschaft," Heidelberg, 1892; "Märztage im Kanarischen Archipel," *ib.* 1893.

Meyer's unceasing and confining work ultimately shattered his nervous system; and in a fit of dejection he took his own life.

MEYERBEER, GIACOMO: German composer; born at Berlin Sept. 5, 1791; died at Paris May 2, 1864. His real name was **Jakob Liebmann Beer**; but he changed it when his grandfather promised to leave him his fortune on condition that the composer prefix the name "Meyer" to his patronymic. He received his early instruction in music from Franz Lauska and Muzio Clementi, and at the age of seven made his début as a pianist in one of Patzig's pupils' concerts (Oct. 14, 1800), playing the D Minor Concerto by Mozart. He then studied theory under Zelter, and later under Bernard Anselm Weber, director of the Berlin Opera, with whom he remained until 1810, in which year he went to Darmstadt to study for two years under Abbé Vogler.

Giacomo Meyerbeer.

Early Works.

In 1811 he wrote the oratorio "Gott und die Natur," the score of which so pleased the Grand Duke of Hesse that he appointed Meyerbeer composer to the court. The first performance of the work took place May 8, 1811, at the Singakademie, Berlin. Two operas, "Jephtha's Gelübde" and "Abimelek, oder die Beiden Khalifen," which Meyerbeer had written, were produced at the Royal Opera-House, Munich, in 1813. Soon afterward he gave a piano recital at Vienna, achieving a complete success.

In 1815 Meyerbeer went to Venice in order to familiarize himself with Italian melody and vocalization. He now set to work writing in the Italian vein, and met with instantaneous success, his four operas composed at this time being received with immense enthusiasm. In 1823, while engaged on "Il Crociato in Egitto," the composer went to Berlin, where he unsuccessfully endeavored to arrange for a performance of his three-act opera "Das Brandenburger Thor." In 1824 "Il Crociato" was produced at Venice with very great success; and two years later Meyerbeer accepted an invitation to Paris to witness a performance of the same opera. Thenceforth he became wholly identified with the French school of opera. On Nov. 21, 1831, his "Robert le Diable" was produced at the Grand Opera, Paris; and within a year the libretto had been translated into nearly every European language, and performances had been given in every important city. This opera was followed (Feb. 20, 1836) by "Les Huguenots," an opera which was at first received with somewhat less favor than "Robert le Diable," but which ultimately came to be regarded as greatly its superior.

After the production of "Les Huguenots" at Berlin, Meyerbeer was called to that city by King Frederick William IV. as general musical director; and there he composed his opera "Das Feldlager in Schlesien," which, however, was not successfully produced until Jenny Lind, whom Meyerbeer had introduced to the Berlin public, assumed the rôle of *Vielka*. In the summer of 1846, at the request of the Princess of Prussia, Meyerbeer composed the incidental music to the drama "Struensee," written by his brother Michael Beer; and on Sept. 19 following, this work, the music of which ranks among his best productions, was performed at the Royal Theater, Berlin. After visits to Vienna and London in 1847, Meyerbeer returned to Berlin, where he produced Richard Wagner's "Rienzi." Two years later "Le Prophète," the libretto of which had been completed by Scribe in 1842, was produced at the Grand Opera, Paris (April 16, 1849), and, like its predecessors, "Robert le Diable" and "Les Huguenots," soon made the circuit of the globe.

"L'Africaine."

Despite failing health Meyerbeer produced "L'Etoile du Nord" at the Opéra Comique (1854), and four years later "Dinorah ou le Pardon de Ploermel." Neither of these operas, however, met with the favorable reception accorded to Meyerbeer's previous Parisian productions. In 1862 he represented German music at the opening of the London International Exhibition with his "Overture in the Form of a March." Upon his return to Berlin he resumed his work upon "L'Africaine," on which he had been engaged since 1838. For years the difficulty of getting a satisfactory cast had prevented the production of this opera; and several other circumstances hindered its performance during the composer's lifetime. In April, 1864, he returned for the last time to Paris, to superintend the preparatory rehearsals of this opera; but in the midst of his labors he died, and the opera was not produced until May 28, 1865. In accordance with Meyerbeer's last wishes his body was taken to Berlin for burial; but imposing funeral obsequies were held in Paris also.

Compositions.

Of Meyerbeer's compositions besides those already mentioned, the following deserve special notice: the monodrama "Thevelinden's Liebe," for soprano solo and chorus with clarinet obligato; "Romilda e Costanza" (1815); "La Semiramide Riconosciuta" (1819); "Emma di Resburgo" (1819); "Margherita d'Anjou" (1820); "L'Esule di Granada" (1822); seven sacred cantatas of Klopstock, for quartet unaccompanied; choruses to Æschylus' "Eumenides"; "Der Genius der Musik am Grabe Beethoven's," for soli and chorus; "Freundschaft," for 4-part male chorus; Psalm xci., for eight voices, composed for the choir of the Berlin Cathedral; "Fackeltänze," for brass orchestra, composed for the weddings of the King of Bavaria (1846) and of the Princesses Charlotte (1850) and Anne (1853) of Bavaria; grand march for the Schiller Centenary Festival, 1859; Coronation March for King William I. (1863); also a large number of songs with pianoforte accompaniment, among which "Le Moine" (for bass) and "Das Fischermädchen" are perhaps the most popular.

Meyerbeer received medals and other distinctions from almost every civilized government. He steadfastly adhered to Judaism throughout his life. He was ever ready to assist his fellow artists irrespective of creed; and in his will he made provision for a similarly beneficent disposition of his wealth. He set aside, for instance, 10,000 thalers (the Meyerbeer-Stiftung), the interest of which he directed to be used in providing traveling fellowships for promising students of music.

MEYSELS, BERISCH (BAER). See Meisels, Dob Berush b. Isaac.

MEYUḤAS (מיוחם): Oriental Jewish family which gave several rabbinical writers to Jerusalem and Constantinople.

Abraham ben Samuel Meyuḥas: Rabbi in Turkey in the eighteenth century; author of "Sedeh ha-Areẓ," in three parts, the first two being homilies on the Pentateuch (Salonica, 1784-98) and the third containing responsa on the four parts of the Shulḥan 'Aruk, collectanea, and Talmudic annotations (Leghorn, 1788). In the preface Meyuḥas asserts that he wrote the following commentaries: "Digle Ahabah," on Isaac Luria's "Derek 'Eẓ ha-Ḥayyim"; "Ha-Ma'or ha-Ḳaṭon," on Ḥayyim Vital's "'Eẓ Ḥayyim"; "Siaḥ ha-Sadeh," on Isaac Luria's "Sefer ha-Kawwanot." Fürst ("Bibl. Jud." ii. 347) ascribes to this Meyuḥas the work entitled "Bene Abraham," responsa and homilies, and "Ḳontres," containing the laws of Giṭṭin (Constantinople, 1773); the responsa and homilies, however, are those of **Abraham ben Judah Meyuḥas**; while the "Ḳonṭres" was written by **Nathan Meyuḥas.**

M. Sel.

Moses Mordecai Joseph Meyuḥas: Son of Raphael Meyuḥas ben Samuel; born 1738; died 1806. He succeeded Yom-Ṭob al-Ghazi as chief rabbi of Jerusalem (1801-6). In 1799, on the approach of Bonaparte's army, which already had taken Jaffa, Meyuḥas assembled the Jews of Jerusalem and delivered a patriotic speech, after which he seized a pickax and commenced to dig a trench, his coreligionists immediately following his example. He was the author of three Hebrew works: "Sha'ar ha-Mayim," notes on the Shulḥan 'Aruk, and responsa (Salonica, 1768); "Birkot ha-Mayim," novellæ, religious laws, and responsa (*ib.* 1789); "Mayim Sha'al," on the same subjects as the "Sha'ar ha-Mayim" (*ib.* 1799).

M. Fr.

Raphael ben Samuel Meyuḥas: Chief rabbi of Jerusalem and head of the yeshibah there; flourished about the middle of the eighteenth century. He was the author of the following works, all published at Salonica: "Minḥat Bikkurim," halakic and haggadic novellæ on several treatises of the Talmud (1752); "Peri ha-Adamah," novellæ on the four divisions of Maimonides' "Yad" (1752); "Pene ha-Adamah," homilies on the "parashiyyot" of the Pentateuch (1752); "Mizbaḥ Adamah," novellæ on the four parts of the Shulḥan 'Aruk (1777).

Bibliography: Azulai, *Shem ha-Gedolim*, ii., s.v. *Mizbaḥ Adamah*; Fürst, *Bibl. Jud.* ii. 347; Zedner, *Cat. Hebr. Books Brit. Mus.* p. 536.

M. Sel.

Samuel Ḥayyim Meyuḥas: Chief rabbi of Constantinople from 1836 to 1839; died some years after the latter date. He was the author of a volume of responsa entitled "Shemen ha-Mishḥah" (Constantinople, 1840).

Bibliography: Azulai, *Shem ha-Gedolim*; Hazan, *Ha-Ma'alot li-Shelomoh*; Franco, *Histoire des Israélites de l'Empire Ottoman*; Walden, *Shem ha-Gedolim he-Ḥadash*.

J. M. Fr.

MEZA (MESA): A family of Amsterdam distinguished for the number of its members that filled rabbinic offices.

Abraham Ḥayyim de Jacob de Solomon de Meza: Member of the Talmud Torah 'Eẓ Ḥayyim in Amsterdam, and author of a sermon, delivered in Portuguese on the day of solemn devotion, "Sermão Moral . . . na Occasião de Hum Dia Solemne de Oração . . . em 4 Nisan 5507 = 15 Março 1747," Amsterdam, 1747.

David de Abraham Ḥayyim de Jacob de Solomon de Meza: Son of Abraham de Meza; died in Amsterdam after 1793. He published: "Sermão da Liberdade, Pregado na K. K. de Talmud Torah em 28. Yjar 5527," Amsterdam, 1767; "Sermão Moral, Preg. . . . em S. Emor, 13 Yjar 5532," *ib.* 1767; "Sermão Moral Sobre o Pezo do Peccado, Preg. em S. Qui Tetsè 9 Elul 5546," *ib.* 1786. He prepared also a new edition of "Paraphrasis Caldayca en los Cantares de Selomoh como Tambien los Apophthegmas

de Aboth," *ib.* 1766. Several Hebrew songs of his are to be found in the collection of poems "Shir Emunim," edited by Moses de Piza, *ib.* 1793.

David de Jacob de Meza: Son of the editor **Jacob de Meza**; member of the Talmud Torah 'Eẓ Ḥayyim. Many of his responsa are contained in the compilation "Peri 'Eẓ Ḥayyim," *ib.* 1741.

Solomon de Isaac de Meza: Physician and ḥakam; born at Amsterdam; died there in 1742. He was a disciple of Solomon de Oliveyra and David de Pina, the latter of whom initiated him in the science of medicine. He was a member of the rabbinate of the Spanish-Portuguese community in Amsterdam. In conjunction with his colleagues Solomon Ayllon, David Mendes da Silva, and others, he signed the famous rabbinical decision in favor of the Shabbethaian Nehemiah Ḥayyun (1711). A year after his death the catalogue of his library was published (Amsterdam, 1743). He wrote under the title "Shulḥan Shelomoh" an unimportant disquisition concerning the Sabbath-day's journey from a village near Amsterdam (*ib.* 1725). After his death appeared his "Meditaçoens Sacras ou Sermoens Varios" (part i., *ib.* 1764).

G.
M. K.

MEZA, CHRISTIAN JACOB THEOPHILUS DE: Danish physician and author; born in Copenhagen Nov. 26, 1756; died there April 6, 1844. He was a son of the physician Christian de Meza, together with whom he embraced Christianity in 1783. In the same year he graduated as M.D. from the University of Copenhagen, and became a member of the Royal Medical Society. From 1784 until his death he practised medicine in Elsinore.

Meza published in the medical journals numerous essays, of which the following may be mentioned: "De Graviditate Mixta Observatio," in "Acta Regiæ Societatis Med. Hafniensis," i. 442–450; "Relatio Febris Tertianæ Intermittentis Epidemicæ Anno 1784 Grassantis," in "Observationes Medico-Practicæ Quinque," ii. 197–213; "En Sjælden og Abnormal Tvillingfödsel," in "Bibliothek for Læger," 1821, ix. 41–43 (appeared afterward in "Bulletin des Sciences Médicales," Jan., 1830, and in "American Journal of the Medical Sciences," No. 12, 1830).

Meza wrote also a drama, "Dormon og Vilhelmine," which was produced at the Royal Theater, Copenhagen, in 1796.

Meza's son, **Christian Julius de Meza** (1792–1865), was a general in command of a division of the Danish army during the war with Germany (1864).

F. C.

MEZA, CHRISTIAN JULIUS FREDERIK (SOLOMON) DE: Danish physician; born in Amsterdam Sept. 4, 1727; died in Copenhagen June, 1800. Meza, who was the son of a Portuguese rabbi, Abraham de Meza, studied medicine in Amsterdam, and later at the University of Utrecht (M.D. 1749). After further study in Hamburg he went (1753) to Copenhagen, where he took up the practise of medicine.

In 1769 Meza published in French a treatise on hygiene entitled "De l'Education des Enfants tant Physique que Morale." Another work of Meza's, entitled "Tentamen Historiæ Medicæ" (1795), was severely criticized in Germany.

In 1772 he became a member of the newly founded medical society of Copenhagen. He was popularly called "Jödedoktoren," and was generally respected in Copenhagen, where he was for a long time the only Jewish physician. In 1783, after the death of his wife, Meza, together with a son and a daughter, embraced Christianity.

S.
F. C.

MEZEI, ERNEST: Hungarian deputy and journalist; born at Satoralja-Ujhely, Hungary, in May, 1851. He completed his school career partly in his native city and partly in Kaschau, and then took a course in law and philosophy at the University of Budapest. While still a student he entered upon a journalistic career, contributing leaders to the "Ellenör." In 1874 he became one of the founders of the "Egyetértés," the representative organ of the extreme opposition, the so-called Independent party; and he has been on its editorial staff ever since. In 1878 he was nominated as deputy for the district of Gyoma, being warmly recommended by Louis Kossuth, but failed to secure election. In 1881 he was elected deputy for the city of Miskolcz.

During this period sprang up the celebrated Tisza-Eszlár blood accusation, which gave rise to an intense anti-Semitic agitation. Mezei made the affair the basis of an interpellation addressed to the minister of justice, which called forth exciting scenes in the House of Deputies. During the consideration of the bill on mixed marriages between Christians and Jews he made several pointed speeches against the anti-Semites.

Mezei is active also in the literary field, having published many scattered poems and sketches of travel, as well as "Olasz Bolyongások" (1877), a narrative of rambles through Italy. Occasionally he contributes to the periodicals articles on current questions relating to the Jews. In a lecture entitled "Zionismus als Nationale Idee," delivered before the Hungarian Jewish Literary Society, he took a firm stand in opposition to the attempt to place over against the religious world-mission of Judaism a Jewish national propaganda.

S.
G. W.

MEZEI, MORITZ: Hungarian jurist and deputy; born at Satoralja-Ujhely Jan. 17, 1836. He studied law in Budapest, and even as a student took an active part in the efforts to restore the Hungarian constitution and emancipate the Hungarian Jews. He was the chief founder of the National Judæo-Hungarian Society in 1861, and edited its journal, the "Izraelita Közlöny." The spirit of Hungarian nationalism which pervaded his writings caused him to be court-martialed by the governor, Count Moritz Pálffy; but for a royal proclamation of amnesty issued on the occasion of the recovery of Queen Elizabeth he would have been condemned. He was obliged, however, to resign his editorial position. In 1864, by the permission of the king, he began the practise of law at Budapest, although the legal profession had not hitherto been opened to the Jews. Three years later he was able to resume his journalistic advocacy of Jewish emancipation, and in 1868 was appointed secretary of the congress convened by Baron Eötvös for the regulation of Hebrew communal affairs. In 1892 he was elected president of the organization which secured recognition of the Jewish religion in Hungary, and in 1893 he was elected to the Hungarian Parliament by the Jewish district of Budapest (Leopoldstadt). Mezei is also vice-president of the Hebrew congregational district of Budapest.

S. L. V.

MEZEY, FRANZ: Hungarian jurist and author; born at Acsad Feb. 5, 1860. His parents had destined him for a rabbinical career, but after reaching maturity and becoming a thorough Hebrew scholar, he took up the study of jurisprudence and was admitted to the bar at Budapest. As a writer and speaker his abilities were devoted to the cause of Judaism even in his student days. In 1883 he was the mainstay of the defense in the Tisza-Eszlár affair as the representative of the Hungarian Jews, and for the past two decades, as secretary of the Jewish chancery ("Landeskanzlei"), he has been their chief source of inspiration toward advancement in religious and educational matters. He was one of the founders of the Hungarian Jewish Literary Society, and, with Wilhelm Bacher, edited its year-book; from 1891 to 1895 he was coeditor of the "Magyar Zsidó Szemle" with Ludwig Blau. He has also contributed to the "Nemfeti Ujság" and the "Togtudomany i Kozlony." Mezey is (1904) secretary and attorney of the hebra ḳaddisha of Budapest, which has attained, under his management, a membership of 10,000.

שמע ישראל יהוה אלהינו יהוה אחד ואהבת את
יהוה אלהיך בכל לבבך ובכל נפשך ובכל מאדך והיו
הדברים האלה אשר אנכי מצוך היום על לבבך ושננתם
לבניך ודברת בם בשבתך בביתך ובלכתך בדרך
ובשכבך ובקומך וקשרתם לאות על ידך והיו לטטפת
בין עיניך וכתבתם על מזזות ביתך ובשעריך
והיה אם שמע תשמעו אל מצותי אשר אנכי
מצוה אתכם היום לאהבה את יהוה אלהיכם ולעבדו
בכל לבבכם ובכל נפשכם ונתתי מטר ארצכם בעתו
יורה ומלקוש ואספת דגנך ותירשך ויצהרך ונתתי
עשב בשדך לבהמתך ואכלת ושבעת השמרו לכם
פן יפתה לבבכם וסרתם ועבדתם אלהים אחרים
והשתחויתם להם וחרה אף יהוה בכם ועצר את
השמים ולא יהיה מטר והאדמה לא תתן את יבולה
ואבדתם מהרה מעל הארץ הטבה אשר יהוה נתן לכם
ושמתם את דברי אלה על לבבכם ועל נפשכם וקשרתם
אתם לאות על ידכם והיו לטוטפת בין עיניכם ולמדתם
אתם את בניכם לדבר בם בשבתך בביתך ובלכתך
בדרך ובשכבך ובקומך וכתבתם על מזוזות ביתך
ובשעריך למען ירבו ימיכם וימי בניכם על האדמה
אשר נשבע יהוה לאבתיכם לתת להם כימי השמים
על הארץ

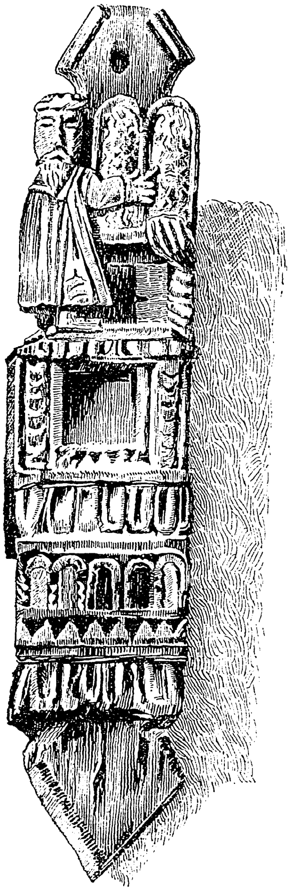
Mezuzah Scroll.

MEZUZAH (מזוזה; lit. "door-post"): Name given to a rectangular piece of parchment inscribed with the passages Deut. vi. 4–9 and xi. 13–21, written in twenty-two lines according to the same rules as those for the Torah and tefillin. The parchment is rolled up and inserted in a wooden or metal case or tube. This is affixed, in a slanting position, to the upper part of the right-hand door-post, so that the upper part is inward and the lower part outward, and about a handbreadth from the outer edge of the door-post. On the outer side of the top of the parchment is inscribed the name of God, שדי; and an opening is left in the case opposite this word, which opening is protected by a piece of glass. The material on which the mezuzah may be written is as carefully prescribed as is that for a scroll of the Law (Massek. Soferim i. 1; Asheri to Alfasi, "Sefer Torah"; Shulḥan 'Aruk, Yoreh De'ah, 271: Yer. Megillah i. 9; Shab. 108a; MS. Mezuzah, ed. Kirchheim, i. 1); but while a scroll must always be written from a copy, the mezuzah may be written from memory (Men. 32b). Both selections mentioned above must be contained therein; and if even one letter is missing the mezuzah may not be used (Men. 28a). Generally the text is written in twenty-two lines equally spaced. The pious touch and kiss this part of the mezuzah as they pass through the door. The mezuzah is obligatory for every building used as a residence; and its fastening to the door-post is accompanied by the usual formula of benediction: "Blessed art Thou our God, King of the world, who hast sanctified us by Thy commandments and hast commanded us to fasten the mezuzah." On entering and leaving the house the pious touch the mezuzah (at "Shaddai") with the hand, and recite the prayer: "May God keep my going out and my coming in from now on and ever more."

The mezuzah brings blessings to him that touches it; but it must not be touched with unclean hands. It is inspected from time to time to make sure of its correctness. It may not be given to a non-Jew, lest it be not treated with due respect (see Men. iii. 7, 33b; Maimonides, "Yad," Tefillin, i., v., vi.; Yoreh De'ah, 285–291).

Origin and Significance.

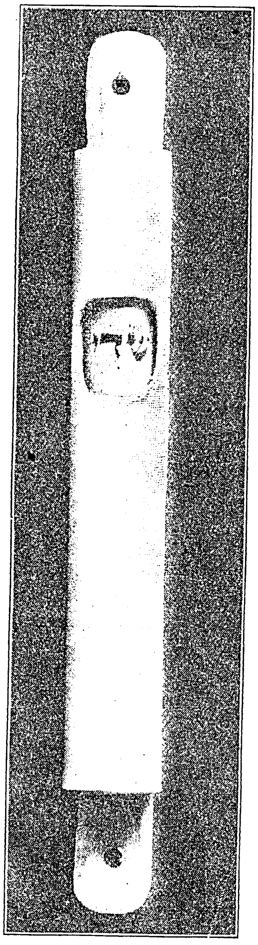
The obligation of the mezuzah is derived from the words: "And thou shalt write them on the door-posts of thy house and within thy gates." The Rabbis considered the mezuzah of equal importance with the tefillin and ẓiẓit (Men. 43b; Pes. 113b; comp. Shab. 23b, 32b). The antiquity of the mezuzah is attested by Josephus (c. 37–100 C.E.), who speaks of its employment ("Ant." iv. 8, § 13) as an old and well-established custom. Inscribed with passages of the Torah which emphasize the unity of God, His providence, and the resulting duty of man toward Him, the mezuzah is an emblematic representation of Israel's belief and practise. Thus Josephus says in speaking of the mezuzah (l.c.): "The greatest benefits of God are to be written on the doors . . . in order that His benevolent providence may be made known everywhere"; and Maimonides adds ("Yad," Tefillin, vi. 13): "By the commandment of the mezuzah man is reminded, when coming or going, of the unity of God, and is aroused to the love of Him. He is awakened from his slumber and his vain worldly thoughts to the knowledge that nothing endures in eternity like the knowledge of the Rock of the World. This contemplation brings him back to himself and leads him on the right path."



Wooden Case for Mezuzah.
(In the possession of F. David, Cassel.)

Superstitious Conception.

In Talmudic times a protective power, especially in warding off evil spirits, was attributed to the mezuzah. This appears in such anecdotes as those of Artaban and Abba Arika (see Artaban V.; comp. Yer. Peah i. 1, 15d; Gen. R. xxxv. 3) and of Onḳelos ('Ab. Zarah 11a; comp. also Targ. to Cant. viii. 3; Men. 32b, 33b). In the Middle Ages, under the influence of the Cabala, not only passages from the Bible treating of God's watchfulness over His people (Ps. cxxi. 7 et seq.), but also various names of angels were added to the original contents of the mezuzah. שדי was explained to represent the initials of (דירות) שומר דלתות ישראל, after a cabalistic interpretation of Job xxii. 17, 25 (comp. "Kol Bo," 101, 4). At the bottom of the blank side the words כוזו במוכסז כוזו are written, which, according to אב"גד, i.e., every letter standing for the next preceding, reads: יהוה אלהינו יהוה. Some, when leaving home on business bent, invoke God by the mysterious words "Kozo bemuksaz Kozo," declaring that in His name they are about to go forth, and petitioning for success. Against the additions to the mezuzah Maimonides raised his voice. He says ("Yad," Tefillin, v. 4): "There is no harm in writing שדי on the outside; but those who write on the inside the names of angels, or holy names, or verses, or other formula, are of those who will have no share in the future world. For these fools not only defeat in this manner the fulfilment of a great commandment which has for its end the remembrance of the unity of God, and the love of Him and worship of Him, but turn it into an amulet for their selfish interest, believing in their foolish hearts that it can be made to serve the preservation of transitory worldly goods." Maimonides' view prevailed, and the additions were eliminated.



Glass Cylinder Containing Mezuzah.

The Mohammedans likewise place over the doors and windows of their dwellings as well as of their shops the name of God, or their profession of faith, or some maxim, or a verse of the Koran, or a short invocation (comp. Lane, "Account of the Manners and Customs of the Modern Egyptians," 3d ed., i. 7, 22, 320); and a similar custom seems to have prevailed among the ancient Egyptians (comp. Wilkinson, "Manners and Customs of the Ancient Egyptians," 1878, i. 361; and Huetius, "Demonstratio Evangelica," p. 58).

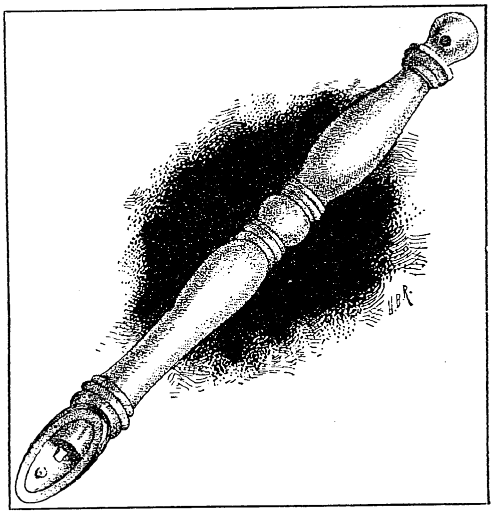
A. I. M. C.

MHUSHILKAR, REUBEN EZEKIEL: Beni-Israel soldier. He enlisted in the 19th Regiment Native Infantry Jan. 15, 1849, was made jemidar Oct. 1, 1861, and promoted subahdar Jan. 1, 1870. He was present at the battles of Multan, Gujarat, the Punjab (awarded medal and two clasps), Rajghur, Mungrowlee, Sindwah, and Kurai in central India (medal); served in Afghanistan from 1878 to 1880 (medal and clasp); and retired March 6, 1881.

J. J. Hy.

MICAH (מיכה): 1. Prophet; author of the sixth book in the collection known as "The Twelve Minor Prophets" (Mic. i. 1). The name of the prophet appears to be a shortened form of מיכיה, "Micaiah" (= "Who is like Yhwh?"), and is so written in Jer. xxvi. 18 (comp. also Micah No. 2). The only data concerning Micah are those given in the superscription of the book bearing his name. He was a Morasthite; that is to say, a native of Moresheth-gath (Mic. i. 14); and he prophesied in the days of Jotham, Ahaz, and Hezekiah, kings of Judah—a period covering at the most fifty-nine years (756-697 B.C.). In the above-cited passage of Jeremiah, however, only the reign of Hezekiah is given as the period of Micah's activity.

Pseudo-Epiphanius ("Opera," ii. 245) makes Micah an Ephraimite. Confounding him with Micaiah, son of Imlah (I Kings xxii. 8 *et seq.*), he states that Micah, for his inauspicious prophecy, was killed by order of Ahab through being thrown from a precipice, and was buried at Morathi (Maroth?; Mic. i. 12), near the cemetery of Enakim ('Ενακεὶμ, Septuagint rendering of בכו; *ib.* i. 10). According to "Gelilot Ereẓ Yisrael" (quoted in "Seder ha-Dorot," i. 118, Warsaw, 1889), Micah was buried in Chesil, a town in southern Judah (Josh. xv. 30).



Mezuzah Case.
(After Picart.)

2. Biblical Data: A resident of Mount Ephraim who, having stolen 1,100 pieces of silver from his mother, restored them to her on hearing her curses at the theft. The mother had dedicated the silver to Yhwh; and she accordingly gave 200 pieces to a founder, who made a molten image which was placed in Micah's house. Micah thus established a house of idols with an ephod and teraphim, and consecrated one of his sons to be his priest (Judges xvii. 1-5). In the course of time a young Levite named Jonathan, son of Gershon, happened to come to the house, and he was appointed by Micah as his priest (*ib.* xvii. 7-13). The image, together with the priest, was captured by the Danites, who set it up at Dan, where it continued to be an object of worship as long as the Tabernacle was at Shiloh (*ib.* xviii.; see Jonathan No. 1). In Judges xvii. 1, 4, the name "Micah" appears in the form מיכיהו.

S. M. Sel.

——**In Rabbinical Literature:** Micah is identified by the Rabbis with Sheba, son of Bichri, and with Nebat, the father of Jeroboam (Sanh. 101b). His name, derived by them from נתמכמך, is interpreted as meaning "the crushed one," an appellation due to a miracle which happened to him. According to a haggadah, the Israelites, when unable to complete the tale of bricks required from them by the Egyptians, were compelled to put their children in the brickwork in place of the bricks that were lacking. Moses withdrew one child (Micah), already crushed, and revived him; but, as God had foretold, he grew up to be an idolater (Tan., Yelammedenu, Ki Tissa; comp. Rashi to Sanh. *l.c.*).

The Rabbis all agree that Micah was among those who crossed the Red Sea with Moses; but they differ with regard to his idol. According to Sanh. 103b and Tan., Yelammedenu (*l.c.*), Micah had the idol with him; but according to Ex. R. (xli. 1) he took with him only the silver of which the idol was afterward made. A passage in Pesaḥim (117a) seems to support the latter opinion. There is also a tradition that it was Micah who made the golden calf in the wilderness, and in the following manner: Moses, in order to bring Joseph's coffin to the surface of the Nile, wrote on a splinter עלי שור (= "Come up, ox"; Joseph being compared to an ox; see Deut. xxxiii. 17) and threw it into the water. Micah found the splinter, and, later, when Aaron cast the gold into the fire (Ex. xxxii. 24), threw the splinter after it. As a result a calf came out (Tan., Yelammedenu, *l.c.*; see also Jew. Encyc. iii. 509a, *s.v.* Calf, Golden).

Micah, though an idolater, was praised for his hospitality to travelers. Gareb, where his idol was set up, was three miles distant from Shiloh, where the Tabernacle stood; and the smoke of the two altars mingled on account of their proximity. The angels wished to throw down the idol; but God said to them, "Leave it alone; for Micah offers bread to travelers." Micah is even supposed to have a share in the future world (Sanh. 103b); it is for this reason that his name is twice written "Micaiah" (see Micah No. 2, Biblical Data), that is, with a part of the Tetragrammaton, like the names of the just (Num. R. x. 14).

S. S. M. Sel.

——**Critical View:** The narrative of Micah's idol, the historical basis of which is undoubted, was apparently written with the object of showing the origin of the temple of Dan (comp. I Kings xii. 29).

At the same time it throws much light on the state of the Yhwh cult and of the Levites in the time of the Judges. The author expressly points out that Micah was a worshiper of Yhwh, for whose cult he had his private shrine with a regular priestly service. Although the laws of Yhwh forbade the erection of any shrine besides the one in the chosen place and the making of any image of Him (Ex. xx. 4 *et passim*; Deut. xii. 5 *et seq.*), Micah, evidently ignorant of the Law, not only set up engraved and molten images representing the divinity he worshiped, but added other idols, the teraphim for instance. The narrative further shows that the Levites, being deprived of a share in the land, had to wander from place to place, accepting the office of family priest in order to procure a livelihood.

The account itself presents many difficulties in regard to its construction. Besides several discrepancies in the text there are absolute contradictions. Thus in Judges xvii. 7 the Levite is a young man who lived in the neighborhood of Micah, while in the following verse he is a wandering Levite. There is also a discrepancy between verses 19 and 27 of ch. xviii. and between verses 30 and 31 of the same chapter concerning the duration of the cult of the idol at Dan. According to Oort, Wellhausen, and Kuenen, the text has received many interpolations, with the object of throwing contempt upon the cult of Dan. On the other hand, Vatke ("Alttestamentliche Theologie," 1835, p. 268) and Berthau, followed by other critics, recognize two parallel narratives united by a redactor. While there is some disagreement as to the component parts of the two versions, Budde's division seems to be the most acceptable; he holds, namely, that the first narrative consists of Judges xvii. 1, 5, 8–11a, 12, beginning, 13; xviii. 1, part of 2, 3b, 4b–6, 8–10, part of 11, 12, part of 13, 14, 16, 18a, 19–29, 31; and that the intervening verses form the second narrative. Budde is of opinion that the first narrative belongs to E; but he does not find sufficient grounds for ascribing the second to J. Moore thinks that the first version belongs to J. In the second version (*ib.* xviii. 30) the cult at Dan is indicated as having lasted "till the day of the captivity of the land," which is supposed by Moore to refer to the deportation by Tiglath-pileser (734 B.C.).

Besides the above-mentioned discrepancies certain points remain unsettled by the critics. Ḳimḥi explains the discrepancy between verses 3 and 4 of Judges xvii. by suggesting that the 200 shekels were an additional artisan's fee, while the whole amount of the silver was used in the fabrication of the idol. Kuenen, however, thinks that the author intended to show that the mother broke her vow, and that Micah desired to throw contempt on the idol cult of Dan. Further, the critics do not explain precisely the name of Micah's residence, nor the phenomenon of a Levite descended from Judah. Wellhausen's opinion that the term לוי means not a Levite, but one exercised in the cult of a divinity, is shown by the context to be an erroneous one. Halévy's theory is that the whole narrative belongs to one author, whose object was to show the origin of both temples, that of Beth-el and that of Dan, and who twice mentions Mount Ephraim, meaning thereby Beth-el (comp. Josh. xvi. 1). Thus Beth-el, having previously been the place of a private shrine which was subsequently transported to Dan, became, like Dan, the place of a public temple. The Judah from whom the Levite was descended (Judges xvii. 7) was not the patriarch, but the ancestor of a Levite family (comp. Neh. xii. 8; in Ezra ii. 40 הודויה may be an anagram of יהודה). The residence of a Levite at Beth-lehem, which was not among the cities allotted to the Levites, shows that a temple of Yhwh with a Levitical service existed there (comp. Judges xix. 18). The author points out that the Levite was of the tribe of Levi, namely, a descendant of Moses, in whose name a suspended "nun" was interpolated by the Masorites out of respect for the lawgiver (see Jonathan No. 1). With regard to the apparent discrepancy between verses 30 and 31 of Judges xviii., the word הארץ in verse 30 was corrected to הארן by Ḳimḥi, then by Hävernick, Hengstenberg, and Bleek, the passage thus reading "till the deportation of the Ark," referring to the capture of the Ark in the battle with the Philistines described in I Sam. iv. 4, 11. This renders possible a perfect agreement between the two verses.

3. Son of Merib-baal (I Chron. viii. 34, 35; ix. 40, 41) or Mephibosheth (II Sam. ix. 12; A. V. "Micah"; R. V. "Mica"), and grandson of Jonathan. **4.** Head of the Uzziel branch of the Kohathite Levites in the time of David (I Chron. xxiii. 20; xxiv. 24, 25). **5.** A Reubenite; ancestor of the prince of that tribe, Beerah, whom Tiglath-pileser carried into captivity (*ib.* v. 5–6). **6.** Contemporary of Josiah, and father of Abdon, one of Josiah's messengers to Huldah (II Chron. xxxiv. 20). In the parallel account of II Kings xxii. 12 he is called "Micaiah," and his son's name is given as "Achbor." **7.** A Levite of the family of Asaph whose descendants lived in Jerusalem (I Chron. ix. 15; Neh. xi. 17, 22). **8.** A Simeonite; father of Ozias, one of the rulers of Bethulia (Judith vi. 15).

E. G. H. M. Sel.

MICAH, BOOK OF.—Biblical Data: The sixth book in the collection known as "The Twelve Minor Prophets"; it is ascribed to Micah the Morasthite (see Micah No. 1). It consists of seven chapters, the contents of which are as follows: Ch. i.: The idolatry of Samaria and Jerusalem are denounced; the prophet laments their fall and exhorts the people to mourning. Ch. ii.: Denunciation of oppression; prediction of the punishment of the people therefor; the restoration of Israel foretold. Ch. iii.: The prophet reproves first the princes for their cruelty, then the false prophets, who are the cause of all the evil. He again reproves the princes for their oppression, which, he says, will cause the ruin of Jerusalem. Ch. iv.: In poetical language the restoration of Jerusalem and of the glory of the house of the Lord and the victory of Israel over the other nations are foretold. Ch. v.: Prediction that a powerful king of Judah will vanquish the other nations, particularly Ashur, and will destroy idolatry. Ch. vi.: Israel is reproved for its sins, particularly its injustice; its punishment is prophesied. Ch. vii.: The lack of righteous men and the corruption of Israel are lamented; the prophet comforts Israel, promising that it will be restored to its land and will triumph over its enemies.

——**Critical View:** With regard to the period of Micah's activity, it has been remarked under Micah (No. 1) that there is a difference between the superscription of the Book of Micah, where it is said that Micah began his prophetical career in the days of Jotham, and Jer. xxvi. 18, where his prophecies are confined to Hezekiah's reign. But a closer examination of the prophecies themselves may lead to the acceptance of a period between the two; for it is evident from Mic. i. 2 *et seq.* that Micah prophesied before the fall of Samaria, which, contrary to II Kings xviii. 10, took place under the reign of Ahaz, as may be inferred from a comparison between II Kings xviii. 13 and the cuneiform inscriptions (see Hezekiah, Critical View). Hence it may be concluded that Micah prophesied as early as the reign of Ahaz; but nothing in his prophecies shows that they were pronounced earlier than that period. It does not follow, however, that the above-cited passage of Jeremiah really conflicts with this view; for it may be that Hezekiah's reign is mentioned alone either because it was more important than that of his predecessors or because the redaction of Micah's prophecies possibly took place during the rule of that king.

As the opening words of the book, "Hear, all ye people!" are the same as those terminating the prophecy of Micaiah, the son of Imlah (I Kings xxii. 28), it may be that the latter was identified with Micah by the compiler of the Book of Kings, as he was later by pseudo-Epiphanius (see Micah No. 1). The termination of Micaiah's prophecy with the identical words of the beginning of the Book of Micah seems to indicate in the former an allusion to the latter (comp. end of II Chron. with beginning of Ezra). Hengstenberg ("Christologie des Alten Testaments," i. 475) and Keil ("Lehrbuch der Historisch-Kritischen Einleitung in die Schriften des Alten Testaments," §§ 92, 93), however, suppose that the words of Micaiah in I Kings (*l.c.*) were added later, in the eighth century B.C.

Contents and Unity.

With regard to the division of the contents modern critics do not agree. Some divide them into three parts, ch. i.-ii.; iii.-v.; vi.-vii.; others, into two main divisions: prophetic-political, ch. i.-v.; and reflective, ch. vi.-vii. The question arises whether the whole of the book was written by Micah. It is generally accepted that the first three chapters, apart from ii. 12-13, belong to him. He begins with announcing the divine judgment upon Samaria and Judah (ch. i.), and then states the reason for that judgment (ii.-iii.). The two verses ii. 12-13 are considered by Stade and Kuenen as of the exilic, and by Wellhausen as of the post-exilic, period; and Micah's authorship of them is denied by all the critics. Ch. iv.-v., which refer to the Messianic time, seem to have emanated from some other hand, for the following reasons: (1) the contrast of these chapters with iii. 12; (2) the nature of certain verses—for instance, "and thou shalt come to Babylon" (iv. 10)—shows clearly that they were not pronounced by Micah (comp. Hartmann, "Das Buch Micha Neu Uebersetzt und Erklärt," 1800); (3) the ideas set forth in certain passages (*e.g.*, iv. 11-13, v. 9-13) were not current in the time of Micah. Ch. vi.-vii. 6, representing Yhwh's controversy with Israel, the denunciation of the corruption of the people, and the prophet's lament over the decay of the Israelites, might from their contents proceed from Micah; but vii. 7 and the following verses are considered by most of the critics as spurious, inasmuch as the fall of Jerusalem, which is foretold in the preceding chapter, is here stated as having already taken place (comp. Driver, "Introduction," pp. 310 *et seq.*).

Other theories concerning the composition of the book are advanced, among which that of Elhorst, in his "De Profetie van Micha" (1891), is the most peculiar. He thinks that, owing to a misunderstanding on the part of the transcriber, the arrangement of the chapters is a confused one, and that the true order should be: i.; ii. 1-5; iii. 1-5; ii. 6-11; iii. 6-11; ii. 12 *et seq.*; iii. 12; vi. 1-5; vii. 1-6; vi. 6-16; vii. 13, 7-12, 14-20; iv. 1-8; v. 1-7; iv. 9-14; v. 8-14. He admits, however, that iv. 9-14 and v. 8 are post-exilic. This arrangement is plausible to a certain extent, but the location of iii. 12 after ii. 13 and of vii. 13 before vii. 7 is impossible. Finally, it may be remarked that the words of iv. 1-3 are identical with those of Isa. ii. 2-4, and that most probably they were interpolated later by the transcriber.

Style.

Micah's language is classical. With regard to rhetorical peculiarity he stands between Hosea and Isaiah, but nearer to the latter than to the former; for although, like the former, he is sometimes abrupt, he is similar to the latter in the mingling of mildness and strength, of gentleness and elevation. Another point of similarity between Micah and Isaiah is the frequent use of paronomasia (comp. Mic. i. 10-15, ii. 4), with the difference that Isaiah's scope is greater than that of Micah, who in his prophecies lingers among the towns of the maritime plain, wherein was his birthplace. As to his message, Micah, like Isaiah, attacks the false prophets (*ib.* iii. 6-8; comp. Isa. xxix. 10 *et seq.*), but he goes even further than Isaiah in warning against the overvaluation of sacrifices (Mic. vi. 6-8; comp. Isa. i. 11 *et seq.*), and in showing that the family of David must lose the throne before the most perfect scion will be born (Mic. v. 1 *et seq.*; comp. Isa. xi. 1 *et seq.*).

MICHA (מיכא): **1.** Son of Mephibosheth (see Micah No. 3). **2.** One of the Levites who sealed the covenant with Nehemiah (Neh. x. 11).

E. G. H. M. Sel.

MICHAEL (מיכאל): One of the archangels ("one of the chief princes"; Dan. x. 13), who is also represented as the tutelary prince of Israel (*ib.* x. 21, xii. 1). The signification of the name (= "Who is

Israel's Advocate.

like El"?) was recognized by the Talmudists, who found an allusion to it in Ex. xv. 11 (מי כמכה) and in Deut. xxxiii. 26 (אין כאל), combining the first word of the former passage with the second of the latter (Num. R. ii. 9). According to Simeon b. Lakish, however, the names of the angels were brought by the Jews from Babylon (Yer. R. H. 54d; Gen. R. xlviii. 9). Upon the basis of the above-cited passages from the Book of Daniel (where Michael is represented first as helping Daniel in his dispute with the angel of Persia and then as helping Israel in time of trouble—that is, in the Messianic time—and where he is styled "your prince") Michael is specially designated in early Jewish writings and very frequently in the Book of Enoch as "the prince of Israel" (שרם של ישראל), and in later Jewish writings, particularly in cabalistic works, as "the advocate of the Jews." It is for this reason that he is represented as the angel of forbearance and mercy (Enoch, xl. 3) who taught Enoch the mysteries of clemency and justice (*ib.* lxxi. 2).

Wrestles with Jacob.

Being the prince or advocate of Israel, Michael had to fight with the princes of the other nations (comp. Dan. x. 13) and particularly with Samael, Israel's accuser. His enmity with Samael dates from the time when the latter was thrown down from heaven. Samael took hold of the wings of Michael, whom he wished to bring down with him in his fall; but Michael was saved by God (Pirḳe R. El. xxvi.). The Rabbis declare that Michael entered upon his rôle of defender at the time of the Patriarchs. Thus, according to Eliezer b. Jacob, it was Michael who rescued Abraham from the furnace into which he had been thrown by Nimrod (Gen. R. xliv. 16). It was Michael, the "one that had escaped" (Gen. xiv. 13), who told Abraham that Lot had been taken captive (Pirḳe R. El. *l.c.*), and who protected Sarah from being defiled by Abimelech (*ib.*). He announced to Sarah that she would bear a son (comp. Gen. xviii. 10); and he rescued Lot at the destruction of Sodom (B. M. 86b; comp. Gen. R. l. 2). Michael prevented Isaac from being sacrificed by his father by substituting a ram in his place ("Yalḳ. Reubeni," section "Wayera"), and saved Jacob, while yet in his mother's womb, from being killed by Samael (Midr. Abkir, in Yalḳ., Gen. 110). Later Michael prevented Laban from harming Jacob (Pirḳe R. El. xxxvi.). It was Michael, too, who wrestled with Jacob and who afterward blessed him (Targ. pseudo-Jonathan to Gen. xxxii. 25; Pirḳe R. El. xxxvii.). The Midrash Abkir (*l.c.* 132) thus graphically describes the scene of the wrestling: "At the break of day companies of angels came, saying, 'Michael, the hour of singing in praise of the Lord has arrived.' Michael began to implore Jacob to cease wrestling, saying he was afraid the angels might burn him (Michael) for omitting to take part in the heavenly chorus. When Michael finally struck Jacob's thigh he was blamed by God for having caused a blemish in God's priest. Michael applied to his companion Raphael, who healed Jacob's wound. Then God appointed Michael to be the defender of Israel" (comp. "David," No. 13, "Yalḳ. Ḥadash," where it is said that Michael's appointment took place when Solomon had built the Temple). Michael saved Asenath, daughter of Shechem by Dinah, from being killed by Jacob's sons (Pirḳe R. El. xxxviii.), and Tamar from being burned (Targ. pseudo-Jonathan and Targ. Yer. to Gen. xxxviii. 25).

Teacher of Moses.

Michael exercised his function of advocate of Israel at the time of the Exodus also, when Satan accused the Israelites of idolatry and declared that they were consequently deserving of death by drowning in the Red Sea (Ex. R. xviii. 5). But according to Midr. Abkir (Yalḳ., Ex. 241), when 'Uzza, the tutelar angel of Egypt, summoned Michael to plead before God, Michael remained silent, and it was God Himself who defended Israel. Michael led the Israelites during their forty years' wandering in the wilderness (Abravanel to Ex. xxiii. 20). Legend makes him the teacher of Moses; so that the Israelites are indebted to their advocate for the supreme good of the Torah. This fact is alluded to in Deut. R. xi. 6 in the statement that Michael declined to bring Moses' soul to God on the ground that he had been Moses' teacher. It is clearly stated in Apoc. Mosis, i. that Moses received the two tables through the mediation of Michael. In the Book of Jubilees (i. 27, ii. 1) the angel who is said to have instructed Moses on Mount Sinai and to have delivered to him the tables of the Law is most probably Michael.

Michael destroyed the army of Sennacherib (Ex. R. xviii. 5). He endeavored also to prevent Israel from being led into captivity by Nebuchadnezzar and to save the Temple from destruction; but the sins of the people were so great that he was powerless to carry his purposes into effect. "Michael, thy nation has sinned," God said. "Save them for the sake of the good men which they still have," Michael answered. "I will burn Israel with his good men," God replied (Yoma 77a; comp. Zohar, Ex. col. 414). According to Yalḳ., Lam. 1009, Michael and Gabriel pleaded for the Israelites, who, however, were doomed, and the two angels were themselves compelled to set the Temple on fire. In later writings Michael is represented as refuting also on this occasion the accusations of Samael (Zohar, Mishpaṭim). There is a legend which seems to be of Jewish origin, and which was adopted by the Copts, to the effect that Michael was first sent by God to bring Nebuchadnezzar against Jerusalem, and that Michael was afterward very active in freeing his nation from Babylonian captivity (Amélineau, "Contes et Romans de l'Egypte Chrétienne," ii. 142 *et seq.*). According to most of the rabbis, Michael saved Hananiah and his companions from the furnace (Gen. R. xliv. 16). Michael was very active in the time of Esther: "The more Haman accused Israel on earth, the more Michael defended Israel in heaven" (Esth. R. iii. 8). It was Michael who reminded Ahasuerus that he was Mordecai's debtor (Targ. to Esth. vi. 1); and there is a legend that Michael appeared to the high priest Hyrcanus, promising him assistance (comp. Josephus, "Ant." xiii. 10, § 3).

Michael will continue his advocacy to the very end; and he will contend with Samael for the liberation

Continuous Guardianship.

of Israel from Edom or Rome ("Yalḳ. Ḥadash," "Galut," No. 11). Samael will be subdued by Michael; but when the latter asks God to help Israel, God will say, "Israel should turn toward Me, be it only as far as the point of a needle." When Israel turns toward the Lord, his advocate, Michael, will plead in his favor (Pesiḳ. R. 44 [ed. Friedmann, p. 185a]). According to Ex. R. (xviii. 5), Michael and Gabriel will have the charge of vindicating Israel against Edom; but Rabbi's opinion is that Michael alone will act. He will, besides, cleanse Israel from the wicked people ("Otot ha-Mashiaḥ," in Jellinek, "B. H." ii. 61). It was Michael's fight with Samael (with the devil in Assumptio Mosis, x.) which gave rise to the well-known legend of Michael and the dragon. This legend is not found in Jewish sources except in so far as Samael or Satan is called in the Cabala "the primitive serpent" ("naḥash ha-ḳadmoni").

The idea that Michael was the advocate of the Jews became so prevalent that in spite of the rabbinical prohibition against appealing to angels as intermediaries between God and His people, Michael came to occupy a certain place in the Jewish liturgy. Apart from the word סניגר, which occurs frequently and which refers to Michael, there are two prayers beseeching him as the prince of mercy to intercede in favor of Israel: one composed by Eliezer ha-Ḳalir (Bartolocci, "Bibl. Rab. Magna," i. 192 *et seq.*), and the other by Judah b. Samuel he-Ḥasid (MS. De Cambrai No. 946, fol. 110). But appeal to Michael seems to have been more common in ancient times. Thus Jeremiah is said (Baruch Apoc. Ethiopic, ix. 5) to have addressed a prayer to him. "When a man is in need he must pray directly to God, and neither to Michael nor to Gabriel" (Yer. Ber. ix. 13a).

Michael as High Priest.

The conception of Michael as an advocate always interceding on behalf of Israel gave rise to another idea, that of his being a high priest making atonement for his people. Ezra recognized the place of the altar by seeing there one on which Michael, the great prince, was in the act of sacrificing (Zeb. 62a; comp. Men. 110a). The fourth heaven is called "Zebul" (זבול) because it contains the heavenly Jerusalem, the Temple, and the altar on which Michael, the great prince, sacrifices (Ḥag. 12b). A different statement is given in "Seder Gan 'Eden" (Jellinek, *l.c.* iii. 137), which places Michael in the upper heaven called "'Arabot" (ערבות; comp. Midr. Abkir in Yalḳ., Gen. 132). This idea was afterward greatly developed by the cabalists. Michael is identified with Melchizedek ("Yalḳ. Ḥadash," "Mal'akim," No. 19); and the words "and the priest shall pronounce him clean" (Lev. xiii. 23) are explained in the "Tiḳḳune Zohar" (fol. 2b) as referring to Michael, the high priest, acting as the representative of clemency. Michael, the high priest, is the standard-bearer of God (Joseph Gikatilla, "Sha'are Orah," p. 60c). The institution of tithes is ascribed to Michael (Targ. pseudo-Jonathan to Gen. xxxii. 25); and his place is appointed in the east, with the tribe of Levi ("Midr. Konen," in Jellinek, *l.c.* ii. 39).

With regard to the nature of the offerings which Michael brings to the altar, one opinion is that they are the souls of the just, while according to another they are fiery sheep (Tos. to Men. 110a). The former opinion, which has become prevalent in cabalistic writings ("Seder Gan 'Eden," *l.c.*; "Yalḳ. Ḥadash," "Neshamot," No. 31; "Reshit Ḥokmah," ch. iii.), explains the important position occupied by Michael in Jewish eschatology. The idea that Michael is the Charon of individual souls, which is common among Christians, is not found in Jewish sources, but that he is in charge of the souls of the just appears in many Jewish writings. In the Testament of Abraham (Robinson, "Texts and Studies," ii. 2, Cambridge, 1893), which is Jewish, it is said that Michael was ordered by God to bring Abraham's soul to Him. He had a discussion with Samael over the soul of Moses (Deut. R. xi. 6; "Midr. Peṭirat Mosheh," in Jellinek, *l.c.* vi. 75 *et seq.*; comp. Jude 9). According to the Zohar (Gen., col. 303), Michael accompanies the souls of the pious and helps them to enter the gates of the heavenly Jerusalem. In "Midr. ha-Ne'elam" ("Zohar Ḥadash," p. 19c), however, it is said that Michael and his host are stationed at the gates of the heavenly Jerusalem and give admittance to the souls of the just. Michael's function is to open the gates also of justice to the just (comp. Baruch Apoc. Ethiopic, ix. 5). David was not admitted there till the Temple was built by Solomon; then he was introduced by Michael ("Yalḳ. Ḥadash," "David," No. 13). At the resurrection Michael will sound the trumpet, at which the graves will open and the dead will rise ("Otot ha-Mashiaḥ," in Jellinek, *l.c.* ii. 61-62; comp. Dan. xii. 1). It is in this sense that the Falashas mention Michael in their prayer ("Prières des Falashas," ed. J. Halévy, pp. 48-49, Ethiopic text). There is another haggadah to the effect that when the Messiah comes Michael and Gabriel will place themselves at the entrance of paradise and in the name of God greet the just (Jellinek, *l.c.* vi. 148). Michael's residence will be in a range of seven mountains, surrounded by a grove of fragrant trees, among which one will be particularly distinguished for its beauty. The highest of the seven mountains will be the seat of the Lord, and the most fragrant tree, which will be inaccessible to any human being till the Day of Judgment, will be given to the pious (Enoch, xxiv.-xxv. 5). Contrary to Dan. xii. 2, it is said in "Otiyot de-R. 'Aḳiba," *s.v.* זרבבל (in Jellinek, *l.c.* iii. 28), that at the advent of the Messiah, God will give the keys of hell to Michael and Gabriel, who will bring the souls of the wicked into paradise.

Michael as Guide of Souls.

Michael's Mount.

It is quite natural that, owing to his position with regard to the Jews, Michael should be represented in the Haggadah as the most prominent of the archangels. He is called by Daniel (Dan. xii. 1) "the great prince," and his greatness is described at length in later Jewish writings. He was one of the seven archangels first created (Enoch, xc. 21-22; Targ. Yer. to Deut. xxxiv. 6 gives only six), but among these seven four excel, and Michael is the chief of the four. Both he and Gabriel are called "great princes"; but Michael is higher in rank than

Michael and Gabriel.

Gabriel (Ber. 4b; Yoma 37a). He is the viceroy of God, who rules over the world (Enoch, lxix. 14 *et seq.*), and wherever Michael appears the Shekinah also is to be found (Ex. R. ii. 8). Michael is on the right of God's throne, while Gabriel is on the left ("Haggadat Shema' Yisrael," in Jellinek, *l.c.* v. 166; Targ. to Job xxv. 2; Enoch, xl. 9). Four armies of angels sing in praise of the Lord, the first being that of Michael at the right hand of God (Pirḳe R. El. iv.: "Hekalot," in Jellinek, *l.c.* ii. 43–44). A similar tradition is given in "Seder Gan 'Eden" (*l.c.* p. 138): Michael's place is by the first river, Pison, while Gabriel's is by the second, Gihon. It is Michael who, on account of his occupying the first place near God, receives the prayers of men from the angels and presents them to God (Baruch Apoc. Slavonic, xii.). His position makes him the companion of Meṭaṭron (Zohar, i. 149b).

As an angel of nature, Michael is represented as of the element of water, on account of which he is the prince of water, while Gabriel is the prince of fire ("'Ammudeha Shib'ah," p. 49c; "Berit Menuḥah," 37a; and elsewhere). This is probably the origin of the haggadah that when Solomon married Pharaoh's daughter, Michael drove into the bed of the sea a stick around which slime gathered and on which, later, Rome was built (Cant. R. i. 6). In Sanh. 21b and Shab. 56b, however, this is ascribed to Gabriel, owing to a confusion which occurs also in Targ. to Job xxv. 2, where Michael is called the prince of fire. Michael is really the prince of snow, which is the element of water (Deut. R. v. 12); and he is also the angel of silver, while Gabriel is the angel of gold ("Yalḳ. Ḥadash," "Mal'akim," No. 75). Michael presides over the planet Mercury and consequently over Wednesday (Abraham Avenar, in Münster, "Calendar Hebræorum," Basel, 1527). The same statement is given in the Hebrew manuscripts Paris No. 602 (fol. 142a) and No. 603 (fol. 125a), both containing cabalistic formulas. But it would more befit Michael to preside over Saturn and be the angel of Saturday; and this position is ascribed to him in "Sefer Razi'el," pp. 8a, 17b. He presides over the second solar period ("teḳufah") and over the south wind, which blows during that season (*ib.* 7a; Paris MS. No. 602, fol. 122a). He is the third of the "figure equivalents" ("Ḳeneh Binah," p. 19a); and in enchantment his name is pronounced to charm reptiles ("Sefer Razi'el," p. 4a). See Angelology.

J. M. Sel.

——**In Arabic Literature:** Michael is called in Arabic literature "Mika'il" or (in the Koran) "Mikal." He is one of the four archangels, and, according to Arabic tradition, he occupies a similar position among the Jews to that occupied by Gabriel among the Arabs; that is to say, he is their peculiar guardian. In the Koran Michael is mentioned once only, in sura ii. 92. In his commentary on verse 91 of that sura, Baiḍawi relates that on one occasion Omar went into a Jewish school and inquired concerning Gabriel. The pupils said he was their enemy, but that Michael was a good angel, bringing peace and plenty. In answer to Omar's question as to the respective positions of Michael and Gabriel in God's presence, they said that Gabriel was on His right hand and Michael on His left. Omar exclaimed at their untruthfulness, and declared that whoever was an enemy to God and His angels, to him God would be an enemy. Upon returning to Mohammed, Omar found that Gabriel had forestalled him by revealing the same message, which is contained in verse 92. The commentators state with reference to sura xi. 72 that Michael was one of the three angels who visited Abraham.

In Arabic tradition Michael always appears as second to Gabriel. When God is creating Adam He sends first Gabriel and then Michael to fetch the clay out of which man is to be formed. Both are restrained by the earth's protests; only Israfil pays no heed to them. When Adam and Eve are expelled from paradise, Gabriel is sent to the former, and Michael to the latter, to impart comfort. On his death-bed Mohammed stated that Gabriel would be the first and Michael the second to pray over him.

It is unusual for Michael to be sent independently, as in the story of St. George, where Michael is commissioned to destroy the brazen statue in which St. George is to be burned alive (Zotenberg, "Chronique d'Abu Djafer . . . Tabari," i. 30, 73; ii. 61; iii. 213, Paris, 1867–71). At the last day Michael will be one of the four angels who will survive after every other creature has been destroyed.

MICHAEL ḤASID. See Jehiel Michael ben Judah Löb.

MICHAEL, HEIMANN JOSEPH: Hebrew bibliographer; born at Hamburg April 12, 1792; died there June 10, 1846. He showed great acuteness of mind in early childhood, had a phenomenal memory, and was an indefatigable student. He studied Talmudics and received also private instruction in all the branches of a regular school education. He was a born bibliophile, and began to collect valuable works when still a boy of twelve. With his progress in Hebrew literature his love for books increased also, the result of which was his magnificent library of 860 manuscripts and 5,471 printed works, covering all branches of Hebrew literature. There were few books in his collection which he had not read; and he undertook the preparation of a full catalogue of it. As far as he accomplished this task, it was the foundation of the "Oẓerot Ḥayyim, Katalog der Michael'schen Bibliothek," Hamburg, 1848.

Michael took an interest not only in Jewish literature, but in all the intellectual movements of the day, as is shown by the large number of contemporary books and leaflets found in his library. He never wrote directly for publication; but many scholars applied to him for information, and this he never withheld. His correspondence with Leopold Dukes, Franz Delitzsch, Wolf Heidenheim, Rapoport, Luzzatto, Gesenius, Lebrecht, Akiba, Eger, and Leopold Zunz is of great literary interest. Michael's only independent work was "Or ha-Ḥayyim" (Frankfort-on-the-Main, 1891), a comprehensive bibliographical and literary-historical dictionary of rabbinical literature, edited by his son, with preface by A. Berliner; it covers, however, only a few letters of the alphabet.

Bibliography: Zunz, *Z. G.* p. 244, Berlin, 1845; *Ozerot Ḥayyim*, Preface, Hamburg, 1848; *Allg. Zeit. des Jud.* 1846, p. 224.

S. I. War.

MICHAEL, ISAAC: German laryngologist; born at Hamburg Nov. 16, 1848; died there Jan. 7, 1897. He studied at the universities of Heidelberg, Leipsic, Berlin, and Würzburg (M.D. 1873), became assistant at the throat, and later at the ear, dispensary of the University of Vienna, and in 1876 returned to Hamburg, where he practised until his death. His works include "Gesang- und Registerbildung" (Hamburg, 1887) and "Gesch. des Aerztlichen Vereins von Hamburg" (*ib.* 1896). He translated Mackenzie's "Hygiene of the Vocal Organs" (*ib.* 1889).

Bibliography: Pagel, *Biographisches Lexikon*.

S. F. T. H.

MICHAEL JESOFOVICH: Senior of the Jews of Lithuania under King Sigismund I. of Poland; born at Brest-Litovsk about the middle of the fifteenth century; died there between 1530 and 1533. Michael, like his brothers Abraham and Isaac, was among the most prominent tax-collectors and lease-holders in Lithuania during the last quarter of the fifteenth and the first quarter of the sixteenth century. Exiled with the other Jews of Lithuania by Alexander Jagellon in 1495, he emigrated with his brothers to Poland. His brother Abraham embraced Christianity and soon returned to Lithuania; but Michael remained true to his religion, and did not again set foot in his native city until 1503, when permission to return was given to the expelled Jews.

King Sigismund I., by a decree dated Wilna, Feb. 27, 1514, appointed Michael to the newly created seniorship over the Jews of Lithuania. In his capacity as senior he not only was to serve as mediator between the Jews and the king, but was also empowered to judge and to punish the Jews, in keeping with the rights granted to them, and to impose a fine or even a term of emprisonment on the guilty. Michael evinced his piety by attempting to force the Karaite Jews of Lithuania to conform to the doctrines of rabbinical law; but the Karaites, who possessed a charter of privileges granted them by Grand Duke Witold, refused to acknowledge Michael's authority, and the matter was decided in their favor by the king.

This appointment, while it shows the favorable attitude of Sigismund toward his Jewish subjects, was actuated in the main by his desire to insure a thorough and prompt collection of the taxes imposed on the Jewish communities, and to reward the valuable services rendered to the crown by Michael and his brother Abraham. On the whole, however, the office of senior was honorary and nominal, since the concentration of the powers of the several communities in the hands of one person of the same religion was antagonistic to the traditions of the Lithuanian Jews. While it is true that soon after his appointment Michael excommunicated Itzko and Berek, two Jews of Brest, as traitors against God and the king (the said Jews having been sentenced to excommunication with Prince Michael Krinsky), and ordered the excommunication "to be announced by trumpets," it does not follow that Michael was invested with extraordinary judicial powers, since he was merely carrying out an order of the king, and similar excommunications had been proclaimed before (Bershadski, "Litovskiye Yevrei," p. 358). The fact that Michael was authorized by the king to employ a doctor (rabbi) shows that he himself was not a rabbi, and was not privileged according to Jewish law to assume the functions of one. Documents of a later date no longer refer to him as the senior, but apply to him the title of "fiscal agent to the king."

His Commercial Activity.

Michael's commercial enterprises covered a period of almost half a century, and were intimately connected with the prosperity of the country. He took an active part in the affairs of his brother Abraham even before the expulsion of the Jews from Lithuania, and formed in 1487 with his brother Isaac a partnership which continued for forty years. In documents of 1516 and of subsequent date Michael is mentioned as collector of the king's taxes of Lithuania and as farmer of the salt- and wax-taxes of Brest. In 1520 he was granted the farming of the customs duties of Vladimir and Lutsk; and in 1522 he farmed the wax- and weights-taxes in Moghiief. Soon after this he leased the inns of Vitebsk for a period of three years, and a year later he leased the inns and farmed the taxes of Brest, Dorogitz, Grodno, Byelsk, Lutsk, and Vladimir. In 1524 he farmed, in partnership with Michael Shpis, the customs duties of the entire duchy of Lithuania. From 1525 to 1529 he extended his operations to the farming of the taxes of Minsk and Novgorod. Aside from the collection of taxes and duties, Michael carried on also an extensive business in various articles of merchandise, such as cloth. Not content with all this, he with the king's consent advanced money and goods to the king's officers, protecting himself by liens on their salaries, while the king received for his good offices a certain share of the profits ("Dokumenty i Regesty," No. 1, vol. viii.). The extremely valuable services rendered by Michael to his sovereign and the influence of his immense financial interests finally led the king to raise him to the hereditary nobility with the coat of arms of Leliva, formerly belonging to George Gyebovich, regent of Smolensk (*ib.*, No. 96).

The extent of Michael's property may be gathered from a document which refers to the division in 1527 of the estate, real and personal, belonging to him and to his brother Isaac, and which enumerates their respective possessions (*ib.*, No. 119).

After Michael's death his son Abraham was confirmed (March 15, 1533) in the privileges granted to the former ("Regesty," No. 261).

H. R.

MICHAEL, MAX: German painter; born in Hamburg March 23, 1823; died at Berlin March 24, 1891. He studied art first at the Kunst-Akademie in Dresden, then for five years at Paris, after which he spent twenty years at Rome and Venice. In these cities he produced his first work, "Country Girl Writing" (1866), now in the Ravené Gallery, Berlin. In 1870 he returned to Berlin, and five years later was appointed professor of painting in the Royal Academy. He held this office until his death. Other works of his are: "Girls' School in the Sabine Mountains," in the Kunsthalle, Hamburg; "The Visit of the Cardinal to the Monastery"; "Job Disputing with His Friends"; "Bertini Painting an Altar-Piece in the Monastery of the Camaldolites."

MICHAEL BEN MOSES COHEN: Palestinian rabbi and liturgist; lived at Jerusalem in the seventeenth century. He wrote "Moreh Ẓedeḳ" (Salonica, 1655), an index to the laws contained in the Shulḥan 'Aruk, Ḥoshen Mishpaṭ, showing where they may be found in other works of the Poseḳim as well as in the responsa of later rabbis. There is also ascribed to him another work, "'Et le-Ḥenenah" (Venice, 1708), prayers to be recited at the western wall of the ancient Temple, with additions by the author's son Moses. According to Nepi-Ghirondi ("Toledot Gedole Yisrael," p. 228), however, Michael only revised and edited that work.

BIBLIOGRAPHY: F. Delitzsch, *Gesch. der Jüdischen Poesie*, pp. 56-57; Fürst, *Bibl. Jud.* i. 182; Steinschneider, *Cat. Bodl.* No. 3271; idem, *Jewish Literature*, p. 242.

A. M. SEL.

MICHAEL, MOSES GERSON: American merchant and capitalist; born Aug. 15, 1862, at Jefferson, Ga. At an early age he graduated as B.E. from the University of Georgia with highest honors, and shortly afterward entered with his brother **Simon** upon a commercial career at Athens, Ga. Here he has amassed a fortune in the dry-goods trade.

Michael has been an influential factor in the development of northeastern Georgia, having been identified with a number of large industrial enterprises. He holds the rank of lieutenant-colonel in the state militia, and was aide-de-camp to Governor Candler during his administration. He is a member of the Democratic executive committee of the Eighth Congressional District, and a potent factor in the councils of the party.

For a number of years Michael has been superintendent of the Jewish Sabbath-school at Athens, which he makes his peculiar charge.

A. H. E. C.

MICHAEL BEN SHABBETHAI (called also **Magister Zematus**): Rabbi of Rome in the sixteenth century. In a decision of 1539 his signature reads "Michael b. Shabbethai זמט," the last word being the name of a place in Africa whence probably Michael's ancestors originated, and becoming when Latinized "Zematus." Michael was a prominent cabalist and as such was the teacher of Ægidius of Viterbo and of Widmanstadt (Perles, "Studien," pp. 186, 189). Elijah di Nola (1555) speaks of Michael as the possessor of an excellent collection of cabalistic works (Perles, *l.c.* p. 217).

BIBLIOGRAPHY: Vogelstein and Rieger, *Gesch. der Juden in Rom*, ii. 92, 99, 260.

K. M. SEL.

MICHAEL BEN SHABBETHAI COHEN BALBO (called also **Michael Cohen of Crete**): Greek scholar, Hebrew poet, and preacher; born March 27, 1411. A manuscript preserved in the Vatican (No. 305) contains several works of his, namely: a poem composed in 1453 on the occasion of the capture of Constantinople by Mohammed the Conqueror and the cessation of the war; another poem (1456), lamenting his father's death; a homiletic commentary on Ps. xxviii.; and three sermons preached by Michael in Khania in 1471, 1475, and 1477 respectively. Vatican MS. No. 254 contains an account of a disputation ("wikkuaḥ") between Michael Cohen and Moses Cohen Ashkenazi on metempsychosis ("gilgul"). Zunz ("Additamenta," p. 320) is doubtful whether to identify the former with Michael b. Shabbethai or with Michael b. Elijah Cohen, copyist of Vatican MSS. Nos. 345 and 346 (fourth part). Steinschneider doubts the correctness of the name Michael b. Elijah. According to Assemani, the commentary on Averroes' commentary to Aristotle's "Physics" (i.-vi.), contained in the former manuscript, was made by a pupil of Michael Cohen of Crete. Wolf ("Bibl. Hebr." i., No. 1413), however, ascribes the commentary to Michael Cohen, calling him a disciple of Averroes. Wolf thinks also that the author of the account of the disputation is Michael b. Moses ha-Kohen, who, in collaboration with Abraham Samuel of Sofia, wrote the "Moreh Ẓedeḳ."

A work entitled "Sha'are Raḥamim" (Vatican MS. No. 30, 8), which is a supercommentary on Maimonides' commentary on the eleventh chapter of Sanhedrin, and a commentary on Ibn Ezra's hymn beginning "Eḥad lebaddo be-en samuk," both bear the name of Michael Cohen as author, who is supposed by Steinschneider to be identical with the subject of this article.

J. M. SEL.

MICHAELIS, JOHANN DAVID: Christian Orientalist and polyhistor; born at Halle Feb. 27, 1717; died at Göttingen Aug. 22, 1791; grand-nephew of Johann Heinrich Michaelis. He was educated at the university of his native city, and made scientific journeys in England and Holland, returning to lecture at Halle on Semitic languages and Bible exegesis. For nearly half a century he was professor at Göttingen University (he became assistant professor in 1746 and professor in 1750), where he lectured chiefly on Old Testament exegesis, Hebrew antiquities, Mosaic law, and the Semitic languages.

Besides writing a Hebrew grammar (1745) and a supplement to Hebrew lexicons (1784-92), Michaelis translated and commented upon the whole of the Old Testament (1769-83). He was also one of the first to write an introduction to the Old Testament (1787). His work on the Mosaic law ("Das Mosaische Recht," 1770-75) was one of the earliest scientific treatments of Jewish antiquities. Many of his essays on this subject appeared in the "Orientalische Bibliothek," edited by him from 1771 to 1791.

T. J.

MICHAELIS, JOHANN HEINRICH: German Christian theologian and Hebraist; born at Kletterberg July 26, 1668; died at Halle March 10, 1738. He studied Ethiopic under Ludolf at Frankfort-on-the-Main, and became assistant professor of Oriental languages at Halle in 1699 and professor of theology in 1709. His chief work was a text of the Hebrew Bible founded on Jablonski, but with a comparison of nineteen printed editions and five manuscripts of Erfurt. This was published in 1720 at Frankfort-on-the-Main and was reprinted throughout the eighteenth century. Some of his critical annotations were published separately in the same year. Michaelis wrote also a Hebrew grammar (1702); and two works on Hebrew accents (1696, 1700), the latter of which, "Institutio de Accentibus Prosaicis et Metricis," went through five further editions, and was for a long time the standard authority on the subject. He composed also the Latin translation of the Ethiopic psalter published by Ludolf.

MICHAELMAS GEESE. See Barnacle-Goose.

MICHAL (מוכל; lit. "rivulet"): The younger of the two daughters of Saul, probably by Ahinoam (I Sam. xiv. 49–50). David, then a boy of about sixteen, was to have married her sister Merab: but the latter having been given to another, and Michal having fallen in love with David, Saul consented to the marriage of the two last-named, not insisting on the customary dowry ("mohar"), but requiring that David kill a hundred Philistines. David killed double this number; and Michal became his wife (*ib.* xviii. 17–28).

Michal was instrumental in saving her husband when her father, in a fit of anger, attempted to kill him. She lowered him through the window and, to deceive and delay the king's messengers, substituted one of her teraphim in his place. On her stratagem being discovered she declared that David had threatened her with death if she did not let him go (*ib.* xix. 11–17). After David's escape Saul bestowed Michal upon Phalti ben Laish of Gallim (*ib.* xxv. 44). It would appear, however, that she was still regarded as the lawful wife of David; for at his earliest opportunity he claimed her from Saul's son, Ish-bosheth (II Sam. iii. 13–15), through Abner.

One incident, however, occurred which caused their relations to be greatly strained and which probably resulted in a separation. The Ark of the Lord having been brought to Zion, David indulged in a joyful religious dance, for which he was severely criticized by his wife (*ib.* vi. 16, 20). Either because of this incident or owing to several other causes combined, they never lived together again. According to one tradition, Michal spent her remaining years in bringing up the five children of her sister Merab (*ib.* xxi. 8, if the reading מרב be accepted instead of מיכל); according to another, she returned to Phalti ben Laish and lived as his protegée, though not as his wife (Targ. to Ruth iii. 3).

David seems not to have had any children by Michal (II Sam. vi. 23), though some authorities (*e.g.*, Rashi and Cheyne) claim that Ithream was the result of their union, and that "Eglah," the name of his supposed mother (*ib.* iii. 5), like "Michal," is merely a corrupted form of her real name, which must have been Abigail.

This Biblical story has inspired J. L. Gordon with the subject for his popular "Ahabat Dawid u-Mikal," which has been published in many editions.

J. J. S. R.

MICHEL JUD (usually called "Wealthy Michel"): A public character prominent in his day for wealth and influence; born about the end of the fifteenth century at Derenburg, near Halberstadt; died in 1549. He was described as of imposing appearance and eloquent of speech, and was regarded as an illegitimate son of one of the counts of Regenstein. His wife, Merle, was the daughter of Joseph of Schleusingen. Michel, being well-mannered, was received by princes and nobles, who courted him on account of his wealth. The elector Joachim of Brandenburg, Duke Friedrich of Liegnitz, and Landgrave Philip of Hesse were among those who maintained relations with him. On July 25, 1529, Duke Erich the Elder of Brunswick-Lüneburg, ignoring the wishes of the magistrates of the city of Hanover, granted Michel permission "to build a house in the new city in the suburbs of Hanover" and to dwell therein with his wife, his children, and his servants. Besides the house in Hanover, Michel owned one in Derenburg, one in Frankfort-on-the-Oder, and one in Berlin. He was in the good graces of the elector Joachim II., who on Feb. 27, 1544, sanctioned the jointure settled by Michel on his wife. From Duke Erich Michel received important commercial privileges, and his business relations extended from France to Silesia and Poland. He played an important part in the imperial diets also. In 1548 he appeared at the Diet of Augsburg in very costly garments, wearing heavy gold chains around his neck, riding on a richly caparisoned horse, and accompanied by a retinue of ten or twelve servants, all Jews. Shortly afterward he was taken captive by Magdeburg knights on Brandenburg territory, but escaped, and on his accusation the knights were taken to Torgau and condemned to death by order of Joachim II. Count Ulrich of Regenstein, who hated Michel and is said to have published a pamphlet against him, was forced by Joachim to sign a treaty favorable to him on May 15, 1549. Michel died a few days later as the result of a fall down a flight of stairs.

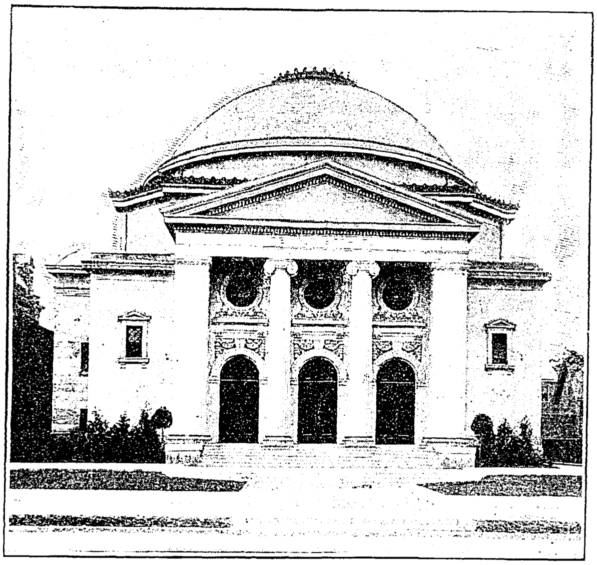
D. M. K.

MICHELSON, ALBERT A.: American physicist; born at Strelno, in the district of Bromberg, Prussia, Dec. 19, 1852. His father, **Samuel Michelson**, emigrated to the United States and settled in

San Francisco, where Albert Michelson received his early education. After leaving the high school he entered the United States Naval Academy, at Annapolis, Md., and graduated in 1873. For the purpose of extending his studies he went to Germany in 1880, entered the University of Berlin, and remained there for a short time. From Berlin he went to Heidelberg University and studied there until 1881. In that year Michelson resigned from the United States naval service and went to Paris, where he entered the Collège de France and the Ecole Polytechnique (1882). On his return to the United States he accepted the chair of physics at the Case School, Cleveland, Ohio, which position he resigned for the chair of physics at Clark University, Worcester, Mass. (1889). There he remained until, three years later, he was called to the professorship in physics at the University of Chicago. This office he still holds (1904).

Michelson has received the degrees of Ph.D. (hon.) from Stevens Institute, D.Sc. from Cambridge (Eng.), and LL.D. from Yale. He is a member of the National Academy of Sciences, a foreign member of the Royal Society (London), a corresponding member of the Academy of Sciences of the Institute of France, and a member of the International Committee on Weights and Measures. He was awarded the Rumford medal by the Royal Institution of Great Britain. His international scientific reputation is largely due to his determination of the velocity of light and to other experiments in the domain of optics which were marked by a high degree of accuracy. He designed a new form of spectroscope, and has largely contributed to the scientific journals the results of his researches on light.

A. F. H. V.



Temple Beth El, Detroit, Michigan.
(From a photograph.)

MICHIGAN : One of the Western states of the United States of America. There are no records of the settlement of Jews in Michigan prior to the year 1848, when about a dozen families of Bavarian Jews settled in Detroit. Within a decade a few of the original settlers had traveled to the so-called "copper country" in the upper peninsula of Michigan, where not a few laid the foundation of a comfortable fortune by peddling in the mining districts. The first Jewish organization in the state was the Beth El Society, out of which grew Congregation Beth El of Detroit. This was founded Sept. 22, 1850, by ten adult males, exactly the number required to form a minyan. The last of these charter members, Solomon Bendit, died at St. Clair, Mich., in the fall of 1902.

From 1850 until the first great influx of Russian Jews into America (1882) the Jewish population of Michigan grew gradually, being especially augmented by the relatives of the early settlers. Up to this time the Jews of Michigan were predominantly of German extraction, but the immigration of 1883 not only more than doubled the number of Jews resident in the state, but gave to the Russian and Polish Jews a large numerical majority. To-day, of the total number of the Jews of the state at least 65 per cent are of Russian or Polish nativity or extraction. In 1883 the Hebrew Relief Society of Detroit, assisted by the Baron de Hirsch Committee, settled a colony of Russian Jews near Bad Axe, Mich. About half of the original settlers are still there, having become successful and prosperous farmers.

There are no exact statistics of the Jews resident in Michigan, but data carefully compiled render it possible to estimate the number at 16,000 (out of a total population of 2,450,000), of which 12,000 must be credited to Detroit.

There are regularly organized congregations at **Detroit** (9), **Grand Rapids** (2), **Kalamazoo** (2), **Bay City** (2), **Alpena, Port Huron, Saginaw, Jackson, Battle Creek, Lansing,** and **Hancock**; and a number of cities support religious schools and cemeteries. The total value of real estate held by congregations in the state is about $300,000. Reform congregations at Detroit, Kalamazoo, Grand Rapids, and Bay City support regularly ordained rabbis, while some of the smaller cities have the ministrations of these same rabbis through a well-organized system of circuit preaching; others engage rabbis or rabbinical students for the high holy days.

All the large cities of the state have the usual benevolent societies, but, excepting in Detroit, there are none that have occasion to do any considerable work. At Detroit, however, the United Jewish Charities (organized Nov., 1899) carries on practically every phase of philanthropic work. It dedicated in Sept., 1903, a new and thoroughly equipped building of its own. About $18,000 is annually expended by the Jews of Michigan in organized philanthropy. See DETROIT.

All the principal lodges are represented in the cities of Michigan, notably the B'nai B'rith, Kesher shel Barzel, Brith Abraham, and Free Sons of Israel.

There are social clubs in Detroit, Kalamazoo, Grand Rapids, and Bay City, and educational organizations exist in the larger cities. Of these the most noteworthy are the Talmud Thora Association of Detroit, which owns a modern and splendidly equipped school-building; the Jewish Woman's Club of Detroit; and the Temple Literary Society of Kalamazoo. One Jewish newspaper, the "Jewish American," of Detroit, is published in Michigan. It is edited by Rabbi Leo M. Franklin.

Quite a number of Jews in Michigan have held public offices of importance. Among those at present (1903) in office are Charles C. Simons, state senator; Bernard Ginsburg, vice-president of the Municipal Lighting Commission of Detroit; Albert Kahn, art commissioner of Detroit; Samuel Folz, mayor of Kalamazoo; and M. Bloomrosen, mayor of Manistique.

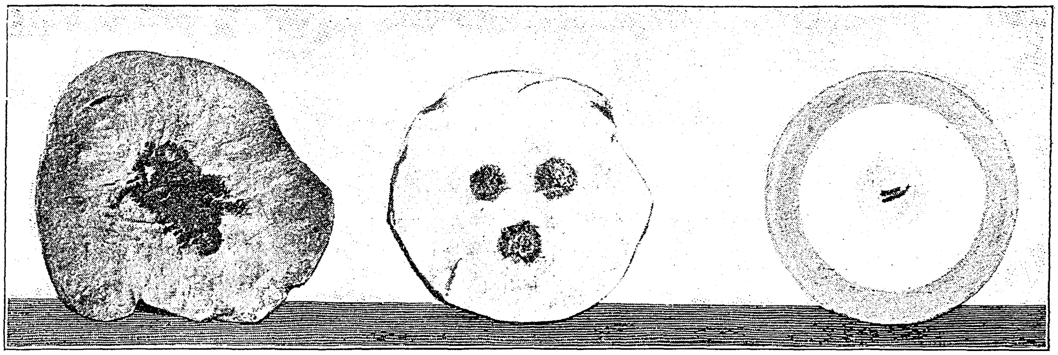
A. L. M. F.

MICHMASH (מכמש): A town of Benjamin, east of Beth-aven (I Sam. xiii. 2 *et passim* ; Neh. xi. 31). The form "Michmas" (מכמס) occurs in Ezra ii. 27 and in Neh. vii. 31, according to which the name may mean "hidden." Michmash is particularly known as the scene of the war between the Philistines and Saul and Jonathan (I Sam. xiii.-xiv.; see Jonathan No. 2); and it is praised in the Mishnah for its excellent wheat (Men. viii. 1).

J. M. Sel.

MICROCOCCUS PRODIGIOSUS ("the microbe of miracles"; known also as **the Microbe of Bleeding Hosts**): A microscopical organism, first mentioned in 1819 by an Italian doctor, Vincenzo Sette, who observed it on polenta, a sort of Italian maize pudding, and gave it the strange name of *Zaogalactina imetropha* (from *ζάω* = "I live"; *γαλαχτινή* = "gelatin"; *ἧμαι* = "I am placed upon"; *τροφή* = "food"); afterward called *Monas prodigiosa* by Ehrenberg (1848); *Micrococcus prodigiosus* by Cohn (1872); and *Bacillus prodigiosus* by Flügge (1886). It does not belong to the *Infusoria*, as Ehrenberg believed, but is a short, roundish bacterium, varying from about one half to one thousandth of a millimeter in size, motile, and bearing a variable number of cilia. It multiplies by simple division and forms no spores. Its colonies emit a disagreeable trimethylamin smell and generally produce a blood-red coloring-matter (sometimes pink, sometimes brownish). Cultures of this bacterium can be observed on gelatin, milk, meat, and other articles of food, especially on boiled potatoes (Fig. 1), on bread, and on wafers (Figs. 2, 3).

Its germs, though not very common, exist here and there in atmospheric dust, and are thus capable of accidentally producing "blood-spots" on different substances. These spots were formerly interpreted as indicating the wrath of Heaven; and they gave rise to the belief in miracles of "bleeding hosts," "bleeding bread," etc. Errera witnessed (1882) the "miracle" make its appearance unexpectedly on loaves of bread on which he was cultivating a certain fungus for phytochemical study. A well-known case is the epidemic in 1843 of "blood-spots" on the bread produced in the military bakehouses of Paris. The German naturalist Ehrenberg mentions (in "Ber. der Berl. Ak. der Wiss." 1848, p. 350; 1849, p. 106) a series of similar "miracles." A very characteristic one happened near Padua, Italy, in 1819, where Sette discovered its cause in the growth of the *Zaogalactina.* Another was observed by Ehrenberg in Berlin in 1848. Many of these "miracles" are of interest in connection with the subject of the desecration of the sacred hosts, the Jews having often been accused of transfixing those in which the microbes had appeared (see Brussels; Host, Desecration of).



Cultures of Micrococcus Prodigiosus on (1) Potato and on (2 and 3) Wafers.

The Myth of Host-Desecration.

It may be assumed that many of the stories of blood-miracles had no material basis, and were mere inventions; but as the *Micrococcus prodigiosus* grows quite easily on wafers, it is not unlikely that some accusations had their origin in the actual appearance of red spots on sacred hosts which had been kept damp and become exposed to atmospheric dust. Besides, other bacteria produce similar red spots, *e.g.*, *Bacillus kiliensis* Migula, *B. plymouthensis* Migula, *B. ruber* Cohn, and *Sarcina rubra* Menge; and other lower organisms, *e.g.*, *Saccharomyces glutinis,* on starch, potatoes, and bread; *Euglena sanguinea,* on standing waters, etc. Again, in other cases, red dust from ferruginous soils, and precipitated by a shower may have produced so-called "blood-rain" or "blood-stains."

Nor must it be forgotten that the Christian belief in transubstantiation lent special force to any superstition which associated the idea of blood with that of the sacred host. It is reported that this belief, which was at first much contested, became general only after the "miracle" of 1264 at Bolsena. A priest who doubted the real presence of Christ in the bread of communion suddenly saw "drops of blood" falling on his linen garment. This was considered a decisive proof; and Pope Urban IV. immediately ordered the event to be solemnized by the institution of Corpus Christi Day.

It is possible also, according to a passage of Lucian quoted by Ferdinand Cohn, that the Pythagorean prohibition against eating beans was due to the fact that bloodlike spots had been observed on cooked beans which had been preserved for some time. Perhaps the Jewish custom of placing some iron in contact with every dish, on four days of the year, in order to prevent the fall of blood, supposed to drop from heaven into the food (Teḳufah Drops), may also have originated in some such case of accidental blood-red spots.

J. L. Er.

MICROCOSM (Greek, *μικρός*, small; *κόσμος*, universe): Philosophical term applied to man when contrasted with the universe, which, in this connection, is termed the macrocosm. The idea of an analogy between man and the universe was expressed by the ancient Greek philosophers like Pythagoras, Plato, Aristotle, and especially by the Stoics, who developed it in connection with their doctrine of *πνεῦμα*. They considered the universe to be an animated being resembling a man and, like him, made up of a body and a soul. From this idea, exaggerated and developed, proceeded the doctrine of microcosm and macrocosm, according to which man is a universe in little, and the universe a man in great. The soul of man, which forms a part of the universal soul, is to his body what the universal soul is to the universe; and the rational part of the soul performs in man the same functions as the universal intellect in the universe. From this assimilation of man to the universe resulted the prevailing belief in a mutual influence exercised by each on the other.

Man a Universe in Little.

The doctrine of man's being a microcosm penetrated early into Jewish literature. It is found, though only in a haggadic form, in the Abot de-Rabbi Natan (ch. xxxi.), where every part of man's body is compared with a certain object. The hair represents the forest; the bones, woods; the lungs are the wind; the loins, counselors; the stomach, a mill; the knees, horses; when erect the man resembles the mountain, when recumbent the plain. Less fantastic analogies between man and the universe are given by Israeli ("Sefer ha-Yesodot," ed. Fried, p. 59), Saadia (commentary on the "Sefer Yeẓirah," iv. 1), and Shabbethai Donolo (commentary on Gen. i. 26). To them man is a microcosm owing to the correspondence of the four humors of which his body is made up to the four elements which constitute the universe: the blood corresponds to the air; the phlegm, to water; the black bile, to earth; and the yellow bile, to fire. Ibn Gabirol expounds in his "Meḳor Ḥayyim" (iii., § 6) the theory of microcosm and macrocosm in its metaphysical sense. "As the intellect," he says, "which is the most sublime and the most simple of all the substances of the microcosm, is not attached directly to the body, but has for intermediaries the animal soul and the ethical spirit, so the most sublime and the most simple substances of the macrocosm must have intermediaries by means of which they are attached to corporeality." In another passage of the same work (iii., § 44) Gabirol says: "If thou wishest to form an idea of the construction of the universe, thou hast only to observe the construction of the human body, in which thou mayest find an analogy." Very original analogies between man and the heavenly spheres are given by Baḥya ("Ma'ani al-Nafs"; Hebr. version by I. Broydé, ch. xiii., Paris, 1894). As there are nine spheres, one contained within the other, so is the human body constituted of nine various substances entering one into another; namely: the bones, which contain the marrow; the vessels and the veins, which contain the blood; the flesh; the skin; the hair; and the nails. To the twelve signs of the zodiac of the heavenly sphere correspond the twelve apertures in the human body, six to the right, and six to the left: the eyes, the ears, the nostrils, the mouth, the breasts, the navel, and the two other openings. As every sign of the zodiac is supervised by a power proceeding from the universal soul and returning to it, so is every limb of the human body governed by one of the powers of the soul. As the destinies of all living beings and natural phenomena are regulated by the seven planets, so the maintenance and good order of the human body depend on the seven powers of the soul, combined with the physical faculties of man. As the stars are constituted of bodies and souls that have a visible influence on the animal and vegetable kingdoms, so the human body is provided with seven physical powers by means of which it grows and maintains itself. To the seven intellectual powers of the heavenly spheres correspond the five senses with the faculties of perception and understanding, the first five resembling the five planets, and the last two the sun and the moon.

The Four Humors and the Four Elements.

Baḥya's Analogies.

The comparison between man and the universe is the central idea of the philosophical work of Joseph ibn Ẓaddiḳ entitled "'Olam Ḳaṭan" (The Microcosm). To it are devoted the end of the first division and the whole second division of the book. There

Joseph ibn Ẓaddiḳ.

In the Cabala.

is nothing in the world, says Ibn Ẓaddiḳ, that does not find a parallel in man. In him are found the four elements and their characteristics; for he passes from heat to cold, from moisture to dryness. He participates in the nature of minerals, vegetables, and animals; he comes into being and passes out of being like the minerals; nourishes and reproduces himself like the plants; has feeling and life like the animals. Further, he presents analogies to the characteristics of things: his erect figure resembles that of the terebinth; his hair, grass and vegetation; his veins and arteries, rivers and canals; and his bones, the mountains. In addition, he possesses the characteristics of the animals: he is brave like a lion, timid like a hare, patient like a lamb, and cunning like a fox. Moses ibn Ezra, in his "'Arugat ha-Bosem," says that man is called microcosm because he resembles the macrocosm in his composition, derivation, and creation. With the spread of the Peripatetic philosophy, in the twelfth century, the doctrine of microcosm, which entered Jewish philosophy through the Arabian Neoplatonists, and especially through the encyclopedists known as "the Brethren of Sincerity" (comp. Dieterici, "Die Anthropologie der Araber," pp. 41 *et seq.*). lost all its significance. Maimonides is concerned only with the original Aristotelian idea from which the doctrine evolved, namely, that the whole universe is one organic body, and that it has the properties of a living being, possessing life, motion, and a soul; but he does not seem to believe in the niceties of the analogy between the human body and the universe as established by the Neoplatonists (see "Moreh Nebukim," i., chap. lxxii.). However, the doctrine became prominent in the Cabala. "The human body," says the Zohar, "is the model of all the creations; it unites all the earthly and celestial worlds" (iii. 135a). In another passage it is said: "The human figure unites all that is above and all that is below; therefore the Ancient of Ancients has chosen it for His form" (iii. 141b). In "Tiḳḳune Zohar" man is regarded as a microcosm, and, viewed in his relation to the macrocosm, considered as the great universal ideal man or Adam Ḳadmon. It is probably through the influence of the Cabala that the doctrine of the microcosm came into great favor among the philosophers of the Renaissance like Bruno, Paracelsus, and others, who held that in man's nature is found the sum of all the cosmic forces. He is able to understand the material world, because he unites in his body the finest essence of all the material things; and as an intellectual being of sidereal origin, he has the faculty of conceiving the world of intellectual forms through the spark of the divine infused into his nature.

MIDDLEMAN, JUDAH: English rabbi of the first half of the nineteenth century. He was the author of "Netibot Emet," a work written in defense of the traditions of the Talmud against the attacks, in "Old Paths" ("Netibot 'Olam"), of the Rev. Alexander McCaul. Only the first part of the "Netibot Emet" was published, in 1847, under the title "Paths of Truth," an English translation by M. H. Breslau appearing in the same year.

MIDDOT: Treatise in the Mishnah; tenth in the order Ḳodashim. It deals with the dimensions and the arrangement of the Temple, and is divided into five chapters containing thirty-four paragraphs in all.

Ch. i.: The night-watches in the sanctuary. The priests kept guard in three places, the Levites in twenty-one (§ 1). These watches were controlled by the captain of the Temple ("ish har ha-bayit"). When this official passed the priest or the Levite on guard, the latter was required to rise. If he failed to do so, the captain addressed him; and if it became evident that the guard was asleep, the captain struck him with his staff. The captain had also the option of burning the sleeping watchman's coat. The other guards then jested at the expense of the sleeper and shouted: "A Levite is beaten and his clothes are burned because he has fallen asleep at his post" (§ 2). The gates of the hill of the Temple. On the eastern gate was a representation of Susa, the Persian capital, in token of the Persian supremacy (§ 3). The gates of the inner court (§§ 4–5). In the northeastern part of the forecourt was a cell in which the Hasmoneans preserved the altar-stones which were consecrated during the reign of the Greek (Syrian) kings (§ 6). The "place of the hearth" ("bet ha-moḳed") was a large hall with an arched ceiling. Around the walls were stone benches upon which the older priests rested, the younger ones sleeping on the floor (§§ 7–8). While a Levite kept watch outside, a priest within locked the doors, put the bunch of keys in a place hollowed out for them, and covered them with a marble slab, on which he lay down to sleep (§ 9).

Ch. ii.: The dimensions of the Temple hill: 500 cubits square (§ 1). All who ascended the hill kept to the right excepting mourners and those under a ban, who walked on the left, that they might be distinguished from the rest. Those who met the grief-stricken greeted them with the words, "May He who dwelleth in this house comfort thee"; while to one under a ban they wished reconciliation with his friends and the consequent removal of the ban (§ 2). Within the walls of the Temple hill was a railing which had been broken in thirteen places by heathen kings, but had been restored. Height and breadth of the steps and of the gates of the Temple. All the doors with the exception of those of the gate of Nicanor were covered with gold (§ 3). Dimensions of the space allotted to women in the inner court. From this court the men's court was reached by a flight of fifteen steps, corresponding to the fifteen "songs of degrees" in the Psalms (Ps. cxx.–cxxxiv.); and on these steps the priests stood while singing (§ 5). Under the forecourt were cells in which the Levites kept their musical instruments. Enumeration of the thirteen gates of the forecourt (§ 6).

Ch. iii.: Dimensions of the altar of burnt offerings. This at first was only twenty-five cubits square, but was afterward enlarged to thirty-two cubits (§ 1). The stones of the altar might not be hewn with an iron tool or changed in any way. The reason assigned for this is noteworthy, and is at the same time an explanation of Ex. xx. 25. The weapon which shortens human life and causes early death is of iron, while the altar serves to prolong the life of man by expiating sin; hence it is not fitting that this destructive metal should be used on the altar (§ 4). Arrangement of the place, on the north side of the altar, for killing the sacrificial animals (§ 5). The laver between the porch and the altar (§ 6). The porch, the golden grape-vine with its golden tendrils, leaves, and grapes (§§ 7–8; comp. Ḥul. 90b, where R. Isaac b. Naḥmani remarks that this mishnah—Mid. iii. 8—was one of the passages in which the wise had spoken words of exaggeration and hence were not to be taken literally).

Ch. iv.: Detailed description of that part of the Temple called "hekal," of its entrances—one of which, according to Ezek. xliv. 2, was never used—doors, chambers, steps, and balustrades.

Ch. v.: Description of the inner court and of its chambers. In this court was a hall built of square stones and called "lishkat ha-gazit," where the Great Sanhedrin met and decided all matters touching the priesthood. One of its chief duties was to examine the genealogy of each individual priest and to determine his fitness for service in the Temple. The priest in whom a blemish was discovered wrapped himself in black garments and left the Temple, but he in whom no fault was found clothed himself in white, entered the Temple, and took his place among the other priests. Whenever it happened that all the priests who were examined on a single day were without blemish, that day was celebrated as a holiday. There is no Gemara to this treatise. See also TEMPLE.

S. S. J. Z. L.

MIDDOT: THE SEVEN, OF HILLEL. See TALMUD HERMENEUTICS.

MIDDOT, SHELOSH-'ESREH: The thirteen forms of mercy, enumerated in Ex. xxxiv. 6–7, whereby God rules the world. According to the explanation of Maimonides ("Moreh Nebukim," i. 52), which is confirmed by the Sifre (Deut. 49 [ed. Friedmann, p. 85]), these middot must not be regarded as qualities inherent in God, but merely as so many attributes of His activity, by which the divine governance appears to the human observer to be controlled. In the Sifre, however, these attributes are not called "middot," which may mean "quality" as well as "rule" and "measure" (comp. Ab. v. 10–15), but "derakim" (ways), since they are the ways of God which Moses prayed to know (Ex. xxxiii. 13), and which God, according to the traditional explanation of Ex. xxxiv. 6–7, proclaimed to him. The number thirteen is adopted from the Talmudic and rabbinic tradition, while the Karaites count only nine, ten, or eleven middot (comp. Aaron b. Elijah, "Keter Torah," *ad loc.*, Eupatoria, 1866). The rabbinical school indeed agrees that the middot number thirteen and that they are contained in Ex. xxxiv. 6–7, but with which word they begin and with which they conclude are moot questions. According to Tobiah ben Eliezer, Midrash Leḳaḥ Ṭob, *ad loc.*, ed. Buber, Wilna, 1884; R. Jacob Tam, in Tos. R. H. 17b, catchword "Shelosh-'Esreh Middot"; Abraham ibn Ezra in his commentary, *ad loc.*; Asher b. Jehiel; and Kalonymus, "Meshoret Mosheh," ed. Goldenthal, p. 14, Leipsic, 1845, the thirteen middot begin with the first "Adonai," in verse 6, and end with the word "we-naḳeh" in verse 7. The single attributes are contained in the verses as follows:

Division.

(1) "Adonai," compassion before man sins; (2) "Adonai," compassion after man has sinned (comp. R. H. 17b); (3) "El," mighty in compassion to give all creatures according to their need; (4) "Raḥum," merciful, that mankind may not be distressed; (5) "Ḥanun," gracious if mankind is already in distress; (6) "Erek appayim," slow to anger; (7) "Rab ḥesed," plenteous in mercy; (8) "Emet," truth; (9) "Noẓer ḥesed la-alafim," keeping mercy unto thousands (comp. the explanation of Samuel b. Meïr in "Da'at Zeḳenim," *ad loc.*); (10) "Nose 'awon," forgiving iniquity; (11) "Nose pesha'," forgiving transgression; (12) "Nose ḥaṭa'ah," forgiving sin; (13) "We-naḳeh," and pardoning.

According to R. Nissim (quoted in Tos. R. H., *l.c.*), Isaac Alfasi, and others, the thirteen middot begin only with the second "Adonai," since the first one is the subject of "wa-yiḳra" (and he proclaimed). To secure the number thirteen, some count "noẓer ḥesed la-alafim" as two (Nissim in Tos. *l.c.*), while others divide "erek appayim" into two, since forbearance is shown both to the good and to the wicked (comp. the gloss on Tosafot, *l.c.* and Ibn Ezra, *l.c.*), and still others end the thirteenth middah with "lo yenaḳeh" (he does not pardon; Maimonides, "Pe'er ha-Dor," p. 19b, Lemberg, 1859), this being considered a good quality, since through punishment man is moved to repentance, after which he is pardoned and pure (comp. Yoma 86a; Aaron b. Elijah, *l.c.*; and "'Ez ha-Ḥayyim," ch. xcii.). Others term "we-naḳeh lo yenaḳeh" a single middah, the thirteenth being, in their opinion, "poḳed 'awon abot 'al-banim" (visiting the iniquity of the fathers upon the children), "this being regarded as compassionate since the transgressor is not punished immediately" (Maimonides, *l.c.*; Aaron b. Ḥayyim, *l.c.*; comp. also "Da'at Zeḳenim").

Liturgical Usage.

The general usage is based on the view of Leḳaḥ Ṭob, R. Tam, and Ibn Ezra, and the various recitations of the thirteen middot begin with the first "Adonai" after "wa-yiḳra," and conclude with "we-naḳeh." They must not be recited by only one person in prayer (Shulḥan 'Aruk, Oraḥ Ḥayyim, 565, 5), but by an entire congregation, which must consist of ten persons at least ("minyan"). They are recited on every holy day—not on the ordinary Sabbaths—when the Torah scroll is taken from the Ark, and it is also customary that on the fast-days on which Ex. xxxii. 11–14 and xxxiv. 1–10 are read, the reader stops at the word "wa-yiḳra" in order that the congregation may recite the thirteen middot, after which he continues his reading. The thirteen middot are very frequently recited in penitential prayers, in some of which they have even been hypostatized and are invoked, as inferior celestial beings, to aid the prayers of Israel and to present them before God. This is especially the case in the seliḥah of the eve of the New-Year, which is repeated at the morning service on the Day of Atonement, and which begins with the words "Shelosh 'esreh middot," and in the pizmon of Amittai b. Shephatiah for the fifth day of repentance, which is recited also at the evening service on the Day of Atonement, and in which the "middat ha-raḥamim" (compassion) is particularly invoked. On fast-days as well as during the week before the New-Year (the so-called seliḥot days), and on the days between the New-Year and the Day of Atonement, called the days of repentance, many penitential prayers ("seliḥot") are recited in addition to the usual daily prayers. After every such petition the thirteen middot are recited with their introductory prayer, the well-known "El Melek yosheb," which runs as follows: "Almighty King, sittest on the throne of mercy, showing forth Thy compassion, and forgiving the sins of Thy people by ever taking away their former guilt, ofttimes granting pardon unto sinners and forgiveness to the transgressors, making manifest Thy goodness both to body and to soul, nor punishing them according to their iniquity; Almighty One, as Thou hast taught us to recite the thirteen [middot], so remember now the thirteenfold covenant, as Thou didst in former days proclaim it to the modest one [Moses], even as it is written . . ." (then follow the verses Ex. xxxiv. 5–7a and 9b). The importance attributed to the thirteen middot in this prayer and the potency ascribed to the recitation of them in the penitential prayer are based upon an overliteral and partially erroneous interpretation of a passage from the Talmud, which runs as follows (R. H. 17b): "After God had proclaimed the thirteen middot to Moses, He told him: 'As often as Israel shall offend, thus shall they do in My presence, and I will forgive them.' Rab Judah says that a covenant was made that the thirteen middot should not be without effect." The phrase "thus shall they do" was understood as requiring the recitation of the thirteen middot in the same way as God had proclaimed them to Moses, while the words of Rab Judah were interpreted to imply that even the mention of the thirteen middot in prayer should not be without effect. In reality, however, the first sentence does not read "yomeru," recite, but "ya'asu," act, and, according to the correct explanation of R. Isaiah Horowitz in "Shene Luḥot ha-Berit" (Amsterdam, 1698, p. 333a), the passage means that if one acts according to the pattern of these middot and shows himself compassionate, merciful, and forgiving toward his fellow creatures, God also will be compassionate and merciful toward him and will forgive his sins (comp. the aphorism of Raba, R. H. 17a, and the remark in Sifre, *l.c.*, that the middot are the ways of God, in which, according to Deut. xi. 22, mankind should walk). In like manner, the words of Rab Judah really denote that if the thirteen middot are the rules of life and conduct, not mere formulas, they will not be inefficacious. The exercise and practise of these virtues cause God to treat man with mercy and compassion, for according to human actions, both in degree and in kind, divine recompense is measured (Soṭah 8b). If this correct interpretation of the Talmudic passage in question be adopted, the importance attributed to the recitation of the thirteen middot lacks all justification.

S. J. Z. L.

MIDDOT: THE THIRTEEN, OF R. ISHMAEL. See Talmud Hermeneutics.

MIDIAN AND MIDIANITES: Midian was the son of Abraham and Keturah. His five sons, Ephah, Epher, Hanoch, Abidah (R.V. "Abida"), and Eldaah, were the progenitors of the Midianites (Gen. xxv. 1–4; I Chron. i. 32–33). The term "Midian" (מדין), which seems to be derived from the Arabic root דין (= "place of judgment"), denotes also the nation of the Midianites, the plural form, מדינים, occurring only in Gen. xxxvii. 28, 36 (in the latter passage מדנים seems to be a scribal error for מדינים) and Num. xxv. 17, xxxi. 2. Their geographical situation is indicated as having been to the east of Palestine; Abraham sends the sons of his concubines, including Midian, eastward (Gen. xxv. 6). But from the statement that Moses led the flocks of Jethro, the priest of Midian, to Mount Horeb (Ex. iii. 1), it would appear that the Midianites dwelt in the Sinaitic Peninsula. Later, in the period of the Kings, Midian seems to have occupied a tract of land between Edom and Paran, on the way to Egypt (I Kings xi. 18). Midian is likewise described as in the vicinity of Moab: the Midianites were beaten by the Edomite king Hadad "in the field of Moab" (Gen. xxxvi. 35), and in the account of Balaam it is said that the elders of both Moab and Midian called upon him to curse Israel (Num. xxii. 4, 7). Further evidences of the geographical position of the Midianites appear in a survey of their history.

Geographical Position.

Wars.

In the time of Moses the Midianites are first mentioned as having had a priest by the name of Reuel or Jethro, who became afterward Moses' father-in-law. Toward the close of the forty years' wandering of the children of Israel in the wilderness, the Midianites were allied with the Moabites in the attempt to exterminate the Israelites. For this reason Moses was ordered by God to punish the Midianites. Moses, accordingly, despatched against them an army of 12,000 men, under Phinehas the priest; this force defeated the Midianites and slew all their males, including their five kings, Evi, Rekem, Zur, Hur, and Reba. It may be noted that these five princes of Midian are called by Joshua (xiii. 21) the vassals of Sihon, the king of the Amorites. It is possible that Sihon had previously conquered Midian and made it a dependency, and that after his death the Midianites recovered their independence. The Israelitish soldiers set on fire all the cities and fortresses of the Midianites, carried the women and children into captivity, and seized their cattle and goods. The Israelites were afterward ordered by Moses to slay every Midianite male child and every woman, sparing only the female children (Num. xxxi. 2–18). It appears from the same account that the Midianites were rich in cattle and gold. The narrative shows that each of the five Midianite tribes was governed by its own king, but that all acted together against a common enemy; that while a part of each tribe dwelt in cities and fortresses in the vicinity of Moab, another part led a nomadic life, living in tents and apparently remote from the seat of the war. For, after the Midianites had been "exterminated" by the army of Phinehas, they reappear some hundreds of years later, in the time of Gideon.

The Biblical account of the battle between the Midianites and Gideon (Judges vi.–viii.) asserts that the Israelites suffered at the hands of the Midianites for a space of six years. The Midianites seem to have been then a powerful and independent nation; they allied themselves with the Amalekites and the children of the East, and they oppressed the Israelites so severely that the last-named were obliged to seek refuge in caves and strongholds; they destroyed their crops and reduced them to extreme poverty (*ib.* vi. 1–6). The allied army of Midianites and Amalekites encamped in the valley of Jezreel (*ib.* vi. 33) after having crossed the Jordan. Gideon with his army encamped by the fountain of Harod, the Midianite army being to the north of him. With 300 men Gideon succeeded in surprising and routing them, and they fled homeward across the Jordan in confusion (*ib.* vii. 1–24). A point worth noting is that here only two Midianite kings, Zebah and Zalmuna, and two princes, Oreb and Zeeb, are mentioned (*ib.* vii. 25; viii. 3, 5, 10, 12, 18, 21). This would show that only two tribes bore the name "Midianites," while the remaining three probably were merged with other Arabic tribes, their kinsmen, and perhaps partly with the Israelites also. Midian is stated to have been "subdued before the children of Israel, so that they lifted up their heads no more" (*ib.* viii. 28). In fact, aside from allusions to this victory (Ps. lxxxiii. 10, 12; Isa. ix. 4, x. 6; Hab. iii. 7), Midian is not mentioned again in sacred history except in Judith ii. 16, where the term "Midianites" seems to be a mistake for "Arabians."

The first recorded instance of a Midianite tribe surrendering its identity by attaching itself to another people appears in Judges i. 16. In this instance, which occurred in the period of the Judges, the Kenites, descendants of Jethro the Midianite, attached themselves to the Israelites in the wilderness of Judah, south of Arad. Later, in the time of Tiglath-pileser (745–727 B.C.), a tribe, called in the cuneiform inscriptions "Ḥayapa" and identified by Friedrich Delitzsch ("Wo Lag das Paradies?" p. 304) with the tribe of Ephah, is said to have dwelt in the northern part of the Hejaz. Isaiah (lx. 6) speaks of Midian and Ephah as of two distinct peoples. The second son of Midian, Epher, is identified by Knobel with the Ghifar, an Arabic tribe which, in the time of Mohammed, had encampments near Medina. Traces of the Midianites existed in post-Biblical times. Ptolemy ("Geography," vi. 7) mentions a place called Modiana, on the coast of Arabia; according to his statement of its position, this place may be identified with the Madyan of the Arabic geographers, in the neighborhood of 'Ain 'Una, opposite the extremity of the Sinaitic Peninsula, and now known under the name of "Magha 'ir Shu'aib" (= "the caves of Shu'aib" ["Jethro"]).

MIDRASH (מדרש, from the root דרש, "to study," "to investigate"): A term occurring as early as II Chron. xiii. 22, xxiv. 27, though perhaps not in the sense in which it came to be used later, and denoting "exposition," "exegesis," especially that of the Scriptures. In contradistinction to literal interpretation, subsequently called "peshaṭ" (comp. Geiger's "Wiss. Zeit. Jüd. Theol." v. 244), the term "midrash" designates an exegesis which, going more deeply than the mere literal sense, attempts to penetrate into the spirit of the Scriptures, to examine the text from all sides, and thereby to derive interpretations which are not immediately obvious. The Talmud (Sanh. 34b) compares this kind of midrashic exposition to a hammer which awakens the slumbering sparks in the rock. The divergence between midrash and peshaṭ increased steadily; and, although the consciousness of this divergence may not have increased in a proportionate degree, contrary to the view of Geiger (*l.c.* pp. 53 *et seq.*, 234 *et seq.*; comp. Weiss, "Dor Dor," i. 167 *et seq.*) and others, it was never wholly obscured. The confession of Rab Kahana (Shab. 63a), that although he knew the entire Talmud by the time he was eighteen, it was many years later before he learned the principle that a Bible verse can never lose its evident and literal meaning, is not to be taken as an indication of the general state of Bible study in his time; on the contrary, Rab Kahana wishes to indicate thereby that he was an exception to the rule. Raba's statement in Yeb. 24a likewise proves that a distinction was made between midrash and peshaṭ. At the most it can be proved that in some cases the Midrash was based on a peculiar interpretation of the literal meaning; thus, Sifra, Tazria', Neg. ix. 14 remarks in regard to the sentence "We-im be-'enaw 'amad ha-neteḳ" (Lev. xiii. 37), "En li ella be-'ene 'aẓmo be-'ene beno," etc.; this shows that "be-'enaw" was explained as "in his eyes," an interpretation which certainly does not contradict the statement that the difference between midrash and peshaṭ was recognized.

The Bible exegesis of the Rabbis which had a moralizing or edifying tendency must be distinguished from that which was of a legal nature: the former is known as Midrash Haggadah; the latter, as Midrash Halakah. Exegesis from an ethical or devotional point of view admits of more freedom than hermeneutics aiming at the determination of legal maxims. This is true not only because the imagination has freer play in the former, and reason in the latter, but also because halakic exegesis, since it is intended for practical guidance and is more far-reaching in its results, is bound more closely by certain laws and principles (comp. the different view of Hirschfeld in "Halachische Exegese," p. 13).

As concerns the origin of the Midrash, Maimonides ("Sefer ha-Mizwot," Hilkot "Shoresh," 2) held that the Midrash was a product of the Halakah; Naḥmanides, on the contrary, that the former was the source of the latter. It is impossible to decide whether either one was correct. Only this much can be said

Origin of the Midrash.

a priori, that there are certain expositions which could not have been evolved through mere theoretical speculation. Any other conclusions on the subject must be based on a consideration of the various circumstances which favored the origin and development of the Midrash. In the first place, any application of theory to practise demands a more recondite interpretation than does the mere explanation of the literal meaning. A general law demands special exposition in order to deal with the complications which frequently arise in daily life. Even Moses was obliged to seek instruction in several instances (Lev. x. 16, xxiv. 12; Num. xv. 34; the expressions "to expound unto them according to the mouth of the Lord" and "because it was not declared what should be done unto him" in the second and third of these passages respectively being especially noteworthy; see Krochmal, "Moreh Nebuke ha-Zeman," p. 13). But even if the Midrash gave rise to the Halakah in certain cases in which an "investigation" of the Law became necessary for a practical decision, there were in all probability many more instances in which a legal basis, often difficult to find, was sought for certain rules which had arisen from the exigencies of life. That there were many such cases in which the Halakah was a subsequent justification of an accomplished fact, though they are not always specifically noted, is shown by the well-known sentence of the Mishnah (Ḥag. 10a), "Miḳra mu‘aṭ, halakot merubbot," by the sentence of R. Johanan (Yer. Ber. 4c), "Kol milla di-la meḥawwera mesammekin lah min atrin saggin," and by the remark "Ḳera asmakta be-‘alma," which is frequently found in connection with very important rules, such as the determination of weights (Ber. 41b; Yer. Pes. 15a). Retroactive justification is to be seen in many of the cases when one and the same halakah is variously deduced by different tannaim ("mishma‘ot dorshin"), and where the Amoraim feel themselves compelled to assume a material difference, as in Pes. 84a, where no less than eight explanations are attempted.

Great as was this twofold influence of actual practise on the origin and development of the Midrash, it must be borne in mind that speculation for its own sake in the obligatory study of the Law (Deut. vi. 7; Josh. i. 8) was likewise a factor; for this exclusive and continued study probably contributed much to the search for other interpretations than the merely literal one. The exegetes endeavored to find everything expressed in the Law; and Philo's view that there were no superfluous words in Scripture, and that everything had a meaning ("De Profugis," § 458), dominated not only the allegorical exegesis of Alexandria, but also to a large extent the Midrash, even though no other connection existed between the two. On the rules by which the exegetes were guided in making these deductions see Midrash Halakah and Talmud.

The history of the Midrash may be divided into three periods: (1) of the Soferim; (2) of the Tannaim; and (3) of the Amoraim. (1) Midrashim ascribed to Biblical persons (Ber. 31b; Yeb. 77a *et passim*) are haggadic aphorisms and may be recognized as such. Noteworthy is Sheḳ. vi. 8, "Zeh Midrash she-darash Yehoyada‘ Kohen Gadol" (This is the Midrash which Jehoiada the High Priest taught), a statement which, however, can not lay claim to historical value. The real date of the origin of the Midrash in question appears to be the period of the Soferim, the writers or scribes (Ḳid. 31a; Yer. Sheḳ. 48c), whose activity is summed up in the sentence, "So they read in the book, in the law of God, distinctly, and made them to understand" (Neh. viii. 8); however this verse is to be explained (Ned. 37b; Yer. Meg. 74d; "Responsen der Geonim," ed. Harkavy, p. 217), it certainly indicates that the Soferim were much more than mere translators. Alleged traces of their Midrash, closely based upon the Bible, are Neg. xii. 5 *et seq.*; Soṭah viii. 1 *et seq.*; Ma‘as. Sh. v. 7 *et seq.* According to Krochmal (*l.c.*), the Soferim indicated which were their interpretations by means of peculiar script and certain signs (dots, ḳere and ketib, full and defective writings); accordingly such midrashim as Sifra, Emor, ix. 3; *ib.* Shemini, v. 8; *ib.* Behar, iv. 4; Mek., Mishpaṭim, 3, would belong to them; and even though the later explanations of these signs and this peculiar script are not established by tradition, but are in general controvertible and doubtful (comp. Sanh. 4a), the great age of some of the interpretations is indicated by the Septuagint; *e.g.*, Ex. xxii. 7; Lev. xxiii. 11, xxxiii. 40; Deut. xxv. 5 (comp. Frankel, "Ueber den Einfluss der Palästinensischen Exegese auf die Alexandrinische Hermeneutik," pp. 89 *et seq.*; Hoffmann, "Zur Einleitung in die Halachischen Midraschim," p. 74).

Historical View.

(2) The beginning of the second period likewise is shrouded in obscurity. Of the "zeḳenim ha-rishonim," whose date can not be definitely determined, three midrashim have been preserved, Sifra, Wayiḳra, Ḥobah, xii. 1; *ib.* Meẓora‘, ix. 12; Mek., Amalek, 2; likewise a few midrashim by Judah b. Ṭabbai and Simon b. Sheṭaḥ, both of whom lived in the first century B.C. (Mek., Mishpaṭim, 20; Tosef., Sanh. viii. 3; Mak. 5b; Yer. Sanh. 22b). The opposition of the Sadducees, who rejected the oral law, and who were attacked by Ṭabbai and Sheṭaḥ, naturally led to an attempt to base the oral law on Scripture, thus encouraging midrashic exegesis. The well-known interpretation of the passage "an eye for an eye" (Ex. xxi. 24), contradicting the view of the Sadducees, who wished to apply the Law literally, gives evidence of a free and profound conception of the Biblical text even at that early date. In the following period Shemaiah and Abṭalion are mentioned as "darshanim gedolim" (Pes. 70; comp. Mek., Beshallaḥ, 3). The seven rules of exposition propounded by Hillel—of whom, as of his opponent Shammai, only a few midrashim, all simple in character, have been preserved (Sifra, Shemini, ix. 5; *ib.* Neg. ix. 16; Yer. Pes. 33a; Tosef., ‘Er. iv. 7; Shab. 19a; Ḳid. 43a)—presuppose a very extensive Midrash; and a like inference is to be drawn from the attempt of Hananiah b. Hezekiah b. Garon to harmonize the contradictions between Ezekiel and the Pentateuch. The explanation in Sifre, Deut. 294, transmitted in the name of Hananiah's son, and also mentioned in the passage Mek., Baḥodesh, 7, is perhaps a fragment of this

same Midrash. On the Mishnah of R. Akiba see Jew. Encyc. *s.v.*

(3) In regard to the Midrash of the Amoraim the Babylonians employed more simple methods than the Palestinians, as Frankel correctly says ("Mebo," 31b), though Weiss objects to this view ("Bet ha-Talmud," i. 69, note 4). But the exegesis of the Palestinian Amoraim was more simple than the Palestinian. For the midrashim of this period which have been preserved see Midrash Halakah.

MIDRASH HAGGADAH: The subject will be treated under the following headings:

General Statement.
Special Divisions:
- **A.** Midrash Haggadah in the tannaitic midrashim, etc.
    - 1. Mekilta.
    - 2. Sifra.
    - 3. Sifre to Numbers.
    - 4. Sifre to Deuteronomy.
- **B.** The purely haggadic midrashim.
    - I. The earliest exegetical midrashim.
        - 1. Bereshit Rabbah.
        - 2. Ekah Rabbati.
    - II. The homiletic midrashim.
        - 1. Pesiḳta.
        - 2. Wayiḳra Rabbah.
        - 3. Tanḥuma Yelammedenu.
        - 4. Pesiḳta Rabbati.
        - 5. Debarim Rabbah.
        - 6. Bemidbar Rabbah.
        - 7. Shemot Rabbah.
        - 8. Agadat Bereshit.
        - 9. We-Hizhir (Hashkem).
    - III. The exegetical midrashim to Canticles, Ruth, Ecclesiastes, and Esther.
        - 1. Shir ha-Shirim Rabbah.
        - 2. Midrash Ruth.
        - 3. Midrash Ḳohelet.
        - 4. Midrash Megillat Esther.
    - IV. The other exegetical midrashim not dealing with the Pentateuch. (For Midrash Shemu'el, Midrash Mishle, Midrash Tehillim see the several articles.)
        - 1. Midrash Yeshayah.
        - 2. Midrash Yonah.
        - 3. Midrash Iyyob.
    - V. Special haggadic works.
        - 1. Pirḳe R. Eli'ezer.
        - 2. Seder Eliyahu.
        - (Other haggadic works referred to the article Midrashim, Smaller.)
    - VI. Yalḳuṭ Shim'oni, Yalḳuṭ ha-Makir, and Midrash ha-Gadol.

Connotation of Haggadah.

Midrash Haggadah embraces the interpretation, illustration, or expansion, in a moralizing or edifying manner, of the non-legal portions of the Bible (see Haggadah; Midrash; Midrash Halakah). The word "haggadah" (Aramaic, "agada") means primarily the recitation or teaching of Scripture; in a narrower sense it denotes the exegetic amplification of a Biblical passage and the development of a new thought based thereupon. Like the formula "maggid ha-Katub" (= "the Scripture teaches"), frequently found in the ancient writings, the noun "haggadah" (plural, "haggadot") probably had at first a general application, but at an early date was restricted to denote a non-halakic explanation (comp. Bacher, "Ag. Tan." 2d ed., pp. 461 *et seq.*). The word then came to be used in a more general sense, designating not the haggadic interpretation of single passages, but haggadic exegesis in general, the body of haggadic interpretations—in fine, everything which does not belong to the field of the Halakah. The haggadic Midrash, which confined itself originally to the exposition of Scripture text, was developed in its period of florescence into finished discourses. "The Haggadah, which is intended to bring heaven down to the congregation, and also to lift man up to heaven, appears in this office both as the glorification of God and as the comfort of Israel. Hence religious truths, moral maxims, discussions concerning divine retribution, the inculcation of the laws which attest Israel's nationality, descriptions of its past and future greatness, scenes and legends from Jewish history, comparisons between the divine and Jewish institutions, praises of the Holy Land, encouraging stories, and comforting reflections of all kinds form the most important subjects of these discourses" (Zunz, "G. V." 1st ed., pp. 349 *et seq.*).

Object of Haggadah.

The opening words of this quotation are a paraphrase of a famous sentence in which the Haggadah was praised by the old haggadists themselves. "If thou wishest to know Him at whose word the world came into being, then learn the Haggadah, for through it thou shalt know the Holy One, praised be He, and follow His ways" (Sifre to Deut. xi. 22). Indeed, the Haggadah, being exegesis from a religious and ethical standpoint, undertook to influence the mind of man and to induce him to lead a religious and moral life, "that he might walk in the ways of God." In conformity with the conditions of its time, it neither could nor would limit itself to the simple interpretation of Scripture, but included in its ever-widening circle of discussions and reflections on the Scripture text the highest thoughts of religious philosophy, mysticism, and ethics. It interpreted all the historical matter contained in the Bible in such a religious and national sense that the heroes of the olden time became prototypes, while the entire history of the people of Israel, glorified in the light of Messianic hopes, was made a continual revelation of God's love and justice. For this reason the importance for modern Jewish science of the study of the Haggadah can not be overestimated.

The entire wealth of the haggadic Midrash has been preserved in a series of very different works, which, like all the works of traditional literature, are the resultant of various collections and revisions, and the contents of all of which originated a long time before they were reduced to writing. The first traces of the midrashic exegesis are found in the Bible itself (see Midrash); while in the time of the Soferim the development of the Midrash Haggadah received a mighty impetus, and the foundations were laid for public services which were soon to offer the chief medium for the cultivation of Bible exegesis. Much Midrash Haggadah, often mixed with foreign elements, is found in the Apocrypha, the Pseudepigrapha, the works of Josephus and Philo, and the remaining Judæo-Hellenistic literature; but haggadic exegesis reached its highest development in the great epoch of the Mishnaic-Talmudic period, between 100 and 500 C.E., when all its different branches were fully worked out. The Haggadah of the Amoraim is the continuation of that of the Tannaim; and, according to Bacher, there really is no difference between the Amoraim and the Tannaim with reference to the Haggadah. The final edition of the Mishnah, which was of such signal importance for the Halakah, is of less significance for the Haggadah, which, in form as well as in content, shows the same characteristics in both periods. It may be said in particular, that in the field of the Haggadah the century after the completion of the Mishnah may be fairly compared with the century before its completion, as regards not only the wealth of the extant material and the number of the authors to be considered, but also the independence and originality of the subject-matter treated (comp. Bacher, "Ag. Pal. Amor." vol. i., pp. viii. *et seq.*).

Development of Haggadah.

A story told in Yer. Hor. iii. 48b indicates the great extent of the haggadic exegesis and its general popularity at this time. When the aged Ḥanina b. Ḥama saw the people of Sepphoris flocking to the school of R. Benaiah, and heard that it was to hear R. Johanan deliver a discourse there, he exclaimed, "Praised be God that He permits me to behold the fruit of my labors during my lifetime. I have taught him the entire Haggadah, with the exception of that on Proverbs and Ecclesiastes." In another passage, in a conversation between the patriarch Judah I. and Israel b. Jose, the story is told of R. Ḥiyya, that, lost in thought, he read through the whole Book of Psalms from the haggadic standpoint (Yer. Kil. ix. 32b; Gen. R. xxxiii.). During the third and at the beginning of the fourth century the masters of Halakah were also the representatives of the Haggadah; but side by side with them appeared the haggadists proper ("rabbanan di-Agadta," "ba'ale Agada"), who subsequently became more and more prominent, attracting with their discourses more hearers than the halakists. The highest product of the Haggadah, the public discourse drawing upon all the arts of midrashic rhetoric—sentence, proverb, parable, allegory, story, etc.—now received its final form. The ancient sentence "We-kullehon yesh lahem miḳra we-yesh lahem mashal we-yesh lahem meliẓah" (For each of them there is Bible text, a proverb, and a saying; comp. Cant. R. i. 1) may be applied to these products of haggadic rhetoric. The epigoni of the Haggadah flourished in the fourth and at the beginning of the fifth century, and were followed by the anonymous haggadists who preserved and revised the immense haggadic material. Creative haggadic activity ceases with the end of the Talmudic period. The post-amoraic and the geonic period is the epoch of the collectors and revisers, during which the haggadic midrashim were reduced to writing, receiving the form in which they have been handed down more or less unchanged. Sometimes the results of the Midrash Haggadah—specific deductions on the one hand, general precepts, sentences, and maxims on the other, obtained by a study of the Biblical books from the religio-ethical or historical side, or by penetration into the spirit of Scripture—were collected in special works, forming special branches of the Haggadah, such as ethical Haggadah, historical Haggadah, Cabala, etc. At other times single Scriptural interpretations, haggadic sentences, and stories of all kinds, which originated or were used in the course of some halakic discussion—and this was often the case—were included when that discussion was reduced to writing; and it is for this reason that the Mishnah, Tosefta, and both Talmuds contain so much haggadic material. Or, finally, the mass of haggadic matter was collected and edited in the exegetic midrashim proper—the midrashim par excellence, which formed either running haggadic commentaries to the single books of the Bible, or homiletic midrashim, consisting of discourses actually delivered on the Sabbath and festival lessons or of revisions of such discourses.

Divisions of Haggadah.

Students of the Haggadah.

The following discussion of individual midrashic works will be restricted to the most important productions in the field of the Midrash Haggadah proper; for the ethical and historical Haggadah, and such as is included in halakic works, see Abot; Apocalypse; Apocalyptic Literature; Apocrypha; Cabala; Derek Ereẓ Rabbah; Ethics; etc. Similarly, as regards the Targumim containing or reflecting the Midrash Haggadah, reference must be made to the articles on the various targumim. It may be regarded as characteristic of the midrashim proper that they are anonymous—that is, the name of the editor who made the final revision is unknown; accordingly, haggadic works whose authors are known (*e.g.*, R. Tobias b. Eliezer's "Leḳaḥ Ṭob"; R. Menahem b. Solomon's "Sekel Ṭob"), and the haggadic commentaries of a later period, such as that published by Buber under the title "Midrash Agada" (Vienna, 1894), must likewise be excluded from this review. Haggadic exegesis was, as mentioned above, assiduously cultivated in the period of its florescence by the most eminent rabbis, some of whom are praised in particular as being "learned in the Haggadah" ("baḳi ba-Agada"); and it became a special branch of traditional science for the "scholars of the Haggadah" ("rabbanan di-Agadta"). It was the subject of study in the schools and furnished an inexhaustible supply of material for the sermons and discourses which were delivered on Sabbaths and feast-days, and which followed the Scripture lesson and formed a part of public worship, or could be separated from it at need. Opportunity, moreover, often arose, both on joyous and on sad occasions, to resort to haggadic expositions for words of comfort or of blessing, for farewell discourses, etc.

References to the arrangement of the Haggadah, to connected haggadic discourses, to the writing down of single haggadic sentences, and even to books of the Haggadah, are extant even from early times. Thus R. Simon b. Pazzi was an editor of the Haggadah ("mesadder Agadta") before the time of R. Joshua b. Levi (comp. Ber. 10a). The latter, a Palestinian amora of the first half of the third century, who was also a famous haggadist, was the author of the sentence explaining the phrase "works of God" in Ps. xxviii. 5 as referring to the haggadot (Midr. Teh. *ad loc.*); he, as well as his pupil R. Ḥiyya b. Abba, severely censures the reducing of haggadot to writing and the use of written haggadot, for it was in general considered that the prohibition against writing down the "words of the oral law" referred not only to halakot, but also to haggadot; for the latter in particular might be the expression of private opinions and interpretations which, not being under control of the schools, were likely to lead to abuses. The severity of this censure indicates that it was not a question of writing down single haggadot merely. R. Joshua b. Levi himself says that he once looked into a haggadic work ("sifra di-Agadta"), and he quotes numerical interpretations therefrom (Yer. Shab. xvi. 15c; Soferim xvi.); a "Haggadah-book of the school" is mentioned by R. Jacob bar Aḥa, the contemporary of Judah I. (Sanh. 57b); and it is said of R. Johanan and R. Simeon b. Laḳish, the contemporaries of R. Joshua b. Levi, that they read a Haggadah-book on the Sabbath. They regarded such collections as demanded by the times, and paraphrasing Psalm cxix. 126 they declared that it were better to repeal an interdiction (*i.e.*, that against writing down the oral law, which they referred to the Haggadah) than to allow the Torah to be forgotten in Israel (Giṭ. 60a; Tem. 14b).

R. Johanan, who always carried a Haggadah with him, is the author of the saying, "A covenant has been made: whoever learns the Haggadah from a book does not easily forget it" (Yer. Ber. v. 9a). There are other scattered allusions to haggadic works in Talmudic-midrashic literature. There must also have been collections of legends and stories, for it is hardly conceivable that the mass of haggadic works should have been preserved for centuries by word of mouth only. These scattered allusions merely show, however, that the beginnings of the written Haggadah date very far back; very little is known of the nature of the old Haggadah-books, and it is impossible to determine what traces they left in the old Midrash literature. Much material from the various early midrashic collections, which gradually increased in numbers, was doubtless incorporated in the exegetic midrashim which have been preserved; and the latter clearly indicate the nature of the early exegesis, the "manner of discourse of antiquity"; but only the above-mentioned tannaitic midrashim—the Mekilta, Sifre, and Sifra, containing Haggadah mixed with Halakah—date in their earliest component parts from the second century, having been definitively edited in the post-tannaitic time. The purely haggadic-exegetic midrashim were edited at a much later time, after the completion of the Talmud. One may, as Bacher says, "speak in a certain sense of the completion of the haggadic Midrash as one speaks of the completion of the Talmud, although the works belonging to this class continued to be produced for five centuries or more after that time."

It is of the utmost importance, in considering the several midrash works, to emphasize the fundamental difference in plan between the midrashim forming a running commentary to the Scripture text and the homiletic midrashim. In order to avoid repetitions later on, brief reference must here be made to the connection of the midrashic homilies with the Scripture lessons, which were delivered at the public worship on the Sabbath and on feast-days after the Sedarim and Pesiḳta cycle; to the structure of the homilies; to the nature of the proems which occupy such an important position in the entire midrash literature; to the halakic exordia, the formulas, etc.

Exegetic and Homiletic Midrash.

When the scholars undertook to edit, revise, and collect into individual midrashim the immense haggadic material of centuries, they followed the method employed in the collections and revisions of the halakot and the halakic discussions; and the one form which suggested itself was to arrange in textual sequence the exegetical interpretations of the Biblical text as taught in the schools, or the occasional interpretations introduced into public discourses, etc., and which were in any way connected with Scripture; and since the work of the editor was often merely that of compilation, the existing midrashim betray in many passages the character of the sources from which they were taken. This was the genesis of the midrashim which are in the nature of running haggadic commentaries to single books of the Bible, as Bereshit Rabbah, Ekah Rabbati, the midrashim to the other Megillot, etc.

But even the earliest of these works, Bereshit Rabbah, is essentially different in its composition from the tannaitic midrashim in that the several "parashiyyot" (sections) are introduced by proems. These are characteristic of a different class of midrashim, the homiletic, in which entire homilies and haggadic discourses as delivered during public worship or in connection with it were collected and edited, and which accordingly do not deal in regular order with the text of a book of the Bible, but deal in separate homilies with certain passages, generally the beginnings of the lessons. These lessons were either the pericopes of the Pentateuch divided according to the three-year cycle-reading of the Torah as customary in Palestine and on which the division of the Pentateuch into from 154 to 175 "sedarim" is based, or the Pentateuchal and prophetic sections as assigned in accordance with the Pesiḳta cycle to the various feast-days and special Sabbaths (*e.g.*, the Sabbaths of mourning and of comforting from the 17th of Tammuz to the end of

Sedarim and Pesiḳta Homilies.

the Jewish calendar year). These may be designated respectively as **sedarim homilies** and as **pesiḳta homilies.** The Sedarim homilies are the homilies to the pericopes of the Sedarim cycle—of which, although no collection to the entire cycle has been preserved, one to the entire Pentateuch exists in the Tanḥuma midrashim—and to individual books of the Pentateuch in Shemot Rabbah (in part), Wayiḳra Rabbah, Bemidbar Rabbah (beginning with ch. xv.), Debarim Rabbah, etc. The Pesiḳta homilies are the homilies to the Scripture sections according to the Pesiḳta cycle, as found in the Pesiḳta edited by Solomon Buber and in the Pesiḳta Rabbati: the designation is applied also to the homilies on lessons of the Pesiḳta cycle in the Tanḥumas and other Pentateuch midrashim. In brief, the arrangement and division of the Pentateuch midrashim, with the exception of Bereshit Rabbah, it is generally recognized, is based on the Palestinian three-year cycle, with the sedarim of which its sections correspond almost throughout. These midrashim therefore contain homilies to the Sabbath lessons of the three-year cycle together with a number of homilies intended for the feast-days and Sabbaths of the Pesiḳta cycle (Theodor, in "Monatsschrift," 1885, pp. 356 *et seq.*).

The Proems.

The sedarim and pesiḳta homilies are clear and comprehensive in structure, although this may not be recognized in the midrash editions, in which the homilies are often not properly arranged. In the Pesiḳta, Wayiḳra Rabbah, etc., the homilies begin with several proems; in the Tanḥumas (with considerable differences in various parts and in the different recensions), the Pesiḳta Rabbati, Debarim Rabbah, and Bemidbar Rabbah, a halakic exordium more or less systematically precedes the proems. The latter are followed by the exposition proper, which, however, covers only a few of the first verses of the Scripture lesson; the first verse (or the first part thereof) of the lesson is generally discussed more fully than the remaining verses. The homilies generally close with verses from the Bible prophesying Israel's auspicious future. This is the common form of the homilies in all the homiletic midrashim; it allows, however, of the utmost freedom of treatment and execution in its various parts. The proems, which are the clearest evidence of the existence of a deliberate technical arrangement in the haggadic midrashim, constitute both in name ("petiḥah") and in nature an introduction to the exposition of the lesson proper; to this, however, they lead up by means of the interpretation of an extraneous text, the proemial text, which must not be taken from the lesson itself; and the proems may be as different in structure and finish as in contents. The proems are either simple, consisting of a simple exposition of the proem-text, often amplified by quotations, parables, etc., and connected throughout, or at least at the end, with the lesson or with the initial verse thereof, or composite (see Jew. Encyc. iii. 62, *s.v.* Bereshit Rabbah), consisting of different interpretations of the same extraneous verse, by one or by various authors, and connected in various ways, but always of such a nature that the last interpretation, the last component part of the proem, leads to the interpretation of the lesson proper. The direct transition from the proem to the lesson is often made by means of a formula common to all the proems of the homily, wherewith the proem is brought to a logical and artistic conclusion. Exegetic material for use in the proems, especially the composite ones, which are often very extensive, was always at hand in abundance; and the art of the haggadist appeared in the use he made of this material, in the interesting combination, grouping, and connection of the several sentences and interpretations into a uniform structure so developed that the last member formed the fitting introduction to the exposition of the lesson proper. There are many formulas ("Ketib," "Hada hu da-ketib" [הה ד], "Zeh she-amar ha-katub" [זש"ה]) with which the proem-text is introduced, which may, however, also appear without formula, as often in Bereshit Rabbah and in the Pesiḳta; and the final formulas, which frequently are very rigid in form, as in the Pesiḳta, are likewise very numerous.

The various midrash works are differentiated by the relation of the simple to the compound proems—the structure of the latter, their development into more independent haggadic structures, the use of the various formulas, etc. By the method of selecting extraneous texts for the proems so many non-Pentateuchal, especially Hagiographic, verses were expounded, even in early times, in the proems to the Pentateuch homilies and interpretations, that these homilies became mines for the collectors of the non-Pentateuch midrashim. Many extensive interpretations which are found in connection with Scripture passages in those midrashim are merely proems from various homilies, as often appears clearly in the final proem-formulas retained. In such cases these formulas offer the surest criterion for proving the dependence of one midrash upon another. While proems are characteristic of all the homiletic midrashim—and it was due to the popularity of this form of the old homilies that proems were added also to the parashiyyot of the Bereshit Rabbah, although this old midrash is a running commentary on the Scripture text—yet the practise of prefacing the haggadic discourse with the discussion of a simpler halakic question is observed only in a part of those midrashim. The halakic exordium begins in the Tanḥumas with the words, "Yelammedenu rabbenu" (Let our teacher teach us). This formula gave rise to the name "Yelammedenu," by which this midrash and an earlier version of it were frequently designated; the same formula occurs in the Pesiḳta Rabbati. In Debarim Rabbah the word "halakah" is used, the question proper beginning in most of the exordia with "Adam mi-Yisrael." The word "halakah" instead of the formula "yelammedenu rabbenu" is used also in the part of Bemidbar Rabbah which is derived from the Tanḥuma. The interpretations which follow the proems and the halakic exordium in the halakic midrashim are confined, as mentioned above, to some of the first verses of the lesson.

In some homilies the proems are equal in length to the interpretations proper, while in others they are much longer. Even if the editors of the midrashim combined the proems of different authors from the various homilies they had at hand, it yet seems strange that they should have been able to select for each homily several proems, including some very long ones, while they could find only a limited number of interpretations to the lessons, these interpretations, furthermore, covering only a few verses. The disproportion between the proems and the interpretations has not yet been satisfactorily explained, in spite of various attempts to do so.

Character of Exegesis.

The character of the exposition in the exegetic midrashim like Bereshit Rabbah has been discussed in Jew. Encyc. iii. 63, *s.v.* Bereshit Rabbah. Here the literal and textual explanation is not yet in contrast to the Midrash Haggadah, as it often was in the time of the scientific exegesis. The old midrash contains many Scriptural interpretations which are exegetic in the truest sense of the word, affording a deep insight into the contemporary attitude toward the Scripture. But the haggadic midrash is the well-spring for exegesis of all kinds, and the simple exposition of Scripture is more and more lost in the wide stream of free interpretation which flowed in every direction.

Zunz has divided the Haggadah into three groups, following the old designations which were subsequently summed up in the word פרד"ם: (1) interpretation of the Scripture text according to its literal meaning; (2) development of the thought in any desired form, with a free use of the text; (3) discussion of the mysteries of religion and the supersensuous worlds (comp. "G. V." p. 59). The words of Zunz, the master of midrash study, in his chapter "Organismus der Hagada," may serve to close the first, general part of the present survey: "Definite rules were as impossible for this exegesis as rules of rhetoric for the Prophets; the thirty-two 'middot' postulated by Eliezer ha-Gelili were in part categories deduced from former works, which remained unobserved in the later Haggadah, and in part merely sentences given for the purpose of determining the literal meaning, and not intended to be applied in haggadic exegesis. For the power of this exegesis lay not in literal interpretation and in natural hermeneutics, . . . but in the unhampered application of the contents of the Bible to contemporary views and needs; everything that was venerated and beloved by the present generation was connected with the sacred though limited field of the past. This method of free exegesis was manifested in many ways: the obvious sense of the Biblical passage was followed; or the inner meaning of the text, to the exclusion of the literal sense, was considered; or recourse was had to the traditional haggadah (מסורת אגדה); or the results of the Masorah were taken into account. . . . But this liberty wished neither to falsify Scripture nor to deprive it of its natural sense, for its object was the free expression of thought, and not the formulation of a binding law" ("G. V." pp. 325 *et seq.*).

A. Midrash Haggadah in the Tannaitic (Halakic-Haggadic) Midrashim — Mekilta, Sifra, and Sifre.

For the name, composition, origin, and edition of these midrashim see special articles and Midrash Halakah.

1. The Mekilta: The Midrash to Exodus generally known under this name, and which originated in R. Ishmael's school, begins with Ex. xii., the first legal section in the book—on the Passover and the institution of the Passover festival. The exegesis is continued, with the omission of a few verses, down to xxiii. 19, the end of the principal laws dealt with in the book, to which are added two shorter passages on the law referring to the Sabbath—xxxi. 12–17 and xxxv. 1–3. It appears from this that the editor of the Mekilta intended to compile a halakic midrash. But as the exegesis is in the nature of a running commentary to these passages without regard to whether the subject under discussion is legal or historical in nature, and as much haggadic matter is mingled with the halakic interpretations, it appears from a comparison of all the haggadic passages with the halakic passages that the larger part of the Mekilta is really haggadic in nature; *e.g.*, nearly one-half of the exegesis in Bo to Ex. xii. 1 *et seq.* is haggadic. Beshallaḥ (ed. Friedmann, pp. 23b–56b) is, with a few exceptions, haggadic throughout; so is nearly the whole of Yitro (pp. 56b–74a), with the exception of a few verses, where even the exposition of the Decalogue contains only a small amount of halakic matter. But Mishpaṭim throughout and the exegesis of xxxi. 12 *et seq.* and xxxv. 1 *et seq.* are halakic, including only a few haggadic interpretations. (The Mekilta is divided not according to the Biblical pericopes, but into massektot and parashiyyot.) The following are simple exegetic explanations such as frequently precede the haggadic elaboration. To xiii. 17: נחם has only the meaning "to lead" (not "to comfort"), like נחית in Ps. lxxvii. 21 and וינחם in Ps. lxxviii. 14. To xiii. 18: וחמשים means "armed" (comp. Josh. i. 14), or ("dabar aḥar") "equipped" (comp. *ib.* iv. 12), or "one out of five," or, according to others, "one out of fifty." To xiii. 20: סכת is the name of a place, like איתם; R. Akiba says, "סכת means the clouds of the glory of God [which surrounded them like a hut]," etc. To xiv. 7: ושלישים means "heroes" (comp. Ezek. xxiii. 23 *et seq.*). To xiv. 8: "And the children of Israel went ביד רמה" denotes that they went with covered heads (*i.e.*, as free men), or that the power of Israel was above that of Egypt. To xiv. 27: איתנו means "his strength" (comp. Num. xxiv. 21). To xiii. 19: פקד יפקד is interpreted homiletically as referring to both past and future: "God remembered you in Egypt, He will remember you at the Red Sea; He remembered you by the sea, He will remember you also in the desert; He remembered you in the desert, He will remember you also by the brook of Arnon; He remembered you in this world, He will remember you also in the future world." The editor of the Mekilta had such a wealth of haggadic material at his disposal that he was enabled to compile entire parashiyyot to single verses, as to xiv. 15 and xv. 1 (two parashiyyot); xv. 2, 11; xx. 2. See MEKILTA.

Two passages may be translated here as specimens of the haggadah of the Mekilta:

To Ex. xvii. 11: *And it came to pass, when Moses held up his hand, that Israel prevailed: and when he let down his hand Amalek prevailed.* Did the hands of Moses help Israel to victory or did they destroy Amalek? Neither; but as long as he pointed his hand upward [heavenward] the Israelites looked up to and believed in Him who had commanded Moses to do thus, and the Holy One, praised be He, vouchsafed to them marvels and victory (comp. R. H. iii. 8). Similarly: "And the Lord said unto Moses, Make thee a fiery serpent" [Num. xxi. 8]. Can the serpent kill and make alive again? No; but so long as Moses did thus, the Israelites looked upon it and believed in Him who had thus commanded Moses, and the Holy One, praised be His name, gave them healing. Similarly: "And the blood shall be to you for a token . . . " [Ex. xii. 13]. R. Eliezer said: "What mean the words, 'And Israel prevailed,' or 'And Amalek prevailed'? So long as Moses kept up his hand he reminded Israel that they would be victorious through the word of the Torah, which was to be revealed by him."

To Ex. xx. 17 *et seq.* (conclusion of the Decalogue): In what way were the Ten Commandments given? Five on one table and five on the other. There it is written: "I am the Eternal One, thy God," and opposite to it, "Thou shalt not kill." Scripture teaches that the person who sheds blood lessens the image of the king [the prototype of God for man]: simile of an earthly king who came into a province and erected statues and images, and minted coins; subsequently he overturned the statues, broke the images, destroyed the coins, and lessened the image of the king. Similarly, the person who sheds blood is adjudged to have lessened the image of the king, for it is written: "Whoso sheddeth man's blood, by man shall his blood be shed; for in the image of God made he man" [Gen. ix. 6]. It is written, "Thou shalt have no other gods," and opposite to it, "Thou shalt not commit adultery." Scripture teaches that whosoever practises idolatry is adjudged to have committed adultery behind God's back, as it is written, "A wife that committeth adultery, which taketh strangers instead of her husband . . . " [Ezek. xvi. 32]. It is written, "Thou shalt not take the name of the Lord thy God in vain," and opposite to it, "Thou shalt not steal." Scripture teaches that whosoever steals will finally swear falsely also, as it is written, "Will ye steal, murder, and commit adultery, and swear falsely?" [Jer. vii. 9]. It is written, "Remember the Sabbath, to keep it holy." and opposite to it, "Thou shalt not bear false witness." Scripture teaches that whosoever desecrates the Sabbath testifies that God did not create the world and rest on the seventh day; but whosoever keeps the Sabbath testifies that God created the world in six days and rested on the seventh, as it is written, "Therefore ye are my witnesses, saith the Lord" [Isa. xliii. 12]. It is written, "Honor thy father and mother," and opposite to it, "Thou shalt not covet." Scripture teaches that whosoever lusteth will finally beget a son who will curse his father and mother and will honor him who does not honor his father. Therefore the Ten Commandments were given, five on one table and five on the other. This is the view of R. Ḥanina b. Gamaliel. The sages say: "Ten were on one table and ten on the other."

2. The Sifra: The Sifra, or **Torat Kohanim,** originating in the school of R. Akiba, with additions belonging in part to the school of R. Ishmael, and finally edited by R. Ḥiyya, "provides, in so far as it has been preserved intact, the text of the Book of Leviticus with a running halakic commentary which explains or turns almost every word into a source for a halakic maxim" (Hoffmann, "Zur Einleitung in die Halachischen Midraschim," p. 21). It contains only a small proportion of haggadic matter, of which the most significant parts are to Lev. viii. 1-x. 7 (on the dedication of the Tabernacle; ed. Weiss, pp. 40c-46b), to Lev. xviii. 1-5 (*ib.* pp. 85c-86d), to some verses in the beginning of the pericope "Ḳedoshim" (Lev. xix. 1-3, 15-18), to Lev. xxii. 32 *et seq.*, to the blessings and punishments announced in Lev. xxvi. 3-46 (*ib.* pp. 110c-112c). The following is a translation of the important passage, to Lev. xix. 17-18, containing Akiba's and Ben 'Azzai's sentences on the fundamental principle of Judaism:

Thou shalt not hate thy brother. One might take this to mean, Thou shalt not curse him, nor strike him, nor box his ears; therefore it is written, "in thy heart," which indicates that here merely such hatred as is harbored in silence is meant. And wherefore does it follow that when you have reproved him four or five times you shall continue to reprove him? Because it is written הוכח תוכיח. This might be taken to mean in case you reprove him and his countenance changes [shows shame]. Therefore it is written, "that thou sin not on his account." R. Ṭarfon said, "By worship! [*i.e.*, "by God"] there is no one in our time who is able to reprove." R. Eleazar b. Azariah said, "By worship! there is no person in our time who would accept a reproof." R. Akiba said, "By worship! there is no one in our time who understands how to reprove." R. Johanan b. Nuri said, "I call heaven and earth to witness that Akiba was lashed by R. Gamaliel more than four or five times because I complained of him. And yet I know that he loved me all the more on that account."

Thou shalt not take vengeance. What is meant by taking vengeance? When one person says to another, "Lend me your sickle," and he will not lend it: then on the following day the latter says to the former, "Lend me your ax," whereupon he replies, "I will not lend it to you because you would not lend me your sickle."

Thou shalt not be resentful. What is meant by being resentful? When one person says to another, "Lend me your ax," and he will not lend it; then on the following day the latter says to the former, "Lend me your sickle," whereupon he says, "Here it is; I am not like you, who refuses to lend me your ax." Therefore is it written, "Thou shalt not take vengeance," and "Love thy neighbor as thyself." R. Akiba says, "This is the great principle in the Torah." Ben 'Azzai says, "'This is the book of the generations of man' [Gen. v. 1, Hebr.], which is a still greater principle."

3. Sifre to Numbers: Sifre to Numbers and Deuteronomy is not, as it exists in current editions and as it was formerly considered, a uniform work, but is in both of its parts a combination of two midrashim of different character and different origin. Sifre to Numbers is in its main part a midrash of the school of R. Ishmael, like the Mekilta (comp. Hoffmann, *l.c.* p. 52). Beginning with ch. v. 1, it forms a running halakic commentary down to vi. 21; then it goes on to viii. 1-4, 23-26; ix. 1-14; x. 1-10; xv. 1-40; xviii. 1-32; xix. 1-22; xxvi. 52-56; xxvii. 8-11; xxviii. 1 *et seq.*; xxx. 2-17; xxxi. 17-20, 22-24; xxxv. 9-33. Haggadic are the comments to vi. 22-27 (priest's blessing); vii. 1-18, 84-89 (presents and sacrifices of princes); x. 9, 10, 29-34 (on Hobab), 35 *et seq.* (ויהי בנסוע); xi. 1-xii. 16 (on the complaints of Miriam, Aaron, and the people against Moses); xv. 41 *et seq.*; xxv. 1 *et seq.* (Israel's sojourn in Shittim), 12 *et seq.*; xxvii. 1-7 (on the daughters of Zelophehad), 12-25 (command given to Moses to go up into Mount Abarim, etc.); xxxi. 1-16 (campaign against Midian), 21. It appears from this list that many passages are not commentated in Sifre to Numbers (*e.g.*, the beginning down to iv. 49; vii. 14-83; viii. 5-22; ix. 15-23; x. 11-28; xxv. 14-19; xxvi. 1-51, 57-65; xxix. 1-11, 14-34; xxxi. 25-xxxii. 41; xxxiii. 1-xxxv. 8; xxxvi. 1-43); nor is there, strangely enough, any haggadic treatment in this midrash to the long historical passages relating to the sending out of the spies (xiii. and xiv.), to the revolt of Korah, with its consequences (xvi. and xvii.), to all the historical matter in pericope חקת beginning with xx. 1, and to the story of Balak and Balaam (xxii. 2-xxiv. 25). It is possible that Sifre to Numbers has not been handed down in its complete form, or that the collector did not have access to haggadic material for all passages. Some passages of the comment on the priest's blessing (vi. 22 *et seq.*) may be quoted:

> *The Lord bless thee* [*with goods*] *and keep thee* [*in their possession*]. R. Nathan says, "May He bless thee with goods and protect thee in thy body." R. Isaac says, "May He protect thee from the evil impulse, as it is written, 'For the Lord shall be thy confidence, and shall keep thy foot from being taken'" [Prov. iii. 26]. Another explanation ("dabar aḥar"): And may He so protect thee that others shall have no power over thee, as it is written, "The sun shall not smite thee by day nor the moon by night" [Ps. cxxi. 6]; and it is written, "Behold, he that keepeth Israel shall neither slumber nor sleep" [*ib.* 4]; and it is written, "The Lord is thy keeper: the Lord is thy shade upon thy right hand" [*ib.* 5]; and it is written, "The Lord shall keep thee from all evil" [*ib.* 7]; and it is written, "The Lord shall keep thy going out and thy coming in" [*ib.* 8]. Another explanation: May He protect thee from all demons, as it is written, "For he shall give his angels charge over thee, to keep thee in all thy ways" [Ps. xci. 11]. Another explanation: He shall protect thee, He shall keep the covenant of thy fathers, as it is written, "The Lord thy God shall keep unto thee the covenant and the mercy which he sware unto thy fathers" [Deut. vii. 12]. Another explanation: He shall protect thee, He shall keep for thee the end [*i.e.*, of sorrows, the time of redemption], as it is written, "The burden of Dumah [Edom]. He calleth to me out of Seir, Watchman, what of the night? . . . The watchman said, The morning cometh, and also the night" [Isa. xxi. 11 *et seq.*].
>
> Another explanation: He shall protect thee: He shall protect thy soul in the hour of death, as it is written, "But the soul of my Lord shall be bound in the bundle of life" [I Sam. xxv. 29]. One might think that this applied to sinners as well as to the pious, therefore it is written: "The souls of thy enemies, them shall he sling out, as out of the middle of a sling" [*ib.*]. Another explanation: He shall keep thee: He shall keep thy foot from hell, as it is written, "He will keep the feet of his saints" [I Sam. ii. 9]. Another explanation: He will keep thee in this world, as it is written, "But they that wait upon the Lord shall renew their strength; they shall mount up with wings as eagles" [Isa. xl. 31].
>
> *The Lord make his face shine upon thee.* May He open thy eyes. R. Nathan says, "That is, the light of the Shekinah, as it is written, 'Arise, shine; for thy light is come; . . . for, behold, the darkness shall cover the earth, and gross darkness the people: but the Lord shall arise upon thee' [Isa. lx. 1-2]; and as it is written, 'God be merciful unto us, and bless us; and cause his face to shine upon us' [Ps. lxvii. 2 (A. V. 1)]; and as it is written, 'God is the Lord, which hath shewed us light' [Ps. cxviii. 27]. Another explanation: May He give light—that is, the light of the Torah, as it is written, 'For the commandment is a lamp; and the Law is light'" [Prov. vi. 23].
>
> *The Lord be gracious unto thee* (ויחנך) in thy wishes, as it is written, "[I] will be gracious to whom I will be gracious" [Ex. xxxiii. 19]. Another explanation: May He grant thee favor (חנך) in the eyes of the people, as it is written, "But the Lord was with Joseph, and shewed him mercy, and gave him favor in the sight of the keeper of the prison" [Gen. xxxix. 21]. Another explanation: May He favor thee with knowledge, insight, understanding, good conduct, and wisdom. Another explanation: May He show favor to thee and give thee grace (יחנך) by the study of the Torah, as it is written, "She shall give to thine head an ornament of grace [חן]," and "For they shall be an ornament of grace unto thy head, and chains about thy neck" [Prov. iv. 9 and i. 9].

4. Sifre to Deuteronomy: This Sifre is as fragmentary in regard to the haggadah as Sifre to Numbers, and leads to the same conclusions arrived at regarding the latter midrash. The haggadah constitutes about four-sevenths of the Sifre to Deuteronomy, and is divided into two groups, which include between them the halakic exposition. This midrash therefore consists of three parts: (1) the first haggadic part to i. 1-30, iii. 23-29, vi. 4-9, xi. 10-32; (2) the halakic exposition to Deut. xii. 1 (in pericope ראה)-xxvi. 15 (in pericope תבוא); (3) second haggadic part to xxxi. 14 (beginning of the seder according to the seder cycle), xxxii. and xxxiii. (the sedarim and pericopes האזינו and וזאת הברכה). Halakic matter is found also in the first haggadic part, especially to vi. 6 *et seq.* and xi. 13; similarly there are haggadic expositions in the halakic portion, as to xiii. 18-xiv. 2, xv. 4, xvii. 19, xviii. 12 *et seq.*, xx. 3 *et seq.*, xxiii. 6 *et seq.*, xxvi. 5 *et seq.* According to Hoffmann's investigations the middle halakic portion is a midrash of R. Akiba's school, while the two haggadic portions belong to R. Ishmael's school. Following are translations of two passages:

> Deut. xi. 13: *To love the Lord your God.* Perhaps thou sayest: I study the Torah that I may become rich and be called "rabbi," and receive reward. Therefore it is written, "to love the Lord your God; all that you do you shall do only for love [Hebr.]." *And to serve him.* That is, to study the Torah. Or is real work meant? It is written, "And the Lord God took the man, and put him into the garden of Eden to dress it and to keep it" [Gen. ii. 15]. What kind of work was there at that time, and what was there to keep? You conclude therefrom that "to dress" means "to learn," and "to keep" means "to observe the commandments"; and as the service at the altar is called "service," so learning is called a "service" [to God]. Another explanation: "To serve Him" refers to prayer. Thou sayest, Perhaps by "prayer" service is meant; and therefore it is written, "with all your heart." Is there then a service of the heart? When it is written, therefore, "and to serve him with all your heart," prayer is meant.
>
> Deut. xi. 26: *Behold, I set before you this day a blessing and a curse.* Because it is written, "I have set before you life and death, blessing and cursing" [xxx. 19], the Israelites will perhaps say, Since God has shown us two ways, the way of life and the way of death, we will choose whichever way we please. Therefore it is written, "Therefore choose life, that both thou and thy seed may live" [*ib.*]. A man sat at a crossing, where two roads lay before him—one smooth in the beginning and full of thorns at the end, and one thorny at the beginning and smooth at the end; and he taught the travelers and said to them: "You see this path, which is smooth at the beginning? Two or three steps you will walk easily, and then you will come to thorns. You see that other path, full of thorns at the beginning? Two or three steps you will walk through thorns, and then you will reach the clear road." Thus Moses spake to Israel: "You see the sinners, that they are happy? Two or three days their happiness lasts in this world, but in the end they are cast out; as it is written, 'For there shall be no reward to the evil man' [Prov. xxiv. 20]; and as it is written, 'And behold the tears of such as were oppressed,' etc. [Eccl. iv. 1]; and as it is written, 'The fool foldeth his hands,' etc. [*ib.* iv. 5]; and as it is written, 'The way of the wicked is as darkness' [Prov. iv. 19]. You see the pious, how hard is their way in this world? For two or three days they toil, but finally they shall rejoice, as it is written, 'To do thee good at thy latter end' [Deut. viii. 16]; and as it is written, 'Better is the end of a thing than the beginning thereof' [Eccl. vii. 8]; and as it is written, 'For I know the thoughts that I think toward you' [Jer. xxix. 11]; and as it is written, 'Light is sown for the righteous' [Ps. xcvii. 11]; and as it is written, 'The path of the just is as the shining light'" [Prov. iv. 18]. R. Joshua b. Ḳarḥa said: "A king prepared a meal, and had invited all the guests; his friend sat among them, and thought to take a good portion, but he had no understanding. When the king saw that he had no understanding, he took his hand and laid it upon the good portion." Similarly it is written, "The Lord is the portion of mine inheritance and of my cup . . . The lines are fallen to me in pleasant places . . . I will bless the Lord, who hath given me counsel" [Ps. xvi. 5-7].

From quotations found in old authors and from longer extracts in the Yalḳuṭ and the Midrash ha-Gadol, three other tannaitic midrashim are known, namely, the Mekilta of R. Simeon to Exodus and Sifra Zuta to Numbers (both of R. Akiba's school) and the Mekilta to Deuteronomy (of R. Ishmael's school); probably they also contained much haggadic matter.

B. The Purely Haggadic Midrashim.—I. The Earliest Exegetical Midrashim—Bereshit Rabbah and Ekah Rabbati.

1. Bereshit Rabbah: This midrash, which occupies the first position among the midrashim in virtue of its age and importance, has been discussed in Jew. Encyc. iii. 62 *et seq.* As was said there, the opinion handed down by nearly all the old authors that R. Hoshaiah, an amora of the first generation, living in Palestine in the third century, was the author of Bereshit Rabbah, may be interpreted to mean that R. Hoshaiah was responsible for the work in its original form; as such it was a running commentary (a form that originated in the tannaitic time), collecting and combining, verse by verse, according to a certain system, the various comments to Genesis, and forming a necessary supplement to the tannaitic midrashim to the other books of the Pentateuch. That there had been no similar halakic-haggadic midrash to Genesis is likely because in the composition of the tannaitic midrashim, Mekilta, Sifra, etc., the collection of the halakic comments was probably the chief object in view, and Genesis contains only a small portion of legal matter. The tannaitic character of Bereshit Rabbah, as well as the antiquity of the sources it must have used, appears from the fact, among others, that it contains more than fifty controversies between R. Judah and R. Nehemiah. The author of the old Halakot Gedolot, furthermore, ranged Bereshit Rabbah with the tannaitic midrashim, Sifra, Sifre, and Mekilta. Bereshit Rabbah is entirely distinct in its composition from the other purely haggadic Pentateuch midrashim, like Wayiḳra Rabbah, the Tanḥumas, etc., which are homiletic midrashim, and do not comment upon the Scripture text consecutively; on the other hand, Bereshit Rabbah in certain respects differs also from most of the tannaitic midrashim—Mekilta, Sifre to Numbers, and Sifre to Deuteronomy—which are, as has been seen, fragmentary in execution, while Bereshit Rabbah is (with the exception of a few passages not adapted to haggadic treatment) a running commentary, verse by verse, on the Book of Genesis from beginning to end.

Characteristics.

The chief difference in composition between the tannaitic midrashim and Bereshit Rabbah lies in the fact that the parashiyyot into which the latter is divided, begin, with a few exceptions, with proems, such as are always found at the beginning of the homilies collected in the homiletic midrashim. Bereshit Rabbah, therefore, presents a combination of the form of the running commentary with that of the homily complete in itself (Tanḥuma and Pesiḳta homilies). Although the original commentary on Genesis may have been divided into parashiyyot with rudimentary proems (see Bereshit Rabbah)—traces of such proems appear also in the tannaitic midrashim—yet the addition of the many artistic proems found in the existing form of the commentary was doubtless the work of a later time, when the Bereshit Rabbah received its present form. By the addition of a mass of haggadic material from the time of the Amoraim it became a large and important midrash to Genesis; and this was called "Bereshit Rabbah," perhaps, to distinguish it from the original form or from intermediate, but less comprehensive, amplifications. The date of the redaction of Bereshit Rabbah is difficult to determine exactly; but it is probably not much later than that of the Jerusalem Talmud. Zunz holds that it was collected and edited in the sixth century. The more recent conjecture, that it was not edited until the end of the seventh, or possibly not until the beginning of the second half of the eighth, century, can not be maintained. Even after the redaction many interpretations may have been added, and the proems increased in number and amplified; the midrash, beginning with the pericope "Wayishlaḥ," contains lengthy passages possessing the characteristics of the later Haggadah.

The editing of Bereshit Rabbah does not seem to have been entirely completed, as appears from the pericopes "Wayiggash" and "Wayeḥi" (for a further discussion of this subject, as well as for the number of the parashiyyot, their arrangement according to the open and closed sections in the Scripture text, and in part according to the beginnings of the sedarim, the proems, the character and extent of the exposition, etc., see Bereshit Rabbah). Attention has also been drawn to the disproportion between the extent of the parashiyyot which now form the pericope "Bereshit" of the midrash and the length of the remaining part of the work; that pericope alone constitutes more than one-fourth of the midrash and contains twenty-nine parashiyyot, several of which deal only with a few, and in some cases only with single, verses. This portion may have been taken from another and a larger haggadic work on Genesis that remained incomplete, and from which the midrash may have derived also the name "Bereshit Rabbah."

Title.

The designation "Rabbah" was then applied to the midrashim to the other books of the Pentateuch, as Wayiḳra Rabbah, Shemot Rabbah, etc., which were copied, with Bereshit Rabbah, even in (later) manuscripts, this collection then being called "Midrash Rabbot" (*i.e.*, "Midrash of the Rabbot"), to which the midrashim most in use during divine service—to Canticles, Ruth, Esther, Lamentations, and Ecclesiastes—were subsequently added. Thus the Venice edition of 1545, in which the midrashim to the Pentateuch and to the Five Rolls were for the first time printed together, has on the title-page of the first part the words "Midrash Rabbot 'al Ḥamishshah Ḥumshe Torah" (Midrash Rabbah to the Five Books of the Torah), and on that of the second part "Midrash Ḥamesh Megillot Rabbeta" (Midrash Rabbah of the Five Megillot). The editio princeps of the midrashim to the Pentateuch (Constantinople, 1512) begins with the words "Be-shem El atḥil Bereshit Rabba" (In the name of God I shall begin Bereshit Rabbah), and the title of the editio princeps of the midrashim to the Five Rolls (Pesaro, 1519) reads "Midrash Ḥamesh Megillot" (Midrash of the Five Megillot).

Still more inexact and misleading is the term "Midrash Rabbah to the Five Books of the Pentateuch and the Five Rolls," as found on the title-page of the two parts in the much-used Wilna edition. After Zunz, it is not necessary to point out that the Midrash Rabbah consists of ten entirely different midrashim. On the manuscript of the Bereshit Rabbah and some of the other rabbot to the Pentateuch see Theodor in "Monatsschrift," xxxvii. 170 *et seq.* To these must be added the manuscript of Bereshit Rabbah in MSS. Orient. 40, No. 32, in the Landesbibliothek in Stuttgart. According to Solomon Schechter, there are not even six manuscripts of the rabbot to the Pentateuch and the Five Rolls in existence (comp. Midrash ha-Gadol, Preface, xi.). The following is an extract from the first proem of parashah 9 and the interpretations to Gen. i. 26, directed against the Christian view finding support for the doctrine of the Trinity in this passage, and other interesting interpretations showing the use of foreign words in Bereshit Rabbah; the text followed is that of Theodor's critical edition.

And God said, Let us make man, etc. R. Johanan quotes the verse אחור וקדם צרתני וגו׳ [Ps. cxxxix. 5] and says: "If man is worthy of it, he enjoys two worlds, as it is written, 'Thou hast made me for afterward [the future world] and for formerly [this world],' but if not, then he will have to give an accounting, as it is written, 'And [thou hast] laid thine hand upon me'" [*ib.*]. R. Jeremiah b. Eleazar said, "When the Holy One, praised be He, created the first man, He created him as a hermaphrodite [ἀνδρόγυνος], as it is written, 'Male and female created he them'" [Gen. v. 2]. R. Samuel b. Naḥman said, "When the Holy One, praised be He, created the first man, He created him with a double face [πρόσωπος], and then cut him into halves and gave him two backs, one here, the other there." [This coincides with Plato's doctrine that man was originally androgynous and had two faces; Philo also frequently expresses the view that the ideal man was born as a man-woman.] He was interrupted, "It is written there, 'And he took אחת מצלעותיו'" [Gen. ii. 21]. He answered, "It means one of his 'sides' [not ribs], as it is written, ולצלע המשכן" ['And for the second side of the tabernacle'; Ex. xxvi. 20]. R. Tanḥuma, in the name of R. Bene Benaiah and R. Berechiah and R. Eleazar, said, "He created him as a golem [Adam in the primal state], who reached from one end of the world to the other, as it is written, 'Thine eyes did see my substance'" [Ps. cxxxix. 16]. R. Joshua b. Nehemiah and R. Judah b. Simeon, in the name of R. Eleazar, said, "He created him so that he filled the whole world, from east to west [also reflecting a Philonic view], as it is written, 'Thou hast formed me אחור וקדם [= 'behind, *i.e.*, westward and eastward'], from north to south,' as it is written, 'From the one side of heaven unto the other'" [Deut. iv. 32]. R. Eleazar said, "אחור; *i.e.*, as the last one in the creation of the last [sixth] day; וקדם; *i.e.*, and the first in the creation of the last day." This corresponds with R. Eleazar's view, who said, "Let the earth bring forth the living creature [Gen. i. 24; this is said in connection with the creation of the sixth day], that is, the spirit of the first man." R. Simeon b. Laḳish said, "אחור; *i.e.*, as the last in the creation of the last day; וקדם; *i.e.*, and as the first one in the creation of the first day." This corresponds with R. Simeon b. Laḳish's view, who said, "And the spirit of God moved [Gen. i. 2], that is, the spirit of the first man," as it is written, "And the spirit of the Lord shall rest upon him," etc. [Isa. xi. 2]. R. Naḥman said, "As the last one after all the created works, and as the first one at the Last Judgment" [comp. Gen. vii. 23]. R. Samuel b. Tanḥuma said, "In praising the Lord also he comes last, as it is written, 'Praise ye the Lord from the heavens' [Ps. cxlviii. 1]; and then, 'Praise the Lord from the earth,' etc. [*ib.* verse 7]; and then, 'Kings of the earth,'" etc. [*ib.* verse 11]. R. Simlai said, "As he praises only after the animals and birds [comp. *ib.* verses 10, 11 *et seq.*], so he was created after the animals and birds; first [it is written] 'And God said: Let the waters bring forth abundantly,' etc. [Gen. i. 20], and last, 'Let us make man,'" etc.

And God said, Let us make man, etc. With whom did He take counsel? R. Joshua b. Levi said, "He consulted the works of the heaven and the earth, like a king who has two counselors [σύγκλητος], without whose consent he does nothing." R. Samuel b. Naḥman said, "He took counsel with the work of every day of creation, like a king who has a coregent [συγκάθεδρος], without whose consent he does nothing." R. Ammi said, "He took counsel with his heart. . . ." R. Berechiah said, "When the Holy One, praised be He, was about to create the first man, He foresaw that both the pious and the wicked would descend from him. He said, 'If I create him, then the wicked will descend from him; if I do not create him, how can the pious descend from him?' What did the Holy One, praised be He? He removed the path of the sinner from His face, and created the attribute of mercy ["middat ha-raḥamim"], as it is written, 'The Lord knoweth [makes known] the way of the righteous; but the way of the ungodly shall perish'" [Ps. i. 6]. R. Ḥanina did not say thus, but: "When He was about to create the first man He took counsel with the angels. He said to them, 'Let us make man.' They said to Him: 'What is his nature?' He said to them, 'Righteous men shall descend from him. . . .' But He did not reveal to them that the ungodly should descend from him. For if He had revealed to them that the ungodly should descend from him, then the attribute of justice ['middat ha-din'] would not have consented that he should be created." R. Simeon said: "When the Holy One, praised be He, was about to create the first man the angels divided into groups; some of them said, 'Let him be created'; the others said, 'Do not let him be created, as it is written: "Mercy and truth are met together; righteousness and peace have kissed"' [Ps. lxxxv. 10]. Mercy said, 'Let him be created, for he will do works of mercy.' Truth said, 'Let him not be created, for he is full of deceit.' Benevolence said, 'Let him be created, for he will bestow benefits.' Peace said, 'Let him not be created, for he is full of quarrels.' What did the Holy One, praised be He? He took Truth and cast her upon the ground. Then the angels said, 'Lord of the World, why do you curse your Truth? Let Truth rise up from earth, as it is written, "Truth shall spring out of the earth"'" [*ib.* verse 11].

R. Huna the Elder of Sepphoris said, "While the angels were disputing and discussing with one another, the Holy One, praised be He, created him." R. Huna, in the name of R. Aibu, said, "He created him with circumspection, for He created first the things necessary for his life [the same thought and a parable similar to the following are found also in Philo]. Then the angels spoke before the Holy One, praised be He: 'Lord of the World, what is man that Thou art mindful of him? and the son of man that Thou visitest him? Why should this sorrow be created?' Then He said to them, 'Why have all sheep and oxen been created, the fowl of the air and the fish of the sea—why have these been created? A castle with all good things, and there are no guests; what pleasure has the owner who takes his fill?' Then the angels said, 'O Lord our Lord, how excellent is Thy name in all the earth! Do what seems best to Thee'" [Ps. viii. 5-10 (A. V. 4-9)]. R. Joshua of Shiknin, in the name of R. Levi, said, "He took counsel with the souls of the pious. . . ." R. Samuel b. Naḥman, in the name of R. Jonathan, said, "When Moses wrote down the Torah, he noted therein the creative work of each day; when he reached the verse, 'And God said, Let us make man,' he said, 'Lord of the World, why dost Thou give cause for attack to the "minim" [heretics]?' But He said to him, 'Write; *let him err who will.*' The Holy One, praised be He, said to him, 'Moses, shall I not produce great and small ones from the man whom I create? Then when the great one comes to ask permission from the small one, and says, "Why do I need to ask permission from the small one?" then the small one shall say to him, "Learn from thy Creator, who created the upper and the lower beings, and when He was about to create man took counsel with the angels!"'"

R. Ela said: "*It is not the question here of taking counsel*; it is as a king who, walking before the gate of the palace [παλάτιον], saw a block of stone [βυλάριον]. He said, 'What shall we do with this?' Some said, 'Use it for public baths [δημόσια]'; others said, 'Use it for private baths [πριουᾶτος].' But the king said, 'I will make a statue [ἀνδριάς] of it; who shall hinder me?'" The minim asked R. Simlai: "How many gods have created the world? What means בראשית ברא אלהים?" He answered, "It does not say בראו אלהים [the verb in the plural], but ברא אלהים." R. Simlai said, "Where you find a sentence for the minim, there you will find beside it its refutation." They asked him, further, "What means God by נעשה אדם?" Then he said to them, "Read what follows from it. It does not say ויבראו אלהים את האדם, but ויברא" [the verb in the singular; Gen. i. 27]. R. Hoshaiah said, "When the Holy One, praised be He, created the first man the angels erred and would have said before him 'Holy!' It is as a king who sat with a governor [ἔπαρχος] in a coach of state [καρροῦχα]. The people wished to cry 'Domine' before the king, but they did not know which was he. What did the king? He pushed the governor out of the coach, and then they recognized the king. So the angels erred when the Holy One, praised be He, created the first man. What did the Holy One, praised be He? He put him into a deep sleep [comp. Gen. ii. 21], and all then recognized that it was a man."

2. Ekah Rabbati: The midrash to Lamentations, one of the oldest Palestinian midrashim, has been discussed in Jew. Encyc. v. 85 *et seq.* Here it may briefly be repeated that Ekah Rabbati begins with a collection of thirty-six proems, which are followed by the commentary to Lamentations, verse by verse, together with numerous stories. The midrash has many parallel passages to Yerushalmi which were probably not taken directly from the latter, for old collections were probably the common source for Ekah Rabbati, Bereshit Rabbah, and the Pesiḳta. It may be assumed with certainty that Ekah Rabbati was edited some time after the final edition of Yerushalmi, and that Bereshit Rabbah also must be considered to be older, but it has been by no means proved, as Zunz assumes for various reasons, that the entire work was not finished before the second half of the seventh century. For all details, as well as for another midrash to Lamentations published by Buber in the Midrash Zuta, see Ekah Rabbati. The following is from the beginning of the exposition to Lam. i. 1, after the text of the Wilna (1899) edition of Buber (pp. 21a *et seq.*):

How [איכה = "Ekah"] *doth the city sit solitary.* Three prophets used the expression איכה in their prophecies—Moses, Isaiah, and Jeremiah. Moses said, "How can I myself alone bear . . ." [Deut. i. 12]; Isaiah said, "How is the faithful city become an harlot!" [i. 21]; Jeremiah said, "How doth sit solitary." R. Levi said: "It is like a noble woman [matron] who had three friends: one of them saw her in her honor; another saw her in her abandon; and the third one saw her in her sorrow. Moses saw them [the Israelites] in their honor [their happiness], and said, 'How can I myself alone bear'; Isaiah saw them in their abandon, and said, 'How is become a harlot'; Jeremiah saw them in their sorrow, and said, 'How doth sit solitary'" [R. Eleazar and R. Johanan interpreted איכה as two words—אי and כה]. R. Eleazar said, "Where [איה] is the 'so' [כה] which He spoke to Moses—'So shall thy seed be'" [Gen. xv. 5]; and R. Johanan said, "Where [איה] is the 'so' [כה] which He spake to Moses, 'Thus shalt thou say to the house of Jacob'" [Ex. xix. 3]. R. Judah and R. Nehemiah: R. Nehemiah said, "איכה is merely the expression for wailing, as it is written [Gen. iii. 9], 'And the Lord God called unto Adam and said unto him, איכה'" [interpreted as אוי לכה = 'wo unto thee']. R. Judah said, "איכה is the term for reproof, as it is written, 'How [איכה] do ye say, We are wise!'" [Jer. viii. 8]. Ben Azzai was asked, and they said to him, "Say to us a word concerning the Roll of Lamentations." He said to them [playing on the letters of the word איכה], "Israel went into exile only after it had denied the Only One of the world [א], the ten words [י], the circumcision which had been commended after twenty generations [*i.e.*, to Abraham, who lived twenty [כ] generations after Adam], and the five books [ה] of the Torah."

Doth sit solitary [בדד]. R. Berechiah, in the name of R. Abdima of Ḥaifa: "Like a king who had a son whom he arrayed in magnificent garments when he fulfilled the will of his father; but when the king was angry with him he let him wear soiled [בדודים] garments. So with Israel; as long as he fulfilled the will of God he was clothed magnificently, as it is written, 'I clothed thee also with רקמה'" [Ezek. xvi. 10]. R. Simlai said, "That is purple; Akiba translated it 'garments embroidered in colors [= ποικιλτά]'; but when they angered him he made them wear soiled garments." R. Joshua b. Levi said, "The Holy One, praised be He, said to Israel, 'So long as you did My will I allowed you to live secure, apart [בדד], as it is written, "Israel then shall dwell in safety alone" [Deut. xxxiii. 28]; but when you transgressed My will, then I banished you to unclean places, as it is written, "He [the leper] shall dwell alone [בדד]; without the camp shall his habitation be"'" [Lev. xiii. 46]. Why is the Roll of Lamentations composed according to the alphabet? In order that the lamenters may recite it fluently. Another explanation: I thought to bless you from "alef" to "taw," as it is written, "If [אם] you walk in my commandments . . . upright" [קוממיות, Lev. xxvi. 3-13; *i.e.*, this section, containing the divine blessings, begins with א, in the word אם, and ends with ת, in the word קוממיות]. When was the Roll of Lamentations recited? R. Judah says, "In the days of Jehoiakim." R. Berechiah b. Nehemiah said, "Do people weep for a person before he has died? It was rather written down in the days of Jehoiakim and recited after the destruction of the Temple."

II. The Homiletic Midrashim: As it is customary nowadays to distinguish between festival and Sabbath sermons, so in antiquity there were collections of homilies, haggadic discourses on the Scripture sections intended as lessons for the feast-days and special Sabbaths, as well as on the Sabbatical pericopes of the three-year cycle—either on the pericopes of the entire Pentateuch (hence covering the entire cycle) or on the pericopes from single books of the Pentateuch. Such collections are the Pesiḳta (erroneously ascribed to Rab Kahana, and called also "Pesiḳta de-Rab Kahana"), the Pesiḳta Rabbati, Wayiḳra Rabbah, the Tanḥuma Midrashim, Debarim Rabbah, Bemidbar Rabbah (beginning with parashah 15), Shemot Rabbah, etc. The nature of the homilies has been sketched above; they begin with several proems, to which is added the exposition, which generally covers only a few of the first verses and verse-texts of the lesson in question, ending with a Messianic or other comforting verse. The halakic exordium preceding the proems is peculiar to Tanḥuma, Pesiḳta Rabbati, Debarim Rabbah, and Bemidbar Rabbah (part ii.). The homilies in Wayiḳra have the same form as those in the Pesiḳta.

1. The Pesiḳta de-Rab Kahana: This Pesiḳta exists in only one edition, that of Solomon Buber (Lyck, 1868); it consists of 33 (or 34) homilies on the lessons forming the Pesiḳta cycle: the Pentateuchal lessons for special Sabbaths (Nos. 1-6) and for the feast-days (Nos. 7-12, 23, 27-32), the prophetic lessons for the Sabbaths of mourning and comforting (Nos. 13-22), and the penitential sections "Dirshu" and "Shubah" (Nos. 24, 25; No. 26 is a homily entitled "Seliḥot"). According to the arrangement in this edition the homilies fall into three groups: Pentateuchal, Prophetic, and Tishri, "pisḳot" (discourses on the lessons). An unnumbered "other piskah" to Isa. lxi. 10, after two manuscripts, is printed after No. 22; similarly No. 29, after a manuscript, is designated with No. 28 as "another piskah" for Sukkot, and the piskah on pp. 194b *et seq.*, recognizable as spurious by the halakic exordium, and also printed after a manuscript, is designated with No. 30 as another version of the piskah for Shemini. Piskot Nos. 12 and 32 each consist really of two homilies. But the second homily in No. 27 (pp. 174b *et seq.*) does not belong to the Pesiḳta.

The various manuscripts differ not only in regard to the above-mentioned second piskot and to other and longer passages, but also in regard to the arrangement of the entire collection, which began, in a manuscript which is defective at the beginning, with the homilies to prophetical lessons Nos. 13–22 and 24–25. These twelve homilies are designated by an old abbreviation as דש״ח נ״ע אר״ק שד״ש. Another manuscript, entitled "Hafṭarah Midrash," contains only these homilies, with the exception of next to the last one. Entire homilies of the Pesiḳta have been taken over, or sometimes worked over, into the Pesiḳta Rabbati; there are also a number of Pesiḳta homilies in the Tanḥuma Midrashim. Wayiḳra Rabbah also contains some of the homilies found in Pesiḳta. The parashiyyot 20, 27–30 in Wayiḳra Rabbah are, with the exception of a few differences, the same as pisḳot Nos. 27, 9, 8, 23, 28 of the Pesiḳta. Zunz takes the Pesiḳta to be dependent on Wayiḳra Rabbah, assigning this midrash to the middle of the seventh century, but the Pesiḳta to the year 700. Weiss, while emphasizing still more strongly the dependence of Pesiḳta on Wayiḳra Rabbah, takes it to be nearly as old as Bereshit Rabbah; he thinks that the Pesiḳta took for its sources Bereshit Rabbah, Wayiḳra Rabbah, Ekah Rabbah, and Shir ha-Shirim Rabbah. But other authorities regard the Pesiḳta as the earliest midrash collection.

Undoubtedly the Pesiḳta is very old, and must be classed together with Bereshit Rabbah and Ekah Rabbah. But the proems in the Pesiḳta, developed from short introductions to the exposition of the Scripture text into more independent homiletic structures, as well as the mastery of form apparent in the final formulas of the proems, indicate that the Pesiḳta belongs to a higher stage of midrashic development. The nature of certain Pentateuch lessons, intended apparently for the second feast-days (not celebrated in Palestine), still calls for investigation, as well as the question as to the time at which the cycle of the twelve prophetic lessons designated by דש״ח, etc., came into use; this cycle is not mentioned in Talmudic times, but is subsequently stated to have been ordained or prescribed in the Pesiḳta. For further details and quotations of passages see Pesiḳta.

2. Wayiḳra Rabbah: Wayiḳra Rabbah is generally classed among the oldest midrashim; it consists of thirty-seven parashiyyot and as many homilies, twenty-two of which belong to the Sabbath lessons of the sedarim cycle in the Book of Leviticus (according to various statements regarding this cycle), and five to feast-day lessons of the Pesiḳta cycle, taken from Leviticus. To certain of the lessons belong two homilies each: parashahs i. and ii. each contains a homily to Lev. i. 1; parashahs iv. and v. each one to Lev. iv. 1; and parashahs xx. and xxi. each one to the Pesiḳta lesson Lev. xvi. 1. As mentioned above, the five homilies on the feast-day lessons in parashahs xx., xxvii.–xxx. are identical with five pisḳot in the Pesiḳta. Buber, contrary to all manuscripts, has erroneously printed also Wayiḳra Rabbah, parashah xxi., as a continuation of pisḳah No. 27 (pp. 174b *et seq.*). The inclusion of the seven other parashiyyot may be due to another partly different arrangement of the sedarim cycle, just as there are, on the other hand, no homilies in Wayiḳra Rabbah to certain passages in Leviticus now known as commencements of sedarim. Wayiḳra Rabbah (section 3) contains an interesting statement in regard to the variations in the sedarim cycle and the general custom of introducing the exposition by a proem; R. Ḥanina b. Abba, when he came to a place where a pericope began with Lev. ii. 3, was asked which verse he used for the proem. The proems are more independent in structure, as in the Pesiḳta, with which Wayiḳra Rabbah has much in common regarding also the use of the final formulas for the proems.

The frequent use of proverbs ("be-matla amerin," "matla amer") is characteristic of this midrash: "If you have knowledge, what do you lack? If you lack knowledge, what do you possess?" (parashah i. 6). "Whoever lends on interest destroys his own and other property" (iii. 1). "She plays the coquette for apples, and divides among the sick" (*ib.*). "Whoever leases one garden eats birds; whoever leases two gardens is eaten by birds" (*ib.*). "Where the master hangs up his weapon there the common herdsman hangs up his water-jug" (iv. 1). "If one knot is unraveled, then two knots are unraveled" (xiv. 3). "Whoever eats palm-cabbage is wounded by the palm-thorn" (xv. 8). "Do not care for the good pup of a bad dog, much less for the bad pup of a bad dog" (xix. 6; comp. "Monatsschrift," 1881, p. 509). See Wayiḳra Rabbah.

3. Tanḥuma Yelammedenu: While Wayiḳra Rabbah is a homily collection to a single book of the Pentateuch—Leviticus—the midrash Tanḥuma is a collection covering the entire Pentateuch, arranged according to the sedarim cycle, as appears from most of the Tanḥuma homilies which have been preserved; it contains also homilies to the feast-day and Sabbath lessons of the Pesiḳta cycle. The order of the Tanḥuma homilies is as follows: halakic exordium; several proems; exposition of the first verses; Messianic conclusion. The work derives its name "Yelammedenu" from the formula "Yelammedenu rabbenu" (Let our teacher teach us), with which the halakic exordium begins; it is generally cited under this name, especially in the "'Aruk." It is called "Midrash Tanḥuma" by many old authors. A number of its proems bear the name of R. Tanḥuma, and the sentence "Thus R. Tanḥuma expounded [or preached]" is added to several larger sections. The author of Yalḳuṭ Shim'oni, however, cites two midrash works, one under the title "Yelammedenu" and the other under that of "Tanḥuma." Furthermore, the midrash Tanḥuma, which has been frequently reedited since the Constantinople edition of 1520–22, and the midrash which Solomon Buber published in 1885 from manuscripts, in so far as the parts to Genesis and Exodus are concerned are seen to be special collections. Variations in text, evidence for which is furnished by the two editions mentioned, as well as by quotations and extracts found in many writings, and by the fact that the work is known under various titles, can not be explained by assuming that the different collections now possessed—to which must be added Debarim Rabbah—or those formerly used were different revisions and extracts from the "original" Yelammedenu.

If this mythical haggadic work was the common source for such different collections, containing entirely different homilies to many of the lessons, it must have been very voluminous and heterogeneous. One is justified in assuming that even if the Yelammedenu had covered the entire Pentateuch it would have contained only one homily to each seder. But if the homilies consisting of halakic introductions, proems, and expositions to some verses be designated as typical Tanḥuma homilies, modeled on the form of the Tanḥuma Yelammedenu (for the increasing popularity of sermons must have given rise to a great number of such homilies), then the existence of collections of entirely different homilies, but modeled on this type and called "Tanḥuma midrashim," is easily explainable. Or perhaps works were compiled by omitting a number of homilies from an earlier collection (Yelammedenu) and adding others having the same form together with various other selections; instances of this kind can be seen in the parts to Genesis and Exodus in the extant two Tanḥuma midrashim. Bacher assumes ("Ag. Pal. Amor." iii. 502 *et seq.*) that R. Tanḥuma b. Abba, one of the foremost haggadists of the fourth century—of whom more proems have been preserved than of any other author and with whom the haggadic activity of Palestine was, in a sense, brought to an end—undertook to collect and edit the haggadic Scripture interpretations according to the pericopes, of both the sedarim and the Pesiḳta cycle; although the haggadic works he collected are no longer extant, the two pesiḳtot and the Tanḥuma midrashim were based on them. According to Bacher, these midrashim contain not only passages from the original Tanḥuma, but passages from the other midrashim to the Pentateuch and to the Five Rolls, even Bereshit Rabbah and Wayiḳra Rabbah having drawn directly or indirectly from the same source. This is a far-reaching hypothesis. Zunz believed that he "did not detract from the Yelammedenu" by assigning its author to the first half of the ninth century. This view can not now be accepted. According to Brüll, the Yelammedenu was completed by the middle of the eighth century, and recognized as an authority, to which R. Aḥa of Shabḥa refers in the "She'eltot"; Brüll thinks it was "composed about 650–720" (Brüll's "Jahrb." viii. 127 *et seq.*). Yelammedenu is quoted as early as Saadia's time. The references to the rivers Tiber and Ticinus do not prove that the Tanḥuma was compiled in Italy.

Tanḥuma comprises 158 homilies in Buber's edition, and 161 in the other editions (in which it still shows in part the original division); Nos. 129 and 132 are homilies to the sedarim and the Pesiḳta cycle. The part to Deuteronomy has been preserved very imperfectly. Tanḥuma was divided according to the pericopes of the one-year cycle when that cycle was in general use. See TANḤUMA.

4. Pesiḳta Rabbati: The Pesiḳta Rabbati is a collection of homilies on the Pentateuchal and prophetic lessons, the special Sabbaths, etc.; it was probably called "rabbati" (the larger) to distinguish it from the earlier Pesiḳta. In common with the latter it has five entire pisḳot—No. 15 ("Ha-Ḥodesh"), No. 16 ("Korbani Laḥmi"), No. 17 ("Wa-yeḥi ba-Ḥazi"), No. 18 ("Omer"), No. 33 ("Aniyyah So'arah"), and the larger part of No. 14 ("Para"); but otherwise it is very different from the Pesiḳta, being in every respect like the Tanḥuma midrashim. In Friedmann's edition (Vienna, 1880) it contains, in forty-seven numbers, about fifty-one homilies, part of which are combinations of smaller ones; seven or eight of these homilies belong to Ḥanukkah, and about seven each to the Feast of Weeks and New-Year, while the older Pesiḳta contains one each for Ḥanukkah and the Feast of Weeks and two for New-Year. Pesiḳta Rabbati contains also homilies to lessons which are not paralleled in the Pesiḳta. There are also various differences between these two Pesiḳtot in regard to the feast-day lessons and the lessons for the Sabbaths of mourning and of comforting. The works are entirely different in content, with the exception of the above-mentioned Nos. 15–18, the part of No. 14, and some few minor parallels. The Pesiḳta contains no halakic exordiums or proems by R. Tanḥuma. But in the Pesiḳta Rabbati there are not less than twenty-eight homilies with such exordiums having the formula "Yelammedenu Rabbenu," followed by proems with the statement "kak pataḥ R. Tanḥuma"; two homilies, Nos. 38 and 45, the first of which is probably defective, have the Yelammedenu without proems with "kak pataḥ," etc.

Some of the homilies have more than one proem by R. Tanḥuma. The pisḳot taken from the Pesiḳta have of course no Yelammedenu or Tanḥuma proems; the first part of pisḳah No. 14, which does not belong to the Pesiḳta, has at the beginning two halakic introductions and one proem of R. Tanḥuma. Homilies Nos. 20–24, which together form a midrash to the Decalogue, are without these introductions and proems. Only three of the homilies for the Sabbaths of mourning and comforting have such passages, namely, Nos. 29, 31, 33; but they are prefixed to those homilies, beginning with No. 38 (except No. 46, which is of foreign origin), which have the superscription "Midrash Harninu"—a name used to designate the homilies for New-Year and the Feast of Tabernacles which the old authors found in the Pesiḳta Rabbati. The present edition of the Pesiḳta Rabbati, which ends with the homily for the Day of Atonement, is doubtless defective; the older Pesiḳta has also various homilies for Sukkot, Shemini 'Aẓeret, and the Feast of the Torah. Some of the homilies also, as Nos. 19, 27, 38, 39, 45, are defective. Pesiḳta Rabbati therefore appears to be a combination of various parts, the homilies, perhaps, being added later. It is said above that No. 46 is a foreign addition; here Ps. xc. 1 is interpreted as an acrostic למשה (ascribed to Moses), and there is also a passage from the Midrash Konen; other passages also may have been added, as the passage in No. 20, which is elsewhere quoted in the name of the "Pirḳe Hekalot" and of "Ma'aseh Bereshit" (comp. also Jellinek, "Bet ha-Midrash," i. 58). No. 36 was considered doubtful on account of its contents; No. 26 is peculiar, referring not to a Scripture passage but to a verse or a parable composed by the author. The diction and style are very fine in many passages. In the beginning of the first homily, which shows the characteristics of the "genuine" portions of the Pesiḳta Rabbati, in the proems of R. Tanḥuma following the halakic exordium, the year 845 is indicated as the date of composition of the work; there are no grounds for regarding the date as a gloss (see Pesiḳta Rabbati).

In the appendix to the Friedmann edition four homilies are printed from a manuscript, Nos. 1 and 2 of which have yelammedenus and proems. The midrash referred to here is a later, shorter midrash for the feast-days, designated as "New Pesiḳta," and frequently drawing upon the Pesiḳta Rabbati; it has been published by Jellinek in "Bet ha-Midrash," vi. 36–70.

5. Debarim Rabbah: Debarim Rabbah contains twenty-five homilies and two fragments of homilies on sections of Deuteronomy which are known for the larger part as lessons of the sedarim cycle. Homilies on the Pesiḳta lessons of Deut. xiv. 22 and xxv. 17 are not included in this midrash. Debarim Rabbah has been fully analyzed in Jew. Encyc. iv. 487, where it has been said that it contains a much more complete collection of Tanḥuma homilies in a much more original form than does the Midrash Tanḥuma in Buber's and the earlier editions; and it must be again especially noticed here that in Debarim Rabbah all homilies begin with halakic exordiums (preceded by the word "halakah" instead of the yelammedenu formula), while the portion of Midrash Tanḥuma to Deuteronomy does not have that introduction in either edition. The proems in Debarim Rabbah are quite independent structures; while the old sources, as Yerushalmi, Bereshit Rabbah, and Wayiḳra Rabbah, are used, a freer rendering is often noticeable, as well as the endeavor to translate Aramaic passages into Hebrew. Zunz ascribes the midrash to about the year 900. See Debarim Rabbah.

6. Bemidbar Rabbah: This midrash is, in its earlier portions, beginning with the pericope "Beha'aloteka," not an independent midrash, but an extract from Tanḥuma, giving, with some variations and additions, the text of the earlier editions rather than that of Buber's edition. The word "halakah" instead of "yelammedenu Rabbenu" is added to the halakic exordiums in the editions, as in Debarim Rabbah; some of the homilies in Bemidbar Rabbah are without the halakic exordiums found in Tanḥuma. The thirty homilies which are found here in parashiyyot xv.–xxii. (see Bemidbar Rabbah), are on the whole identical with Tanḥuma (the earlier editions, from "Beha'aloteka" to the end); noteworthy among the interpolations is parashah xviii., No. 21 (remarkable on other grounds also), which is not found in the manuscripts of Tanḥuma, but which was added to the editio princeps of Tanḥuma (Constantinople, 1520–22) from Bemidbar Rabbah. To the Tanḥuma homilies to Numbers, beginning with ch. viii., was added a later haggadic elaboration of Num. i.–vii., which, according to Zunz, is not older than the twelfth century: it is laid out on such a large scale that, covering only the pericopes "Bemidbar" and "Naso," it takes up nearly three-fourths of the Midrash Bemidbar Rabbah. The exposition of "Naso" is, again, more than three times as long as that of "Bemidbar"; in it the method of revising and elaborating the old Tanḥuma homilies may still be seen; in the pericope "Naso" nearly all traces of the old arrangement have been swept away by the new Haggadah. It is doubtful whether the midrash in both pericopes is the work of the same author, and it is improbable that originally it formed a part of a haggadic work which dealt in a similar way with the entire Book of Numbers. The extent of the development of the Midrash Haggadah in the course of the centuries, from the epoch of the tannaitic midrashim down to the period that produced the Bemidbar Rabbah to Num. ch. i.–vii., appears on comparing the exegesis to Num. vii. 1 *et seq.*, which is so brief that only one verse relating to the gifts of the princes on the second day is expounded, with that in Bemidbar Rabbah, in which the haggadist gave a twelvefold ingenious and suggestive exposition of the same gifts. See Bemidbar Rabbah.

7. Shemot Rabbah: The Midrash to Exodus, containing in the editions fifty-two parashiyyot, is likewise not uniform in its composition. In parashiyyot i.–xiv. the proems are almost invariably followed by the running commentary on the entire seder or other Scriptural division (the beginnings of the sedarim are distinguished by an asterisk):

(1) Parashah i., on *Ex. i. 1-ii. 25; (2) par. ii. and iii., on *Ex. iii. 1–iv. 17; (3) par. iv. and v., Nos. 2–8, on *Ex. iv. 18–26; (4) par. v., Nos. 1, 9-23, on Ex. iv. 27–vi. 1; (5) par. vi., on *Ex. vi. 2–12; (6) par. vii., on Ex. vi. 13 *et seq.*; (7) par. viii., on Ex. vii. 1 *et seq.* (a Tanḥuma homily); (8) par. ix., on *Ex. vii. 8–25; (9) par x., on Ex. vii. 26-viii. 15; (10) par. xi., on *Ex. viii. 16–ix. 12; (11) par. xii., on Ex. ix. 13–35; (12) par. xiii., on *Ex. x. 1–20; (13) par. xiv., on Ex. x. 21–29 (there is no exposition nor, in the Tanḥuma midrashim, any homily to *Ex. xi. 1).

Shemot Rabbah, beginning with parashah xv., contains homilies and homiletical fragments to the first verses of the Scripture sections. Many of the homilies are taken from the Tanḥumas, though parashiyyot xv., xvi.–xix., xx., xxx., and others show that the author had access also to homilies in many other sources. In the editions the text is sometimes abbreviated and the reader referred to such collections, as well as to the Pesiḳta; in parashah xxxix. the entire exposition of the Pesiḳta lesson Ki Tissa (Ex. xxx. 11) has been eliminated in this fashion. Such references and abbreviations were doubtless made by later copyists. There is an interesting statement in parashah xliv. regarding the manner of treating a proem-text from the Psalms for the homily to Ex. xxxii. 13. The assumption is justified that Shemot Rabbah down to Ex. xii. 1, with which section the Mekilta begins, is based on an earlier exegetical midrash, constituting, perhaps, the continuation of Bereshit Rabbah. This would explain the fact that in the first part there are several parashiyyot to the open and closed Scripture sections, and that several expressions recall the terminology of the tannaitic midrash. Zunz ascribes the composition of the entire work to the eleventh or twelfth century; although, immediately following Bereshit Rabbah in the collection of the rabbot, it "is separated from the latter by 500 years" ("G. V." p. 256). See Shemot Rabbah.

8. Aggadat Bereshit: Aggadat Bereshit is a collection of homilies to a number of sedarim of Genesis, notable for its artistic composition. In Buber's edition (Cracow, 1903) it contains 83 homilies in 84 chapters (really 83, since 82 and 83 form one chapter); each homily, down to ch. lxxxi., is in three sections, so arranged that the first one connects

Sedarim and Homilies.

with a seder from Genesis, the second with a prophetic section (which may be regarded as the hafṭarah to this seder), and the third with a psalm (which, perhaps, was recited during worship on the Sabbath for which this seder was a lesson). The several homilies are combined from proemial passages generally connected with extraneous texts. Twenty-six of the twenty-eight sections of Genesis are known as sedarim from old lists; Gen. vi. 5 and xviii. 25, to which the homilies in ch. i. and xxii. belong, and to which there are homilies in the Tanḥuma midrashim (to Gen. xviii. 25 in ed. Buber), were probably beginnings of sedarim according to a different division of the sedarim cycle. Hence the Aggadat Bereshit contains the haggadic material for twenty-eight Sabbaths, on which, according to the three-year sedarim cycle, the following passages were read (the Roman numerals between parentheses indicate the corresponding peraḳim in the Tanḥuma): (1) Gen. vi. 5 with Ezek. xxxviii. 10 and Ps. li. (ch. i.–iii.); (2) Gen. viii. 1 with Jer. xxxi. 19 and Ps. xvii. (iv.–vi.); (3) Gen. viii. 15 with Micah vii. 9 and Ps. xvii. (vii.–ix.); (4) Gen. xix. 8 with Micah vii. 9 and Ps. xxvii. (x.–xii.); (5) Gen. xv. 1 with Isa. i. 1 and Ps. xxvii. (xiii.–xv.); (6) Gen. xvii. 1 with Jer. xxxiii. 25 and Ps. cx. (xvi.–xviii.); (7) Gen. xviii. 1 with Mal. iii. 19 and Ps. cx. (xix.–xxi.); (8) Gen. xviii. 25 with Mal. iii. 18 and Ps. cx. (xxii.–xxiv.); (9) Gen. xx. 1 with Judges ix. 22 and Ps. cx. (xxv.–xxvii.); (10) Gen. xxi. 1 with I Sam. ii. 21 and Ps. cx. (xxviii.–xxx.); (11) Gen. xxii. 1 with Judges iii. 1 and Ps. cxii. (xxxi.–xxxiii.); (12) Gen. xxiv. 1 with I Kings i. 1 and Ps. cxxi. (xxxiv.–xxxvi.); (13) Gen. xxv. 19 with I Kings i. 1 and Ps. cxxi. (xxxvii.–xxxix.); (14) Gen. xxvii. 1 with I Sam. ii. 22 and Ps. lxv. 10 (xl.–xlii.); (15) Gen. xxvii. 28 with Micah v. 6 and Ps. cxxi. (xliii.–xlv.); (16) Gen. xxviii. 10 with Hosea xii. 13 and Ps. cxxi. (xlvi.–xlviii.); (17) Gen. xxix. 31 with I Sam. i. 1 and Ps. cxxi. (xlix.–li. 1); (18) Gen. xxx. 22 with I Sam. i. 11 and Ps. cxxi. (lii.–liv.); (19) Gen. xxxii. 4 with Ob. i. 1 and Ps. cxxi. (lv.–lvii.); (20) Gen. xxxvii. 1 with Ob. i. 1 and Ps. cxxix. (lviii.–lx.); (21) Gen. xxxviii. 1 (correctly so after a MS.) with Isa. xl. 27 and Ps. cxxix. (lxi.–lxiii.); (22) Gen. xxxix. 1 (so the MS.) with Isa. xl. 27 and Ps. cxxix. (lxiv.–lxvi.); (23) Gen. xli. 1 with Hag. i. 1 and Ps. cxxix. (lxvii.–lxix.); (24) Gen. xlii. 1 with Isa. xlix. and Ps. cxxix. (lxx.–lxxii.); (25) Gen. xliii. 13 with Jer. ii. 4 and Ps. lxxvi. (lxxiii.–lxxv.); (26) Gen. xliv. 18 with I Kings xviii. 36 and Ps. lxxvi. (lxxvi.–lxxviii.); (27) Gen. xlvi. 28 with I Kings xviii. 36 and Ps. lxxvi. (lxxix.–lxxxi.); (28) Gen. xlix. 1 with Isa. xlviii. 12 (lxxxii.–lxxxiii., belonging together, and lxxxiv.; there is no Psalm exposition for this passage.)

The collection is not complete, beginning only with Gen. vi. 5; there are no homilies to a large number of sedarim of Genesis, and the ending is defective. The assumption that the prophetic sections in Aggadat Bereshit are hafṭarot to the respective sedarim according to the three-year cycle is in part supported by the list of the sedarim hafṭarot which has been published by Büchler, from a manuscript source, in the "Jewish Quarterly Review" (1894, vi. 39 *et seq.*); here, as in Aggadat Bereshit, the sedarim Gen. xv. 1, xxi. 1, xxvii. 28, xxviii. 10, xxx. 22, xxxii. 4 have assigned to them the hafṭarot Isa. i. 1, I Sam. ii. 21, Micah v. 6, Hosea xii. 13, I Sam. i. 11, Ob. i. 1. After Büchler's statements, the difference in the hafṭarot to the other sedarim does not seem strange. But it is curious that several prophetic sections, as I Kings i. 1, xviii. 36, Isa. xl. 27, Ob. i. 1, Micah vii. 9, Malachi iii. 18, are repeated. The Psalms which are expounded in Aggadat Bereshit present a problem that has not yet been explained. Ps. xvii. occurs twice, xxvii. twice, lxxvi. three times, cx. five times, cxxi. seven times. As is the case with the above-mentioned prophetical sections, the sedarim in which the same Psalm is used are, with one exception, consecutive, the treatment being always a different one and displaying not a little of the art of midrashic exegesis.

The contents of Aggadat Bereshit were taken, for the greater part, from Tanḥuma, and there are many signs to indicate a late date of composition of the midrash; nor is it quoted, according to Buber, by the old authors. The author of this work must have been living in a country where Greek was freely spoken; he uses Greek words not found in other midrashim—as in ch. xi., הלפים (ἀλπίς)—words for which he could easily have substituted equivalent Hebrew expressions. The word instanced, a ἅπαξ λεγόμενον, was recognized to be Greek even by Menahem di Lonsano, who first edited this midrash at the end of the collection "Shete Yadot" (Venice, 1618).

9. We-Hizhir (Hashkem): Although the discussion of the purely haggadic Pentateuch midrashim does not belong to this article, yet a brief mention of a work known to the old authors indifferently as **Midrash we-Hizhir** or **Midrash Hashkem** is required here. It took its halakic portion from the Talmudic sources, the baraita on the building of the Tabernacle, the "She'eltot," and the "Halakot Gedolot," the "She'eltot" also being arranged according to the one-year cycle and being in its minor portions especially dependent on Tanḥuma. The first part of the Munich codex, after which the work was published (by I. M. Freimann, under the title "We-Hizhir," part i., Leipsic, 1873; part ii., Warsaw, 1880), is doubtless somewhat defective. It begins with a haggadic passage, which, belonging to Ex. viii. 16 ("Wa-yomer hashkem ba-boker"), is found also in the earlier editions of Tanḥuma (ed. Stettin, *s.v.* "Wa'era," p. 14).

The work was called "Hashkem" after the second word in this introductory sentence. In the editions as well as in the codex this first passage, as well as the beginning of the following haggadic passage to Ex. ix. 22, included in both Tanḥumas in the pericope "Wa'era," is erroneously combined with a passage to Ex. x. 21—which also, perhaps, was taken from Tanḥuma—as belonging to the pericope "Bo." The midrash was called by other authors "We-Hizhir," after the standing formula "We-hizhir ha-Ḳadosh, baruk Hu," with which nearly all the pericopes in the midrash as now extant begin, and which is occasionally found at the beginning of a new section in the middle of the pericope. No one, however, quotes Hashkem and We-Hizhir together as two different works. "The halakic expositions refer in 'Bo' to the tefillin; in 'Beshallaḥ' to the rest on the Sabbath and the 'dine 'erub'; in 'Yitro' to the commandments connected with the Decalogue; in 'Mishpaṭim' to the requirements of the judge; in 'Terumah' to the priestly gift; in 'Wayaḳhel' to the Sabbath; in 'Wayiḳra' to slaughtering; in 'Ẓaw' to the oath and the testimony of witnesses; in 'Shemini' to the 'dine ṭerefah'; in 'Tazria'' to the 'dine yoledot'; in 'Meẓora'' to the 'dine ṭum'ah'; in 'Aḥare' and 'Ḳedoshim' to forbidden marriages; in 'Beḥuḳḳotai' to vows; in 'Bemidbar' to the 'dine bekor'" (Zunz, "G. S." iii. 258). The haggadic portions are those mentioned above; also part i., pp. 4a *et seq.* (from the Mekilta); pp. 19a *et seq.* (from Tanḥuma, ed. Buber, and Mekilta); p. 23a (from Mekilta); p. 76b (after Tanḥuma); pp. 115a *et seq.*, 121b (after Tanḥuma); p. 128b (after Tanḥuma, ed. Buber); part ii., pp. 34b *et seq.* (from Wayiḳra Rabbah, ix.); p. 128b (from Sifra), etc.

The midrash, which ends in the edition with the halakic passage (to Num. v. 11 *et seq.*) והזהיר הקב"ה שכל מי שמקניה לאשתו וכו', is probably defective at the end as well as in some other passages (following the manuscript), and it can not be determined whether it covered Numbers only or Numbers and Deuteronomy. Several passages quoted by the old authors, but not found in the edition, may have been included in the missing portion of the work. Zunz, who closely examined the manuscript after which the edition was subsequently printed (*l.c.* pp. 251 *et seq.*), comes to the conclusion that We-Hizhir and Hashkem are one and the same work. This view must be unhesitatingly accepted (comp. also Geiger's "Jüd. Zeit." 1875, pp. 95 *et seq.*). The fact that some passages quoted by the old authors from the Midrash Hashkem do not correspond entirely with the edition, and that some are not found in it at all, does not prove that these are two different works (as Freimann, Buber, and Grünhut assume). The differences are not important, and both differences and omissions may be due to variations in the copies or to different revisions. The work, which is quoted as early as the middle of the eleventh century as a recognized authority, is assigned by Zunz to the tenth century. The assumption of the editor expressed even in the title, that Ḥefeẓ Alluf is the author of the work, lacks support. The quotations from Hashkem by the old authors have been collected by Grünhut ("Sefer ha-Liḳḳuṭim," part i.).

See MIDRASHIM, SMALLER, for the Midrash **Abkir** (which probably covered Genesis and Exodus, and of which extracts are preserved in the Yalḳuṭ), for **Tadshe** (based on Gen. i. 11), for **Wayissa'u** (on Gen. xxxv. 5), for **Wayosha'** (on Ex. xiv. 30–xv. 18), for the **Midrash of the Ten Commandments,** and for **Esfa** (on Num. xi. 16).

III. The Exegetical Midrashim to Canticles, Ruth, Ecclesiastes, and Esther: The midrashim to the Five Rolls, which, like the Rabbot to the Pentateuch, are entirely separate midrashic works, are, as mentioned above, printed together in the editio princeps, Pesaro, 1519, under the title "Midrash Ḥamesh Megillot"; in the Venice edition, 1545, the word "Rabbeta" was added to the title. The sequence of the midrashim with the names given to them in the paginal superscriptions of the Venice edition (as in the editio princeps) is as follows: (1) "Shir ha-Shirim Rabbah" (called "Rabbati" in the editio princeps, and, at the end, "Midrash Shir ha-Shirim"); (2) "Midrash Ruth" (at the end, "Midrash Megillat Ruth"); (3) "Midrash Megillat Esther" (at the end, "Midrash Aḥashwerosh"); (4) "Ekah Rabbati" (at the end, "Midrash Ekah Rabbati"); (5) "Midrash Ḳohelet" (at the end, "Nishlam Midrash Ḥamesh Megillot"). Hence the words "Rabbah" and "Rabbati" are added to two only of the midrashim, each of the three others being called merely "Midrash." The five works collected here were, perhaps, the most popular midrashim to the rolls used during divine service; other midrashim to the rolls have, in part, been published recently. The very old midrash Ekah Rabbati has been discussed above; the remaining four are treated below.

1. Shir ha-Shirim Rabbah, or **Midrash Shir ha-Shirim** (called also **Midrash** or **Aggadat Ḥazit,** after the proem-verse Prov. xxii. 24, quoted in the beginning): Shir ha-Shirim Rabbah is an exegetical midrash to Canticles, in which the author collected and edited, verse by verse, following the Biblical text, the wealth of material at his disposal. Canticles was made the subject of midrashic interpretation at a very early date; Akiba declared it to be "most holy," taking it as an allegorical glorification of the relation between God and Israel. Rules for its exposition occur in the midrashim to i. 1, 2, and ii. 4. "Canticles must not be interpreted to the shame [that is, erotically] but to the glory of Israel"; "Where the word 'king' stands, there God [or, according to another view, Israel as a whole] is meant." Some passages were explained as glorifications of the exodus from Egypt, the revelation of the Temple, etc. The numerous interpretations of single verses in the Seder 'Olam, Sifre, Mekilta, and the Talmud follow this old allegorical method of interpretation. Much of this interpretation is found in Shir ha-Shirim Rabbah, taken directly or indirectly from those old sources. But not all the comments are so old. The compiler of the Shir ha-Shirim Rabbah, who intended to compile a running midrash to Canticles, took—as has often been remarked in connection with the exegetic midrashim—the expositions for the single verses wherever, and in whatever connection, he found these verses explained.

There is a remarkable variation in the extent and character of the several expositions; there are clearly recognizable proems from older homilies; whole sermons, with many variations of texts, on several verses; and short, disconnected explanations of single words and sentences, the expositions to the same or similar verse-parts being repeated here two or three times, as in other old midrashim. Shir ha-Shirim Rabbah is dependent on the Pesiḳta and Wayiḳra Rabbah as well as on Yerushalmi and Bereshit Rabbah. The proems borrowed from these works may be recognized by the final formulas, which also were borrowed. More than one-fourth of Shir ha-Shirim is directly borrowed from Yerushalmi and the three old midrashim mentioned. Mishnah passages and baraitot are quoted very frequently. The five proems in the beginning of the midrash each close with the same sentence, taken from Seder 'Olam. The author has, of course, used also other sources that are no longer extant. The longer passages, as those to Cant. iii. 9–10, iv. 1–4, and others, are, perhaps, taken from these sources, or they may be the work of the author himself; they contain interpretations of several verses, and most of them consist of several variations of the same theme (presented, however, in a way different from that found in the variations of the earlier midrashim), in which entire sentences are frequently repeated verbatim, and in some of which many passages from the Mishnah, etc., are quoted.

In the editions these passages are, almost invariably, wrongly divided, making a survey of them difficult. They belong, doubtless, to a later period of the midrash—*i.e.*, the time after the edition of Bereshit Rabbah, Wayiḳra Rabbah, and the Pesiḳta. The words "Sidra Tinyana" are inserted between the comments to Cant. ii. 7 and ii. 8; in the sedarim cycle there are no sedarim for Canticles. Two other midrashim to Canticles, lost for centuries, are now known—the Aggadat Shir ha-Shirim, published by Solomon Schechter (Cambridge, 1896; also by Buber in "Midrash Zuṭa," pp. 1–41), and the Midrash Shir ha-Shirim, published by Grünhut (1897). For these midrashim and their relation to the Shir ha-Shirim Rabbah discussed here see SONG OF SONGS, MIDRASHIM TO.

2. Midrash Ruth: Midrash Ruth (so called in the editio princeps and the Venice edition) contains comments, haggadic sentences, etc., following the sequence of the text, and is divided into eight parashiyyot, beginning at Ruth i. 1, i. 2, i. 18, i. 22, ii. 10, iii. 8, iii. 14, iv. 18. The midrash begins with a passage called a "petiḥta," consisting of six proems, and a lengthy exposition of an old haggadic rule (probably taken from Bereshit Rabbah or Wayiḳra Rabbah and found in other midrashim), "which has been brought back from the Exile" and which declares that a time of sorrow is referred to wherever a Biblical story begins with the words "It happened in the days of." There are also proems to parashiyyot iii., iv., vi., and viii. Parashah ii. begins with a composite exposition to I Chron. iv. 21–23; parashah v. with an exposition to I Chron. xi. 13–15 taken from Yerushalmi. Midrash Ruth has borrowed from Yerushalmi, Bereshit Rabbah, Pesiḳta, Wayiḳra Rabbah, etc., and, perhaps, from Babli also; it has several passages in common with the Midrash Ḳohelet, as, *e.g.*, to Ruth iii. 13, the story of R. Meïr and his teacher Elisha ben Abuyah, which, probably, was not taken directly from its source, Yer. Ḥag. ii. 77b, c.

Among the other longer passages may be mentioned the sixfold interpretation ("shet shiṭṭin") of R. Johanan, referring to David, Solomon, Hezekiah, Manasseh, the Messiah, and to Boaz himself Boaz's words to Ruth in ii. 14. The passage "Famine came ten times into the world," found in Bereshit Rabbah xxv. (40), 64 to Gen. v. 29 (xii. 10), xxvi. 1, is quoted in connection with Ruth i. 1 ("there was a famine"), and is here further worked out with reference to Elimelech. An inexact reference to Bereshit Rabbah occurs in the editions, in a defective passage toward the end of the work. In this passage, to Ruth iv. 18, there must have been the interpretation of the writing of the word תולדות which is quoted by Abravanel in "Yeshu'ot Meshiḥo" (ed. Königsberg, p. 55b) from the Midrash Ruth, and which is found also in Leḳaḥ Ṭob to Ruth *ib.* In regard to this interpretation a copyist has referred the reader to Bereshit Rabbah xii. (6); and in connection with the words פּרץ פרץ there must have been added to the interpretation of אלה and ואלה (found also in Bereshit Rabbah, ch. xii. [3]) that concerning the doubling of names; the latter is similarly added in Bereshit Rabbah, ch. xl. (3) and is found alone *ib.* ch. xxxviii. (12), ending in both passages with the words "bisseru she-Yishma'el 'oseh teshubah," which the copyist quotes as the conclusion of his abbreviated reference.

The midrash to Ruth published by Buber in the "Midrash Zuṭa" (pp. 45–56) is entirely different in arrangement and execution; it begins with a short proem by R. Tanḥuma and contains a brief exposition according to the sequence of the text. See RUTH RABBAH.

3. Midrash Ḳohelet (so called in the editio princeps and the Venice edition): The Midrash Ḳohelet, or Ecclesiastes, was divided, probably, according to the sedarim of the Biblical book; it contained, aside from extensive borrowings from Yerushalmi, proems from Bereshit Rabbah, Ekah Rabbati, Wayiḳra Rabbah, Pesiḳta, and Shir ha-Shirim Rabbah, which make up a large portion of the work. But the author of the Midrash Ḳohelet takes many passages from Babli as well, quotes from the "Sayings of the Fathers" with the reference "Abot," and refers to smaller treatises by name, betraying thereby conclusively the relatively late date of composition of this midrash. Zunz designates this midrash as "a work of the later epoch." But it is difficult to agree with him, especially as regards Yelammedenu, when he adds: "Many passages from the above-mentioned haggadot to Canticles, Ruth, and Ecclesiastes have been incorporated in Yelammedenu, Debarim Rabbah, Pesiḳta Rabbati, and Shemot Rabbah; they occupy a middle position between the last-named and the earlier haggadah." See ḲOHELET RABBAH (in which comp. statement in regard to the other midrash to Ecclesiastes printed in Buber's "Midrash Zuṭa," pp. 83–144).

4. Midrash Megillat Esther (so called in the editio princeps and in the Venice edition): This midrash consists of six parashiyyot introduced by one or more proems, beginning with Esth. i. 1, i. 4, i. 9, i. 13, ii. 1, and ii. 5. After this there is hardly any trace of a further division. As the division is not carried out systematically, so the exposition appears to be incomplete. The midrash borrows from Yerushalmi, Bereshit Rabbah, Wayiḳra Rabbah, and from other sources, and has some points of similarity with the expositions to Esther in Babli. Especially noteworthy is the story of Mordecai's dream and prayer, and of Esther's prayer and her appearance before the king, recognized at an early date as an interpolation from "Yosippon." Bacher's assumption that the passage is not a later addition, but was taken by the author of the Midrash Esther from a Hebrew apocryphon to the Book of Esther, can not be accepted in view of the literal agreement of that passage with "Yosippon." In Jew. Encyc. v. 241, *s.v.* Esther Rabbah, aside from the Midrash Abba Gorion, another haggadic exposition to Esther is referred to, which was printed in Buber's "Sammlung Agadischer Commentare," etc., pp. 55–82. Entirely independent of this work is a South-Arabic midrash compilation to Esther, also printed by Buber ("Agadische Abhandlungen," etc., Cracow, 1897); this work borrows especially from Babli, the Pirḳe Rabbi Eli'ezer, and from Alfasi and Maimonides. The midrash to the roll of Esther printed at Constantinople in 1519 and edited by C. M. Horowitz in his "Sammlung Kleiner Midraschim" (1881) is also a later composition. Gaster published still another midrash, which he considers the oldest midrash to Esther, in the Kohut Memorial Volume (1897, pp. 167–177). See Esther Rabbah. The following are some passages from this midrash, which has been included in the Rabbot collection; they are taken from the exposition to Esth. ii. 5 and 7:

In Shushan there was a certain Jew [*Yehudi*]. The expression איש teaches that Mordecai was as important in his time as Moses had been in his time, of whom it is said, "Now the man [והאיש] Moses was very meek" [Num. xii. 3]. As Moses stood in the breach, of whom it is written, "Therefore he said that he would destroy them, had not Moses his chosen stood before him in the breach" [Ps. cvi. 23], so also Mordecai, of whom it is written, "[He] accepted of the multitude of his brethren, seeking the wealth of his people" [Esth. x. 3]. As Moses taught Israel the Torah, as it is written, "Behold, I have taught you statutes and judgments" [Deut. iv. 5], so Mordecai also, as it is written, "words of peace and truth" [Esth. ix. 30], and "truth" means the "Torah," as it is written, "Buy the truth, and sell it not" [Prov. xxiii. 23].

Whose name was Mordecai. In speaking of the wicked the name is placed first: "Nabal is his name" [I Sam. xxv. 25]; "Sheba, the son of Bichri by name" [II Sam. xx. 21]; but in the case of the pious the word "name" stands first: "and his name was Manoah" [Judges xiii. 2]; "and his name was Kish" [I Sam. ix. 1]; "and his name was Saul" [*ib.* ix. 2]; "and his name was Elkanah" [*ib.* i. 1]; "and his name was Boaz" [Ruth ii. 1]; "and his name was Mordecai"; because they resemble their Maker, as it is written, "But by my name Jehovah was I not known to them" [Ex. vi. 3].

Yehudi. Why, since he was a Benjamite, was he called a "Yehudi" [comp. Esth. ii. 5]? Because he confessed the name of the One God before the whole world, as it is written, "But Mordecai bowed not, nor did him reverence" [Esth. iii. 2]. Was he quarrelsome and one who transgresses the commands of the king? No; but when Ahasuerus had commanded that every one should bow down to Haman, the latter graved an image of an idol in his heart, in order that the people might thus bow down to the idol; and when Haman saw that Mordecai did not bow before him, he was very wroth. But Mordecai said, "There is a Lord who is above all; how shall I leave Him and bow down to an idol?" And because he confessed the name of the One God, he was called "Yehudi" [*i.e.*, יהודי means יחידי = "confessor of the unity of God"]. Others say he was as great as Abraham in his time. As our father Abraham allowed himself to be cast into the fiery furnace [comp. the story in Bereshit Rabbah, xxxviii., end], thus leading men to recognize the Holy One, praised be He, as it is written, "and the souls that they had gotten in Haran" [Gen. xii. 5; according to the midrash the proselytes who were led by Abraham to recognize God are meant; comp. Sifre, Deut. 32; Gen. R. xxxix.], so men recognized the greatness of the Holy One, praised be He, in the days of Mordecai, as it is written, "And many of the people of the land became Jews" [Esth. viii. 17]. He confessed the name of the One God and sanctified Him, therefore he was called "Jehudi."

And he brought up Hadassah. As the myrtle [הדסה] is sweet of smell and bitter of taste, so Esther was sweet for Mordecai and bitter for Haman. For she had neither father nor mother. R. Phinehas and R. Ḥama b. Gorion, in the name of Rab: "Was she a 'shetuḳit' [child whose origin must be concealed]? No; but when her mother became pregnant with her, her father died, and when she was born her mother died." R. Berechiah, in the name of R. Levi: "The Holy One, praised be He, said to Israel, 'You weep and say, Orphans are we, without father [comp. Lam. v. 3]. By your life, the redeemer, whom I will send to you out of Media, shall be without father and mother, as it is written, "For she had neither father nor mother."'"

IV. The Remaining Exegetical Midrashim not Dealing with the Pentateuch: For the midrashim to Samuel, the Psalms, and Proverbs see Samuel, Psalms, and Proverbs, Midrash to.

1. Midrash Yeshayah: This midrash is mentioned by Abravanel, Abraham Portaleone, and the author of the midrash commentary "Mattenot Kehunnah" (to Wayiḳra Rabbah, section 29, and Bemidbar Rabbah, section 16). But no extract from this midrash is found either in Yalḳuṭ Shim'oni or in Yalḳuṭ Makiri.

2. Midrash Yonah: The midrash to the Book of Jonah, read on the Day of Atonement as hafṭarah during the Minḥah prayer, contains a haggadic version of this prophetical book. In the editions the work consists of two parts; the second part, in which the story of Jonah is allegorically referred to the soul, beginning with the words "Wa-yomer Adonai la-dag," is reprinted in Jellinek, "Bet ha-Midrash" (i. 102 *et seq.*). This part is merely a literal translation from the Zohar (comp. *ib.* p. xx.); it is not found in the version printed by C. M. Horowitz (after a Codex De Rossi) in the "Sammlung Kleiner Midraschim" (Berlin, 1881). The first part, the midrash proper, is found also in the Yalḳuṭ to Jonah (part ii., §§ 550–551), with the exception of a few missing passages and with several variations; but here the Pirḳe Rabbi Eli'ezer is given as the source (for some passages, Yerushalmi and Babli).

Jellinek assumes that the first part of the Midrash Jonah was compiled subsequently to Yalḳuṭ. But as many passages which the Yalḳuṭ has in common with the Midrash Jonah—*e.g.*, the penitential prayer given in Jellinek, "Bet ha-Midrash" (i. 99) and the description of Nineveh's grandeur there—are not found in Pirḳe Rabbi Eli'ezer; and as, furthermore, the author of the Yalḳuṭ probably did not find all this material in the Pirḳe Rabbi Eli'ezer, he must have taken his quotations from a midrash which was substantially identical with the Midrash Jonah (*i.e.*, with the first part). The author of this midrash borrowed nearly the whole of ch. x. from the Pirḳe Rabbi Eli'ezer, and borrowed also from Yerushalmi and Babli. The version of the Codex De Rossi begins with the passage which in the Midrash Jonah is found in connection with iii. 3 *et seq.*; the extracts borrowed by the latter from Babli and Yerushalmi and inserted in the course of its commentary to this passage and later are missing in the Codex De Rossi. Then follows the end of part i. of the midrash, into which ch. x. of the Pirḳe Rabbi Eli'ezer has been interpolated. It concludes with the exposition of some verses—Deut. iv. 31, Micah vii. 8, and others. It may be noted, finally, that in a compilation included in the earlier editions of Tanḥuma to the pericope "Wayiḳra" (ed. Stettin, *ib.* § 8), which dates from a later time, ch. x. of the Pirḳe Rabbi Eli'ezer was also included.

3. Midrash Iyyob: It can be doubted no longer that the old authors possessed a midrash to the Book of Job. Extracts with express reference to the source Midrash Iyyob are found to Job i. 14 (in the Yalḳuṭ Makiri to Isa. lxi. 11), to Job i. 6 (in a MS. commentary of Rashi to Job), to Job i. 1 and iv. 12 (in a MS. Maḥzor commentary; both these commentaries are in the possession of Abraham Epstein, in Vienna; comp. "Ha-Ḥoḳer," i. 325), to Job vii. 9 (in the "Recanati" to Gen. iii. 23), to Job ii. 1 ([?]; in the "Recanati"—according to the statement in "Rab Pe'alim," p. 34), to Job iv. 10 (in Yalḳ. Shim'oni, ii. 897). The extracts found in the Yalḳuṭ Makiri to Ps. li. 7 and Ps. cxlvi. 4 with the source-reference "Midrash" and referring to Job iii. 2 and xxxviii. 1, are, perhaps, likewise taken from the Midrash Iyyob, as are many passages in the Job commentaries of Samuel b. Nissim Masnuth ("Ma'yan Gannim," Berlin, 1889) and Isaac b. Solomon (Constantinople, 1545). The extracts and quotations from Midrash Iyyob have been collected by Wertheimer ("Leḳeṭ Midrashim," Jerusalem, 1903; comp. also Zunz, "G. V." p. 270; Brüll's "Jahrb." v.-vi. 99).

According to Zunz, there are also evidences of the existence of midrashim to Ezra and Chronicles (*ib.* p. 271). For the **Midrash al Yithallel,** to Jer. ix. 22 and to the Hallel Midrash, see MIDRASHIM, SMALLER.

V. Special Haggadic Works: 1. Pirḳe (de) Rabbi Eli'ezer: This work, consisting of fifty-four chapters, is quoted by the ancient authors either under this name or—especially by the author of the "'Aruk"—as **Baraita de Rabbi Eli'ezer.** It is not an exegetical or homiletical midrash like the midrashim discussed so far, although it contains occasional expositions, as to Jonah i. and ii. (in ch. x.) and to passages in Esther (in ch. xlix. and l.); but it describes in lucid Hebrew, often having recourse to Biblical phraseology and poetic diction different from that of most of the other midrashim, the most important events of the Pentateuch—the works of God as revealed in the Creation and in the ancient history of Israel. The plan of the work, as Weiss has happily stated ("Dor," iii. 290), is outlined in the words which the author puts into the mouth of R. Eliezer b. Hyrcanus—whose fortunes and the recognition he received from R. Johanan b. Zakkai are related in the introductory chapters, i. and ii. —at the beginning of the discourse: "'Who can utter the mighty acts of the Lord? who can shew forth all his praise?' [Ps. cvi. 2]. Is there one in the world able to utter God's mighty acts and to proclaim His praise? Even the angels are not able to do so. We may speak only of one part of His deeds, namely, what He has done and will do, in order that the name of the Lord may be glorified by His creatures," etc.

In ch. iii.-xi. the creative acts of the several days are treated haggadically. Ch. iii. begins with the things created before the world—the Torah, hell, paradise, etc.; ch. iv. deals with the "ḥayyot" and the angels; in ch. vi.-viii. the author connects with the creative acts of the fourth day details in regard to the planets, the signs of the zodiac, calendric science, and intercalation; ch. ix., on the creative acts of the fifth day, connects with the above-mentioned chapter on Jonah, who fled before God on the fifth day.

The haggadah on the creation of man in ch. xi. connects with ch. xii.-xxi., dealing with Adam and his descendants (note particularly ch. xiii., on the envy of the angels at the creation of man; *ib.* and part of ch. xiv., on Samael; ch. xiv., on the angels who warn man from the path of evil; ch. xvi., on the deeds of love which God showed to Adam; ch. xvii., on comforting the mourning; ch. xviii., on Sabbath rest; ch. xx., on Adam at the end of the first Sabbath and on Habdalah). Ch. xxiii. and xxiv. deal with Noah, his sons and descendants; ch. xxv.-xxxi., with Abraham; ch. xxxii.-xxxv., with Isaac; ch. xxxvi.-xxxvii., with Jacob; ch. xxxviii.-xxxix., with Joseph (ch. xxix., on circumcision, and ch. xxxiii., on benevolence and resurrection); ch. xl.-xlvii., with Moses, the revelation of the Law, the Exodus, Amalek, and the golden calf (comp. ch. xliii., on penitence, and ch. xlvi., on the Day of Atonement). Connected with these chapters, probably, are ch. xlviii., on the release from Egypt and on Moses; ch. xlix. and l., on Amalek's descendants, Haman, and Titus (together with comments to the Book of Esther); and ch. li., on future redemption. Ch. lii. deals with seven divine miracles; ch. liii. and liv. deal with the sin of the evil tongue—slander and calumny. Aaron's and Miriam's calumny against Moses (Num. xii. 1 *et seq.*) is also mentioned here: the last chapter of the work closes with the account of Miriam's punishment.

It is hardly probable that this is the original ending of this haggadic work, which evidently was planned on a very large scale, "since a writer who goes so extensively into all the details of the Pentateuch will hardly have laid down his pen with the story of the leprosy of Moses' sister" (comp. Zunz, "G. V." pp. 271 *et seq.*). The incompleteness of the work, or the failure to carry out the original plan, is evident from other facts also. Ch. xxvii., xxxiv., xxxv., xl., and xliii. end with the final sentences of the first five of the Eighteen Benedictions respectively; the endings of ch. xlvi., li., liv. correspond with the three following benedictions of that prayer. This seems to point to the existence of a connective thread, which is broken at the end of the work. In ch. xiv. the haggadah of God's ten appearances on earth is recounted (comp. Mekilta to Ex. xix. 11; Sifre, Num. 83; Gen. R. xxxviii. and xlix.; Ab. R. N., ed. Schechter, pp. 96, 102), and the same subject is treated in detail in ch. xxiv., xxv., xxxix., xl., xli., xlvi., liv.; while the eighth appearance is discussed only in the last chapter. But it can not be demonstrated from the quotations which are found in the works of old writers, especially R. Nathan, that the midrash ever extended any further; it probably remained incomplete (comp. Zunz, *l.c.* p. 273).

No further proofs are required now to show that R. Eliezer b. Hyrcanus was not the author of the work. Aside from many indications recalling the productions of the geonic period, the interesting passage in ch. xxx., omitted in some editions, explicitly referring to the building of the mosque on the site of the Temple, and the allusions to the deeds of the califs, clearly indicate that the author lived under Arabic rule. According to Zunz, the work can not have been composed before the eighth century. It was used by Ḳalir, is mentioned by R. Nissim (c. 1030), and is often quoted since Rashi and the "'Aruk." The author was doubtless a Palestinian. There are various other versions of the story of R. Eliezer b. Hyrcanus narrated in ch. i. and ii., namely, in Gen. R. xlii.; Ab. R. N., recension A, ch. vi.; recension B, ch. xiii.; Tan., Lek Leka, 30 (ed. Buber); and elsewhere (comp. the list in Horowitz, "Bibl. Haggadica," i., No. 1, pp. 1 *et seq.*; Pirḳe Rabbi Eli'ezer, ch. xxix.-xli., is printed after a Codex De Rossi, *ib.* No. ii., pp. 21-25). An extract or a revision of the Pirḳe Rabbi Eli'ezer, ch. iii.-vi., has been published by Horowitz, after a codex in the British Museum, in the collection "Sammlung Kleiner Midraschim" (pp. iv.-x., Berlin, 1881). On the important chapters vi.-viii. (on calendric science) compare Zunz, "G. S." iii. 242, and Epstein, "Beiträge zur Jüdischen Alterthumskunde," pp. 21 *et seq.*

2. **Seder Eliyahu,** or **Tanna debe Eliyahu:** This work derived its name, its division into **Seder Eliyahu Rabbah** and **Seder Eliyahu Zuṭa,** and perhaps more or less of its contents, from an old work mentioned in the Talmud (Ket. 106a), where it is said that it was revealed to Rab Anan, a pupil of Rab in the third century, by the prophet Elijah, and that it included Seder Eliyahu Rabbah and Seder Eliyahu Zuṭa. Seven of the nine halakic and haggadic passages mentioned in different treatises of the Talmud with the formula "Tanna debe Eliyahu" are found in the Seder Eliyahu. The work as now known was composed in the second half of the tenth century; this is evident from the dates (which must not be regarded as interpolations or as having been changed) in ch. ii., vi., and xxxi. of the Seder Eliyahu Rabbah (ed. Friedmann, pp. 7, 37, and 163 respectively). The purpose of the book is clearly expressed in the haggadic interpretation to Gen. iii. 24 at the beginning of the work ("Let man guard the way [of life] and the tree of life [the Torah]"—that is, let him glorify the Torah and study the Law) as well as in the exhortation to practise all virtues and pious works, which the author understands the term "derek ereẓ" to denote. To this are added some expositions and interpretations—in part very extended—of the statutes, which, in a measure, transform the Seder Eliyahu into an exegetical midrash.

Liberal Character of the Work.

Among the stories included those are most characteristic of the work in which the author speaks through the mouth of the prophet Elijah; furthermore, many parables, maxims, prayers, and exhortations enliven the discourse. The unprejudiced ethics of the work and the attitude of the Israelites toward the non-Israelites appear in the sentence, "I call heaven and earth to witness that, whether Israelite or non-Israelite, whether man or woman, whether male or female slave, the Holy Spirit rests upon man according to his deeds" (p. 48), and in many other fine passages, as pp. 36, 65, 81, 88, 140 (comp. Theodor in "Monatsschrift," 1900, pp. 554, 558). The work is written in pure Hebrew, the diction of many passages is notably beautiful, and the style is fluent though frequently verbose; it is not always easy to follow the train of thought and to find the real connection between the several passages. The division into chapters is frequently merely an external one, and the several chapters vary greatly in length. R. Nathan says in the "'Aruk" (*s.v.* סדר [3]) that the Seder Eliyahu Rabbah has three "gates" and thirty chapters, and the Seder Eliyahu Zuṭa twelve chapters; but there is no quotation from the work in the "'Aruk." In the Venice edition of 1598, which was printed from a codex of the year 1186, the first part contains thirty-one chapters and the second part twenty-five chapters; Zunz, however, has shown ("G. V." p. 117) that ch. xv.-xxv. of the Seder Eliyahu Zuṭa are a later compilation. In the Friedmann edition (Vienna, 1902), after a Vatican manuscript of the year 1073, part i. has been carefully divided into twenty-nine chapters, while part ii. closes with ch. xv. of the Venice edition. The last chapter may be recognized as spurious. In a Codex De Rossi published by Horowitz (*l.c.* i., No. ii., pp. 3-19), Eliyahu Zuṭa has only twelve chapters.

The two editions of the entire work, the numerous extracts from it in Yalḳuṭ Shim'oni, and the Seder Eliyahu Zuṭa according to the Codex De Rossi vary in many points, appearing in parts to be different versions. The work fared badly in the edition published by R. Samuel b. Moses Heida, with a prolix cabalistic commentary (Prague, 1677). This edition goes beyond all attempted reconstructions of modern midrash criticism; the text has been worked over, interpolated, and interspersed with entirely extraneous elements, and is designated as a "new revision" ("nusḥa ḥadasha"), destined to supplant the text of the Venice edition, the chapters of which, printed in smaller type, head the chapters of this edition. See TANNA DEBE ELIYAHU.

For a number of special haggadic works, which vary greatly in content and which constitute, in part, a distinct class of literature, such as **Seder Rabbah di-Bereshit, Midrash Konen** (Chronicles of Moses, the midrash relating to the death of Moses, and that to the death of Aaron), **Midrash Eleh Ezkerah,** etc., **Midrash Ma'ase Torah, Pirḳe Rabbenu ha-Ḳadosh, Midrash Ḥaserot we-Yeterot** (on the reasons for defective and full writing), **Midrash Temurah,** etc., as well as for the collections of similar works, see MIDRASHIM, SMALLER.

VI. Yalḳuṭ Shim'oni, Yalḳuṭ ha-Makiri, and Midrash ha-Gadol: A brief reference to these three works, more fully discussed under their respective titles, may here be given. As in the case of the entire midrash literature, the author of the Yalḳuṭ Shim'oni—a broadly planned midrashic thesaurus to the twenty-four books of the Bible, combining all the products of the Midrash, Halakah, and Haggadah, and which could easily furnish material for midrashic compendiums to the several books of the Bible—is unknown, or, rather, the identity of the Simeon after whom the midrash is called has not yet been definitely determined. The words "Sefer Yalḳuṭ ha-Nikra Shim'oni" occur on the title-page of the first part of the work in the editio princeps (Salonica, 1526–27; part ii., *ib.* 1521). At the end of the first part, in the editio princeps only, is a valuable appendix, introduced by the remark that R. Simeon ha-Darshan edited it after having composed the work.

According to the statement on the title-page of the Venice edition, 1566, "Rabbenu Shimeon, the head of the 'Darshanim' of Frankfort," composed the Yalḳuṭ. In this edition the corrector has taken the liberty of changing the readings of the Yalḳuṭ according to the text of printed midrash editions (comp. Theodor in "Monatsschrift," 1895, pp. 390, 484 *et seq.*; comp. also the paragraph numbers in part ii. of the editio princeps and the sequence of the prophetic and hagiographic books according to the Yalḳuṭ). The writer of the preface in the edition of Frankfort-on-the-Oder, 1709, designates the author more explicitly as "R. Shimeon of Frankfort-on-the-Main." But it is not certain either that his name was "R. Shimeon" or that the author was a native of Frankfort-on-the-Main. Zunz's view that the date of composition of the Yalḳuṭ Shim'oni remains to be determined is to be accepted ("G. V." p. 299; Epstein, in "Ha-Ḥoḳer," i. 85 *et seq.*, 133 *et seq.*; Brüll's "Jahrb." v.–vi. 221 *et seq.*). The extracts in the Yalḳuṭ are often contracted and changed to afford a more suitable connection with the respective verses of the Biblical text; the names of the authors also are abbreviated, especially in the first part. It is furthermore evident that different manuscripts of the same midrash, etc., were used in the different parts of the work. But it must be emphasized, in answer to many accusations of both earlier and more recent times, that the Yalḳuṭ does not arbitrarily alter readings, but reproduces the text according to the manuscripts which the author or his collaborators had at hand. The readings of the Yalḳuṭ are of great critical value, especially when compared with the readings of other manuscripts, or when the latter are supported by the authority of the Yalḳuṭ (comp. Theodor in "Monatsschrift," 1900, p. 383).

In the editio princeps of the Yalḳuṭ the sources are always given in the text, not in the margin. The reference to the sources was doubtless made by the compiler himself, who freely drew upon nearly the entire Talmudic-midrashic literature, the above-mentioned tannaitic midrashim (including Seder 'Olam, Baraita on the Tabernacle, etc.), the two Talmuds, the exegetic and homiletic midrashim, and, with few exceptions, the remaining haggadic works; an exact list of the sources is given in Zunz, "G. V." p. 289. It must be noted here that the following Rabbot are not used: Shemot Rabbah, Bemidbar Rabbah, the midrashim to Ecclesiastes and Esther. The midrash to Ecclesiastes published by Buber in Midrash Ẓuṭa, Abba Gorion, and other haggadot to Esther, have been used.

Machir b. Abba Mari's Yalḳuṭ ha-Makiri is doubtless a later work than the Yalḳuṭ Shim'oni; the following portions of it have recently been published: to Isaiah (ed. Spira, Berlin, 1894, not complete); to the Psalms (ed. Buber, Berdychev, 1899); to Proverbs (ed. Grünhut, 1902, defective at the beginning and supplemented in "Sefer ha-Liḳḳuṭim," part vi.); a codex in the British Museum, defective at the beginning and the end, contains the Yalḳuṭ ha-Makiri to the Twelve Minor Prophets. In the prefaces of the Yalḳuṭ ha-Makiri to Isaiah and the Psalms, similar in wording, the author adds to his name the names of his ancestors for several generations back; but otherwise nothing is known either about the time in which he lived or about his home and the circumstances of his life. The Codex Leyden, however (after which the Yalḳuṭ ha-Makiri to Isaiah was printed), contains a note referring to its sale, and dated 1415. From the above-mentioned prefaces it is known that Machir b. Abba Mari's work included the books of Jeremiah, Ezekiel, and Job also; hence it did not cover the entire Bible, as did the Yalḳuṭ Shim'oni; nor were so many sources used as for that work, the compiler having taken hardly anything from the smaller midrashim.

The sources are invariably noted in the text at the beginning of the extracts, which are given entire, and without abbreviation of names, being therefore more exact than the extracts given in the other Yalḳuṭ. The versions of the midrash works used in Yalḳuṭ ha-Makiri are, in part, different from those used in the Yalḳuṭ Shim'oni; the titles of the works likewise are differently given in the two collections; *e.g.*, "Torat Kohanim" and "Midrash Tehillim" in the Yalḳuṭ Shim'oni, and "Sifra" and "Shoḥer Ṭob" in Yalḳuṭ ha-Makiri. The author of the latter cites also from Shemot Rabbah, Bemidbar Rabbah, Ḳohelet Rabbah, and Esther Rabbah, designating the last-named as "Midrash Ahasuerus"; he does not seem to have known the Pesiḳta Rabbati. As different manuscripts were used for the two collections, they vary, as regards many of the readings, both from each other and from other midrash texts, these variations constituting the greatest value these collections possess.

While both of the two Yalḳuṭ works entirely ignore the Targumim, the works on mysticism, and the works of rabbinical literature, the Midrash ha-Gadol extracts from the "'Aruk," from Rashi, Ibn Esra, and Maimonides, and from the works of other rabbis, as appears from the part to Genesis published by Schechter (Cambridge, 1902; comp. Preface, p. xiii.). The anonymous author, who freely quotes Talmudic sentences and discussions, as well as expositions, from the halakic and haggadic midrashim, changing, transposing, and commingling them as required, nowhere gives his source, unlike the authors of the two Yalḳuṭs. The above-mentioned publications by Levy and Hoffmann on the tannaitic midrashim that had entirely disappeared, as well as the notes of the editor to many passages of the edited part, give an idea of the treasures contained in the Midrash ha-Gadol.

Bibliography: See the special articles on the various works here treated.

S. J. T.

MIDRASH HALAKAH ("investigation of the Halakah"): Strictly speaking, the verification of the traditionally received Halakah by identifying its sources in the Bible and by interpreting these Scriptural passages as proofs of its authenticity. The term is applied also to the derivation of new halakot and legal enactments from the Bible, either by means of a correct interpretation of the obvious meaning of the Scriptural words themselves or by

The Term.

the application of certain hermeneutic rules (see Talmud). The phrase "Midrash Halakah" was first employed by Nachman Krochmal (in his "Moreh Nebuke ha-Zeman," p. 163), the Talmudic expression being "Midrash Torah" = "investigation of the Torah" (Ḳid. 49b). Since all halakic interpretations were regarded as corresponding to the real meaning of the Scriptural texts concerned in each case, it was held that a correct elucidation of the Torah carried with it the proof of the Halakah and the reason for its existence. In the Midrash Halakah three divisions may be distinguished: (1) the midrash of the older Halakah, that is, the midrash of the Soferim and the Tannaim of the first two generations; (2) the midrash of the younger Halakah, or the midrash of the Tannaim of the three following generations; (3) the midrash of several younger tannaim and of a large number of amoraim who did not interpret a Biblical passage as an actual proof of the Halakah, but merely as a suggestion or a support for it ("zeker le-dabar"; "asmakta").

Examples of Style of the Older Halakah.

The Midrash of the Older Halakah: The early Halakah sought only to define the compass and scope of individual laws, asking under what circumstances of practical life a given rule was to be applied and what would be its consequences. The earlier Midrash, therefore, aims at an exact definition of the laws contained in the Scriptures by an accurate interpretation of the text and a correct determination of the meaning of the various words. The form of exegesis adopted is frequently one of simple lexicography, and is remarkably brief. A few examples will serve to illustrate the style of the older Midrash Halakah. It translates the word "ra'ah" (Ex. xxi. 8) "displease" (Mek., Mishpaṭim, 3 [ed. Weiss, p. 85a]), which is contrary to the interpretation of R. Eliezer (Ḳid. 19b). From the expression "be-miksat" (Ex. xii. 4), which, according to it, can mean only "number," the older Halakah deduces the rule that when killing the Passover lamb the slaughterer must be aware of the number of persons who are about to partake of it (Mek., Bo, 3 [ed. Weiss, p. 5a]). Similarly the prohibition against eating the Passover lamb uncooked is derived from the word "na" (Ex. xii. 9), which, it is declared, can signify only "raw" (Mek., Bo, 6 [ed. Weiss, p. 8b]). The statement that the determination of the calendar of feasts depends wholly on the decision of the nasi and his council is derived from Lev. xxiii. 37, the defectively written "otam" (them) being read as "attem" (ye) and the interpretation, "which ye shall proclaim," being regarded as conforming to the original meaning of the phrase (R. H. 25a). When two different forms of the same word in a given passage have been transmitted, one written in the text ("ketib"), and the other being the traditional reading ("ḳere"), the Halakah, not wishing to designate either as wrong, interprets the word in such a way that both forms may be regarded as correct. Thus it explains Lev. xxv. 30—where according to the ḳere the meaning is "in the walled city," but according to the ketib, "in the city which is not walled"—as referring to a city that once had walls, but no longer has them ('Ar. 32b). In a similar way it explains Lev. xi. 29 (Ḥul. 65a). According to Krochmal (*l.c.* pp. 151 *et seq.*), the ketib was due to the Soferim themselves, who desired that the interpretation given by the Halakah might be contained in the text; for example, in the case of "otam" and "attem" noted above, they intentionally omitted the ו.

Another example of the methods of the older Halakah is found in Num. ix. 10 *et seq.*, where it is ordained that if a man at the time of the Passover be unclean from contact with a corpse, or if he be "in a journey afar off" ("be-derek reḥoḳah"), he shall keep the feast on the same day of the following month. In this passage no mention is made of any other defilement. The Halakah, however, assumes that one who is unclean, even though he has not touched a corpse, may not partake of the feast. Justification for this interpretation is found in a dot which occurs over the final ה of the word "reḥoḳah," and which shows according to the older Midrash that the ה must be omitted in interpreting the word, and accordingly Sifre, Num. 69 (ed. Friedmann, p. 18a) makes the word refer to the man ("ish"), and not to the journey ("derek") ("ish raḥoḳ welo derek reḥoḳah," Yer. Pes. ix. 2), and interprets that in some way he is "afar off from the temple," *i.e.*, that on account of his uncleanness he is forbidden to enter it. This interpretation is found in the Jerusalem Targum also. According to Geiger ("Urschrift," p. 186), the dot was placed over the ה at a later time, as in the case of the ו mentioned above. As a matter of fact, all these interpretations and explanations are elucidations of the Biblical text and do not depart from the obvious meaning of the words as they were understood by the exegesis of the time. Hence the old versions are frequently found to agree with the older midrashic Halakah. Thus, for example, the midrashic explanation of Ex. xxii. 6 (Mek., Mishpaṭim, 15 [ed. Weiss, p. 97b]) agrees with that of the Septuagint, as does the explanation of "mi-moḥarat ha-shabbat" (Lev. xxiii. 15) as meaning "from the morrow after the feast" (Men. 65b).

The Midrash of the Younger Halakah: The younger Halakah did not confine itself to the mere literal meaning of single passages, but sought to draw conclusions from the wording of the texts in question by logical deductions, by combinations with other passages, etc. Hence its midrash differs from the simple exegesis of the older Halakah. It treats the Bible according to certain general principles, which in the course of time became more and more amplified and developed (see Talmud); and its interpretations depart further and further from the simple meaning of the words. A few examples will illustrate this difference in the method of interpretation between the older and the younger Halakah. It was a generally accepted opinion that the first Passover celebrated in Egypt, that of the Exodus, differed from those which followed it, in that at the first one the prohibition of leavened bread was for a single day only, whereas at subsequent Passovers this restriction extended to seven days. The older Halakah (in Mek., Bo, 16 [ed. Weiss, 24a]), represented by R.

Jose the Galilean, bases its interpretation on a different division of the sentences in Ex. xiii. than the one generally received; connecting the word "ha-yom" (= "this day"), which is the first word of verse 4, with verse 3 and so making the passage read: "There shall no leavened bread be eaten this day." The younger Halakah reads "ha-yom" with verse 4, and finds its support for the traditional halakah by means of the principle of "semukot" (collocation); that is to say, the two sentences, "There shall no leavened bread be eaten," and "This day came ye out," though they are separated grammatically, are immediately contiguous in the text, and exert an influence over each other (Pes. 28b, 96b). What the older Halakah regarded as the obvious meaning of the words of the text, the younger infers from the collocation of the sentences.

Contrast with Earlier Halakah.

The wide divergence between the simple exegesis of the older Halakah and the artificiality of the younger is illustrated also by the difference in the method of explaining the Law, cited above, in regard to uncleanness. Both halakot regard it as self-evident that if a man be unclean, whether it be from contact with a corpse or from any other cause, he may not share in the Passover (Pes. 93a). The younger Halakah, despite the dot over the ה, reads "reḥoḳah" and makes it refer to "derek," even determining how far away one must be to be excluded from participation in the feast. In order, however, to find a ground for the halakah that those who are unclean through contact with other objects than a corpse may have no share in the Passover, it explains the repetition of the word "ish" in this passage (Lev. ix. 10) as intending to include all other cases of defilement.

Despite this difference in method, the midrashim of the older and of the younger Halakah alike believed that they had sought only the true meaning of the Scriptures. Their interpretations and deductions appeared to them to be really contained in the text; and they wished them to be considered correct Biblical expositions. Hence they both have the form of Scriptural exegesis, in that each mentions the Biblical passage and the halakah which is given in explanation of it, or, more correctly speaking, which is derived from it.

Abstract and Midrash Halakah.

It is to a law stated in this form—*i.e.*, together with the Biblical passage from which it is derived—that the name midrash is applied, whereas one which, though ultimately based on the Bible, is cited independently as an established statute is called a halakah. Collections of halakot of the second sort are the Mishnah and the Tosefta; compilations of the first sort are the halakic midrashim. This name they receive to distinguish them from the haggadic midrashim, since they contain halakot for the most part, although there are haggadic portions in them. In these collections the line between independent Halakah and Midrash Halakah is not sharply drawn. Many mishnayot in the Mishnah and in the Tosefta are midrashic halakot, *e.g.*, Ber. i. 3, 5; Bek. i. 4, 7; Ḥul. ii. 3, viii. 4; Tosef., Zeb. i. 8, xii. 20. On the other hand, the halakic midrashim contain independent halakot without statements of their Scriptural bases, *e.g.*, Sifra, Wayiḳra, Ḥobah, i. 9–13 (ed. Weiss, p. 16a, b). This confusion is explained by the fact that the redactors of the two forms of halakot borrowed passages from one another (Hoffmann, "Zur Einleitung in die Halach. Midraschim," p. 3).

The Two Schools.

Since the halakic Midrashim had for their secondary purpose the exegesis of the Bible, they were arranged according to the text of the Pentateuch. As Genesis contains very little matter of a legal character, there was probably no halakic midrash to this book. On the other hand, to each of the other four books of the Pentateuch there was a midrash from the school of R. Akiba and one from the school of R. Ishmael, and these midrashim are still in great part extant. The halakic midrash to Exodus from the school of R. Ishmael is the Mekilta, while that of the school of R. Akiba is the Mekilta of R. Simeon b. Yoḥai, most of which is contained in the Midrash ha-Gadol (comp. I. Lewy, "Ein Wort über die Mechilta des R. Simon," Breslau, 1889). A halakic midrash to Leviticus from the school of R. Akiba exists under the name "Sifra" or "Torat Kohanim." There was one to Leviticus from the school of R. Ishmael also, of which only fragments have been preserved (comp. Hoffmann, *l.c.* pp. 72–77). The halakic midrash to Numbers from the school of R. Ishmael is the "Sifre"; while of that of the school of R. Akiba, the Sifre Zuṭa, only extracts have survived in the Yalḳuṭ Shim'oni and in the Midrash ha-Gadol (comp. *ib.* pp. 56–66). The middle portion of the Sifre to Deuteronomy forms a halakic midrash on that book from the school of R. Akiba, while another from the school of R. Ishmael has been shown by Hoffmann to have existed (D. Hoffmann, "Liḳḳuṭe Mekilta, Collectaneen aus einer Mechilta zu Deuteronomium," in "Jubelschrift zum 70. Geburtstag des Dr. I. Hildesheimer," Hebrew part, pp. 1–32, Berlin, 1890; *idem*, "Ueber eine Mechilta zu Deuteronomium," *ib.* German part, pp. 83–98; *idem*, "Neue Collectaneen," etc., 1899).

This assignment of the several midrashim to the school of R. Ishmael and to that of R. Akiba respectively, however, is not to be too rigidly insisted upon; for the Sifre repeats in an abbreviated form some of the teachings of the Mekilta, just as the Mekilta included in the Midrash ha-Gadol has incorporated many doctrines from Akiba's midrash (comp. Hoffmann, *l.c.* p. 93). Midrashic halakot are found also scattered through the two Talmuds; for many halakic baraitot which occur in the Talmuds are really midrashic, recognizable by the fact that they mention the Scriptural bases for the respective halakot, often citing the text at the very beginning. In the Jerusalem Talmud the midrashic baraitot frequently begin with "Ketib" (= "It is written"), followed by the Scriptural passage. From the instances of midrashic baraitot occurring in the Talmud which are not found in the extant midrashim, the loss of many of the latter class of works must be inferred (Hoffmann, "Zur Einleitung," p. 3).

The Midrash of Several Younger Tannaim and of a Large Number of Amoraim: The Midrash which the Amoraim use when deducing tannaitic halakot from the Scriptures is frequently very artificial; and its interpretations are in great part so divergent from the obvious meaning of the words that they can not be considered as Scriptural exegesis in any sense. In like manner there are many explanations by the younger tannaim which can by no means be regarded as actual interpretations. These occur chiefly as expositions of such halakot as were not based on Scripture but which it was desired to connect with or support by a word in the Bible. The Gemara often says of the interpretations of a baraita: "The Biblical passage should be merely a support." Of this class are many of the explanations in the Sifra (comp. Tos. B. B. 66a, *s.v.* "miklal") and in the Sifre (comp. Tos. Bek. 54a, *s.v.* "ushne"). The tanna also often says frankly that he does not cite the Biblical word as proof ("re'aya"), but as a mere suggestion ("zeker"; lit. "reminder") of the halakah, or as an allusion ("remez") to it (Mek., Bo, 5 [ed. Weiss, p. 7b]; Sifre, Num. 112, 116 [ed. Friedmann, pp. 33a, 36a]).

MIDRASHIM, SMALLER: A number of midrashim exist which are smaller in size, and generally later in date, than those dealt with in the articles Midrash Haggadah and Midrash Halakah. The chief of these are:

1. Midrash Abkir: This midrash, the extant remains of which consist of more than fifty excerpts contained in the Yalḳuṭ and a number of citations in other works, dealt, according to all accessible evidence, only with the first two books of the Pentateuch. It derived its name from the formula אמן בימינו כן יהי רצון with which all these homilies closed, according to the testimony of R. Eleazar of Worms in a manuscript commentary on the prayer-book, and according to a codex of De Rossi. It is possible that these religious discourses were arranged in the order of the sedarim of Genesis and Exodus, the beginnings of the sedarim being Gen. i. 1, ii. 4, iii. 22, vi. 9, xii. 1, xvii. 1, xviii. 1, xxii. 1, xxvii. 1, xliv. 18; Ex. iii. 1, xvi. 4, and xxv. 1, to which belong the excerpts in Yalḳ., Gen. 4, 17, 34, 50, 63, 81, 82, 96, 120, 150, and in Yalḳ., Ex. 169, 258, and 361. If it may be assumed that in these homilies of the Midrash Abkir the expositions are not confined to the first verses, the fact that certain passages are not connected with the beginning of any seder need cause no surprise.

The language of this midrash is pure Hebrew, while its contents and discussions recall the works of the later haggadic period. As in the Pirḳe Rabbi Eli'ezer, angels are frequently mentioned (comp. the excerpts in Yalḳ. 132, 234, 241, and 243). Shemaḥsai and Azael, according to the account in the Midrash Abkir, descended to earth to hallow the name of God in a degenerate world, but could not withstand the daughters of man. Shemaḥsai was entrapped by the beauty of Istahar, who, through the marvelous might of the Divine Name, which she had elicited from him, ascended to heaven. As a reward for her virtue she was placed among the Pleiades, while the angel did penance before the Flood, and in punishment of his seduction of the daughters of men was suspended head downward between heaven and earth. Azael, however, still wanders unreformed among mortals, and through dress and adornment seeks to mislead women (Jellinek, "B. H." iv., pp. ix., *et seq.*). The version of this story in Yalḳ. 44 (on Gen. vi. 2) concludes: "Therefore do the Israelites offer as a sacrifice on the Day of Atonement a ram [sic] to the Eternal One that He may forgive the sins of Israel, and a ram [sic] to Azazel that he may bear the sins of Israel, and this is the Azazel that is referred to in the Torah." This passage of the midrash explains the words of Yoma 67b: "According to the school of R. Ishmael, Azazel is he who atones for the deed of Usa and Azael." It is to be noted that in the editio princeps of the Yalḳuṭ (Salonica, 1526-27) the source of the legend of the fallen angels (in § 44) as well as of the legend concerning the temptation of R. Mattithiah b. Ḥeresh by Satan (in § 161), who was successfully resisted by the pious hero, is simply the ordinary midrash, not the Midrash Abkir. The latter legend is found also in the Midrash of the Ten Commandments (Jellinek, *l.c.* i. 79) and in Tanḥuma (ed. Buber, "Ḥuḳḳat," Addenda, § 1).

In several other excerpts from the Yalḳuṭ, which, according to later editions, are derived from the Midrash Abkir, the source is indicated in the first edition merely by the word "Midrash," as in § 241, which discusses the legend of Usa, the patron of Egypt; here "Midrash" apparently means "Midrash Wayosha'" (Jellinek, *l.c.* i. 39 *et seq.*). Yalḳ. 235 (on Ex. xiv. 24) relates that the Egyptian magicians Jannes and Jambres obtained wings by their art and soared to heaven, but were dashed down into the sea by the angel Michael. It can not be determined, however, whether this passage belongs to the fragment excerpted from the Midrash Abkir in Yalḳ. 234. This midrash was at all events known to the author of the "Shemot Rabbah," and was used or cited in the following works among others: the "Leḳaḥ Ṭob" of R. Tobias b. Eliezer, the "Ha-Roḳeaḥ" of Eleazar ben Judah of Worms, the "Pa'aneaḥ Raza," the "Ketab Tamim" of Moses Talhu, the "Kad ha-Ḳemaḥ" of Baḥya ben Asher, a manuscript commentary by a grandson of R. Samuel of Speier, and the Yalḳuṭ Re'ubeni. The entire midrash was likewise known to Azariah dei Rossi (comp. "Me'or 'Enayim," ed. Wilna, p. 455) and to Abraham ibn Akra. The extracts in the Yalḳuṭ, which had been listed almost completely by Zunz, were collected by Buber in "Ha-Shaḥar," xi. (reprinted separately, Vienna, 1883) and by Simon Chones in "Rab Pe'alim," pp. 133 *et seq.* The legend of the two angels was also reprinted by Jellinek, *l.c.* iv. 127 *et* *seq.* Jannes and Jambres are mentioned also in Men. 85a and "Shemot Rabbah," 9.

2. Midrash Al Yithallel: A midrash containing stories from the lives of the wise Solomon, the mighty David, and the rich Korah, illustrating Jer. ix. 23. The text has been published according to a manuscript at Munich by Jellinek ("B. H." vi. 106–108), and according to a manuscript from Yemen by Grünhut ("Sefer ha-Liḳḳuṭim," i. 21 *et seq.*), with valuable references to sources and parallels. With the story of Solomon may be compared the passage cited in Jellinek (*l.c.* ii. 86 *et seq.*, from the "'Emeḳ ha-Melek"); the history of David is similar to the midrash of Goliath (*ib.* iv. 140 *et seq.*); and that of Korah to the passage in the Midrash Tehillim (ed. Buber on Ps. i. 15).

Bibliography: Jellinek, *B. H.* iv., p. xiii.; vi., pp. xxvi. *et seq.*

3. Midrash 'Aseret ha-Dibrot: A midrash which dates, according to Jellinek, from about the tenth century, and which is devoted entirely to the Feast of Weeks, being actually called in a Vatican manuscript "a haggadah for Shabu'ot." Its author seeks to inculcate the doctrines of the Decalogue by citing pertinent tales of a moral and religious nature; and he employs, in addition to much material from unknown sources, many passages from treatises on the Creation, revelation, and similar topics, which he introduces with the phrase "ameru ḥakamim" (the sages say); he seldom cites his authorities. He writes in a lucid Hebrew style. The separate commandments are prefaced by a general introduction based on Ps. cvi. 2: "Who can utter the mighty acts of the Lord? who can shew forth all his praise?" This verse is explained, with reference to Pirḳe R. El. iii., as follows: "Even the angels are unable to recount His mighty acts; only faintly may be shown what He hath created and what shall come to pass, that the name of the King of all kings, the Holy One, blessed be He! may be praised and honored."

After a few sentences follows the haggadah of the strife of the letters, which contended with each other for the honor of forming the beginning of Creation. The victor in this contest was the letter "bet," the initial of the word בראשית, while "alef" was comforted by the promise that with it, as the first letter of אנכי, the revelation of the Ten Commandments should begin (comp. the recension of the Midrash of the Alphabet in Jellinek, "B. H." iii. 50 *et seq.*; Gen. R. i., ed. Theodor, p. 9). The word אנכי is explained as a notariḳon and as Egyptian (comp. Shab. 105a; Pesiḳ. 109a). This section is followed by a mystic and cosmological discussion of the magnitude of the world, of the waters above and below the firmament, and of the seven heavens (comp. "Seder Rabbah de-Bereshit" in Wertheimer, "Batte Midrashot," i. 9, 22 *et seq.*). The introduction then makes excursus on the modesty of Moses, which gained for him the honor of God's revelation of the Torah; on the preexistence of the Torah, and on God's invitation to the Gentiles to accept it, which they all refused; and on the pledges which God required of Israel to keep the Torah, these pledges being their children (comp. Cant. R. to Cant. i. 3). In the discussion of the several commandments (דיבור ראשון, etc., to דיבור תשיעי, which are included in the editions of this midrash) only the first and sixth commandments, which have no story attached to them, are treated at any length in haggadic fashion. In the case of the other commandments, legends form the principal part of the discussion, and are arranged as follows: commandment ii., the mother and her seven children, the limping Jew; commandment iii., one who never swore; commandment iv., the pious man and the cow; Joseph, who kept holy the Sabbath-day, the emperor and R. Joshua b. Hananiah, Tinnius Rufus and Rabbi Akiba; commandment v., three examples of the love of children, the child and the Book of Genesis; commandment vii., the temptation of Mattithiah b. Ḥeresh, Rabbi Meïr and the wife of his host, Mattaniah's wife and death; the history of Saul, who by the help of Elijah was reunited with his wife after a long separation; commandment viii., Solomon and the thief, the merchant and the thievish innkeeper; commandment ix., the son of the publican Baya.

H.* i., p. xviii.; text of the *Midrash*, ib. pp. 62–90; Benjacob, *Oẓar ha-Sefarim*, p. 301; Horowitz, *Uralte Tosefta's*, v. 66 *et seq.*; Wertheimer, *Batte Midrashot*, ii. 8, 26. On another recension of this midrash in the *Ḥibbur ha-Ma'asiyyot*, Verona, 1647, which contains a story on the honor due the Torah, as well as on a דרש עשרת הדברות, and which is contained in a manuscript of historical miscellanies, comp. Epstein in *Ha-Shaḥar*, i. 67; *Maḥzor Vitry*, Introduction, p. 183. Winter and Wünsche's *Die Jüdische Litteratur*, i. 669 *et seq.*, contains a translation of some fragments of another midrash to the Ten Commandments, attributed to Saadia Gaon (comp. Eisenstadter, *Arabischer Midrasch zu den Zehn Geboten*, Vienna, 1868; see also Weiss, *Dor*, iv. 152).

4. Dibre ha-Yamim shel Mosheh: This midrash, which is written in pure Hebrew, and which is in many portions a mere cento of verses from the Bible in close imitation of Biblical style, presents a history of the life of Moses embellished with many legends which must be very old, since the same or similar stories are found as early as Josephus ("Ant." ii. 9, §§ 2 *et seq.*).; viz., the stories of the wise men's prophecy to the king of the birth of a child who some day will destroy the power of the Egyptians (in the midrash the interpretation of a dream replaces the prophecy; comp. also Targ. Yer. 1 to Ex. i. 15), upon which prophecy followed the command of the king to cast the male children of the Israelites into the river; the crown which the king places upon Moses' head, and which the latter casts to the earth (in the midrash Moses is described as taking the crown from the king's head); Moses as leader of the Israelites in a war against the Ethiopians, his use of the ibis in combating the snakes that have made his way dangerous, and the love of the king's daughter for him (according to the midrash Moses enters the camp of the Ethiopian king קיקנוס, upon whose death he marries the latter's widow, and, overcoming the dangers due to the snakes, captures the long-besieged city). For other older sources which agree in part with this midrash and differ from it in some respects, see MOSES IN RABBINICAL LITERATURE.

According to Jellinek ("B. H." ii., p. viii.), the life of Moses was originally treated in detail in a chronicle which employed sources still older. This work was incorporated in the well-known collection of legends entitled "Sefer ha-Yashar"; and from this the Yalḳuṭ took extracts which agree with the "Sefer ha-Yashar" and not with the present Chronicle of Moses. At a later time, however, a shorter recension of the older chronicle was made, which is the one now existing. It was published at Constantinople in 1516, at Venice in 1564, and elsewhere, and was reprinted by Jellinek (*l.c.* ii. 1–13). Extracts were made from the chronicle by the author of the "Midrash Wayosha'"; and it was one of the sources of the "Shemot Rabbah"; it was likewise cited in the "'Aruk," by Ibn Ezra (who rejects it as apocryphal) on Ex. ii. 22, and by Samuel ben Meïr on Numbers.

BIBLIOGRAPHY: Zunz, *G. V.* p. 145; *Rab Pe'alim*, p. 45; Jellinek, *B. H.* ii., pp. vii. *et seq.*

5. Midrash Eleh Ezkerah: This midrash receives its name from the fact that a seliḥah for the Day of Atonement, which treats the same subject and begins with the words "Eleh ezkerah," recounts the execution of ten famous teachers of the Mishnah in the time of the persecution by Hadrian. The same event is related in a very ancient source, Ekah Rabbati on Lam. ii. 2, ed. Buber, p. 50b (comp. also Midr. Teh. on Ps. ix. 13, ed. Buber, p. 44b). According to the Midrash Eleh Ezkerah, a Roman emperor commanded the execution of the ten sages of Israel to expiate the guilt of the sons of Jacob, who had sold their brother Joseph—a crime which, according to Ex. xxi. 16, had to be punished with death. The names of the martyrs are given here, as in the seliḥah already mentioned (varying in part from the Ekah Rabbati and the Midrash Tehillim), as follows: R. Simeon b. Gamaliel, R. Ishmael the high priest, R. Akiba, R. Ḥanina b. Teradion, R. Judah b. Baba, R. Judah b. Dama, R. Ḥuzpit, R. Hananiah b. Ḥakinai, R. Jeshebeab, and R. Eleazar b. Shammua'.

Although this midrash employs other sources, borrowing its introduction from the Midrash Konen, and the account of the conversation of Rabbi Ishmael with the angels in heaven probably from the "Hekalot," it forms, nevertheless, a coherent work. It was edited, on the basis of a Hamburg codex, by Jellinek (Leipsic, 1853, and in his "B. H." ii. 64–72), and, according to another manuscript, by Chones, in his "Rab Pe'alim" (pp. 157–160). A second and a third recension of the midrash were edited, on the basis of manuscript sources, in "B. H." (vi. 19–35), and a fourth is contained in the Spanish liturgical work "Bet Ab" (Leghorn, 1877). According to Jellinek, "the fourth recension is the oldest, since it has borrowed large portions from the 'Hekalot': next to this stand the second and the third; while the youngest is the first, which, nevertheless, has the advantage of real conformity with the spirit of the race and represents this the best of all." The martyrdom of the ten sages is also treated in the additions to the "Hekalot" ("B. H." v. 167 *et seq.*) and in the kinah for the Ninth of Ab.

BIBLIOGRAPHY: Zunz, *G. V.* p. 142; Jellinek, *B. H.* ii., pp. xxiii. *et seq.*; v., p. xli.; vi., pp. xvii. *et seq.*; Benjacob, *Oẓar ha-Sefarim*, p. 299. On the problem of the synchronism of the ten martyrs see Grätz, *Gesch.* iv. 175 *et seq.*, and *Monatsschrift*, i. 314 *et seq.* A German translation by P. Möbius appeared in 1845.

6. Midrash 'Eser Galiyyot: This midrash treats of the ten exiles which have befallen the Jews, counting four exiles under Sennacherib, four under Nebuchadnezzar, one under Vespasian, and one under Hadrian. It contains also many parallels to the Seder 'Olam, ch. xxii. *et seq.* A citation of the commentator R. Hillel on Sifre ii. 43 (ed. Friedmann, p. 82a) justifies the inference that the Midrash 'Eser Galiyyot originally stood at the end of the Seder 'Olam; and it is also possible that Abraham ben David likewise drew material from it, for an older edition of his "Sefer ha-Ḳabbalah" includes this midrash. The haggadah at the beginning of the midrash, to the effect that the Jews had suffered ten exiles, was cited, with the formula "Our teachers have taught," by R. Ẓemaḥ Gaon in his letter addressed to the community of Kairwan in the latter part of the ninth century. The midrash has been edited by Jellinek ("B. H." iv. 133–136) and, with valuable notes, by Grünhut ("Sefer ha-Liḳḳuṭim," iii. 2–22). A later recension which "cares little about haggadic chronology, but much about haggadic embellishment," was printed in "B. H." v. 113–116.

BIBLIOGRAPHY: Jellinek, *B. H.* iv., p. xii.; v., p. xxxv.; Grünhut, *ib.* 5–13; Brüll, in *Ben Chananja*, 1866, p. 125; Epstein, *Eldad ha-Dani*, pp. 7, 17; Ratner, Introduction to the *Seder 'Olam*, pp. 49, 123, and notes on the same work, pp. 48a, 51a, 56a.

7. Midrash Esfah: This midrash, which as yet is known only from a few excerpts in Yalḳuṭ and two citations in "Sefer Raziel" and "Ha-Roḳeaḥ," receives its name from Num. xi. 16: "Gather unto me ["Esfah-li"] seventy men of the elders of Israel." In Yalḳ. i., § 736 is found a citation relating to the same verse, which can not be traced to any other midrash, and is doubtless taken from Midrash Esfah. To this midrash may possibly be referred a passage in the "Halakot Gedolot" (ed. Warsaw, p. 282b) and a fragment on Num. xvii. 14, xx. 1–3, in Wertheimer, "Batte Midrashot," iii. 8–10, which agrees in its concluding words with the excerpt in Yalḳ., Num. 763 on Num. xx. 3 (found also *ib.* 262, on Ex. xvii. 2, which begins with the same words). The name of the midrash shows that it must have begun with Num. xi. 16. The other excerpts in the Yalḳuṭ from the Midrash Esfah, §§ 737, 739, 742, 764, 773, and 845, are based on Num. xi. 24, xii. 3–7, xii. 12, xxi. 9, xxvi. 2 (found also *ib.* 684, on Num. i. 2, which begins with the same words), and Deut. vi. 16; the extent of the midrash, however, can not be determined.

The interesting extract in Yalḳ., Num. on Num. xi. 16 names the seventy elders in two of its recensions (a third recension of this passage is furnished by a Vatican manuscript); and one of these versions concludes with a noteworthy statement which justifies the inference that the midrash was taught in the academy of Ḥanina Gaon by Rabbi Samuel, brother of Rabbi Phinehas. It would seem, therefore, that the midrash was composed in Babylon in the first half of the ninth century.

V.* pp. 279 *et seq.*; Chones, *Rab Pe'alim*, pp. 36 *et seq.*; Rapoport, *Kerem Ḥemed*, vi.; Weiss, *Dor*, iv. 41, 216; Buber, in *Keneset Yisrael*, i.; Müller, *Einleitung in die Responsa*, 1891, p. 73; Wertheimer, *Batte Midrashot*, Introduction, pp. 5 *et seq.* The excerpts from the Midrash Esfah have been collected by Buber (*l.c.*) and by Chones (*l.c.* pp. 147-153; comp. Buber, *Yeri'ot Shelomoh*, pp. 13 *et seq.*).

8. Midrash Hallel. See PSALMS, MIDRASH TO.

9. Midrash Leku Nerannena. This midrash, which is cited in the Maḥzor Vitry (§ 426, p. 334) and of which a few fragments are still preserved, seems to have been a homily ("pesiḳta") for the Feast of Ḥanukkah.

BIBLIOGRAPHY: Epstein, *Ha-Ḥoḳer*, i. 65 *et seq.*

10. Midrash Ma'aseh Torah: This midrash contains compilations of doctrines, regulations of conduct, and empirical rules, arranged in groups of three to ten each and taken from various works. It is frequently found in manuscript, and has been edited at Constantinople (1519), Venice (1544), Amsterdam (1697), and elsewhere, while it has appeared more recently in Jellinek's "B. H." (ii. 92-101) and is contained also in the "Kol Bo" (§ 118), where it frequently deviates from the Amsterdam edition even in the arrangement of its sentences. The fact that this midrash is ascribed to the patriarch R. Judah ha-Nasi (Rabbenu ha-Ḳadosh) receives its explanation from the fact that the Ma'aseh Torah is merely another recension of the similar midrash found in the edition of Schönblum (in his collection "Sheloshah Sefarim Niftaḥim," Lemberg, 1877) and in Grünhut's "Sefer ha-Likkutim" (iii. 33-90). This latter midrash begins in both editions with the teachings which Rabbenu ha-Ḳadosh taught his son, and the work is accordingly called "Pirḳe de-Rabbenu ha-Ḳadosh" or "Pirḳe Rabbenu ha-Ḳadosh" in the two editions and in the manuscripts on which they are based.

The editions in question comprise two different recensions. In the text of Schönblum the number of numerical groups is 24; and at the beginning stands the strange order 6, 5, 4, 3, followed by the numbers 7-24. On the other hand, in Grünhut's text, which is based on a defective manuscript, the order of the "peraḳim" proceeds naturally from 3 to 12 (or 13), but the rest are lacking; and, quite apart from this divergence in the method of grouping, even within the numerical groups the two editions differ strikingly in the number and occasionally also in the wording of individual passages. In an Oxford codex of the Maḥzor Vitry a passage occurring in both editions (ed. Schönblum, p. 35a; ed. Grünhut, p. 35) is cited as being in the Pesiḳta; and it is also stated that it treats of a series of from 3 to 10 objects (comp. the introduction to the Maḥzor Vitry, p. 179; Tos. Ber. 8b; 'Er. 19a).

A similar collection, probably more ancient in origin, was edited by Horowitz in the "Kebod Ḥuppah," Frankfort-on-the-Main, 1888, the work being based on a codex of De Rossi of the year 1290. This compilation is named the "Ḥuppat Eliyahu" or the "Sheba' Ḥuppot," on account of its opening words, "Seven canopies will God set up for the righteous in the world to come" (comp. B. B. 75a). This haggadah agrees for the most part with the Ma'aseh Torah and the Pirḳe Rabbenu ha-Ḳadosh, and presents the numerical groupings up to the number 24, arranged without much order; on the whole, it harmonizes more closely with the Pirḳe. According to Horowitz, the "Ḥuppat Eliyahu" was revised and expanded into the "Huppat Eliyahu Rabbah."

The "Ḥuppat Eliyahu" was edited as far as No. 16 by R. Israel Alnaqua at the end of his "Menorat ha-Ma'or"; and this portion of the compilation, together with other extracts from this work, was appended by Elijah de Vidas to his "Reshit Ḥokmah" (comp. Schechter, "Monatsschrift," 1885, pp. 124 *et seq.*, 234). Alnaqua mentions also among the sources which he used "Ḥuppat Eliyahu Zuṭa we-Rabbah," which were evidently merely parts of the same work. From them were probably derived the two extracts in paragraphs 201 and 247 of the "Menorat ha-Ma'or" of Isaac Aboab, which are cited as occurring in the "Ḥuppat Eliyahu Rabbah" and the "Ḥuppat Eliyahu Zuṭa." Alnaqua was, furthermore, the compiler of many maxims beginning with the words לעולם, גדול, and גדולה, and forming the "Or 'Olam" at the end of his "Menorat ha-Ma'or." This collection was likewise incorporated by De Vidas in his work, and has been reprinted by Jellinek ("B. H." iii. 109-130) as the "Midrash le-'Olam" and "Midrash Gadol u-Gedolah."

The "Ma'aseh Torah" formed the model for the rich collection of Elijah Wilna which bears the same name, and which appeared at Warsaw in 1804 with the additions of his son Abraham.

BIBLIOGRAPHY: Zunz, *G. V.* pp. 284 *et seq.*; Chones, *Rab Pe'alim*, pp. 59 *et seq.*, 87 *et seq.*: Benjacob, *Oẓar ha-Sefarim*, pp. 337 *et seq.*, 357 *et seq.*; Grünhut, *Sefer ha-Likkuṭim*, iii., Introduction, pp. 17 *et seq.* Abundant material regarding this midrash has been collected by Horowitz; but the numerical relations of the midrashim require thorough investigation.

11. Midrash Peṭirat Aharon: A midrash based on Num. xx. 1 *et seq.*, and describing the lack of water experienced by the children of Israel after the death of Miriam and the events at the rock from which water was obtained. It likewise treats of Num. xx. 24 *et seq.*, recounting the death of Aaron. Aaron, escorted by the people, ascended the mountain with Moses and Eleazar. There a cavern opened which Moses invited his brother to enter; in it were a table, a burning lamp, and a couch surrounded by angels. With gentle words Moses addressed Aaron, whose fate was to be happier than his own; for Aaron was to be buried by his brother, and his honor was to be inherited by his children. Aaron then lay down upon the couch, and God took him to Himself. When Moses left the cavern it vanished; but at his prayer, his assertion that Aaron was dead being disbelieved, the mountain opened again and the high priest was seen resting on the couch (see JEW. ENCYC. i. 4a, *s.v.* AARON; and on the beginning of the midrash, which is based on Zech. xi. 8, comp. Ta'an. 9a and Sifre, Deut. 305). Authorities are nowhere cited, but several statements are introduced by the formula ואז"ל (*i.e.*, ואמרו ז"ל). The midrash was edited at Constantinople (1516), Venice (1544), and elsewhere, and has been reprinted by Jellinek ("B. H." i. 91-95).

BIBLIOGRAPHY: Zunz, *G. V.* p. 146; Jellinek, *B. H.* i., p. xix.

12. Midrash Peṭirat Mosheh: This midrash describes in great detail the last acts of Moses and his death, at which the angels and God Himself were present. There are several recensions of it. The first, published at Constantinople in 1516 (Venice, 1544, and elsewhere; also in Jellinek, "B. H." i. 115–129), begins with a brief exegesis by R. Samuel Naḥmani and R. Tanḥuma of the first verse of the pericope "We-zot ha-berakah" (Deut. xxxiii. 1, xxxiv. 12), closing with its last verses, and doubtless intended for Simḥat Torah. The real content of the midrash is a haggadic treatment of Deut. xxxi. 14 *et seq.*, supplemented by an exegesis of Deut. iii. 23 *et seq.*, and is filled with somewhat tedious dialogues between God and Moses, who is represented as unwilling to die. All his tears and entreaties were in vain, however; for God commanded all the princes of heaven to close the gates of prayer. In the last days of his life, until the 7th of Adar, Moses interpreted the Torah to Israel; and on the day of his death, according to R. Ḥelbo, he wrote thirteen Torahs, of which twelve were for the twelve tribes, and the best was for the Ark of the Covenant (*ib.* xxxi. 24 *et seq.*; comp. Pesiḳ. p. 197a; Deut. R., Wayelek, end.; Midr. Teh. on Ps. xc.); some say that Gabriel descended, and took the Torah from the hands of Moses, bearing it through each heaven to show the piety of its scribe, and that the souls of the holy read from this Torah on Mondays and Thursdays and on festivals. This is followed by a long section beginning with R. Josiah's account of the honors which Moses rendered Joshua, and the service which he did him in the last days of his life. Especially noteworthy here is the poetic prayer of Joshua beginning עורו רנו שמי השמים העליונים.

After this the close of Moses' life is depicted, a bat ḳol giving warning with increasing insistence of the hours, even of the seconds, that remained for him. This enumeration of the hours and the conventional formula יצתה בת קול are important for the determination of the dependence of the additions in Deut. R. xi. and the second recension on the original version. Early in the midrash the angels Gabriel and Zangaziel, "the scribe of all the sons of heaven," are mentioned; but in the last hours of the life of Moses it is Samael, the head of the Satans, whose activity is most conspicuous as he watches for the passing of the soul, while Michael weeps and laments. At last Samael receives the command to bring the soul of Moses, but flees in terror before his glance. Again he appears with a drawn sword before Moses, but he has to yield before the "shem ha-meforash," carved on the staff of the leader of Israel. The last moment approaches, however, and God Himself appears to receive Moses' soul. The three good angels accompany Him to prepare a resting-place for Moses, whose soul at length is taken in the kiss of death. See Moses in Rabbinical Literature.

Other Recensions.

Large portions of this midrash are contained in Deut. R., ed. Wilna, xi. 4, 7, 8, 9 (?), and 10, where they must be regarded as later additions. The entire passage represented by paragraphs 9 and 10 of Deut. R. xi. is found also, combined in the same manner, in Yalḳ., Deut. 940 (on Deut. xxxi. 14), where the Midrash Peṭirat Mosheh is given as the source. Sifre 305 contains an exquisite little haggadah on Moses and the angel of death (comp. Pesiḳ. p. 199b; Deut. R. xi. 5). A long citation from the beginning of the midrash is also contained in a homily in Tan., Wa'etḥanan, 6 (on Deut. iii. 26), treating of the same theme, the death of Mo[illegible]

A second recension is based on Prov. [illegible] and is considered by Jellinek, but probably incorrectly, to be the older. It was edited by him in "B. H." vi. 71–78, and has an entirely different beginning from that which is found in the other recension (comp. Deut. R. xi. 3). As it is based upon a defective manuscript, the manner in which this introduction was connected with the original midrash can not be determined; but what follows the missing portion does not differ essentially from that found in the first recension, although it is somewhat shorter and is changed in arrangement. Moses' lament that he may never taste the fruits of the land receives a long explanatory addition to the effect that he grieved not for the products of the earth, but because he would be unable to fulfil the divine commands pertaining to Palestine.

A third recension or revision of the midrash was published by Gaulmyn (Paris, 1692), together with a Latin translation and the first recension. In the "Assumptio Mosis" the manuscript ends abruptly before the account of the assumption from which that work receives its name. According to Schürer, this concluding portion must have related to the dispute of the archangel Michael with Satan, mentioned in Jude 9.

Bibliography: Zunz, *G. V.* p. 146; Jellinek, *B. H.* i., p. xxi.; vi., pp. xxi. *et seq.*; Schürer, *Gesch.* 3d ed., iii. 219 *et seq.*

13. Midrash Ṭa'ame Ḥaserot we-Yeterot: This midrash, which has been edited most completely by Wertheimer (Jerusalem, 1899), gives haggadic explanations not only of the words which are written defective or plene, as the title of the work implies, but also of a great number of those which are not read as they are written (comp. on the ketib in Wertheimer's ed., Nos. 8, 11, 13, 19, 21–30, 37, 51, 89, 106, 111, 113, 124, 125, 127–129, 131, 134, 138–140, 181, and No. 12 on a word which is read without being written). There are likewise notes on names and words which are read differently in different places (*e.g.*, in Nos. 17, 20, 123, 126, 141, 142, 164, 172), on the *ἅπαξ λεγόμενον* שמיכה, Judges iv. 18 (No. 108), on the peculiar writing of certain words (*e.g.*, No. 133 on לםרבה, Isa. ix. 6, and No. 163 on ההלכוא, Josh. x. 24), and on the suspended letters in Judges xviii. 30, Ps. lxxx. 14, and Job xlviii. 50 (Nos. 112–114). The midrash may be termed, therefore, a Masoretic one, although it frequently deviates from the Masorah. The haggadic interpretations are derived for the most part from scattered passages in the Talmud and in the Midrashim, while the arrangement is capricious, the individual words being arranged neither according to the order of the alphabet nor according to the sequence of the books of the Bible. In the different manuscripts and editions of it this midrash varies considerably, not only in the number and arrangement of the passages which it discusses, but also in the wording of individual interpretations. It is cited under its present title in the Tosafot (Ber. 34a), in the "Sefer Miẓwot Gadol" of Moses of Coucy, and by Asher ben Jehiel, while it is called "Midrash Ḥaserot we-Yeterot" by Solomon Norzi. A brief

כהן גדול ור׳ עקיבא בן יוסף ור׳ יהודה בן בבא ור׳

PAGE FROM MIDRASH ELEH EZKERAH, CONSTANTINOPLE (?), 1620.
(From the Sulzberger collection in the Jewish Theological Seminary of America, New York.)

extract from this work enumerating the words to be written "defective" or "plene," but omitting the reason therefor, is contained in the Maḥzor Vitry, § 518, pp. 656 *et seq.*

To the Masoretic midrashim belong also the explanations of passages read and not written or written and not read which have been edited from an old grammatical and Masoretic miscellany in the "Manuel du Lecteur" of Joseph Derenbourg (Paris, 1871), and in Jacob Saphir's "Eben Sappir" (ii. 218 *et seq.*, Mayence, 1874), and reprinted by Jellinek in his "B. H." (v. 27–30).

BIBLIOGRAPHY: The midrash on the reasons for words written "defective" and "plene" was edited by Berliner on the basis of a Munich manuscript in his *Pelețat Soferim*, Hebrew section, pp. 36 *et seq.*, Breslau, 1872; by Wertheimer on the basis of a Genizah manuscript in the *Batte Midrashot*, i. 32 *et seq.*, iii. 1 *et seq.*; and on the basis of a codex of De Rossi in the edition mentioned in the text; comp. Berliner, *l.c.* German section, pp. 34 *et seq.*; the introductions of Wertheimer in the various editions; Zunz, *G. V.* p. 284; *Rab Pe'alim*, pp. 65 *et seq.*; Buber in *Ha-Shaḥar*, iv.

14. Midrash Tadshe (called also **Baraita de-Rabbi Pineḥas b. Ya'ir**): This small midrash begins with an interpretation of Gen. i. 11: "And God said, Let the earth bring forth" ("Tadshe ha-areẓ"). "Why," asked R. Phinehas, "did God decree that grass and herbs and fruits should grow upon the third day, while light was not created until the fourth? To show His infinite power, which is almighty; for even without the light He caused the earth to bring forth [while now He creates all manner of trees and plants through the operation of the light]." The name of the author occurs twice (ed. Epstein, pp. xxi., xxxi.); and the midrash closes with the words "'ad kan me-dibre R. Pineḥas ben Ya'ir." No other authors are named. This midrash is peculiar in several respects, varying in many statements from other midrashim; and, although written in pure Hebrew, it contains numerous expressions which are not found elsewhere, such as חג העומר, חג השופרות, כוכבים שרועים (= "planets," p. xix.). The structure of the midrash is very loose.

The Midrash Tadshe is in the main symbolic in tendency, and it plays much on groups of numbers. Section 2 contains a symbolization of the Tabernacle; and, according to Epstein, the central idea of the midrash is the theory of three worlds—earth, man, and the Tabernacle. Section 10 contains a mystic explanation of the numbers mentioned in connection with the offerings of the princes (comp. Num. vii. 12 *et seq.*). Combinations and parallelisms based on the number ten are found in sections 5 and 15; on seven, in 6, 11, and 20; on six, in 20; on five, in 7; on four, in 20; on three, in 12, 18, etc. Desultory expositions of Gen. ii. 17; iii. 3, 14 *et seq.*; Ex. vii. 12 *et seq.*, 83 *et seq.*; Lev. xiii. 2, xiv. 34; Lam. i. 1 *et seq.*; Num. iv. 3, xxvii. 7; and Deut. xxxii. 12, are contained in sections 7, 10, 17, 20, 21, and 22. Especially noteworthy is section 8, on "the ages of the pious," the Patriarchs, the Matriarchs, and the twelve sons of Jacob, giving also the dates of their births. In this list the months are not designated as Nisan, etc., but as "the first," "the second," etc. The dates for Zebulun and Benjamin are lacking in the present text, but are given in a citation by Baḥya and in the Yalkuṭ, where, however, the months are named and not numbered. The length of life ascribed to the sons of Jacob agrees with that given in the Seder 'Olam Zuṭa; but only the Book of Jubilees gives the days and months of their births, and even it does not state the length of their lives (comp. Jubilees, xxviii. and xxxii., where, however, some dates differ from those given in the midrash). On the other hand, section 6 of the Midrash Tadshe is in entire agreement with the Book of Jubilees (ii., iii., iv., vii., x., xii., xiv., xv., and xxxiii.) in its statement that twenty-two varieties of things were created in the world—seven on the first day; one on the second; four on the third; three on the fourth; three on the fifth; and four on the sixth—and that these twenty-two varieties correspond to the twenty-two generations from Adam to Jacob (and to the twenty-two letters of the alphabet).

Analogies with the Book of Jubilees.

Epstein has drawn attention to other striking analogies between this midrash and the Book of Jubilees, especially to the strange theory of Rabbi Phinehas b. Jair (p. xxxi.) that Adam was created in the first week, and that Eve was formed in the second week, from his rib; this serving as the foundation for the rule of purification given in Lev. xii. 2 *et seq.*, with which Jubilees, iii. 8 is to be compared. On these grounds, Epstein advances the hypothesis that in this and many other passages the author of the Midrash Tadshe used the Book of Jubilees, which existed at that time in Hebrew and was much larger in scope than at present, and was ascribed, "on account of its Essenic tendency," to Rabbi Phinehas b. Jair, who was famous for his great piety. It is hardly probable, however, that the present Book of Jubilees is incomplete; and a much more plausible view of Epstein's is that which regards the Midrash Tadshe as the work of Rabbi Moses ha-Darshan. Either on account of its beginning, or for some other reason, R. Phinehas b. Jair was regarded as the author of this midrash, and Num. R. xiii. 10 and xiv. 12, 18 contain several expositions and maxims from it cited under the name of that tanna. The midrash, from which Yalkuṭ excerpted several passages and which has been cited by various authors, has been edited according to manuscript sources by Jellinek ("B. H." iii. 164–193) and by Epstein ("Beiträge zur Jüdischen Alterthumskunde," Vienna, 1887).

The Midrash Tadshe must not be confused with another baraita bearing the title "Baraita de-Rabbi b. Jair," which deals with gradations of virtues, the highest of which causes its possessor to share in the holy spirit (comp. Soṭah, end, and parallels).

15. Midrash Temurah (called by Me'iri **Midrash Temurot**): A small midrash consisting of three chapters. It develops the view that God in His wisdom and might has created all things on earth as contrasted pairs which mutually supplement each other. Life is known only as opposed to death, and death as opposed to life; and, in like manner, if all were foolish or wise, or rich or poor, it would not be known that they were foolish or wise, or rich or poor. "Therefore God created man and woman, beauty and deformity, fire and water, iron and wood, light and darkness, heat and cold, food and famine, drink and thirst, walking and lameness, sight and blindness, hearing and deafness, sea and land, speech and dumbness, activity and repose, pain and pleasure, joy and sorrow, health and sickness," and the like. In ch. iii. the antitheses given in Eccl. iii. 1 *et seq.* are enumerated and are paralleled with Ps. cxxxvi. Ch. i., which contains an interesting anthropological passage, and ch. ii. begin with pseudepigraphical interpretations ascribed by the midrash to Rabbis Ishmael and Akiba; the latter appear, consequently, as joint authors of the midrash.

According to Jellinek, the Midrash Temurah was composed in the first half of the thirteenth century, since it drew upon Ibn Ezra and upon Galen's dialogue on the soul, even though it is cited by Me'iri and Abraham Abulafia. It was first edited by Azulai (Leghorn, 1786), being appended to the second part of his "Shem ha-Gedolim"; and it has been reprinted by Jellinek ("B. H." i. 106–114).

Bibliography: Zunz, *G. V.* p. 118; *Rab Pe'alim*, pp. 123 *et seq.*; Jellinek, *B. H.* i., pp. xx. *et seq.*

16. Midrash Wa-Yekullu: A midrash named after Gen. ii. 1 ("Wa-Yekullu ha-Shamayim"). It contained both halakic and haggadic material, and doubtless covered several books of the Pentateuch; but it now exists only in citations by various authors after the middle of the twelfth century. In "Ha-Roḳeaḥ," §§ 192, 209, 320, and 324, passages from it are quoted as belonging to Gen. xix. 24, to the pericopes Beḥuḳḳotai and Beha'aloteka and to Deut. ii. 31. Judging from the first and fourth of these citations, the Midrash Wa-Yekullu was a homiletic one, since Tanḥuma on Gen. xix. and on Deut. ii. 31, as well as Deut. R. on the latter passage, likewise contains homilies. The midrash must have derived much material from the Tanḥuma-Yelammedenu, since some of the few fragments that have been preserved agree more or less accurately with passages from the Tanḥuma or with excerpts in Yalḳuṭ from Yelammedenu. The midrash seems also to have been called "Wayekullu Rabbah." The citations from it are collected in Grünhut's "Sefer ha-Liḳḳuṭim," ii. 16b *et seq.*

Bibliography: Zunz, *G. V.* p. 281; idem, *G. S.* iii. 252; *Rab Pe'alim*, pp. 52 *et seq.*; Grünhut, *Sefer ha-Liḳḳuṭim*, Introduction, pp. 13 *et seq.*

17. Midrash Wayissa'u: This small midrash, "the heroic legend of the sons of Jacob," is based on Gen. xxxv. 5 and xxxvi. 6, and recounts the story of the wars of Jacob and his sons against the kings of the Amorites and against Esau and his army. The beginning of its version of the former story is as follows: "Our teachers said that although they did not pursue after them this time, yet seven years later all the kings of the Amorites gathered themselves together against the sons of Jacob." That the legends contained in the Wayissa'u are very old may be inferred from the Book of Jubilees, xxxiv., xxxvii. *et seq.*, and from the Testament of Judah (Kautzsch, "Apokryphen," ii. 97 *et seq.*, 102 *et seq.*, 471 *et seq.*); the midrash betrays its relationship to these old pseudepigraphical writings in many details. The war against the Amorites is treated at greater length in the "Sefer ha-Yashar," pericope "Beshallaḥ." The midrash itself is contained in Yalḳ., Gen. 133, and is mentioned by Naḥmanides on Gen. xxxiv. 13, as "Sefer Milḥamot Bene Ya'aḳob."

The text has been edited according to the Yalḳuṭ by Jellinek ("B. H." iii. 1–5), and by Chones (in his edition of "Rab Pe'alim," pp. 153 *et seq.*), and by Charles in his edition of the Book of Jubilees, Appendix II., Oxford, 1895.

Bibliography: Zunz, *G. V.* p. 145; *Rab Pe'alim*, pp. 54 *et seq.*; Jellinek, *B. H.* iii., pp. ix. *et seq.*

18. Midrash Wayosha': A midrash based on Ex. xiv. 30–xv. 18. It is an exposition in the style of the later haggadah and seems to have been intended for the "Shirah" Sabbath or for the seventh day of the Passover. Entire sections are taken verbatim from the Tanḥuma, such as the passage on Ex. xv. 3 from Tan., Bo, and on xv. 5 from Ḥuḳḳat, beginning. With the story in the exposition of Ex. xiv. 30, concerning Satan, who appeared before Abraham and Isaac as they went to the sacrifice, may be compared the addition in Tan., Wayera, ed. Stettin, No. 24; Yalḳ., Ex. §§ 98–99, end; and "Sefer ha-Yashar," end of pericope "Wayera." The midrash on Ex. xv. 2, 7 also contains extracts from the Chronicle of Moses, the passage on Usa, the genius of Egypt, agreeing word for word with the excerpt in Yalḳ., § 241. Here the first edition has merely "Midrash," while other editions give the Midrash Abkir as the source, although it is doubtful whether this haggadah ever occurred in that work.

The sections begin for the most part with the words "ameru ḥakamim," though Rabbi Joshua ben Levi and Rabbi Samuel b. Naḥmani are occasionally given as the authors. In the exposition of xv. 18 on the sorrows and the redemption in the Messianic time, the terrible figure of King Armilus is described, and it is said that he will slay the Messiah of the race of Joseph, but will himself be slain by the Messiah who is the son of David (comp. Suk. 52a); God will then gather together the scattered remnant of Israel and hold the final judgment; and the wonderful beauty of a new world full of joy and happiness is revealed.

The Midrash Wayosha' was first published at Constantinople in 1519 (Metz, 1849, and elsewhere), and has been reprinted by Jellinek ("B. H." i. 35–37).

Bibliography: Zunz, *G. V.* p. 282; *Rab Pe'alim*, p. 55; Jellinek, *B. H.* i., p. xvii.; Benjacob, *Oẓar ha-Sefarim*, p. 299.

The more recent collections of small midrashim mentioned in this article and in Midrash Haggadah are the following: A. Jellinek, "B. H." parts i.–iv., Leipsic, 1853–57; parts v.–vi., Vienna, 1873–78; Ḥayyim M. Horowitz, "Agadat Agadot," etc., Berlin, 1881; *idem*, "Bet 'Eḳed ha-Agadot: Bibliotheca Haggadica," 2 parts, Frankfort-on-the-Main, 1881; *idem*, "Kebod Ḥuppah," *ib.* 1888; *idem*, "Tosefta Attiḳta: Uralte Tosefta's," i.–v., *ib.* 1889–90; S. A. Wertheimer, "Batte Midrashot," i.–iv., Jerusalem, 1893–97; *idem*, "Leḳeṭ Midrashim," *ib.* 1903; L. Grünhut, "Sefer ha-Liḳḳuṭim, Sammlung Aelterer Midraschim," etc., i.–vi., *ib.* 1898–1903; comp. also Abraham Wilna, "Rab Pe'alim," ed. Chones, pp. 133 *et seq.*; H. L. Strack, in Herzog-Hauck, "Real-Encyc." *s.v.* "Midrasch."

In these collections, especially in Jellinek's "Bet ha-Midrash," there are many small midrashim, either edited there for the first time or reprinted, as well as a number of works under other names, a discussion of which belongs rather to an article on mystic literature. The following treatises, however, may be mentioned here, the titles being given for the most part according to Jellinek:

(1) Agadat Mashiaḥ (Haggadah of the Messiah: *ib.* iii. 141 *et seq.*). (2) Baraita Ma'ase Bereshit (in Chones' addenda to Abraham Wilna's "Rab Pe'alim," pp. 47 *et seq.*); also Seder Rabbah de-Bereshit (in Wertheimer, *l.c.* i. 1–31). (3) Gan 'Eden we-Gehinnom (Paradise and Hell; *ib.* v. 42 *et seq.*). (4) Ma'aseh R. Yehoshua' b. Levi (History of R. Joshua b. Levi; *ib.* ii. 48 *et seq.*). (5) Midrash Konen (in "B. H." ii. 23–39); Be-Ḥokmah Yasad (Divine Wisdom; *ib.* v. 63–69); Masseket Gehinnom (Tractate of Gehenna; *ib.* i. 147–149). (6) Milḥamot ha-Mashiaḥ (War of the Messiah; *ib.* vi. 117 *et seq.*). (7) Misterot R. Shim'on b. Yoḥai (Mysteries of R. Simeon b. Yoḥai; *ib.* iii. 78 *et seq.*). (8) Otiyot de-Rabbi Aḳiba (Alphabetical Midrash of R. Akiba; first and second recensions in "B. H." iii. 12–64; comp. *ib.* v. 31–33; vi., p. xl.; Wertheimer, *l.c.* ii. 23 *et seq.*; and see Akiba ben Joseph, Alphabet of); Hekalot Rabbati (Great Hekalot; in "B. H." iii. 83–108); Masseket Hekalot (Tractate Hekalot; *ib.* ii. 40–47; comp. also *ib.* i. 58 *et seq.*, iii. 161 *et seq.*, vi. 109 *et seq.*); and "Baraita Ma'ase Merkabah" (in Wertheimer, *l.c.* ii. 15–25). (9) Otiyot Mashiaḥ (Signs of the Messiah; *ib.* ii. 58–63). (10) Pirḳe Eliyahu (Sections Concerning the Messiah; *ib.* iii. 68 *et seq.*). (11) Seder Gan 'Eden (Description of Paradise; *ib.* ii. 52 *et seq.*; second recension, *ib.* iii. 131–140; additions, *ib.* 194–198). (12) Sefer Eliyahu (Apocalypse of Elijah; *ib.* iii. 65 *et seq.*). (13) Sefer Zerubbabel (Book of Zerubbabel; *ib.* ii. 54–57; comp. also Wertheimer, *l.c.* ii. 25 *et seq.*, 29 *et seq.*).

E. C. J. T.

MIDWIFE.—Biblical Data: Midwives are referred to in the Bible as having been employed among the Hebrews at an early period; thus Rachel and Tamar were assisted by midwives (Gen. xxxv. 17, xxxviii. 28). They were called in, however, only in rare cases. For instance, the delivery of Rachel is expressly stated to have been a difficult one, and Tamar was delivered of twins. But in general midwives were dispensed with. Thus in Egypt, where the Hebrews multiplied rapidly (Ex. i. 7, 12), the names of only two midwives are recorded, Shiphrah and Puah; and it is stated that the Hebrew women, unlike the Egyptians, "are delivered ere the midwives come in unto them" (*ib.* i. 15, 19). Sometimes the necessary service was rendered by friends or relatives (I Sam. iv. 20).

The general Hebrew term for "midwife" is מילדת (plural, מילדות); but the word חיות (Ex. i. 19), also, is interpreted by Rashi to denote midwives, like the Aramaic חייתא. The word אבנים (*ib.* i. 16), which is the dual form of אבן (= "two stones"), has given rise to some difficulty. The Targumim and the later commentators, as Rashi and David Ḳimḥi, interpret it as "the delivery-stool," while Ibn Janaḥ, Joseph Ḳimḥi, and Parḥon, followed by some modern commentators, as Eichhorn and Knobel, render it "the womb." Gesenius ("Th."), rejecting the idea that delivery-stools existed in Egypt at such an early period (comp. Ploss, "Das Weib," 2d ed., pp. 197, 232), translates "the stone bath."

Although it is not stated what were the functions of a midwife after the delivery, yet the services enumerated in Ezek. xvi. 4 were most probably rendered by her.

J. M. Sel.

——**In Rabbinical Literature:** The midwife is generally designated by חיה, חיתא (a term applied also to the lying-in woman) and by חכמה (= "the wise woman"; comp. the French "sage-femme"), but from Lev. R. xxvii. 7 it seems that the term מחבלתא is also applied to the midwife (comp. Gen. R. lx. 3). Besides tying the umbilical cord (Shab. 128b), she performed two other duties, as may be inferred from the Talmudic passage Soṭah 11b. It is here implied that "Shiphrah" and "Puah" (see Midwife, Biblical Data) were not the real names of the midwives, but only indicated their functions; the former meaning "the one who trims the child," and the latter, "the one who talks to the child," or, according to R. Hananeel, "the one who whispers"; that is to say, the midwife whispered in the woman's ear in order to facilitate parturition.

The question whether the delivery-stool was in use in Egypt during the Biblical period is answered by the Rabbis in the affirmative; for they translate אבנים "delivery-stool," giving various reasons for so doing (Soṭah *l.c.*). The Talmudic interpretation of משבר (Hosea xiii. 13) also is "delivery-stool."

A midwife, when called to assist a woman in labor, is allowed to profane the Sabbath, if necessary, in the discharge of her duties (Shab. *l.c.*; Yer. Shab. xviii. 3); and all concessions are granted to her as to one engaged in saving human life.

Although many physicians studied obstetrics, and rabbis who were acquainted with that science (Samuel, among others) were consulted on certain occasions with regard to the ritual cleanness or uncleanness of the mother, yet it does not appear from the Talmud that men were ever called to assist a woman in her delivery. It is also difficult to say whether in the Talmudic times midwives were specially trained for their profession or whether they gained their knowledge of it merely by watching the operations of others. The term חכמה, however, would seem to indicate that they were well trained.

Midwives, as appears from the Talmud, were called to assist not only women, but even domestic animals (Ḥul. 43a).

MIECZYSLAV III. See Poland.

MIEDZYBOZ (MEDZHIBOZH): Russian town in the government of Podolia; it has a total population of 5,100, including 3,400 Jews. Among the latter there are 1,009 artisans and 57 day-laborers. There are the usual charitable organizations. About 300 families were assisted in 1898 with fuel, and were given aid for Passover. A Jewish community existed at Miedzyboz as early as the sixteenth century, but in the course of the Cossack uprising under Chmielnicki it was destroyed. A few years later the census (1661) of the district of

Podolia showed that Miedzyboz had only a few Jewish houses, including two inns; these were exempted from taxation by privilege. During the war between Russia and Poland for the possession of Little Russia, the Jews of Miedzyboz were again put to the sword (1664). About 1740 the founder of Ḥasidism, Israel b. Eliezer Ba‘al Shem-Ṭob, settled there, and began to disseminate his teachings.

Bibliography: *Regesty i Nadpisi*, i. 426, 453, 464, St. Petersburg, 1899; S. Dubnow, *Yevreiskaya Istoriya*, ii. 428, Odessa, 1879.

H. R. S. J.

MIEDZYRZECZ (MESERITZ or **MEZHIRECHYE):** Town in the government of Siedlce, Russian Poland; near Warsaw. It has (1904) a population of 13,681, of whom 9,000 are Jews. The first Jewish settlement dates probably from the sixteenth century, its members coming from Germany and especially from Frankfort-on-the-Main. The Jews control all the business of the town. The making of bristles for the German export trade, via Leipsic, is one of its important industries, in which many Jewish workmen are employed. Moses Michel Migdal introduced this enterprise.

The synagogue, a very imposing stone structure, with a seating capacity of approximately 3,000, was built about 1800; Count Potocki, who formerly owned the town, is said to have contributed a large sum toward its erection. The bet ha-midrash was built in 1859. Miedzyrzecz has several minor congregations, a Talmud Torah, and a yeshibah (founded by Bendet Barg; d. 1891). Many Jews from Miedzyrzecz settled in the Holy Land, among them being Ẓebi Hirsch Fischbein (d. Jerusalem 1870) and David Janower. Both contributed to the founding of a Talmud Torah in Jerusalem. The colonists of Yesod ha-Ma‘alah, near Safed, in 1885, were all from Miedzyrzecz.

The following is a list of the rabbis of Miedzyrzecz: **Ẓebi Hirsch b. Abbusch** of Frankfort-on-the-Main (d. 1734); **Isaac b. Ẓebi Hirsch** (d. 1771); **Löb of Frankfort; Naḥman b. Elijah; Ephraim Eliezer Ẓebi b. Ẓeeb Harlap** (Eliezer Harlap; d. 1849; a descendant of Gedaliah ibn Yaḥya; he was a cabalist and left many manuscripts, some of which have been published under the title "Migdenot Eliezer"; in its introduction he traces his descent from King David); **Yom-Ṭob Lippe Heilpern** (author of "‘Oneg Yom-Ṭob," responsa); **Joshua Löb Diskin** (d. Jerusalem 1898); **Simḥah Samuel** (author of "Mesharet Mosheh," novellæ on Maimonides' "Yad"; d. 1865); **Israel Isser Shapiro** of Augustow (d. 1895); **Naḥman Baer Shapiro** (son of Israel Isser).

Miedzyrzecz has had several authors of note. **Abraham Dob Berusch Flohm,** maggid, was the author of "Ḥesed le-Abraham," on the Haggadah (1836). He corrected for the press all the manuscripts of Jacob, the maggid of Dubno. **Jacob David Biederman** was the author of annotations on "Torat Kohanim"; he became rabbi of Kozenitz, a small town near Miedzyrzecz. **Moses Ḥayyim Triwaks** (b. 1868) was the author of "Nod Dema‘ot" (Warsaw, 1888) and "Naḥalat Mosheh" (1890). There is a congregation in New York city whose members are mostly natives of Miedzyrzecz.

H. R. J. D. E.

MIELZINER, MOSES: American rabbi and author; born at Schubin, province of Posen, Germany, Aug. 12, 1828; died at Cincinnati Feb. 18, 1903. His father, **Benjamin,** rabbi in his native town, gave him the first instruction in Talmudic literature, while he received his secular education from L. I. Braunhart, a man of superior gifts, who, after having been a pupil of Heinrich Heine in the course founded by the Culturverein in Berlin, was appointed principal of the Jewish school in Schubin in 1835, and remained there until his death in his ninety-eighth year in 1904. In 1843 Mielziner was sent to Exin, where he attended the yeshibah of the aged rabbi Wolf Klausner, and in 1845 he went to Berlin in pursuit of further secular education, attending at the same time the Talmudic course of Rabbi J. J. Oettinger. Having prepared himself privately for academic studies, he entered the University of Berlin in 1848, and remained there until 1852, when Samuel Holdheim, who took a great interest in him, recommended him to Waren in Mecklenburg as teacher and preacher. The Orthodox reaction introduced by the "Landrabbiner" Lüpschitz in 1853 forced Mielziner, much to the regret of his congregation ("Allg. Zeit. des Jud." 1854, p. 527; 1857, p. 369), to resign his position. He went to Denmark, where his brother Solomon was minister in Aalborg, and soon obtained a position at Randers in 1854. In 1857 he was called as principal of the religious school to Copenhagen, where he remained until 1865, when he was called to the rabbinate of the Congregation Anshe Chesed in New York ("New Yorker Staats-Zeitung," 1865, No. 215). When this congregation was absorbed by the Beth-El congregation, he opened a private school, which he conducted until 1879, when he received a call as professor of Talmud and rabbinical literature from the Hebrew Union College in Cincinnati. Upon the death of Isaac M. Wise March 26, 1900, he became president of this institution, and held this position until his death.

Moses Mielziner.

Mielziner was not a voluminous writer. Apart from several sermons which he published, the first of which was delivered in Waren, 1854, he wrote "Die Verhältnisse der Sklaven bei den Hebräern," Copenhagen, 1859, this being the thesis for which he received the degree of Ph.D. from the University of Giessen. This book appeared also in an English translation under the title "Slavery Among the Ancient Hebrews," Cincinnati, 1895. As a result of his lectures at the college he published: "Jewish Law of Marriage and Divorce," Cincinnati, 1884; "Introduction to the Talmud," *ib.* 1894; second edition, New York, 1903; and "Legal Maxims of the Talmud," *ib.* 1898. Mielziner edited a Danish almanac for the year 5622 = 1862–63, and "A Selection from the Psalms for School and Family," Cincinnati, 1890. He also contributed to the "Allgemeine Zeitung des Judenthums," "Ben Chananja," the "American Israelite," and "Die Deborah," and wrote articles for the "Year-Book of the Central Conference of American Rabbis" and for The Jewish Encyclopedia.

Mielziner married in 1861 Rosette Levald of Copenhagen, and of the seven children who survived him, one, **Leo,** is an artist, living in Paris, and another, **Jacob,** is a rabbi at Helena, Mont.

A. D.

MIESES: A family of German and Austrian scholars of the nineteenth century, of which the following are prominent members:

Fabius Mieses: Galician litterateur and philosopher; born at Brody Oct. 31, 1824; died at Leipsic Oct. 10, 1898. Up to his fifteenth year he studied Hebrew literature exclusively. At an early age he gave signs of great intellectual power, and was hailed as a genius. In the house of his father-in-law, I. Mieses, a scholar living in Dresden, he met, besides Rapoport and other Maskilim, his future teacher, M. Schöngut, who initiated him into the study of philosophy, and with whom he used to converse in Hebrew during their regular daily walks. At the same time he assiduously applied himself to the study of German, French, Italian, Latin, mathematics, and astronomy. In 1846 his German essay "Gegenwart und Vergangenheit im Judenthume" appeared in Fürst's "Orient"; and from that time he became assistant editor of and a regular contributor to that paper. In 1878 he published (at Lyck) a didactic poem entitled "Ha-Emunah weha-Tebunah," treating of Darwinism and its opponents. By this production he gained for himself a prominent and lasting place among Hebrew poets.

Mieses was a prolific writer. Besides frequently contributing to various Hebrew and German periodicals, he wrote the following independent works: "Ha-Ḳabbalah weha-Ḥasidut" (Breslau, 1866; Odessa, 1871); "Ḳorot ha-Filusufiyah ha-Ḥadashah" (Leipsic, 1887), a history of modern philosophy from Kant to Mieses' own time; "Shirim" (Cracow, 1891), a collection of miscellaneous poems; "Die Bibel der Vernunft" (Leipsic, 1895). Upon this last work rests his chief claim to fame, as it is the first and only one of its kind which was written in the Hebrew tongue. Mieses was opposed to all religious reforms.

Bibliography: E. Ginzig, *Toledot F. Mieses*, Cracow, 1890; *Keneset Yisrael*, p. 118, Warsaw, 1887.

S. I. War.

Isaac Mieses: Austrian writer; born at Lemberg 1802; died in 1883. A very talented boy, he acquired at an early age a knowledge of the Talmud and kindred works. Later on he devoted himself mainly to philosophy. He removed to Thorn when nearly sixty years of age.

His works include the following: "Beitrag zur Würdigung der Wirren im Judentum," Leipsic, 1845; "Zofnath Paneach: Darstellung und Kritische Beleuchtung der Jüdischen Geheimlehre," in two parts, Cracow, 1862; "Benedict Spinoza und Sein Verhältniss zum Kriticismus," in "Zeitschrift für Exacte Philosophie," vol. iii.; and many other scientific essays published in various periodicals.

Bibliography: E. Ginzig, *Toledot Fabius Mieses*, Cracow, 1890.

S. A. H. R.

Jacques Mieses: German journalist and chess master; born at Leipsic Feb. 27, 1865; educated at the universities of his native city and Berlin, where he studied mainly the natural sciences. When seventeen years of age he won the first prize at the annual tournament of one of the Berlin chess clubs, and then for some time devoted himself chiefly to theoretical chess and problems. Of the latter he is generally admitted to be one of the leading solvers. Since 1888 he has participated in most of the international tournaments, at each of which he has gained prizes:

1888. Nuremberg.
1888. Leipsic.
1889. Breslau.
1899. London.
1900. Paris.
1901. Monte Carlo.
1902. Hanover.

At the tourney held at Cambridge Springs, Pa., in 1904, he was placed eighth, tying with Pillsbury.

Mieses is the author of the following works on chess: "Kleines Lehrbuch des Schachspiels" (Leipsic); "Schachmeister-Partieen" (*ib.*); and, with C. von Bardeleben, "Lehrbuch des Schachspiels" (*ib.* 1894). He edits also the chess columns of the "Berliner Tageblatt," "Leipziger Neueste Nachrichten," and "Zur Guten Stunde."

Bibliography: *The Hastings Chess Tournament*, 1895, ed. Cheshire, p. 361, London, 1896; C. T. Blanchard, *Examples of Chess Master-Play*, second series, p. 117, London, 1894.

S. A. P.

Judah Löb Mieses: One of the most prominent Maskilim of Galicia; died at Lemberg 1831. He was a man of wealth and education, and made his house the center of a literary circle. He encouraged and aided Isaac Erter and other young men who showed eagerness for knowledge and self-culture, and he offered them the use of his valuable library.

Mieses was a fluent Hebrew writer and a strong opponent of Ḥasidism. He was the author of "Ḳin'at ha-Emet" (Vienna, 1828; 2d ed., Lemberg, 1879), containing an introduction and three dialogues between Maimonides and Solomon of Chelm, author of "Merkebet ha-Mishneh" (Salonica, 1777). In this work Mieses pleads for pure Judaism free from all superstitious belief in spirits, dreams, demons, witchcraft, metempsychosis, etc., which in the course of time had obscured the light of the sublime religion. He sharply criticizes the ẓaddiḳ for spreading the grossest superstition among the Ḥasidim, and for exploiting the credulity of the ignorant masses. The author evinces a wide acquaintance with Jewish and general literature; and he appends to his book, under the title "Liḳḳuṭe Peraḥim," extracts from the writings of Judah ha-Levi, Ibn Ezra, Ḳimḥi, Albo, Abravanel, Joseph Delmedigo, and others, in support of his own views. He wrote also additions to David Caro's "Tekunat ha-Rabbanim" (2d ed., Lemberg, 1879; see Jew. Encyc. iii. 582, *s.v.* Caro, David).

Post-Mendels.* p. 239.

D. S. Man.

MIGAS, IBN. See Ibn Migas.

MIGGO: An Aramaic word contracted from "min gaw" (= "from within"), meaning to proceed from the content of a sentence or circumstance, and designating originally a conclusion based on analogy. It is used in this sense in B. M. 5b. If it be assumed that one has transgressed a commandment, and has taken money or property which does not belong to him, it follows that he may be suspected with regard to an oath, and that he is likely to commit perjury. Such a conclusion, however, is valid only when the breaking of a venial commandment is inferred from the violation of an important one, and not conversely (comp. Tos. B. M. *l.c.*, catch-word "de-ḥashid"). Another example of the use of "miggo" in this sense occurs in Suk. 7a, where, from the assumption that a ledge is considered a wall in the case of a booth, the conclusion is drawn that a ledge is likewise a wall so far as the Sabbath is concerned. The Hebrew equivalent for the Aramaic "miggo" in this sense is "mittok," a contraction of "min tok" (= "from within"). An example of the use of this term occurs in Beẓah 12a, where, from the fact that work is permissible on a holiday when it is necessary for a livelihood, it is inferred that it is allowed also when it is not necessary for subsistence: "Mittok she-hutterah le-ẓorek hutterah nami shello le-ẓorek."

Bases of Legal Argument.

Later the expression "miggo" was frequently used as a legal term, connoting "for this reason." When, for instance, a defendant or a plaintiff who bases his statements on a given assertion is known to have other and better reasons for his complaint or his defense, he is believed on the ground of the assertion made, and it is assumed that he has spoken only the truth; for had he wished to perjure himself he would have alleged better reasons. Thus the expression "The defendant (or the plaintiff) has a miggo" signifies that he was in a position to produce more convincing grounds for his statements; and in like manner, the formula "His case is decided on account of a miggo" signifies that he is believed for this reason.

The Mishnah does not contain the word "miggo," but a similar idea is expressed in the sentence "ha-peh she-asar hu ha-peh she-hittir" (= "the mouth which has bound has loosed"). An application of this principle occurs in Ket. 15b: "When one says, 'This field belonged to thy father, but I have bought it from him,' he is believed; for, had he wished to appropriate what was not his, he would not have called attention to the fact that the land had previously belonged to another."

Miggo is not, however, conclusive proof, but only evidence of probability. If two parties present their opposing statements to a judge who can not decide which is true, and if one party has a miggo, the fact that he did not plead other arguments which he might have alleged is allowed to decide the matter and results in a favorable judgment for him. The miggo is valid, therefore, only when it must be admitted that the party in question omitted the presentation of other pleas within his power in good faith and not for some ulterior reason. If, on the other hand, the latter motive is to be assumed, the miggo is absolutely invalid. An example may make this clearer. A entrusts B with a given object. If B asserts that the object so given him was destroyed through no fault of his, he is obliged to take the oath prescribed by the Bible, in spite of the fact that he has a miggo—namely, he might deny that A had given him the object in question. But in the case in question B did not avail himself of this plea, only because he did not have the audacity to deny a fact known to A and because he preferred to tell a falsehood which was not known by his opponents to be such (comp. Asheri to Shebu. 45a).

Limitations.

The miggo is, furthermore, subject to many limitations. Thus it is invalid when the better plea of the party in question is an unusual one, or one of an incriminating character, or one which is known only to lawyers. It is invalid also when the court recognizes the assertion made to be false (comp. Tos. B. B. 30a, *s.v.* לאו). Neither is the miggo valid when the assertion made is suspected to be based on error, although the defendant or the plaintiff believes he is speaking the truth. When, for example, a wife declares that her husband died in battle, she is not believed simply because she has a miggo—namely, she might have averred that he died elsewhere than in battle. The miggo can find no application here, because the woman's veracity has not been questioned, the point at issue being whether or not she was mistaken and thought that her husband died on the field, whereas he was only severely wounded (Yeb. 115a).

s. J. Z. L.

MIGRATION: Removal from one region to another. Ever since the Exile, Jews have been forced to wander from country to country, and a full history of their migrations would be almost identical with a complete history of that people.

In the first century the center of Jewish population, taking the whole spread of the Diaspora, was probably somewhere about Tarsus. In the twelfth century it had moved to the neighborhood of Troyes because of the migration of the Jews to Rome, to Spain, to Gaul, to England, and to Germany. By the middle of the sixteenth century, owing to the expulsion and migrations from western Europe, the center of Jewish population had moved over to Poland. It is impossible here to deal with these movements in detail, but the forcible migration of Jews to Babylonia in Bible times, whence they spread to Persia, and, it has been conjectured, even up to Caucasia, is a typical instance of such movements. Expulsion from England removed 16,000 Jews; that from Spain is reckoned to have spread more than 300,000 over the lands bordering the Mediterranean. The medieval history of the German Jews consists almost entirely of wholesale movements of communities from one town to another. Unfortunately in few of these instances are any numerical details available. It was only recently that new conditions enable some estimate to be made of the numbers of Jews forced through migration from their native countries.

In recent times a new kind of migration has taken place, due partly to economic causes and partly to persecution, which can be traced in some detail for the past quarter of a century. The chief countries from which emigration has taken place are Russia, Galicia, and Rumania; the chief countries of immigration, England and the United States. J.

From Russia.

The emigration of Jews from Russia increased remarkably in the seventies and became widespread in the eighties of the nineteenth century. That until then the emigration movement was but slight is evidenced by the fact that between the years 1821-70 only 7,550 Jewish emigrants from Russia and Russian Poland set out for the United States, at that time the most important objective point, and in the decade 1871-80 no less than 41,057 came from Russia alone.

The direct cause which led to the largely increased emigration may be found in the anti-Jewish riots which occurred in the early eighties. Maddened by fear after these riots, the Jewish population, including not a few professional men, formed regular emigrant companies. These removed to Germany, Austro-Hungary, England, France, the United States, and Palestine. There are no exact figures at hand to show the extent of that first emigration movement. The emigration from Russia to the United States, which amounted, on the average, to no more than 4,100 persons a year even in the decade 1871-80, reached in the decade 1881-90 an annual average of 20,700. The following table gives the number of Russian Jews who emigrated to the United States during the several years of this decade according to the figures of the United States Immigration Commission and of the United Hebrew Charities respectively:

Year.	From Russia.	From Other Countries.	Year.	From Russia.	From Other Countries.
1881..........	8,193	......	1886..........	17,309	29,658
1882..........	17,497	14,310	1887..........	28,944	27,468
1883..........	6,907	......	1888..........	31,256	31,363
1884..........	15,122	......	1889..........	31,889	23,962
1885..........	16,603	19,611	1890..........	33,147	34,303

However, while the riots of 1881 were the immediate cause of the increased emigration, the true cause was undoubtedly the very unfortunate economic condition of the Jewish population in Russia, and the riots merely supplied the stimulus. The pioneers were scarcely settled in their new homes when their friends and relatives followed them. The relations between the Pale of Settlement and the countries whither the emigrants moved became more intimate, and because of the more favorable economic conditions in these countries the emigration to them increased. The fluctuations in the separate years covering the period may be explained mainly by the fluctuations in the commercial prosperity of these lands.

The new and repressive measures inaugurated by the Russian government in the early nineties resulted in another increase of Jewish emigration. In 1891 and 1892 occurred the administrative expulsion of the Jews from Moscow and a similar expulsion from the villages and hamlets outside the Pale. It is estimated that there were expelled in this manner more than 400,000 persons. This mass of people rushed to the already overcrowded cities and towns of the Pale, and naturally enough could find no room there. As a result of this those who were expelled by the administration either emigrated themselves or crowded out others from the Pale, and the latter in their turn had to emigrate. The average number of Jewish immigrants to the United States, by far the greater part of whom were from Russia, was in the nineties more than double the number in the preceding decade. For the single years the immigration was as follows:

Year.	From Russia.	From Other Countries.	Year.	From Russia.	From Other Countries.
1891..........	42,145	69,139	1896..........	45,137	28,118
1892..........	76,417	60,325	1897..........	22,750	20,684
1893..........	35,626	32,943	1898..........	27,221	27,409
1894..........	36,725	22,108	1899..........	24,275	......
1895..........	33,232	32,077	1900..........	37,011	......

In Russia the emigration took place from every part of the Pale and from Poland, but the greater numbers came from the provinces which are nearest the boundary, such as Volhynia, Podolia, Kiev, Grodno, Kovno, Suwalki, etc.

Austria and Rumania.

Statistics of the emigration of Jews from Austria and Rumania are accessible for the decade 1890-1900. These are obtained by subtracting the Jewish population of the former date from that of the end of the century. The increase in the Jewish population of Austria during that period was 81,594, but the excess of births over deaths was 186,352, showing that 104,758 had migrated from Austria. The majority of these went from Galicia; and by the same process it is shown that 108,949 Jews left that province, some of them going to other parts of Austria ("Oesterreichische Statistik," lxvi., pp. xxxii.-xxxiii., Vienna, 1902).

If the same method be applied to Rumania, from data supplied by J. Jacobs in "The Jewish Chronicle," Aug. 21, 1885, and by W. Bambus in Bloch's "Oesterreichische Wochenschrift," 1902, p. 678, it would appear that between 1877 and 1894 the Jewish population increased 26,919, whereas the excess of births over deaths for that period ran to 69,193, showing that in those seventeen years 42,274 Rumanian Jews had emigrated. This number must have increased considerably in the last decade, during which persecution in Rumania has been more severe.

As regards the countries to which these emigrants from Russia, Galicia, and Rumania wend their way, it must be borne in mind that most of the Continental countries rigidly enforce the restrictions forbidding the Jews of eastern Europe to settle within their boundaries, yet, notwithstanding these restrictions, it has been reckoned that nearly 30,000 have settled in Germany since 1875 ("Ha-Maggid," 1903, No. 19). Nevertheless, there have been practically only two asylums for the Jews of the new Exodus, Great Britain and the United States, though numbers have gone to South Africa; but during the Boer war the emigration to South Africa stopped on account of the limitations prescribed by the Cape Parliament against immigration. It is still uncertain at the present time whether the new law will actually stop the migration of Jews to South Africa. A few of the emigrants have been transported by the Jewish Colonization Association to the Argentine Republic (see AGRICULTURAL COLONIES).

England and United States.

So far as immigration to England is concerned there is difficulty in ascertaining the number, as no statistics of religion are taken there. A conservative estimate ("Jewish Chronicle," Feb. 7, 1902) reckoned the number of alien Jews in London as 55,000, five-sevenths of whom were Russian Poles. The total Jewish immigration during the past twenty years has probably not exceeded 100,000 for all the British Isles, of which 80,000 came directly from Russia.

For the United States fuller details can be given, as records have been kept at the chief ports of entry—New York, Philadelphia, and Baltimore—since the great exodus in 1881. Between that year and 1884 74,310 Jews were recorded as reaching the United States, though details no longer exist as to their provenience. From 1884 to October, 1903, the United Hebrew Charities recorded the nationalities of all Jewish immigrants landing at Castle Garden and Ellis Island, and furnish the following figures:

Nationality.	Total.	Percentage.	Nationality.	Total.	Percentage.
Russians	406,657	65.36	Dutch	524	.08
Austrians	158,609	25.49	Swedes	380	.06
Rumanians	36,099	5.80	French	354	.05
Germans	15,469	2.48	Danes	225	.04
English	2,273	.36			
Turks	1,534	.24	Total	622,124	

Besides these, up to 1903 there have come in at Philadelphia 50,264 and at Baltimore 28,487, making a grand total of 775,181 of Jewish immigrants actually counted since 1881, of whom it may be conjectured more than 500,000 were Russians, 180,000 were Austrians, and 50,000 were Rumanians.

Altogether during the quarter of a century from 1881 to 1904 there has probably been a migration of Jews numbering close on a million souls, of whom, so far as the imperfections of the records enable one to estimate, about 850,000 have gone to America, 100,000 to England, 30,000 to Germany, and 20,000 have been scattered throughout the rest of Europe. Of these 200,000 came from Galicia, 100,000 from Rumania, and the remaining 700,000 from Russia. Apart from these great streams of migration there is a natural ebb and flood of young men seeking their fortunes in most of the European communities and almost all quarters of the globe. Their numbers are somewhat larger in proportion than those of the rest of the population, owing to their international relationships; but in the more settled communities like those of Holland, France, England, and the United States, where there is no active persecution, there is little tendency toward emigration.

Among the results of migration of which notice will have to be taken in all statistical inquiries are the ages and sexes of the migrants. It has been reckoned that whereas in Russia persons between the ages of 14 and 45 form 45 per cent of the Jewish population, they constitute 70 per cent of those who migrate to America. So, too, while there are 95 Jews to 100 Jewesses in Russia, there are said to be 134 Jews as against 100 Jewesses among those emigrating ("Ha-Ẓefirah," 1903, No. 62). This is confirmed by the records of the United Hebrew Charities in New York, between 1884 and 1902, which show that the immigrants consisted of 222,202 males, 155,000 females, and 197,351 children.

This tends to make the death-rate of any population consisting of Russian Jewish refugees very low, owing to the fact that so many of them are of the ages between 14 and 45, and at the same time renders the marriage-rate very high, as so many of the Jewish immigrants are between 20 and 30, the favorite age for marriage; but it must be borne in mind that there are three men to two women in the stream of migration.

S. J.

MIGUES, JOÃO. See NASI, JOSEPH (JOÃO MIGUES).

MIHAILENI: Small town in the district of Dorogoi, Rumania. It was formerly called Vladeni and Tirgu-Nou, and was founded in 1792 by a number of Jews under an agreement with the proprietor of the domain. This agreement was confirmed by a decree of Prince Alexander Constantine Moruzi, dated May 30 of the same year. Besides certain personal advantages, the founders obtained the right to use gratuitously the grounds necessary for a synagogue, a bath, and a cemetery.

When the town came into the possession of Prince Michel Sturza in 1835, he made it the capital of the district of Dorogoi. Actuated by a desire to change the terms of the original agreement, he persecuted the inhabitants, especially the Jews, cruelly beating one of their leading men and imprisoning his son. Later, however, a law was enacted under which all artisans who should settle in the city were to be exempt for five years from the payment of rent for property held by emphyteusis.

The law of 1838, framed by a commission which included seven representatives of the Jewish community, provided that the large synagogue and two small ones, an oratory, and the bath should be exempt from rent. Because of such measures the Jewish population gradually increased. The number of Jewish taxpayers increased from 60 in 1803 to 129 in 1820; the census of 1831 reported 747 Jews and 72 Christians; and that of 1859 showed 2,472

Jews and 1,812 Christians. The Jewish population reached its maximum in 1886, when there were 2,855 Jews as compared with 1,075 Christians. The city was, however, neglected by the authorities, and began to decline. In spite of an excess of births and the fact that many Jews expelled from neighboring villages took refuge in Mihaileni, the number of Jews continued to diminish. According to the census of 1899 there were only 2,446 Jews in Mihaileni; and this number has decreased considerably on account of emigration since 1900.

The income of the Jewish community, which amounts to 18,000 francs annually, is derived from a tax on meat, poultry, unleavened bread, and from certain other fees, including those from the bath. The Jews support a rabbi and four shoḥeṭim. The Talmud Torah of former years has been transformed into a modern school; but ten ḥadarim have been closed. In addition to the large synagogue, built when the city was founded, there are eleven small synagogues or oratories, and the community possesses also a benevolent association and a Zionist society.

E. Sd.

MI-KAMOKAH ("Who is like unto Thee?"): Opening words of the verse Ex. xv. 11, which, with verse 18 of the same chapter ("Adonai Yimlok," etc.), is regularly employed as a response in the evening and morning services between the Shema' and the Shemoneh 'Esreh. Normally, as on week-days and ordinary Sabbaths, these verses are chanted to the melody-type in the free employment of which the particular service is intoned (comp. Ḥazzanut). In one case, indeed, the setting of "Mi-Kamokah" may have itself determined the intonation of the whole of the service in which it finds a place. This is the evening service of the Days of Penitence (New-Year to Day of Atonement), the traditional intonation of which is much later in style than that of any of the other services of the northern Jews. It differs from them very notably in its tonality also, which is that of the ordinary modern major mode, while the other services utilize scale-forms, surviving only in the early medieval plain-song of the Church, or in the folk-song of eastern Europe. This penitential setting is accordingly designated when "Mi-Kamokah" is itself quoted as an ancient melody; and it is given in the accompanying transcription.

To the use of "Mi-Kamokah" as a response is due also the introduction of the more recent custom into the northern liturgies according to which certain melodies, usually of post-medieval adoption, sung in the synagogue or in the home on special occasions, have come to be utilized as representative themes, and chanted as such not only with "Mi-Kamokah" and the opening verses of Ps. cxviii. (see Hallel), but also with other passages utilized on previous days as anticipatory references to the occasion. As an example may be cited the practise customary on the last Sabbath in the month, when the day of the ensuing new moon is announced to the melody representative of any festival or fast which may occur in the approaching month.

The first such melody utilized as a representative theme was probably that of Ma'oz Ẓur, the domestic hymn on the festival commemorating the triumph of the Maccabees, whose name, it was traditionally held, was itself compounded of the initial letters of the response "Mi-Kamokah ba-elim Adonai"; so that the introducer of the custom saw an eponymous connection between the text of the response and the melody.

According to recent practise, "Mi-Kamokah" and the accompanying passages are chanted on special occasions to the following melodies, considered as representative of the respective occasions, viz.:

Festivals (including intermediate Sabbaths):

Passover......Addir Hu.
Pentecost.....Aḳdamut or else Yeẓib Pitgam.
Tabernacles..."Lulab" chant (see Hallel).

Feast of Dedication (Ḥanukkah)....	Ma'oz Ẓur.
Sabbaths in the 'Omer weeks..	Lekah Dodi of same.
Sabbaths between the fasts of Tammuz and Ab.....	'Eli Ẓiyyon.
At a circumcision..	A melody specially introduced by the mohel into the morning service at references to "the covenant."

MIḲMAṢ, DAVID IBN MERWAN. See David ibn Merwan al-Muḳammaṣ.

MIḲWA'OT ("Baths"; called **Mikwot** by the Geonim, in the "'Aruk," and in the Mishnah, ed. Lowe): Treatise in the Mishnah and the Tosefta in the order Ṭohorot. The legal code of the Pentateuch prescribes a bath for lepers (Lev. xiv. 9) and for persons suffering from certain other diseases (*ib.* xv.). The bath, according to the rabbinical interpretation of Lev. xiv. 9, must hold at least forty seahs (= 268.29 liters), and must be of such a size that the person who is to be cleansed may immerse his whole body (Ḥag. 11a). The water may be from a spring or a river, or it may be rain-water, but it must not be drawn. The treatise Miḳwa'ot deals with a more exact definition of the rules upon these subjects. In most of the editions of the Mishnah as well as in the Tosefta this treatise is the sixth in the order Ṭohorot; but in the edition of the Babylonian Talmud it is the seventh, and in the editions of the Mishnah of 1559 and 1606 it stands first in this order. It is divided into ten chapters, containing seventy-one paragraphs in all.

Kind of Water.

Ch. i.: There are six grades of bodies of water so far as cleansing and purification are concerned. The lowest in value is water from a pond, ditch, cistern, or cavern, as well as standing water which has flowed from a mountain. These waters, under certain circumstances, cause uncleanness, but they may, nevertheless, be lawfully used for washing the hands and also for making dough (§§ 1-5). Water still flowing from a mountain is a grade higher, for it can never become unclean; and it may therefore be used in preparing the priestly heave-offering of dough (§ 6). Next in ascending order is a body of water which contains forty seahs, and is therefore suitable for ritual baths and for the purification of vessels. Still higher in grade is a spring to which other water drawn from some source is added, and which in certain respects resembles a body of water and in others a spring (§ 7). A yet higher grade of water is that from a mineral spring, which cleanses even while flowing; and the highest of all is pure spring-water, which may also be used for the ritual sprinkling (§ 8; comp. Lev. xiv. 5-6; Num. xix. 17).

Impurities.

Ch. ii.: When one has bathed and is uncertain whether he has performed the ceremony correctly, or when he is in doubt as to the size of the miḳweh, or when, on being measured, the bath is found to be of insufficient size, the person bathing is not considered clean (§§ 1-2). When drawn water renders the miḳweh unclean, even though it is doubtful whether it fell into the bath (§ 3). Three logs of water drawn intentionally render the miḳweh unfit, but if unintentionally drawn they do not have this effect, even though such water has been preserved in a vessel (§§ 4-9). Regulations concerning a miḳweh of water and clay, and the degree of fluidity of the clay which requires that the latter be taken into account (§ 10).

Ch. iii.: Additional regulations concerning drawn water. How a miḳweh made unfit by drawn water may be rendered fit again (§§ 1-2). The method of reckoning drawn water derived from several vessels, and other methods of reckoning considered in connection therewith (§§ 3-4).

Ch. iv.: How rain-water may be led into a miḳweh and not be considered drawn water (§§ 1-3). On the mixing of rain-water and drawn water before they reach the miḳweh (§ 4). Cases in which a conduit of stone is considered a vessel, so that the water in it is regarded as drawn water. Of the conduit of Jehu at Jerusalem (§ 5).

Flowing Water.

Ch. v.: Cases in which a spring resembles a miḳweh, its water having cleansing properties when collected in a pool ("ashboran"), but not while it flows (§§ 1-3). Whether the sea may be considered a miḳweh and whether, even while flowing, it cleanses (§ 4). Flowing or dripping water, and what objects may be used to stop the flow (§ 5). Regarding a wave of the sea which contains forty seahs, and other bodies of water (§ 6).

Ch. vi.: Of holes and rifts connected with a miḳweh (§ 1). Of dipping several objects at once (§ 2). Of reservoirs lying near one another (§ 3). Cases in which drawn water does not make the miḳweh unfit (§ 4). Of large vessels standing in the miḳweh or in the sea (§§ 5-6). Of the connection of miḳwa'ot with each other (§§ 7-9). Of pipes fixed in bath-houses (§§ 10-11).

Ch. vii.: Things which may make up the measure of forty seahs, such as ice, snow, and hail, and things which may not, although they do not make the miḳweh unfit (§§ 1-2). Cases in which the miḳweh becomes unfit through a change of color in the water (§§ 3-5). Of bathing in a miḳweh which contains exactly forty seahs (§§ 6-7).

Ch. viii.: The baths in the land of Israel, even in its heathen cities, are clean and fit for use; but the heathen baths in other lands are to be considered clean only in one respect (§ 1). The bathing of those who have certain diseases, and how such persons are to bathe (§§ 2-5).

Use of Miḳweh.

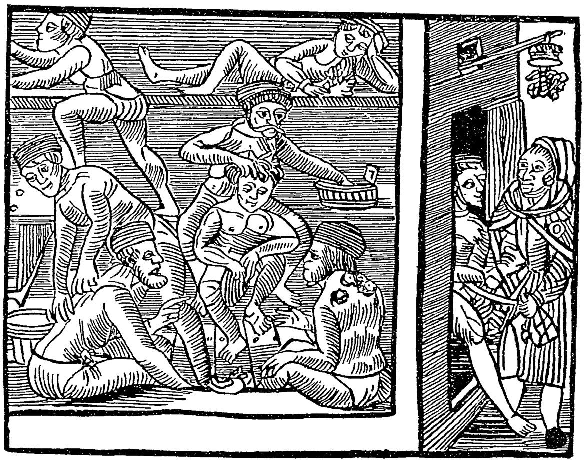
Ch. ix.: Enumeration of things which, if they touch the bather, render the bath ineffectual (§§ 1-4). Things which have a similar effect with regard to the bath in case they come in contact with objects dipped in the water (§§ 5-6).

Ch. x.: Detailed regulations concerning the dipping of objects which are to be cleansed (§§ 1-5; comp. Num. xxxi. 23). Regarding the purification of water by contact ("hashakah") with the water of the bath (§ 6). Of unclean foods and drinks which defile and of the method of reckoning them (§§ 7-8).

In the Tosefta the treatise Miḳwa'ot is divided into seven chapters. Especially interesting in the Tosefta are the discussions between R. Ṭarfon and R. Akiba concerning the bath of Jabneh. Noteworthy also is the discussion between Jose the Galilean and Akiba in which R. Ṭarfon expressed his respect for Jose (viii. 11).

S. J. Z. L.

MIḲWEH (rabbinic Hebrew, **miḳwah;** plural, **miḳwa'ot**): Literally, a "collection," a "collected mass," especially of water (Gen. i. 10; Ex. vii. 19; Lev. xi. 36; comp. Isa. xxii. 11). Because of the use made of this word in connection with ritual purification (Lev. xi. 36), it has become the term commonly used to designate the ritual bath. In all cases of ritual impurity it was necessary for the person or object to be immersed in a bath built in accordance with the rules laid down by the Rabbis (see Ablution; Baths; Purity). Since the Dispersion the custom of observing the laws of purity has on the whole fallen into desuetude, except in the case of the impure woman (see Niddah). With regard to her the laws are still observed in most Orthodox communities, and therefore the ritual miḳweh is still a necessary institution there. Some observant Jews, especially among the Ḥasidim, immerse themselves in the miḳweh in cases also of impurity other than niddah.



Jewish Bath of the Sixteenth Century.
(From Philipp von Allendorf, "Der Juden Badstub," 1535.)

Size and Contents.

In order to be ritually fit for use, the miḳweh must contain sufficient water to cover entirely the body of a man of average size. The Rabbis estimated that the miḳweh should be 3 cubits long, 1 cubit wide, and 1 cubit deep (= 44,118.375 widths of the thumb; Shulḥan 'Aruk, Yoreh De'ah, 201, 1), containing 40 se'ahs of water ('Er. 4b; Yoma 31a; *et al.*; comp. Pes. R. 82b). The se'ah is described as a measure holding 144 eggs (Num. R. xviii. 17), *i.e.*, 24 logs (= 24 pints = 3 gallons approximately; see Weights and Measures), so that the miḳweh must contain at least 120 gallons of water.

The water of the miḳweh must come from a natural spring or from a river that has its source in a natural spring (Sifra to Lev. xi. 36). A tank filled by the rain may be used as a miḳweh, although some authorities forbid the use of a pool which is full of water in the rainy season and dried up in the summer (Maimonides, "Yad," Miḳwa'ot, iii. 1-3; Yoreh De'ah, 201, 2, Isserles' gloss). A miḳweh derived from snow, ice, or hail is regarded by the authorities as ritually fit for use, although there is a difference of opinion with regard to the manner of melting the snow (Miḳ. vii. 1; Yoreh De'ah, 201, 30; comp. SHaK and "Pitḥe Teshubah," *ad loc.*; see also "Ḥatam Sofer" on Yoreh De'ah, 200, 213).

The water contained in the miḳweh must not have passed through a vessel of such a form that it can hold objects placed in it. Pipes open on both sides are not regarded as vessels in the accepted meaning (Miḳ. iv. 1; "Yad," *l.c.* vi. 1, 2). In large cities, where the water-supply comes through underground pipes and where water is measured by meters, many points involving legal technicalities must be observed in the construction of a miḳweh. In order to observe these the following is the process followed by some rabbis in the building of a miḳweh in a large city: A small miḳweh, with a capacity of 40 se'ahs, is built near a large tank, and a conduit is made from the smaller tank that leads to an opening in the larger. The small tank or miḳweh is first filled with snow or ice; when the snow or ice fills it to the brim the aperture leading into the large tank is opened, and water is poured over the ice or snow and passes into the large tank. Thus the original miḳweh is made from snow or ice, about the ritual fitness of which there is no doubt, and then as much water is added as is needed (Yoreh De'ah, 201, 36; "Resp. Rosh," 30, 31; Caro, "Abḳat Rokel," pp. 50, 51, 56; "Noda' bi-Yehudah," 2d series, Yoreh De'ah, 136, 137; "Ḥatam Sofer," *ib.* 198, 199, 203, 204, 206; Berlin, "Meshib Dabar," ii. 38).

If three logs (= pints) of water be poured into a miḳweh which does not have the prescribed measure of water, the miḳweh becomes unfit for ritual use, even though the 40 se'ahs are later completed in a legitimate manner. In such a case, the miḳweh has to be emptied and then refilled in the prescribed way. If, however, the miḳweh has the required measure, water from other sources may be poured into it without impairing its ritual fitness (Miḳ. iii.; "Yad," *l.c.* v.; Yoreh De'ah, 201, 15 *et seq.*).

The ritual bath always formed one of the most important institutions of a Jewish community (see Abrahams, "Jewish Life in the Middle Ages," p. 73). In urgent cases it was permitted even to sell a synagogue in order to erect a miḳweh (Berlin, "Meshib Dabar," ii. 45).

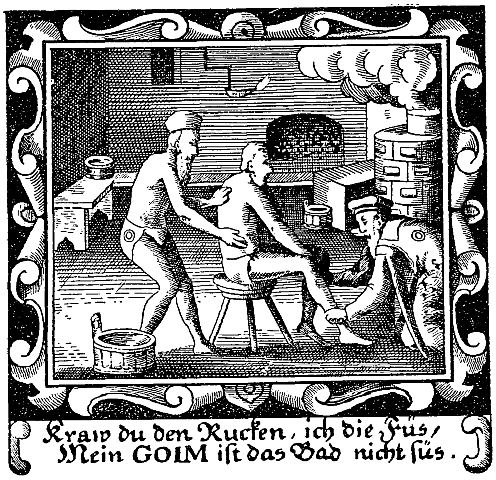
MILAN (Latin, **Mediolanum**): Capital of Lombardy, and the largest commercial city of Italy. Jews settled there under Roman rule and were persecuted even in the early Christian period. Ambrose, the patron saint of the city, was their inveterate enemy, and hoped to become a martyr by the destruction of a synagogue. In 388, when the emperor Theodosius commanded a bishop to rebuild a synagogue which he had bidden some monks to destroy, Ambrose called Theodosius a Jew, and attacked him so bitterly that he countermanded his order. An inscription commemorates his hatred of the Jews (Giulini, "Memorie Spettanti alla Storia di Milano," vi. 162). The records of the following centuries mention Jews in Lombardy as large landowners. At Milan, in the tenth century, there was a mint-master named Gideon who was probably a Jew. During the period of the great wars and the rapid rise of the Italian cities the Jews seem to have been excluded therefrom, yet commerce and banking, which were in the hands of Jews in other countries, were so skilfully carried on by the Lombards that all competition seemed undesirable, especially when complicated by religious antipathies. During the great persecution of heretics in 1320 the podestà was obliged to promise to expel all Jews, and not to readmit any to the city or to the bishopric in opposition to the wishes of the archbishop, nor were they allowed to return to the territory of Milan before the fifteenth century. On Jan. 23, 1452, in consideration of the payment of a large sum of money, the Jews of Milan received from the pope, through the intercession of the duke, permission to build synagogues, to celebrate their feasts, and to intermarry, yet the granting of these privileges was excused in ambiguous phrases, and the Jews were compelled to wear the yellow badge.



Kraw du den Rucken, ich die Füs/
Mein GOIM iſt das Bad nicht ſüs.

Jewish Bath of the Sixteenth Century.

(From a contemporary print.)

Expelled in 1320.

The holocaust of the Jews at Trent in 1475 aroused hatred against their coreligionists in the territory of Milan, and this was fanned by the speeches of Bernardinus of Feltre. Although the dukes tried to protect the Jews, the latter seem to have been expelled from the city, so that the confirmation of the privileges granted by Pope Paul III. in 1541, the search of the Inquisition for interdicted Hebrew books in 1554 and 1566, as well as the repeated decrees of expulsion issued by Philip II. and Philip III., applied only to the communities in other cities of the dukedom, Alessandria and Cremona being the most important of these. Then no Jews were living at Milan, although some did reside in the neighboring cities of Padua and Lodi.

When Milan came under Austrian rule in 1714 Jews seem to have settled there again. They were subject to the same laws as their coreligionists in Mantua.

Under Austrian Rule.

The interdiction against the forcible baptism of Jewish children, issued in 1765 and 1768, and still extant, was renewed by the Austrian laws of 1803 and 1817. The remarkable growth of Milan after 1848 brought many Jews to the city, especially from Piedmont, Mantua, and the Papal States, and the community, which had formerly belonged to Mantua, became autonomous. In 1857 it numbered 500 persons, and in 1901 about 2,000, to whom may be added many Jews who are not publicly known as such.

The following persons may be mentioned among the prominent Jews of Milan: Joachim Basevi (an eminent lawyer, counsel for Andreas Hofer), and the senators Tullo Massarani and Graziadio Ascoli. Of the rabbis the most prominent have been Moses Menahem Coen (Rapoport), who took part in the dispute regarding the miḳweh at Rovigo, and, in the nineteenth century, Mosè Mazliaḥ Ariani and Alessandro da Fano.

G. I. E.

MILCAH (מלכה): **1.** Daughter of Haran, and wife of her uncle Nahor (Gen. xi. 29). She bore eight sons, the youngest of whom was Bethuel, father of Rebekah (*ib.* xxii. 21–23). Ibn Ezra commentary on Gen. xi. 29) thinks that Haran, Milcah's father, was a different person from Haran, Abraham's brother, and consequently that Milcah's husband was not her uncle. **2.** Fourth daughter of Zelophehad (Num. xxvi. 33).

MILCOM. See Moloch.

MILES OF MARSEILLES, or **SAMUEL BEN JUDAH BEN MESHULLAM** (surnamed **Barbaveira**): Provençal physician and philosopher; born at Marseilles 1294. In some manuscripts he is designated by the name "Bongodos," the Provençal equivalent of "Ben Judah." From early youth he devoted himself to the study of science and philosophy. While still young he left his native place for Salon, where he studied astronomy under the direction of Abba Mari Senior Astruc de Noves. In 1322 he is met with at Beaucaire as a prisoner together with other Jews in the tower of Rodorte. Later he sojourned successively at Murcia, Tarascon, Aix, and Montélimar.

Miles became known through his Hebrew translations from the Arabic of scientific and philosophical works. These include: (1) "Ha-She'elot ha-Dibriyyot meha-Derushim Asher le-Filusufim," translation of questions or dissertations concerning some obscure points in the commentary of Averroes on certain parts of the "Organon," finished May 8, 1320; (2) translation of the Middle Commentary of Averroes on Aristotle's "Ethics," completed at Beaucaire Feb. 9, 1321; (3) translation of the commentary of Averroes on Plato's "Republic," finished Sept. 3, 1321, at Beaucaire, in the tower of Rodorte; (4) translation of the compendium made by Averroes of Aristotle's "Organon," completed at Tarascon Dec. 13, 1329; (5) translation of the text of the figures 30 and 31 of the treatise of Euclid on the five bodies (in completion of the translation of Kalonymus, where these figures are wanting), finished Aug. 23, 1335; (6) commentary on the "Almagest," parts i.-iii.; (7) translation of a compendium of the "Almagest" by Abu Mohammed Jabar ibn Aflaḥ, translated from the Arabic into Hebrew by Jacob ben Machir and corrected by Miles, finished Dec. 17, 1335, at Aix; (8) "Ma'amar Alexander ha-Firdusi," treatise of Alexander of Aphrodisias on the soul, translated from the Greek into Arabic by Isḥaḳ ibn Ḥunain, finished July 4, 1340, at Montélimar; (9) translation of the astronomical works of the vizier Abu Abdallah Mohammed ibn Mu'adh of Seville, in two parts: (1) treatise in seven chapters on the eclipse of the sun July 3, 1079; (2) "Iggeret be-'Ammud ha-Shaḥar," treatise on the aurora; (10) "Ma'amar be-Tenu'at ha-Kokabim ha-Ḳayyamim," treatise on the movement of the fixed stars by Abu Isḥaḳ al-Zarkala.

MILHAU, JOSEPH BEN MOSES (called also **Joseph Moscat**): French scholar and liturgical poet; lived at Carpentras in the second half of the eighteenth century. He was the author of a work entitled "Oẓerot Yosef" (Leghorn, 1783), a commentary on Rashi's and Elijah Mizraḥi's commentaries on the Pentateuch, and of a poem recited at Avignon at the circumcision ceremony. Zunz ("Z. G." p. 470) says that "Joseph of Milhau of the eighteenth century" composed several liturgical poems; and, indeed, the Maḥzor of Avignon contains other pieces of his. But in Jost's "Annalen," i. 341, Zunz attributes those poems to the Joseph of Milhau who in 1751 was a member of the rabbinical college and who was apparently another person than the subject of this article.

Bibliography: Gross, *Gallia Judaica*, p. 345; Steinschneider, *Cat. Bodl.* col. 1513; Zunz, in *Allg. Zeit. des Jud.* iii. 682.

S. M. Sel.

MILHAU, MOSES BEN MICHAEL: French scholar and poet; lived at Carpentras in the second half of the eighteenth century. Moses Milhau seems to have been the father of Joseph b. Moses Milhau, as may be concluded from the genealogy given by the latter in his work. Milhau was the author of: "Mishpaṭ Emet," a philosophical essay on Job, a kind of theodicy; "Matteh Mosheh," a rimed paraphrase of Ruth, with philosophical reflections; and "Iggeret ha-Neḥamah," a rimed work purposing to console the reader in his sadness; all three works being published at Leghorn in 1787. A poem entitled "Mizmor Shir le-Napoleon" (Paris, 1806) was composed in honor of Napoleon I. by a Moses Milhau, who is identified by Zedner ("Cat. Hebr. Books Brit. Mus." p. 544) with the subject of this article; but if the latter was the father of Joseph of Milhau, it is not likely that he was still living in the beginning of the nineteenth century.

Bibliography: Fürst, *Bibl. Jud.* ii. 378; Gross, *Gallia Judaica*, p. 345.

MILHAUD (Latin, Amiliavum; Hebrew, אמיילב, מילייאב): Village in the department of Gard, France. In Renan-Neubauer, "Les Rabbins Français," p. 665, its name is given as אאלב. It has been erroneously confounded with Millau (the ancient Æmilianum or Amilbanum) in the department of Aveyron, where there probably never was a Jewish community. There are no documents to indicate the status of the Jewish community of Milhaud in the Middle Ages. Whatever it may have been, the Jews established there were expelled in 1306. They sought refuge in the Comtat-Venaissin, chiefly at Carpentras, where many of their descendants were living in the sixteenth, seventeenth, and eighteenth centuries. The name "Milhaud," "Milhau," or "Milliaud" is still a common one among the Jews of southern France.

The scholars of Milhaud include: Don Dieulosal; Abraham ben Reuben ben Joseph ben Joshua Amilabi (14th cent.); Moses מולאבי; Gabriel המילייאבי, translator and commentator of the medical work "Tabula Super Vita Brevis," by Arnauld de Villeneuve; Maestre Bonenfant or Hezekiah of Milhaud, author of the medical work "Gabriel" (16th cent.); Immanuel ben Gad; Joseph of Milhau, member of the rabbinical college of Carpentras; David of Milhau; Moses ben Michael; and Joseph of Milhau (called also "Joseph Muscat"), author of a commentary on Rashi entitled "Oẓerot Yosef" (18th cent.).

J.* ix. 216, xii. 197-220; Gross, *Gallia Judaica*, pp. 343-346; Renan-Neubauer, *Les Ecrivains Juifs Français*, pp. 577, 762.

G. S. K.

MILK (Hebrew, "ḥalab"; Aramaic, "ḥelba"): A common article of food among the ancient Hebrews.—**Biblical Data:** Palestine is praised in the Bible as a "land flowing with milk and honey" (Ex. iii. 8 *et al.*), milk representing the common necessities of life, and honey referring to luxuries. In Isa. lv. 1, milk is coupled with wine to denote a similar idea (comp. Ezek. xxv. 4). The Israelites used the milk of goats (Deut. xxxii. 14) and the milk of sheep (Prov. xxvii. 27). Cows' milk is rarely mentioned (comp. Deut. *l.c.*), probably because of its scarcity owing to the unsuitability of the mountainous country of Palestine for pasturing large cattle. Milk was received in buckets (Job xxi. 24) and kept in skins (Judges iv. 19), and was used as a refreshing drink at meals (Gen. xviii. 8).

Milk was supposed to give whiteness to the teeth (*ib.* xlix. 12), and was employed as a simile for the whiteness of the human body (Lam. iv. 7; comp. Cant. v. 12). Deborah refers to milk ("ḥem'ah" in parallelism to "ḥalab") as "a cup of the nobles"

(Judges v. 25); and in several other texts it is spoken of as one of the most delicious beverages (comp. Cant. iv. 11, v. 1). Ben Sira counts milk among "the principal things for the whole use of man's life" (Ecclus. [Sirach] xxxix. 26). The abundance which the Israelites will enjoy in Messianic times is pictured in the figure that the hills of Palestine will flow with milk (Joel iv. [A. V. iii.] 18; comp. Isa. vii. 22). Cream or butter ("ḥem'ah") is also used as a figure denoting abundance (Isa. *l.c.*; Job xx. 17), and is frequently mentioned with milk (Gen. xviii. 8; Deut. xxxii. 14; Judges v. 25; Prov. xxx. 33; *et al.*). See CHEESE; FOOD.

S. J. H. G.

——**In Rabbinical Literature**: Although regarded as a pleasant beverage (Ket. 111a; "Agadat Shir ha-Shirim," ed. Schechter, p. 187, note, Cambridge, 1896), milk was probably used more by the poorer classes of the community than by the rich (Ḥul. 84a; Yalḳ., Prov. 961). It was especially used as food for infants (Seder Eliyahu Zuṭa, ed. Friedmann, p. 195, Vienna, 1903; comp. Heb. v. 12; I Cor. iii. 2; I Peter ii. 2). A mixture of milk and honey was regarded as a delicious drink (Cant. R. iv. 22). One is counseled against drinking beer or wine after milk (M. Ḳ. 11a). In a figurative sense milk was used to denote whiteness and purity (Gen. R. xcviii. 15; Cant. R. v. 10). One who wishes his daughter to be fair should feed her in her youth on young birds and on milk (Ket. 59b). Milk is one of the five things (three, in Yalḳ., Isa. 480) to which the Torah was compared (Deut. R. vii. 3; comp. Ḳimḥi's commentary on Isa. lv. 1). On this account some maintain that the custom arose of eating food prepared with milk on the festival of Shabu'ot ("Kol Bo," 52; comp. Shulḥan 'Aruk, Oraḥ Ḥayyim, 494, 3, Isserles' gloss; see SHABU'OT). He who devotes himself to the study of the Law will be greeted in the future world with sixty cups of milk, besides many other delicious beverages ("Agadat Shir ha-Shirim," p. 84, note).

Halakah.

The permission to drink milk was regarded by the Rabbis as an exception ("ḥiddush"), since it was held that the milk of mammals is derived from decomposed blood (Nid. 9a), and is furthermore something separated from a living animal and therefore to be included in the general prohibition against eating anything that comes from the living ("dabar min ha-ḥai"; Bek. 6b). The milk of an unclean animal is forbidden in accordance with the general rule, "that which comes from the unclean is unclean; from the clean, clean" (*ib.* 5b; comp. Gen. xxxii. 16). It is forbidden also to use the milk of an animal suffering from a visible malady which causes the animal to be ritually unfit for food ("ṭerefah"), or that of an animal found, after the ritual slaughtering, to have suffered from such a disease as late as three days before its death (Ḥul. 112b; comp. *ib.* 11a, Tos., *s.v.* "Atya"; Maimonides, "Yad," Ma'akalot Asurot, iii. 16; Shulḥan 'Aruk, Yoreh De'ah, 81).

Milk bought from a non-Jew is forbidden, the apprehension being that the non-Jew in his carelessness or from a desire to improve it may have mixed with it some forbidden ingredient. If, however, a Jew has been present at the milking, the milk may be used. Different customs prevail with regard to the use of butter bought from a non-Jew; and even with regard to milk and cheese later authorities are more lenient ('Ab. Zarah 29b, 35b; "Yad," *l.c.* iii. 12-17; Yoreh De'ah, 115; see CHEESE). The process of curdling milk was effected in Talmudic times either by rennet ("ḳebah," 'Ab. Zarah, *l.c.*) or by the juice of leaves or roots ('Orlah i. 7).

Milk is one of the three beverages which, if left uncovered overnight, should not be used, because it is possible that a serpent may have left its venom therein. In places where serpents are not found, this apprehension does not exist (Ter. viii. 4, 5; Yalḳ., Judges, 45; "Yad," Roẓeaḥ, xi. 7; Yoreh De'ah, 116, 1; comp. "Pitḥe Teshubah," *ad loc.*). Milk is also one of the seven beverages that make articles of food liable to receive impurity (Maksh. vi. 4; see PURITY).

Milk and Meat.

The Rabbis did not hesitate to admit their inability to assign a reason for the prohibition against eating meat with milk ("basar be-ḥalab"), and they accordingly labeled it as "ḥiddush," an exception, a unique law (Pes. 44b; Ḥul. 108a; comp. Rashi and Tos. *ad loc.*). Maimonides says in this connection: "Meat boiled with milk is undoubtedly gross food, and makes overfull. But I think that it was probably prohibited because it was somehow connected with idolatry, forming perhaps part of the services at a heathen festival." This latter theory he supports by the fact that in Exodus the prohibition against seething a kid in its mother's milk is mentioned twice in connection with the festivals ("Moreh," iii. 48).

Basing their opinions on an ancient tradition, the Rabbis explained the thrice-repeated prohibition against seething the kid in its mother's milk (Ex. xxiii. 19, xxxiv. 26; Deut. xiv. 21) as referring to three distinct prohibitions—(1) against cooking meat and milk together; (2) against eating such a mixture; and (3) against deriving any benefit from such a mixture (Ḥul. 115b; comp. there the various attempts made to find Biblical support for the prohibition against eating meat with milk). It is curious to note in this connection that Onḳelos, a most literal translator, renders the passages in all the three places by "ye shall not eat meat with milk" (לא תיכלון בשר בחלב; comp. LXX. to Ex. xxxiv. 26). The expression "kid" was accepted to be a generic term including all mammals and, according to some, even birds (Ḥul. 113a). The prevalent opinion, however, is that the prohibition against eating poultry with milk is of rabbinic origin merely (Maimonides, "Yad," Ma'akalot Asurot, ix. 4; Shulḥan 'Aruk, Yoreh De'ah, 87, 3). Fish and locusts as well as eggs are excluded from the prohibition (Ḥul. 103b, 104a; Beẓah 6b).

The prohibition against eating meat with milk was extensively elaborated by the Rabbis, who provided for every possible occurrence. Not only was the eating of meat with milk forbidden, but also the eating of meat that had a taste of milk, or vice versa; for "the taste of forbidden food is forbidden as the food itself" (טעם כעיקר; Ḥul. 98b, 108a; Pes. 44b; 'Ab. Zarah 67b; *et al.*). If a piece of meat that had become forbidden as food because it had absorbed milk to an extent which made the taste of the latter appreciable in it was cooked with other meat in a pot, all that the pot contained was forbidden, unless the contents were sixty times as great as the prohibited piece. It was not sufficient that there should be in the pot sixty times as much meat as the quantity of milk absorbed in the piece of meat; for with regard to meat and milk the principle was that the forbidden piece became in itself a "carcass," *i.e.*, a forbidden object; and when it could not be recognized, it was necessary that the taste of it should be annihilated (חתיכה נעשית נבילה; Yoreh De'ah, 92, 4; comp. Isserles' gloss, where the principle is extended to all kinds of forbidden food).

Cooking-Vessels.

A pot in which meat has been cooked should not be used for cooking milk, and vice versa. If such a pot be so used within twenty-four hours after it has been used with milk or meat respectively, everything that is in it becomes ritually unfit, unless the contents of the pot are sixty times as much as the pot itself. If the second cooking takes place twenty-four hours or more after the first, the contents of the pot are permitted for use; for the food which the pot has absorbed in the first cooking has by that time lost its agreeable taste, and the general rule is that any vessel which communicates an offensive taste (נותן טעם לפגם) does not render food ritually unfit for use. The pot itself, however, should not be used either with meat or with milk (Yoreh De'ah, 93, 1; comp. SHaK *ad loc.*).

Food prepared with milk and food in which meat is an ingredient should not be eaten at the same meal. The general custom is to wait six hours between a meal at which meat has been eaten and one at which food prepared with milk is to be eaten, although custom varies in this particular, some persons waiting one hour only. There is no need to wait at all after eating food prepared with milk; it is necessary only to see that there is none of the food left on the hands, and also to wash the mouth before partaking of meat. It is forbidden to place meat upon the table at the same time with food prepared with milk, lest by mistake both be eaten together. In the households of observing Jews not only are there two separate sets of dishes and of kitchen utensils, but different table-cloths are used for meals consisting of food prepared with milk and those at which meat is eaten (Yoreh De'ah, 88, 89). As bread is eaten with meat it is not permitted to prepare it with milk unless the form and size of the loaf or cake are different from those of ordinary bread (*ib.* 96). See DIETARY LAWS; FOOD.

MILL AND MILLSTONE. See FLOUR.

MILLAUD (ARTHUR PAUL DAVID), ALBERT: French journalist and playwright; born at Paris in 1836; died there Oct. 22, 1892; son of Moïse MILLAUD. When only eighteen years of age he published a volume of poems which met with considerable success. In 1869 he joined the staff of the "Figaro," for which he originated the style of feuilletonism which it has since adopted. To the "Figaro" he contributed a number of witty and sarcastic poems and sketches, published under the pseudonyms "Baron Grimm" and "La Bruyère." Later these were published collectively under the title "Petite Némesis."

For the stage Millaud wrote, often in collaboration with others, a great number of excellent pieces, mostly in a sarcastic vein, the leading rôles of which were played generally by Madame Judic. Of these plays the following may be mentioned: "Madame l'Archiduc" (1874); "Niniche" (1878); "La Femme à Papa" (1879); "Lili" (1882); "Mam'zelle Nitouche" (1883); "Le Remords d'Anatole" (1885). In his younger days Millaud, together with Abel Auerbach, founded the "Revue de Poche," and later the "Gazette de Hollande," but neither of these ventures proved successful.

S. F. C.

MILLAUD, EDOUARD: French barrister and statesman; born at Tarascon, Bouches-du-Rhône, Sept. 27, 1834; educated at Lyons, and there admitted to the bar in 1856. Taking an active part in politics, he was an opponent of the imperial government and became attorney-general for Lyons after the overthrow of Napoleon III. He resigned in 1871; but in the same year he was elected to the Assembly as a member of the Extreme Left, was reelected in 1876 and in 1877, always belonging to the Republican Union, of which political club he was one of the founders. In 1880 he was elected to the Senate, and in 1891 and 1900 was reelected. Being a good speaker, Millaud has taken a prominent part in the debates of the Upper House and has been a member of several commissions. In 1886 he became secretary of public works in the cabinet of Freycinet, and in the following year in that of Goblet, resigning in 1887.

Millaud has written several essays on jurisprudence, including medical jurisprudence, in the professional journals, and is the author of: "Etude sur l'Orateur Hortensius," 1859; "De la Réorganisation de l'Armée," 1867; "Devons-Nous Signer la Paix?" 1871.

S. F. T. H.

MILLAUD, MOÏSE-POLYDORE: French journalist and banker; born at Bordeaux Aug. 27, 1813; died at Paris 1871. The son of a poor Jewish tradesman, he received but a meager education, and entered a bailiff's office as clerk. He applied himself to literature from his youth, and at the age of twenty established a small newspaper, "Le Lutin." In 1836 he went to Paris and founded "Le Gamin de Paris," the first newspaper to be sold at the doors of theaters, and "Le Négociateur," concerned entirely with commercial matters. Although neither was financially successful, he gained valuable training from them. In 1839 he founded "L'Audience," devoted exclusively to the news of the law courts, which was very prosperous until 1845; and he was the leading competitor of the "Gazette des Tribunaux." On Feb. 24, 1845, he established "La Liberté," which strongly supported the cause of Prince Louis Napoleon. After the insurrection of June the paper was suppressed. To gether with Mirès, his compatriot, he started an industrial and financial sheet, "Le Journal des Chemins de Fer," which became a power in matters of speculation and finance. Availing themselves of the popularity of Lamartine, the two collaborators established the paper "Le Conseiller du Peuple," and founded the two banking institutions Caisses des Actions Réunies and Caisses des Chemins de Fer, from which Millaud retired in favor of Mirès in 1853, after each had cleared 3,000,000 francs. The Caisse Générale des Actionnaires and the purchase of the rights of Girardin in "La Presse" proved less fortunate than the two preceding ventures. In 1863 he conceived the idea of starting a daily paper at the price of 5 centimes, and established "Le Petit Journal," which was a signal success. He was the founder also of "Le Journal Illustré," "Le Soleil," and "Le Journal des Voyageurs."

In 1859, in collaboration with Clairville, Millaud made his first essay in dramatic literature, and produced a three-act light comedy, "Ma Mère et Mon Ours," which had a great success. During the Second Empire, Millaud gave superb entertainments; but finally he lost the greater part of his large fortune.

S. J. Ka.

MILLENNIUM: The reign of peace, lasting one thousand years, which will precede the Last Judgment and the future life. The concept has assumed especial importance in the Christian Church, where it is termed also "chiliasm," designating the dominion of Jesus with the glorified and risen saints over the world for a thousand years. Chiliasm or the idea of the millennium is, nevertheless, older than the Christian Church; for the belief in a period of one thousand years at the end of time as a preliminary to the resurrection of the dead was held in Parseeism. This concept is expressed in Jewish literature in Enoch, xiii., xci. 12–17; in the apocalypse of the ten weeks, in Apoc. Baruch, xl. 3 ("And his dominion shall last forever, until the world doomed to destruction shall perish"); and in II Esdras vii. 28–29. Neither here nor in later Jewish literature is the duration of this Messianic reign fixed. It is clear, however, that the rule of the Messiah was considered as an interregnum, from the fact that in many passages, such as Pes. 68a, Ber. 34b, Sanh. 91b and 99a, Shab. 63a, 113b, and 141b, a distinction is made between ימות המשיח and עולם הבא, although it must be noted that some regarded the Messianic rule as the period of the fulfilment of the prophecies, while others saw in it the time of the subjugation of the nations.

Messianic Period an Interregnum.

There are various views regarding the duration of this kingdom, and there is considerable confusion in traditional literature on this point, one and the same opinion being often quoted as held by different authorities. According to the two baraitot in Sanh. 99a, the Messianic kingdom is to last for 40, or 70, or 365, or 400, or even for 7,000 years. In the opinion of others its period is to equal the time from the creation of the world, or else from Noah, to the "present" day. Similar statements, often merely ascribed to other authors, are found in Yalḳ. 806. Sanh. 97a quotes Abaye and an old baraita, which is found also in 'Ab. Zarah 9a, to the effect that the Messianic period comprises two of the six millenniums of the world, while R. Ḳeṭina and a baraita make the interesting statement that the 6,000 years of the world will be concluded by the seventh thousand of the Messianic kingdom. In the passage in Yalḳuṭ already quoted, this same view is ascribed to two tannaim of the second century. Both of these chronologies are based on the calculation found in Ps. xc. 4 ("For a thousand years in thy sight are but as yesterday"), a comparison of which with the account of Creation formed the basis for the 6,000 years of the duration of the world, while the Sabbath corresponded to the seventh thousand, that of the Messiah.

The calculation of 6,000 or 7,000 years is found, according to Lagarde ("Mittheilungen," iv. 315), as early as the Greek translators of the Pentateuch, whom he places about 280 B.C., and is given also in Enoch, xxxiii. The idea of the Messianic interregnum was later incorporated in this form in Revelation (ch. xx.). When Jesus has conquered the serpent, representing the hostile anti-Christian world, the martyrs of the faith will be raised from the dead and will rule with him for 1,000 years as a band of kingly priests. This period is to be followed by the Last Judgment and the creation of a new heaven and a new earth. The concept of the Messianic kingdom, which is here described merely as a reign of peace, is elaborated more fully in the eschatological descriptions of apocalyptic literature (as in Papias), in the Epistle of Barnabas, and in the writings of Justin. Barnabas follows the Jewish theory that the world is to exist unchanged for 6,000 years, and that at the beginning of the Sabbatical or seventh millennium the son of God will appear, although, unlike Papias, he regards this event as purely spiritual. The view of Justin ("Dial. cum Tryph." cxiii.) concerning the Messianic kingdom is nationalistic in coloring, being influenced, according to Hamburger, by the insurrection of Bar Kokba. After the middle of the second century of the common era these ideas fell into abeyance, until the Montanists arose in Asia Minor (*c.* 160–220) and revived the ancient hopes, declaring, however, that their city of Pepuza was to be the site of the future Jerusalem and the center of the millennial kingdom. In the Greek Church chiliasm was displaced entirely by Origen's Neoplatonic mysticism, and was kept alive only in the Oriental branches of that communion.

Found in Revelation.

MILLET: An important species of grain which grows chiefly in sandy regions. In Arabia, Italy, and elsewhere a bread, excellent when fresh, is made of it, and also of the species *Panicum italicum* Linn. The grain is mentioned but once in the Bible, in Ezek. iv. 9: "Take thou also unto thee wheat, and barley, and beans, and lentils, and millet, and fitches, and put them in one vessel, and make thee bread thereof." Since this passage was evidently intended to enumerate all the kinds of grain used for making bread, millet ("doḥan") was included; but it is practically impossible to decide which variety the prophet meant. Rosenmüller and others preferred to translate "doḥan" by "Indian millet," because the Arabic "dukhn" was shown by Forskål to have this meaning, although Furrer had already pointed out that panicum likewise bears the same name; it is best to translate "doḥan" by "millet," especially if the Biblical "sorah" be rendered "sorghum" (Isa. xxviii. 25, A. V., "wheat": with which Sachau compares the שורה [*i.e.*, "durrah" = "broom-corn"] of an inscription at Zenjirli; comp. Post, "Flora of Syria, Palestine, and Sinai," p. 854, Beirut, 1896), and to use "panicum" as a translation of "pereg," which is first found in the Mishnah. The Syrians, misled by their word "peragga," have traced this Mishnaic word to the "pannag" of Ezek. xxvii. 17. The Septuagint and the Vulgate, followed by the English versions, incorrectly translate "nisman" (Isa. xxviii. 25) by "millet."

Mishnah.

In Mishnaic times millet of two kinds, rice, and sesame constituted a separate category of cultivated plants, which were grouped between grain and pulse, although rice and millet more closely approached the former (Löw, "Pflanzennamen," p. 102; Sheb. ii. 7; Yer. Sheb. 34a, 10; Sifra, Behar, 105c; R. H. 13b; Ḥal. i. 4; Mek., Bo, 8b, 12; 9a, 27; Sifre, i. 110, 146; ii. 105; Yer. Peah i. 16c, 23; Mek., Deut. i. 14; Hoffmann). Dioscorides discusses the four kinds of plants in the same sequence. In spite of the fact that rice and millet are kinds of grain, they were not included among the recognized species ('Er. 81a; Pes. 35a; Ber. 37a; "Halakot Gedolot," ed. Hildesheimer, p. 54; Maimonides, "Yad," Berakot, v. 10; "Kesef Mishne," *ad loc.*).

Foreign names for millet occur in rabbinical works, *e.g.*: "hirse," "hirsen" ("'Aruk ha-Ḳaẓer"; "Lebush," Oraḥ Ḥayyim, 208, 8; Isaac Tyrnau; *et passim*), "arzan hindi" (Bacher, "Sefer ha-Shorashim," No. 879), "dokhn" (Maimonides), "durra" ("Birke Yosef," Oraḥ Ḥayyim, 205), "mil," "miglio" (D. Ḳimḥi, "Zunz Jubelschrift," Hebrew part, p. 97; Rashi), "panis," "panitz" (Rashi, and A. Berliner, "Festschrift," p. 248), "panizo" ("Paḥad Yiẓḥaḳ," *s.v.*).

J. I. Lö.

MILMAN, HENRY HART: Historian; born in London Feb. 10, 1791; died there Sept. 24, 1868. His career at Oxford was a brilliant one. He first became known through his dramatic poems "Fazio" (1815), "Fall of Jerusalem," "Martyr of Antioch," and others. In 1830 he published his "History of the Jews," a work which brought down on him the censure of the Church. This history is aggressively rationalistic; it treats the Jews as an Oriental tribe, and all miracles are either eliminated or evaded. He was nevertheless presented with a piece of plate by some representative Jews in recognition of his sympathetic attitude. His history was republished in 1863 and 1867.

Dean Milman was appointed Dean of St. Paul's in 1849. He was the first to translate Sanskrit epics into English. He edited Gibbon in 1838, and Horace in 1849. His ecclesiastical and theological sympathies were very liberal, as is shown by his "History of Latin Christianity" (1855), in which also occur several sympathetic references to the Jews.

MILSAHAGI, ELIAKIM. See Samiler, A. G.

MILWAUKEE: Metropolis of the state of Wisconsin. The oldest congregation of Milwaukee, Bene Jeshurun, was organized in 1855 by Löbl Rindskopf, Leopold Newbauer, Solomon Adler, Emanuel Silverman, and others of the first Jewish settlers in the city. At the outset the congregation had as ḥazzanim Messrs. Alexander, Lasker, and Marcus Heiman in the order named, and it then came under the guidance of Rabbis Isidor Kalisch, M. Falk, Elias Epstein, Emanuel Gerechter, and Victor Caro, the present (1904) incumbent. On Oct. 18, 1869, under the leadership of David Adler and Henry Friend, a new congregation named "Emanu-El" was organized, which was incorporated Feb. 17, 1870. After a short period of service by M. Schulhof as ḥazzan, Rabbis E. M. V. Brown, M. Spitz, Isaac S. Moses, Sigmund Hecht, and Julius H. Meyer were successively the spiritual guides of the congregation. There are four other incorporated congregations.

A federation of Jewish charities was effected in Jan., 1903, the income of the new organization being about $12,000. Out of this sum the following local charities are supported: the Hebrew Relief Association; the Settlement; the Jewish Hospital Association; the Ladies' Relief Sewing Society; and the Sisterhood of Personal Service. From this source, also, the contributions of Milwaukee Jews to national Jewish charities are made.

In a total population of 300,000 there are about 8,000 Jews.

MI-MIZRAḤ UMI-MA'ARAB. See Periodicals.

MIN (pl. **Minim**): Term used in the Talmud and Midrash for a Jewish heretic or sectarian. Its etymology is obscure, the most plausible among numerous explanations being that given by Bacher, namely, that it is derived from the Biblical מין (= "species"), which has received in post-Biblical Hebrew the signification of "sect"; and just as "goy," which in the Bible has only the meaning of "nation," took later the sense of "non-Jew," so "min" received also the signification of "sectary." As expressly stated by R. Naḥman (Ḥul. 13b), the term "min" is applied only to a Jewish sectary, not to a non-Jew. It is variously used in the Talmud and the Midrash for the Samaritan, the Sadducee, the Gnostic, the Judæo-Christian, and other sectaries, according to the epoch to which the passage belongs. Yerushalmi states that there were, at the time of

Various Applications of the Term.

the destruction of the Temple, no less than twenty-four kinds of minim (Yer. Sanh. x. 5). Thus the min who (the Midrash states) derided Alexander the Great for rising before the Jewish high priest Simon the Just (Lev. R. xiii.) was undoubtedly a Samaritan. The minim referred to in Berakot ix., on whose account the custom was established of closing the benedictions with the words "from eternity to eternity" in order to emphasize the existence of more than one world, were undoubtedly Sadducees, who, as known, denied the existence of another world. In passages referring to the Christian period, "minim" usually indicates the Judæo-Christians, the Gnostics, and the Nazarenes, who often conversed with the Rabbis on the unity of God, creation, resurrection, and similar subjects (comp. Sanh. 39b). In some passages, indeed, it is used even for "Christian"; but it is possible that in such cases it is a substitution for the word "Noẓeri," which was the usual term for "Christian."

During the first century of Christianity the Rabbis lived on friendly terms with the minim. Rabbi Eliezer, who denied to the heathen a share in the future life, is said to have discoursed with the Judæo-Christian Jacob of Kefar Sekanya and to have quietly listened to the interpretation of a Biblical verse he had received from Jesus ('Ab. Zarah 16b; Eccl. R. i. 8). Ben Dama, a nephew of R. Ishmael, having been bitten by a snake, allowed himself to be cured by means of an exorcism uttered by the min Jacob, a Judæo-Christian. These friendly feelings, however, gradually gave way to violent hatred, as the minim separated themselves from all connection with the Jews and propagated writings which the Rabbis considered more dangerous to the unity of Judaism than those of the pagans. "The writings of the minim," says R. Ṭarfon, "deserve to be burned, even though the holy name of God occurs therein, for paganism is less dangerous than 'minut'; the former fails to recognize the truth of Judaism from want of knowledge, but the latter denies what it fully knows" (Shab. 116a).

Prayer Against Minim.

On the invitation of Gamaliel II., Samuel ha-Ḳaṭan composed a prayer against the minim which was inserted in the "Eighteen Benedictions"; it is called "Birkat ha-Minim" and forms the twelfth benediction; but instead of the original "Noẓerim" (= "Nazarenes"; see Krauss in "J. Q. R." v. 55; comp. Bloch, "Die Institutionen des Judenthums," i. 193) the present text has "wela-malshinim" (="and to the informers"). The cause of this change in the text was, probably, the accusation brought by the Church Fathers against the Jews of cursing all the Christians under the name of the Nazarenes. It was forbidden to partake of meat, bread, and wine with the min. Scrolls of the Law, tefillin, and mezuzot written by a min were burned (Giṭ. 45b; Yer. Shab. 14b; 'Ab. Zarah 40b; Shulḥan 'Aruk, Oraḥ Ḥayyim, 39, 1; *ib.* Yoreh De'ah, 281, 1). An animal slaughtered by a min was forbidden food (Ḥul. 13a). The relatives of the min were not permitted to observe the laws of mourning after his death, but were required to assume festive garments and rejoice (Sem. ii. 10; Yoreh De'ah, 345). The testimony of the min was not admitted in evidence in Jewish courts (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 34, 22); and an Israelite who found anything belonging to one who was a min was forbidden to return it to him (see Ḥoshen Mishpaṭ, 266, 2).

According to Maimonides ("Yad," Teshubah, iii.) the term "min" is applied to five classes of heretics: to those who deny the existence of God and His providence; to those who believe in two or in more than two gods; to those who ascribe to God form and figure; to those who maintain that there existed before the creation of the world something besides God; and to those who worship stars, planets, or other things in order that these may act as intermediaries between them and the Master of the World.

J. I. BR.

MINDEN, JUDAH (LÖB) B. JOEL: German lexicographer; lived at Berlin in the sixth decade of the eighteenth century. In 1760 he published there, with the approbation of the rabbinates of Berlin and Halberstadt, the first Hebrew dictionary produced by a Jew and using German as the medium of translation; it was, as Zunz says ("G. V." p. 451), "the initial attempt to introduce the High German language into the national literature." The title "Millim le-Eloah" (comp. Job xxxvi. 2) was chosen for it, "because it explains the words of the divine writings," while its first word (מלים) hints at the author's name (מנני יהודה ליב מינדען). The book, which is based on David Ḳimḥi's dictionary, contains also additions from the Concordance, as well as discussions of the grammatical functions of the letters. In 1765 Minden published a new edition of Musafia's "Zeker Rab" as a supplement to his own work.

MINDEN, LÖB B. MOSES: Cantor and poet; born at Selichow (from which he is called also **Judah b. Moses Selichower**), in Lesser Poland, in the seventeenth century; died at an advanced age at Altona or Hamburg May 26, 1751. He acted as ḥazzan at Minden-on-the-Weser, whence his name "Minden." He was the author of "Shire Yehudah," Hebrew songs with German translations and music. One of these begins: "Ihr lieben Brüder und Gesellen, die da sitzen und zechen," and another, "Hört zu, ihr Leut, gedenkt an die Zeit." In an epilogue to this work (Amsterdam, 1696) he exhorts the rabbis not to allow conversation in the synagogue. He wrote also "Zemer wa-Shir," which was printed by Solomon London, Frankfort-on-the-Main, 1714.

H. R. M. K̇.

MINERBI, HIRSCHEL DE: Count of Oscarre; Italian diplomat; descendant of a wealthy and illustrious Jewish family of Triest; born April 25, 1838; educated at the University of Padua, where he received his degree in law in 1864. He then went to Italy, and entered the government service in 1867, being first sent to Paris, later in turn to Bern, Constantinople, London, Brussels, and finally to London again, where he remained until he withdrew from the service. Before he retired to private life he set aside the sum of 80,000 lire which he directed to be used as a nucleus for the foundation of an institute for the benefit of the widows and orphans of diplomatists.

S. V. C.

MINES AND MINING: Mines did not exist in the land inhabited by the Israelites. In the description of Palestine in Deut. viii. 9, it is true, the words "whose stones are iron and out of whose hills thou mayest dig brass" seem to refer to mining; but it is doubtful whether this passage is to be taken literally. The writer may have only meant that the stones were like iron in hardness. Here and there, however, superficial deposits of iron ore, such as pea ore or meadow ore, are to be found. In the Wadi Ajlun there are even thin deposits of red iron ore; but whether these were perhaps worked in some primitive manner is unknown. Traces of iron-mines and of ancient copper-works are found in the Lebanon. Possibly the words in Deuteronomy refer to this territory, though it was never inhabited by the Israelites.

The author of Job xxviii. betrays a more exact knowledge of mining. In verses 4, 7, 8 he refers to the passages and galleries which run crosswise with many sharp turns, following the labyrinthine course of the vein of ore. Verse 3 refers to the miner's light, which, according to Diodorus (iii. 11), the workers in Egyptian mines used to wear fastened to their foreheads. Verse 5 refers to the process of breaking the stone by making it intensely hot and then pouring water on it. This process also is mentioned by Diodorus. Verse 10 refers to the cleaving of a rock in which a vein of ore ran through it in a fissure. Water burst from the fissure, and the flow was stopped by closing up the gap. Perhaps the writer's knowledge of the subject came from Egyptian sources.

The rich gold-mines of which Diodorus (*l.c.*) speaks were on the boundary between Egypt and Naṣb, but more likely in this passage the allusion is to the copper-works of the Egyptians on the Sinaitic Peninsula. Traces of extensive mining operations are still to be seen in the wadis Maghara and Naṣb, in the heaps of rubbish, the piles of slag, and the ruined passages. The inscriptions found on the rocks there intimate that the ore was excavated even before the time of Cheops (the builder of the great pyramid), under King Snefru. Mining was not carried on by regular miners, but by slaves, convicts, prisoners of war, etc. The author of Job xxviii. must in some way have become acquainted with such mines, and have used the picture with poetical freedom for a general illustration of human skill in obtaining precious metals. See Metals.

E. G. H. W. N.

MINHAG. See Custom.

MINḤAH PRAYER: The afternoon devotional service of the Jewish liturgy. The term is probably derived from Elijah's prayer at "the time of the offering of the evening [" minḥah "] sacrifice" (I Kings xviii. 36). Minḥah is one of the three daily services referred to in Dan. vi. 10. Tradition credits the patriarchs Abraham, Isaac, and Jacob with the authorship of the morning, afternoon, and evening prayers respectively (Ber. 26b). That Isaac was the original author of Minḥah is deduced from the verse, "And Isaac went out to meditate in the field at the eventide" (Gen. xxiv. 63).

Divisions.

Minḥah proper, otherwise known as "Minḥah Gedolah" (major) begins at six and one-half hours of the day (12.30 P.M.); "Minḥah Ḳeṭannah" (minor), at nine and one-half hours of the day (3.30 P.M.); and they both end at sunset (6 P.M.). "Pelag" (split or semi-) Minḥah divides the "Minḥah Ḳeṭannah" in half at ten and three-quarter hours of the day (4.45 P.M.; Ber. iv. 1, 26a). Sunset is calculated to occur at the twelfth hour of the day (6 P.M.); no attention is paid to variations in the length of day and of night according to the seasons, but each is reckoned as containing exactly twelve hours.

The distinction between Minḥah Gedolah and Minḥah Ḳeṭannah corresponds to a division of activities into important and unimportant; it being forbidden to enter upon one of either class after the beginning of the corresponding Minḥah; this rule was made as a precaution against any undertaking being continued after the limit of the time fixed for prayer (Shab. i. 2, 9a). Accordingly, one must not commence a large business transaction or sit down to a banquet after 12.30 P.M., nor begin a small transaction or partake of an ordinary meal after 3.30 P.M., without having previously recited the Minḥah prayer. The semi-Minḥah is a special division made by Rabbi Judah, who sets the limit of the "Minḥah" time at one and one-quarter hours before sunset.

It appears that some made it a practise to pray both at Minḥah Gedolah and Minḥah Ḳeṭannah. R. Maẓliaḥ did so; but Asheri rules against him, inasmuch as there is an additional Minḥah known as "ne'ilah," which is confined to Yom-Kippur and special fast-days (Asheri, Rule iv., § 13). The Shulḥan 'Aruk allows one to say the Minḥah prayer twice, provided one Minḥah is recited as an obligation ("ḥobah") and the other as a voluntary act ("reshut"). This, however, is allowed only to men of extraordinary devotion; this rule being supported by the words of Isaiah: "To what purpose is the multitude of your sacrifices unto me?" (Shulḥan 'Aruk, Oraḥ Ḥayyim, 234, 1).

Minḥah consists of Ps. cxlv., "'Amidah," "Taḥnun" (except on Fridays), and "'Alenu." When there is a quorum of ten ("minyan") the leader repeats the standing prayer ("'Amidah") aloud, and recites the "Ḳaddishim." On Saturdays and on fast-days a portion of the Pentateuch is read in public before the "'Amidah." When time presses, the leader recites aloud only the first part of the prayer, through "Ḳedushshah" ("thrice holy"), and the rest is said silently with the assembly.

The third meal on Saturdays is eaten between Minḥah and Ma'arib or evening prayer. Formerly, a maggid sometimes preached in the synagogue after Minḥah. In the nineteenth century, when the people became more busy in worldly affairs, it was difficult for them to assemble in the afternoon and again in the evening; hence the Minḥah prayer was postponed to very near sunset in order that it might be followed by Ma'arib after a short interval.

On the relation of the Minḥah prayer to the sacrifices in the Temple see Prayer.

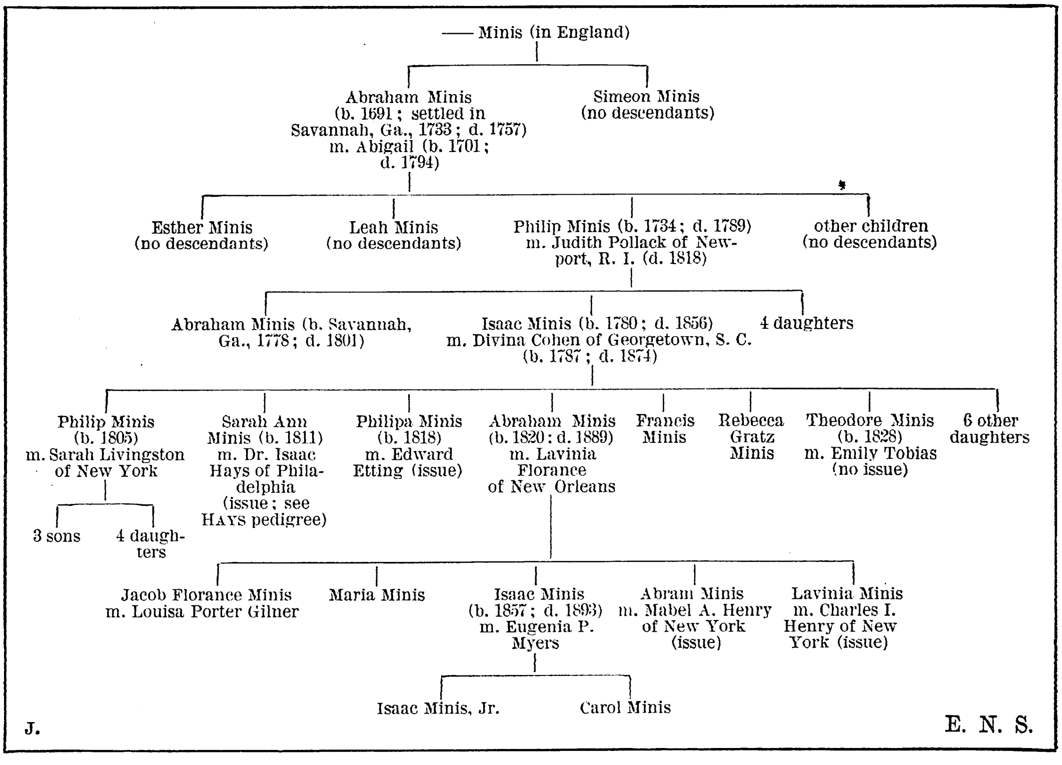
G. M. K.

MINIS: American family especially prominent in the South. Its founder, Abraham Minis, went from England to America in 1733. The family tree is as follows:



—— Minis (in England)
Abraham Minis (b. 1691; settled in Savannah, Ga., 1733; d. 1757) m. Abigail (b. 1701; d. 1794)
Simeon Minis (no descendants)
Esther Minis (no descendants)
Leah Minis (no descendants)
Philip Minis (b. 1734; d. 1789) m. Judith Pollack of Newport, R. I. (d. 1818)
other children (no descendants)
Abraham Minis (b. Savannah, Ga., 1778; d. 1801)
Isaac Minis (b. 1780; d. 1856) m. Divina Cohen of Georgetown, S. C. (b. 1787; d. 1874)
4 daughters
Philip Minis (b. 1805) m. Sarah Livingston of New York
Sarah Ann Minis (b. 1811) m. Dr. Isaac Hays of Philadelphia (issue; see Hays pedigree)
Philipa Minis (b. 1818) m. Edward Etting (issue)
Abraham Minis (b. 1820; d. 1889) m. Lavinia Florance of New Orleans
Francis Minis
Rebecca Gratz Minis
Theodore Minis (b. 1828) m. Emily Tobias (no issue)
6 other daughters
3 sons
4 daughters
Jacob Florance Minis m. Louisa Porter Gilner
Maria Minis
Isaac Minis (b. 1857; d. 1893) m. Eugenia P. Myers
Abram Minis m. Mabel A. Henry of New York (issue)
Lavinia Minis m. Charles I. Henry of New York (issue)
Isaac Minis, Jr.
Carol Minis

E. N. S.

Pedigree of the Minis Family.

MINIR (מניר): Family of scholars of Tudela, members of which are met with in the East and in Italy.

Abraham ben Joseph Minir (probably a brother of Isaac ben Joseph Minir); **Acah (Isaac) ben Ḥayyim** and his son **Abraham Minir**; and **Shem-Ṭob ben Samuel Minir** were prominent members of the community of Tudela in 1363.

Isaac ibn Minir: Contemporary of Isaac ben Sheshet.

Isaac ben Joseph Minir: Commentator and liturgical poet; pupil of Yom-Ṭob ben Abraham of Seville, and contemporary of Solomon ben Adret.

Abraham Minis: One of the earliest settlers in the colony of Georgia; born c. 1696; died 1757. He arrived at Savannah with the group of Jewish colonists which came from England July 11, 1733, shortly after Oglethorpe. Abraham was accompanied by his wife Abigail, his daughters Leah and Esther, and his brother Simeon. He seems to have been a man of means. Some of the family silver he brought with him is still in possession of his descendants; and several pieces bear his crest. Abraham's name appears among those of the few Jewish grantees mentioned in the general conveyance of town lots and farms executed in Dec., 1733, and which is virtually the earliest deed in the colony. He soon became a merchant, and is mentioned as such in Savannah as early as 1737.

When many of the colonists, both Jew and Gentile, left Georgia about 1740, owing to the illiberal policy of the trustees, Minis was one of the few Jews who remained; he is mentioned in the trustees' minutes of that period. His widow died in 1794.

Simeon Minis: Brother of Abraham Minis; also one of the original settlers. His name appears in the records as late as 1743, when he received an allotment of land.

Philip Minis: Son of Abraham Minis; born at Savannah July 11, 1734 (being the first white male child born in the colony of Georgia); died 1789. He was a successful merchant at the outbreak of the American Revolution. An ardent patriot, he advanced considerable sums to the Revolutionary cause, mainly in connection with the payment of the troops. His name appears in the "Journal of the Continental Congress." In 1778 Congress directed the payment to him of several thousands of dollars, advanced to the "acting paymaster and commissary to the Virginia and North Carolina troops in the State of Georgia." When, in Sept., 1779, the French auxiliaries besieged Savannah, Minis acted as guide through the woods, and was consulted as to the best place for landing. He also volunteered to act as a patriot guide thereafter. In 1780 the British passed their famous "Disqualifying Act," whereby certain persons were disqualified from holding office, because of their prominence in the "rebel cause." The name of Philip Minis is one of the 150 names appearing in this list.

After the Revolution Minis took a lively interest in congregational affairs at Savannah. On the reestablishment of the congregation in 1786 he became parnas or president of the Mickva Israel congregation in that city.

David Minis: A member of the family who was prominent in masonic affairs as early as 1757. He was among those who, on behalf of the order, waited on Governor Ellis with an address of welcome in that year.

Judith (Judy) Minis (*née* **Judith Pollack**): Wife of Philip Minis; died 1818. She and her mother were both prominent patriots. On this account both were confined to their dwelling after the taking of Savannah, and were finally ordered to leave the town.

Among the soldiers of the Georgia line in the Revolution are also found the names of **William Minis** and **James Minis,** presumably members of the same family.

Isaac Minis: Son of Philip and Judith Minis; said to have been born in 1780, in a cave near Charleston, S. C., while that city was besieged and while Savannah was in the hands of the British; died 1856. He served as a private in the War of 1812 in Capt. William Bullock's company of artillery, 1st Regiment Georgia Militia.

Abraham Minis: Son of Isaac Minis; born at Savannah 1820; died 1889. He was physically disqualified from serving in the field at the outbreak of the Civil war. Though disapproving of secession, he, after hostilities commenced, espoused the Confederate cause, and filled a position in the commissary's office at Savannah. He also subscribed liberally to the issue of Confederate bonds.

Isaac Minis: Son of Abraham Minis; born at Savannah 1857; died 1893. He was an active member of the Georgia Hussars for many years, until his death.

Abraham Minis: Son of Abraham Minis; born 1859. He joined the Georgia Hussars in 1881, and became first lieutenant. At the outbreak of the Spanish-American war he requested assignment to a cavalry regiment, but as no cavalry was called from Georgia he had no opportunity for active service. Later he was appointed quartermaster (with the rank of captain) of the 1st Regiment of Georgia Cavalry, of which body he is now (1904) adjutant.

A. L. Hü.

MINKOVSKY, PHINEHAS: Russian cantor; born at Byelaya Tzerkov April, 1859. His father, Mordecai, a descendant of Yom-Ṭob Lipmann Heller, was cantor in the great synagogue of Byelaya Tzerkov, and he himself was a singer in his father's choir. After having studied the Bible and Talmud under different teachers, Minkovsky continued his Talmudical studies alone in the bet ha-midrash of his native town. At the age of eighteen he began to study Russian and German, and he mastered these two languages. His first teacher in vocal music was his father; later he studied it under Nisan Spivak (Nisan Belzer or Nisan Berdychever), and finally he went to Vienna, where he continued under Robert Fuchs, now (1904) director of the Conservatorium of Vienna, from whom he obtained a diploma as singer. From 1888 Minkovsky was successively cantor at Kishinef, Kherson, Lemberg, Odessa (in the great synagogue), New York (in the synagogue Ḳehal 'Adat Yeshurun), and in 1892 he was called back to Odessa, where he is now cantor in the Broder Synagogue. He has written "Die Entwicklung der Synagogalen Liturgie bis nach der Reformation des 19jahrhunderts" (Odessa, 1902). Minkovsky has contributed to many Hebrew periodicals and to "Die Wahrheit."

H. R. B. Ei.

MINKOWSKI, OSCAR: German physician; born at Alexoten, near Kovno, Russia, Jan. 13, 1858; educated at the universities of Freiburg, Strasburg, and Königsberg (M.D. 1881). He became assistant at the medical clinic of Königsberg University in 1882 and privat-docent in 1885. Removing to Strasburg in 1888, he was appointed assistant professor at the university there in 1891. In 1900 he became chief physician at the General Hospital at Cologne.

Minkowski is a contributor to Leyden's "Handbuch der Ernährungstherapie," Nothnagel's "Handbuch der Speziellen Pathologie und Therapie," Liebreich's "Encyklopädie der Therapie," and Lubarsch and Ostertag's "Ergebnisse der Allgemeinen Therapie." Besides contributing many essays to the medical journals, he has written: "Untersuchungen über den Diabetes Mellitus nach Exstirpation des Pankreas," Leipsic, 1893; and "Untersuchungen zur Physiologie und Pathologie der Harnsäure," *ib.* 1898.

MINNEAPOLIS: Chief commercial city of the state of Minnesota. In 1900 it had in a total population of 202,718 a Jewish community of about 6,000 souls. The first Jewish settlers were Germans, Bohemians, and Russians, who went there between the years 1865–70, there being among them one Ralph Rees, still living, who came in 1866, and who was for many years the most active member of the community. In 1876 about a dozen families rented a hall for worship and engaged the Rev. Mr. Schreiber as minister. In 1878 the congregation was permanently organized and incorporated, and shortly after a frame structure was erected as a synagogue on leased ground now situated in the very center of the business district. Such was the beginning of the present Jewish Reform Congregation Shaarei Tov. About five years later the synagogue was enlarged and moved to its present site, Fifth avenue and Tenth street south. Henry Iliowizi then became the rabbi of the congregation and remained here eight years. His successors have been: Rabbi S. Marks, two years; A. Friedman, seven years; and S. N. Deinard, the present (1904) incumbent, who was elected in 1901. The congregation dedicated a new synagogue in 1903.

The great bulk of Russian and Rumanian Jews, who are now the predominating element of the community, have come since 1882. The first congregations organized by them were the Adath Yeshurun, which existed for about seven years, and the Rumanian Hebrew Congregation Sons of Abraham, both in 1888. In 1890 the Congregation Beth Midrash Haggadol was started, but two years later was dissolved and succeeded by the Congregation Keneseth Israel, which built its present synagogue in 1894. This congregation, the leading Orthodox one, maintains a Hebrew Free School (daily) with about 70 pupils, and a Sunday-school attended mostly by girls. With the congregation are connected a Ḥebra Tillim, a Ḥebra Mishnah, and a Ḥebra Gemarah. Other Orthodox congregations are: Mikra Kodesh Nusaḥ Sfard; Congregation Anshe Tavrig; Adath Yeshurun (reorganized in 1903); and South Side Hebrew Congregation Agudath Ahim. They all own their houses of worship. The spiritual head of the Orthodox portion of the community was, until 1901, Rabbi I. Yaffey, who has been succeeded by Rabbi M. S. Silber.

Charitable Organizations.

The following organizations attend to communal charity: the Hebrew Ladies' Benevolent Society, composed of members of the Jewish Reform congregation; Sisters of Peace; Russian Hebrews Charity Association; Biḳḳur Ḥolim of the North Side; Biḳḳur Ḥolim of the South Side; and Haknasat Orḥim (free temporary shelter for strangers)—the last five conducted and maintained by the Orthodox Jews.

Before there was any established congregation in Minneapolis, the first few Jewish settlers bought a small tract of land about four miles from the center of the city, and organized themselves into what is now known as the Montefiore Burial Association. It is not connected with any congregation, although its membership is composed of those who affiliate with the Reform congregation. In addition there are now the Adath Yeshurun Cemetery Association; the Minneapolis City Lodge O. B. A. Cemetery Association; and the Hennepin County Lodge O. B. A. Cemetery Association.

Jewish secret fraternal organizations are particularly numerous in Minneapolis: one lodge of the I. O. B. B. with about 70 members; five lodges of the O. B. A. with a total membership of 1,250; two lodges of the Sons of Benjamin; one of the Free Sons of Israel; Mendelsohn Camp, M. W. A.; Baron Hirsch Camp, W. W.; and one Jewish lodge of each of the following: Modern Samaritans, Bankers' Union, Knights and Ladies of Security, Loyal Mystic Legion of America, Supreme Court of Honor, and Modern Brotherhood of America.

Zionism is represented by the Ohave Zion Kadimah and the American Daughters of Zion. There are several literary and social organizations.

The professions are represented by nine lawyers (one of whom, Simon Meyers, was in the state legislature from 1897 to 1899) and six physicians; three Jewish names are on the faculty list of the University of Minnesota: Robert Kolliner, professor at the University Law School; S. N. Deinard, of the chair of Semitics; and Lilian Cohen, instructor of chemistry. Dr. George J. Gordon is on the faculty of the Hamline Medical College.
A. S. N. D.

MINNESOTA: One of the northwestern states of the American Union. It has a Jewish population of about 13,000, distributed in the following cities: **Minneapolis,** the largest city of the state, 6,000; **St. Paul,** the capital city, 5,000; **Duluth,** 1,000; and about 1,000 scattered over the rest of the state, where from 5 to 20 Jewish families may be found in most towns of 3,000 or more inhabitants.

The three brothers Samuels, English Jews, who as early as 1852 had an Indian trading-post at Taylor Falls, on the Minnesota side of the St. Croix River, seem to have been the first Jewish settlers. One of the brothers, Morris Samuels, was captain in the Union army during the Civil war. Another Jew known to have been engaged in trading with the Indians in those early pioneer days was Isaac Marks, who had his residence in Mankato, and a trading-post about twelve miles from that place.

About 1857 some Jews went to St. Paul and engaged in general business, which likewise consisted mostly in trading with the Indians. The first Jewish organization was not effected till 1871, when the present Mt. Zion congregation of St. Paul came into existence. At that time Minneapolis had only a very few Jews. Since then, however, the Twin Cities have had an extraordinary growth in population, and the Jewish communities in them have grown in proportion, especially since 1882. Of late years several Jews of St. Paul have greatly prospered in business, and are now recognized factors in the commercial life of that city, so that while the Jewish community of Minneapolis is the larger in point of numbers, that of St. Paul is the wealthier and more influential.

In political and general communal activity the Jews of Minnesota have so far achieved little distinction, though T. N. Cardozo of St. Paul was as early as 1855 appointed United States commissioner, and Joseph Oppenheim of St. Paul was early in the eighties a member of the state legislature for two consecutive terms.

About 30 Jews from Minnesota were in the United States service during the Spanish-American war, one of them, Albert Steinhauser of New Ulm, being captain of Company A, 12th Minnesota Volunteer Infantry (see "American Jewish Year Book," 5661).

There are 17 organized congregations in the state, to wit: 7 in Minneapolis; 7 in St. Paul; and 3 in Duluth; one in each city—namely, Mt. Zion of St. Paul, Shaarei Tov of Minneapolis, and Emanuel of Duluth—belonging to the Reform wing of Judaism, while all the others retain the Orthodox ritual. These three have within the last two years dedicated new and handsomely built houses of worship. There is an I. O. B. B. lodge in each of the three cities, the one in St. Paul having been organized in 1871, and the one in Duluth in 1904. In the Twin Cities many lodges of the other Jewish fraternal orders, particularly of the O. B. A., are in flourishing condition. Zionism is well represented in St. Paul, where a Zionist society with a large membership of young men and young women maintains a well-appointed club-house.

"The Jewish Progress" of the Twin Cities, a weekly in English, is issued at Minneapolis.

A. S. N. D.

MINOR, SOLOMON ZALKIND: Russian rabbi and author; born at Wilna 1827; died there Jan. 21, 1900. He received his elementary education from his father, R. Jekuthiel, a well-known Talmudist. At the age of twelve Minor took up the study of Biblical and rabbinical subjects, but without the aid of a teacher. In 1849 the rabbinical seminary at Wilna was established, and Minor was among its first graduates. In 1854 he became instructor in Talmud and rabbinical literature in that institution, and in 1856 was appointed special adviser on Jewish affairs in the office of the governor-general of Wilna. Among the sermons he delivered in German at that time in the Wilna seminary may be mentioned "Der Rabbiner und der Lehrer" (Wilna, 1858). It pictures the ideal rabbi as a devoted guardian of the spiritual interests of his flock and as the advocate of his people. In 1860 Minor was appointed rabbi at Minsk; and for the next nine years he lived a life of conspicuously beneficent activity. Owing to his efforts a Sabbath-school and a night-school for artisans were opened (1861), and a library for the Jewish community was established (1862). In 1869 Minor was called to Moscow, where a Jewish congregation had recently been formed. There he succeeded in obtaining from the government the right to establish an independent Jewish religious organization, a right which the community of Moscow had, till then, never enjoyed. At the same time he received permission to build a synagogue and other communal institutions, such as a Hebrew free school, an industrial school, and an orphan asylum. He also taught the Jewish religion at the high school for girls in Moscow.

In his younger days Minor delivered his sermons in German, but at Minsk and Moscow he delivered them in Russian, and frequently had many Christians among his hearers. Indeed, Minot was the first Russian rabbi to preach in the vernacular; and his sermons have since served as models for synagogal discourses in Russia. They consisted largely of elucidations of the principles of Judaism, explanations of historical events concerning the Jews, and homilies on the duties of the Jews as Russian citizens. Minor was a friend of Count Leo Tolstoy, whose studies in Hebrew and in the Old Testament he directed. In 1891, when the expulsion of Moscow Jews began, Minor, owing to his too open expressions of sympathy for his people, was banished by the governor-general to his native town, Wilna, where he remained in seclusion until his death.

Minot's sermons have been published (3 vols., Moscow, 1875–89). He was the author of: "Rabbi Ippolit Lutostanski" (Moscow, 1879), directed against Lutostanski's anti-Semitic book "The Jews and the Talmud"; an outline of the history of the Jewish people, after the German of M. Elkan (Moscow, 1880; 2d ed., 1881); "Poslye Pogromov" (*ib.* 1882), on the anti-Jewish riots in Russia; and "Biblia Ob Utotrebleniye Vina" (*ib.* 1889), on the teaching of the Bible in regard to alcoholic beverages. Minor wrote articles for the Russian supplement to "Ha-Karmel" (1866, Nos. 11–25), and for "Yevreiskaya Biblioteka" (vol. iv.), and was a constant contributor to other Hebrew and Russian periodicals. He also corresponded with many of the prominent Maskilim of his time.

MINORCA. See Balearic Isles.

MINORITY. See Majority.

MINSK (formerly **Mensk**): Russian city; capital of the government of the same name. Of the history of its Jewish community very little is known. In 1576 King Stephen Bathori granted the Jews of Minsk the privilege of engaging in trade or commerce of any kind. At the end of the sixteenth century the Minsk Jews, sharing the lot of their brethren in other parts of the country, were expelled from Lithuania. In 1606, however, Jews are again found in Minsk, owning shops. In the same year King Sigismund III. confirmed the decree of expulsion; but within ten years (1616) he annulled it, and reestablished the privileges granted by Stephen Bathori. Moreover, in 1625 Sigismund granted the Jewish community permanent possession of the tracts of land occupied by the synagogue and the cemetery. Subsequently (1629) he permitted them to own stores; but they were not

30

allowed to build houses. King Ladislaus IV., in response to a petition of the Minsk Jews, confirmed the privileges granted by his predecessors. In addition he allowed them to "acquire lots and to build shops on them, as well as to buy old shops." They were still precluded from building houses, though they might own such if they came into their possession for debts. Ladislaus also left in their possession the brick-built synagogue, which he exempted from taxation; and he gave permission for founding a new Jewish cemetery.

In 1629 the superior of the Minsk Monastery of Peter and Paul brought before the civil court a complaint against the Jews of Minsk, charging them with having attacked the monastery during the baptism of a Jew. In 1648 another complaint of a similar character was made. On this occasion the waywode severely reprimanded the Jews, threatening them with prosecution if such a thing should again occur. In 1670 King Michael ordered the Minsk judicial starost not to allow unauthorized officials to judge the Jews and not to hinder the latter from appealing to the king or to the royal court, as they were subject only to the jurisdiction of the starost. During the second half of the eighteenth century the taxpayers of the Minsk Jewish community repeatedly sent representatives to the chief Lithuanian exchequer court in Grodno with complaints against the elders of the Minsk ḳahal. The elders were charged with depleting the public revenues and with defrauding the taxpayers among the middle classes.

On Jan. 1, 1896, the Jews of Minsk numbered 43,658. There were about forty synagogues and numerous houses of prayer. Five of the synagogues belong to the Jewish community, the others being controlled by separate congregations or belonging to private individuals. Among the numerous yeshibot the more important are: Blumke's yeshibah, the Little Yeshibah, and the yeshibah at the Synagogue of the Water-Carriers. The personnel of the Talmud Torah consists of eight "melammedim" and four instructors in general subjects; out of the 334 pupils only 106 studied these subjects. The expenditure of the Talmud Torah amounted to 4,355 rubles (1885). In 1879 a Jewish trade-school was established in Minsk with locksmiths' and carpenters' departments; instruction was offered also in general subjects, in Hebrew, and in religion. In 1885 the school had 112 apprentices, and it expended 5,912 rubles. The Jewish hospital, founded in 1829, has accommodations for seventy patients; its expenses amounted in 1885 to 8,068 rubles. The Jewish poorhouse, with eighty beds, had an expenditure of 5,356 rubles in the same year. Besides, there are many charitable associations, of which the more important are: a society for the assistance of students of the Talmud, with an expenditure of 3,000 rubles (1885); a society for the assistance of indigent sick, with an expenditure of 1,500 rubles (1885); and a society (founded about 1820) for the distribution of bread among the poor, with an expenditure of 3,310 rubles (1884).

H. R. M. R.

The following are the names of the Jews of Minsk who obtained particular prominence:

DISTRICT RABBIS.

Moses Zeeb b. Judah, author of "Ḳol Yehudah."

Menahem Mendel, son of the preceding.

Asher b. Löb, tosafist.

Isaac Abraham (held office 1749-55; d. 1776).

Raphael b. Jekuthiel Lifländer (1756-66).

Samuel of Indur (held office till 1777, when the district rabbinate was abolished by the government).

LOCAL RABBIS.

Moses (d. 1696), son of the martyr Mordecai, who was killed in Lublin Aug. 11, 1636.

Löb Ba'al ha-Tosefot (d. about 1708).

Löb b. Asher, author of "Sha'agat Aryeh."

Jehiel b. Solomon Heilprin (d. about 1742), author of "Seder ha-Dorot."

Moses b. Jehiel Heilprin, succeeded his father about 1744.

Joseph b. Simḥah Rapoport.

Gershon Ḥarif (1778-93).

Israel b. Löb Mirkes (d. about 1813).

Samuel Segal (d. Dec. 27, 1818).

Israel b. Ḥayyim Heilprin (d. 1836).

Isaac b. Naphtali Hirz Pines (d. 1836), chief of the bet din.

Judah Löb de Boton, son-in-law of Isaac Abigdor, author of "Pardes Rimmonim."

Zeeb Wolf b. Moses (dayyan; d. 1848).

Judah Löb b. Abraham (d. 1851).

David Tebele b. Moses, author of "Bet Dawid" (d. 1861).

Moses Ẓebi, appointed rabbi by the government.

Moses Samuel Pines (d. 1862), chief of the bet din.

Baruch b. Ẓebi,
Saul b. Solomon,
Ḥayyim Lipschitz,
Joel Ḥarif,
dayyanim.

Aryeh b. Jacob (d. 1866), chief rabbi; author of "Be'er Heṭeb."

Moses Judah Löb (d. 1889), son-in-law of David Tebele.

Jeroham Judah Löb Pearlman ben Solomon, Russian rabbi; born in Brest 1835; died in Minsk 1896. He was one of the greatest rabbis of his time, and was surnamed "Gadol" (great one) on account of his prominence in the world of Talmudical scholarship. At the age of thirty he became rabbi of Seltz, near Brest, where he remained till 1871, when he was called to occupy the office of rabbi in Pruzan, government of Grodno. After the death of the two rabbis of Minsk, R. Gershon Tanḥum and R. Aryeh of Umen, the congregation of that city decided to appoint him as its rabbi (1883); and he occupied the rabbinate till his death (Benzion Eisenstadt, "Rabbane Minsk wa-Ḥakameha," pp. 24, 62, Wilna, 1899).

Eliezer Rabinowitz, chief rabbi.

Isaac b. David Tebele,
Jacob b. Meïr,
assistant rabbis.

Abraham Haneles, appointed by the government.

PRESIDENTS OF YESHIBOT.

Aryeh Löb b. Ẓebi Horwitz, author of "Margenita Ṭaba."

Aryeh Löb b. Asher, author of "Sha'agat Aryeh."

Raphael b. Jekuthiel.

Joshua Heshel, author of "Maẓmiaḥ Yeshu'ah" and "Yeshu' be-Rosh"; died in Jerusalem.

Dob Isaac b. Ẓebi Meïr (d. 1851).

Israel Michael Jeshurun (d. 1851).

Abraham b. Joshua Evenzik (d. 1859).

Issachar Bär, surnamed "the diligent" ("Masmid"; d. 1879).

Gershon Tanḥum b. Elijah Benzion (d. 1881).

Solomon b. Saul Levin.

Mandel,
Ber of Krasni,
instructors at the yeshibah.

Abraham b. Asher Anshel, author of "'Ammude ha-Yemini."

PROMINENT PREACHERS.

Moses b. Judah, author of "Eben Shoham," who was later (1764) appointed preacher in London, where he published that work.

Israelit, Israel Asher b. Ozer, Russian preacher; born about 1806; died in Minsk June 6, 1896. He was popularly known as the "Grodnoer Maggid" and was the preacher of the Jewish community in Minsk for more than fifty-five years. Besides being an able preacher he was an indefatigable communal worker and very charitable. His simple life and his untiring exertions in behalf of the poor endeared him to all classes of the population. Numerous stories are still related in Minsk about his merciful exertions to release men who were unjustly impressed for military service in the last years of the reign of Nicholas I. as "poimaniki" or substitutes for others ("Aḥiasaf," 5696, p. 312).

Abraham b. Zechariah Hamburg.
Joshua Isaac b. Jehiel, author of "'Emeḳ Yehoshua'."
Abraham Abele Rosens, author of "Maḥazeh Abraham."

H. R. P. Wi.

AUTHORS, SCHOLARS, AND OTHERS.

Bampi, Issachar, author of a book "on Jewish customs."

Broyde, Aaron (d. 1897), one of the directors of the Government Bank at Minsk; he was honored with various medals.

Eliasberg, Judah Bezaleel (d. 1845).

Eger, Samuel, son of Akiba Eger.

Jolles, Isaiah Zechariah (d. 1853), author of "'Et le-Dabber" and "Dober Mesharim."

Kaplan, Jacob, corrected and added notes to the "Ereẓ Ḳedumim."

Levanda, L., Hebrew-Russian writer.

Luria, Jacob Aaron, honored by Nicholas I. with a medal for useful work in the Jewish community.

Luria, David, son of the preceding; contributor to the Hebrew periodicals of his time.

Libowitz (1758–1853), the miracle-worker; an intimate friend of Elijah Wilna.

Maskileison, Abraham b. Judah Löb (d. July 19, 1848), author of "Maskil le-Etan" and other works.

Maskileison, Naphtali (d. 1898), son of the preceding; publisher of the "Seder ha-Dorot," with his own critical notes and additions.

Menahem Eliezer b. Levi (d. 1817), author of "Ya'ir Ḳinno."

Rabinowitz, Eliezer Lipman (d. 1887), an eminent Talmudic scholar, and owner of a famous library.

Rapoport, Jekuthiel Süssel (d. 1872), member of the rabbinical committee appointed by the government.

Solomonov, Mordecai (d. 1897), author of many novellæ on Talmudical subjects.

Solomon, Menahem b. Elijah, author of novellæ on all parts of the Talmud.

PIONEERS OF "HASKALAH."

Brill, Joseph, Hebrew writer.
Haneles, Abraham, rabbi appointed by the government.
Horowitz, poet.
Kaplan, Israel, author of "Le-Torah we-Da'at."
Nofet, J. Zeeb, superintendent of the Jewish trade-school.
Sirkin, Joshua, prominent Zionist.
Sirotkin, Abraham, author.
Wohlman, Israel Mendel, ex-editor of the "Ha-Kokabim."

PHILANTHROPISTS.

Blimowitz, Bär; Eliasberg, Lipman; Eliasberg, Samuel Jonah; Ettinger, Hillel; Goldberg, David; Jolles, Zusman; Luria, Ḥayyim; Luria, Samuel; Pollak, Benjamin; Pollak, Moses; Ragovin, Uriah; Rapoport, Akiba; Simḥowitz, Mordecai; Sliasberg, Solomon; Solomonov, Moses Ẓebi; Zeldowitz, Bär; and Zeldowitz, Baruch.

H. R. N. T. L.

MINSKI, NIKOLAI MAKSIMOVICH: Russian poet and writer; born at Glubokoye, government of Wilna, in 1855. At the age of twelve Nikolai removed to Minsk and entered the local classical gymnasium (graduated in 1875). The town of his gymnasium course supplied him with his pseudonym "Minski," whereas his real family name is **Wilenkin.** He began his literary career in 1876, and at once attracted attention by his highly artistic poem "Na Rodinye." This appeared in the best Russian journal, "Vyestnik Yevropy," in which Minski has published most of his poems. "Na Rodinye" is an inspired poetical response to the sufferings of the Bulgarian people when the Russo-Turkish war was at its height. The period of Minski's elementary studies corresponded with that distinguished by the intense striving of Russian society for progress and enlightenment, and those auspicious years were important also for the Russian Jewry. The stimulating influence of the times was also reflected in the Jewish circle in which the future poet-philosopher lived and studied. He obtained his higher education in the department of law of the University of St. Petersburg, graduating in 1879 with the degree of bachelor of law. In that same year he published his best poem, "Byelyya Nochi," which reflects the spiritual life of the contemporary youth with its restlessness and its dreams. The characteristic feature of his poetry is its pessimistic mood; it exhibits a desire to lay bare the misery of life. Very frequently Minski is the poet of sorrow, but this sorrow is impersonal and concerns some hated problem. The first volume of his writings appeared in 1887 and was received with high praise by the critics, who nevertheless pointed out the defects of his verses. A second edition of his book was soon called for. In 1889 Minski wrote a historical drama, "Osada Tulchina," which shows an unusual clearness in character-drawing, a plot of absorbing interest, and an intimate knowledge of the history of the time, besides beauty of style. The drama describes in a characteristic manner the struggle of three peoples—the Jews, Poles, and Little-Russians. Others of Minski's writings likewise are of significance to Jews. In 1879–80 he published in the Russo-Jewish journal "Razsvyet" a series of war feuilletons under the signature "Nord-West," written after the manner of Börne's "Parisian Letters." In these writings he attacked fiercely the enemies of Judaism. In the more recent period of his literary activity, beginning with the nineties of the nineteenth century, Minski has turned from Jewish life and its interests, and has devoted himself to literary philosophy, tinged strongly with Christian mysticism (see Brockhaus, and also Skabichevski's "Istoria Noveishei Russkoi Literatury").

MINTERS: Persons authorized to strike coinage on behalf of a government. As early as 555 a certain Priscus struck coins at Châlons ("R. E. J." x. 237). One Gideon was minter at Milan in the tenth century. In 1181 three Jews at Winchester were apparently fined for minting, though the reading of the document on which the statement is based is ambiguous (Jacobs, "Jews of Angevin England," p. 73). Several "short-cross" pennies exist of the twelfth and thirteenth centuries with names of moneyers which may be Jewish, as David of London, Isaac of York, Samuel, Simon, and Solomon of Canterbury; but it is doubtful whether these were really Jews (*ib.* pp. 392–396). A certain number of German coins of the twelfth century with Hebrew inscriptions have been found (see Aronius, "Regesten," Nos. 351, 389). A certain Jew, Jehiel, is mentioned as mint-master on one of the coins of Bishop Otto of Würzburg; another held a similar position in Treves (Lamprecht, "Deutsches Wirthschaftsleben," ii. 1452, 1472). Earlier than this a Jew named Schlom was mint-master to Leopold V. of Austria. He appears to have been murdered during the Third Crusade (Scherer, "Rechtsverhältnisse der Juden," i. 121 *et seq.*). In Hungary the early minters appear to have been exclusively Jews (Kohn, "A Zsidók Tostenete Magrarorszagan," i. 240); and there are a number of Polish coins with Hebrew inscriptions (see NUMISMATICS). J

MINYAN (מנין): Literally, "count"; the quorum necessary for public worship. The smallest congregation which is permitted to hold public worship is one made up of ten men, boys over thirteen years being for this, as for other religious purposes, counted as men. See BAR MIẒWAH.

The minimum of ten is evidently a survival in the Synagogue from the much older institution in which ten heads of families made up the smallest political subdivision. In Ex. xviii. Moses, on the advice of Jethro, appoints chiefs of tens, as well as chiefs of fifties, of hundreds, and of thousands. In like manner there were the decurio among the Romans and the tithingman among the early English.

The rule is laid down in the Mishnah thus (Megillah iv. 3): "They do not [1] 'divide' over the Shema' [Hear, O Israel], [2] nor pass before the Ark, [3] nor lift their hands, [4] nor read from the Law, [5] nor conclude with the Prophets, [6] nor arrange the standing and sitting, [7] nor say the benedictions of the mourners or the consolation of the mourners, [8] nor the benedictions of the bridegrooms, [9] nor use God's name in preparing for grace after meals, with less than ten."

The references in this rule are to: [1] The invocation "Bless ye" ("Bareku") with its response, which, with or without a "Ḳaddish" preceding it, is recited before the first benediction of Shema' in the evening and morning service. [2] The repetition of the prayer proper, *i.e.*, the Eighteen or Seven Benedictions, by the leader, and including the responsive KEDUSHSHAH. [3] The priestly blessing (Num. vi. 24-26). [4] The reading from the Scroll and benedictions before and after the lesson. [5] The hafṭarah with like benedictions. [6] Some ancient funeral ceremonies. [7] Likewise forms no longer in use. About these it is said (Ket. 8a, b) that the mourners are not counted among the ten. [8] The seven benedictions spoken at a wedding, or at any meal of the bridegroom and bride within a week from the wedding. [9] The sentence "Let us bless *our God*, from whose wealth we have eaten," instead of "Let us bless Him from whose," etc., with which latter words grace is begun when three or more have eaten at the same table (Ber. viii. 3). The distinctions there suggested between ten and eleven, or between ten and a hundred, have not been followed in practise.

The Babylonian Talmud, in commenting on this section of the Mishnah, finds the Scriptural authority for ten men constituting a congregation in the words (Num. xiv. 27): "How long shall I bear with this evil congregation which murmur against me?" which it refers to the scouts who were sent to spy out the land of Canaan, twelve in all, two of whom, Caleb and Joshua, were faithful, and only ten "evil."

Eligible for Quorum.

All male Israelites of the proper age, unless they are under the ban, or have openly severed their connection with their brethren by professing a hostile creed, are counted among the needful ten even though they are notorious and habitual sinners (Oraḥ Ḥayyim, 55, 12).

It is suggested (Ber. 47 and Yer. Ber. vii. 3) that while slaves or boys under thirteen are not counted in minyan, one slave or one minor boy may be admitted along with nine qualified men—at least when the boy is nearly of full age (a budding boy); and an example in an analogous case is given (Ber. 48a) of two prominent rabbis counting a boy as one of the three men necessary for saying grace after meals, it having been ascertained that he had ideas about God and prayer. The codes are somewhat divided on this subject: public service should be carried on with nine men and one infant only in "case of need," that is, if the attendance of a tenth man is not expected for that service (Oraḥ Ḥayyim, 55). Usage varies: in some synagogues nine adults and a boy over twelve years of age are deemed adequate for minyan; yet in the usage of other synagogues they are not adequate.

While women may, in certain contingencies, take an active part in public service, by reading parts of the weekly lesson (Megillah 23a; allowed by all the codes, but rarely, if ever, carried out in practise), none of the authorities speaks of counting women in the minyan.

The ten men include the leader. They and he should meet in one room or enclosure; Maimonides (Hil. Tefillah, viii.) discusses how the ten may be distributed in two adjoining rooms without destroying the quorum; but they must be within hearing of each other.

In the same chapter Maimonides explains as the advantage of reciting the prayer with minyan: that it is sure to be heard; and, following the Talmudic passages below, the other codes concur.

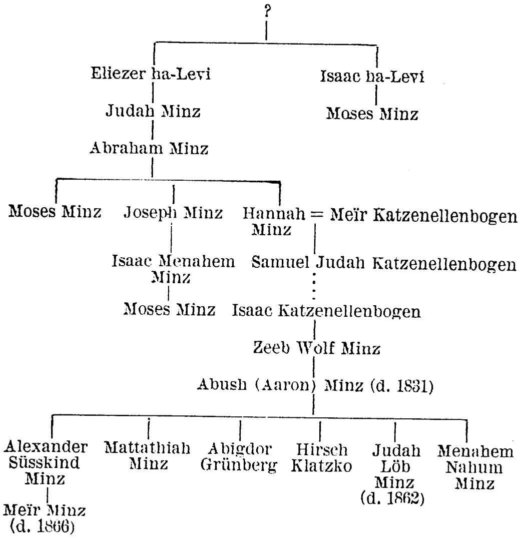
Presence of the Shekinah.

It was the firm belief of the sages that wherever ten Israelites are assembled, either for worship or for the study of the Law, the Shekinah (Divine Presence) "dwells" among them. Thus (Abot iii. 6): "R. Ḥalafta, the man of Kefar-Ḥananiah, says: When ten men sit down together to study the Law [another reading has it: "to act as judges"], the Presence dwells among them; for it is said (Ps. lxxxii. 1): God ["Elohim"] standeth in the congregation of God ["El."]." A baraita (Ber. 6a) puts it plainly: "Whence do we know that the Holy and Blessed One is found at the synagogue; or that when ten men say prayers together the Presence dwells among them?" It answers each of these questions with the verse of the psalm quoted above; it being understood that the word "'edah" (congregation) means ten or more Israelites meeting for a religious purpose. And the words in Solomon's prayer (I Kings viii. 28), "to hearken to the song and to the prayer," are shown by Abba Benjamin (Ber. *ib.*) to mean that man's prayer is best heard at the synagogue, for where men sing, there also they should pray. Both in the Mishnah and in the baraita quoted, consolation is held out to those who for study or prayer meet in smaller numbers—even to one who meditates or prays alone; but the stress is put upon the merits and sacredness of the minyan. The codifiers, such as Maimonides, his annotators, and the author of the Shulḥan 'Aruk, and many popular writers, have unitedly given strength to this sentiment, and have thus, for more than a thousand years, made the daily attendance at public worship, morning and evening, the rule among both men and boys in Israel.

The treatise Soferim, written in Babylonia in the seventh century, contains a passage (x. 7) often interpreted as asserting that in Palestine at that time seven men were allowed to hold public services. Correctly interpreted it refers to the repeating of "Ḳaddish" and "Bareku" at the synagogue for the benefit of late comers, and declares that in Palestine such a repetition is permitted only when seven (according to others, when six) men are present who have not yet heard these responsive readings. In modern times various authorities (*e.g.*, the Rabbinical Conference at Breslau, the "Oberrath" in Mecklenburg (1847), and Naphtali Ẓebi Judah Berlin in Woloshin) have declared the public worship permissible without the presence of minyan.

A. L. N. D.

MINZ (מינץ): Family of rabbis and scholars, deriving its name from the town of Mayence and founded in the fifteenth century. The family tree is as follows:



Judah b. Eliezer ha-Levi Minz (Minzi), the progenitor of the most prominent branch of the family, settled, or was born, in Italy in the fifteenth century. His cousin Moses b. Isaac ha-Levi Minz (Minzi) was a rabbi in Germany. The name "Minz," however, appears to have been borne by others in Italy who were not related to Judah Minz; for Joseph Colon (Responsa, No. 2) speaks of Joshua and Solomon, sons of an Abraham Minz who had formerly lived under the Duke of Milan and then removed to another town in Lombardy in order to avoid paying his part of the 13,000 gold pieces which the Jews of Milan had pledged themselves to pay the duke. Asher b. Perez Minz of Naples was related, perhaps, to the German branch of the Minz family. The last known direct male descendant of Judah Minz was **Moses b. Isaac Menahem Minz,** a descendant in the fourth generation.

At the beginning of the sixteenth century the Minz family of Padua united with that of Katzenellenbogen through the marriage of the daughter of Abraham ben Judah Minz to Meïr Katzenellenbogen of Padua. The descendants of this alliance emigrated afterward to Germany and then to Russia, and Zeeb Wolf b. Isaac, in Russia, a descendant of the tenth generation, assumed the name of Minz. From him is descended the present family of Minz.

BIBLIOGRAPHY: Eisenstadt-Wiener, *Da'at Ḳedoshim*, part iii., pp. 82-86; Nepi-Ghirondi, in *Kerem Ḥemed*, iii. 91; Mortara, *Indice*, p. 39.

Abraham ben Judah ha-Levi Minz: Italian rabbi; flourished at Padua in the first half of the sixteenth century; father-in-law of Meïr Katzenellenbogen. Minz studied chiefly under his father, Judah Minz, whom he succeeded as rabbi and head of the yeshibah of Padua. According to Ibn Yaḥya ("Shalshelet ha-Ḳabbalah," p. 51a, Amsterdam, 1697), it was with Abraham Minz that Jacob Polak had the quarrel which ended in their excommunicating each other; according to most other authorities, the quarrel was with Judah Minz (see Jacob Polak). Ibn Yaḥya further says that the Italian rabbis believe that Polak and Abraham Minz died on the same day (according to David Gans in 1530; according to Halberstam in 1541). Minz was the author of a number of decisions that were printed with those of R. Lewa of Ferrara (Venice, 1511). He was the author also of "Seder Giṭṭin wa-Ḥaliẓah," a treatise on divorce and ḥaliẓah, printed with the responsa of his father and of his son-in-law (*ib.* 1553).

E. C. M. Sel.

Asher ben Perez Minz: German printer; typesetter in Azariah b. Joseph's printing establishment in Naples, where was printed, in 1491, the Hebrew translation of Avicenna's "Canon." Wolf ("Bibl. Hebr." i., No. 366), following Bartolocci, read מניצא ("mi-Nizza" = "of Nizza") instead of מינצא ("Minza").

BIBLIOGRAPHY: De Rossi, *Annales*, p. 179; Steinschneider, *Cat. Bodl.* col. 2841.

Judah ben Eliezer ha-Levi Minz: Italian rabbi; born about 1408; died at Padua in 1508. He was the most prominent rabbi of his time. He officiated as rabbi of Padua for forty-seven years, during which time he had a great number of pupils, among whom were his son Abraham Minz and the latter's son-in-law Meïr Katzenellenbogen. In a quarrel he had with Elijah Delmedigo he was supported by Elijah Mizraḥi (comp. Joseph Solomon Delmedigo, "Maẓref la-Ḥokmah," p. 3b; *idem*, "Elim," p. 29; Mizraḥi, Responsa, No. 56). It appears from Solomon Luria's responsa (No. 6) that Minz was the author of a number of ordinances ("taḳḳanot") at Padua. According to Ghirondi, he was professor of philosophy at the University of Padua. Ghirondi further states that in recognition of Minz's services as professor the authorities of the university placed his portrait, with an appreciative inscription, in the hall of the university, over the staircase. But it is very likely that Ghirondi confounded Minz with Elijah Delmedigo or Abraham de Balmes, both of whom lectured on philosophy before Christian audiences. In the sack of Padua soon after Minz's death almost all of his writings were destroyed. Joseph b. Abraham Minz, his grandson, discovered sixteen of his responsa, and these were published (Venice, 1553) by Meïr Katzenellenbogen, who printed in the same volume his own responsa and the "Seder Giṭṭin wa-Ḥaliẓah" of Abraham Minz. These responsa have been edited, and supplemented with an extended commentary and preface, by Johanan ben Moses Preschel (Munkacs, 1898). Judah's responsa, though scanty, afford interesting information on the history of his age and on Jewish customs in Padua.

Bodl.* col. 1344.

Meïr ben Alexander Süsskind Minz: Galician scholar; born Oct. 6, 1814; died May 22, 1866. Having acquired a thorough knowledge of Hebrew, the Talmud, and of several European languages, Meïr Minz devoted himself to the defense of Judaism. He wrote: "Ein Wort zur Zeit" (1848); "Lelewels Kampf um Recht"; "Die Judenfeinde."

BIBLIOGRAPHY: Eisenstadt-Wiener, *Da'at Ḳedoshim*, part iii., p. 85.

Moses ben Isaac ha-Levi Minz: German rabbi of the fifteenth century; contemporary of Israel Isserlein, whom he frequently consulted. He was successively rabbi at Mayence, Landau, Bamberg, and Posen. In his responsa (No. 114) he mentions a certain Jacob Margolioth of לוקו (Lucca?), and refers to a case of divorce in Posen in 1444 (Steinschneider gives 1474). Fränkel ("Zeitschrift," iii. 387) doubts that Moses ever was at Posen. He suggests that פוזנו (Posen) is a printer's mistake for פיזרו (Pesaro). Moses' responsa (Cracow, 1617) mention also Joseph Colon, Israel Isserlein, and his cousin Judah Minz. Responsum No. 46 contains a dispute over a philological point with Eliezer Treves (comp. M. Wiener in "Monatsschrift," xvi. 390).

D. M. SEL.

MIPHKAD (מפקד; R. V. **HAMMIPHKAD**): Name of a gate mentioned in connection with the repair of the wall of Jerusalem by Nehemiah (Neh. iii. 31). It seems that this gate was not in the wall of Jerusalem, but that the part of the wall facing it was to the east, between the Horse Gate and the Sheep Gate. Indeed, it is not mentioned among the gates of Jerusalem in Neh. xii. 31 *et seq.* The word מפקד designates in Ezek. xliii. 21 the place near the Temple where the sin-offering was burned, and it seems to mean "an appointed place," to which the name of this gate may refer. But, while the Septuagint renders שער המפקד by *πύλη τοῦ Μαφεκάδ*, Jerome translates it by "porta judicialis," which induces Lightfoot ("Horæ Hebraicæ," ii. 27) to suggest that it may refer either to the hall of judgment in the Prætorium or to the east gate of the Temple. Barclay ("City of the Great King," p. 156), however, identifies the gate Miphkad with the "high gate of Benjamin" (Jer. xx. 2), locating it at the west end of the bridge which crosses the Tyropœon.

S. M. SEL.

MIRABEAU, GABRIEL HONORÉ RIQUETI, COMTE DE: French statesman of the revolutionary era; born at Bignon March 9, 1749; died at Paris April 2, 1791. Sent by De Calonne on a secret mission to Prussia, he became acquainted at Berlin with several distinguished Jews belonging to the circle of Henriette HERZ, and associated much with DOHM, the author of "Ueber die Bürgerliche Verbesserung der Juden." Recognizing the advantage which France might derive from the Jews, Mirabeau wrote, and published in London (1787), his "Sur Moses Mendelssohn, sur la Réforme Politique des Juifs et en Particulier sur la Révolution Tentée, en Leur Faveur, en 1753, dans la Grande Bretagne." When he was elected deputy from Provence to the States General, and one of his Jewish friends of Aix asked what he would do in the Assembly, he replied, "I will make a human being of you." True to this promise, he seized every opportunity to plead for the emancipation of the Jews, being, together with the Abbé Grégoire and the pastor Rabaud-Saint-Etienne, one of their most zealous advocates. Several times he took up their cause before the National Assembly: on Aug. 17, 1789, he proposed, in the name of the "Committee of Five," the "Declaration of the Rights of Man"; on Aug. 22 he eloquently attacked religious intolerance, and he was the first to protest against the institution of a dominant state church—"Nothing should dominate except justice; nothing should dominate but the rights of each man, to which all else is subject." On Dec. 24, in speaking in favor of the admission of Jews to civil and military offices, he said: "I have heard with astonishment the honorable speaker [H. de Baumetz] state that the Jews perhaps do not desire the civil and military offices to which you declare them eligible, and draw therefrom the specious conclusion that it would be a gratuitous and ill-advised generosity on your part to pronounce them fit for such positions. . . . In a government such as you are establishing all men must be equal; you must exclude all who are not equal or who refuse to become so. The petition which the Jews, however, have laid before this Assembly contradicts the statement of the gentleman who has just spoken."

Like all who at that time took the part of the Jews, Mirabeau found his motives misinterpreted, being accused of accepting bribes from the Jews and of deriving benefit from ministerial appointments; but he never allowed himself to be moved from his purpose. While Mirabeau in 1787 was already in favor of the emancipation of the Jews, he expected that, like other acts of the doctrinaires then in power, it would embitter the people against the Jacobins and lead to a moderate constitutional government. This appears clearly from the secret correspondence in which he furnished the king with reports of the proceedings of the National Assembly and with directions in regard to the policy to be pursued by the court ("Correspondance Entre le Comte de Mirabeau et le Comte de la Marck . . . Publiée par M. A. de Bacourt," ii. 374–377, Paris, 1851; Oncken, "Das Zeitalter der Revolution, des Kaiserreiches und der Befreiungskriege," i. 340, Berlin, 1884).

D. S. K.

MIRACLE (פלא, מופת, אות; lit. "wonder" or "sign"): An event which can not be explained by ordinary natural agencies, and which, therefore, is taken as an act of a higher power.

Miracles are by no means identical with myths. Myths are primitive or pagan personifications (or rather deifications) of the powers, or forms of nature, represented as acting like human beings. Miracles, on the contrary, place all things in nature under the control of a higher power, which uses them as means of working out its holier designs; they are, therefore, essentially monotheistic. It is true, however, that ancient myths have frequently been transformed in support of the monotheistic idea into miracles performed by prophet or saint (see Steinthal, "Mythe und Religion").

In the Bible every occurrence which contrasts with the ordinary happenings of life is counted a miracle or wonder. It is by the wonders which the Lord did in Egypt (Ex. iii. 20, vii. 3, xi. 9; Deut. iv. 34, vi. 22, vii. 19, xxvi. 8, xxix. 2; Judges vi. 13; Jer. xxxii. 20, 21; Ps. lxxviii. 43, cvi. 7) that His power was made known. He alone "does wonders" (Ex. xv. 11; Ps. lxxii. 18, lxxxvi. 10); there is nothing "too wonderful" (Gen. xviii. 14; Jer. xxxii. 17, 27 [A. V. "too hard"]) for Him. He worked wonders for Israel as for no other nation (Ex. xxxiv. 10; Josh. iii. 5). But He works wonders without number in the natural world also (Job v. 9, xxxvii. 14; Ps. cvii. 24). As a matter of fact, every occurrence in nature is, in the Biblical view, an act of God. He sends the rain and causes the thunder (Job xxxvii. 4-6); "He bringeth out the stars by number" (Isa. xl. 26, Hebr.); every work of creation is an act of His providence (Ps. civ.). Yet only an uncommon or inexplicable event makes man ponder and see "the finger of God" (Ex. viii. 15); God must "make a new thing" in order to make men know that He rules (Num. xvi. 30). The rain, hail, fire, and brimstone that are treasured up in the heavens must come down in an unusual time and quantity to destroy the evil-doers (Gen. xx. 24; Ex. ix. 22-24; Josh. x. 11; comp. Ps. xviii. 13 [A. V. 12]; Job xxxvii. 6, xxxviii. 22); the waters of the sea and the river must leave the place assigned to them to show His might (Ex. xiv. 21-27; Josh. iii. 13-16); and sun, moon, and stars must be stayed in their course to show that God battles for Israel (Josh. x. 10-14; Judges v. 20).

The miracles of the Bible are performed either directly by the Deity—to manifest His punitive justice, as in the cases of Sodom, of Egypt, of the Canaanites or Assyrians, or of individuals, such as Abimelech, Korah, Uzza, and others (Gen. xix. 24; Ex. viii.-xiv.; Josh. vi.-x.; II Kings xix. 35; Gen. xii. 17; Num. xvii.; II Sam. vi. 7), or to protect His chosen ones, as in the furnishing of water, bread, and meat to Israel in the wilderness (Ex. xv. 23, xvii. 7; Num. xii. 31), to Samson and Elijah (Judges xv. 19; I Kings xvii. 6, xix. 5)—or by the messengers of God in order to prove their divine calling (Ex. iv. 1-17; Deut. xxxiv. 11; II Kings ii.-vi.). Every theophany, in fact, is a miracle (Ex. xvi. 7-13, xxi. 17-19; Judges vi. 21-22), and accordingly the revelation of the Lord on Sinai is the greatest of miracles (Deut. iv. 32-36). A literal belief in the Torah, therefore, necessarily implies a belief in the miracles told therein.

Belief in Miracles.

Nevertheless, the Torah itself lays down the principle that miracles are no test of the truth of the thing for which their testimony is invoked. The Deuteronomic law says: "If a prophet arise among you who giveth a sign or wonder, and the sign or wonder comes to pass, but he desires to lead you into idolatry, thou shalt not hearken to that prophet, for the Lord your God trieth you whether you truly love the Lord your God" (Deut. xiii. 2-4, Hebr. [A. V. 1-3]). This is a plain statement that miracles do not prove a religious truth, as they are performed also in the cause of untruth.

Talmudic Judaism.

Miracle has justly been called "des Glauben's liebstes Kind" (the dearest child of faith). The belief in God's omnipotence and all-encompassing providence necessitates at a certain stage of religious consciousness the belief in miracles, that is, in supernatural help in times of great stress or peril. To deny the possibility of miracles appears to the believing soul to be tantamount to a denial of the absolute omnipotence of God. "Is anything impossible to God?" "Is the Lord's hand waxed short?" (Gen. xviii. 14, Hebr.; Num. xi. 23) are questions asked ever anew by helpless man. Talmudic Judaism, therefore, accepts all the miracles related in the Bible, but at the same time it does not emphasize belief in them as fundamental to the faith. What Paul says of the Jews, "they seek signs while the Greeks seek wisdom" (I Cor. i. 22, Greek), is certainly not true of the representatives and exponents of Judaism. Miracles, which occupy so conspicuous a place in the New Testament and in the history of Christianity, are viewed as matters of secondary importance throughout the rabbinical literature.

The Talmudic sages made the very possibility of miracles a matter of speculation, stating that "when God created the world He made an agreement that the sea would divide, the fire not hurt, the lions not harm, the fish not swallow persons singled out by God for certain times, and thus the whole order of things changes whenever He finds it necessary" (Gen. R. v. 4; Ex. R. xxi. 6). This view removes some of the objections to miracles as involving an interruption of the order of creation and as an admission of the insufficiency of the first creative act. In the same spirit the Rabbis, in the Mishnah (Ab. v. 6; comp. Ab. R. N., Text B, xxxvii. [ed. Schechter, p. 95]; Sifre, Deut. 355; Pirḳe R. El. xix.; Targ. Yer. to Num. xxii. 28), enumerate the things created at dusk on the Sabbath of the week of creation, and that would appear in due time as miraculous works: the mouth of the earth (Num. xvi. 30); the mouth of the well (*ib.* xxi. 17); the mouth of the ass (*ib.* xxii. 28); the bow (Gen. ix. 13); the manna; the rod (Ex. iv. 17); the tables of the Law; and so on. The underlying idea of these utterances is that miracles, instead of being interruptions of the divine order of things, are in reality foreordained by the creative wisdom and appear only to man as something new.

The Rabbis prescribe benedictions to be recited when approaching places made memorable by miraculous events (Ber. ix. 1, 53b–54a); they speak of miracles which occurred continuously during the time of the Temple (Ab. v. 5; Yoma 21a, b); they knew of saints to whom, as to the Prophets of old, miracles were of daily occurrence ("melummadim be-nissim"; Ta'an. 21–25; Ḥul. 7a; see Essenes). Nevertheless, they pay little heed to the power of miracles. Simeon b. Shetaḥ threatened Onias the saint with excommunication for his demonstrative appeal to God to send down the rain in a miraculous manner (Ta'an. iii. 8). When asked by the Romans, "If your God is as omnipotent as you claim, why does He not destroy the idols?" the Jewish sages replied, "Shall God destroy sun, moon, and stars on account of the fools that worship them? The world goes on in its order, and the idolaters shall meet with their doom" ('Ab. Zarah iv. 7). When Pappus and Lulianus were asked by their Roman executioners, "Why does your God not save you as He did the three youths in Nebuchadnezzar's time?" they replied, "We are probably not worthy of such a miracle" (Ta'an. 18b).

The current belief of the Talmudic time is that only former generations, because of their greater piety, were worthy of miracles occurring on their account (Ber. 4a, 20a; Sanh. 94b). "One should by no means incur perils while relying for safety upon the occurrence of a miracle" (Pes. 50b; Ta'an. 20b; Ket. 61b). That miracles should not be invoked as testimony in favor of one religious opinion as against another is the principle asserted in a halakic controversy between R. Eliezer and R. Joshua (B. M. 59b; "The Torah is not in heaven that the decision should be made there"). The daily wonders of divine providence are extolled by some rabbis above the Biblical miracles: "Greater is the miracle that occurs when a sick person escapes from perilous disease than that which happened when Hananiah, Mishael, and Azariah escaped from the fiery furnace" (Ned. 41a). The wonder of the support of a family in the midst of great distress is as great as the wonder of the parting of the Red Sea for Israel (Pes. 118a).

The medieval Jewish philosophers endeavored as much as possible to bring the Biblical miracles within the sphere of natural occurrences, without, however, denying the possibility of miracle in general. Saadia, while accepting every word of the Torah as divine, insisted that the truth of the Bible rests upon reason, and wherever the Bible seems to be in conflict with reason the words must be taken in a metaphorical sense ("'Emunot we-De'ot," ii. 44, 68); he therefore substituted for the speech of the serpent (Gen. iii. 1) and of Balaam's ass (Num. xxii. 28) that of the angel (Ibn Ezra to Gen. iii. 1). Maimonides, while maintaining against the Aristotelian view of the unalterable law of necessity ruling nature the absolute freedom of the Creator which makes miracle possible, finds at the same time in the rabbinical utterances quoted above (Gen. R. v. and Ab. v. 6) support for his view that the Creator implanted the powers of miracle in nature, so that in reality God did not effect any change after creation ("Moreh," ii. 25, 29, and comment to Ab. v. 6; comp. Joël, "Moses Maimonides," 1876, p. 77; Lipmann Heller to Ab. *l.c.*). With finer acumen Gersonides discussed the problem of miracles in the last part of his "Milḥamot" (see Levi ben Gershon), ascribing them to the divine intelligence which foreordains all things, but denying the actuality of the performance within a given time. This is opposed by Crescas, who nevertheless takes miracles as prearranged in the divine plan of creation ("Or Adonai," iii. i. 5). In the "Yad" (Yesode ha-Torah, viii. 1–3) Maimonides declares that the belief in Moses and his law was based on the actual revelation of God on Sinai and by no means on the miracles performed; since miracles may be the work of witchcraft and of other non-divine agencies, they can not be accepted as proof. This position is taken also by Albo ("'Iḳḳarim," i. 18).

Consequently miracles are never adduced in support of the faith by Jewish writers; and Mendelssohn, in his answer to Bonnet, who referred to the miracles of the New Testament as proof of the truth of Christianity, was perfectly justified in declaring in the name of Judaism that miracles may be appealed to in support of every religion and that therefore they can not serve as proof of any (Mendelssohn, "Gesammelte Schriften," iii. 123 *et seq.*, 311). Modern historical research can no longer, says Joël (see "Jahrb. für Jüdische Gesch. und Litteratur," 1904, pp. 70–73), view the narratives of the Bible in the same light as did the medieval thinkers who could not discriminate between the objectivity of the facts narrated and the subjectivity of the narrator.

K.

MIRANDA, LALLA: Australian singer; born in Melbourne 1876. Both of her parents were singers, and she herself sang in public when only thirteen years of age. After completing her musical education in Europe, under Mdlle. de Garette, and Madame Richard of the Grand Opera, Paris, she sang for three consecutive years at the opera-houses of Amsterdam and Rotterdam. Later she appeared at the Théâtre de la Monnaie, Brussels, and in 1900 sang in "Rigoletto" at the opera, Covent Garden, London.

MIRELS, MESHULLAM ZALMAN BEN DAVID (NEUMARK): German rabbi; born about 1620 at Vienna; died Nov. 28, 1706, at Altona. When, in 1670, the Jews were expelled from Vienna, he and his son Zeeb Wolf and other members of the Mirels family emigrated to Berlin. A few years later (1678) Mirels was elected chief rabbi ("ab bet din") of the communities Altona, Hamburg, and Wandsbeck, which position he held until his death. He was the father of a large family, ramified through Poland and Lithuania, and lived to see the fifth generation. His daughter Sarah was the wife of Ẓebi Ashkenazi (Ḥakam Ẓebi) and the mother of Jacob Emden.

One responsum written by Mirels is found in the collection "Eben ha-Shoham." See also Jew. Encyc. i. 474, *s.v.* Altona.

D. S. Man.

MIRELS, ẒEBI HIRSCH BEN AARON: German Talmudist; rabbi of Schwerin in the middle of the eighteenth century. He received his early education in London. After studying at various yeshibot he became rabbi at Wreschen, Poland, and shortly after was appointed rabbi to the congregation at Schwerin. He was the author of "Mispar Ẓeba'am" (Berlin, 1787), a pilpulistic treatise on the Talmud, in two parts—"Pinnot Ẓeba'aw" and "Ereẓ Ẓebi."

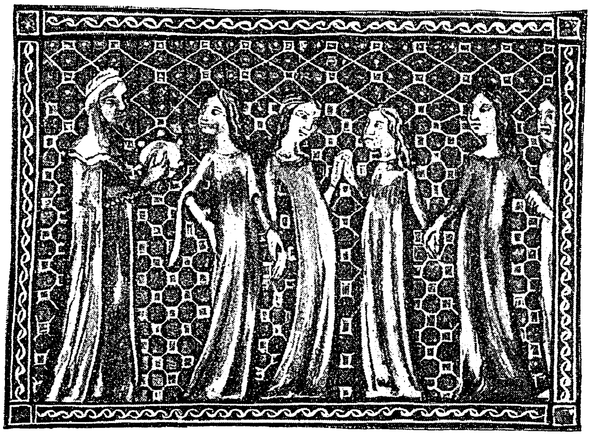
MIRÈS, JULES ISAAC: French financier; born at Bordeaux Dec. 9, 1809; died at Marseilles in 1871. A broker in 1848, he became, after the February Revolution of that year, director of the gas company of Arles. Subsequently he bought the "Journal des Chemins de Fer" and founded the "Conseiller du Peuple," which became quite popular through Lamartine's contributions. Together with Millaud, Mirès organized the "Caisse des Chemins de Fer," of which he became sole director in 1853. In 1851 he bought "Le Pays" and "Le Constitutionnel." He undertook colossal works at Marseilles, including the construction of a harbor and of a new quarter of the city, and the installation of a system of illumination by gas. In 1860 he obtained the concession for the construction of the Roman railroads and for the negotiation of the Turkish loan. On July 11, 1861, he was sentenced to five years' imprisonment and to the payment of a fine of 3,000 francs, but he succeeded in getting this verdict set aside on April 21, 1862, and was rehabilitated by the court of Douai. Toward the end of 1869 Mirès was sentenced to six months' imprisonment and fined 3,000 francs on account of his pamphlet "Un Crime Judiciaire," attacking the expert Monginot and the judges who had tried his suit against the firm of Pereire.

He contributed several financial articles to "Le Constitutionnel" and "La Presse," and published a number of pamphlets, including "Aperçus Financiers" (1868) and "Mémoires Judiciaires" (in his own defense).



Miriam.
(From the Sarajevo Haggadah of the fourteenth century.)

He was decorated by Napoleon III. with the ribbon of the Legion of Honor in 1860. His daughter married a French nobleman.

MIRIAM.—Biblical Data: Prophetess; daughter of Amram and sister of Moses and Aaron (I Chron. vi. 3; Ex. xv. 20; Num. xxvi. 59). When Moses was left at the river Miriam watched from a distance until Pharaoh's daughter took him up, whereupon she proposed to the princess to find a Hebrew nurse; the princess assenting to this, Miriam returned with her mother (Ex. ii. 4–7). After the Israelites had crossed the Red Sea Miriam sang a song of triumph, in which all the women joined (Ex. xv. 20–21). Miriam and Aaron spoke against Moses on account of the Cushite woman whom he had married, whereupon God summoned Moses, Aaron, and Miriam to the tabernacle of the congregation, reproved her, and punished her with leprosy. She was healed through the prayers of Moses, but was obliged to remain without the camp of the Israelites for seven days, although the people did not proceed until she had returned (Num. xii.). Miriam died in the desert at Kadesh, where she was buried (Num. xx. 1). In Micah vi. 4 she is mentioned, with Moses and Aaron, as a leader of the people.

S. J. Z. L.

——**In Rabbinical Literature:** Miriam was born at the time when the Egyptians began to embitter the lives of the Israelites by imposing arduous tasks upon them (comp. Ex. i. 14), and for this reason she was called "Miriam," since the consonants in the word "Miriam" (מרים) may also read "marim" (="bitter"; Cant. R. ii. 11). She was called also "Puah," and was, like her mother, a midwife (comp. Ex. i. 15). When only five years of age she was skilful enough to help her mother (Ex. R. i. 17; see Jochebed). She had the courage to tell Pharaoh that he would be punished by God for his cruelty to Israel, and almost lost her life in consequence (*ib.*). When her father, Amram, had divorced her mother as a result of the cruel edict referring to the exposure of the children, she induced him to take her mother back (*ib.*; Soṭah 12a), and she sang and danced on the day of the remarriage of her parents (Ex. R. i. 23; B. B. 120a). She predicted to her father that a son would be born to him who would liberate Israel from the Egyptian yoke. When Moses was born her father kissed her and said, "Your prophecy, my daughter, is fulfilled." But when subsequently the child had to be cast away her parents upbraided her and asked what would now be the outcome of her prophecy. Miriam therefore went to the river (Ex. ii. 4) to see how her prophecy would be fulfilled (Ex. R. i. 26; Soṭah 12b–13a).

Her Names.

Miriam is said to have had also the following names: Ephrath, Helah, Naarah, Azubah, Jerioth, Zohar, Zereth, Ethan, and Aharhel (comp. I Chron. ii. 18, iv. 5–8), which were given to her on special occasions (Ex. R. i. 21; Soṭah 11b–12a). She was married to Caleb b. Jephunneh, or b. Hezron, to whom she bore Hur (comp. I Chron. ii. 18–21). Then she fell ill (hence her name "Helah") and was thereupon left by her husband (hence the name "Azubah"). Subsequently she regained her health, became again like a young woman (hence the name "Naarah"), and was taken back by her husband (Ex. R. *l.c.*). Miriam was the ancestress of King David, and of Bezaleel, who made the Tabernacle and its vessels. Bezaleel's wisdom (comp. Ex. xxxi. 3) is said to have been due to his grandmother Miriam (Ex. R. xlviii. 6). To have so illustrious a descendant was Miriam's reward for not obeying Pharaoh (comp. Ex. i. 21; Ex. R. *l.c.*). When Miriam talked against Moses (comp. Num. xii.) she did not intend to slander him; she wished him to live with his wife and raise children (Deut. R. vi. 6). But when she was punished with leprosy, and had to remain without the camp, God honored her by officiating as priest Himself (Zeb. 102a). The Israelites waited for her seven days (Num. xii. 15; Soṭah 9b), for she had once waited for Moses by the river (Ex. ii. 4).

Miriam is regarded as the savior of Israel (Ex. R. xxvi. 1). For her sake a marvelous well accompanied the Israelites, a rock from which water flowed. This well disappeared after Miriam's death (Ta'an. 9a). It was subsequently shown in the sea (Shab. 35a). Miriam, like Moses and Aaron, died by a kiss from God (M. Ḳ. 28a), for the angel of death could not take her; and worms did not touch her body (B. B. 17a). Another legend says that Miriam, like Moses and Aaron, died on account of the water of strife ("me meribah"; comp. Num. xx. 7–13). This seems inconsistent, for, according to the Bible as well as the legends, water became scarce only after Miriam's death, with the disappearance of the well (Lev. R. xxxi. 5 and commentaries *ad loc.*).

MIRKES, SOLOMON ZALMAN BEN JUDAH LÖB: Lithuanian Talmudist of the eighteenth century; a native of Mir, government of Minsk. He published at Königsberg in 1769 his "Derush," a funeral oration on the death of R. Abraham, chief rabbi of Frankfort-on-the-Main. In 1771 he was rabbi of Frankfort-on-the-Oder, where he published in that year his two works: "Sharsheret ha-'Abotot," containing novellæ, decisions, and discussions upon Talmudic matters, and "Shulḥan Shelomoh," a compendium of the Shulḥan 'Aruk, Oraḥ Ḥayyim, according to the Aḥaronim.

H. R. M. SEL.

MIRROR: An object having a nearly perfect reflecting surface. In ancient times mirrors were invariably made of metal; in Egypt, of polished brass. It is no doubt this kind of mirror to which reference is made in Ex. xxxviii. 8 and in Job xxxvii. 18. Reflections might also be seen in still water (Prov. xxvii. 19). In the enumeration of women's ornaments in Isa. iii. 23, hand-mirrors seem to be included; but this is somewhat doubtful. References to mirrors occur in the Apocrypha (Ecclus. [Sirach] xxii. 11) and in the New Testament (I Cor. xxxiii. 12).

The Rabbis were acquainted with the use of mirrors, sometimes employing metal (Kelim xxx. 2). On the Sabbath it was not allowable to look into a mirror unless it was fixed on a wall (Shab. 149a). It would appear that later there was a tendency to forbid men to view themselves in mirrors, as this was regarded as effeminate (see Levy, "Neuhebr. Wörterb." i. 236). Nevertheless, the members of Rabbi's family were allowed to do so (Yer. Shab. vi. 7) because they were "close to the government."

The modern Jews of eastern Europe have a number of superstitions in regard to mirrors the exact origin of which it is difficult to trace. Mirrors are covered when a person dies. The angel of death will be seen if one looks into a mirror at such a time. If a mirror is broken, seven years of poverty will result; this is a general superstition, and not confined to Jews. In Galicia it is supposed that if one puts a mirror in front of a sleeping man with a candle between them, the sleeper will follow a person whither the latter wills. If the sleeper strikes one under these circumstances, the person stricken will not live more than a year. J.

MI-SHEBERAK. See SACRIFICE.

MISHLE SINDABAR. See SINDABAR.

MISHNAH (construct state, **Mishnat**): A noun formed from the verb "shanah," which has the same meaning as the Aramaic "matnita," derived from "teni" or "tena." The verb "shanah," which originally meant "to repeat," acquired in post-Biblical Hebrew the special force of "to teach" and "to learn" that which was not transmitted in writing but only orally; the development of connotation being due to the fact that the retention of teachings handed down by word of mouth was possible only by frequent recitation.

"Mishnah," the derivative of the verb "shanah," means therefore: (1) "instruction," the teaching and learning of the tradition, the word being used in this sense in Ab. iii. 7, 8; and (2) in a concrete sense, the content of that instruction, the traditional doctrine as it was developed down to the beginning of the third century of the common era. "Mishnah" is frequently used, therefore, to designate the law which was transmitted orally, in contrast to "Miḳra," the law which is written and read (*e.g.*, B. M. 33a; Ber. 5a; Ḥag. 14a; 'Er. 54b; Ḳid. 30a; Yer. Hor. iii. 48c; Pes. iv. 130d; Num. R. xiii.; and many other passages); and the term includes also the halakic midrashim, as well as the TOSEFTA or explanatory additions to the Mishnah (Ḳid. 49b; see BARAITA). In this wider sense the word was known to the Church Fathers, who, however, regarded it as the feminine form of "mishneh," analogous to "miḳneh" and "miḳnah," and supposed that it signified "second teaching" (comp. "'Aruk," *s.v.* שהיא שנייה לתורה), translating it by *δευτέρωσις* (see the passages in Schürer, "Gesch." 3d ed., i. 113).

The Name.

The term "mishnah" connotes also (3) the sum and substance of the teachings of a single tanna (*e.g.*, Giṭ. 67a; Yeb. 49b, 50a: "mishnat R. Eliezer b. Ya'aḳob" = "the teachings of R. Eliezer b. Jacob"; comp. Rashi *ad loc.*); or it may mean (4) the view of a tanna in regard to some one matter (*e.g.*, Men. 18a: "mishnat R. Eliezer" = "the view of R. Eliezer," and the expressions "mishnah rishonah" = "the earlier view," and "mishnah aḥaronah" = "the later view," Ḥag. 2a; Ket. v. 29d; M. Ḳ. iii. 83b). It may furthermore denote (5) a single tenet (*e.g.*, B. M. 33b; Hor. 13b; B. Ḳ. 94b; Shab. 123b), being in this sense parallel to the expression Halakah (on the difference between the two see Frankel, "Hodegetica in Mischnam," p. 8). It is used also for (6) any collection of such tenets, being thus applied to the great Mishnaic collections ("Mishnayot Gedolot") of R. Akiba, R. Ḥiyya, R. Hoshaiah, and Bar Ḳappara, in Lam. R., Introduction, and in Cant. R. viii. 2 (comp. Yer. Hor. iii. 48c; Eccl. R. ii.).

Finally the name "Mishnah" is applied particularly to (7) the collection of halakot made by R. Judah ha-Nasi I. (generally called "Rabbi"), which constitutes the basis of the Talmud, and which, with many additions and changes, has been transmitted to the present time. In Palestine this collection was called also "Halakot," as in Yer. Hor. iii. 48c; Ber. i. 53c; Lev. R. iii. (comp. Frankel, *l.c.* p. 8). The designation "Talmud" is likewise applied to R. Judah ha-Nasi's Mishnah (Yer. Shab. v. 1, 7b; Beẓah ii. 1, 61b; Yeb. viii. 9a; comp. also Frankel, *l.c.* p. 285; O. H. Schorr in "He-Ḥaluẓ," 1866, p. 42; A. Krochmal in the introduction to "Yerushalayim ha-Benuyah," p. 6; Oppenheim, "Zur Gesch. der Mischna," p. 244).

The "Mishnah of R. Judah," however, is not to be regarded as a literary product of the third century, nor R. Judah as its author. It is, on the contrary, a collection which includes almost the entire material of the oral doctrine as developed from the period of the earliest halakic exegesis down to that of the fixed and crystallized halakot of the early third century. Judah ha-Nasi, who was the redactor of this work, included in his compilation the largest and most important portion of the earlier collections that he had at hand, and fortunately preserved, for the most part without change, the traditional teachings which he took from older sources and collections; so that it is still possible to distinguish the earlier from the later portions by their form and mode of expression.

Development of the Mishnah.

In order to obtain a correct conception of the Mishnah, as well as of its value and importance, it is necessary to consider its relation to preceding collections of similar content as well as the general development of the oral doctrine from the earliest midrash of the Soferim down to the time when the Halakah received its final form.

According to a reliable tradition, contained in the Letter of Sherira Gaon (Neubauer, "M. J. C." p. 15) and confirmed by other sources (Hoffmann, "Die Erste Mischna," pp. 6-12), the earliest form of discussion of halakic regulations was the Midrash (see Midrash Halakah); and vestiges of such halakot may still be found in the Mishnah.

In addition to this form of the Midrash, which connects the halakic interpretation with the Scriptural passage on which it is based, the independent, definitive Halakah, apart from Scripture, was used in very early times in certain cases, and collections of such halakot were compiled (comp. Hoffmann, *l.c.* p. 11, note 2). As early as the time of the Second Temple the definitive Halakah was used more frequently than the midrashic form, the change having begun, according to geonic accounts, as early as the time of Hillel and Shammai (comp. Hoffmann, *l.c.* pp. 12–14). Although it can not be assumed that a collection of halakot, arranged in six orders, was undertaken when this change was made, or that Hillel himself edited a Mishnah, as Lerner has attempted to show (Berliner's "Magazin," 1886, pp. 1–20), it is probable that the material of the Mishnah first began to be collected at the time of the "Ziḳne Bet Shammai" and "Ziḳne Bet Hillel," the elder pupils of Shammai and Hillel. The beginnings of the present Mishnah may be found in this first mishnah collection, which in the completed text is termed "Mishnah Rishonah" (Sanh. iii. 4; 'Eduy. vii. 2; Giṭ. v. 6; Nazir vi. 1). A large portion of this first Mishnah is still preserved in its original form, notwithstanding the many changes to which it was subjected by the Tannaim; for many portions can be proved to have been redacted, in the form which they now bear, at the time of the schools of Shammai and Hillel, while the Temple was still standing (comp. Hoffmann, *l.c.* pp. 15–20; *idem*, "Bemerkungen zur Kritik der Mischna," in Berliner's "Magazin," 1881, pp. 170 *et seq.*).

This first collection of the Mishnah and its separation from the Midrash were intended, on the one hand, to reduce the traditional Halakah to a shorter form, and, on the other, to fix the disputed halakot as such; of these disputed halakot there were then but few. The isolation of the Halakah from the Midrash not only resulted in a shorter and more definite form, but also removed many differences then existing. Indeed in many cases the divergency had been merely one of form, the proof and the derivation from Scripture being differently stated for the same halakah by different teachers. This earliest Mishnah was intended to afford the teachers both a norm for their decisions and a text-book for their classes and discourses, and thus to preserve the uniformity of teaching. It did not accomplish this purpose entirely, however; for when the political disorders and the fall of the Jewish state diverted attention from careful doctrinal studies, many halakot of the Mishnah were forgotten, and their wording became a subject of controversy. Since, moreover, in addition to these differences each tanna taught the first Mishnah according to his own conception of it, the one Mishnah and the one doctrine developed into many mishnayot and many doctrines (Sanh. 88b; Soṭah 47b). This multiplication occurred during the period of the later "Bet Hillel" and "Bet Shammai" (comp. Letter of Sherira Gaon, *l.c.* pp. 4, 9; Hoffmann, *l.c.* p. 49).

The Synod of Jabneh.

To avert the danger which threatened the uniformity of doctrine, the synod of Jabneh was convened (Tosef., 'Eduy. i. 1; comp. Letter of Sherira Gaon, *l.c.* p. 5; Dünner, "Einiges über Ursprung und Bedeutung des Traktates Eduyot," in "Monatsschrift," 1871, pp. 37 *et seq.*), and under the presidency of Gamaliel II. and Eleazar b. Azariah it undertook to collect the ancient halakot, to examine and determine their wording, and to discuss and decide their differences; thus there arose the collection 'Eduyot (Ber. 28a). This compilation, that in its original form was much larger than the treatise that now bears its name, included all the halakot which were then known, whether controverted or not, and was in a certain sense a revision of the first Mishnah. Even in the present form of the treatise there are many "'eduyot" which are expressly said to have modified the earlier Mishnah; and there are many others, not so characterized, which must likewise be regarded as modifications of the Mishnah as redacted for the first time. But neither the first Mishnah nor its revision, the 'Eduyot collection, was arranged topically or systematically. It is true, a geonic responsum, which was printed in "Sha'are Teshubah," No. 187 (Leipsic, 1858) and erroneously ascribed to Sherira (comp. Harkavy, "Einleitung zu den Teschubot Hageonim," pp. x. *et seq.*), refers to six orders of the Mishnah said to date from the time of Hillel and Shammai, as does also the "Seder Tanna'im we-Amora'im" (ed. Luzzatto, p. 7), but this statement, which is probably based on Ḥag. 14a, is untrustworthy.

Divisions of Earliest Mishnah.

The earliest Mishnah, however, must have been divided in some way, possibly into treatises, although such a division, if it existed, was certainly arranged formally and not topically like the present tractates and orders. The several halakot were grouped together by a common introductory phrase, which served as the connecting-link, as may be inferred from various traces of this old method of grouping still to be seen in the Mishnah, especially in the last treatises of the order Mo'ed. These phrases (comp. Oppenheim, *l.c.* p. 270) referred for the most part to the similarity or the contrast between two or more halakot. Moreover, the name of the author or of the transmitter was often used as the connecting-link for the various halakot, as is evident from the treatise 'Eduyot in its present form (Dünner, *l.c.* pp. 62-63; A. Krochmal, in "He-Ḥaluẓ," ii. 81-82).

The 'Eduyot collection, which now became the basis for the discourses delivered in the schools, was the means of preserving the uniformity of teaching; but, as the mass incorporated in it was difficult to handle, there was a growing need for a methodical arrangement. R. Akiba, therefore, undertook a sifting of this traditional material, and made a mishnaic collection which he edited systematically by arranging the different subjects in different treatises, and perhaps also by combining the various treatises into orders. In the present Mishnah this collection is often mentioned in contradistinction to the first Mishnah (Sanh. iii. 4, and elsewhere; comp. Frankel, *l.c.* p. 210; Hoffmann, *l.c.* p. 38).

The passage Ab. R. N. xviii. 1 indicates that Akiba arranged his Mishnah according to topics (comp. Oppenheim, *l.c.* pp. 237 *et seq.*); and a like inference is to be drawn from the expression "tiḳḳen" (Yer. Sheḳ. v. 1), which does not mean "to correct," as A. Krochmal supposed ("Yerushalayim ha-Benuyah," pp. 34b-35a), but "to arrange," "to redact," the same word being applied to the work of Judah ha-Nasi in the redaction of his Mishnah (Yeb. 64b). Similarly the term "sidder," meaning "to arrange," is applied both to Akiba's work (Tosef., Zab. i. 5) and to that of R. Judah ha-Nasi (Yer. Pes. iv. 30d), thus justifying the conclusion that Akiba's method of division and arrangement of the Mishnah was the same as that followed by Judah ha-Nasi. Two treatises are definitely known to have been included in their present form in Akiba's Mishnah, in which they even bore their present names. R. Meïr mentions the treatise 'Uḳẓin by name in Hor. 13b; and R. Jose in like manner names the treatise Kelim (Kelim, end): both of these tannaim, who antedated Judah ha-Nasi, undoubtedly designated by these names the treatises Kelim and 'Uḳẓin as included in the Mishnah of their teacher Akiba.

Mishnah of R. Akiba.

R. Akiba's treatment of the old Mishnah in editing his own Mishnah collection was entirely arbitrary. He excluded many of the halakot contained in the original text; and those which he accepted he endeavored to found upon some text, explaining their phraseology, and tracing their origin, but striving most of all to present the Halakah in short, clear, and explicit form (comp. Tosef., Zab. i. 5). Many halakic sentences which he included called for more detailed explanation. For the sake of brevity, however, and to aid his pupils in memorizing the Mishnah, he omitted the required explanations and made an additional collection containing the comments to the Mishnah, thus laying the foundation for the Tosefta (comp. Letter of Sherira Gaon, *l.c.* p. 16; Frankel, *l.c.* p. 306; Oppenheim, *l.c.* p. 270).

Akiba's method, which reduced the halakic collections to an orderly system, soon found imitators; and nearly every tannaitic head of a school, who, in virtue of his position, had a mishnaic collection, sooner or later adopted Akiba's method of dividing and arranging the material. R. Meïr especially followed this system, availing himself of it when the increasing number of new halakot, discovered and established by Akiba's pupils, rendered a new mishnaic collection necessary. In this compilation he included the larger portion of Akiba's Mishnah, but also drew upon other existing collections, such as that of Abba Saul (comp. Lewy, "Ueber Einige Fragmente aus der Mischna des Abba Saul," Berlin, 1876). He likewise incorporated many old halakot known in the schools but excluded by Akiba. He frequently cited the opinions of Akiba, without naming him, as "setam" and therefore authoritative for halakic decisions; but sometimes, when the opinion of the majority was opposed to Akiba's view, he designated the former as "setam" and binding for the Halakah (comp. Oppenheim, *l.c.* p. 315).

R. Meïr's collection had a wide circulation, although it was not able to displace the other compilations. As every tanna at the head of a school, however, had, as stated above, his own mishnaic collection in which the halakot of preceding teachers as well as their controversies were differently expounded, the uniformity in teaching which the redactors of the Mishnah had desired and which had almost been attained was again lost; for there were as many different teachings as there were Mishnah collections. There was good ground, therefore, for the complaint that the religious world was thrown into disorder by the teachers who gave halakic decisions according to their own mishnaic collections (Soṭah 22a), since a clear and reliable Halakah could not be found in any individual compilation (Shab. 138b, 139a).

R. Judah ha-Nasi.

To remedy this evil and to restore uniformity of teaching, Judah ha-Nasi undertook his collection, arrangement, and redaction of the Mishnah, which work has survived to the present time. He followed his own method so far as the selection and presentation of the material were concerned, but adopted the systems of Akiba and Meïr in regard to the division and arrangement. This Mishnah was intended to serve practical purposes and to be an authority in deciding religious and legal questions. Judah often gives, therefore, the opinion of a single teacher, where he regards it as the correct one, in the name of "the sages" ("ḥakamim") (Ḥul. 85a); and in order that the opinion of a single scholar may prevail as final, he ignores the fact that this view was controverted by many others. At times he, without mentioning his name, quotes his own opinion as "setam," to record it as authoritative (comp. Oppenheim, *l.c.* p. 347, No. 16). Frequently, too, he explains or limits the earlier Halakah (see Yer. Hor. i. 46a), and endeavors to find a compromise in the case of disputed halakot, or he himself decides the cases in which the halakah is to follow one opinion and in which the other (comp. Frankel, *l.c.* pp. 195 *et seq.*).

In addition to the practical purpose of restoring and preserving uniformity of halakic doctrine and of providing for teachers an authority for their decisions, Judah ha-Nasi had another purely theoretical object in view; namely, the preservation of the teachings of the ancients, except those which he regarded as relatively unimportant or which he considered to have been preserved in some other place in his collection. This fact explains many peculiarities of the Mishnah, which were regarded as shortcomings by those who considered it a legal code. The following are some of these peculiarities: Judah ha-Nasi quotes the opinion of a single authority even when invalidated, and he quotes the original view of a scholar even after such scholar had himself retracted it (Ḥul. 32b; comp. Oppenheim, *l.c.* p. 344). He quotes also a given halakah in one passage as being controverted ("maḥloket") and in another passage as authoritative ("setam"), or vice versa; and he cites contradictory teachings in different places. All these peculiarities are due to the fact that Judah wished to preserve the ancient teachings; and to attain this object more completely he included in his Mishnah, in addition to the collections of Akiba and Meïr, which formed his chief sources, the major portion of all the other mishnayot (Yer. Shab. xvi. 15c); according to a later account, he used in all thirteen collections (Ned. 41a). He dealt independently with his material; for while he frequently made no changes in the wording or form of the old Mishnah, and even included old halakot which had long since been refuted, he altered various others (comp. Hoffmann, "Bemerkungen zur Kritik der Mischna," in Berliner's "Magazin," 1881, pp. 127 *et seq.*). He expounded many of the old halakot ('Ar. iv. 2; Sanh. ix. 3; Yer. Sanh. 27a; comp. Oppenheim, *l.c.* p. 347), following certain rules (Yer. Ter. i. 2, 40c), and endeavoring to determine the text of the old Mishnah (Yer. Ma'as. Sh. v. 1, 55d; comp. Letter of Sherira Gaon, *l.c.* pp. 9–10; Frankel, *l.c.* p. 214). The less-known halakot, as well as those which the pupils of Akiba had propounded, were interpreted by Judah ha-Nasi according to his conception of them. In this way he impressed upon his Mishnah the stamp of uniformity, and gave it the appearance of a work thoroughly revised, if not new; and his compilation displaced its predecessors by its inclusion of the major portion of their contents with the exception of those halakot which appeared to him untenable, or to which he had alluded in some other passage of his Mishnah.

The Authoritative Mishnah.

Because of his personal prominence and his dignity as patriarch (comp. J. S. Bloch, "Einblicke," etc., pp. 59 *et seq.*), his Mishnah soon became the only one used in the schools, and was known to teachers and students alike, Judah thereby attaining his object of restoring uniform teachings. Whereas the exposition of the various halakot given by the Tannaim and called "[Tannaitic] Talmud," had been used hitherto in preference to the dry mishnaic collections (comp. Letter of Sherira Gaon, *l.c.* pp. 18–19), most of the teachers now resorted to R. Judah's Mishnah, which included both the halakot themselves and the expository tannaitic Talmud (this fact explains the application of the name "Talmud" to his Mishnah; B. M. 33a; Yer. Shab. xvi. 15c). Interest in this work was so highly esteemed that a haggadist said: "The study of the Mishnah is equal to sacrifice" (Lev. R. vii.). Every pupil was supposed, as a matter of course, to be familiar with the Mishnah of R. Judah ha-Nasi; and when any one propounded a sentence which was to be found in it, his hearers exclaimed, "What! do we not learn that ourselves from the Mishnah?" According to R. Joshua b. Levi, "The Mishnah is a firm iron pillar"; and none may stray from it (*ib.* xxi.). "The passage, Num. xv. 31, 'He hath despised the word of the Lord,' denotes him who does not consider the Mishnah" (baraita quoted by Isaac Alfasi in his compendium to Sanh. x.). It was considered the only authority for legal decisions. R. Johanan said, "The correct halakic decision is always the one which is declared in the Mishnah to be incontrovertible" ("Halakah ki-setam Mishna"; Yeb. 42b, and parallel passages); and the most conclusive refutation of a sentence was to prove that it was contradicted by the Mishnah. If a decision was accidentally made contrary to the

Mishnah, the decision at once became invalid (Sanh. 6a, 33a; Ket. 84a, 100a). The Amoraim regarded the Mishnah as the Tannaim did the Scripture; and many of them interpreted and expounded it (comp. Bacher "Ag. Bab. Amor." p. 33, note 207 on Rab). Even subsequently, when the collections which were made by the pupils of Judah ha-Nasi were widely used, his Mishnah remained the sole authority. In cases where the Mishnah conflicted with the Baraita, the former was considered decisive (Suk. 19b; B. Ḳ. 96b), while there is but a single example to show that the Gemara preferred the Baraita in such a disputed case (see Jew. Encyc. ii. 516a, *s.v.* Baraita). Some amoraim, such as Ilfa and Simeon b. Laḳish, even regarded the later collections as unnecessary and useless, since their entire contents were included by implication in the Mishnah, and all questions could be explained from it without the aid of the subsequent compilations (Yer. Kil. i. 6, 27a; Yer. B. Ḳ. v. 5a; Yer. Ḳid. iii. 64b; Ta'an. 22a; comp. Oppenheim, *l.c.* pp. 344–345). Another sentence, likewise derogatory to these later collections, says: "If Rabbi has not taught it, how does R. Ḥiyya [the collector of the baraitot] know it?"

Modifications of the Text.

This Mishnah, however, has not been preserved in the form in which Rabbi redacted it; for, as stated above, it was subjected to many changes, and received numerous additions before it reached its definitive form. Notwithstanding the superiority of Rabbi's Mishnah to its predecessors, it had many defects, some of which may still be seen in the present Mishnah. Though Rabbi himself subsequently renounced many of his Mishnaic opinions, as his views changed in the course of time, he retained such discarded opinions in his Mishnah as he had held them in his younger days (B. M. 44a; 'Ab. Zarah 52b; Yer. 'Ab. Zarah iv. 44a). Occasionally he recorded one decision as authoritative in one passage of his Mishnah, considering it the correct view, and, deciding later in favor of an opposite opinion, he in another place gave this also as authoritative without retracting or suppressing his former view (Sheb. 4a). These shortcomings would not have been serious, since Rabbi did not intend to furnish a mere halakic code, if he had not failed to include in his collection many halakot which were taught in his school and which were, therefore, highly important, not only for halakic decision, but also for a knowledge of tradition in general. He furthermore excluded his own halakot and the points of divergence between him and his contemporaries. These omissions were the most serious defects in his Mishnah for his pupils, since, being a compendium of the entire traditional instruction, it must have seemed incomplete inasmuch as it did not include the teachings of the last tannaim, whose legal decisions should certainly have been incorporated in it if it was to serve as an authoritative code. Rabbi's pupils R. Ḥiyya, R. Hoshaiah, Levi, and Bar Ḳappara began, therefore, even during Rabbi's lifetime and with his knowledge, to make additions and emendations to his Mishnah. Rabbi, who was aware of the deficiencies of his work, probably approved many of these corrections (comp. Oppenheim, *l.c.* pp. 344 *et seq.*), and added some himself (Yer. Ket. iv. 29a, b). Most of the changes, however, were such as were contrary to his views, and were consequently concealed from him by his pupils (see Megillat Setarim; comp. Weiss, "Dor," ii. 191).

Thus arose new collections by R. Ḥiyya, R. Hoshaiah, and Bar Ḳappara, which were called "Mishnayot Gedolot," since they were more voluminous than Rabbi's collection. As these new compilations imperiled the uniformity of teaching, which was possible only through the existence of a Mishnah familiar to all teachers, the "Debe Rabbi" (the scholars of Rabbi's school) undertook a revision of his Mishnah, probably long after his death. They made various changes and a large number of additions in agreement with current demands; and in this form the Mishnah has been transmitted to the present time. The majority of the additions made by the Debe Rabbi betray their later origin, although some of them are known to be supplementary only by statements in the Gemara. For instance, the discussion between R. Hezekiah and R. Johanan, in Men. 104b, indicates that the passage in the present Mishnah (Men. xiii. 2), beginning "Rabbi omer," is a later addition of which Hezekiah and Johanan did not know. The same is true of Mishnah Sanh. ix. 2, since the R. Simeon there mentioned is Rabbi's son, as is shown by Yerushalmi (*ad loc.* 27a, b). Mishnah 'Ab. Zarah ii. 6, where a decision of Judah ha-Nasi is quoted, also comes in this category, since it refers to Judah II., grandson of Judah ha-Nasi I., the original redactor of the Mishnah (comp. Tos. 'Ab. Zarah 36a, *s.v.* "Asher"). In general, all the passages in which something concerning Rabbi is related, or something which he did either alone (Sheb. vi. 4) or together with his colleague (Oh. xviii. 19), must be regarded as later accretions (comp. Frankel, *l.c.* pp. 215 *et seq.*); and the same statement holds good of all the passages in which Rabbi's opinion is quoted after that of other tannaim. On the other hand, there are passages concluding with "dibre Rabbi" (the words of Rabbi), which are not necessarily additions; for Rabbi may in such instances have quoted his own opinion anonymously as setam, as he frequently did, and the words "dibre Rabbi" may have been added by later editors. Various sentences of the Tosefta also found their way into the Mishnah (comp. Hoffmann, *l.c.* pp. 156 *et seq.*). Many of these are haggadic in nature, such as those at the end of the treatises Makkot, 'Uḳẓin, Ḳinnim, Ḳiddushin, and Soṭah, as well as many sentences in the treatise Abot, which must be regarded as accretions. The later origin of many of these sentences is at once indicated by the name of the author, as in the cases of R. Joshua b. Levi, who belonged to the first generation of Amoraim ('Uḳẓin, end); Simon, son of Judah ha-Nasi (Ab. ii. 2); and Hillel, grandson of Judah ha-Nasi (*ib.* ii. 4 *et seq.*; comp. Lipmann Heller in Tos. Yom-Ṭob, *ad loc.*). Aside from these additions, the Debe Rabbi emended the phraseology and single words of the Mishnah (comp. Yer. Ḳid. iii. 64c), even as Rabbi himself had done (comp. B. M. iv. 1; 'Ab. Zarah iv. 4, and the Babylonian and Palestinian Gemaras, *ad loc.*).

Babylonian and Palestinian Mishnah.

Many of Rabbi's own emendations have been preserved in the different readings of Yerushalmi and Babli, although the differences between these two versions are not all due to his changes, as Rapoport assumes ("Kerem Ḥemed," vii. 157–167); for most of the differences not due to philological causes must be ascribed to the different mishnaic schools. In addition to the Debe Rabbi, later amoraim also emended the Mishnah if the received reading seemed untenable. These emendations were then incorporated into the Mishnah; those made by the Babylonian amoraim into the Mishnah which was taught in the Babylonian schools; and those made by the Palestinian amoraim into the Mishnah as taught in the Palestinian schools. Thus, in 'Ab. Zarah i., the Mishnah in the Palestinian Talmud was corrected according to the Gemara (Yer. 'Ab. Zarah i. 39d), while the Mishnah in the Babylonian Talmud retained its original reading. Sometimes—curiously enough—the Mishnah of the Palestinian Talmud was corrected to harmonize with the results of the discussion in the Babylonian Talmud, and vice versa (comp. O. H. Schorr in "He-Ḥaluẓ," vi. 32–47; Frankel, "Mebo," pp. 19a–22a), although only a few of these emendations, of which there are many in the Talmud—introduced by the phrases "sami mi-kan" = "omit from here," or "ḥasuri miḥasra" = "something missing," or "teni kak" = "teach thus"—found their way into the Mishnah itself. Many of the amoraim objected to corrections in the Mishnah, holding that the phraseology chosen by the ancients in their mishnaic collections should be retained unchanged (Yer. Nazir i. 51a).

The Mishnah is written in a peculiar kind of Hebrew, which is far more different from the Hebrew of the earlier books of the Old Testament than from that of some of the later ones and which is, therefore, correctly designated as "Neo-Hebraic." This language was spoken by the people of Palestine as late as the second century of the common era, but was cultivated especially by the scholars; so that it was called "leshon ḥakamim" = "the speech of the wise." It contains many old Hebraic terms which were preserved in popular speech, although they are not found in the Bible, as well as numerous foreign elements, especially from Aramaic, Greek, and Latin; the scholars being forced to adopt these loanwords as terms for objects and concepts which were formerly unknown and for which there were no designations in the Hebrew vocabulary. Foreign words were especially used to designate implements borrowed from foreign peoples (comp. Weiss, "Mishpaṭ Leshon ha-Mishnah," pp. 1–7; A. Geiger, "Lehrbuch zur Sprache der Mischna," pp. 1–3); and these borrowed terms were so Hebraized as to be taken by many for native words.

The Written Text.

From the first there were various opposing opinions regarding the problems when and by whom the Mishnah was reduced to writing. According to the Letter of Sherira Gaon (*l.c.* pp. 2, 9, 12), Judah ha-Nasi himself performed this task; and this view is supported by Rabbenu Nissim b. Jacob (in the preface to his "Sefer ha-Mafteaḥ," ed. J. Goldenthal, p. 3a, Vienna, 1847), Samuel Nagid (in his "Mebo ha-Talmud"), Maimonides (in the introduction to his commentary on the Mishnah and in the preface to the Yad ha-Ḥazaḳah), Meïri (in his "Bet ha-Beḥirah"), and a commentary on Pirḳe Abot (pp. 6a, 8b, 9a, Vienna, 1854); and many other medieval authors, as well as some modern scholars (comp. Strack, "Einleitung in den Talmud," p. 54), hold the same opinion. Rashi, on the other hand (see his commentary on Shab. 13b; 'Er. 62b; B. M. 33a; Suk. 28b; Ket. 19b), with some tosafists and other medieval and modern authors (comp. Strack, *l.c.* p. 55), held not only that the Mishnah was not reduced to writing by Rabbi himself, but that even the later amoraim did not have it in written form. He maintained that it, together with the Gemara, was written by the Saboraim. This view is based principally on the passage Giṭ. 60b, which declares that it was forbidden to record halakot, as well as on certain other statements of the Amoraim (comp. *e.g.*, Tan., Ki Tissa, ed. Buber, pp. 59b *et seq.*), which draw a distinction between the Bible as being a written doctrine and the Mishnah as a system of teaching which is not and may not be reduced to writing. It is, however, extremely unlikely that such a systematized collection, dealing with problems so numerous and so diverse, could have been transmitted orally from generation to generation; and this improbability is increased by the fact that in the Talmud remarks concerning "resha" and "sefa" (the "first" and the "last" cases provided for in a single paragraph) are frequently added to Mishnah quotations, a fact explicable only on the assumption that the text of the Mishnah was definitely fixed in writing.

It must be assumed, therefore, that Rabbi himself reduced the Mishnah to writing in his old age, transgressing in a way the interdiction against recording halakot, since he deemed this prohibition liable to endanger the preservation of the doctrine. He did not abrogate this interdiction entirely, however; for the oral method of instruction continued, the teacher using the written Mishnah merely as a guide, while the pupils repeated the lesson orally. Thus the distinction between "miḳra" (the law to be read) and "mishnah" (the oral teaching) was retained (comp. "Paḥad Yiẓḥaḳ," *s.v.* "Mishnah," pp. 219 *et seq.*; Frankel, "Hodegetica in Mischnam," pp. 217–218; Brüll, "Einleitung," ii. 10–13; Weiss, "Dor," p. 216).

The Mishnah has been transmitted in four recensions: (1) the manuscripts and editions of the mishnayot; (2) the Babylonian Talmud, in which the several mishnayot are separated by the Gemara in those treatises which have it, while in the treatises which have no Gemara they follow in sequence; (3) the Palestinian Talmud, in which the Gemara follows each entire chapter of the Mishnah, the initial words of the mishnaic sentences to be expounded being repeated (of this version only the first four orders and chapters i.–iv. of the treatise Niddah of the sixth order are extant); (4) "the Mishnah on which the Palestinian Talmud rests," published by W. H. Lowe in 1883 after the Mishnah manuscript (Add. 470, 1) in the library of the University of Cambridge. On the relation of the first three editions to one another see above (comp. A. Krochmal, "Yerushalayim ha-Benuyah," Introduction, pp. 10–14; Frankel, *l.c.* pp. 219–223; Weiss, *l.c.* ii. 313). The relation of the fourth version to the preceding three has not yet been thoroughly investigated.

Division into Orders.

The Mishnah is divided into six main parts, called orders (Aramaic, "sedarim," plural of "seder"; Hebr. "'arakin," plural of "'erek"), the ששה סדרי משנה (as in B. M. 85b) or the שש ערכי משנה (Pesiḳ., ed. Buber, 7a; Cant. R. vi. 4) being therefore frequently mentioned. The abbreviated name ש"ס ("shas") was formed from the initial letters of ששה סדרים (Ḥag. 3a, 10a; M. Ḳ. 10b). Each order contains a number of treatises, "massektot" (Mishnah, ed. Lowe, fol. 32a; Midr. Teh. to Ps. civ.) or "massekot" (Mishnah, ed. Lowe, fol. 69a), plural of "masseket," or "massektiyyot" (Cant. R. vi. 9), the singular of which is "masseḳta." Each treatise is divided into chapters, "peraḳim" (singular, "pereḳ") (Ned. 8a; Ḥag. 9a; Men. 99b), and each chapter into paragraphs or sentences, "mishnayot," or "halakot" in the Palestinian Talmud (see above).

The six orders are first mentioned by R. Ḥiyya (B. M. 85b), and represent the original division. A division into five orders is nowhere mentioned, although Geiger ("Einiges über Plan," etc., p. 487), misinterpreting the Midrash passage Num. R. xiii., considers only five orders to be enumerated there. Ulla (Meg. 28b), when he alludes to those who teach and learn only four orders, does not imply that the Mishnah was divided into four orders, but refers merely to those who study only four. This conclusion is confirmed by a conversation in which Simeon b. Laḳish communicates to a man who has studied only the first four orders a sentence belonging to the sixth order (Meg. 28b). The geonic tradition ("Sha'are Teshubah," No. 143) which refers to seven orders of the Mishnah seems to include the "Small Treatises" ("Massektot Ḳeṭannot"; Hoffmann, *l.c.* pp. 98–99). The names of the orders are old, and are mentioned by Simeon b. Laḳish (Shab. 31a), who enumerates them, according to his interpretation of Isa. xxxiii. 6, in the following sequence: Zera'im, Mo'ed, Nashim, Neziḳin, Ḳodashim, Ṭohorot. This is the original order, which is found also in Num. R. xiii. There are other enumerations with different sequences. R. Tanḥuma has the following in Yalḳ., Ps. xix.: Nashim, Zera'im, Ṭohorot, Mo'ed, Ḳodashim, Neziḳin. He gives another series in Num. R. xiii.: Nashim, Zera'im, Mo'ed, Ḳodashim, Ṭohorot, Neziḳin. As R. Tanḥuma evidently does not intend to give the actual sequence but only to explain the verses as referring to the orders of the Mishnah, he adapts his enumeration of the orders to the sequence of the verses. That Simeon b. Laḳish's sequence is the correct one may be proved also from other sources. For example, Ta'an. 24b has: "In the days of Rab Judas they went in their studies only as far as the order Neziḳin; but we study all six orders." The parallel passage reads: "We have proceeded in our studies as far as 'Uḳẓin" (the end of the sixth order Ṭohorot). It is clear from Meg. 28b that formerly only four orders were studied, of which Neziḳin formed the conclusion (according to Ta'an. 24a, where the shorter course of study in former times is mentioned in another form of expression). That the treatise 'Uḳẓin of the order Ṭohorot was the end of the sixth order is shown by Ber. 20a. It is seen, therefore, that the order Neziḳin is always mentioned as the fourth, and the order Ṭohorot as the sixth and last, thus conforming to the sequence of Simeon b. Laḳish (comp. Brüll, *l.c.* ii. 15; Weiss, *l.c.* iii. 186). Isaac ibn Gabbai, author of the mishnaic commentary "Kaf Naḥat," has, consequently, no grounds for his reversal of the arrangement of the orders (comp. Lipmann Heller, *l.c.* Preface); nor is there any foundation for the attempt of Tobias Cohn to reverse the sequence ("Aufeinanderfolge der Mischna Ordnungen," in Geiger's "Jüd. Zeit." iv. 126 *et seq.*). For a justification of the accepted sequence see the introduction of Maimonides to his commentary on the Mishnah; Frankel, *l.c.* p. 254; Brüll, *l.c.* ii. 15–16. It can not be ascertained whether Rabbi himself originated this sequence, or whether the orders were thus discussed in the academies. Isaac Alfasi and Asher b. Jehiel apply the Talmudic passage "En seder le-Mishnah" (= "Rabbi observed no definite sequence in the Mishnah") to the orders as well, and infer that this arrangement did not originate with Rabbi himself. Other authorities, however, assert that the passage "En seder le-Mishnah" refers only to the treatises, and not to the orders; for here Rabbi himself observed a definite series (comp. Lipmann Heller, *l.c.*; *idem*, commentary on Soṭah ix. 1). This view seems to be the correct one, since Simeon b. Laḳish, who was in his youth a pupil of Rabbi (Yer. Beẓah v. 2, 63a), refers to this sequence of the orders as being well known. The names of the several orders, which are frequently mentioned in the Talmud (Suk. 4b; Shab. 54b; Meg. 7a; Nid. 8a; Bek. 30b), were selected according to the subject of most of the treatises belonging to them.

Earlier Divisions.

The division of the Mishnah into treatises is a very old device, the collections upon which Rabbi drew being also arranged in this same way. II Esd. xiv. 44–46 mentions, in addition to the twenty-four written books of the Old Testament, seventy other books which may not be written down, having been given by God to Moses for oral communication to the elders of the people. According to an assumption of Ginsberg's, which is supported by a comparison of the passage in Esdras with its parallel in the Tan., Ki Tissa (ed. Buber, pp. 58b–59a), these seventy books are the seventy treatises of the oral teachings, and hence of the Mishnah. The number seventy may be obtained by counting either the seven small treatises (comp. R. Kirchheim, Preface to his edition of them, Frankfort-on-the-Main, 1851), or, as Ginsberg obtains it, the halakic midrashim Sifra and Sifre, the first of which was divided into nine parts. In any case, it is evident that the division into treatises is a very old one, and that Rabbi arranged his Mishnah in conformity with it, although, as has been said, the present division is not the original one which he adopted, but has been subjected to many changes.

Sixty-three treatises are now extant, although the traditional number is only sixty, as Cant. R. vi. 9

says, "Sixty queens, these are the sixty treatises of the halakot." The three "babot," or gates, at the beginning of the order Neziḳin formed originally only a single treatise, which also was called "Neziḳin" (B. Ḳ. 102a; B. M. 10a, b; Lev. R. xix.), and which was divided into three treatises on account of its size. Makkot was originally a dependent treatise combined with Sanhedrin, of which it formed the end (comp. Maimonides' introduction to his commentary on the Mishnah). The names of the treatises, which were derived mostly from the contents, but occasionally from the initial letter, are old, being known to the Amoraim, and in part even to the Tannaim.

The following treatises are mentioned by name in the Talmud: Baba Ḳamma and Baba Meẓi'a (B. Ḳ. 102a); Bekorot (Beẓah 20a); Berakot (B. Ḳ. 30a); 'Eduyot under the name "Beḥirta" (Ber. 27a) as well as under its own name (Ber. 28a); Kelim (Mishnah Kelim, end); Keritot (Sanh. 65a); Ketubot (Soṭah 2a); Ḳiddushin (Ḳid. 76b); Ḳodashim (B. M. 109b); Makkot (Sheb. 2b); Menaḥot (Men. 7a); Middot (Yoma 16a); Nazir and Nedarim (Soṭah 2a); Oholot under the name "Ahilot" ('Er. 79a); Rosh ha-Shanah (Ta'an. 2a); Shebu'ot (Sheb. 2b); Tamid (Yoma 14b); Terumot (Pes. 34a); 'Uḳẓin (Hor. 13b); Yoma (Yoma 14b); and Zebaḥim under the name "Sheḥiṭat Ḳodashim" (B. M. 109b). The names of the treatises have, however, been subjected to various changes, and have, in some cases, been replaced by later terms. Thus the earlier name "Mashḳin" gave way to the later "Mo'ed Ḳaṭan"; "Zebaḥim" was substituted for "Sheḥiṭat Ḳodashim"; and "Sheḥiṭat Ḥullin" was abbreviated to "Ḥullin" (on the names comp. A. Berliner in "Ha-Misderonah," i. 20 *et seq.*, 40 *et seq.*; see also Frankel, *l.c.* p. 255; Brüll, *l.c.* ii. 18–20). The treatises belonging to each order deal with similar subjects, or have some other bond of relationship which causes them to be placed in a given order. Although there are some tractates, such as Nazir (comp. Naz. 2a) and Berakot, which apparently do not belong to the order in which they are included, a closer examination reveals the reason for their inclusion (comp. Maimonides' introduction to his commentary on the Mishnah; Brüll, *l.c.* ii. 17–18; Weiss, *l.c.* ii. 207; Geiger, *l.c.* p. 486).

The Treatises.

It is a harder task to define the principle on which the treatises are arranged within the various orders; and this difficulty is increased by the existence of many different sequences, especially since it is uncertain which of these is the oldest. According to the Letter of Sherira Gaon (*l.c.* pp. 12–13), Rabbi observed no definite sequence, but discoursed on each massekta singly without reference to the other treatises, changing their arrangement at will. This statement is supported by 'Ab. Zarah 7a, which states that for two treatises there was no definite order in the Mishnah—an assertion which is all the more trustworthy since it is recognized as a principle in making halakic decisions as well. It appears, on the other hand, from various passages in the Talmud (*e.g.*, Sheb. 2b; Soṭah 2a; Ta'an. 2a), that even at an early period a certain arrangement of the several treatises within their respective orders was followed, and it is necessary, therefore, to adopt Hoffmann's view (in Berliner's "Magazin," 1890, pp. 322–323) that a definite sequence was gradually developed and observed in the course of instruction in the Palestinian and Babylonian academies. The teachers of these schools arranged their material on pedagogic lines, and in interpreting an order of the Mishnah they selected the longest treatise for the beginning of the lesson, when the minds of their pupils were still fresh, and then passed on to the smaller tractates. Likewise in Maimonides' sequence, which was the one generally adopted, the treatises from the second to the sixth order are arranged according to length, as Geiger has remarked ("Einiges über Plan," etc., in Geiger's "Wiss. Zeit. Jüd. Theol." ii. 480 *et seq.*); and this principle is evident in the first order likewise (Hoffmann, *l.c.* p. 323; Geiger, *l.c.* p. 402). Maimonides' sequence seems, therefore, to have been the same as that adopted in the Palestinian and Babylonian academies, and hence was the original one (for other reasons for this sequence see Maimonides' introduction to his commentary on the Mishnah; Frankel, *l.c.* pp. 255–264; Brüll, *l.c.* ii. 20–27).

The Chapters.

The division of the several treatises into chapters as well as the sequence of these chapters was the work of Rabbi himself (Letter of Sherira Gaon, *l.c.* p. 13). The portion discussed each day constituted an independent perek; and this term was, therefore, applied elsewhere to a single discourse also (Ber. 11b; 'Er. 36b; on a statement in the "Seder Tanna'im we-Amora'im," to the effect that the Saboraim divided the treatises into chapters, see M. Lerner, "Die Aeltesten Mischna-Compositionen," in Berliner's "Magazin," 1886, p. 3, note 1). Generally speaking, the original division and sequence of the chapters have been preserved, as appears from various passages of the Talmud (R. H. 31b; Suk. 22b; Yeb. 9a; Ket. 15a; Niddah 68b; Zeb. 15a). The names of the chapters taken from the initial letters are likewise old, and some of them are mentioned even in the Talmud (B. M. 35b; Niddah 48a). In the course of time, however, various changes were made in the division, sequence, and names of the chapters; thus, for example, the division of Tamid into seven chapters is not the original one. On other variations in sequence see Frankel, *l.c.* pp. 264–265, and on the changes in the names see Berliner in "Ha-Misderonah," i. 40b.

There are altogether 523 chapters in the Mishnah, divided as follows: Zera'im 74 (Bikkurim 3), Mo'ed Ḳaṭan 88, Nashim 71, Neziḳin 73 (Abot 5), Ḳodashim 91, Ṭohorot 126. Some authorities reckon 524 chapters by adding a sixth chapter to Abot, while others count 525 by adding a sixth chapter to Abot and a fourth chapter to Bikkurim.

The division of the chapters into paragraphs, which is likewise very old, has not been preserved in its original form, the different recensions of the present Mishnah having a different division (comp. Frankel, *l.c.* p. 265). The several paragraphs are mostly cast in the form of the fixed Halakah without a Scripture passage (see Midrash Halakah), although Weiss (*l.c.* ii. 211, notes 1–6) has enumerated 217 passages in which the Halakah is given together with the Scriptural text on which it is based, hence assuming the form of the Midrash. Some of these midrashic sentences in the Mishnah have the form of the earliest exegesis of the Soferim (comp. Frankel, *l.c.* p. 5), and there are also many passages modeled on the tannaitic Talmud (comp. Weiss, *l.c.* ii. 209–210).

The following is the list of the mishnaic orders with their treatises, according to Maimonides, the deviations in both Talmudim being given at the end of each order (for details see separate articles under the names of the respective orders and treatises; and on variations in certain editions of the Mishnah comp. Strack, *l.c.* pp. 9–12):

Orders and Treatises.

I. The order **Zera‘im** ("Seeds") contains the following eleven treatises: (1) Berakot ("Blessings"), divided into nine chapters; deals with the rules for the daily prayer, and other prayers and blessings. (2) Pe'ah ("Corner"); eight chapters; deals with the regulations concerning the corners of the field (Lev. xix. 9, 10; xxiii. 22; Deut. xxiv. 19–22), and with the rights of the poor in general. (3) Demai ("Doubtful"); seven chapters; deals chiefly with various cases in which it is not certain whether the offering of the fruit has been given to the priests. (4) Kilayim ("Of Two Sorts"; "Heterogeneous"); nine chapters; deals chiefly with rules regarding forbidden mixtures (Lev. xix. 19; Deut. xxii. 9-11). (5) Shebi‘it ("Sabbatical Year"); ten chapters; deals with the regulations concerning the seventh year (Ex. xxiii. 11; Lev. xxv. 1-8; Deut. xv. 1 *et seq.*). (6) Terumot ("Offerings"); eleven chapters; deals with the laws regarding the offering to be given to the priest (Num. xviii. 8 *et seq.*; Deut. xviii. 4). (7) Ma‘aserot or Ma‘aser Rishon ("Tithes" or "First Tithes"); five chapters; deals with the prescription regarding the tithe to be given to the Levites (Num. xviii. 21-24). (8) Ma‘aser Sheni ("Second Tithe"); five chapters; deals with the rules concerning the tithe or its equivalent which was to be eaten at Jerusalem (Deut. xiv. 22–26). (9) Ḥallah ("Cake"); four chapters; deals with the laws regarding the heave-offering of dough to be given to the priests (Num. xv. 18-21). (10) ‘Orlah ("Foreskin of the Trees"); three chapters; deals chiefly with the regulations of Lev. xix. 23–25. (11) Bikkurim ("First-Fruits"); three chapters; deals with the laws in Ex. xxiii. 19; Deut. xxvi. 1 *et seq.*

In many editions of the Mishnah, even early ones like those of Naples 1492, and of Riva 1559, as well as in most of the editions of the Babylonian Talmud, a fourth chapter to the eleventh treatise, which does not belong to the Mishnah, has been added (comp. the gloss in the Wilna edition of the Talmud, p. 87b). The sequence of the treatises of this first order in both the Talmudim corresponds with that of Maimonides.

II. **Mo‘ed** ("Festivals") includes the following twelve treatises: (1) Shabbat ("Sabbath"); twenty-four chapters; deals with the laws regarding the seventh day as a day of rest (Ex. xvi. 23 *et seq.*, xx. 8–11, xxiii. 12, xxxiv. 21, xxxv. 2–3; Deut. v. 12-15). (2) ‘Erubin ("Mingling"); ten chapters; deals with the means by which inconvenient regulations regarding the Sabbath may be legally obviated. (3) Pesaḥim ("Passover Festivals"); ten chapters; deals with the prescriptions regarding the Passover and the paschal sacrifice (Ex. xii., xiii. 6–8, xxiii. 15, xxxiv. 15 *et seq.*; Lev. xxiii. 5 *et seq.*; Num. ix. 2–14, xxviii. 16 *et seq.*). (4) Sheḳalim ("Shekels"); eight chapters; treats chiefly of the poll-tax of a half-shekel for each male, prescribed in Ex. xxx. 12–16, and which was devoted to defraying the expenses of the services of the Temple. (5) Yoma ("Day"), called also "Kippurim" or "Yom ha-Kippurim" (= "Day of Atonement"); eight chapters; deals with the prescriptions regarding worship and fasting on the Day of Atonement (Lev. xvi., xxiii. 26-32). (6) Sukkah or Sukkot ("Booth"); five chapters; deals with the regulations concerning the Feast of Tabernacles, the Tabernacle, and the garland on it (Lev. xxiii. 34-36; Num. xxix. 12 *et seq.*; Deut. xvi. 13-16). (7) Beẓah ("Egg"; so called from the first word, but originally termed, according to its subject, "Yom-Ṭob" = "Feast-Day"); five chapters; deals chiefly with the rules to be observed on the feast-days. (8) Rosh ha-Shanah ("New-Year Feast"); four chapters; deals chiefly with the regulation of the calendar by the new moon, and with the services on the New-Year. (9) Ta‘anit ("Fasting"); four chapters; deals chiefly with the special fast-days in times of drought or other untoward occurrences. (10) Megillah ("Esther Scroll"); four chapters; contains chiefly regulations and prescriptions regarding the reading of the scroll of Esther at Purim, and the reading of other passages in the synagogue. (11) Mo‘ed Ḳaṭan ("Half-Feasts"; originally called "Mashḳin," after its initial word); three chapters; deals with the regulations concerning the intermediate feast-days, or the days between the first two and the last two days of Pesaḥ and Sukkah. (12) Ḥagigah ("Feasting"); three chapters; deals among other things with the manner of observance of the three principal feasts.

In the Babylonian Talmud the treatises of the order Mo‘ed are arranged as follows: Shabbat, ‘Erubin, Pesaḥim, Beẓah, Ḥagigah, Mo‘ed Ḳaṭan, Rosh ha-Shanah, Ta‘anit, Yoma, Sukkah, Sheḳalim, and Megillah; while the sequence in the Palestinian Talmud is Shabbat, ‘Erubin, Pesaḥim, Yoma, Sheḳalim, Sukkah, Rosh ha-Shanah, Beẓah, Ta‘anit, Megillah, Ḥagigah, and Mo‘ed Ḳaṭan.

III. **Nashim** ("Women") contains the following seven treatises: (1) Yebamot ("Widows Obliged to Contract a Levirate Marriage"); sixteen chapters; deals chiefly with the rules for the levirate marriage and of the Ḥaliẓah, whereby the widow is enabled to contract another marriage (Deut. xxv. 5–10). (2) Ketubot ("Marriage Contracts); thirteen chapters; deals chiefly with the mutual duties and rights of husband and wife. (3) Nedarim ("Vows"); eleven chapters; deals with the regulations concerning vows (Num. xxx. 2–17). (4) Nazir ("Nazarite"; called also "Nezirut" = "Nazariteship"); nine chapters; deals chiefly with the prescriptions regarding the Nazarite vows (Num. vi. 1–21). (5) Giṭṭin ("Documents"; "Bills of Divorce"); nine chapters; deals chiefly with the laws for the dissolution of marriage (Deut. xxiv. 1–4). (6) Soṭah ("Woman Suspected of Adultery"); nine chapters; deals chiefly with rules concerning a woman suspected of infidelity (Num. v. 11–31). (7) Ḳiddushin ("Betrothal"); four chapters; discusses the question how, by what means, and under what conditions a legal marriage may be contracted.

In the Babylonian Talmud the sequence of the treatises in this order is as follows: Yebamot, Ketubot, Ḳiddushin, Giṭṭin, Nedarim, Nazir, and Soṭah. In the Palestinian Talmud the sequence is: Yebamot, Soṭah, Ketubot, Nedarim, Giṭṭin, Nazir, and Ḳiddushin.

IV. **Neziḳin** ("Injuries"; called also "Yeshu‘ot" = "Deeds of Help," as in Num. R. xiii.) contains the following ten treatises: (1) Baba Ḳamma ("First Gate"); ten chapters; deals chiefly with injuries and compensation for damages. (2) Baba Meẓi‘a ("Middle Gate"); ten chapters; deals chiefly with the laws relating to sales, leases, objects found, and usury. (3) Baba Batra ("Last Gate"); ten chapters; deals chiefly with the rights of sale, the ownership of real estate, and the rights of succession. (4) Sanhedrin ("Court of Law"); eleven chapters; deals chiefly with judicial procedure and criminal law. (5) Makkot ("Blows," "Punishments"); three chapters; deals chiefly with the regulations concerning the number of stripes imposed as punishment by law (Deut. xxv. 1–3). (6) Shebu‘ot ("Oaths"); eight chapters; deals chiefly with the rules regarding different oaths (Lev. v. 4 *et seq.*). (7) ‘Eduyot, or ‘Ediyyot ("Evidences"); eight chapters; contains the testimony of later teachers regarding statements of earlier authorities, a large part of this material being contained in other portions of the Mishnah as well. (8) ‘Abodah Zarah ("Idolatrous Worship"); five chapters; deals chiefly with the regulations concerning the attitude of the Jews toward idolatry and idolaters. (9) Abot, or Pirḳe Abot ("Sayings of the Fathers"); five chapters; contains maxims and aphorisms. A sixth chapter called "Pereḳ Ḳinyan ha-Torah" (= "Acquisition of the Law") was subsequently added to this treatise, but it does not belong to the Mishnah. (10) Horayot, or Hora'ot ("Decisions"); three chapters; deals chiefly with such religious and legal decisions as had been made through error.

The sequence of these treatises is as follows in the Babylonian Talmud: Baba Ḳamma, Baba Meẓi‘a, Baba Batra, ‘Abodah Zarah, Sanhedrin, Makkot, Shebu‘ot, Horayot, ‘Eduyot, and Abot. The usual sequence is observed in the Mishnah of the Palestinian Talmud.

V. **Ḳodashim** ("Holy Things") contains the following eleven treatises: (1) Zebaḥim ("Sacrifice"; originally called "Sheḥiṭat Ḳodashim" = "Slaughtering of the Holy Animals"; B. M. 109b); fourteen chapters; deals chiefly with the laws regarding sacrifices (Lev. i. *et seq.*). (2) Menaḥot ("Meat-Offering"); thirteen chapters; deals chiefly with the rules concerning meat-offerings (Lev. ii.; v. 11–13; vi. 7–16; vii. 9–10; xiv. 10–20; xxiii. 13, 16; Num. v. 11 *et seq.*, vi. 13-20, xv. 24, xxviii., xxix.). (3) Ḥullin ("Profane"; called also "Sheḥiṭat Ḥullin" = "Slaughtering of Non-Consecrated Animals"); twelve chapters; deals chiefly with the laws for slaughtering and with other rules relating to the eating of meat. (4) Bekorot ("First-Born"); nine chapters; deals chiefly with the regulations concerning the various firstlings (Ex. xiii. 2, 12 *et seq.*; Lev. xxvii. 26 *et seq.*; Num. viii. 16–18, xviii. 15–17; Deut. xv. 19 *et seq.*). (5) 'Arakin ("Estimations"); nine chapters; deals chiefly with the prescriptions regarding the ransom of those who have been dedicated to God (Lev. xxvii. 2 *et seq.*). (6) Temurah ("Exchange"); seven chapters; deals chiefly with the laws regarding the exchange of a dedicated animal (Lev. xxvii. 10, 33). (7) Keritot ("Extirpations"); six chapters; deals among other subjects with the punishment by excommunication ("karet"), which is frequently mentioned in the Old Testament. (8) Me'ilah ("Trespass"); six chapters; deals with the rules concerning trespass in the case of a dedicated object (Num. v. 6-8). (9) Tamid ("The Daily Morning and Evening Burnt Offering"); deals among other subjects with the regulations for the daily sacrifice (Ex. xxix. 38–42; Num. xxviii. 2–8). In the editions of the Mishnah, Tamid is divided into seven chapters, excepting in Löwe's edition, where it has but six; while Levi b. Gershon (RaLBaG) enumerates only five chapters for Tamid in the introduction to his commentary on the Pentateuch. (10) Middot ("Measures"); five chapters; describes the apartments and furniture of the Temple. (11) Ḳinnim ("Birds' Nests"); three chapters; deals with the prescriptions regarding the offering of doves (Lev. i. 14–17, v. 1 *et seq.*, xii. 8).

In the Babylonian Talmud the sequence of the treatises of this order is as follows: Zebaḥim, Menaḥot, Bekorot, Ḥullin, 'Arakin, Temurah, Keritot, Me'ilah, Ḳinnim, Tamid, and Middot.

VI. **Ṭohorot** ("Purifications") contains the following twelve treatises: (1) Kelim ("Utensils"); thirty chapters; deals chiefly with the regulations concerning the different kinds of uncleanness of vessels (Lev. xi. 32 *et seq.*; Num. xix. 14 *et seq.*, xxxi. 20 *et seq.*). (2) Oholot, or Ahilot ("Tents"); eighteen chapters; deals chiefly with the laws regarding the deflement occasioned by a corpse (Num. xix. 14–20). (3) Nega'im ("Leprosy"); fourteen chapters; deals with the rules concerning the various kinds of leprosy (Lev. xiii., xiv.). (4) Parah ("Red Heifer"); twelve chapters; deals with the regulations concerning the red heifer and the purificative ashes obtained from it (Num. xix.). (5) Ṭohorot ("Purities"; euphemistic for "Impurities"); ten chapters; deals with minor deflements. (6) Miḳwa'ot, or Miḳwot ("Ritual Baths"); ten chapters; deals with the regulations concerning the bathing of the defiled (Lev. xiv. 8, xv. 5 *et seq.*). (7) Niddah ("Menstruous Woman"); ten chapters; deals with the laws concerning the defilement caused by menstruation (Lev. xii., xv. 19 *et seq.*). (8) Makshirin ("Predisposings"; called also "Mashḳin" = "Liquids"); six chapters; deals with the rule which declares that an object is defiled by contact with anything unclean only in case it was wet beforehand (Lev. xi. 34, 37, 38). (9) Zabim ("Sufferers from Discharges"); five chapters; deals with the rules in Lev. xv. (10) Ṭebul Yom ("He Who Has Taken a Ritual Bath on That Same Day"); four chapters; deals chiefly with the effect produced upon an entire object which has come in contact with a "ṭebul yom," who, according to Lev. xv. 5, is unclean until sundown, even though this contact has been only partial. (11) Yadayim ("Hands"); four chapters; deals chiefly with the deflement and cleansing of the hands. (12) 'Uḳẓin ("Stems"); three chapters; deals chiefly with the relation of the fruit to the stems, skins, and seeds, with reference to defilement, uncleanness of the fruit affecting the stems, skins, and seeds, and vice versa.

In the Babylonian Talmud the sequence of the treatises in Ṭohorot is as follows: Niddah, Kelim, Oholot, Nega'im, Parah, Ṭohorot, Miḳwa'ot, Makshirin, Zabim, Ṭebul Yom, Yadayim, and 'Uḳẓin.

Editions and Commentaries.

The Mishnah is extant in many editions, although only the earlier ones can be mentioned here: first edition, Naples, 1492, fol., with the Hebrew commentary of Maimonides; Venice, Justiniani, 1546-50, fol.; Venice, 1549, 4to, with the commentary of Obadiah Bertinoro; Riva di Trento, 1559, fol., with the commentaries of Maimonides and Obadiah; Sabbionetta and Mantua, 1559–63, 4to; Venice, 1606, fol., with the same two commentaries.

Many commentaries on the Mishnah have been written. Maimonides wrote one in Arabic with a general introduction on the history, origin, and arrangement of the Mishnah. This commentary, which was translated into Hebrew several times, is printed in many editions of the text. The Arabic original of several treatises has recently been published, in addition to that of the entire sixth order, edited by Derenbourg (comp. the enumeration in Strack, *l.c.* p. 113 and Appendix); the Hebrew translation, which is faulty in many passages, being corrected to agree with it.

Asher b. Jehiel of Germany (d. Toledo 1327) wrote a commentary on the first and sixth orders, which was first printed in the Amsterdam edition of the Talmud, 1714–16, and in the Frankfort-on-the-Main edition, 1720–21. R. Samson of Sens also wrote a commentary on the same orders, which is printed in most of the editions of the Talmud. R. Obadiah Bertinoro (end of 15th cent.) wrote a commentary on the entire Mishnah, which is printed in most editions. The commentaries "Tosefot Yom-Ṭob" by Yom-Ṭob Lipmann Heller (1579-1654) and "Tif'eret Yisrael" by Israel Lipschütz are likewise printed in many editions of the Mishnah. The following commentaries may also be mentioned: "Kaf Naḥat," by Isaac ibn Gabbai, printed in the Venice edition of the Mishnah, 1609, and in some other editions; "'Eẓ ha-Ḥayyim" (Leghorn, 1653 *et seq.*), by Jacob Ḥagiz; "Ḳab we-Naḳi," by Elisha b. Abraham, in ed. Amsterdam, 1697, 1698, etc.; "Zera' Yiẓḥaḳ," by Isaac b. Jacob Ḥayyut, Frankfort-on-the-Oder, 1739; "Sefer Bet Dawid," Amsterdam, 1739; "Melo Kaf Naḥat," by Senior Phoebus b. Jacob, in ed. Offenbach, 1737; Berlin, 1832–34; "Sefer Mishnat Rabbi Natan," on Zera'im (Frankfort-on-the-Main, 1862), by Nathan Adler; and "Liḳḳuṭe ha-Mishnah" (Breslau, 1873), by Shraga Phoebus Frenkel.

Translations.

Of the translations of the Mishnah the following may be mentioned: (1) "Mischna sive Totius Hebræorum Juris, Rituum, Antiquitatum ac Legum Oralium Systema cum Clarissimorum Rabbinorum Maimonidis et Bartenoræ Commentariis Integris; Quibus Accedunt Variorum Auctorum Notæ ac Versiones in Eos Quos Ediderunt Codices; Latinitate Donavit ac Notis Illustravit Guilielmus Surenhusius," Amsterdam, 1698–1703, 6 vols., fol.; the text in Hebrew and Latin, with the commentaries of Maimonides and Obadiah Bertinoro in a Latin translation. (2) "Mishnayot," Berlin, 1832–34, 6 parts, 4to. (3) Vocalized Hebrew text of the Mishnah, with German translation in Hebrew letters. (4) The commentary "Melo Kaf Naḥat," and (5) a brief German introduction with notes, published by the Gesellschaft von Freunden des Gesetzes und der Erkenntniss, generally known as "Jost's translation." (6) Johann Jacob Rabe, "Mischnah, oder der Text des Talmuds Uebersetzt und Erläutert," 6 parts, 4to, Onolzbach, 1760–1763. A new edition of the vocalized Hebrew text with a German translation has been undertaken by D. Hoffmann and E. Baneth, of which several parts have appeared. An Italian translation by Vittorio Castiglione is likewise in course of publication (1904).

MISHNEH TORAH. See Moses b. Maimon.

MISSISSIPPI: One of the southern states of the United States of America; admitted to the Union in 1817. In 1682 La Salle took possession of the territory for the King of France. It passed to England in 1763, was ceded to Spain in 1781, and to the United States in 1798. In 1724 a law was passed in France by which "Jews were expelled, and no other religion [than the Roman Catholic] was tolerated." When the Spaniards took possession in 1781, a more tolerant government was established. It seems that there were a few Jews in the Natchez district at the close of the eighteenth century. At any rate, in Natchez a tombstone has been found bearing the name of Harris and the date 1828; and there are indications that of the several people of that name one had lived in the city a number of years prior to his death.

Early Congregational Activity.

It was about 1840 that the Jews had become sufficiently numerous to found congregations; the establishment of cemeteries usually preceded the formation of religious organizations. In 1849 three pedlers came to **Woodville.** One of them, Henry Burgance, died the same year. Loath to have their companion buried with Christians, the other two, Jacob Cohen and Jacob Schwarz, bought a small piece of land for $50 and founded a cemetery; this is still used. Similarly the few Jews who settled at **Grand Gulf** bought a cemetery, which they abandoned when, owing to frequent inroads of the Mississippi River, they moved to **Port Gibson**; the Jews of **Natchez** bought their cemetery in 1840, and organized Congregation B'nai Israel in 1843; **Jackson** organized a cemetery in 1854 and Congregation Beth Israel a few years later; **Meridian** purchased a cemetery in 1868, and organized Congregation Beth Israel in 1869. In **Columbus** a B'nai B'rith lodge was founded in 1872, a cemetery in 1875, and Congregation B'nai Israel in 1879.

Remarkable, and speaking well for Jewish zeal, is the fact that almost all congregations were founded by a few men. For example, **Vicksburg** (1843) could not have contained more than 10 Jewish families; Natchez (also 1843) had no more; Meridian (1869) organized with 8 men; Woodville held services on Rosh ha-Shanah, 1860, when but 7 families lived there. **Brookhaven** now has but about 20; **Canton,** about 25; Columbus, 20; **Summit,** about 10; yet all these places have organized congregations. Some of these congregations began as Orthodox; those organized in the seventies and after were Reform from the start. Now (1904) all those mentioned above are Reform. Early in the eighties, however, a few Orthodox Jews settled here and there, and formed "minyanim" for the holy days. Meridian first organized an Orthodox congregation (Ohel Jacob) in 1894; Vicksburg followed in 1900; these are at present the only places supporting a shoḥeṭ. Orthodox services were held in **Laurel** in 1901 and 1903.

In addition to the places mentioned above there are small communities with congregations in **Brownsville, Greenwood,** and **Lexington.**

Except in the Natchez district (Natchez, Vicksburg, Woodville, and Port Gibson), most of the congregations lie within a limited strip of land running east and west about the middle of the state. Very few Jews live south of 32° or north of 33° 30′ N. lat.

Communal Life.

In almost every instance Jews entered the state to transact mercantile business. Thus, coming in contact with Gentiles, and being isolated from their coreligionists, fast friendships were formed with those of other religious views, and to-day the members of the two faiths mingle freely. During the Mexican war there were too few Jews living in the state to call for notice of their services; in the Civil war, however, Jew and Christian fought side by side. Federal soldiers displaced and mutilated tombstones in Jewish as well as in Christian cemeteries, thus effacing many records which would now be of great interest. Quite a number of Jews attained to the rank of captain; and there is no camp of Confederate Veterans in the larger places that does not include some Jewish members.

A. W. Wi.

MISSOURI: One of the central states of the United States; admitted to the Union in 1821. While yet a territory it was inhabited by Jewish settlers, the earliest of whom were the Bloch family. The Jewish communities of the state are as follows:

St. Louis: Jews began to settle here shortly after 1830. At the present time there are six permanent and several temporary places of worship. The Reform congregations are: Shaare Emeth, Temple Israel, B'nai El, and United Hebrew. These four congregations aggregate about 800 families. Of the Orthodox bodies there are: B'nai Emunah, Tifereth Israel, and the Beth Hamidrash Hagadol.

All the Orthodox organizations have their places of worship on the north side of the city. Tifereth Israel was founded in 1899; its present membership is 160, and it has a Talmud Torah where 200 children receive daily instruction in Hebrew after public-school hours. The Rev. S. Rosenberg is rabbi.

The oldest of the Reform congregations are the B'nai El and the United Hebrew. The latter was established in 1838. It held its first services in a private residence, and its first synagogue was built in 1858. Dr. Illoway was then rabbi. In 1881 a new synagogue was erected at Twenty-first and Olive streets. The membership is 146. Dr. H. J. Messing has been rabbi since 1878. The Sabbath-school has 80 pupils. The congregation has a United Hebrew ladies' aid society, consisting of 80 members; and a young people's literary circle.

Congregations.

The B'nai El congregation was founded in 1852 by a consolidation of two previously existing religious organizations. Its synagogue, built in 1883, is at Chouteau avenue and Eleventh street; present membership, 150. The Sabbath-school numbers about 100 pupils. The Jastrow prayer-book is used. The rabbi (since 1877) is Dr. Spitz; he is also publisher and editor of "The Jewish Voice," established in 1888. The congregation has a ladies' aid society of about 100 members, and a young people's society of about the same number.

Congregation Shaare Emeth was organized in 1866 with 83 members. It worshiped first at the Harmonia Club on Market street. Its present synagogue, on the corner of Lindell boulevard and Vandeventer avenue, was erected in 1897; present membership, 289. The Sabbath-school has an attendance of 246 pupils. Dr. Samuel Sale has been rabbi since 1887. Associated with the congregation is a ladies' auxiliary society.

Temple Israel congregation was organized in 1886. Its synagogue is on the corner of Pine and Twenty-eighth streets; present membership, 250. It has Saturday and Sunday services. Dr. Leon Harrison, rabbi since 1891, conducts services also in the United Charities building on Friday nights for residents of the Russo-Jewish quarter. This voluntary office was established by the Social Settlement League. Besides the regular religious instruction of the young, Temple Israel has a confirmation and postgraduate class, a Bible class for women, and an alumni association.

The following are the chief Jewish philanthropic societies and institutions in St. Louis: The oldest Jewish benevolent society of the city, probably the oldest in the West, is the Hebrew Benevolent Society, instituted in 1842. It was legally incorporated in 1847; present membership, 66. It has the character of a mutual benefit society. There is also a fraternal benefit association under the name of "Progressive Order of the West" (founded 1896), with sixteen lodges, thirteen of which are in the city; the total membership is 1,008 males and 848 females.

Educational and Charitable Institutions.

The first systematic relief of the Jewish poor was begun in 1871. The influx of needy Jews after Chicago's great conflagration made a union of charitable activities necessary. Later on the large immigration of Russo-Jewish refugees made such union still more needful. The United Hebrew Relief Society then became the leading charitable organization of the Jewish community. The late Rev. Isaac Epstein was president for many years, and Dr. Messing vice-president from 1878. There were, besides, three other benevolent societies. All of them were in 1897 merged into one common association under the name of "United Jewish Charities"; each retained, however, its own distinct existence as to officers and the particular scope of charitable work for which it had been founded; all relief is dispensed at the main office of the United Charities. This institution has its own building (erected 1901) on the corner of Ninth and Carr streets. Since its erection all the Jewish charitable and educational societies of the city have joined the union; of these are to be mentioned: the Home for Aged and Infirm Israelites; the Jewish Hospital; and the Hebrew Free and Industrial School, founded in 1879 by Dr. Messing. In this school over 400 children receive religious instruction twice a week, and of this number 200 girls are taught domestic arts and industrial branches three times a week. The industrial department has recently been put under the management of the Sisterhood of Personal Service. The pupils in the Jewish Alliance night-school (present enrolment 460) receive instruction four times a week in the elementary English branches, and free reading-rooms and a library are open to them. The Alliance and the Free-School societies have recently been consolidated.

The Jewish Hospital was founded in 1900 and dedicated in 1902; it occupies a lot of 200 feet fronting Delmar boulevard; free treatment is given to all poor applicants. It has also a training-school for nurses. The Home for Aged and Infirm Israelites was established in 1880; it is located on Jefferson avenue.

The Jews of St. Louis number about 40,000 in a total population of 575,238.

Kansas City: The Reform congregation B'nai Jehudah, organized in 1870, was incorporated in 1872, with 36 members. The present rabbi is Dr. Harry H. Mayer; membership, 190. The Sabbath-school has 165 pupils and 8 assistant teachers. Free religious instruction is given to the children of nonmembers, mainly of poor parents, on Saturday afternoons. There are the usual two Sabbath services only. The synagogue is on the corner of Eleventh and Oak streets. There are about six congregations of the Orthodox persuasion, two of which have their own synagogues: the Keneseth Israel with 110, and the Gomel Chesed with 90, members. The other Orthodox societies worship in rented halls. The various benevolent organizations of the Jewish community were within the last two years confederated as the United Jewish Charities, with a board of directors. The charitable, educational, and industrial work of its several departments is carried on in a rented building on East Fifteenth street.

The Jewish residents of the city number about 8,000 in a total population of 163,752.

St. Joseph: The Jewish settlement at St. Joseph dates from about 1850. The congregation was established in 1859 with 7 members; in 1861 the membership was 20, when an old church building was bought and transformed into a synagogue. This was burned a year later. A new site, on the corner of Sixth and Jule streets, was purchased, on which the present synagogue was erected in 1866. The present rabbi, Dr. Isaac Schwab, has held the office since 1879. The congregation has a membership of 59. The Ladies' Benevolent Society, with a present membership of 60, is an important charitable factor in the Jewish community. There is also an Orthodox congregation composed of Jews from eastern Europe. By their exemplary thrift these later comers have risen from lowly beginnings to fair competencies, and in 1900 succeeded in building a synagogue of their own. There is a Hebrew school where daily instruction is given, and a ladies' benevolent society is connected with the congregation. The minister is S. Kanter. There are 75 members, and about as many more families not affiliated with the congregation, making a total of about 800 persons in the Orthodox section of the community. The whole Jewish population of the city may fairly be figured at 1,200 in a total population of 102,979.

Other Towns: There are a number of other towns of the state with Jewish populations averaging from 12 to 25. In others, again, the number is larger, as may be seen from the accompanying list: **Columbia,** 9 families; total number of individuals, 31. **Chillicothe,** 14 families, aggregating 50 individuals; there is a benevolent society. **Hannibal,** 12 families. **Joplin,** 38 families, representing a total of about 150 persons; a ladies' aid society. **Jefferson City,** 8 families, a total of 34 souls; there is a synagogue. **Moberly,** 16 persons. **Sedalia,** 16 families, aggregating 60 persons; a benevolent society. **Springfield,** 25 families, with about 100 individuals; a congregation and place of worship, with Friday evening services; a ladies' benevolent society.

A. I. Sch.

MITAU: Capital of the government of Courland, Russia; situated about 20 miles from Riga on the Drixa, an arm of the River Aa. The castle of Mitau was founded by the German Knights in 1263; and the town itself received its charter in 1435. Under the rule of the Knights, Jews were not permitted to reside in Mitau. In the sixteenth century, when Mitau was already Polish territory, Jewish merchants carried on a more or less extensive business in the city; yet even then they were not recognized as permanent residents, and they had not the right to organize a community; and in the next century, after the Cossacks' uprising (1648), the Christians of Mitau finally caused their expulsion from the city. The Jew Bär ben ha-Ḳadosh Rabbi Benjamin, whose father was killed in Lithuania during the Cossacks' uprising, was court jeweler (1730) under Duke Ferdinand, and stood high in the esteem of the Knights. He made numerous gifts to the Jewish community, among them a funeral carriage and a coffin, which were still preserved in the middle of the nineteenth century. A concession for a cemetery was granted in 1730 to the Jews of Mitau by the duke on the application of their representative Isaac ben Judah; and a ḥebra ḳaddisha was founded in the same year. Ẓebi Hirsch Ḥarif (d. 1738), son of Rabbi Moses of Lemberg, and an eminent Talmudic scholar, acted as rabbi of the community. Duke John Biron, Ferdinand's successor (1737), was friendly toward the Jews and transacted business in partnership with his court Jew Lipman (Levi). At that time there was a considerable number of Jewish residents in Mitau; under the name of "Schutzjuden" they lived in a separate quarter called the "Judengasse," now the Doblen'sche Strasse.

The Jew Meyer Kreslawe was given permission to open a Jewish inn in the center of the city. This was known as "Hotel de Jerusalem." It still existed in the middle of the nineteenth century, being then owned by H. Michelsohn.

Eighteenth Century.

The successor of Ẓebi Hirsch Ḥarif was another prominent rabbi, Samuel ben Elkanah (d. 1742), author of the responsa collection "Meḳom Shemuel." He was probably followed by Jekuthiel ha-Kohen (d. 1775), father of Raphael ha-Kohen of Hamburg, and a descendant on his mother's side of Mordecai Jaffe, author of the "Lebushim." He held the title "Rabbi of the Province of Livland." His son David Ezekiel Jekuthiel (d. 1823) succeeded him as rabbi of the community. When Duke Ernst Biron was banished to Siberia in 1741, the knights of Courland attempted to expel the Jews from Mitau; and in 1760 the Diet passed a resolution forbidding Lithuanian and Polish Jews to sojourn in Mitau for more than a day or two (see Jew. Encyc. iv. 312b, *s.v.* Courland). With Biron's return from exile in 1762 the condition of the Jews improved; and his son and successor, Duke Peter, was also favorably inclined toward them.

In 1784 a prominent Jew of Mitau, Kalman Borkum, laid the foundation of a synagogue, which was erected entirely at his expense. Both he and his brother Samson were very active in promoting the welfare of the Mitau community, and were strenuous champions in defense of the rights of the Courland Jews against the German merchants. The son-in-law of Kalman Borkum, Dr. Elrich (d. 1809), was a native of Russia, and came to Mitau (1770) from Vilkomir, Lithuania, where he had practised as government and city physician and had received the title of court councilor. Markus Herz, husband of Henriette Herz, visited Mitau in 1775. Judah ben Mordecai ha-Levi Hurwitz, a prominent physician and scholar, practised medicine in Mitau for a time.

Notwithstanding the influence of prominent Jews at court, and in spite of the liberal views introduced from Berlin into German Courland, the Jews of Mitau did not enjoy the rights accorded to the Christians, and often suffered from official abuses and from the enmity of the German merchants. This is evident from the fact that in 1795 the members of the Jewish community of Mitau submitted a memorandum to the knights of Courland assembled at the Diet, in which they gratefully acknowledged the protection hitherto extended to them, and asked for relief from their uncertain legal condition. The petition was signed by the elders Aaron Lipman and Isaac Moses Eides and by other prominent Jews representing the community. Among the latter were David Levi, Joseph Sholem, Joseph Kirschner, Marcus Jacob, Marcus Hirsch, Simon Abraham, and Abraham Danziger. In reply to this petition to the Diet submitted Jan. 13, 1795, the duke expressed an opinion favorable to the proposal that Jews be permitted to settle in Courland. However, before the duke had an opportunity to act in regard to the Jews, Courland was annexed to Russia (March 16, 1795). Catherine II., also, was very favorably disposed toward the Courland Jews, some of whom were among the early Jewish residents in St. Petersburg. When Emperor Paul visited Mitau in 1797, representatives of the Jewish community were received by him in audience. In 1810 the Empress of Russia gave an audience to a Jewish deputation, and appointed Bär Seelig Klein and Samuel Kandauer as court factors. By a ukase of May 12, 1797, the Jews of Courland received the same rights as the Jews of Lithuania and Poland. Their privileges were further extended by Alexander I. in 1805.

Occupations.

In 1835 the Jewish population of Mitau was 4,987; in 1850, only 4,189. The decrease was due to the migration in 1840 of 863 Jews of Mitau to the South-Russian colonies, and also to the ravages of the cholera epidemic in 1848. The income from the meat-tax in 1850 was 8,010 rubles, and from the candle-tax, 2,183 rubles. The Jewish population of Mitau at that time included 1 banker (who was an honorary citizen), 5 merchants of the second gild, 49 merchants of the third gild, 48 merchant families, 85 house and real-estate owners, 45 tailors, 30 shoemakers, 28 capmakers, 25 milliners, 18 tinsmiths, 6 polishers, 6 glaziers, 4 painters, 4 watchmakers, 4 engravers, 2 opticians, 4 umbrella-makers, 3 cotton-spinners, 3 furriers, 3 cigarmakers, 2 dyers, 2 beltmakers, 4 turners, 1 brushmaker, 3 pipe-decorators, 2 bookbinders, 1 tortoise-shell worker, 2 basketmakers, 1 gold-plater, 12 expressmen and drivers, 12 butchers, 6 innkeepers and cooks. There were also a number of hucksters, hostlers, horse-dealers, servants, day-laborers, porters, stone-crushers, woodcutters, water-carriers, etc. There were no Christian porters in Mitau at that time; and for many years the moving of furniture was done by the Jews.

The first Jewish government school in Mitau was established in 1850 with one Jewish and one Christian teacher, a Jewish private school having existed there since 1824. In 1850 there were in Mitau a Talmud Torah (founded in 1805), 10 licensed Jewish private schools, a poorhouse, a synagogue, and two houses of prayer. The ḥebra ḳaddisha was founded, as has been said, in 1730; a ḥebra biḳḳur ḥolim in 1770; Jewish Women's Society in 1840; Prisoners' Aid Society in 1829; Artisans' Association in 1815; and a number of Jewish learned societies during the early half of the nineteenth century.

In 1853 the income and expenditures of the Jewish community amounted to 1,200 rubles. The Jewish artisans were represented in the city council by two delegates from among their number; the Jewish charities were managed by a committee elected by the community; the Jews were represented on the school commission by one rabbi and one merchant; and S. Waggenheim was attached to the governor's office in the capacity of "learned Jew."

Prominent Persons.

Prominent among the Mitau Jews of the nineteenth century were the Sterns, Friedliebs, Rubinsteins, Traugotts, and Marcus Erben. Besides the rabbis already mentioned reference should be made to Elihu, son of David Ezekiel; Israel David Friedman (probably also a son of David), who erected a synagogue at his own expense, and who died in Mitau in 1843; Ephraim Israel Jacobson, dayyan (d. 1831); Moses Enoch Feiertag, dayyan (d. 1848); Hirsch Rabinovich (died in the second half of the nineteenth century); Mendel Israelsohn (d. 1861), assistant rabbi, honorary citizen, and member of the rabbinical commission of 1852; and Solomon Pucher (d. 1899), appointed government rabbi in 1862. Reuben Joseph Wunderbar, author of a history of the Jews of Livland and Courland, and Adolph Ehrlich were natives of Mitau.

The Jews of Mitau were more akin in language, manners, and dress to the Jews of Germany than to those of Poland and Lithuania. Notwithstanding, however, their higher culture, they were never held in favor by the Germans of Courland, who in the last quarter of the nineteenth century were strongly influenced by the anti-Semitic movement of Germany. The nationalistic movement of the Lets, the native population of Courland, and their growing activity in commercial and social affairs, have unfavorably affected the prosperity of the Jewish community in Mitau. Moreover, the improved railroad facilities have made Mitau practically a suburb of Riga, which has attracted to itself most of the business once belonging to the former. On the construction of the Riga-Dünaburg railroad many of the prominent Jewish merchants of Mitau removed to Riga.

In 1904 Mitau had 8,402 Jews in a total population of about 35,000. See Courland.

Bibliography: Wunderbar, *Gesch. der Juden in den Provinzen Liv- und Kurland*, Mitau, 1853.

H. R.

MITER: A head-dress; one of the sacred garments of the priests. The high priest's miter was designated as "miẓnefet," and was made of fine linen, to which the diadem ("ẓiẓ") of pure gold, inscribed with the title "Holiness to the Lord," was fastened by means of a purple cord (Ex. xxviii. 4, 39; xxxix. 31).

The miter of the ordinary priests was called "migba'ah"; but the term is found only in the plural form, "migba'ot." These miters were also known by the compound name "pa'are ha-migba'ot," and were likewise of fine linen (*ib.* xxviii. 40, xxxix. 28). That "pa'are" (from "pe'erim"; sing. "pe'er") is not an adjective, but a noun, is evident from the expression "pa'are pishtim" = "miters of linen, worn by the priests" (Ezek. xliv. 18). Indeed, the use of the "pe'er" was not restricted to priests. It was a head-covering of distinction for a bridegroom and for the daughters of Zion (Isa. iii. 20, lxi. 10). Being a personal ornament, it was removed during periods of mourning (*ib.* lxi. 3; Ezek. xxiv. 17, 23).

The priestly miters are not described in the Bible, yet the name "miẓnefet," like "ẓanif," the miter which the prophet saw placed on Joshua the high priest (Zech. iii. 5), suggests a turban wound around the head. The term used to denote the miters of the common priests ("migba'ot," derived from "gebia'" = "cup") suggests a covering of conical shape, fitted tightly on the head, and the verb "we-ḥabashta" (Ex. xxix. 9) seems to point to the same. "Pe'er" may be translated "a beautiful bonnet"; and the "pa'are ha-migba'ot" worn by the priests may have been bonnets with a conical extension.

Josephus' description of the miter of the high priest and of that of the ordinary priests ("Ant." iii. 7, §§ 3, 6) appears to be confused; but it might be elucidated by a study of the rabbinical literature on the subject. The Mishnah makes no distinction between "miẓnefet" and "migba'ot," and calls the miter of the common priest likewise "miẓnefet" (Yoma vii. 5, 25a). The miter of the high priest was shorter, to allow room on the forehead for the diadem, which was two finger-breadths wide and reached from ear to ear (Suk. 5a), a space being left for the phylacteries (Zeb. 19a *et seq.*). A baraita says that the high priest wore a woolen cap, to which was attached the diadem (Ḥul. 138a). Perhaps this cap served as an underlining for the miẓnefet. The miters were all made of six-cord threads (Maimonides, "Yad," Kele ha-Miḳdash, viii. 1, 2). The code of Moses of Coucy ("Semag," No. 173) and later authorities agree that the miter of the common priests was not coiled around like a turban, but was rather a stiff, conical hat graduating to a point at the top. Ibn Ezra, in his commentary, says the miẓnefet was like a woman's bonnet and the migba'ah like a man's hat (fez). All authorities are unanimous in their opinion that the miẓnefet of the high priest was much smaller, covering only about one-half of his head. It was made of fine linen, twined around the head many times.

Symbolically the miter and the rest of the priest's vesture, like the sacrifices, represented certain sins to be forgiven. Using another symbol, R. Ḥanina said: "Let the miter on high combat the high spirit of the arrogant" ('Ar. 16a).

J. J. D. E.

MITNAGGEDIM (lit. "opponents"): Title applied by the Ḥasidim to their opponents, *i.e.*, to the Orthodox Jews of the Slavonic countries who have not become adherents of Ḥasidism (see Jew. Encyc. vi. 254, *s.v.* Ḥasidim). The latter have in course of time accepted that title, and "mitnagged" now means not necessarily an active or even a passive opponent of Ḥasidism, but simply a non-Ḥasid. An alternative title for "mitnagged" is "'Olam'sher Yid" (= "Jew of the world"), not in the sense of being worldly, but meaning one who belongs to the great mass of the Jews of the world who are not Ḥasidim.

MITRANI. See Trani.

MITZKUN, DAVID MOSES: Russian Hebraist; born May, 1836; died in Wilna July 23, 1887. He was a writer of Hebrew prose and poetry, and maintained himself chiefly by teaching Hebrew. A collection of his Hebrew poems entitled "Kinnor Dawid" was published at Wilna in 1863.

H. R. J. S. R.

MI'UN: A Hebrew word signifying "refusal, denial, or protest"; used technically by the Rabbis to denote a woman's protest against a marriage contracted for her during her minority; also the annulment of such a marriage.

A marriage contracted for a girl minor by her father was regarded as valid; and it necessitated the formality of a divorce if separation was desired (see Daughter; Majority; Marriage). If, however, the minor was divorced or widowed after she had been given in marriage by her father, and then, while still in her minority, married again, or, in the case of the father's death, was given in marriage by her brothers or by her mother, even when her consent was obtained, such a marriage was not valid until she reached the age of maturity. During her minority she might at any time declare her aversion to her husband and leave him without a geṭ (Yeb. 107a). Nor was any formal declaration on her part necessary. If she in any manner showed her disapproval of the marriage contracted for her, or if she accepted betrothal-money ("ḳiddushin") from another man, she was released from the bonds of the marriage previously contracted in her behalf (Yeb. 108a; Maimonides, "Yad," Gerushin, xi. 3; Shulḥan 'Aruk, Eben ha-'Ezer, 155, 3).

Form of Mi'un.

The usual procedure in regard to mi'un was that the minor said, in the presence of two witnesses, "I do not wish to live with my husband . . .," or used some other phrase denoting the same idea, and thereby became released (Yeb. 108a). Originally it was the custom to make out a so-called "geṭ mi'un," in which the minor declared, "I do not like him; he does not please me; I do not wish to remain with him as his wife." This was subsequently abolished, and the following practise was introduced: The two men before whom such a declaration was made prepared a document, which, however, was not necessary for the minor's remarriage, since she became free as soon as she had made the declaration (Yeb. 107b, 108a). This document, as given by Maimonides ("Yad," *l.c.* xi. 11, and with a few unimportant variations in "Or Zarua'," i. 687), reads as follows:

> "On . . . [day of the week], the . . . day of the month . . ., in the year . . . according to the . . . era, . . . , daughter of . . ., protested before us and said, 'My mother [or my brothers] deceived me and gave me in marriage [or betrothed me] to . . ., son of . . ., and now I declare before you that I do not desire him, and that I will not stay with him.' We have examined this . . . and are satisfied that the girl is yet a minor, and have written and signed and given [this] to her as a document and a clear proof.
>
> ...., witness. ...., witness."

If the marriage was contracted for the girl before she had reached the age of six, or after that age without her consent, the formality of mi'un was not necessary. If the marriage took place with her consent when she was between the ages of six and ten, mi'un was necessary if she showed signs of intelligence and of appreciation of the symbols of marriage. After ten, mi'un was necessary even if the girl manifested no signs of intelligence (Yeb. 107b; Giṭ. 65a; "Yad," *l.c.* xi. 7; Eben ha-‘Ezer, 155, 2). Since mi'un was regarded as an annulment of marriage, and not merely as a separation, like divorce, the girl might afterward marry any of the relatives of her presumptive husband, and he any of her relatives. She might marry a kohen, or might remarry her previous husband, even though she had been married to another after mi'un (Yeb. 108a; "Yad," *l.c.* xi. 16, 17; Eben ha-‘Ezer, 155, 10; see DIVORCE).

Antiquity of Custom.

The institution of mi'un seems to have been of very early origin. The Rabbis speak of it as a well-established custom, although some of them look upon it with disfavor. Bet Shammai restricted mi'un to betrothed minors, and prohibited it after marriage had already taken place (Yeb. 107a). Bar Ḳappara includes mi'un among the things which one should avoid (*ib.* 109a); and one is therefore advised against associating oneself with witnesses for the purposes of mi'un ("Yad," *l.c.* x. 16). In the Middle Ages some of the rabbis vigorously objected to the marriage of minors, giving as one of their reasons the desire to make mi'un impossible (Tos., Yeb. 109a, *s.v.* "Wayitraḥeḳ"; "Haggahot Maimuni" to "Yad," *l.c.* xi. 1; "Or Zarua‘," i. 686; Eben ha-‘Ezer, 155, 1, Isserles' gloss).

In the fifteenth century R. Menahem of Merseburg wished to abolish the institution of mi'un altogether; and while he did not secure for his decree unanimous adoption, the sentiment against the marriage of young children, which became stronger in later times, and the diffidence with which the Rabbis approached a case of mi'un on account of the conflicting opinions, caused this institution to become almost obsolete (see Judah Minz, Responsa, No. 13, Fürth, 1766; Eben ha-‘Ezer, 155, 22, Isserles' gloss; and "Pitḥe Teshubah," *ad loc.*; see also MAJORITY).

MIXED MARRIAGE. See INTERMARRIAGE.

MIZMOR LE-DAWID (lit. "A Psalm of David"): The superscription to Ps. xxix., chanted on Sabbaths before the evening service, and at morning service while the scroll of the Law is being returned to the Ark. Settings by modern composers are in most cases utilized in the morning service by the Ashkenazim, there being among them no recognized traditional melody. The Sephardic synagogues, however, possess an ancient chant, of Peninsular origin, which, in its melodic outline, and in its extensive use of the third and fifth degrees of the scales as the reciting notes, and particularly the former as the closing one, characteristically illustrates the general tone of their traditional melodies and intonations (comp. LEKAH DODI; 'ET SHA‘ARE RAẒON). The transcription here given exhibits the employment of both strains of the chant.

MIZMOR SHIR LE-YOM HA-SHABBAT (lit. "A Psalm, a Song for the Sabbath Day"): The superscription to Ps. xcii., chanted with Ps. xciii. before the commencement of evening service on Sabbaths (including festivals falling on that day) in the "Pesuḳe de-Zimrah" of the early part of morning service on Sabbaths and festivals (see Liturgy), and (without Ps. xciii.) after the Reading of the Law at Sabbath afternoon service. There is, strangely enough, no general musical tradition for the psalm in the northern uses. The modern ḥazzanim and choir-masters have produced numerous settings (choral and solo) for it. A noteworthy composition by Franz Schubert for verses 1 to 8, designed for special festival occasions, is included in Sulzer's "Schir Zion" (i. No. 6). This setting is written for barytone solo, soli quartet, and chorus, and has been introduced by Georg Henschel at the London Symphony Concerts.

Ordinarily, in the northern ritual, the psalm is read by the congregation, and the concluding verses, from No. 12, are then intoned by the ḥazzan in an elaborate melismatic recitative, of the character shown in the transcription commencing "Ẓaddiḳ ka-tamar" (comp. the similar passage in Sulzer's "Schir Zion," ii.).

In the Spanish and Portuguese tradition there is preserved for the Sabbath Psalm an ancient chant of exceptional beauty and interest, which is utilized in England also in the synagogues of the Reform and the German and Polish rites. It has been effectively scored, as the Psalm of the day in the Temple service, by Sir Edward Elgar in his oratorio "The Apostles," which was produced at the Birmingham Musical Festival of 1903. The first strain (marked A in the transcription), the pair of simple musical phrases employed for ordinary verses, is very antique in character; and the secondary strain (marked B), even if a later addition to it, also must have originated under Moorish influence. The ornamental figuration of the first two and parallel phrases in this secondary strain is of true Oriental character, and appears frequently in Arab songs, as, for instance, those founded on the "Oriental chromatic" scale given by Bourgault-Ducoudray in "Trente Mélodies Populaires de Grèce et d'Orient," Paris, 1876, particularly No. 2 (quoted also by Ambros, in his "Gesch. der Musik," and by others), No. 17, and the more modern No. 29. But it is important to note that this figure, and also that of the third phrase in the same strain, frequently occur in the traditional melody of the Jews of Teutonic and Slavonic lands as well as of those around the Levant (comp. Jew. Encyc. iii. 247, *s.v.* Birkat Kohanim [the Polish melody]; Geshem [melody A]; Ne'ilah; and especially Music, Synagogal).

A. F. L. C.

MIZPAH (MIZPEH; מצפה): Name of several places in Palestine. It is derived from צפה (= "to look"), on account of which it is translated in certain instances by the Septuagint *σκοπιά* and *ὁρασις*, and by the Targumim סכותא (Gen. xxxi. 49). Except in Hosea v. 1, "Mizpah" always occurs with the definite article prefixed; "Mizpeh" occurs three times with the article—(1) in Josh. xv. 38, where it designates a town of Judah; (2) in Josh. xviii. 26, where it is applied to a town of Benjamin; and (3) in II Chron. xx. 24, where it probably signifies a watch-tower in the wilderness—and twice in the construct state; namely, in Judges xi. 29 ("Mizpeh of Gilead") and in I Sam. xxii. 3 ("Mizpeh of Moab").

Mizpah is first mentioned in the Bible in connection with the meeting of Jacob and Laban on Mount Gilead, where the heap of stones which they erected as a witness, and which was called by Jacob "Galeed" and by Laban "Jegar-sahadutha," was called "Mizpah" also, for the stated reason, "the Lord watch between me and thee" (Gen. *l.c.*). This Mizpah is most probably identical with the Mizpeh of Gilead (see above), which, according to Schwarz ("Das Heilige Land," pp. 17, 183), is the same as Ramath-mizpeh of Gad (Josh. xiii. 26), and which he identifies with the modern village of Al-Ṣuf in the eastern mountain-range of Gilead.

Mizpah in Palestine.

The most important of the places bearing the name of "Mizpah" was that in Palestine, which on several occasions was the seat of assemblies at which the Israelites discussed their affairs, *e.g.*, in the time of Jephthah (Judges xi. 11), and during the war of Israel with Benjamin (*ib.* xx. 1). Samuel, also, summoned Israel to Mizpah (I Sam. vii. 5-6, 11, 16); and, finally, in the time of the Maccabees, Mizpah (Μασσηφά) appears again as a place of solemn assembly (I Macc. iii. 46). From the foregoing it would appear that at Mizpah a shrine for the worship of Yhwh existed; but there is a diversity of opinion as to the location of the place. There is no doubt that, since it is mentioned with Geba of Benjamin, the Mizpah which Asa fortified against the attacks of the King of Israel (I Kings xv. 22; II Chron. xvi. 6) was the Mizpah of Benjamin, which was called "Mizpeh" in Josh. xviii. 26 (see above), and which was over against Jerusalem. It was also this Mizpah which became the seat of the governor Gedaliah after the destruction of the Temple (II Kings xxv. 23; Jer. xl. 6 *et seq.*, xli. 1): for when Ishmael went forth from Mizpah he met certain people journeying from Shiloh to Jerusalem. W. F. Birch concludes that the other Mizpahs indicated as places of assembly are also identical with the same town of Benjamin ("Pal. Explor. Fund," 1881, pp. 91 *et seq.*; 1882, pp. 260 *et seq.*). Finally may be mentioned the opinion of Conder ("Handbook to Bible," p. 277, London, 1879), who identifies Mizpah with Nob. The Mizpeh of Judah (Josh. xv. 38; see above) is in the Shefelah or lowlands, mentioned as lying between Dilean and Jokthe-el, neither of which places has been identified. Schwarz (*l.c.* p. 74) identifies Mizpeh with Tel al-Safiyah, the Alba Specula of the Middle Ages (comp. Robinson, "Researches," ii. 363 *et seq.*).

Land of Mizpah.

There was also a whole tract of land called "the land of Mizpah" ("ereẓ ha-Miẓpah") or "the valley of Mizpeh" ("biḳ'at Miẓpeh"), mentioned in connection with the battle between Joshua and Jabin, King of Hazor, which took place at the waters of Merom (Josh. xi. 3, 8). The topography indicated, "under Hermon in the land of Mizpeh" and "unto great Zidon and unto Misrephoth-maim, and unto the valley of Mizpeh eastward," taken in connection with Josh. xi. 17, suggests that the land or valley of Mizpah is to be identified with the valley of the Lebanon or the Cœle-Syria of the Greek writers. The Mizpeh of Moab (see above) is mentioned only once (I Sam. xxii. 3), as the residence of the King of Moab, to whose care David consigned his parents.

J. M. SEL.

MIZRAḤ: Hebrew term denoting the rising of the sun, the east (Num. xxi. 11; Ps. l. 1); also used to designate an ornamental picture hung on the eastern wall of the house, or in front of the reading-desk in the synagogue, and applied to the row of seats in the synagogue on either side of the Ark. The custom of turning toward the east while at prayer, observed by the Jews living west of Palestine, is of great antiquity (Dan. vi. 11; comp. I Kings viii. 38; Ber. 28b; see EAST). The Jews of Palestine prayed with their faces turned westward (Suk. 51b). In later times opinion varied on this subject. While some of the rabbis, claiming that the Divine Presence ("Shekinah") is everywhere, maintained that it makes little difference in which direction one's face is turned in prayer, others were of the opinion that the Divine Presence is especially located in the west, and that therefore one should turn westward. R. Sheshet positively objected to the custom of praying while facing the east because the Minim prayed in that direction (B. B. 25a). The custom, however, predominated and was formulated in a baraita reading as follows: "One who is outside of Palestine should turn toward Palestine; in Palestine, toward Jerusalem; in Jerusalem, toward the Temple; and in the Temple, toward the Holy of Holies" (Ber. 30a; Yer. Ber. iv. 5).

In accordance with this injunction, synagogues are so constructed that the Ark may be placed in the direction of Palestine, and that the people may turn toward it in prayer (Maimonides, "Yad," Tefillah, xi. 2; Shulḥan 'Aruk, Oraḥ Ḥayyim, 94, 1-3). In places east of Palestine, the Ark is placed in the west and the door opposite to it in the east (Tosef., Meg. iii. 14; Rosh, *ib.* iii. 12; Ber. 6a; Tos. *s.v.* "Aḥure"; "Yad," *l.c.*; comp. Oraḥ Ḥayyim, 150, 5 and Isserles' gloss; "Ḥatam Sofer," *ib.* 27).

In spite of the objection of the medieval rabbis to the presence of any object of art in the synagogue, there were still some figures and pictures retained (see ART). In many synagogues and in almost every bet ha-midrash of modern times an ornamental picture, usually bearing the inscription "From the rising of the sun unto the setting thereof, the name of the Lord is praised" (Ps. cxiii. 3, Hebr.), is hung in front of the reading-desk, which latter is near the Ark. Many other passages, and even whole psalms, are added, and frequently are artistically strung together so as to form the likeness of the menorah or of some animal. One of the later authorities ("Ḥatam Sofer," Yoreh De'ah, 127) forbids the engraving of the above-cited passage around a picture of the sun in one of the eastern windows of the synagogue (comp. "Sefer Ḥasidim," ed. Wistinetzki, § 1625). No one, however, seems to raise any objection to the mizraḥ, which is found in synagogues and in many homes.

A. J. H. G.

MIZRAḤI: Family living in the Orient, to which belong some well-known rabbinical authors. There are two main branches: one in Constantinople, and the other in Jerusalem. The name "Mizraḥi" signifies "an Oriental," and is used as a surname by many Persian Jews who have settled in Turkey.

Abraham ben Baruch Mizraḥi: Shoḥeṭ at Jerusalem in the seventeenth and eighteenth centuries. He was the author of "Zikkaron li-Bene Yisrael," containing laws pertaining to ritual slaughtering. It was printed with Moses Ventura's "Yemin Mosheh," Amsterdam, 1718.

BIBLIOGRAPHY: Fürst, *Bibl. Jud.* ii. 381; Steinschneider, *Cat. Bodl.* col. 702.

Absalom ben Moses Mizraḥi: Oriental scholar of the fourteenth century. Abraham de Balmes in his "Miḳneh Abraham" (in the chapter on prosody) quotes a work by Mizraḥi entitled "Imre Shefer." This work was published by Carmoly, under the title "Ḳabbalah 'al Meleket ha-Shir" (Paris, 1841), from a Paris manuscript, in which it is indicated that it was composed in 1391. Among the models which Mizraḥi gives is the letter of Ibn Pulgar to Abner of Burgos, which Mizraḥi styles "shir meyuḥas" (noble poem, that is, a poem arranged in Mosaic style).

BIBLIOGRAPHY: L. Dukes, in *Orient, Lit.* iv. 435, vii. 808; Fuenn, *Keneset Yisrael*, p. 70; Steinschneider, *Jewish Literature*, p. 177.

Elijah ben Abraham (Re'em), Mizraḥi: Turkish rabbi and mathematician; born at Constantinople about 1455; died there 1525 or 1526. Mizraḥi was a pupil in Talmud and rabbinics of Elijah ha-Levi, who was known for his mild attitude toward the Karaites, whom he taught the Talmud (Mizraḥi, Responsa, Nos. 41, 57). But it appears from a letter of Elijah Capsali (see Grätz, "Gesch." 3d ed., viii. 448) that Mizraḥi studied also under Judah Minz of Padua, who warned him not to throw himself headlong into the quarrel between Joseph Colon and Moses Capsali. From this letter it is evident also that Elijah Mizraḥi is not to be identified, as he is by Conforte ("Ḳore ha-Dorot," p. 29a) and Azulai ("Shem ha-Gedolim," i. 22), with Elijah Parnes, who is mentioned in Colon's responsa, and who is called by Elijah Capsali a corrupt forger (comp. Zunz's notes to the "Itinerary" of Benjamin of Tudela, ed. Asher, ii. 40).

A TYPICAL MIZRAḤ.

(In the possession of Maurice Herrmann, New York.)

Studies Mathematics.

While still a young man, Mizraḥi distinguished himself as a Talmudist and as an authority in rabbinical matters, on which he was consulted by many rabbis even in the lifetime of Moses Capsali. Although he was very religious, yet he devoted a part of his time to the study of the secular sciences, particularly to mathematics and astronomy, which he studied under Mordecai Comtino (see letter of Delmedigo in Geiger, "Melo Ḥofnayim," p. 12). Mizraḥi for some time earned a livelihood by teaching Talmud, mathematics, astronomy, and other sciences; but owing to his weak constitution the work proved too hard for him (Mizraḥi, Responsa, No. 56). Though it would appear from his mathematical works that he read the Greek authors, it can not be said with certainty whether he read them in the original or in an Arabic translation. It is evident, however, that he was master of at least one, if not both, of these two languages. At the death of Moses Capsali (*c.* 1495), Mizraḥi succeeded him as grand rabbi or ḥakam bashi of the Ottoman empire, which office he held till his death. Like his predecessor, Mizraḥi had a seat in the divan assigned to him by the sultan beside the mufti and above the patriarch of the Christians. The work "Me'ora'ot 'Olam" (Constantinople, 1756) contains several legends in connection with Mizraḥi and the sultan (Nepi-Ghirondi, "Toledot Gedole Yisrael," p. 267).

Mizraḥi, who had previously written against the Karaites and who had entered into polemics with Elijah Bashyaẓi (comp. the introduction to the latter's "Adderet Eliyahu"), changed his attitude toward them after he had become ḥakam bashi. Like his master, Elijah ha-Levi, he favored the idea of teaching the Talmud to the Karaites, provided the latter would abstain from reviling it. When the zealots, aiming at the destruction of every means of reconciliation between the Rabbinites and the Karaites, made so many restrictions with regard to the latter and threatened with excommunication those who would not observe them, Mizraḥi was not in Constantinople. When he returned he was indignant at the restrictions; he declared that it was the duty of the Rabbinites to consider the Karaites as Jews, and that Elijah ha-Levi and Eliezer Capsali, whose piety nobody doubted, were of the same opinion (Mizraḥi, Responsa, No. 57). He was opposed also to certain innovations of the cabalists with regard to the interpretation of the Bible (*ib.* No. 1).

His Works.

The following are Mizraḥi's rabbinical and exegetical works: "Tosefe Semag" (Constantinople, 1520), novellæ on Moses of Coucy's "Sefer Miẓwot Gadol," afterward published with the text under the title "Ḥiddushim" (*ib.* 1541); "Sefer ha-Mizraḥi" (Venice, 1527), a supercommentary on Rashi's commentary on the Pentateuch; "She'elot u-Teshubot," a collection of responsa in two parts: part i., containing 100 responsa (Constantinople, 1546); part ii., containing 39 responsa, printed with the responsa of Elijah ibn Ḥayyim under the title "Mayim 'Amuḳḳim" (Venice, 1647). Mizraḥi himself considered his commentary on Rashi the most important of his works (Responsa, Nos. 5, 78). Besides showing Rashi's Talmudic and midrashic sources, he endeavors to elucidate all obscure passages, thus defending him from the strictures of the later commentators, particularly Naḥmanides. The work was published after Mizraḥi's death by his son Israel, a fact which makes it possible to fix the approximate date of the author's death; for in Jan., 1525, he was still alive (comp. Benjamin Zeeb, Responsa, No. 284). A compendium made by Jacob Marcaria (?) was published under the title "Ḳiẓẓur Mizraḥi" (Riva di Trenta, 1561), and later one by Isaac ha-Kohen of Ostrog, entitled "Mattenat 'Ani" or "Ḳiẓẓur Mizraḥi" (Prague, 1604–9). Many commentaries and strictures were written on Mizraḥi's commentary, among the former being: "To'afot Re'em," by Mordecai Carvallo, and "Ḥayye Yiẓḥaḳ," by his son Isaac Carvallo (printed together, Leghorn, 1761); Eliakim Gatigno's "To'afot Re'em" (Smyrna, 1766); Isaac Ḥaddad's "Ḳarne Re'em" (Leghorn, 1768); Joseph of Milhau's (Muscat's) "Oẓerot Yosef" (*ib.* 1783); and Moses Toledano's "Meleket ha-Ḳodesh" (*ib.* 1803). Among the critics were Samuel Edels ("Ḥiddushe Maharsha," Hanau, 1716) and Samuel Ẓarfati ("Nimmuḳe Shemu'el," Amsterdam, 1718).

Mathematical Works.

Mizraḥi's mathematical works are "Sefer ha-Mispar" (Constantinople, 1534), on arithmetic, and a commentary to Ptolemy's "Almagest" (no longer extant), of which Mizraḥi was very proud, no commentary having been previously written on that work. He says (Responsa, No. 5) that, owing to the importance of the science of astronomy, the study of which is considered as a "miẓwah" (good deed), he occupies himself daily with writing a commentary on the "Almagest." According to Delmedigo (*l.c.*), Mizraḥi wrote also a commentary on Euclid's "Elements." The "Sefer ha-Mispar" is in three books, divided into "gates" ("she'arim"), which are subdivided into chapters. Book i. consists of three gates, treating respectively of the four functions in (1) whole numbers, (2) fractions, and (3) mixed numbers. Book ii., also of three gates, treats of (1) the four functions in astronomical fractions, (2) the extraction of the square and cube roots, and (3) proportion. Book iii. is divided into two parts, the first containing arithmetical and the second geometrical problems. Each series of problems consists of two classes treated in two chapters, the first being problems that are solved with, and the second those that are solved without, the help of the rule of three. In the introduction, Mizraḥi speaks of the relation between theology, mathematics, and the natural sciences, remarking that, while theology is in no sense concrete, the other two sciences are. He says also that mathematics is like a bridge by which one may pass from one science to the other, and that therefore special attention should be paid to it. Mizraḥi based this work mainly on Ibn Ezra's "Sefer ha-Mispar"; and twenty-one out of the 100 problems which it contains are almost literally copied from the latter. He employed Greek and Arabic works also, often quoting Nicomachus of Gerasa, Euclid, and Heron of Alexandria. From the Arabs he took material for his observations on fractions, extraction of the square root, and quadratic equations.

An abridgment of Mizraḥi's work and of Abraham b. Ḥiyya's "Sefer Ẓurat ha-Areẓ" was made by Sebastian Münster, to be used as a text-book by his pupils. This abridgment was published with a Latin translation by Schreckenfuchs (Basel, 1546), through which Mizraḥi came to the knowledge of European scholars, his original work having become rare. A similar work attributed to Mizraḥi was published at Lemberg (1807) under the title "Meleket ha-Mispar." It contains at the end lessons in chess. In answer to a question by Count Boncompagni of Rome as to whether a Jewish writer would occupy himself with the summation of the series $1^3+2^3+3^3+\ .\ .\ .\ +n^3$, Steinschneider translated into Italian the parts of the "Sefer ha-Mispar" relating to the question, together with the introduction ("Brani dell' Aritmetica d'Elia Misrachi," pp. 43--67, Rome, 1866). According to Delambre ("Histoire de l'Astronomie du Moyen-Age," p. 212, Paris, 1819), Mizraḥi was the first to treat of the extraction of the cube root. It is true that Delambre ascribed to him a much earlier epoch than that in which he lived; for, considering Mizraḥi as later than Ibn Yunus (d. 1008), he placed him in the twelfth century.

Israel ben Elijah Mizraḥi: Turkish Talmudist; lived at Constantinople in the sixteenth century. He edited his father's "Sefer ha-Mizraḥi" (Venice, 1527), adding to it a preface in which he asked the readers, in case they were unable to understand certain passages, not to criticize his father, but to apply to him (Israel) for explanation. A responsum of Mizraḥi's is found in "Abḳat Rokel" (No. 180). He corresponded with Abraham Treves, the author of "Birkat Abraham."

Bibliography: Azulai, *Shem ha-Gedolim*, i. 115; Fuenn, *Keneset Yisrael*, p. 698.

Israel Meïr ben Joseph Mizraḥi: Palestinian rabbi; head of the yeshibah of Jerusalem in the first half of the eighteenth century. He distinguished himself as a rabbinical scholar at an early age, and although he died when still young, he left important works. In 1727 he was sent to Constantinople to collect alms; and there he published his responsa collection "Peri ha-Areẓ," followed by a "Ḳonṭres" containing novellæ to Maimonides' "Yad" and its commentaries. He wrote also "Ner Mizraḥi," a commentary on Elijah Mizraḥi's novellæ to the "Semag," and "Tif'eret Yisrael," sermons. Both of these works remain unpublished.

Raphael Abraham Shalom Mizraḥi (better known as **Rab Sharabi**): Rabbi in Jerusalem; born at Yemen; died in 1777. He enjoyed the reputation of being the most learned cabalist of his time, while his fervent piety, which, according to the historians, recalled that of the famous Isaac Luria of Safed and which has become proverbial, secured for him the position of president of the yeshibah Ḳahal Ḳadosh Ḥasidim.

Of Sharabi's writings on the Cabala the principal ones are "Reḥobot ha-Nahar" and "Derek Shalom."

Sharabi's son **Isaac Mizraḥi Sharabi** (d. at Jerusalem in 1803) bore the same high reputation for piety as his father, whom he succeeded at the yeshibah.

Reuben ben Hananiah Mizraḥi: Rabbi of Constantinople in the seventeenth and eighteenth centuries; a descendant of Elijah Mizraḥi. He was the author of "Ma'yan Gannim" (Constantinople, 1721), a work containing decisions upon ritual matters and homilies on the Pentateuch, with a preface by Aaron Hamon. In the preface are mentioned the following works by Mizraḥi, which are still unpublished: "Be'er Mayim Ḥayyim," commentary on the Zohar; "Nozelim Min Lebanon," commentary on the "Tiḳḳunim"; "Peri 'Eẓ Ḥayyim," commentary on Maimonides' "Yad"; "Kappot Temarim," commentary on Midrash Rabbah; "'Arbe Naḥal," commentary on Pirḳe Abot and Esther; "'Eẓ Abot," responsa; "Ketem Paz," commentary on the Ṭurim Oraḥ Ḥayyim and Eben ha-'Ezer; and novellæ on the Talmud.

MIẒWAH. See Commandment.

MNEMONICS (Hebrew, "simanim" = "signs"): Certain sentences, words, or letters used to assist the memory. Such aids are employed in the Mishnah, in both Talmuds, and in the Masorah, as well as by the Geonim and by the teachers of the Law during the Middle Ages. In this article only the Talmudic mnemonics will be discussed, together with those employed by the later teachers of the Law. For Masoretic signs and their use see Masorah. The mnemonics employed in the Talmud may be divided into the following two groups:

Formed of Sentences.

(1) Mnemonics which are formed from a Scriptural passage, a mishnah, a halakic sentence, or a proverb or maxim taken from life or from nature. These simanim, which are introduced by the word "we-simanak" (= "and let thy sign be"), stand invariably after the halakic sentences for which they serve as signs; and it is usually stated who invented and used them. Many originated with the Babylonian amora R. Naḥman b. Isaac, who employed them with special frequency. They occur very often in 'Abodah Zarah, Ḥullin, and Shabbat, as well as in Bekorot, 'Erubin, Yebamot, Ta'anit, and the remaining treatises. Mnemonics are used to prevent confusion where for any reason it might easily occur. Thus Ps. cxxxix. 5a ("Thou hast set me behind and before") is employed as a mnemonic for 'Ab. Zarah 8a, to show that in the enumeration of heathen feasts the Mishnah "goes from the

end toward the beginning," and that the feasts which were celebrated later are mentioned first; it might be supposed that the Mishnah had followed the order of the seasons in which the several festivals occurred. In like manner, when there is a difference between two things which are apparently alike, a sign is employed to avoid possible confusion (see several examples in Ḥul. 62b-63a). These simanim are used especially to keep the authors of divergent teachings distinct. Thus, for example, in Ḥul. 46a, where it is said that R. Ḥiyya used to throw away the liver, while R. Simon, the son of R. Judah ha-Nasi, used to eat it, the saying "ashirim meḳammeẓin" (= "the rich are economical") is employed, inasmuch as the rich R. Simon b. R. Judah was frugal and did not wish to throw away the liver. If two or more scholars bear the same name, a sign is used to show which one of them is meant. Thus in Pes. 114a, where it is said that the R. Isaac who in halakic sentences is called "Shema'ata" is R. Isaac b. Aḥa, the phrase "shema'uni aḥai" (I Chron. xxviii. 2) is used as a sign, *i.e.*, the son of Aḥa is one of the Shema'ata to whom halakic sentences belong.

To Distinguish Authorship.

(2) A wholly different kind of sign, found in the mnemonic sentences which are composed of single words each of which is a catchword for a halakic sentence, a teaching, or an opinion; or of the names of the authors and together with words made up of single letters either of the authors' names or of the catchwords characteristic of the sentences, or again of both. There are only a few examples of these sentences which have any meaning, most of them making no sense. With one exception (Zeb. 7b), they all stand before the sentences which they are to impress on the memory, and are never introduced by "we-simanak," but by "siman," which word stands sometimes before and sometimes after the mnemonic term. Mnemonics, however, are often found without the word "siman" to designate their character (*e.g.*, Shebu. 35a; Sanh. 83a), and have thus sometimes been wrongly considered as parts of the halakic sentences, as in Meg. 31a (comp. N. Brüll in his "Jahrb." ii. 119). On the other hand, there is a case (B. B. 113) where the mnemonic term was lost, and the introductory word "siman" was then supposed to be the name of an amora (comp. J. Brüll, "Die Mnemotechnik des Talmuds," p. 18).

Single Words.

These mnemonics, which are nearly all anonymous, designate the order of succession of the sentences which are to follow, or of the transmitters of the sentence about to be given, or even how many times and in what passages the name of the same transmitter occurs in the treatise under discussion. A few examples may be given. In Ḥul. 4a the sayings of R. Manasseh which occur in the treatise are comprised in a single sentence which itself contains a regulation concerning circumcision. In Ḥul. 11a different amoraim of various periods give different reasons for one fundamental law. Out of single letters taken from the names of these authors is formed the mnemonic sentence "zeman shebaḥ mekannesh," denoting that time collects that which is good; *i.e.*, in this case time has not caused the excellent sayings of the amoraim of different times to be forgotten. Occasionally these mnemonics show that something is missing in the Talmud (comp. Tos., Men. 20a, *s.v.* "Sheken"). With the exception of 'Arakin, Beẓah, Ḥagigah, Me'ilah, Rosh ha-Shanah, Sukkah, Tamid, and Temurah, such simanim are found in all the treatises of the Babylonian Talmud. It is probable, however, that in the treatises just cited there were likewise simanim which were afterward lost, especially since many mnemonics are missing in the present editions of the Talmud which were to be found in earlier copies (comp. N. Brüll, *l.c.* ii. 62 *et seq.*). These mnemonics were used by students as early as the period in which the Halakah was still handed down only orally. The prohibition against committing halakot to writing did not apply to these simanim; and they thus furnished aids to the memory.

Means of Preserving Halakot.

Most of the mnemonics, however, appear to have originated after the Talmud had been collected and arranged, but was not yet reduced to writing. Many of them presuppose the order of succession of the sentences, and contain the entire Talmud in stenographic signs. When the Talmud was written down these mnemonic notes were used as a basis for the work. After its completion the signs were retained, since they were of great assistance to many pupils who still had to memorize the Talmud, owing to the lack of written copies. They were inserted in the text likewise because they were very useful as superscriptions and indexes, since a passage in the Talmud could be more precisely referred to by means of them (comp. N. Brüll, *l.c.* ii. 61). Similarly the Geonim and the teachers of the Law during the Middle Ages employed such sentences to formulate their legal decisions (comp. Brüll, *l.c.* p. 66, note 105). Mnemonics were also invented to indicate the order of succession of the treatises, or of the chapters of individual tractates, as well as of the weekly readings from the Pentateuch (see R. Bezaleel Ashkenazi at the end of the "Shiṭṭah Meḳubbeẓet" on Men., and Judah of Modena in "Leb ha-Aryeh," ii. 2). Such is the sign "zeman naḳaṭ," employed by Maimonides in his introduction to the Mishnah to indicate the sequence of the six mishnaic orders, and which means "time has preserved," *i.e.*, "has preserved the literary products of ancient times." Furthermore, each letter of these two words indicates the name of an order of the Mishnah and the place of such order among its fellows; thus, "zayin" = "Zera'im"; "mem" = "Mo'ed"; "nun" = "Nashim"; etc. See also ABBREVIATIONS.

MOAB (Hebrew, מואב; LXX. Μωάβ; Assyrian, "Mu'aba," "Ma'ba," "Ma'ab"; Egyptian, "Muab"): District and nation of Palestine. The etymology of the word is very uncertain. The earliest gloss is found in the Septuagint, Gen. xix. 37, which explains the name, in obvious allusion to the account of Moab's parentage, as ἐκ τοῦ πατρός μου. Other etymologies which have been proposed regard it as a corruption of מי אב = "seed of a father," or as a participial form from יאב = "to desire," thus connoting "the desirable (land)." The latest explanation is by Hommel ("Verhandlungen des Zwölften Internationalen Orientalisten-Congresses," p. 261, Leyden, 1904), who regards "Moab" as an abbreviation of "Immo-ab" = "his mother is his father."

According to Gen. xix. 30-38, Moab was the son of Lot by his elder daughter, while Ammon was Moab's half-brother by a similar union of Lot with his younger child. The close ethnological affinity of Moab and Ammon which is thus attested (comp. also Judges iii. 13; II Chron. xx. 22; Isa. xi. 14; Jer. xxvi. 21) is confirmed by their subsequent history, while their kinship with the Hebrews is equally certain, and is borne out by the linguistic evidence of the Moabite Stone. They are also mentioned in close connection with the Amalekites (Judges iii. 13), the inhabitants of Mount Seir (II Chron. xx. 22; Ezek. xxv. 8), the Edomites (Ex. xv. 15; Ps. lx. 10 [A. V. 8]; Isa. xi. 14; Jer. xxv. 21), the Canaanites (Ex. xv. 15), the Sethites (Num. xxiv. 17), and the Philistines (Ps. lx. 10 [A. V. 8]; Isa. xi. 14).

Geography.

Moab occupied a plateau about 3,000 feet above the level of the Mediterranean, or 4,300 feet above the Dead Sea, and rising gradually from north to south. It was bounded on the west by the Dead Sea and the southern section of the Jordan; on the east by Ammon and the Arabian desert, from which it was separated by low, rolling hills; and on the south by Edom. The northern boundary varied, but in general it may be said to have been represented by a line drawn some miles above the northern extremity of the Dead Sea. In Ezek. xxv. 9 the boundaries are given as being marked by Beth-jeshimoth (north), Baal-meon (east), and Kiriathaim (south). That these limits were not fixed, however, is plain from the lists of cities given in Isa. xv.-xvi. and Jer. xlviii., where Heshbon, Elealeh, and Jazer are mentioned to the north of Beth-jeshimoth; Medeba, Beth-gamul, and Mephaath to the east of Baal-meon; and Dibon, Aroer, Bezer, Jahaz, and Kir-hareseth to the south of Kiriathaim. The principal rivers of Moab mentioned in the Bible are the Arnon, the Dimon or Dibon, and the Nimrim. The limestone hills which form the almost treeless plateau are generally steep but fertile. In the spring they are covered with grass; and the table-land itself produces grain. In the north are a number of long, deep ravines, and Mount Nebo, famous as the scene of the death of Moses (Deut. xxxiv. 1-8). The rainfall is fairly plentiful; and the climate, despite the hot summer, is cooler than that of western Palestine, snow falling frequently in winter and in spring. The plateau is dotted with hundreds of rude dolmens, menhirs, and stone-circles, and contains many ruined villages, mostly of the Roman and Byzantine periods. The land is now occupied chiefly by Bedouins, who render the district by no means the safest in Palestine.

History.

At the time of the Hebrew invasion the Moabites seem to have been so powerful that conflict with them was avoided (Deut. ii. 9; Judges xi. 15; II Chron. xx. 10), although the Israelites defeated and slew Sihon, the Amorite king of Heshbon, who himself had conquered a former king of Moab (Num. xxi. 21-31; Deut. ii. 24-35). Moab, on the other hand, under its king Balak, meditated a resistance to the invaders which it dared not carry out (Num. xxii.-xxiv.; Deut. xxiii. 4; Judges xi. 25). After the conquest the Moabite territory was allotted to the tribe of Reuben (Josh. xiii. 15-21; comp. Num. xxxii. 37-38). The Moabites seem to have submitted to the control of the Hebrews for a time, until Eglon, King of Moab, with the help of the Ammonites and the Amalekites, succeeded in conquering them, and ruled over them eighteen years. At the end of this period a Benjamite named Ehud obtained access to Eglon and treacherously assassinated him, whereupon the Hebrews arose and slaughtered 10,000 Moabites (Judges iii. 12-30). A few years later Saul waged a war, apparently of little importance, against them and their allies (I Sam. xiv. 47). David also subdued them and made them tributary (II Sam. viii. 1-2, 11-12; I Chron. xviii. 2, 11), although it is noteworthy that even before this time a Moabite named Ithmah was one of his generals (I Chron. xi. 46).

After the death of Ahab the Moabites under Mesha rebelled against Jehoram, who allied himself with Jehoshaphat, King of Judah, and with the King of Edom. At the direction of Elisha the Israelites dug a series of ditches between themselves and the enemy, and during the night these channels were miraculously filled with water which was as red as blood. Deceived by the crimson color into the belief that their opponents had attacked one another, the Moabites became overconfident and were entrapped and utterly defeated at Ziz, near Engedi (II Kings iii.; II Chron. xx., which states that the Moabites and their allies, the Ammonites and the inhabitants of Mount Seir, mistook one another for the enemy, and so destroyed one another). According to Mesha's inscription on the Moabite Stone, however, he was completely victorious and regained all the territory of which Israel had deprived him. The battle of Ziz is the last important date in the history of the Moabites as recorded in the Bible. In the year of Elisha's death they invaded Israel (II Kings xiii. 20), and later aided Nebuchadnezzar in his expedition against Jehoiakim (*ib.* xxiv. 2).

Although allusions to Moab are frequent in the prophetical books (*e.g.*, Isa. xxv. 10; Ezek. xxv. 8-11; Amos ii. 1-3; Zeph. ii. 8-11), and although two chapters of Isaiah (xv.-xvi.) and one of Jeremiah (xlviii.) are devoted to the "burden of Moab," they give little information about the land. Its prosperity and pride, which brought on the Moabites the wrath of Yhwh, are frequently mentioned (Isa. xvi. 6; Jer. xlviii. 11, 29; Zeph. ii. 10); and their contempt for Israel is once expressly noted (Jer. xlviii. 27). From this time Moab disappears as a nation; and in Neh. iv. 7 the Arabians instead of the Moabites are the allies of the Ammonites (comp. I Macc. ix. 32-42; Josephus, "Ant." xiii. 13, § 5; xiv. 1, § 4).

References to the religion of Moab are scanty. The Moabites were polytheists like the other early Semites; and they induced the Hebrew invaders to join in their sacrifices (Num. xxv. 2; Judges x. 6).

Religion.

Their chief god was Chemosh (Jer. xlviii. 7, 13), so that they are even called the "people of Chemosh" (Num. xxi. 29; Jer. xlviii. 46). At times, especially in dire peril, human sacrifices were offered to him, as by Mesha, who gave up his son and heir to him (II Kings iii. 27). Nevertheless, Solomon built, for this "abomination of Moab," on the hill before Jerusalem, a "high place" (I Kings xi. 7) which was not destroyed until the reign of Josiah (II Kings xxiii. 13). The Moabite Stone also mentions (line 17) a female counterpart of Chemosh, Ishtar- (or Ashtar-) Chemosh, and a god Nebo (line 14), the well-known Babylonian divinity, while the cult of Baal-peor (Num. xxv. 5; Ps. cvi. 28) or Peor (Num. xxxi. 16; Josh. xxii. 17) seems to have been marked by sensuality. Since the Moabites had opposed the invasion of Palestine, they, like the Ammonites, were excluded from the congregation unto the tenth generation (Deut. xxiii. 3-4; comp. Neh. xiii. 1-3). This law was violated during the Exile, however; and Ezra and Nehemiah sought to compel a return to the ancient custom of exclusion (Ezra ix. 1-2, 12; Neh. xiii. 23-25). The exilian usage had had royal sanction: the harem of Solomon included Moabite women (I Kings xi. 1). On the other hand, the fact that the marriages of the Beth-lehem-judah Ephrathites Chilion and Mahlon to the Moabite women Orpah and Ruth (Ruth i. 2-4), and the marriage of the latter, after her husband's death, to Boaz (*ib.* iv. 10, 13), who was the great-grandfather of David, are mentioned with no shade of reproach, shows that the law had fallen into abeyance at a comparatively early period and had become a mere priestly restriction.

In Assyrian and Babylonian Inscriptions.

In the Nimrud clay inscription of Tiglath-pileser the Moabite king Salmanu (perhaps the Shalman who sacked Beth-arbel [Hos. x. 14]) is mentioned as tributary to Assyria. Sargon II. mentions on a clay prism a revolt against him by Moab together with Philistia, Judah, and Edom; but on the Taylor prism, which recounts the expedition against Hezekiah, Kammusu-Nadbi (Chemosh-nadab), King of Moab, brings tribute to Sargon as his suzerain. Another Moabite king, Muẓuri ("the Egyptian" ?), is mentioned as one of the subject princes at the courts of Esar-haddon and Assurbanipal, while Kaasḥalta, possibly his successor, is named on cylinder B of Assurbanipal.

In the Egyptian inscriptions Moab is mentioned once, on the base of one of six colossal figures at Luxor, where Rameses II. (*c.* 1300 B.C.) includes "Mu'ab" in the list of his conquests. See Moabite Stone.

J. L. H. G.

MOABITE STONE: Name usually given to the only known surviving inscribed monument of ancient Moab. It was discovered in 1868 at Dhiban, the ancient Dibon, four miles north of the River Arnon. When first seen by Europeans (including a German missionary named Klein) it was an inscribed slab of black basalt 3½ feet long by 2 feet wide. The Arabs of the neighborhood, dreading the loss of such a talisman, broke the stone into pieces; but a squeeze had already been obtained by Clermont-Ganneau, and most of the fragments were recovered and pieced together by him. The reconstructed monument is now, together with the squeeze, in the museum of the Louvre in Paris.

The inscription consists of thirty-four lines containing about 260 words and is well engraved in old Hebrew (Phenician) characters. It was written about 860 B.C. in the name of Mesha, the King of Moab. The translation of the first two-thirds of the inscription is as follows:

> "I am Mesha, son of Chemosh . . . (?), King of Moab, the Dibonite. My father reigned over Moab thirty years, and I became king after my father, and I made this high place for Chemosh in קרחה, the high place of deliverance, because he had delivered me from all that attacked me, and because he had made me see my desire upon all my enemies. Omri, King of Israel, oppressed Israel many days because Chemosh was angry with his land; and his son succeeded him, and he also said, 'I will oppress Moab.' In my days he said this, and I saw my desire upon him, and Israel was humbled with everlasting humiliation. Omri had taken possession of the land of Medeba and [his people] occupied it during his days and half the days of his son, forty years; but Chemosh restored it in my days. . . . And the men of Gad had occupied the land of Ataroth for a long time, and the King of Israel had built up Ataroth for himself. And I fought against the city and took it, and I slew all the people from the city, a sight for the eyes of Chemosh and of Moab. . . . And Chemosh said to me, 'Go, take Nebo against Israel.' And I went by night and fought against it from the break of dawn until noon, and I took it and slew all [that were in] it, seven thousand men and boys and women and girls and maid servants; for to Ashtor-Chemosh I had devoted it. And I took from there the vessels of YHWH and brought them before Chemosh. And the King of Israel had fortified Jahaz and occupied it while he was at war with me, and Chemosh drove him out from before me. And I took of Moab two hundred, all its chiefs, and I attacked Jahaz and took it, in order to add it to Dibon."

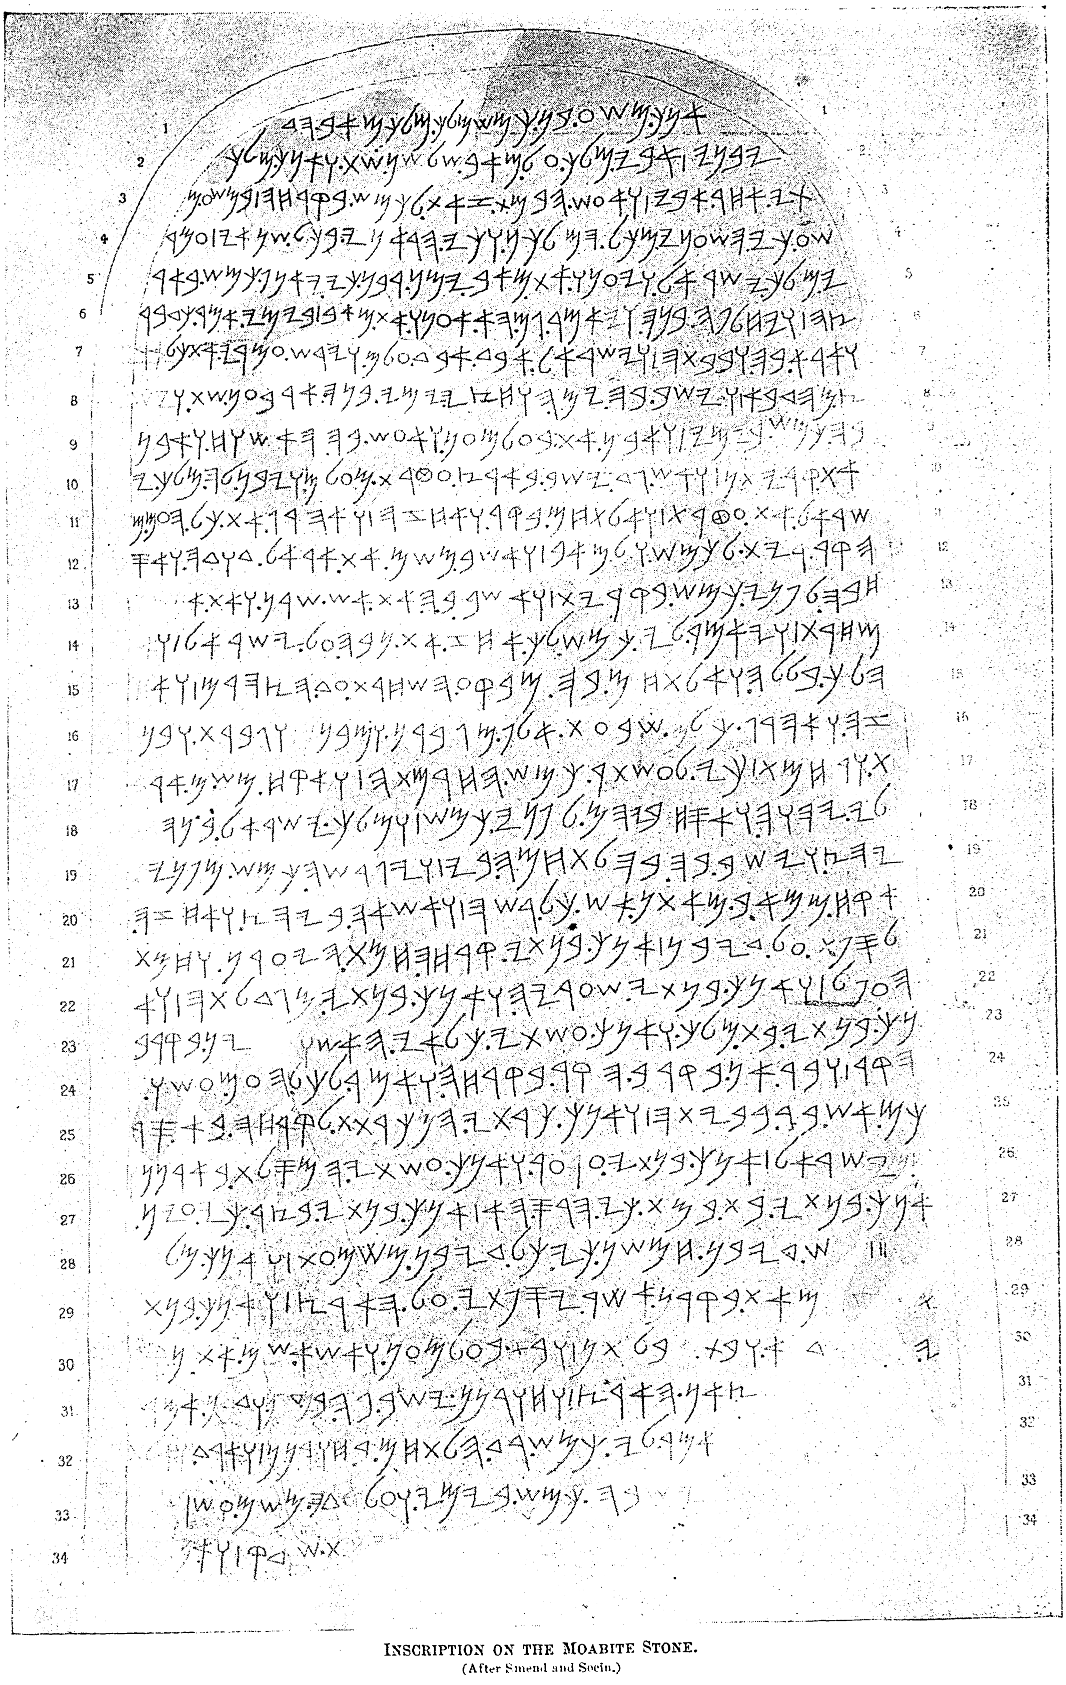
In the rest of the inscription Mesha tells of restoring and fortifying cities that rightfully belonged to Moab, of building a palace for himself, and of constructing reservoirs for water.

The inscription is by far the most important yet found in Palestine. It has added essentially to the scanty knowledge of the history and religion of Moab itself, and has thrown light on the fortunes of Israel east of the Jordan, as well as upon the foreign relations of the dynasty of Omri. The character of the language of Moab is also pretty fairly indicated.

In regard to the last point it may be noticed that the inflections depart but very seldom from those of classical Hebrew. The masculine plural ends in "-in" instead of "-im," and there is an ifte'al verb-stem. "Waw" consecutive with the first person imperfect is regularly followed by the cohortative or subjunctive. The vowel-letter ה is used for the pronominal suffix of both genders.

Religious and Historical Importance.

In matters of religion Moab is seen to furnish a close parallel to Israel. Chemosh here bears exactly the same political relation to his people as Jehovah does to His (comp. Num. xxi. 29; Judges xi. 24). In both nations religion is the basis of a fiercely intense patriotism (comp. II Kings iii. 27), and the king is the nearest representative of the Deity in executing all His will. The vivid picture given of the border war-



INSCRIPTION ON THE MOABITE STONE.

(After Smend and Socin.)

fare between Moab and Israel helps one to understand the bitter hostility of each people toward the other, and the race hatred to which Judah became heir after the fall of the Northern Kingdom. Of Israel's history it is learned that the warlike Gadites had absorbed the tribe of Reuben, and that they upheld the banner of Israel east of the Jordan. A clearer idea is obtained of the epoch-making deeds of Omri, under whom, in spite of the wars with Damascus, a large portion of Moab was annexed and the whole kingdom forced to pay an enormous tribute (comp. II Kings iii. 4); but after his day Israel gradually lost its hold upon Moab, which was thus left to its habitual repose, and, like wine, "settled on his lees" (Jer. xlviii. 11).

The literature in connection with the Moabite stone is quite large. Inasmuch as the elucidation of the language of the inscription is continually progressing, the later treatises are the most valuable for practical purposes. Translations with notes were given in 1870 by Clermont-Ganneau, Nöldeke, Ginsburg, Schlottmann, and Derenbourg, and in 1871 by Wright. Recent discussions give results based on reexamination and closer criticism of the text. It may be noted that an attempt to disprove the authenticity of the stone was recently made by A. Löwy (Berlin, 1903). The most important of the later studies are cited in the bibliography.

MOCATTA PEDIGREE.

MOBILE. See ALABAMA.

MOCATTA: An Anglo-Jewish family which can be traced back to one of the earliest of the resettlers in England.

David Mocatta: English architect; born in London 1806; died May 1, 1882; son of Moses Mocatta, translator of "Faith Strengthened." Having shown in early youth a leaning to art pursuits, he made the choice of architecture as a profession, and studied for many years in Italy under competent masters, returning to England to practise his profession. He was engaged on many important buildings, and was frequently employed by the directors of the London, Brighton, and South Coast Railway. On the death of his father he succeeded to an ample fortune, which was subsequently increased to a considerable extent by property bequeathed to him by his brother **Benjamin Mocatta.** When the late Sir John Soane bequeathed his collection to the nation, David Mocatta was appointed a trustee, Sir John having been one of his teachers before he left Italy.

Mocatta was one of the original Council of Founders of the West London Reform Synagogue. He had been directing architect of the temporary synagogue in Burton street, and he likewise superintended the construction of the building in Margaret street. On the death of Sir Francis Goldsmid he became chairman of the council of the congregation. He was a member of the council of the University College Hospital, and of the Cancer Hospital. He married the eldest daughter of Alexander Goldsmid, brother of Sir Isaac Lyon Goldsmid.

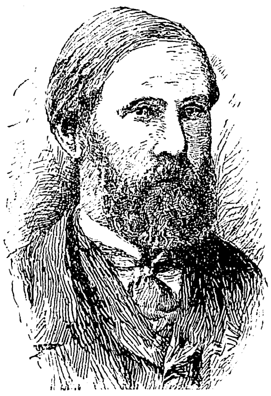
J. I. H.

Frederick David Mocatta: English philanthropist and communal worker; born in London Jan. 15, 1828; retired from the firm of Mocatta & Goldsmid, bullion-brokers to the Bank of England, in 1874, and devoted himself almost exclusively to the study of charitable and social questions. The condition of the working classes of all creeds, the improvement of their dwellings, and the administration of charity with a view to promoting the independence of the poor on the lines of the Charity Organization Society, are some of the principal subjects that have engaged his attention. His philanthropic work is conducted on certain well-defined principles, foremost among them being the unification and systematic organization of charity so as to prevent the undue multiplication of institutions. He acted as chairman of the committee appointed to effect the union of the Jews' Hospital and Orphan Asylum. In 1871 a Jewish Workhouse was started, which was subsequently amalgamated under his presidency with the Hand-in-Hand Asylum. He has been active also in abrogating the voting system in Jewish charitable institutions.



Frederick David Mocatta.

Mocatta is a vice-president of the Anglo-Jewish Association; served as a member of the Rumanian and Russo-Jewish committees; and in 1882 was deputed by the Mansion House Committee to proceed to the various Continental centers in which the refugees from persecution were congregated. In 1895 Mocatta reorganized the Jewish Home for Incurables. At the beginning of his seventieth year he was presented with a testimonial from over 200 philanthropic, literary, and other institutions of which he was a member.

Mocatta has been specially interested in the promotion of Jewish learning, having been one of the most active members in the Society of Hebrew Literature. Among works partly or wholly subventioned by him may be mentioned Zunz, "Zur Geschichte und Literatur" and "Literaturgeschichte der Synagogalen Poesie"; Berliner, "Juden in Rom"; Jacobs, "Sources of Spanish Jewish History"; the English translation of Graetz, "History of the Jews"; etc. He is himself the author of "The Jews and the Inquisition," London, 1877, of which German, Hebrew, and Italian translations have appeared. In 1900 he was elected president of the Jewish Historical Society of England.

Bibliography: *Young Israel*, March, 1897; *Jew. Chron.* Jan. 15, 1897; *Jewish Year Book*, 5661, pp. 304-305.

J. G. L.

Isaac Lindo Mocatta: Author; born in London 1818; died at Reading 1879. His early life was passed in the business pursuits which he carried on in South America. He likewise spent three years in Australia. On settling in England he interested himself in Jewish charitable work. Later in life, like his father before him, he devoted himself to writing. His two best-known works are entitled: "Moral Biblical Gleanings" (London, 1872), illustrating moral principles by Biblical examples, and "The Jewish Armory" (Brighton, 1877, privately printed). Some of the Sabbath readings issued by the Jewish Association for the Diffusion of Religious Knowledge were from his pen. He designed and printed some ingenious pictorial representations of moral truths. His secular works include "Times and Places," London, n.d., and various pamphlets on social subjects.

Bibliography: *Jewish Chronicle*, November 21, 1879.

Moses Mocatta: Broker, author, and communal worker; born in London February, 1768; died September, 1857. He was connected with the most influential Sephardic families of his day. His sister **Rachel** was the mother of Sir Moses Montefiore. For many years he was a partner in the firm of Mocatta & Goldsmid (bullion-brokers to the Bank of England), which had been founded by his father. He retired from business in middle life and devoted himself to study and to communal work. He was a diligent student of Hebrew, and well read in Biblical and Jewish literature. The "Hebrew Review" (1846) as well as the works of Grace Aguilar found in him a generous patron. Theological controversy was a subject which particularly interested him. His "Faith Strengthened" (1851) is a translation from the Hebrew of the famous "Ḥizzuḳ Emunah" of Isaac ben Abraham of Troki. His other translation, entitled "The Inquisition and Judaism" (1845), was a contribution to controversial literature, and comprised a sermon on Isa. xlii. 22 addressed to Jewish martyrs on the occasion of an auto da fé at Lisbon in 1705, and a reply to the sermon by E. Vero (a posthumous work of the author of the "Secret History of the Inquisition"). The sermon was translated from the Portuguese, and the reply from the Spanish. Moses Mocatta compiled also "The Wisdom of Solomon; a Selection from Proverbs and Ecclesiastes in Hebrew, with a Corrected Version on Parallel Lines" (1834).

As a communal worker Moses Mocatta rendered conspicuous service to the Shaaré Tikva schools and other institutions of the Spanish and Portuguese Congregation. When the schism of 1841 occurred Mocatta was one of those members of Bevis Marks who seceded from the parent community, and helped to establish the West London Synagogue of British Jews, his considerable knowledge of Hebrew and Jewish literature proving of great value to the new movement.

MOCH, JULES: French officer; colonel of the 130th Regiment of Infantry; born at Sarrelouis Aug. 4, 1829; died at Paris Aug. 8, 1881. On completing his classical studies at the lycée of Metz, he entered the military school of Saint-Cyr (1849) and was appointed sublieutenant of infantry in 1851. Moch took part in the campaigns in the Crimea (1855–56) and in Syria (1860–61), and in the occupation of Rome (1863-67); in the Franco-Prussian war (1870–71) he was commander of the battalion of the 3d Regiment, which had the mournful distinction of firing the last shots of the war, and took an honorable part in the battle of Sedan (Sept., 1870). During the interval between the Crimean and Syrian campaigns he was tutor at the school of Saint-Cyr, to which he returned later on as examiner.

After the conclusion of the Franco-Prussian war Moch published in the military journals a number of articles on the reorganization of the army. He was one of the founders and also vice-president of the Assembly of Officers (known later on as the "Military Club"), whose official organ was "Le Bulletin" (now the "Revue du Cercle Militaire"). Moch was a chevalier of the Legion of Honor, officer of the Academy, commander of the Order of Charles III. of Spain and of Nisham-el-Istikhar (Algiers), and was decorated with the stars of the Order of Nisan-i-Medjidie and the Order of Pope Pius IX. Moch openly professed Judaism.

MOD'AI: Family of Turkish authors.

Ḥayyim Mod'ai (the Elder): Rabbinical author; born at Safed 1709; died there 1784. He was sent by the Safed community to Europe to collect ḥaluḳḳah. From 1755 to 1776 he lived at Constantinople, returning in his old age to Safed. He left a number of manuscripts, two of which have been published—"Ṭib Giṭṭin," a treatise on divorce (Jerusalem, n.d.), and "Sefer Ḥayyim le-'Olam," responsa, 2 vols. (Smyrna, 1785).

Ḥayyim Mod'ai (the Younger): Rabbinical author; grandson of Ḥayyim Mod'ai the Elder; lived at Smyrna in the middle of the nineteenth century. His "Sefer Memar Ḥayyim," responsa, was printed with his grandfather's "Sefer Ḥayyim le-'Olam" (Smyrna, 1879). He also edited Said Leon's "Yissad ha-Melek," homilies (*ib.* 1866).

Nissim Mod'ai: Printer; lived at Smyrna in the middle of the nineteenth century. He was in partnership with Jacob Ashkenazi. The "Ḳiryat Sefer" of Moses Cohen Na'ar is among the works printed by Mod'ai and Ashkenazi.

D. M. FR.

MODEL, MARX: Court Jew to Margrave William Frederick of Brandenburg-Ansbach (1703–1723). From 1691 Model and his family were exempt from the payment of duties on the goods which they imported, and in the same year were given the privilege of printing the Talmud. The margrave protected him by several decrees, and ordered the authorities to take the necessary measures to collect debts due to him "so that Model may surely be able to help us."

Model sometimes used his influence in favor of his coreligionists, but he was very domineering, especially as an elder of the community of Fürth. He threatened them with imprisonment and heavy fines if they should refuse to carry out his orders.

Like all court Jews, Model had to suffer much from the hatred and jealousy of his rivals. Elhanan Fränkel (see HANAU, ẒEBI HIRSCH) was one of his most dangerous and embittered enemies. Fränkel tried several times, especially in 1711, to turn the margrave against Model and to have the latter imprisoned on the charge of dishonesty; but the court Jew and his family kept their place at court, while Fränkel became involved in a serious charge and was ruined.

About 1716 Model was denounced for having participated in defrauding the public revenues. Although he was not convicted, his reputation became so much damaged by the long investigation that he and some of the family retired from court, and others emigrated into the county of Pfalz-Neuburg.

D. A. FE.

MODENA: City in central Italy; formerly the capital of the duchy of Modena. Of its Jewish community, which has been, during the last few centuries, one of the most important in Italy, there is no record until a comparatively late date. Although Jews were living in the territory of Modena as early as the year 1000, no reference to them as dwelling in the city itself occurs before 1450. There, as in so many other places, they seem at first to have been bankers who established themselves in Modena with the approval of the dukes of Ferrara, and they were treated exactly like the other Jews in the duchy. On the extinction of the house of Ferrara in 1598, the duchy did not come under the control of the States of the Church, but of a collateral branch of the house of Este. The Jews of Modena did not suffer to the same extent, therefore, as their coreligionists elsewhere, although they were subject to all the hardships of the ecclesiastical laws.

The Jewish community increased considerably in the seventeenth century, when it occupied an important position because of its rabbis and of the studies which were pursued there. Prominent among its scholars of this period was Abraham Joseph Solomon GRAZIANO (d. 1685). Cabalistic thought predominated; and the community was one of the first to introduce the daily penitential services שומרים לבקר. The political status of the Jews remained uncertain, with the exception of a temporary improvement during the French Revolution; and the Jews were not emancipated until the city was incorporated with the kingdom of Italy in 1861. In 1845 Cesare Rovighi of Modena edited the first Italian Jewish periodical, the "Rivista Israelitica," which was published at Parma.

The following rabbis and scholars of Modena may be mentioned. Fifteenth century: Samuel of Modena, corresponded with Joseph Colon (Responsa, No. 128). Sixteenth century: Gershom b. Moses; Abraham b. Daniel Modena (1543), author of many liturgical prayers; Baruch Abraham da Spoleto b. R. Pethahiah (1584). Seventeenth century: Gershom b. Israel Chezigin, Menahem b. Elhanan Cases, Moses Israel Foà b. Vardama, Judah b. Jacob Poggetto, Abraham Rovigo b. Michael Raphael, Moses David Valle, Elijah Usili, Meshullam Levi, Naḥman b. Naḥman b. Joseph, Joseph Melli b. Joseph Israel, David b. Elijah Ravenna, the above-named Abraham Joseph Solomon Graziano (1685), Aaron Berechiah Modena', Ephraim b. Elijah da Ostra, Abraham Jedidiah b. Menahem Samson Basilea. Eighteenth century: Judah Mazliaḥ Padua (–1728), Manasseh Joshua Padua (1728), Ephraim Coen (1728), David Coen b. Abraham Isaac, Jacob Ḥayyim b. Reuben Yaḥya, Moses b. Levi Li, Abraham Ḥai b. Menahem Grassini, Abraham Vita Sinigaglia b. Solomon Jedidiah, Solomon Jedidiah, Abraham Vita II., Moses Elijah b. Solomon Jedidiah (d. 1849), Ishmael Coen b. Abraham Isaac, Ephraim b. Joseph Gallico. Nineteenth century: Elishama Meïr Padovani, Solomon Nissim, Solomon Teglio, Moses Ehrenreich, Solomon Jonah, Giuseppe Cammeo.

Since 1900 the monthly "L'Idea Sionista" has been published at Modena by Carlo Coniglia, professor of law in the university there. At present (1904) the Jews of the city number about 1,200 in a total population of 64,941.

MODENA: An Italian family the most distinguished members of which are:

Aaron Berechiah Modena. See Aaron Berechiah ben Moses ben Nehemiah of Modena.

David ben Abraham Modena: Supposed author of the anonymous Hebrew-Italian school dictionary "Dabar Ṭob" (Venice, 1596, 1606), in three parallel columns in Hebrew, Italian, and German. The existence of the author and the book is, however, called in question.

Bibliography: Fürst, *Bibl. Jud.* i. 198; Wolf, *Bibl. Hebr.* i. 288; Steinschneider, *Cat. Bodl.* col. 855.

David Zacuto b. Mazzal Ṭob Modena: Italian scholar of the nineteenth century; popular preacher and teacher at Modena. He wrote a number of didactic, religious, and casuistic works in Hebrew and Italian, including: (1) "Zeker Dawid," on customs of circumcision, two parts (Leghorn, n.d.); (2) Limmude Adonai," fundamental principles of religion for children, with Italian translation, three parts (Reggio, 1814, 1824); (3) responsa to the four Ṭurim; (4) commentary to the prayer-book and the Maḥzor according to the Italian ritual; (5) "Shelal Dawid," notes to the Pentateuch; and 300 sermons. Only the first three of these works have been printed.

Bibliography: Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 78; Benjacob, *Oẓar ha-Sefarim*, passim.

Judah Aryeh Modena. See Leon (Judah Aryeh) of Modena.

Pomona Modena: Mother of Abraham b. Daniel, who wrote over 1,000 liturgical prayers between 1536 and 1552, in which he celebrated her as a pious woman. These prayers are contained in the Codex Bislichis 72. Pomona Modena was versed in the Talmud, and David of Imola addressed a detailed Talmudic responsum to her.

MODIANO, JOSEPH SAMUEL: Turkish rabbinical author; lived at Salonica at the end of the eighteenth century. He belonged to a family originally from Modena, Italy, the descendants of which are prominent in financial and industrial enterprise in Salonica. He corresponded with Ḥayyim ben David Abulafia, rabbi of Smyrna. Modiano published two works—"Uryan Telitai" (Salonica, 1795) and "Rosh Mashbir," responsa (2 vols., *ib.* 1821 and 1840). The former is a collection of novellæ on various Talmudic treatises by Naḥmani, Ibn Migash, Yom-Ṭob b. Abraham, R. Samuel Isaac of Salonica (18th cent.), and by Modiano himself. The latter work was published posthumously.

Bibliography: Hazan, *Ha-Ma'alot li-Shelomoh*, p. 90; Azulai, *Shem ha-Gedolim*, s.v. *Uryan Telitai*.

D. M. Fr.

MODIGLIANI, ELIA: Italian traveler, naturalist, and author; born at Florence June 13, 1861; graduated at Pavia in 1883. From early youth he showed a marked inclination for natural science and a special fondness for travel. He visited the Malay Peninsula and returned with a very rich collection of specimens, which he presented to the museums of Genoa, Florence, and Rome. Among his numerous published works may be mentioned his "Ricerche sulla Grotta di Bergeggi"; "L'Isola di Nias"; "Un Viaggio all' Isola di Nias," Milan and Treves, 1890; and "L'Isola delle Donna."

MODIN (MODA'IM, MODI'IM, MODEÏN, MODI'IT). See Mattathias Maccabeus.

MODON, SIMSON HA-KOHEN: Poet; born in Mantua Aug. 1, 1679; died there June 10, 1727. He received a thorough education and was recognized as an accomplished linguist. He was one of those sent by the congregation in Mantua to do homage to Emperor Charles VI. at Vienna, where he acquitted himself most creditably and gained the emperor's good-will. Encouraged by David Finzi, rabbi of Mantua, he devoted himself to the writing of poetry; Finzi added some of his own poems to the collection "Ḳol Musar," published by Modon at Mantua in 1725 (Lemberg, 1845). Others of his poems are "Keter Torah" (Venice, 1721); "Ẓir ha-Ẓirim" (*ib.* 1722), an elegy on his teacher Judah Brill; and "Shigyon Shimshon." The last is a poem of three hundred lines, each commencing with the letter ש. He also compiled a rabbinical encyclopedia, arranged alphabetically, and called "Sefer Zikronot"; this and the "Shigyon Shimshon" are in manuscript.

Bibliography: Steinschneider, *Cat. Bodl.* col. 2636; Fürst, *Bibl. Jud.* ii. 386; Samuel della Volta, in *Kerem Ḥemed*, ii. 113 *et seq.*; *Allg. Zeit. des Jud.* 1838, p. 216; Mortara, *Indice*, p. 41; Benjacob, *Oẓar ha-Sefarim*, p. 159, No. 185.

MODONA, LEONELLO: Italian Orientalist; born at Cento in 1841; educated at the Istituto degli Studi Superiori of Florence. Besides compiling several library catalogues he has written: "L'Uomo e la Natura"; "La Safo Storica e il Mito di Safo e Faone"; "La Leggenda Cristiana del Mito della Caduta degli Angeli in Rapporto a Due Tavolette del Museo Britannico"; "Sara Copia Sullam"; "Di una Edizione del Sidur Tefilot."

Bibliography: De Gubernatis, *Diz. Biog.*

S. V. C.

MO'ED ("Feasts"): Name of an order of the Mishnah and the Tosefta both in Babli and in Yerushalmi. The name "Mo'ed," which is mentioned in the Talmud itself (Suk. 4b), is applied to this order because all the treatises belonging to it contain regulations and rules regarding the Sabbath and the feast-days. It is the second order in the Mishnah (Shab. 31a), and is divided into twelve treatises containing altogether eighty-eight chapters. The following are the names of the treatises: Shabbat, 'Erubin, Pesaḥim, Sheḳalim, Yoma, Sukkah, Beẓah, Rosh ha-Shanah, Ta'anit, Megillah, Mo'ed Ḳaṭan, and Ḥagigah. On their contents and their sequence in the order Mo'ed, as well as on the single instance where the order is enumerated as the third in the Mishnah, see Mishnah.

In the editions of Babli the Palestinian Gemara to Sheḳalim is printed together with that treatise, no Babylonian Gemara to it being now extant, and none, in all probability, having ever existed. The Palestinian Gemara is lacking to ch. xxi.-xxiv. of the treatise Shabbat.

Bibliography: Frankel, *Hodegetica in Mischnam*, pp. 258-259, Leipsic, 1859.

S. J. Z. L.

MO'ED ḲAṬAN ("Smaller Festival"): Treatise in the Mishnah, in the Tosefta, and in the Babylonian and Jerusalem Talmuds. It deals principally with the regulations concerning the semi-feasts, or intermediary festivals, which are termed "mo'ed" and are the days between the first two and the last two days of the feasts of Passover and Sukkot. The treatise receives its name from this designation, with the addition of "Ḳaṭan" to distinguish it from the whole Seder Mo'ed (I. Derenbourg, in "R. E. J." xx. 136 *et seq.*). In the manuscript of the Mishnah edited by Lowe and in the "'Aruk" of Nathan ben Jehiel, Mo'ed Ḳaṭan is called "Mashkin" from its opening word, signifying "they water, give to drink." In the Mishnah of the Seder Mo'ed it is the eleventh treatise, and is divided into three chapters, which contain twenty-four paragraphs in all.

Contents.

Ch. i.: What agricultural work may be undertaken on the intermediary festivals (§§ 1-4). In connection with the rule that the irrigating ditches may be repaired if they are injured, it is stated that municipal water-works and canals, as well as public streets, may be put in good condition, and in general any labor necessary for the public welfare may be performed (§ 2b). The treatise contains also regulations for the avoidance of mourning on these days (§ 5); for digging graves and sepulchers and preparing coffins (§ 6); for marriage (§ 7); for sewing (all may sew as usual, except tailors, who must take irregular stitches; § 8); for erecting an oven and a hand-mill (§ 9); for constructing balustrades; and for making repairs (§ 10).

Ch. ii.: Rules for pressing olives or wine and garnering fruit (§§ 1-3), for purchasing houses, slaves, and cattle (§ 4), and for selling fruits, clothes, and utensils (§ 5).

Ch. iii.: Enumeration of the occasions upon which a man may cut his hair and wash his clothes during the intermediary festivals (§§ 1-2); what one may write during these days (documents of all kinds), and what may not be written (*e.g.*, promissory notes, books, etc.; §§ 3-4). The feast-days interrupt a period of mourning and end it altogether; but if the mourning has not yet begun, they are not reckoned as part of it, while the Sabbath, on the contrary, is included in the period of mourning and does not terminate it (§ 5). Enumeration of the feasts which resemble the Sabbath in this respect (§ 6), and the mourning ceremonies observed in the intermediary festivals; with a description of how the women are to sing the dirges on these days (§§ 7-8) and, in connection with this, how the dirges are to be sung at the New Moon, on Ḥanukkah, and on Purim (§ 9).

Tosefta and Gemaras.

The Mishnah to this treatise, like its Tosefta, which is divided into two chapters, contains much important matter relating to Jewish social life, such as information regarding furniture and tools, housework and agriculture, public institutions, and mourning customs.

The Gemaras of both Talmuds explain the several mishnayot. In the first chapter the Babylonian Gemara contains also a number of tales, proverbs, and benedictions, which give examples of the picturesque style of the Rabbis. In the third chapter, besides the explanations of the individual mishnayot, the Babylonian Gemara contains detailed regulations concerning the different forms of the Ban and its removal (pp. 15a-17b), as well as narratives of remarkable incidents which took place when certain teachers died or were buried (p. 25a, b), and legends concerning the manner in which death overtook them (p. 28a). Here are also found interesting specimens of dirges and funeral orations delivered in Hebrew and showing traces of paronomasia and rime (p. 25b), besides Raba's citation of examples of wailing songs sung by the hired mourning-women in the vernacular at Shekanẓib (p. 28b).

Especial mention should be made of the enumeration of modifications which had taken place in the course of time in many of the usages connected with mourning and burial (p. 27a, b). All these changes were made for the sake of the poor, who could not afford the luxury of the old customs. The sums expended in the preparation of the body were so large that the relatives often left the corpse unburied because they could not meet the enormous outlay. It was not until after Rabban Gamaliel had been buried in simple linen garments that this custom became general. At a later period simplicity was carried still further, and the cheapest coverings were used for the burial of the dead (p. 27b).

S. S. J. Z. L.

MOGADOR (or **SUERAH**): Seaport of Morocco, on the Atlantic; founded by Sidi Mohammed ibn Abdallah in 1759. It has a total population of 19,000, including 10,000 Jews. Mogador is divided into three parts: the Ḳasbah, where the governor, some Mohammedans, the European officials, and a number of Jewish merchants reside; the Medinah, or city, of the Moors; and the Mellah, or Jewish quarter, which has two fortified gates. The Medinah contains the old Jewish quarter, called "Al-Mellaḥ al-Ḳadimi" (the old Mellah). In 1807 the governor, Ibn 'Abd al-Ṣaddiḳ, found it necessary for the security of the Jews to found the present Mellah. The condition of the Jews has always been better in Mogador than in many other parts of the empire, as the sultans—especially those of the Sherifian dynasty—in many instances favored them. An exception, however, was made in this respect by the sultan Muley Yazid, who in order to convert ten Jews of Mogador tortured them for ten days by repeatedly hanging them head downward in a dry cistern and bastinadoing them. When the news of the death of Muley Yazid came, some of them had expired and one had embraced Islam; the rest were set free.

The Sherifs encouraged the commerce of the Jews in every possible way by granting them privileges and loans; this condition lasted until the end of the government of Muley al-Ḥassan, when the European merchants began to give protection to their Moroccan agents. When the French navy, in 1846, bombarded Mogador, the Arab tribes of the neighborhood suddenly attacked the city and pillaged the houses of Jews and Mohammedans, dishonoring the women, and killing many of the inhabitants. Those who could escape fled as far as the city of Morocco in order to find a shelter. When peace was restored, they returned to Mogador in a condition of abject poverty. In 1860, again, when Spanish war-ships were sent to Morocco, the Jews left the city and fled to the southern province of Haha, where they were protected by the governor. The mission of Sir Moses Montefiore to Morocco brought about a better state of affairs for the Jews of Mogador and resulted in the abolition of the bastinado. The condition of the Jews of Mogador to-day, however, is still far from being secure.

The commerce of the city, mostly with England, France, and Germany, lies chiefly in the hands of the Jews, so that the Mohammedans are compelled to suspend business on the Jewish Sabbaths and holy days. Religious matters and also civil cases are decided by a board of three rabbis, and Jewish congregational affairs by a committee of seven rabbis of the community, chosen annually. The Mellah is represented in civic and political affairs by a sheik, who is installed by the government and is responsible to it for the regular payment of the Jewish tax, which amounts to 250 "doros." The expenses of the Jewish community, including the salaries of the rabbis and charity for the poor, are met by a meat-tax, a tax on imported and exported merchandise, and by donations from a French and an English shipping company by whose ships the Jews have agreed to export their merchandise. The community has a bet ha-midrash, a French and an English school for boys (founded respectively in 1862 and 1864), and two English schools for girls, one, founded in 1887, being supported by the Anglo-Jewish Association, the other being a private school.

Since its foundation the community has had the following rabbis: Yaḥya, from Agadir; Jacob Bibaz, from Rabat; Abraham Coriat, author of "Sefer Zekut Abot" (went to Leghorn in 1793); Ḥayyim Pinto (d. 1846); David ibn al-Ḥazzan (d. 1828); Joseph ben Jacob Almaliḥ, called Joseph al-Kabir (d. Jerusalem 1837); Abraham Coriat II., author of "Sefer Berit Abot"; Joseph ben Aaron Almaliḥ; Abraham ibn 'Aṭṭar (d. 1882); Moses Cohen (emigrated to the city of Morocco); and Abraham Sabah (d. 1903). The present (1904) rabbis of Mogador are Judah ben Maniel, Mas'ud Knafo, and Joseph ibn 'Aṭṭar.

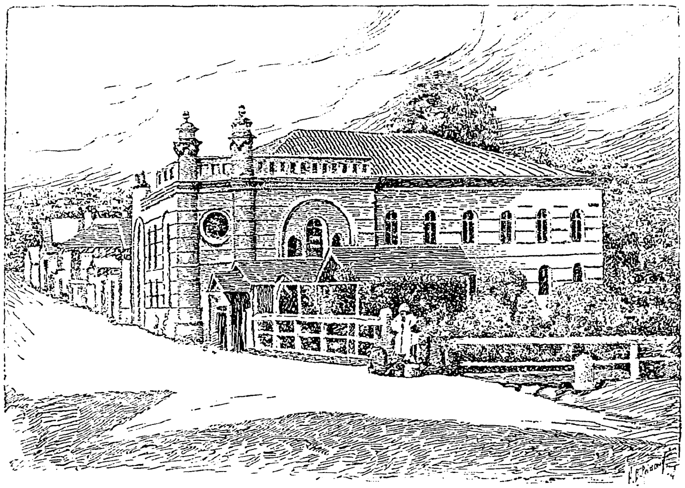
MOGHILEF (MOHILEV): 1. Capital of the government of the same name in White Russia; situated on the Dnieper. Though the city was well known as an important trading center as early as the fourteenth century, the first mention of Jews there occurs in a document dated 1522, wherein King Sigismund awards a lease, for a period of three years, of the various taxes of Moghilef to Michael Jesofovich, the noted merchant of Brest. This lease was renewed three years later, and subsequently taken up by the Jesofovich family and other Jewish merchants, as appears from a number of documents. Toward the end of the sixteenth century Jews had probably settled in Moghilef in considerable numbers, although there are no documents extant to show that they had a well-organized community at that time. In 1583 Affras Rachmaelovich, a prominent Jewish merchant of Moghilef, carried on an import and export trade with Riga and Lublin. The presence of a considerable number of Jews in Moghilef at the end of the sixteenth century is attested also by the petition, dated March 5, 1585, of the burghers of the city to King Stephen Bathori praying that Jews might be prohibited from settling in Moghilef, since they would be a serious menace to the prosperity of the Christian merchants. The king promised to grant the request of the burghers; but in spite of this the agents of the Jewish tax-farmers continued their business in Moghilef, as is shown by certain lawsuits brought by them in 1589 against some Christian merchants for selling spirituous liquors without a license. In a document dated Jan. 31, 1597, a Jew, Avram Rubinovich, is mentioned as residing on Pokrovsky street. A Jewish community seems to have existed in Moghilef for some time prior to 1621, in which year the local gild of butchers passed resolutions making it illegal for Christian as well as Jewish members of the gild to buy cattle outside of the city, and requiring Christian butchers who wished to sell kasher meat to do business in certain places where the Jewish butchers were established. In the following year the municipal council of Moghilef borrowed from the Jew Gabriel Samuelovich and his wife, Rukhana Itzkhakovna, 100 Lithuanian kop groschen for a term of ten years, and as security gave to Gabriel a house belonging to the city, situated on Nikolski street.

Community in 1621.

The growing antagonism on the part of the Christian merchants, provoked by the competition of the Jews, caused the former to make repeated complaints to the king, and finally led to the promulgation of an edict (July 23, 1626) by Sigismund III., whereby all Jews owning houses on the market-place were ordered to remove to the street on which their prayer-house was situated, "in order to prevent the conflicts due to the residence of Jews and Christians on the same streets." Equivalent areas were assigned to the Jews on the Jewish street. This edict was confirmed by Ladislaus IV. (March 8, 1633), who also prohibited the Jews from building baths and breweries within the city limits. This and other documents show that the populace was being incited against the Jews by the burghers and the clergy. In 1639 the burghers reported to the city council that a Christian servant who had been employed for ten years by the Jewess Lyuba Josefova, had died under suspicious circumstances and that the Jews had buried her without giving notice of the funeral to her relatives. The investigation revealed that the deceased had been drinking heavily in the monastery and had fallen unconscious in the street near the house; that Lyuba with the aid of the servant's sister had carried her into the house, where she died soon after; and that the son of the deceased, accompanied by other relatives, had buried her, a fact corroborated by numerous witnesses. Other unfounded accusations were repeatedly made against the Jews of Moghilef, especially as to their responsibility for the frequent conflagrations occurring in the city.

Conflicts with Citizens.

The enmity toward the Jews found expression in a riot which occurred on the Jewish New-Year's Day, Sept. 21, 1645. Led by the burgomaster, Roman Rebrovich, an armed mob attacked the Jews, who had gone to the River Dnieper for the observance of the religious custom of "Tashlik"; the mob wounded men and women, robbed them of their jewelry, and attempted to throw them into the river. The case was carried to Prince Radziwil, the chief marshal of the duchy of Lithuania, whose influence enabled the burgomaster to escape punishment. This incident, one of many, throws light on the popular attitude toward the Jews a few years before the uprising under Chmielnicki. The Jews of Moghilef apparently escaped the first fury of Chmielnicki's Cossacks in 1648; and they benefited in the following year by the renewal of the charter of privileges granted to many Lithuanian communities by King John Casimir (Feb. 17).



Synagogue at Moghilef, Russia.
(After a photograph.)

The security of the Moghilef community was, however, of short duration. In 1654 the city was annexed to Russia, and by order of the czar Aleksei Mikhailovich in response to a petition of the Moghilef burghers the Jews were commanded to leave (Sept. 15, 1654). In spite of this order they remained in Moghilef (probably as the result of bribery of the local officials), but they paid dearly for so doing. In 1655 most of them were massacred by the Russian soldiers outside of the city walls, where the Jews had assembled by order of the Russian commander Poklonski (see Jew. Encyc. iv. 286b, *s.v.* Cossacks' Uprising). The only Jews spared were those who had not yet left the city, and who, fearing a similar fate, had declared their readiness to accept baptism. The Father Superior Orest, commenting on this incident in his memoirs, laments the fact that after the war, when the danger to the Jews had passed, most of the converts returned to Judaism, only a tenth part of them remaining Christians.

Expelled 1654.

In 1656 Moghilef was again under Polish rule; and the old charter of privileges was renewed by King John III. In the memoirs of Orest, referred to above, mention is made also of Shabbethai Ẓebi (whom Orest calls "Sapsai Gershonovich").

The first rabbi of Moghilef and of "the Russian province" of whom record is preserved in Jewish documents, was Mordecai Süsskind Ruttenburg, who was living in Moghilef in 1686, as appears from his responsa (i. 44b; Amsterdam, 1746). He was probably among the first (if not the first) of the rabbis of the Moghilef community after permission was given the Jews in 1678 to reside anywhere in the city. For the next century the Jews of Moghilef remained secure under the protection of the Polish crown, with the exception of the period covered by the Swedish war, when Moghilef was for a time on the battle-ground between the Swedes and the Russians. Orest describes in his memoirs the entry of Peter the Great into Moghilef, when the Jewish inhabitants together with the rest came to welcome him, and presented him with a live sturgeon.

With the partition of Poland in 1772 Moghilef became a part of the Russian empire. Catherine II. visited the city in 1780 and was received by the Jews with expressions of joy. They decorated the public square with flowers and erected an arch bearing the inscription "We rejoice as in the days of King Solomon." They also engaged a band of music to play in the daytime and in the evening. During the successive reigns of Catherine, Paul, and Alexander the prosperity of the community increased. The Jewish merchants of Moghilef

Under Russian Rule.

were especially prominent as traders in timber, hemp, and grain, which were sold in Riga, where a number of Jews of Moghilef settled later. Important commercial relations were maintained also by way of the Dnieper with Kiev and Kherson. Toward the middle of the nineteenth century and later the Jewish merchants of Moghilef became prominent also as government contractors, and carried on an extensive trade with Moscow.

In 1897 the Jews of Moghilef numbered 19,398 in a total population of 43,106 The city had two synagogues and about forty houses of prayer; thirty-five ḥadarim and three yeshibot; a Jewish hospital and a number of dispensaries; Jewish elementary schools for boys and girls; a Talmud Torah; and the usual Jewish charitable organizations. By far the greater portion of the Jews of Moghilef are artisans earning scanty wages. Since the construction of the railroad, which did not touch Moghilef, the prosperity of the city has declined.

2. City in the government of Podolia, Russia; situated on the Dniester; it has a population of 22,093, of whom 14,000 are Jews. The latter include 3,306 artisans and 131 day-laborers; 61 are employed in the shops and factories. The Jewish children are taught in fifty-eight ḥadarim (700 pupils), in the Jewish school with its industrial department (140), in a private school for girls (68), and in the city school (130, the total being 320). Among the charitable institutions is a hospital. In 1897 there was founded a loan association which lends small sums of money without interest to petty traders and artisans. A society for aiding the poor, founded in 1899, gives special attention to supplying artisans with proper tools and to aiding them to dispose of their wares. Poverty is steadily increasing, leading to increased emigration. During the war between the Russians and the Poles many Jews of Moghilef were killed by the Cossacks and the Russian troops (1664).

MOGHRABI (MAGHRABI), JOSEPH AL-. See Joseph ben Judah ibn 'Aḳnin.

MOGULESKO, SIGMUND (SELIG): American comedian; born in Kalorаush, Bessarabia, Dec. 16, 1858; now residing in New York. He possessed a fine voice from early youth, and was the favorite "meshorer" or choir-singer with several well-known ḥazzanim. He went to Bucharest, Rumania, while very young, and for some years studied there at the Conservatory of Music. He joined Goldfaden soon after the organization of the Yiddish theater, and since that time has been recognized as the best comedian on the Yiddish stage. He traveled with various companies over Russia, Austria, Rumania, and England. He went to the United

States about the year 1886, since when, except for an interruption of three years through illness, he has followed his profession to the present time (1904). He is known also as a leading composer of music for the Yiddish stage.

MOHAMMED: Founder of Islam and of the Mohammedan empire; born at Mecca between 569 and 571 of the common era; died June, 632, at Medina. Mohammed was a posthumous child and lost his mother when he was six years old. He then came under the guardianship of his grandfather 'Abd al-Muṭṭalib, who at his death, two years later, left the boy to the care of his son Abu Ṭalib, Mohammed's uncle. The early years of Mohammed's life were spent among the Banu Sa'd, Bedouins of the desert, it being the custom at Mecca to send a child away from home to be nursed. From the stories told of these early years it would appear that even then he showed symptoms of epilepsy which greatly alarmed his nurse. It has been stated that the boy was once taken on a caravan journey to Syria, and that he there came in contact with Jews and Christians. But he could very easily have become acquainted with both at Mecca; hence this theory is not necessary to explain his knowledge of Jewish and Christian beliefs. When Mohammed was twenty-five years old Abu Ṭalib obtained for him an opportunity to travel with a caravan in the service of Ḥadijah, a wealthy widow of the Ḳuraish, who offered Mohammed her hand on his return from the expedition. Six children were the fruit of this union, the four daughters surviving their father. Ḥadijah, although fifteen years his senior, was, as long as she lived, Mohammed's faithful friend and sympathizer.

Early Years.

G. M. W. M.

South-Arabian Visionaries.

Mohammed's religious activity began with the fortieth year of his life. The Islamic tradition assigns as the beginning of this new career a sudden marvelous illumination through God. The Koran, however, the most authentic document of Islam, whose beginnings are probably contemporaneous with Mohammed's first sermons, speaks of this revelation on the "fateful night" rather vaguely in a passage of the later Meccan period, while the earlier passages give the impression that Mohammed himself had somewhat hazy ideas on the first stages of the revelation which culminated in his occasional intercourse with God, through the mediation of various spiritual beings. Small wonder that his pagan countrymen took him to be a "kahin," *i.e.*, one of those Arab soothsayers who, claiming higher inspiration, uttered rimed oracles similar to those found in the earliest suras. Historical investigations, however, show that Mohammed must not be classed with those pagan seers, but with a sect of monotheistic visionaries of whose probable existence in southern Arabia, on the borderland between Judaism and Christianity, some notice has come down in the fragment of an inscription recently published in "W. Z. K. M." (1896, pp. 285 *et seq.*). This fragment ascribes to God the attribute of vouchsafing "revelation" (?) and "glad tidings" ("bashr," *i.e.*, "gospel" or "gift of preaching"), meaning probably the occasional visionary illumination of the believer. As the same inscription contains other religious concepts and expressions which parallel those in the Koran, Mohammed may well be associated with this religious tendency. The name of this South-Arabian sect is not known; but the "Ḥanifs" of the Islamic tradition belonged probably to them, being a body of monotheistic ascetics who lived according to the "religion of Abraham" and who bitterly inveighed against the immoral practises of paganism.

The First Moslems.

Islam in its earliest form certainly did not go far beyond the tenets of these men. Mohammed condemns idolatry by emphasizing the existence of a single powerful God, who has created and who maintains heaven and earth: but he condemns still more emphatically the vices born of idolatry, namely, covetousness, greed, and injustice to one's neighbor; and he recommends prayer and the giving of alms as a means of purifying the spirit and of being justified at the divine judgment. This gospel includes nothing that was not contained in Judaism or in Christianity, nor anything of what constituted the fundamental difference between the two. Islam, however, did not undertake to bridge the gulf between them. Mohammed's teaching, on the contrary, was at first expressly directed against the Arab pagans only; and even in the later Meccan period it refers to its consonance with the doctrines of the "men of the revelation," *i.e.*, Jews and Christians. Nothing is more erroneous than to assume that the watchword of the later Islam, "There is no God but Allah, and Mohammed is His prophet," was characteristic of the very beginning of the religious movement inaugurated by Mohammed: not the belief in dogmas, but the recognition of ethical obligations, was the object of his mission to his countrymen. That meant that the Arab prophet strove to gain in every believer an ally to help him to wage war upon the corruptions of the day. Mohammed's political astuteness, which was a signal characteristic of his Medina period, is apparent even in the organization of the first community. Its members were mostly poor but intellectually eminent Ḳuraish like Ali, Abu Bakr, Zubair, 'Abd al-Raḥman ibn 'Auf, Sa'd ibn Abi Waḳḳaṣ, Othman, and others. They, being in the execution of their religious duties under Mohammed's personal supervision, soon grew to be so dependent upon him that their tribal consciousness—the strongest instinct in the social life of the ancient Arabs—was gradually superseded by the consciousness of being Moslems, the community thus developing into a small state with Mohammed as its chief. Hence in time sharp conflicts arose between the powerful Meccans, the sheiks of the leading families, and Mohammed. For years they had suffered him as a harmless dreamer, a soothsayer, a magician, and even as one possessed of demons; then, when his prediction in regard to the imminent judgment of God remained unfulfilled, they had mocked him; but when the community grew—even eminent personages like Ḥamzah swearing by Islam—they grew hostile and began to persecute him and his adherents, their action culminating in the ostracism of Mohammed's family, the Banu Hashim. Restricted in his missionary activity, and separated from a large part of the faithful who had sought refuge in Christian Abyssinia, the prophet lost heart. His preaching, in so far as its nature can be gathered from the Koran, was filled with references to the persecutions to which the earlier messengers of God had been subjected, and to their final rescue by Him; and it emphasized "raḥmah"—*i.e.*, mercy shown to the good, and long-suffering to the wicked—as being God's chief attribute. Various dogmatic-theosophic discussions were added, among them being the first protests against the Christian doctrine of the son of God. The teachings of Islam, which at first had been merely a body of precepts, developed more and more into a regular system which reflected in its chief tenets the later Judaism.

The Hegira (622).

When the leading families of Mecca revoked the ban pronounced against the Banu Hashim, which had been maintained for nearly three years, they might well have believed that Mohammed's political importance at Mecca was destroyed. The prophet himself perceived, especially after the death of his protector Abu Ṭalib and of his (Mohammed's) wife Ḥadijah, that his native city was not the proper place in which to carry out his communal ideas; and he cast about for a locality better adapted to his purposes. After various unsuccessful attempts to find a following among neighboring tribes, he happened to meet, during the annual festival of the temple at Mecca, six people from Yathrib (Medina); the Arab inhabitants of this city had come into close contact with monotheistic ideas through their long sojourn among the Jewish tribes which had been the original masters of the city, as well as with several Christian families. These men, being related to Mohammed on his mother's side, took up the cause of the prophet, and were so active in its behalf among their people that after two years seventy-five believers of Medina went to Mecca during the festival and proclaimed in the so-called "ʻaḳabah," or war assembly, the official reception of Mohammed and his adherents at Mecca into the community of Yathrib. The consequence was that within a short time all the Moslems removed to Medina; and the prophet himself, as the last one, closed the first period of Islam by his hasty departure, as in flight ("Hegira"; Sept., 622).

Mohammed's entry into Medina marks the beginning of an almost continuous external development of Islam, which as a religion, it is true, lost in depth and moral content, and crystallized into dogmatic formulas, but as a political entity achieved increasing success through the eminent political ability of the prophet himself. The Arab inhabitants of Medina, the tribes of Aus and Khazraj, all joined the religion of the prophet within two years from the Hegira. Political differences, however, arose between them, especially after Mohammed had reserved for himself exclusively the office of judge; and these differences led to the formation of a moderate party of opposition, the Munafij, or weak believers, who often, and without detriment to his cause, restrained the prophet's impetuosity. But the propaganda came to a halt among the numerous Jews living in the city and the surrounding country, who were partly under the protection of the ruling Arab tribes, the Banu ʻAuf, Al-Ḥarith, Al-Najjar, Sa'idah, Jusham, Al-Aus, Thaʻlabah, and partly belonged to such large and powerful Jewish tribes as the Banu Ḳuraiẓa, Al-Naḍir, Ḳainuḳaʻ. In the first year of the Hegira Mohammed was apparently on friendly terms with them, not yet recognizing their religion to be different from his; indeed, they were included in a treaty which he made with the inhabitants of Medina shortly after his arrival among them. The prophet and his adherents borrowed from these Jews many ritual customs, as, for instance, the regularity and formality of public prayers, fasting—which later on, following the Christian example, was extended to a whole month—the more important of the dietary laws, and the "ḳiblah" (direction in which one turns during prayer) toward Jerusalem, which was subsequently changed to the ḳiblah toward Mecca. But the longer Mohammed studied the Jews the more clearly he perceived that there were irreconcilable differences between their religion and his, especially when the belief in his prophetic mission became the criterion of a true Moslem.

Relation to Jews.

The Jews, on their side, could not let pass unchallenged the way in which the Koran appropriated Biblical accounts and personages; for instance, its making Abraham an Arab and the founder of the Kaʻbah at Mecca. The prophet, who looked upon every evident correction of his gospel as an attack upon his own reputation, brooked no contradiction, and unhesitatingly threw down the gauntlet to the Jews. Numerous passages in the Koran show how he gradually went from slight thrusts to malicious vituperations and brutal attacks on the customs and beliefs of the Jews. When they justified themselves by referring to the Bible, Mohammed, who had taken nothing therefrom at first hand, accused them of intentionally concealing its true meaning or of entirely misunderstanding it, and taunted them with being "asses who carry books" (sura lxii. 5). The increasing bitterness of this vituperation, which was similarly directed against the less numerous Christians of Medina, indicated that in time Mohammed would not hesitate to proceed to actual hostilities. The outbreak of the latter was deferred by the fact that the hatred of the prophet was turned more forcibly in another direction, namely, against the people of Mecca, whose earlier refusal of Islam and whose attitude toward the community appeared to him at Medina as a personal insult which constituted a sufficient cause for war. The Koran, in order to lead its adherents to the belief that side by side with the humane precepts of religion were others commanding religious war ("jihad"), even to the extent of destroying human life, had to incorporate a number of passages enjoining with increasing emphasis the faithful to take up the sword for their faith. The earlier of these passages enunciated only the right of defensive action, but later ones emphasized the duty of taking the offensive against unbelievers — *i.e.*, in the first place, the people of Mecca—until they should accept the new faith or be annihilated. The prophet's policy, steadily pursuing one object, and hesitating at no means to achieve it, soon actualized this new doctrine.

G. H. G.

First Raids.

Mohammed's first attacks upon the Meccans were of a predatory nature, made upon the caravans, which, as all classes had a financial interest in them, were the very life of the city. The early expeditions were of comparatively little importance; and the battle of Badr in the second year of the Hegira was the first encounter of really great moment. In this battle the Moslems were successful and killed nearly fifty of the Ḳuraish, besides taking prisoners. This battle was of supreme importance in the history of Islam. The prophet had preached the doctrine that war against the unbelievers was a religious duty; and now he could claim that God was on his side. His power was consolidated; the faith of the wavering was strengthened; and his opponents were terrified. The die was cast; Islam was to be a religion of conquest with the sword. After the battle of Badr, Mohammed dared to manifest his hostility to the Jews openly. A Jewess, named Asma, who had written satirical verses on the battle of Badr, was assassinated, by command of Mohammed, as she lay in bed with her child at the breast. The murderer was publicly commended the next day by the prophet. A few weeks later Abu 'Afak, a Jewish poet whose verses had similarly offended, was likewise murdered. It is said that Mohammed had expressed a desire to be rid of him. These were single instances. The prophet soon found a pretext for attacking in a body the Banu Ḳainuḳa‘, one of the three influential Jewish tribes at Medina. They were besieged in their stronghold for fifteen days, and finally surrendered. Mohammed was prevented from putting them all to death only by the insistent pleading in their behalf of Abdallah b. Ubai, the influential leader of the opposition whom Mohammed did not dare offend. Instead, the whole tribe was banished, and its goods were confiscated. The prophet was thus enabled to give material benefits to his followers.

Death to Jewish Poets.

Medina now enjoyed a few months of comparative quiet, disturbed only by a few unimportant marauding expeditions. The third year of the Hegira was marked by the assassination of a third Jewish poet, Ka‘b b. al-Ashraf, who by his verses had stirred up the Ḳuraish at Mecca against Mohammed. The prophet prayed to be delivered from him; and there was no lack of men eager to execute his wishes. The circumstances attending the murder were particularly revolting. At about the same time a Jewish merchant, Abu Sanina by name, was murdered, and the Jews complained to Mohammed of such treacherous dealing. A new treaty was concluded with them, which, however, did not greatly allay their fears. Some months after these events (Jan., 625) occurred the battle of Uḥud, in which the Meccans took revenge for their defeat at Badr. Seventy-four Moslems were killed in the fight; Mohammed himself was badly wounded; and the prophet's prestige was seriously affected. The Jews were especially jubilant, declaring that if he had claimed Badr to be a mark of divine favor, Uḥud, by the same process of reasoning, must be a proof of disfavor. Various answers to these doubts and arguments may be found in the Koran, sura iii.

Attacks the Banu al-Naḍir.

Mohammed now needed some opportunity to recover his prestige and to make up for the disappointment of Uḥud. He found it the next year in an attack upon the Banu al-Naḍir, another of the influential Jewish tribes in the vicinity of Medina. A pretext was easily invented. Mohammed had visited the settlement of the tribe to discuss the amount of blood-money to be paid for the murder of two men by an ally of the Jews, when he suddenly left the gathering and went home. He is said by some to have declared that the angel Gabriel had revealed to him a plot of the Banu al-Naḍir to kill him as he sat among them. The latter were immediately informed that they must leave the vicinity. They refused to obey; and Mohammed attacked their stronghold. After a siege lasting more than a fortnight, and after their date-trees had been cut down—contrary to Arabian ethics of war—the Jewish tribe surrendered and was allowed to emigrate with all its possessions, on condition of leaving its arms behind (Sprenger, "Das Leben des Moḥammad," iii. 162; "Allg. Zeit. des Jud." pp. 58, 92). The rich lands thus left vacant were distributed among the refugees who had fled with Mohammed from Mecca and who had hitherto been more or less of a burden on the hospitality of the people of Medina. The prophet was thus able both to satisfy his hatred against the Jews and materially to strengthen his position.

In the fifth year of the Hegira the Banu Ḳuraiẓa, the last Jewish tribe remaining in the neighborhood of Medina, were disposed of. Again the direct cause for attack was a matter of policy. The Ḳuraish of Mecca, whose caravans were constantly being harassed by the Moslems and by other disaffected tribes including the Jews, had formed the project of uniting their forces against Mohammed. The leader of this enterprise was the able and vigorous Abu Sufyan of Mecca. The allies encamped before Medina and engaged in what is known as "the battle of the trenches," so called from the manner in which Medina was protected from attack. The Moslems succeeded in keeping the Banu Ḳuraiẓa out of the fight by making them and the allies mutually suspicious, and the allies finally withdrew without having accomplished their purpose. The Moslems also were disappointed in having no plunder, so that Mohammed felt called upon to provide a diversion. The allies had scarcely departed, the Moslems had not yet laid down their arms, when the prophet claimed to have received a communication from Gabriel bidding him march instantly against the Banu Ḳuraiẓa. The last-named, who had no time to prepare for a long siege, retired to their castles, and surrendered after two weeks, trusting to escape as their kinsmen of the Banu Ḳainuḳa‘ and the Banu al-Naḍir had done. Their fate was left to the decision of Sa‘ad b. Mu‘adh, who, although of the tribe of Aus, the allies of

Destroys the Banu Ḳuraiẓa.

the Ḳuraiẓa, felt bitter toward them on account of their supposed treachery toward the Moslems. He decided that all the men should be killed, the women and children sold as slaves, and the property divided among the army. The carnage began the next morning, and between 600 and 700 victims were beheaded beside the trenches in which they were to be buried. Mohammed refers to the siege of Medina and the massacre of the Jews in sura xxxiii.

Attacks Jews of Khaibar.

There were now no more Jews in the vicinity of Medina, but those at Khaibar continued to annoy the prophet. Abu al-Ḥuḳaiḳ of the Banu al-Naḍir, who had settled at Khaibar, was suspected of inciting the Bedouins to plunder the Moslems. Accordingly five men of the Banu Khazraj were sent secretly and murdered him. Usair, who succeeded him as chief of Khaibar, was likewise assassinated at Mohammed's command. In the sixth year of the Hegira Mohammed made a treaty with the Ḳuraish, at Ḥudaibiyah, whither he had proceeded with some of his followers with the intention of making the pilgrimage to Mecca. The Ḳuraish objected to his entering the city, and this treaty was made instead. It provided for a cessation of hostilities for ten years. In the same year Mohammed sent embassies to the rulers of the six surrounding states inviting them to embrace Islam, but the King of Abyssinia was the only one who sent a favorable reply. In the next year the prophet attacked the Jews of Khaibar in order to reward with the rich plunder of that place the followers who had accompanied him to Ḥudaibiyah. The Jews were conquered after a brave resistance, and their leader, Kinanah, was killed. Mohammed married the chief's young wife on the battle-field; and a very rich booty fell into the hands of the Moslems. Some Jews were still left at Khaibar, but merely as tillers of the soil, and on condition of giving up one-half the produce. They remained until Omar banished all Jews from the country. The Jews of the Wadi al-Ḳura, of Fadak, and of Taima were still left; but they surrendered before the end of the year. An attempt on the life of Mohammed was made at Khaibar by a Jewish woman named Zainab, who, in revenge for the death of her male relatives in battle, put poison in a dish prepared by her for the prophet. One of Mohammed's followers who partook of the food died almost immediately afterward; but the prophet, who had eaten more sparingly, escaped. He, however, complained of the effects of the poison to the end of his life.

His Domestic Life.

During the twenty-five years of his union with Ḥadijah Mohammed had no other wife; but scarcely two months had elapsed after her death (619) when he married Sauda, the widow of Sakran, who, with her husband, had become an early convert to Islam and who was one of the emigrants to Abyssinia. At about the same time Mohammed contracted an engagement with 'A'ishah, the six-year-old daughter of Abu Bakr, and married her shortly after his arrival at Medina. 'A'ishah was the only one of his wives who had not been previously married; and she remained his favorite to the end. After his death she exercised great influence over the Moslems. In his married life, as well as in his religious life, a change seems to have come over Mohammed after his removal to Medina. In the space of ten years he took twelve or thirteen wives and had several concubines: even the faithful were scandalized, and the prophet had to resort to alleged special revelations from God to justify his conduct. Such was the case when he wished to marry Zainab, the wife of his adopted son Zaid. Two of his wives were Jewesses: one was the beautiful Riḥanah of the Banu Ḳuraiẓa, whom he married immediately after the massacre of her husband and other relatives; the other was Safya, the wife of Kinanah, whom, as stated above, Mohammed married on the battle-field of Khaibar. None of these wives bore him any children. Mohammed built little huts for his wives adjoining the mosque at Medina, each wife having her own apartment. At his death there were nine of these apartments, corresponding to the number of his wives living at that time. Mohammed's daughter Faṭimah, by Ḥadijah, married Ali and became the mother of Ḥasan and Ḥusain.

The last three years of Mohammed's life were marked by a steady increase of power. In the eighth year of the Hegira (630) he entered the city of Mecca as a conqueror, showing great forbearance toward his old enemies. This event decided his eventual supremacy over the whole of Arabia. Other conquests extended his authority to the Syrian frontier and as far south as Ṭa'if; and in the following years embassies poured in from the different parts of the peninsula bringing the submission of the various tribes. Mohammed's death occurred in the eleventh year of the Hegira, after he had been ill with a fever for over a week. He was buried where he died, in the apartment of 'A'ishah; and the spot is now a place of pilgrimage.

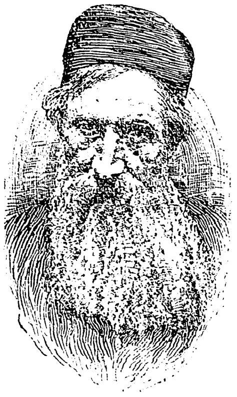
MOHEL. See CIRCUMCISION.

MOHILEWER, SAMUEL: Russian rabbi and Zionist; born in Hluboka, government of Wilna, April 25, 1824; died in Byelostok June 10, 1898. His father, Judah Löb, educated him not only in Hebrew, but also in secular subjects, and Mohilewer became in consequence an advocate of the introduction of European culture among his people. Ordained in his eighteenth year, he occupied the rabbinates successively of his native town (1848-56), Szaki (1856-60), Suwalki (1860-68), Radom (1868-83), and Byelostok (1883-98). With a keen eye for the practical needs of his people, Mohilewer devoted his energies and his fortune to Zionism. In 1875, on the occasion of the celebration of the ninetieth birthday of Sir Moses Montefiore, Mohilewer openly declared himself in favor of the colonization of Palestine. After the great persecution of the Jews in 1881 he accompanied the Russian refugees as far as Lemberg and suggested to the Emigration Committee that they be sent to the Holy Land. On his re-



Samuel Mohilewer.

turn in 1882 he founded the first Chovevei Zion Society in Warsaw. In the same year, and again in 1886, he undertook journeys to western Europe to win adherents for the movement. In Paris, with the help of Zadoc Kahn and M. Erlanger, he succeeded in gaining the support of Baron Edmond de Rothschild, who commissioned him to select a number of Russian Jewish families as colonists. Their colony, Ekron, prospered at first, but when the colonists in 1888 were influenced by agitators to stop work, that year being a Shemiṭṭah year, economic failure became imminent. At this juncture Mohilewer and other prominent Russian rabbis stepped in, and reassured the colonists of the religious propriety of resuming work. On another occasion, in 1889, when quarrels arose between the administration and the population of the colony Rishon le-Ẓiyyon, Mohilewer acted as arbitrator. In 1896 he again favored the non-observance of the Shemiṭṭah year. In 1890 he went to Palestine himself to inspect the colonies, and from this journey gained "new hope for a brighter future for Israel as soon as Israel shall take the right path and every Jew shall consider the honor of the nation rather than his own personal advantage." During his stay in Palestine Mohilewer, backed by certain wealthy Russian Zionists, bought 1,556 acres of land near Jaffa and founded the colony Rehoboth (see Jew. Encyc. i. 250, *s.v.* Agricultural Colonies in Palestine). In 1891, hearing of the intention of Baron de Hirsch to found colonies, he again went to Paris and urged, though unsuccessfully, the choice of Palestine instead of the Argentine Republic as the land of Jewish colonization.

Favors Palestine Colonization.

In the Zionist movement as outlined at the first Basel Congress in 1897 Mohilewer took a prominent part as leader of the Russian Zionists. His influence and activity in the propagation of this movement were remarkable. As the condition of his health had prevented him from attending the first Basel Congress, he had sent a letter of greeting in Hebrew, full of wise and practical advice.

The day before his death Mohilewer wrote a circular letter to all friends of Zion, recommending the foundation of the Jewish Colonial Bank and the colonization of Palestine, and at the same time urging again the idea of unity. This last letter may be regarded as containing his testament to his people. Among his posthumous works are a collection of responsa, commentaries on Ḥoshen Mishpaṭ, and sermons. His Hebrew treatise entitled "Massa Polen," concerning the condition of the Jews in Poland, appeared in a German journal in 1872.

Mohilewer's son, **Joseph**, also a Zionist, was elected to the rabbinate of Byelostok in 1902.

MOHR, ABRAHAM MENDEL. See Mohr, Abraham.

MOINESHTI: Small town in Moldavia, district of Bakau. The census of 1820 reported forty-two Jewish taxpayers in the town, who constituted the larger part of the population; they were engaged in the exploitation of petroleum-wells, which abound in that region. In 1860 the Jew Wolf Lazarovici installed the first petroleum-refinery, and six years later he built a paraffin-factory. The town and the district passed later into the hands of the Theiler brothers, naturalized Jews, who developed scientifically the output of petroleum and paraffin, and gave a remarkable impetus to the industry in that region.

In spite of the fires which periodically devastated the town, the Jews of Moineshti were prosperous until 1880, when the expulsion of a large number of Jews from the neighboring villages increased the Jewish population of Moineshti, but diminished its prosperity. In this town the first group of Rumanian emigrants and colonists was recruited for Palestine in 1882. From that time the poverty of the community increased, and Jews of Moineshti were among the emigrants to America after the latter part of 1899. The emigration from the town continues steadily, and the Jewish population is much decreased in numbers since the census of 1899 reported 2,363 Jews resident there. The community is organized and derives its revenues from a tax of 20 centimes per kilo on kasher meat and 20 centimes per head on poultry, from the money collected at a bath owned by the community, and from a tax on unleavened bread. The community supports a rabbi and three shoḥeṭim, and gives aid to the poor and sick, in addition to maintaining the Passover relief fund. There are three synagogues at Moineshti, a school for boys, one for girls, two charitable societies, and a Zionist society.

G. E. Sd.

MOÏSE: American Jewish family descended from **Abraham Moïse**, who was born in Alsace and emigrated to the West Indies, where he married a member of a Jewish family of St. Eustace. He amassed great wealth, but in 1791 was compelled to flee on account of the insurrection of the slaves. With his wife, Sarah, and his sons, Aaron, Benjamin (d. unmarried), Cherie, and Hyam, he reached South Carolina. Three other sons and two daughters were born to him in Charleston, S. C.

A. Welborne Moïse: Eldest son of Aaron Moïse, the lawyer and editor; born in 1846. After serving as page in the United States House of Representatives from 1857 to 1861, he entered the service of the Confederacy and served through the war with distinction, being promoted for bravery.

After the surrender he studied law, practised for a time in Richmond, Va., and then went West.

Aaron Moïse: Elder son of the founder of the family; cashier of the Bank of the State of South Carolina. He married Sarah Cohen of Kingston, Jamaica, by whom he had nine children. He studied medicine, but did not follow it as a profession.

Aaron Moïse: Lawyer and editor; born in Charleston, S. C., 1820; died in Richmond, Va., 1880. He was appointed clerk in the United States Treasury in 1853, which position he resigned in 1861, when he went to Nashville, Tenn., and was appointed captain in a Tennessee regiment. Three months later he was called to Richmond and made chief clerk in the auditor's office of the Confederate government. After the war he took up the practise of law, which he continued until his death.

Abraham Moïse: Lawyer; born 1799, the first of the family born in America; died 1869. He married Caroline, granddaughter of Meyer Moses, and left two sons (**Charles H.** and **Edwin W.**) and one daughter. His brother **Isaac** married Hetty Lopez, descendant of the Newport family of Lopez. Isaac died early, leaving three sons—**Isaac, Edwin,** and **David**—and four daughters. All three sons served throughout the Civil war on the Confederate side. David afterward studied law, and was judge of one of the courts of New Orleans at the time of his death.

Abram Moïse: Succeeded his father as cashier of the Bank of Charleston, S. C., which position he retained until his death; died without issue. He married Louise Lopez, a member of the Newport family of Lopez.

Camillus Moïse: Son of Aaron Moïse; died at the age of twenty-seven while serving in the Mexican war.

Cherie Moïse: Third son of Abraham Moïse, the founder of the family. He married Hetty Cohen of Charleston, S. C. Their daughter **Cordelia** (b. 1809; d. 1869) was known for her gift of poetry. She wrote a number of the hymns used by the Portuguese congregation of Charleston.

Columbus Moïse: Son of Aaron Moïse; born in Charleston, S. C., 1809; died in Virginia 1871. He married a daughter of D. C. Levy of Philadelphia, Pa. For thirty-five years he was president of the principal bank of New Orleans, La. He was postmaster of that city, and was chosen by its citizens to receive Gen. Zachary Taylor on his return from the battle of Buena Vista. He was granted a large tract of land in Florida for services rendered in the Indian war. Columbus Moïse wrote many short poems, one of which was sung at the laying of the cornerstone of the Portuguese synagogue in Charleston, S. C.

Columbus Moïse: Son of Columbus Moïse; born in New Orleans, La., 1855; died in Kansas City, Mo., 1895. He was city attorney of East Las Vegas, N. M., regent of the Territorial College, master in chancery of the United States Court of New Mexico, and chief justice of New Mexico. He wrote a number of short stories and poems, contributing to "Harper's Magazine," the "Century Magazine," and other periodicals, under the nom de plume "C. Esiom."

Edwin Warren Moïse: Son of Hyam and Cecilia Moïse; born at Charleston, S. C., 1811; died in New Orleans, La., 1868. After being educated as a physician at Charleston Medical College, he went to Woodville, Miss., where he practised his profession with great success. In 1840 he removed to New Orleans, studied law there, and for many years practised at the bar of Louisiana. He was elected for a number of consecutive terms to the State House of Representatives, of which he was speaker for many years; later he was appointed United States district attorney, and in 1861 was made judge of the Confederate States Court in Louisiana. Under the administration of Governor Wycliffe he became attorney-general of the state. He was a secessionist of the Calhoun school, an acknowledged leader in the Democratic party of Louisiana, and was closely identified with the history of the state during the Civil war. Two of his sons, **Harry** and **Theodore S.,** are identified with various railroad enterprises; the latter is now (1904) superintendent of the Georgia Central Railroad. Another son, **E. W. Moïse**, resides in California, where he is well known as a financier.

Edwin Warren Moïse: Son of Abraham and Caroline Moïse; born May 21, 1832, in Charleston, S. C.; died in Sumter, S. C., Dec. 9, 1902. He married Esther Lyon of Petersburg, Va., in 1854. In 1856 he opened a law-office in Columbus, Ga. When the Civil war began he organized a company of 120 men, 50 of whom he mounted and equipped at an expense of $10,000—the whole of his fortune. This company bore his name until it became Company A, 7th Confederate Cavalry, with Moïse as its captain; in 1863 he became major of the regiment, and was in command of it at the end of the war; he had not received his colonel's commission, but he had been recommended for promotion after the battle of Burgess' Mills, and the recommendation had been approved by General Lee. He fought in all the battles of the army of northern Virginia under General Lee, was slightly wounded at Gettysburg, had three horses killed under him in the battles below Petersburg, and was with Hampton in his raid and capture of Kilpatrick's camp. With 200 of his men he built the dams at Hatch's Run which protected Lee's left flank against Grant, and at Smithfield, N. C., in 1865, he performed the service of burning the bridges in the retreat of Generals Hampton and Butler from Bentonville to Raleigh. He surrendered with Gen. Joseph Johnston at Greensboro, N. C.

Edwin Moïse emerged from the war penniless and settled in Sumter, S. C., where he practised law with success. He was largely instrumental in redeeming South Carolina from radical rule in 1876, giving up his practise to cooperate with Hampton for that purpose. He was nominated as adjutant- and inspector-general of his state on the same ticket with Hampton, receiving more votes than his leader. Reelected in 1878, he served four years and declined renomination in 1880. He gave the whole of his first term's salary to the public schools of his state. He was a delegate to the Reconstruction Convention in 1865, was presidential elector in 1880, and was repeatedly sent as a delegate to various state conventions.

His son, **Marion Moïse** (b. June 15, 1855, at Sullivan's Island, S. C.), was educated at the Virginia Military Institute and South Carolina College. He was elected intendant of the city of Sumter, S. C., in 1884, serving two terms, and was chosen state senator from Sumter county in 1886, serving four years. He is now (1904) prominent as a lawyer at Sumter. He married (1877) Isabel de Leon of Charleston, S. C.

Hyam Moïse: Fourth son of Abraham Moïse; born at Port-au-Prince 1755; died 1811. He married Cecilia Wolfe of Charleston, S. C., by whom he had two sons—**Theodore Sydney** and **Edwin Warren.**

Jacob Moïse: Youngest son of the founder of the family; died in 1837. He married Rebecca Cohen, of Charleston, S. C., and settled in Augusta, Ga.; they were the first Jewish family there. His eldest daughter, **Sarah Ann,** showed literary ability at the early age of twelve. She married T. W. Dinkins, an editor, and is known for her stories, sketches, poems, and for numerous contributions to the Jewish press. Her youngest brother, **Howard,** served through the Civil war on the Confederate side. He was wounded three times and was made deaf by exposure and by the bombardment of Fort Sumter. He helped to build the batteries on Morris Island in 1860. He now lives (1904) in Sumter, S. C.

A. L. C. H.

Penina Moïse: Daughter of Abraham Moïse, who settled in Charleston, S. C., in 1791; born April 23, 1797, at Charleston; died Sept. 13, 1880. Her father died when she was about twelve years of age, and the helpless condition of the large family he left compelled her to give up school at that age. She gave early promise of literary ability, and her verse soon became known throughout the South. In 1833 she published a collection of poems entitled "Fancy's Sketch-Book," which was favorably received. From that time on she became a regular contributor to the publications of her day. Among the periodicals to which she contributed may be mentioned the "Washington Union," "The Home Journal of New York," "The Boston Daily Times," "Heriot's Magazine," "The New Orleans Commercial Times," "Godey's Lady's Book," "The Occident," and the "Charleston Courier." She contributed also several articles to the first copy of the "Charleston Book," a well-known publication in its day. Her contributions to the daily press were frequently of a humorous character. As a poet she was so highly esteemed that her fellow citizens looked to her for the celebration of every local event of importance.

An ardent Jewess, Penina Moïse wrote much on topics affecting her race. She took a lively interest in communal affairs, and was for years the superintendent of the Sabbath-school of the Charleston synagogue. During this period she wrote many hymns and religious pieces. Her book of hymns has been in use in the Congregation Beth Elohim of Charleston and in other Southern congregations.

In 1854, during the epidemic of yellow fever in South Carolina, she devoted herself to caring for the victims, whom she nursed irrespective of creed. Just before the outbreak of the Civil war her sight began to fail. The war compelled her to leave Charleston, but at its close she returned with her sister, Rachel Moïse, and opened a school which became widely known. Finally she lost her sight completely and met with other misfortunes as well.

A. L. Hü.

Theodore Sydney Moïse: Elder brother of the attorney-general of that name; born in Charleston, S. C., 1806; died in Natchitoches, La., July 2, 1883. He married Cecilia F. Moses, granddaughter of Meyer Moses of Revolutionary times; by her he had one daughter, who married her cousin, Charles H. Moïse. Theodore Moïse was an artist of ability. His portraits are found in many homes in South Carolina, Mississippi, Louisiana, and Kentucky (where he painted a portrait of the beautiful Sallie Ward, a famous Kentucky belle of that day). In 1836 he removed from Charleston to Mississippi, and afterward to New Orleans, La. He served during the Civil war on the staff of General Herbert of Louisiana, and his ingenuity contributed to the planning of the fire-rafts which were used to repel the Federal fleet. His second wife, Mathilde Vaughn, bore him six sons: **Robert** (entered the Catholic priesthood); **Charles; "Brother Ambrose"** (head of the Christian Brothers' College in St. Paul, Minn.; won the gold medal offered during the World's Fair at Chicago for the best epic on the discovery of America); and three others who became prominent lawyers, one of them, **James C. Moïse,** being at the time of his death (1901) judge of the criminal court of New Orleans.

MOLE: Traditional rendering of the Hebrew "ḥaparparah" (Isa. ii. 20). Some give "mole" as the translation also of "ḥoled" (Lev. xi. 29), which is, however, generally assumed to mean WEASEL. "Tinshemet," which the Septuagint, the Vulgate, and the Targum take for some kind of mole, is commonly admitted to mean either a lizard (Lev. xi. 3) or some kind of bird (*ib.* verse 18).

The mole proper (*Talpa*) does not occur in Palestine. The animal which would answer the description of Isa. ii. 20 is the mole-rat (*Spalax typhlus*), which is common about ruins, loose débris, and stone-heaps, and which in external appearance resembles the mole.

The Talmud has for the mole the terms "tinshemet" (Ḥul. 63a) and "ishut" (Kelim xxi. 3; comp. Targ. to Lev. xi. 30). The mole is described as having no eyes (comp. Aristotle, "History of Animals," iv. 8, 2, and Pliny, "Historia Naturalis," xi. 37, 52) and as being destructive to grain and plants (M. Ḳ. 6b). In Ber. 57b (comp. Tos. to M. Ḳ. 6b) קרפדאי, which Rashi explains by "talpa," is mentioned alongside of the bat and weasel, whose appearance in dreams is a bad omen.

MOLIN, JACỌB BEN MOSES HA-LEVI. See Mölln, Jacob ben Moses.

MOLINA, ISAAC: Egyptian rabbi of the sixteenth century; a native of Venice. He had a controversy with Joseph Caro on the subject of R. Gershom's "taḳḳanot" (comp. Caro, Responsa on Eben ha-'Ezer). There is also a responsum of Molina in Caro's "Abḳat Rokel," No. 130, the following number being Caro's answer. Molina collected all the responsa of Asher b. Jehiel and some of other rabbis into one volume, which he entitled "Besamim Rosh," providing it with notes and with a preface (Berlin, 1793). In his preface he claims to have written responsa and novellæ on the Talmud and on Maimonides' "Yad."

MOLITOR, JOSEPH FRANZ: German Christian cabalist; born June 8, 1779, in Ober Ursel, in the Taunus; died in Frankfort-on-the-Main March 23, 1860. Early in life he interested himself in the philosophy of Kant, Fichte, and Schelling, writing under the influence of the last-named's teachings "Ideen zu einer Künstlichen Dynamik der Geschichte" (1805). In the same year he published his "Ueber den Wendepunkt des Antiken und Modernen," which shows the influence of Baader's theosophy. "Ueber die Philosophie der Modernen Welt" came out in 1806. About this time Prince von Dalberg founded an institution for the uplifting of Judaism, and Molitor became teacher there. Becoming interested in the various phases of Judaism, he began the study of Hebrew and Aramaic, then Talmud, and later, actuated by an insight into the Cabala he had received from the Jewish cabalist Metz in 1813, he turned his attention to the study of the Zohar, to which henceforth he devoted himself entirely. He wrote the first volume of his "Philosophie der Geschichte oder über die Tradition" in 1824, as a result of his cabalistic studies. The second volume (1834) contains a compendium of the Cabala and a reference to the need of divine revelation. This was followed by a third volume (1839), containing a general account of paganism, Christianity, and Judaism, and a discussion of the Jewish laws of impurity. The fourth volume of this work, published in 1853, shows the relation of the Cabala to Christianity. The fundamental object of this work is to show the superiority of cabalistic mysticism over that of the Christian, and that Christianity is Judaism obscured by a false mysticism.

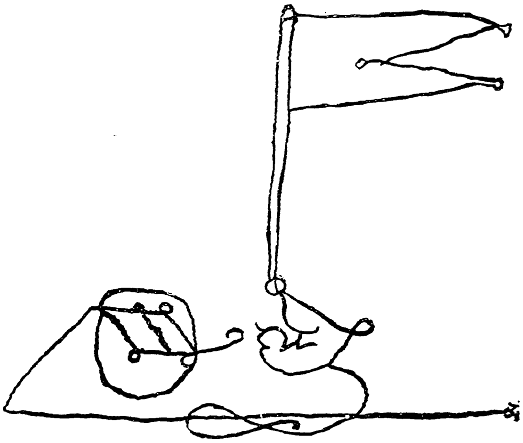
MOLKO, SOLOMON: Marano cabalist; born a Christian in Portugal about 1500; died at Mantua in 1532. His baptismal name probably was **Diogo Pires.** He held the post of secretary in one of the higher courts of his native country. When the adventurer David Reubeni came ostensibly on a political mission from Khaibar, in Africa, to Portugal, Molko wished to join him, but was rejected. He then circumcised himself, though without thereby gaining Reubeni's favor, and emigrated to Turkey. Highly endowed, but a visionary and believer in dreams, he studied the Cabala with Joseph Taytazak and became acquainted with Joseph Caro. He then wandered, as a preacher, through Palestine, where he achieved a great reputation and announced that the Messianic kingdom would come in 1540. In 1529 Molko published a portion of his sermons under the title "Derashot," or "Sefer ha-Mefo'ar." Going to Italy, he was opposed by prominent Jews, who feared that he might mislead their coreligionists, but he succeeded in gaining the favor of Pope Clement VII. and of some Judeophile cardinals at Rome. He is said to have predicted to the pope a certain flood which inundated Rome and various other places. After his many cabalistic and other strange experiments, Molko felt justified in proclaiming himself the Messiah, or his precursor. In company with David Reubeni, whom he came across in Italy, he went in 1532 to Ratisbon, where the emperor Charles V. was holding a diet. On this occasion Molko carried a flag with the inscription מכבי (abbreviation for "Who among the mighty is like unto God?"). The emperor imprisoned both Molko and Reubeni, and took them with him to Italy. In Mantua an ecclesiastical court sentenced Molko to death by fire. At the stake the emperor offered to pardon him on condition that he return to the Church, but Molko refused, asking for a martyr's death.



Autograph of Solomon Molko.
(After a manuscript in the possession of the Alliance Israélite Universelle.)

MOLL, ALBERT: German physician; born at Lissa May 4, 1862; educated at the universities of

Breslau, Freiburg, Jena, and Berlin (M.D. 1885). During the following two years he took postgraduate courses at Vienna, Budapest, London, Paris, and Nancy, and in 1887 established himself as a neuropathologist in Berlin. In 1894 he visited the leading medical institutions of eastern Europe, and in 1898 those of North America.

Moll has written several essays in the medical journals, and is the author of: "Der Hypnotismus," Berlin, 1889 (3d ed. 1895); "Die Konträre Sexualempfindung," *ib.* 1891 (3d ed. 1899); "Der Rapport in der Hypnose," Leipsic, 1892; "Untersuchungen über die Libido Sexualis," *ib.* 1897; "Das Nervöse Weib," *ib.* 1898; and "Medizinische Ethik," *ib.* 1900.

s. F. T. H.

MÖLLN (MOLIN): Name of a family of Mayence. The name מולין, which, according to D. Kaufmann ("Der Grabstein des R. Jacob ben Moses ha-Levi," in "Monatsschrift," xlii. 26), is to be read "Molin" rather than "Mölln," is not intended to indicate the place from which Moses came, but is a personal name, as is evidenced by the fact that one of the sons of MaHaRIL is called simply "Molin," after the name of his grandfather. "Molin" is usually considered to be a pet name for "Moses"; the correctness of this theory, however, is doubted by Salfeld ("Martyrologium," p. 406).

Jacob ben Moses Mölln (MaHaRIL): Rabbi and teacher of Mayence; born about 1365; died in 1427. The fact that he is termed "Maharil," "Mahari Segal," or "Mahari Mölln" has caused much confusion. His father's name being Moses, his own name was really R. Jacob b. Moses ha-Levi. He was a pupil of R. Shalom of Austria, rabbi at Wiener-Neustadt, and won a reputation even in his youth for Talmudic learning and piety, while in problems of ceremonial law his responsa were sought. At Mayence he attracted many pupils, the most noteworthy of whom was Jacob Weil (MaHaRIN; rabbi at Nuremberg, Augsburg, and Erfurt), whose responsa were considered authoritative. Mölln and his teacher were the first two rabbis to bear the title "Morenu," which was at that time applied to scholars in order to put an end to the abuses practised by unauthorized persons in performing marriage ceremonies or in granting divorces (comp. in regard to this point David Gans, "Ẓemaḥ Dawid," ed. Offenbach, 30a, *s.v.* מהרי"ל).

Mölln lived during the period of the Hussite wars, which brought misery upon the Jews of the Rhine, of Thuringia, and of Bavaria, all of whom appealed to him to intercede with God for them. Accordingly he sent messengers to the neighboring communities (which were in their turn to commission others), urging them to institute a general season of fasting and prayer. The German communities, obeying the call, fasted for seven days (Sept., 1421). Soon afterward the imperial army and the mercenaries mobilized at Saaz, dispersed, and the very soldiers who had threatened the Jews now came to them to beg bread and received food from them (comp. G. Pollak, "Halikot Ḳedem," pp. 79 *et seq.*; Grätz, "Gesch." 2d ed., viii. 136; Zunz, "S. P." p. 48).

Works.

Jacob Mölln was considered the greatest authority of his time. Communities far and wide sought his advice; and his discourses and responsa, in which he emphasized the importance of tradition, and in general followed Alexander Süsslein ha-Kohen (d. 1349), the author of the "Agguddah" frequently mentioned in the codes, were regarded as authoritative in the congregations and exerted a decisive influence, not only on his contemporaries, but also on later teachers. His death occurred before he could publish his responsa, which he had collected carefully, but a part of them appeared at Venice, 1549, and frequently later. His chief work is the "Sefer ha-Maharil" or "Minhagim," published by his pupil Zalman of St. Goar at the request of his contemporaries. This book is frequently quoted in the codes and commentaries, and has become a valuable source for later scholars. In addition to sermons, regulations of the ceremonial law, and textual comments, it contains a detailed description of religious observances and rites within and without the synagogue, and outlines, therefore, a faithful picture of the life of the German Jews. It was first published, with various additions, at Sabbionetta, in 1556, and frequently later. It exerted great influence on the Jews of central Europe, being largely responsible for the high esteem accorded to religious tradition ("minhag") in the communities. Mölln frowns upon any changes, and demands implicit obedience to the time-honored observances, even in regard to the liturgical melodies and the piyyuṭim (comp. R. Moses Isserles to Oraḥ Ḥayyim, 619). According to tradition he composed most of the synagogal hymns, and his "Minhagim" actually contain many references to the use of certain melodies. A third work, "Bi'urim" to Yoreh De'ah, is extant in manuscript (comp. Wolf, "Bibl. Hebr." i. 604).

Moses ben Jekuthiel ha-Levi Mölln: Rabbi in Mayence in the second half of the fourteenth century. In two ordinances concerning the administration of the three communities, Speyer, Worms, and Mayence ("Taḳḳanot ShUM"), dated respectively 1381 and 1386, his signature appears first (see Moses Minz, Responsa, ed. Lemberg, 1851, p. 11b; Neubauer, "Cat. Bodl. Hebr. MSS." No. 820). A responsum of his, dated 1369, is preserved among the responsa of his son MaHaRIL (ed. Hanau, 1610, No. 233), who succeeded him in the rabbinate of Mayence.

Of Mölln's other children are known by name: **Jekuthiel, Simon, Gumprecht,** and two daughters, **Simḥah** and **Bonlin** or **Bonchin.**

MOLO, FRANCISCO: Dutch financier and statesman; lived in the seventeenth century. In 1679 he settled in Amsterdam as financial agent of John III., King of Poland, a fact which hardly agrees with De Barrios' statement ("Panegyrico al Laureado Juan Tercero, Rey de Polonia") that

Molo was a Spanish Jew. He was held in high esteem on account of his ability in financial matters; and in recognition of the services which he had rendered to the Dutch state, he was exempted for two years from the payment of taxes. Molo's influence with the States General was so great that through his mediation Louis XIV. was enabled to conclude the treaty of Ryswick (1697).

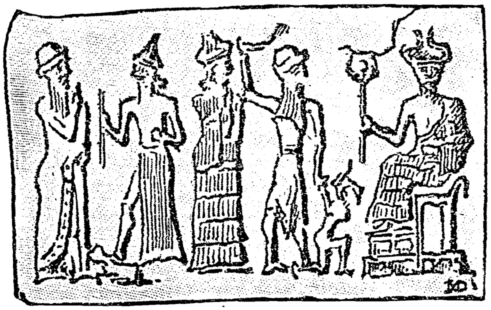
MOLOCH (MOLECH).—Biblical Data: In the Masoretic text the name is "Molech"; in the Septuagint "Moloch." The earliest mention of Molech is in Lev. xviii. 21, where the Israelite is forbidden to sacrifice any of his children to Molech. Similarly, in Lev. xx. 2–5, it is enacted that a man who sacrifices his seed to Molech shall surely be put to death. Then, curiously, it is provided that he shall be cut off from the congregation. In I Kings xi. 7 it is said that Solomon built a high place for Molech in the mountain "that is before Jerusalem." The same passage calls Molech an Ammonite deity. The Septuagint as quoted in the New Testament (Acts vii. 43) finds a reference to Moloch in Amos v. 26; but this is a doubtful passage. In II Kings xxiii. 10 it is stated that one of the practises to which Josiah put a stop by his reform was that of sacrificing children to Molech, and that the place where this form of worship had been practised was at Topheth, "in the valley of the children of Hinnom." This statement is confirmed by Jer. xxxii. 35. From II Kings xxi. 6 it may be inferred that this worship was introduced during the reign of Manasseh. The impression left by an uncritical reading of these passages is that Molech-worship, with its rite of child-sacrifice, was introduced from Ammon during the seventh century B.C.

——**Critical View:** The name "Molech," later corrupted into "Moloch," is an intentional mispointing of "Melek," after the analogy of "bosheth" (comp. Hoffmann in Stade's "Zeitschrift," iii. 124). As to the rites which the worshipers of Molech performed, it has sometimes been inferred, from the phrase "pass through the fire to Molech," that children were made to pass between two lines of fire as a kind of consecration or februation; but it is clear from Isa. lvii. 5 and Jer. xix. 5 that the children were killed and burned. The whole point of the offering consisted, therefore, in the fact that it was a human sacrifice. From Jer. vii. 31 and Ezek. xx. 25, 26, it is evident that both prophets regarded these human sacrifices as extraordinary offerings to Yhwh. Jeremiah declares that Yhwh had not commanded them, while Ezekiel says Yhwh polluted the Israelites in their offerings by permitting them to sacrifice their first-born, so that through chastisement they might know that Yhwh was Yhwh. The fact, therefore, now generally accepted by critical scholars, is that in the last days of the kingdom human sacrifices were offered to Yhwh as King or Counselor of the nation and that the Prophets disapproved of it and denounced it because it was introduced from outside as an imitation of a heathen cult and because of its barbarity. In course of time the pointing of "Melek" was changed to "Moloch" to still further stigmatize the rites.

Nature of the Worship.

The motive for these sacrifices is not far to seek. It is given in Micah vi. 7: "Shall I give my first-born for my transgression, the fruit of my body for the sin of my soul?" In the midst of the disasters which were befalling the nation men felt that if the favor of Yhwh could be regained it was worth any price they could pay. Their Semitic kindred worshiped their gods with offerings of their children; and in their desperation the Israelites did the same. For some reason, perhaps because not all the priestly and prophetic circles approved of the movement, they made the offerings, not in the Temple, but at an altar or pyre called "Tapheth" (LXX.), erected in the valley of Hinnom (comp. W. R. Smith, "Rel. of Sem." 2d ed., p. 372). "Tapheth," also, was later pointed "Topheth," after the analogy of "bosheth." In connection with these extraordinary offerings the worshipers continued the regular Temple sacrifices to Yhwh (Ezek. xxiii. 39).

Motive of Sacrifices.



Babylonian Cylinder Representing Sacrifice of a Child.

(From Menant, "Glyptique Orientale.")

From the fact that I Kings xi. 7 calls Molech the "abomination of the children of Ammon" it was formerly assumed that this worship was an imitation of an Ammonite cult. But so little is known of the Ammonite religion that more recent scholarship has looked elsewhere for the source. Because of the mention in II Kings xvii. 31 of Adrammelech (= Adar-malik) and Anammelech (=Anu-malik) as gods of Sepharvaim transplanted to Samaria, it has been inferred that this form of worship was borrowed from Babylonia (comp. Bäthgen, "Beiträge zur Semitischen Religionsgesch." pp. 238 *et seq.*). This view rests on the supposition that "Sepharvaim" is equal to "Sippar," which probably is not the case. Even if it were, Anu and Adar were not gods of Sippar; Shamash was god of that city. From this verse, therefore, a Babylonian or Assyrian origin can not be demonstrated.

Support for this view has been sought also in Amos v. 26. If, as is probable, Siccuth and Chiun in that passage are names or epithets of Babylonian deities (comp. Chiun), the use of "Melek" in connection with these affords no sound basis for argument. The whole passage may be, as Wellhausen and Nowack believe, a late gloss introduced on account of II Kings xvii. 31, and is in any case too obscure to build upon. Furthermore, there is no evidence that the sacrifice of the first-born was a feature of the worship of Babylonian deities. Because child-sacrifice was a prominent feature of the worship of the Phenician Malik-Baal-Kronos, Moore (in Cheyne and Black, "Encyc. Bibl.") seeks to prove that the worship of Moloch was introduced from Phenicia. The evidence of its existence in Phenicia and her colonies is especially strong. Diodorus Siculus (xx. 14) tells how the Carthaginians in a siege sacrificed two hundred boys to Kronos. Burning was an important feature of the rite.

S. G. A. B.

MOMBACH, JULIUS LAZARUS: Musician and composer; born in Pfungstadt 1813; died at London, England, Feb. 8, 1880. In 1828 he went to London and received a good musical education under Enoch Eliasson. On the election of Simon Ascher to the position of reader at the Great Synagogue, Mombach entered the choir. Subsequently he became director of the choir, and held this position till his death. He took part in all the services at the Great Synagogue for a period of fifty-two years; and threw all his energy into the task of improving the musical portion of the service. He acquired the reputation of a skilful pianist, and of a clever composer of synagogue music. Nearly all the music in use in the German synagogues of England and the English colonies was composed by him.

Mombach's services as choirmaster were sought on almost every occasion of special importance in the history of the London and chief provincial synagogues; and many of the readers in English and colonial synagogues owed their training to him. He taught the singing of ḥazzanut to the students of Jews' College; was a member of the Committee for the Diffusion of Religious Knowledge; and directed the singing of the senior pupils of the Sabbath classes of the Association for Religious Instruction. For several years he conducted the concerts at the Jewish Workingmen's Club, Aldgate.

Bibliography: *Jew. Chron.* and *Jew. World*, Feb. 13, 1880.

J. G. L.

MOMMSEN, CHRISTIAN MATTHIAS THEODOR: Jurist, archeologist, and historian; born Nov. 30, 1817, at Garding, Sleswick-Holstein; died Nov. 1, 1903, at Charlottenburg, near Berlin. His most important work is his "Römische Gesch." (vol. i., 9th ed., Berlin, 1903; vols. ii., iii., 8th ed., 1889; vol. v., 3d ed., 1886; vol. iv. was not published). In vol. iii. he treats exhaustively the position and influence of the Jews in the Roman empire; and in vol. v. he devotes a chapter headed "Judäa und die Juden" to the spiritual and religious development of Judaism in the Persian, Greek, and Roman periods.

As a member of the Prussian Diet (1873–82) and of the German Reichstag (1881–84), Mommsen belonged to the Liberal party and strongly opposed the anti-Semitic movement. In his pamphlet "Auch ein Wort über Unser Judentum" (1881), which was written in reply to Treitschke's arguments in "Ein Wort über Unser Judentum," he warmly pleaded for tolerance and humanity, and argued that the Jewish element in the German empire is a wholesome one. He was among the first who signed the declaration of German notables (Nov. 12, 1880) in which Jew-baiting ("Judenhetze") was designated a "national disgrace." The passage in his "Römische Gesch." (iii. 350), "Auch in der alten Welt war das Judentum ein wirksames Ferment des Kosmopolitismus und der nationalen Dekomposition und insofern ein vorzugsweise berechtigtes Mitglied in dem cäsarischen Staate, dessen Politik doch eigentlich nichts als Weltbürgertum, dessen Volkstümlichkeit im Grunde nichts als Humanität war," having been misunderstood and misinterpreted by the anti-Semites, was omitted by Mommsen in a later edition.

Mommsen was an active member of the Verein zur Abwehr des Antisemitismus (founded 1891) until his death. He also declared himself against the accusation of ritual murder. In a prefatory letter to Errera's "Les Juifs Russes" (see Jew. Encyc. v. 203, *s.v.* Errera, Leo-Abram) he expressed the hope "that the statesmen of a great empire and the sovereign arbiter of Europe may no longer be dominated by the blind action of a resuscitated Torquemada."

D. S. Man.

MONASTIR: Capital of Rumelia, European Turkey; 400 miles west of Constantinople; the ancient **Vitolia.** It has a population of 65,000, including 6,000 Jews. There are no documents referring to Jews in Monastir before the arrival of the Spanish exiles in 1492. In the middle of the sixteenth century there was a Talmudic school in Monastir which was under the direction of R. Joseph ibn Leb, the author of four volumes of responsa (see "Ḳore ha-Dorot," ed. Cassel, p. 37b). In 1863 a terrible fire swept over the city; 1,008 out of the 2,080 houses and shops that were burned belonged to Jews. In 1884 there were 4,000 Jews in Monastir. In 1900 the Jews were accused of ritual murder in connection with the disappearance of an Orthodox Bulgarian, sixty years of age.

The affairs of the community are administered by a chief rabbi ("ḥakam bashi"; officially recognized by a decree of the sultan), a bet din or religious court, and a council of notables; from the taxes levied by the last-named the chief rabbi, the judges, and the schools are supported, and the poor relieved. There are three synagogues and five batte midrashot; a large Talmud Torah with 250 children; a boys' school with 150 pupils, founded in 1895, and subsidized by the Alliance Israélite Universelle and the Anglo-Jewish Association; a girls' school with 110 pupils, also aided by the Alliance; and day-nurseries that care for about 120 infants. Its two ḥebra ḳaddishahs date back to the first settlement of the Jews in the city. The occupations followed by the community are as follows: 600 merchants, including bankers; 150 cobblers; 150 tailors; 150 blacksmiths; 50 tinsmiths; 250 porters; and 150 dealers in old clothes (in which the Jews have the monopoly). The Jewish workmen belong to unions. Formerly they lived in "cortijos," or groups of houses enclosed by a wall, but most of these have been destroyed by the frequent fires. Down to the beginning of the last century the Monastir Jews put no inscriptions on their tombstones.

The following have occupied the rabbinate of Monastir: Joseph Jacob Israel (*c.* 1768); Joseph Israel (*c.* 1790); Jacob Joseph Israel (1854–89; author of "Yismaḥ Mosheh," a book of devotions in Judæo-Spanish, published by his grandson; Belgrade, 1896); Abraham Levi of Janina (1896–98).

Bibliography: M. Schwab, *Histoire des Israélites*, p. 238; *Bulletin All. Isr.* 1884, 1900, 1901; M. Franco, *Histoire des Israélites de l'Empire Ottoman*, p. 206; *El Avenir di Salonica*, Dec. 31, 1902; Jacob Joseph Israel, *Yismaḥ Mosheh*, Belgrade, 1896.

D. M. Fr.

MONATSSCHRIFT FÜR DIE GESCHICHTE UND WISSENSCHAFT DES JUDENTHUMS: The oldest and most important monthly devoted to the science of Judaism. It was founded by Zacharias Frankel in Dresden in the year 1851, in continuation of his "Zeitschrift für die Religiösen Interessen des Judenthums," which had been suppressed in 1846. Frankel believed that the objects striven for in the contest of 1848 had been attained, and that the Jews no longer had separate political interests. He therefore considered that the time had arrived for them to undertake a scientific investigation of their history and literature.

The first seventeen volumes of the "Monatsschrift" were edited by Frankel, who was succeeded by the historian Heinrich Graetz. The latter edited vols. xviii. to xxxvi. inclusive, being assisted by Pinkus Frankl of Berlin in vols. xxxiii. to xxxv. Publication was stopped in 1887, but was resumed in 1892, with M. Braun and David Kaufmann as joint editors (vols. xxxvii. to xliii.). Upon Kaufmann's death (1899) Braun became sole editor. Since Jan., 1904, the "Monatsschrift" has appeared as the organ of the Gesellschaft zur Förderung der Wissenschaft des Judenthums.

The "Monatsschrift" was first published in Dresden. Some volumes were then issued at Krotoschin and some at Berlin; but the greatest number appeared in Breslau. A complete table of contents for the first seventeen volumes is appended to vol. xvii., and a similar table for the years 1869 to 1887 is given at the end of vol. xxxvi. This table has been published separately also.

Bibliography: *Monatsschrift*, vol. i., Preface; S. P. Rabbinowitz, *Zacharias Frankel* (in Hebrew), pp. 143 *et seq.*, Warsaw, 1898. An exhaustive criticism, by Atlas, of vol. xxxiii. appears in *Ha-Asif*, ii. 432–450.

S. P. Wi.

MONCALVO (מונקלוו): Small town in the province of Alessandria, Piedmont, Italy. Jews settled there after their expulsion from France: The community, like those of Asti and Fossano, long retained the old French ritual, and still uses the German Maḥzor with several additions from the French rite. The history of the community is similar to that of the other communities of Savoy. In 1866 it contained 220 persons, including a large number of artisans engaged in various trades, but it is now considerably smaller. It formerly had various philanthropic societies and foundations, ritual institutions, etc. Joseph Lattes (d. 1880) officiated for a time as rabbi.

Bibliography: Luzzatto, in *Halikot Ḳedem*, p. 51; idem, *Mebo le-Maḥzor*, p. 7; Zunz, *Ritus*, p. 64; *Corriere Israelitico*, iv. 315.

G. I. E.

MOND, LUDWIG: English chemist; born at Cassel, Germany, March 7, 1839; educated at the Polytechnic School, Cassel, and at the universities of Marburg and Heidelberg. In 1862 he went to England and engaged in the Le Blanc soda industry, introducing his process for recovering sulfur from alkali waste. In 1873 he established, in partnership with T. T. Brunner, at Winnington, Northwich, Cheshire, the manufacture of ammonia soda by the Solvay process, which he has perfected; and the works there now constitute the largest alkali establishment in the world. Mond has patented many inventions of great scientific and commercial importance. He also founded and endowed the Davy-Faraday Research Laboratory of the Royal Institution in 1896.

Mond has held various high scientific positions. He is fellow of the Royal Society; a vice-president of the Royal Institution; vice-president of the Chemical Society; ex-president of the Society of Chemical Industry; and ex-president of the chemical section of the British Association for the Advancement of Science (1896). He has written numerous papers and addresses which have been published in the transactions and proceedings of these societies and institutions.

Bibliography: *Who's Who*, 1904; *Jewish Year Book*, 1903.

MONDAY AND THURSDAY PRAYER. See Liturgy.

MONEY.—Biblical Data: I. As far back as the history of Israel can be traced, gold and silver were used as standards of value and mediums of exchange, and, as the Egyptian tribute-lists show, they were thus employed in Canaan even before the Israelites inhabited it. The general use of the word "kesef," meaning "silver," to designate money shows that silver was the prevailing medium of exchange. Up to the time of the Exile, and even later, the metals were not coined, but were weighed (Ex. xxii. 16; II Sam. xviii. 12; I Kings xx. 39; see Numismatics). The scales and weights were carried about with the precious metal in a bag attached to the girdle (Deut. xxv. 13 *et seq.*; Isa. xlvi. 6; Prov. xvi. 11). An adulteration or debasement of the value of the precious metals by means of certain alloys seems not to have occurred; at least the practise was not given any thought, and warnings are uttered only against false measures (Deut. *l.c.*; Lev. xix. 36).

To disprove the opinion that during the whole period before the Exile coined money was unknown—that is, money under state control in regard to weight, purity, etc.—the passage in I Sam. ix. 8 is cited. Here it is related that Saul's slave gave him the fourth part of a shekel of silver, which he had with him. The conclusion, however, that this is a reference to coined money is too hasty. The only inference to be drawn is that at the time when the author of I Sam. ix. lived silver pieces of a certain weight may have existed and that they were cast into certain shapes known to every one, in order to obviate the necessity of weighing them at each transaction. Perhaps the name for "talent" ("kikkar" = "ring") is derived from such forms, since Egyptian documents show that it was quite usual to cast the metals into such rings or into bars. These forms were not found among the Assyrians, who, however, used wedge-shaped pieces of gold, which are mentioned in Josh. vii. 21.

The Shekel.

For money, as for weight, the shekel was the standard unit, the pieces of metal being either fractions or multiples of the shekel. The struggle between the Egyptian decimal system and the sexagesimal method of the Babylonians first made itself felt in regard to weights of gold and silver. The Phenicians were probably the mediators; and a mina of 50 shekels was established as a standard. According to certain indications, the relative value of gold to silver was as 10 to 1. Later, in consequence of the great increase in the supply of silver, the relative value was as 40 to 3. This may, perhaps, have affected the possibility of introducing the sexagesimal system.

The gold shekel originally weighed $\frac{1}{60}$ of a mina. The silver shekel, to have had an equal value, must have weighed $\frac{40}{3} \times \frac{1}{60} = \frac{2}{9}$ of a mina. As this would have been impracticable for use, it was decided to make a smaller piece, one more suitable for circulation. Two methods presented themselves: (1) either the silver equivalent of the gold shekel could be divided into ten parts, in which case a silver shekel of $\frac{2}{90} = \frac{1}{45}$ of a shekel of weight would result; or (2) the silver equivalent could be divided into fifteen parts, in which case a silver shekel would weigh $\frac{2}{135}$ of a mina.

The Mina.

When the decimal system made its way into use, the gold mina as well as the silver mina was reckoned at 50 such shekels. Consequently there was (1) the Babylonian silver mina, equivalent to $\frac{50}{45} = \frac{10}{9}$ of a mina of weight; (2) the Phenician silver mina, equivalent to $\frac{100}{135} = \frac{20}{27}$ of a mina of weight.

In the earlier system of Babylonian silver values (which was used also in the Lydian and Persian kingdoms) the silver shekel was divided into thirds, sixths, and twelfths, whereas in the Phenician system it was divided into halves, fourths, eighths, etc.

The Phenician silver shekel is found among the Jews also. This is proved by the fact that they had the same method of division: the quarter-shekel appears in I Sam. ix. 8; the half-shekel is the Temple-tax in the Priestly Code. The shekels of the Maccabean period which have been preserved vary between 14.50 and 14.65 gr., which is exactly $\frac{2}{135}$ of the large "common" (see WEIGHTS AND MEASURES) Babylonian mina. The mina accordingly weighed 727.7 gr., and the talent 43,659 kg.

The Siglos.

In the Persian period the Babylonian shekel, equivalent to one-tenth of the mina of weight, came into use, since Nehemiah (x. 33 [A. V. 32]) assessed the Temple-tax at one-third of a shekel. This Persian system of coinage had the small mina as a basis. The unit was the siglos, which corresponded to one-half of a Babylonian shekel. The relation between it and the Jewish one was 3 to 8. It was considered as the one-hundredth part of a mina and not the fiftieth. It amounted to 5.61–5.73 gr.; the mina, to 561–573 gr.; and the talent to 33,660–34,380 kg. In the Maccabean period the Phenician silver shekel was again in use. Consequently the Temple-tax was again a half-shekel (Matt. xvii. 24, 27).

II. Coined money did not come into use among the Jews until the time of the Persians. In the Old Testament, Persian darics (A. V. "drams") are mentioned in Ezra viii. 27 and I Chron. xxix. 7 as "adarkon," and in Ezra ii. 69 and Neh. vii. 70–72 as "darkemon." They weighed 8.40 gr., thus corresponding almost exactly to one-sixtieth of the Babylonian light mina. The corresponding silver coin was one-twentieth of the daric; which, perhaps, was meant by the term "shekel" in Neh. v. 15, x. 33. See NUMISMATICS.

——**In Rabbinical Literature:** In conformity with the unvarying usage of the Mosaic law, the Mishnah (B. M. iv. 1) treats both gold and copper coins as commodities when they come to be exchanged for silver coins (see ALIENATION); but the Gemara upon this section gives a glimpse into the history of the battle of the gold and silver standards, which raged with varying fortunes from the days of Hillel and Shammai, in King Herod's time, to the compilation of the Mishnah by Rabbi. Shammai's leading disciple, R. Ḥiyya, addresses him: "Rabbi, you teach us now in your old age that gold [as a commodity] gives title to silver; but when you were young you taught us the contrary!" In the discussion that follows the Mishnah is referred to (Ma'as. Sh. ii. 7). The school of Shammai says: "A man must not turn shekels into gold denarii [for transport of second tithe to Jerusalem]." The school of Hillel permitted it. The former school seemed to look on gold as a commodity, at least as compared with silver; the latter school was willing, for this purpose, at least, to treat both alike as money, if not to give gold a preference over silver. The Hillelites seemingly yielded to the Roman influence of their time, which maintained the gold standard.

The gold denarius passed generally for twenty-five silver denarii—that is, 6¼ shekels. It is urged in favor of gold as the true money that it was usual in the redemption of the first-born son for the father to give a gold denarius to the kohen, and for the latter to return five zuz, or silver denarii, in change, though the rate of exchange between silver and gold at the time might be such as to make the former worth either more or less than twenty-five of the latter. Another point is made in a responsum by R. Ḥiyya himself, that a loan made in gold may be recovered in gold, though it has risen in exchange value, without violating the law against usury (B. M. 44b–45b). Rabbi, as most of the intervening patriarchs, was one of Hillel's descendants, and naturally followed his teachings. It was probably a change in the Roman currency laws and in the habits of business which induced him in his later years to reestablish the old silver standard among the Jews.

MONEY-LENDING. See Usury.

MONIES, DAVID: Danish portrait and genre painter; born in Copenhagen June 3, 1812; died there April 29, 1894. He was admitted to the school of the Academy of Arts in 1824, and was twice (1827 and 1832) awarded silver medals for meritorious work. In 1830 he began painting, producing and exhibiting portraits of eminent contemporaries.

In 1833 Monies produced "En Kunstner som spöger med en Bondepige." In 1835 he went to Munich, and in the following year 400 rix-dollars per annum was awarded to him from the public funds to enable him to continue his studies abroad. In 1848 he was elected a member of the Danish Academy of Arts, and in 1859 he received the title of professor. Among other paintings by Monies, the following may be mentioned: "To Börn ved et Vandlöb," 1838; "Erindring fra Danseboden," 1849; "Konfirmanden"; "Pengebrevet"; "En Skovtur" (in the royal gallery at Copenhagen). Monies essayed also historical painting, and his "Episode af Troppernes Hjemkomst," 1850, vividly expresses the feeling of joy mingled with sadness which animated the Danish people on the occasion of the homecoming of the troops after the Three Years' war. This painting is in the museum in Frederiksborg Castle. Monies was less fortunate in the large pictures in which he depicted scenes from the history of the Jewish people.

s. F. C.

MONIS, JUDAH: American scholar. Hannah Adams in her "History of the Jews" says that he was born in Algiers about 1683, and that he died in Northborough, Mass., in 1764; while Josiah Quincy in his "History of Harvard University" gives the year of his birth as 1680 and that of his death as 1761. Little is known of his early career. He is said to have received his education in Italy, and to have emigrated to Boston in the early part of the eighteenth century (Adams, *l.c.*). The first event of his life of which there is authentic record is his baptism (March 27, 1722) in the College Hall at Cambridge, Mass. After that he was an active and energetic worker in the cause of his new faith, although he observed throughout his life the Jewish Sabbath. He held the appointment of instructor in Hebrew at the university from 1722 till 1759, when, on the death of his wife, he resigned and removed to Northborough.

On the occasion of his baptism, after the sermon of the officiating clergyman, he delivered a discourse in which he formulated and defended his confession of faith. The title of this address (printed by S. Kneeland for O. Henchman "at the Corner Shop on the South Side of the Town House," Boston, 1722) is: "The Truth, Being a Discourse which the Author delivered at his Baptism, Containing Nine Principal Arguments the Modern Jewish Rabbins do make to prove the Messiah is yet to Come; With the Answers to each . . . not only according to the Orthodox Opinion, but even with the Authority of their own Authentick Rabbins of Old, and Likewise, With the Confession of his Faith, at the Latter End. Dedicated to the Jewish Nation and Prefac'd by the Reverend Increase Mather, D.D." Monis was the author also of two short essays, both treating of the same subject as his address.

In 1735 he published in Boston the first Hebrew grammar printed in America. It bore the title: "Dickdook Leshon Gnebreet. A Grammar of the Hebrew Tongue, Being an Essay To bring the Hebrew Grammar into English to Facilitate the Instruction of all those who are desirous of acquiring a clear idea of this Primitive Tongue by their own studies; In order to their more distinct Acquaintance with the Sacred Oracles of the Old Testament, according to the Original. And Published more especially for the Use of the Students of Harvard College at Cambridge, in New England."

A. Kohut, in *American Journal of Semitic Languages*, xiv. 217 *et seq.*; *Publ. Am. Jew. Hist. Soc.*, i. 10, 423; x. 32.

T. F. T. H.

MONOGAMY: In Judaism the Law tolerated though it did not enact polygamy; but custom stood higher than the Law. From the period of the return from the Babylonian Exile, monogamy became the ideal and the custom of Jewish married life. That monogamy was the ideal may be seen from several facts. Not only does the narrative of Genesis, containing the story of the first man and woman, point to monogamy, but Gen. ii. 24 is best explained in the same sense. So, too, in the story of the Flood, in which the restoration of the human race is depicted, the monogamous principle is assumed. Also the polygamous marriages of some of the patriarchs are felt by the narrator (J) to need excuse and apology, as being infringements of a current monogamous ideal. Even more unmistakable is the monogamous ideal displayed in the Wisdom literature. The "Golden A B C of the Perfect Wife" in Prov. xxxi. 10-31 is certainly monogamous; in fact, throughout the Book of Proverbs "monogamy is assumed" (Toy, "Proverbs," p. xii.; comp. Cheyne, "Job and Solomon," p. 136). Ben Sira, moreover, as well as Tobit, confirms this conclusion (comp. History of Susanna 23, 69), though, while Ben Sira's view of woman is lower on the whole than that of the canonical Proverbs, Tobit's is quite as high as the highest ideal. Job is monogamous. So is the Song of Solomon. Harper gives a most convincing argument in this sense in his edition of the Song of Solomon (Cambridge, 1902; comp. especially pp. xxxi. and xxxiv.).

Monogamy the Jewish Ideal.

From another side the monogamous ideal is illustrated by the prophetic use of marriage as typical of the relation between God and Israel. In this sense monogamy becomes the corollary of the divine Unity (comp. Hamburger, "R. B. T." i., *s.v.* "Vielweiberei"). It is a commonplace of prophetic imagery to describe God as the husband and Israel as the bride (comp. Hosea, *passim*; the exquisite passage Jer. ii. 2; also *ib.* iii. 14, xxxi. 32), in contrast to idolatry, which is typical of impure married life (Isa. liv. 5, and many other passages). Infidelity toward God is expressed under the figure of whoredom (see Driver on Deut. xxxi. 16). The same figure of the relation of God to Israel passed over to the later Judaism; and a similar figure is prominent in Christianity also.

Legal Aspects.

As to the Law, the facts have already been treated in part under Bigamy. Monogamy was not legally enforced. In the case of the Levirate Marriage, monogamy was legally invaded; otherwise, polygamy was merely tolerated and not set up as a laudable rule. But on the other hand the Law made several provisions which are of a nature to act as bars to polygamy. By positively prohibiting an Israelite eunuch-class (Deut. xxiii. 1) the possibility of the large Oriental harem was much diminished (see, however, Eunuch). Royal license in the matter of polygamy is denounced (Deut. xvii. 17), and in later times it is chiefly the un-Jewish Herod who is represented as having a large harem. The high priest, in the traditional explanation of Lev. xxi. 13, was restricted to one wife (Yoma i. 1; Yeb. 59a; Maimonides, "Yad," Issure Biah, xvii. 13). Perhaps the most effective deterrent of polygamy was the equality of rights established among a man's wives if he took more than one. The law of Ex. xxi. 10, "if he take himself another wife, her food, her raiment, and her duty of marriage, he shall not diminish," must in ancient as in medieval times have made polygamy unattractive, if not impossible, except to the very wealthy (comp. Luckock, "History of Marriage," 1894, pp. 13 *et seq.*). Again, the law of inheritance, by which the child of a second and favorite wife could not be preferred to the child of a less-beloved wife, must have stood as a bar to a second marriage. This law (Deut. xxi. 15), by its use of the terms "hated" and "beloved" of the two wives, also gives incidentally the main social objection to polygamy, namely, the difficulty of maintaining under a polygamous régime cordial relations within the home (Nowack, "Hebräische Archäologie," i. 159). It is certain that polygamy did not largely prevail in Israel (*ib.* 158). Until strict monogamy generally established itself after the Exile, the Jew had for the most part only one wife, with, perhaps, a secondary consort of lower status (a similar custom is revealed by the code of Hammurabi; see Johns in Hastings, "Dict. Bible," extra vol., p. 599a).

It was the consideration of the difficulty of maintaining a happy home-life that practically abrogated polygamy among the Jews after the Exile. The ideal of Jewish family life is very high in the Wisdom literature; and the ideal continually rose with subsequent centuries. Güdemann rightly sees in this argument the strongest evidence of the monogamous condition of the Jews for centuries before monogamy was legally enforced (comp. Güdemann, "Das Judenthum," 1902, pp. 7 *et seq.*). It may be clearly seen from Ps. cxxviii., in which the domestic happiness of the monogamist God-fearer is depicted. This psalm has thus been appropriately introduced into the Church marriage service, as well as into the Synagogue processional for the Bridegroom of the Law.

Josephus and the Talmud.

That polygamy survived into the Christian era is, however, asserted by Josephus ("Ant." xvii. 1, § 2); and he himself ("Vita," § 75) seems to have had one wife in Palestine and another in Egypt (comp. Löw, "Gesammelte Schriften," iii. 47). Such a practise is forbidden by a baraita in Yeb. 37a; and this prohibition is (with certain limitations) introduced into the Shulḥan 'Aruk (Eben ha-'Ezer, ii. 11). The Talmud certainly does not enact monogamy (see Bigamy); and as far as the Law is concerned, Justin Martyr ("Dial. cum Tryph." § 134) is not wrong in asserting that in his time (2d cent. C.E.) Jews were permitted to have four or five wives. But it is very doubtful whether they availed themselves of the permission. Frankel ("Grundlinien des Mosaisch-Talmudischen Eherechts," 1860) maintains the prevalence of monogamy; and his view was not seriously shaken by the criticisms of Löw (*l.c.* pp. 48 *et seq.*), who does not contest Frankel's main position, but merely adduces some evidence to show that Frankel's conclusion was perhaps stated without sufficient reserve. It is not necessary to examine the details further here; for the main fact remains that the general impression made by the Talmudic evidence is altogether favorable to Frankel's contention (comp. the statement of Amram in "The Jewish Law of Divorce," 1897, p. 76, note 3: "There are many indications in the Mishnah that monogamy was the rule and polygamy the exception"; he cites Yeb. ii. 9, 10—on which Frankel also lays stress—where the presumption that a messenger bringing a document of divorce from foreign parts had assisted in divorcing the woman because he wished to marry her himself, is rebutted by the fact that he had a wife living at the time). It is, however, on the general impression that one relies in adopting the view of Frankel. Edersheim ("Hist. of the Jewish Nation," 1896, p. 272) is equally emphatic.

The Middle Ages.

The Jewish law reached the Middle Ages with polygamy permitted, but not much practised. Theoretically a man might have several wives if he wished, for R. Ami's view to the contrary does not seem to have been accepted (Yeb. 65a, below). So in his codification of the Jewish law, Maimonides ("Yad," Ishut, xiv.; comp. Shulḥan 'Aruk, Eben ha-'Ezer, i. 9) makes it lawful for man to contract many simultaneous marriages. But this must not be taken to represent the personal opinion of Maimonides, especially if the letter attributed to him concerning the French (Provençal) rabbis be authentic. In that letter Maimonides scornfully attacks the practise of bigamy with an abusive vigor certainly unusual with him (on this letter see Kobak's "Jeschurun," iii. 46-55). The law, as laid down in the Talmud and codified by Maimonides, required, however, that the husband should not only insure to each wife adequate maintenance (each wife could claim a separate domicile), but should also secure for each full conjugal rights. Such restrictions are essentially foreign to a polygamous condition.

Monogamy Becomes Jewish Law.

It may be inferred that, except in the case of childlessness, very few European Jews in the Middle Ages were other than monogamous. It must be remembered that in the Jewish view the purpose of marriage was not to satisfy carnal desires, but to raise up a family; hence it was not uncommon that a man was permitted and even urged to take a second wife when this purpose was unfulfilled. It is open to question whether a simultaneous marriage or a divorce of the first wife would be the more humane or expedient course; but while the Jewish theory as to the purpose of marriage prevailed, one or other course was natural in case of the wife's sterility. At all events when R. Gershom at the beginning of the eleventh century succeeded with the utmost ease in making monogamy the law for Western Jews, he was merely formalizing current practise (comp. Güdemann, "Gesch." i. 11, ii. 165, iii. 116; Abrahams, "Jewish Life in the Middle Ages," ch. vii.). Graetz's arguments to show that polygamy prevailed in Europe in R. Gershom's time are refuted by Harkavy in the Hebrew edition of Graetz (iii. 367, note קיא). On R. Gershom's celebrated ḥerem see Bigamy and Gershom b. Judah.

Conditions in the Orient.

In Mohammedan parts of Europe, as well as in the Orient generally, the law of monogamy was not, and is not, formally accepted. Occasional cases of bigamy are found in Spain as late as the fourteenth century (for a case in 1322 comp. Kayserling in "Monatsschrift," 1865, pp. 390–391, and add the evidence from the Responsa of Isaac b. Sheshet, 1901, § 20). But it may be doubted whether any clear cases can be produced of such marriages except for specific reasons which the Jewish theory of marriage regarded as adequate (comp., for instance, RaSHBA's testimony in Ṭur Eben ha-'Ezer). The objection in the Orient to Gershom's rule turned on this very point as well as on the levirate difficulty. That even in the Orient bigamy was against the sentiment of many may be seen from the customary undertaking (included in the ketubah) by the husband that he will not take a second wife. The insertion of such a clause is termed "customary" in the Ṭur Eben ha-'Ezer, § 119, near end (comp. Abrahams, *l.c.* p. 120, and Jew. Encyc. vii. 476, *s.v.* Ketubah). Thus in the East a voluntary promise often replaced what was law in the West. No doubt cases of bigamy still occur among Eastern Jews (see references in Westermarck, "History of Human Marriage," Index, *s.v.* "Jews"); but such cases are surprisingly rare. In addition to the citations in Kalisch (Commentary on Leviticus, ii. 374), the following may be quoted: "As a rule, the Oriental Jews are practically monogamists" (Lucy Garnett, "The Women of Turkey," 1891, p. 12); "Bigamy [in Morocco] is also legal, though uncommon" (Budgett Meakin, "The Moors," 1902, p. 443); "They [the Yemenites] rarely marry more than one wife" (M. Thomas, "Two Years in Palestine and Syria," 1900, p. 40). For similar statements as to Teheran and Safed see "Revue des Ecoles de l'Alliance Israélite Universelle," No. 2, p. 166; No. 3, p. 195. It is indeed to the schools, now so beneficently established in most parts of the East, that one must look for a complete legalization of what is after all the ordinary rule and custom in regard to monogamy.

J. I. A.

MONOTHEISM: The belief in one God. The French writer Ernest Renan has propounded the theory that the monotheistic instinct was a Semitic trait, and that therefore the universal belief that it was characteristic of the Hebrews alone must be modified. But later research into Semitic origins has demonstrated the untenability of Renan's contention. Robertson Smith has summed up the matter with the statement that "what is often described as a natural tendency of Semitic religion toward ethical monotheism is in the main nothing more than a consequence of the alliance of religion with monarchy" ("Rel. of Sem." p. 74; Montefiore, "Hibbert Lectures," p. 24; Schreiner, "Die Jüngsten Urtheile über das Judenthum," p. 7). The Hebrews alone of all the Semitic peoples reached the stage of pure monotheism, through the teachings of their prophets; however, it required centuries of development before every trace of idolatry disappeared even from among them, and before they stood forth as a "unique people on earth," worshipers of the one God and of Him alone.

Rise of the Belief.

In Hebrew tradition the origin of the belief in the one God is connected with the religious awakening of the patriarch Abraham. Later legends describe circumstantially how Abraham reached this belief (Beer, "Leben Abrahams nach Auffassung der Jüdischen Sage"; see Abraham). Though the tradition contains without doubt the kernel of the truth, modern criticism holds that the Hebrew tribes were brought to a clear realization of the difference between their God and the gods of the surrounding nations through the work and teachings of Moses. The acceptance of the pure monotheistic belief by the whole people was a slow process at best; how slow, many statements in the historical and prophetical books of the Bible prove amply. Throughout the period of the first commonwealth there was constant reversion to idolatry on the part of the people (comp. Judges ii. 11–13, 17, 19; iii. 7; viii. 33; x. 6, 10, 13; I Sam. viii. 8, xii. 10; I Kings ix. 9, xiv. 9, xvi. 31; II Kings xvii. 7, xxii. 17; Isa. ii. 8, x. 11, xxxi. 7; Jer. i. 16; vii. 9, 18; ix. 13; xi. 10, 13, 17; xii. 16; xiii. 10; xvi. 11; xix. 4–5, 23; xxii. 9; xxxii. 29, 35; xliv. 3, 5, 15; Hos. ii. 7, iii. 1, iv. 17, viii. 4, xi. 2; Ps. cvi. 36; II Chron. vii. 22; xxiv. 18; xxviii. 2, 25; xxxiii. 7; xxxiv. 25). Forgetful of their obligation to worship Yhwh and Him alone, the people followed after the "ba'alim"; the "bamot" and the "asherot" dotted the land; frequently, too, the Israelites confounded the worship of Yhwh with the worship of Baal.

Monolatry.

In the development of religious belief in Israel there are indications of a growth through various stages before the conception of absolute uncompromising monotheism was reached. Down to the eighth-century prophets, the religion of the people was monolatrous rather than monotheistic; they considered Yhwh to be the *one* God and *their* God, but not the one and only God. He was the national God of Israel as Chemosh was the god of Moab and Milkom the god of Ammon (Num. xxi. 29; Judges xi. 24; I Kings xi. 33). He was not yet the God of all the nations and of the universe. The existence of other gods was not definitively denied; even the second commandment does not disclaim the existence of other gods; it merely forbids Israel to bow down to them or serve them (comp. Deut. iv. 19). There was, in truth there could be, no other God in Israel; but this, it is held, did not affect the reality of the gods of other nations; though, in comparison with the might and glory of Yhwh, they were weak and powerless. A very early poem has the words, "Who is like unto thee, O Lord, among the gods?" (Ex. xv. 11)—a sufficient indication that the idea that there were other gods was in the writer's mind. In a later psalm there is a reminiscence of this early state of thought—"There is none like unto thee among the gods" (Ps. lxxxvi. 8, R. V.).

God, Land, and People.

As among other Semitic peoples (Smith, *l.c.* p. 91), so, too, in early Israel the closest relationship was supposed to subsist between the Deity, the land, and the people. Yhwh was the God not only of Israel the people (II Sam. vii. 23; I Kings viii. 59), but of the land of Israel; He could be approached nowhere else (comp. the story of Naaman, II Kings v. 15); the great conception of His omnipresence as held by the author of the 139th Psalm was not yet reached. Thus when David was compelled by his enemies to flee he complained bitterly: "They have driven me out this day that I should not cleave unto the inheritance of the Lord, saying, Go, serve other gods" (I Sam. xxvi. 19, R. V.); and the prophet Hosea speaks of the domain of the Israelites as "God's land" (ix. 7). The triple relationship of God, people, and land is forcibly expressed in as late a passage as the prayer of the Deuteronomist, "Look down from thy holy habitation, from heaven, and bless thy people Israel, and the land which thou hast given us" (Deut. xxvi. 15).

In Israel, then, and in Israel's land Yhwh was sole God. Even this preparatory stage to universal monotheism was not reached until centuries after the occupation of the land; there was a syncretism of religious cults; the people were tolerant of the local ba'alim; Jeroboam was able to set up the calf-gods at Dan and Bethel without arousing a great outcry.

Yhwh alone in the land, the land Yhwh's alone, the worship of no other god to be tolerated in the land—this was the program of the zealous prophet Elijah, and in his activity there was a decided step forward to the recognition of Yhwh alone as the God of Israel. For Elijah it was Yhwh only or nothing; "How long halt ye between two opinions? if the Lord be God, follow him; but if Baal, then follow him" (I Kings xviii. 21). Monolatry reaches its supreme expression in Elijah: "Yhwh is God" is the watchword of his activity; there is room for none other in Israel.

From this attitude of Elijah it was but a step to pure monotheism; the belief is found in full flower in the speeches of the great eighth-century prophets; the genius of Amos and his successors carried the conception of the "oneness" of Yhwh to its uttermost limit, although even in their time the people did not reach this height of thought; it was only after the return from the Babylonian exile that the monotheistic belief was a positive possession of the people as well as of the great spirits to whom the truth was first vouchsafed.

True Monotheism.

The modern view of the development of religious thought in Israel is that the conception of pure monotheism was reached through three channels—through the recognition of God in nature and in history, and through the belief in the ethical character or holiness of God. When Yhwh was recognized as the Creator of heaven and earth and all that in them is (comp. Amos v. 8, ix. 6), when the appellation "the Lord of the heavenly hosts" was given Him (Amos iv. 13, v. 27, Hebr.), when the whole earth was spoken of as being full of His glory (Isa. vi. 3), then there was room for no other god; for the conception of God as the Lord and Creator of nature carried with it, as a necessary corollary, the belief that there was no god beside Him (Jer. x. 11). The great conceptions of the Prophets that Yhwh punishes wrong-doing not only in Israel but in other nations (Amos i.-ii.), that He is the arbiter of the destinies of such other nations (*ib.* ix. 7), that He uses heathen kings as instruments of punishment or salvation, as when Isaiah speaks of the Assyrian monarch as "the rod of God's anger," when Jeremiah points to the Babylonian king as the instrument whereby God will punish Jerusalem, and when deutero-Isaiah refers to Cyrus as God's anointed—all this involves the conclusion that there was no god but Yhwh, for His dominion extended not only over Israel, but over the nations of the earth also, and His guiding hand directed the course of kings and peoples in the working out of their history.

But the conception of the holiness of Yhwh (Isa. v. 16, vi. 3; Hab. ii. 3), the recognition of His ethical character, led more than anything else to monotheism, as Kuenen has pointed out ("Hibbert Lectures," 1882, p. 127). As long as Yhwh was looked upon as only the national God, it was a question of the supremacy of the strongest as between Him and the national gods of other peoples. But when God was presented primarily in His ethical character and worshiped as the God of holiness, there was no longer any measure of comparison. If Yhwh was the holy God, then the other gods were not. Here was an entirely new element; Yhwh as the moral governor of men and nations was absolutely unique; the gods of the nations were "elilim" (= "nothings"; Isa. ii. 8, 18, 20; x. 10-11; xix. 1, 3; xxxi. 7; Hab. ii. 18; Ezek. xxx. 13), "vanity" (Jer. ii. 5, viii. 19, x. 15, xvi. 19, xviii. 15; Isa. xliv. 9, lix. 4), "lies" (Amos ii. 4; Hab. ii. 18; Jer. xxix. 31), "abomination" (Hos. ix. 10; Jer. iv. 1, vii. 30, xiii. 27, xxxii. 34; Ezek. v. 11; vii. 20; xx. 7-8, 30; Isa. xliv. 19).

The doctrine of absolute monotheism is preached in the most emphatic manner by Jeremiah (x. 10; xiv. 22; xxiii. 36; xxxii. 18, 27) and the Deuterono-

Culmination in Isaiah.

mist (iv. 35, 39), but the Biblical teaching on the subject may be said to have culminated in Isaiah of Babylon. Yhwh, though in a peculiar sense the God of Israel, is still the God of all the world. This prophet's standpoint is uncompromising: "I, even I, am the Lord; and beside me there is no savior" (xliii. 11); "I am the first, and I am the last; and besides me there is no God" (xliv. 6, xlviii. 12); "that they may know from the rising of the sun to the setting thereof that there is none besides me; I am God and there is none else" (xlv. 6, Hebr.). In the post-exilic psalms and such other portions of the Bible as were produced during the second commonwealth—Proverbs, Job, Song of Songs, Ecclesiastes, Daniel—the belief in the one God and in Him alone is positively assured. Not only in Palestine was monotheism now the sure possession of the Jewish people, but it may be said that the Judaism of the Diaspora is conscious of itself as the bearer of the monotheistic doctrine and as being therein distinguished from all its surroundings (comp. Friedländer, "Gesch. der Jüdischen Apologetik," p. 217). In proof of this latter statement many passages can be cited from the apocryphal and the pseudepigraphical writings. "Let them [the nations] know thee, as we also have known thee, that there is no God but only thou, O God" (Ecclus. xxxvi. 5; comp. also xliii. 28); "neither is there any God besides thee, that careth for all" (Wisdom of Solomon xii. 13); "O Lord, Lord God, the Creator of all things, . . . who alone art King and gracious, who alone suppliest every need, who alone art righteous and almighty and eternal" (II Macc. i. 24–25; comp. Ep. Jer. 5, in Kautzsch, "Apokryphen," i. 226; Aristeas Letter, 134: *ib.* ii. 16; Sibyllines, Proem, 7, 15, 54; iii. 584 *et seq.*, v. 76 *et seq.*: *ib.* i. 184, 196, 207; comp. also Josephus, "Ant." iv. 8, § 5).

Talmudic Attitude.

The spread of Christianity with its doctrine of the divinity of its founder called forth a number of expressions from the Jewish sages touching the subject of the absolute unity of God; thus a commentary on the first commandment reads, "A king of flesh and blood has a father and a brother; but God says, 'With Me it is not so; "I am the first" because I have no father, and "I am the last" because I have no brother; and "besides me there is no God," because I have no son'" (Ex. R. xxix. 5). A similar expression is used in explanation of Ecclus. iv. 8 ("There is one alone, and there is not a second"): "he hath neither child nor brother; but hear, O Israel, the Lord is our God, the Lord is One" (Deut. R. ii. 33). There can be little doubt that such a saying as "Whoever draws out the pronunciation of the word 'one' [in the Shema'], his days and years will be lengthened" is of similar import (Ber. 13b); the emphasizing of the unity was the particular characteristic of the faithful in a world of dualistic and trinitarian propaganda. As long as a man refused allegiance to other gods he was looked upon as a Jew; "whoever denies the existence of other gods is called a Jew" (Meg. 13a).

The unity of God was a revealed truth for the Jew; there was no need of proofs to establish it; it was the leading tenet of the faith; nor is any attempt at such proof found until the time of the medieval Jewish philosophers, who, in building up their systems of religious philosophy, devoted considerable space to the consideration of the attributes of God, especially of His unity. Proofs for the unity are given at length by Saadia ("Emunot we-De'ot," i. 7), Maimonides ("Moreh," ii. 1), Gersonides ("Milḥamot Adonai," iii. 3), and Ḥasdai Crescas ("Or Adonai," iii. 4).

The belief in the unity was formulated by Maimonides as the second of the thirteen articles of the faith known as the Maimonidean Creed: "I believe that the Creator, Blessed be His name, is One, and that no unity is like His in any form, and that He alone is our God, who was, is, and ever will be." Solomon ibn Gabirol expressed the idea in another manner in his great liturgical poem "Keter Malkut": "Thou art One, the first great Cause of all; Thou art One, and none can penetrate—not even the wise in heart—the mystery of Thy unfathomable unity; Thou art One, the Infinitely Great." This statement of belief found constant expression in the liturgy, as in the Minḥah service for Sabbath afternoon ("Thou art One and Thy name is One"), and in such liturgical poems as the "Adon 'Olam" ("He is One and there is no second, to compare to Him or associate with Him") and the "Yigdal" ("He is One and there is no unity like His unity. . . . His unity is unending").

The profession of the unity is the climax of the devotion of the greatest of the holy days, the Day of Atonement. At death it is the last word to fall from the Jew's lips and from the lips of the bystanders. This has been Judaism's great contribution to the religious thought of mankind, and still constitutes the burden of its Messianic ideal, the coming of the day when all over the world "God shall be One and His name One" (comp. Zech. xiv. 9). See Shema'.

J. D. P.

MONREAL: City in Navarre, situated three miles from Pamplona; to be distinguished from a city of the same name in Aragon. A small number of Jews lived here in a "Juderia." In 1320 the Jews of Pamplona, who were threatened by the shepherds, fled to Monreal and, supported by the brave D. Alfonso of Aragon, united with their co-believers in defending themselves against the pursuing herdsmen; 170 of them were, however, killed. In 1366 there were fourteen Jews in Monreal; in 1380 the Jews paid taxes to the local abbot; in 1477 their number had become so small that they held divine worship in a private house. D. Juze Orabuena, chief rabbi of Navarre and body-physician to the king, received houses in the Monreal Juderia as a present from the king.

MONSTER. See Leviathan.

MONTAGU, HYMAN: English numismatist and lawyer; died in London Feb. 18, 1895; son of Samuel Moses (having later assumed the name of

Montagu); educated at the City of London School. Articled to a firm of lawyers, he passed his final examination with distinction, and established himself as an expert in bankruptcy law. In early life a collector of beetles, he afterward took up coin-collecting, which he pursued with enterprising industry, becoming a numismatist of the highest rank. He presented a valuable collection of coins to the British Museum.

His principal works on numismatics are: (1) "Catalogue, with Illustrations, of a Collection of Milled English Coins Dating from the Reign of George I. to that of Queen Victoria" (1890); (2) "The Copper, Tin, and Bronze Coinage, and Patterns for Coins of England from the Reign of Elizabeth to that of Queen Victoria" (1885–93). His collection of Greek coins was especially noteworthy; and the sale catalogue of it became the standard work on the subject. He was the author of many essays on coinage, contributed to the publications of learned societies, and was a fellow of the Society of Antiquaries.

Montagu compiled the catalogue of coins for the Anglo-Jewish Historical Exhibition, London, 1887, for which, too, he wrote an introductory essay on Jewish coins and medals. He was for many years honorary secretary of Jews' College and a member of the education committee of that institution. He was also honorary solicitor for the industrial committee of the Stepney Jewish and the Board of Guardians schools, and a member of the committee of the Aged Needy Society.

MONTAGU, SIR SAMUEL, Bart.: English banker and communal worker; born at Liverpool Dec. 21, 1832; son of Louis Samuel, his name, "Montagu Samuel," having been in his early boyhood reversed by his parents. He went to London in 1847, and in 1853 founded the firm of Samuel Montagu & Co., foreign bankers, in Leadenhall street, afterward in Old Broad street.

In the Jewish community of London Montagu has been a prominent figure. For over a quarter of a century he has been connected with the Jewish Board of Guardians, the Board of Deputies, the United Synagogue, and other Jewish institutions. In 1870 he established and became president of the Jewish Working Men's Club. He has also been greatly interested in the building of new synagogues. In 1875 he founded, in conjunction with Lord Rothschild, the first industrial Jewish school in Jerusalem. In 1882, at the instance of the Mansion House (Russo-Jewish) Committee, of which he became treasurer, he went to Brody to inspect the emigration to America. In 1884 he visited the United States to inspect the Jewish agricultural colonies there. In 1886, Montagu visited several towns in Russian Poland and Russia proper, but was ordered by the Russian government to leave Moscow within twenty-four hours. In 1890 he merged the various hebras in the East End of London in the Federation of Synagogues, of which he became the first president.

In the general community Sir Samuel is or has been a justice of the peace for London and Hampshire; deputy lieutenant for the Tower Hamlets; member of the Gold and Silver Commission (1887–1890); and member of Parliament in the Liberal interest for the Whitechapel Division of the Tower Hamlets (1885–1900). He was created a baronet by Mr. Gladstone in 1894. In Oct., 1900, he contested unsuccessfully the parliamentary seat for Central Leeds. He has taken great interest in the proposal to introduce decimal coinage into England.

MONTALBAN: City in Aragon; not to be confused with Montalban in Castile, in the archbishopric of Toledo, which was also inhabited by Jews. Montalban possessed a Jewish community as early as the fourteenth century. In 1306 the governor of the place received permission to admit ten Jewish families which had been expelled from France. He was then given charge of the Jews and was empowered to adjust all their litigations. At the disputation in Tortosa the Montalban community was represented by Abu Ganda. A certain Jacob of Montalban died a martyr at Ancona in 1556.

MONTALTO, FILOTHEO ELIAU (ELIJAH): Portuguese physician; born at Castello Branco in the middle of the sixteenth century; died at Tours, France, in 1616. According to Kayserling ("Die Juden in Navarra," p. 146), Montalto was a brother of the physician Amatus Lusitanus; but this supposition is not sufficiently corroborated to make it probable.

Montalto was brought up by his Marano parents in the Jewish religion, and to this he remained faithful during his entire life. Having graduated as physician, he left his native country, where he was always exposed to the rigors of the Inquisition, and went to Italy. He settled first at Leghorn (*c.* 1598), and several years later at Venice. In the latter city he made the acquaintance of Concino Concini, on whose recommendation he was invited by Maria de Medici to come as physician to the French court. Montalto had declined many high positions in Italy—chief among them being that of successor to the renowned Mercurial in the University of Padua—because he feared that if he accepted them he would not be able to perform his religious obligations. In accepting Maria de Medici's invitation, therefore, he made it a condition that he should have complete religious freedom, and be exempt from any service on Saturday, although the rabbis of Venice decided that in cases of emergency he might travel on that day.

Montalto, who became a general favorite, was appointed councilor; and he remained at the French court until his death, which occurred suddenly while he was accompanying Louis XIII. to Tours. Maria de Medici caused the body to be embalmed, and sent it, accompanied by Morteira and certain of Montalto's relatives, to Amsterdam for burial.

Montalto was considered a high authority, not only in medicine but in all branches of science. Among his numerous works on medicine the most important were: (1) "Optica Intra Philosophiæ et Medicinæ Arcam de Visu, de Visus Organo et Objecto Theor. Accurate Complectens" (Florence, 1606); (2) "Archipathologia in Qua Internarum Capitis Affectionum, Essentia, Causæ Signa, Præsagia, et Curatio Accuratissima Indagine Disseruntur" (Paris, 1614; St. Gervais, 1618; Nuremberg, 1686); (3) "Consultationes Medicæ Itemque de Sensu et Sensato Super Aristotelem" (1614). Montalto was the author also of the following polemical works, still extant in manuscript: (1) "Sobre el Capitulo 53 de Ezayas é Outros Textos da Sagrada Escritura," divided into three parts (Columbia University [New York] MS.); (2) "Livro Fayto . . . em Que Mostra a Verdade de Diversos Textos, e Cazos, Que Alegão as Gentilidades para Confirmar Suas Seictas" (Wolf, "Bibl. Hebr." iii. 104); (3) "Razonamiento del Señor H. M . . . . em Paris, por Mandado del Rey Enrique IV. Delante de los Mayores Teologos y Doctores de Su Corte."

MONTANA: One of the northwestern states of the American Union. It was organized as a territory in 1864, and admitted as a state in 1889. It has the following Jewish communities: **Helena,** the capital of the state, with a benevolent association founded in 1872 and a congregation, Emanu-El, founded in 1887. Its rabbi is Jacob Mielziner. Helena has also a social club and a ladies' auxiliary society. **Butte,** with two congregations. Of the older, the B'nai Israel, founded in 1897, the present rabbi is Harry Weiss; the community has a Hebrew benevolent association founded in 1881. **Anaconda,** with a congregation, B'nai Israel. MONTE DI PIETÀ. See Pawnbrokers.

MONTEFIORE: Anglo-Jewish family which derives its name from a town in Italy. In 1856 there were three towns so named in the Pontifical States, but from which of the three the family came is not definitely known. As far back as 1630 the Montefiores were settled at Ancona as merchants. From Ancona they, or some of them, seem to have gone to Leghorn. Thither, about the end of the seventeenth or the commencement of the eighteenth century, **Judah Montefiore** went, and was taken into business by his uncle, **Isach Vita Montefiore.** Judah married a daughter of the Medinas, by whom he had four sons. The third son, **Moses Vita (Haim) Montefiore,** married, in 1752, Esther Hannah, daughter of Massahod Racah, a Moorish merchant of Leghorn. Moses had seventeen children. The third, **Samuel,** married Grace, daughter of Abraham Mocatta, and became the grandfather of Haim Guedalla. The fourth, **Joseph Elias,** was the father of Sir Moses Montefiore. The seventh, **Eliezer,** married a granddaughter of Simon Barrow of Amsterdam, and emigrated to the West Indies. He became the father of Joseph Barrow Montefiore (1803-93) and Jacob Montefiore (1801-95), both of whom were among the early pioneers of Australia. But the most notable was the sixth son, Joshua, who had seven children by a second marriage.

Abraham Montefiore: Stock-broker; born in London 1788; died at Lyons 1824; son of Joseph Elias Montefiore and brother of Sir Moses Montefiore, with whose commercial career he was afterward identified. He first adopted a trade and was apprenticed to Mr. Flower, silk-merchant of Watling street. In the silk trade he realized a small fortune, but being ambitious to push forward more rapidly, he joined his brother Moses in business; the firm of Montefiore Brothers thus formed carried on business in Shorters' court, Throgmorton street.

Montefiore was exceptionally fortunate on the Stock Exchange and left behind him a very large fortune. In 1824 he died at Lyons, on his way home from Cannes, whither he had gone for the reestablishment of his health. He was twice married: by his first wife, a daughter of George Hall of the London Stock Exchange, he had one daughter, Mary, who married Benjamin Mocatta; and by his second wife, Henrietta Rothschild, he had two sons and two daughters.

Charlotte Montefiore: Authoress; born in London 1818; died there July 2, 1854. She took an active part in the Jewish Ladies' Benevolent Loan and Visiting Society as well as in the Jewish Emigration Society, of which she was one of the founders. She was the active friend of the Jews' Free School, the Jews' Infant School, the West Metropolitan School, and of many other educational establishments. Her reading was extensive, especially in moral and ethical philosophy. She was a contributor to many publications calculated to improve and elevate Jewish youth. For the "Cheap Jewish Library" she wrote "The Way to Get Rich," "The Birthday," "Caleb Asher," etc.; she wrote also "A Few Words to the Jews" (London, 1851).

Claude Goldsmid Montefiore: English scholar and philanthropist; younger son of Nathaniel Montefiore; born in 1858. He was educated at Balliol College, Oxford, where he obtained a first class in the classical final examination, and where he came under the influence of Jowett and T. H. Green. Intended originally for the ministry of the Reform congregation of England, he studied theology in Berlin, but finding himself unable to sympathize with the arrest of the Reform Movement, he devoted himself instead to scholarly and philanthropic pursuits. He nevertheless continued to be a spiritual teacher and preacher, though in a lay capacity, and published a volume of sermons, in conjunction with Israel Abrahams, entitled "Aspects of Judaism" (London, 1894). In 1886 he was selected by the Hibbert trustees to deliver the Hibbert course of lectures for 1892 ("The Origin of Religion as Illustrated by the Ancient Hebrews"). In these lectures Montefiore made a permanent contribution to the science of theology. In 1896 he published the

first volume of his "Bible for Home Reading," forming a commentary on the Bible with moral reflections from the standpoint of the "higher criticism"; the second volume appeared in 1899. In 1890 Montefiore founded and edited, in conjunction with Israel Abrahams, the "Jewish Quarterly Review," a journal that stood on the very highest level of contemporary Jewish scholarship, and in which numerous contributions from his pen have appeared.

Montefiore is one of the leading authorities on questions of education; he was for some time a member of the School Board for London, and he is (1904) president of the Froebel Society and the Jews' Infant School, London, and a member of numerous other educational bodies. Montefiore has been mainly instrumental in enabling Jewish pupil teachers at elementary schools to enjoy the advantages of training in classes held for the purpose at the universities; he is on the council of Jews' College and of the Jewish Religious Education Board. He ranks as one of the leading philanthropists in the Anglo-Jewish community and holds office in various important bodies. He was elected president of the Anglo-Jewish Association in 1895, and he is a prominent member of the Council of the Jewish Colonization Association.

Montefiore has shown great sympathy with all liberal tendencies in Jewish religious movements in London and is president of the recently formed Jewish Religious Union. He was president of the Jewish Historical Society in 1899-1900.

J. G. L.

Sir Francis Abraham Montefiore (Bart.): English communal worker and Zionist; son of Joseph M. Montefiore, president of the Board of Deputies; born Oct. 10, 1860. In 1886 he took up the baronetcy previously held by Sir Moses Montefiore. He became high sheriff of the county of Kent in 1894, and of Sussex in 1895. He is chairman of the executive committee of the English Zionist Federation and has represented the English section at recent Zionist congresses. Montefiore was recently elected chairman of Elders of the Spanish and Portuguese congregation.

J. V. E.

Jacob Montefiore: Merchant; born in Bridgetown, England, Nov. 23, 1801; died Nov. 3, 1895. He entered into business with his brother Moses, and when in the early thirties the movement for the financing of Australian colonization from London was incepted Montefiore, who had been connected with the Colonial produce trade, became active in the various public schemes as a member of the South Australian Colonization Association, organized to settle South Australia on the Wakefield system. He was also appointed member of the first board of commissioners entrusted by the British government with the administration of the colony. He visited the colony in the year 1843 and again in 1854. His reception on his first visit by the governor, Sir George Grey, and the people was enthusiastic. During his visit to South Australia in 1843 he acted as an agent for the Rothschilds, at the same time holding a partnership with his brother **Joseph Barrow** in the firm of Montefiore Brothers of London and Sydney. The township of Montefiore, at the confluence of the Bell and MacQuarric rivers, in Wellington Valley, was founded by the brothers, and they contributed actively to the establishment there of places of worship for all denominations. The organization of the Bank of Australasia was largely due to their efforts. In Adelaide there is a hill named after them. In 1885, at the request of the directors of the Art Union Gallery of Adelaide, Jacob sat for the artist B. S. Marks, the portrait being hung in that gallery.

J. T. Se.

Jacob Isaac Levi Montefiore: Australian merchant; son of Isaac Levi and Esther Hannah Levi (daughter of Eliezer Montefiore); born at Bridgetown, Barbados, Jan. 11, 1819; died at Norwood, London, 1885. In 1837 he proceeded to Sydney, where he assumed his mother's maiden name. There he became one of the leading merchants and took an active part in the development of the city. In 1857 he was nominated a member of the first legislative council of the colony of New South Wales. He acted as president of the chamber of commerce, and was for many years a director of the Bank of Australasia. In 1876 he left Australia and settled in England, where he became a director of the Queensland National Bank, the Queensland Investment Company, and several other important commercial undertakings. One of his brothers is **Edward Levi Montefiore,** a member of the financial house of Cahen d'Anvers et Cie., and another, **George Levi Montefiore,** of Brussels, is a member of the Belgian Senate; both are still living (1904).

J. I. H.

Joseph Barrow Montefiore: Merchant; son of Eliezer Montefiore; born in London June 24, 1803; died at Brighton, England, Sept. 4, 1893. In 1826, during the mayoralty of Sir William Magnay, he became one of the twelve "Jew brokers" in the city of London, purchasing the privilege for £1,500. He did not remain long in the city, but seized a favorable opportunity of emigrating to Australia, where several members of his family were already settled. In New South Wales he traded in partnership with his brother and made many fortunate speculations in town allotments. He helped to found the township of Montefiore and the Bank of Australasia, and was one of the chief agents in the organization of the Jewish congregation in Sydney. In 1832 he obtained a grant of land from the government for a Jewish burial-place. At the same time he helped to organize the society which developed into the Sydney Hebrew Congregation. On retiring from business Montefiore settled in London and joined the Reform Congregation.

BIBLIOGRAPHY: *Jew. Chron.* and *Jew. World*, Sept., 1893.

Joseph Elias Montefiore: Son of Moses Vita (Haim) Montefiore; born in London 1759; married Rachel Mocatta (1783). He became the father of three sons and five daughters, the eldest son being Sir Moses Montefiore. The second son, Abraham, was twice married, and by his second wife, Henrietta Rothschild, became the father of Joseph Mayer (father of Sir Francis Montefiore), Nathaniel (father of Claude G. Montefiore), Charlotte (d. 1854; author of "A Few Words to the Jews"), and **Louisa** (afterward **Lady Anthony de Rothschild).** The third son, **Horatio** (1798–1867), became a merchant in London, and was one of the principal founders of the London Reform Community (1841). He married a daughter of David Mocatta, by whom he had six sons and six daughters. The youngest of these sons, **Emanuel Montefiore** (b. 1842), became a lieutenant-colonel in the Royal Artillery, assistant secretary of the London Charity Organization Society, commandant of the Jewish Lads' Brigade, and a member of the council of the West London Reform Synagogue.

Of the daughters of Joseph Montefiore the eldest, **Sarah,** married Solomon Sebag of London; she became the mother of Joseph Sebag, afterward Sir Joseph Sebag-Montefiore (1822–1903), who had three sons—**Arthur** (father of **Robert Sebag-Montefiore), Cecil,** and **Edmund.** Sarah had also five daughters: **Jemima** (married Haim Guedalla), **Esther** (died prematurely), **Abigail** (wife of Benjamin Gompertz, the mathematician), **Rebecca** (married Joseph Salomons, brother of the late Sir David Salomons), and **Justina** (married Benjamin Cohen, father of Arthur Cohen and Lionel Benjamin Cohen).

J. I. H.

Joseph Mayer Montefiore: English communal worker; nephew of Sir Moses Montefiore; born in London May 10, 1816; died there Oct. 9, 1880. In 1844 he was elected a member of the Board of Deputies, London, as one of the representatives of the Spanish-Portuguese congregation. He retired from the office in 1853, but was reelected in 1857. In 1858 he became vice-president of the board, acting as president during the absence abroad of Sir Moses, whom he succeeded, Oct., 1874. Montefiore was elected treasurer of the Spanish-Portuguese Synagogue in 1846, and warden in 1851. He was a liberal subscriber to and took much interest in the charitable and educational institutions connected with the congregation. He was a director of the Alliance Insurance Company for twenty-three years, and acted for some years as director of the National Provincial Bank of Ireland. He was a justice of the peace and deputy-lieutenant for Sussex, and served as high sheriff of that county in 1870.

Bibliography: *Jew. Chron.* and *Jew. World*, Oct. 15, 1880.

Sir Joseph Sebag-Montefiore: Stock-broker; son of Solomon Sebag and Sarah, eldest sister of Sir Moses Montefiore; born in 1822; died at London Jan. 18, 1903. On succeeding (1885) to the estate of his maternal uncle he assumed the name of Montefiore by royal license. He was one of the leading members of the London Stock Exchange, on which he amassed a large fortune.

He was a justice of the peace for Kent and the Cinque Ports and lieutenant of the city of London; and in 1889 he served as high sheriff for Kent. He was for many years a leading member of the Spanish-Portuguese congregation and was president of the elders of that body. In 1895 he became president of the Board of Deputies, after having been vice-president for many years; and in 1896 he was appointed by the King of Italy Italian consul-general in London. He was knighted in 1896.

Bibliography: *Jew. Chron.* May 22, 1896; *Jewish Year Book* (London), 5659 (=1898–99).

Joshua Montefiore: English lawyer, soldier, and journalist; born in London Aug. 10, 1762; died at St. Albans, Vt., June 26, 1843. After graduating at Oxford he studied law and was admitted to the bar in 1784. While practising in London he attained considerable success as an author, his "Commercial Dictionary" being regarded as the standard work of its kind. In 1791 he joined a band of adventurers under Moses Ximenes, who purposed establishing a colony on the coast of Africa; Montefiore took charge of the military side of the expedition. The party occupied the Island of Bulama and raised the British flag; but after several conflicts with the natives, they were compelled to withdraw. Of this early attempt at African colonization he has left a lively account. Before the settlement was broken up Montefiore attempted to establish schools for the children of his companions. On his return to England he declined the honor of knighthood and entered the army as a captain, being the first Jew to hold a military commission in England. He was present as an officer of the York Light Infantry at the taking of Martinique and Guadalupe in 1809. After serving in various parts of the world, he resigned his commission and emigrated to the United States; for some time he published and edited in New York "Men and Measures," a weekly political journal; he afterward took up his residence at St. Albans, Vt.

Montefiore published: "Commercial Dictionary" (1803); "Commercial and Notarial Precedents" (1804); "Trader's Compendium"; "United States Trader's Compendium"; "Law of Copyright"; "Synopsis of Mercantile Laws" (1830); "Law and Treatise on Bookkeeping" (1831); "Laws of Land and Sea" (1831).

Lady Judith Montefiore: Wife of Sir Moses Montefiore; daughter of Levi Barent Cohen; born in London in 1784; died Oct. 1, 1862. She was an accomplished linguist and musician. She married Moses Montefiore in 1812. For thirteen years they lived at New Court, Saint Swithin's Lane, London. Her prudence and intelligence influenced all her husband's undertakings, and when he retired from business the administration of his fortune in philanthropic endeavors was largely directed by her. Lady Montefiore accompanied her husband in all his foreign missions up to 1859, and was the beneficent genius of his memorable expeditions to the Holy Land, Damascus, St. Petersburg, and Rome. By her linguistic abilities she was enabled to materially assist her husband in his self-imposed tasks. During the journey to Russia, in 1846, she was indefatigable in her efforts to alleviate the misery she saw everywhere around her. The wife and daughter of the Russian governor paid her a ceremonious visit and expressed the admiration she had inspired among all classes. Her sympathies were greatly widened by travel; two journals of some of these travels were published anonymously by her. The last years of her life were spent alternately in London and Ramsgate. At her death Sir Moses founded in her memory the Judith Montefiore College at the latter place.

Leonard Montefiore: English author and philanthropist; brother of Claude G. Montefiore; born in London May 4, 1853; died at Newport Sept. 6, 1879; educated at Balliol College, Oxford, where he came under the influence of Jowett, T. H. Green, and of his fellow student Arnold Toynbee. Even before he left college he had contributed to some of the principal periodicals, as "The Nineteenth Century" and "The Fortnightly Review," and was at the time of his death devoting himself to the study of the German struggle for emancipation, on which he published some preliminary essays. Montefiore was associated with many philanthropic movements, especially with the movement for women's emancipation. His "Literary Remains" were privately printed by his family after his death (1880).

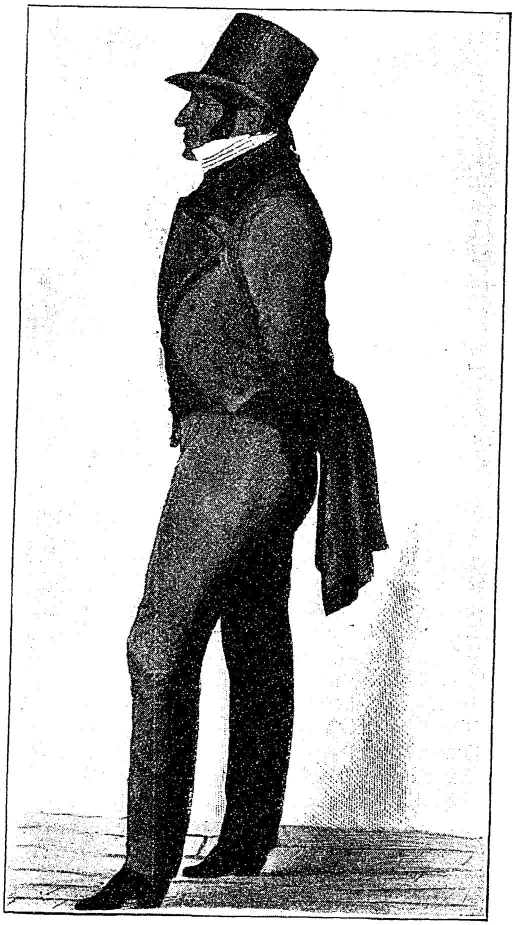
J.



Sir Moses Montefiore in 1818.
(From a sketch by Dighton.)

Sir Moses Montefiore (Bart.): English philanthropist; born in Leghorn, Italy, Oct. 28, 1784; died at Ramsgate, England, July 25, 1885. Moses Ḥayyim Montefiore and his wife, both of Leghorn, settled in London in the middle of the eighteenth century. One of their seventeen children, Joseph Elias Montefiore, took his young wife, Rachel, daughter of Abraham Lumbroso de Mattos Mocatta, on a business journey to Leghorn, where their eldest child, Moses, the subject of this article, was born. On their return they lived at Kennington, where Moses went to school and was apprenticed to a provision merchant. Later he entered a counting-house in the city of London, and ultimately became one of the twelve Jewish brokers then licensed by the city.

Jewish Broker.

His career was not entirely uncheckered by adversity. In 1806 he was deceived by a man whom he had trusted in a large transaction in Exchequer bills, and had to ask for time in which to settle certain obligations. This his high character and popularity enabled him to secure. His brother Abraham joined him in business; and they remained in partnership till 1816. Moses married (1812) Judith, daughter of Levi Barent Cohen. Levi Barent Cohen was an Ashkenazi, and it was a sign of indifference, on the part of the Montefiores, to current prejudice that, although they belonged to the London Sephardim, they married German Jewesses. Moses lived in New Court, close to his friend Rothschild; and the brothers Montefiore, as the brokers of that financial genius, became wealthy men. Moses was able to retire from the Stock Exchange in 1821; and in 1824 he assisted in founding the Alliance Assurance Company, of which he was the first president. He was among the founders of the Imperial Continental Gas Association, which extended gas-lighting to the principal European cities; and he was one of the original directors (1825) of the Provincial Bank of Ireland, which gained for him the honorary freedom of Londonderry. For a short time he was also a director of the South Eastern Railway. In 1836 he was made a Fellow of the Royal Society; and in 1837 he was elected sheriff of the city of London, being the second Jew to fill that office (see Salomons, Sir David). In the same year he was knighted by Queen Victoria on her accession. He had become acquainted with her in 1834, while she was staying at Broadstairs with her mother, the Duchess of Kent, to whom he had been able to show courtesy by placing at her disposal the secluded grounds of his house near that seaside resort.

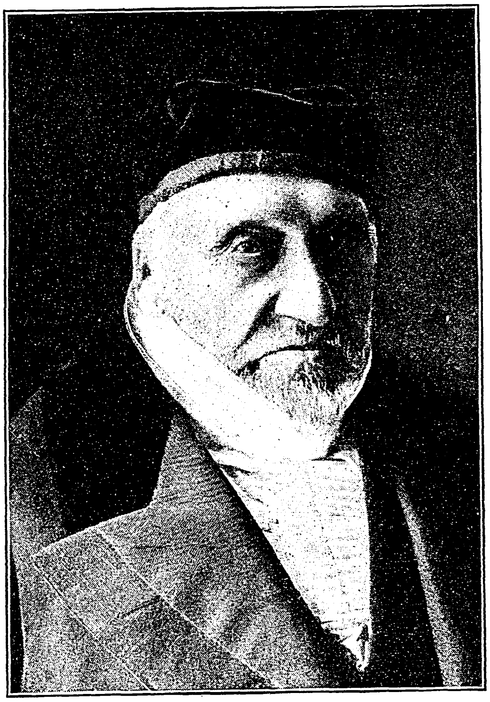
Dignities.

In 1846 he was created a baronet, and in 1847 became high sheriff for Kent. He was a deputy lieutenant and a magistrate in more than one jurisdiction. At an earlier period of his life (1810-

1814) he had been captain in the Surrey local militia and practised assiduously the bugle calls and drill. In part he owed his stately bearing to these early days of military training.

While Sir Moses was winning wealth and social distinction, he was living the life of a most pious and observant Jew. His diaries record his regular attendance at the synagogue, his scrupulous performance of the functions of a member of the ancient Society of Lavadores, which made it a sacred duty to perform the last rites for members of the synagogue; and they show also that under great difficulties he strictly complied with the dietary laws as well as with those which enjoin rest and forbid travel upon Sabbaths and festivals. In pursuance of inflexible principle, he resisted all attempts at congregational reform. The following is an account in his own language of his life in 1820:

"With God's blessing, rise, say prayers at 7 o'clock. Breakfast at 9. Attend the Stock Exchange, if in London, 10. Dinner, 5. Read, write, and learn, if possible, Hebrew and French, 6. Read Bible and say prayers, 10. Then retire. Monday and Thursday mornings attend the Synagogue. Tuesday and Thursday evenings for visiting." "I attended," he says on another occasion, "many meetings at the City of London Tavern, also several charitable meetings at Bevis Marks, in connection with the Spanish and Portuguese Synagogue; sometimes passing the whole day there from ten in the morning till half-past eleven at night (Jan. 25, 1820), excepting two hours for dinner in the committee-room; answered in the evening 350 petitions from poor women, and also made frequent visits to the Villa Real School."



M. Montefiore

(From a photograph when 100 years old.)

He cooperated also with the Rothschilds and the Goldsmids in the movement for parliamentary emancipation of the Jews. In 1814 he became treasurer of the Sephardic Synagogue in London, and in due course passed through all its highest offices, being six times warden-president. From 1838 to 1874 he was president of the Board of Deputies of British Jews; and on his retirement £12,000 was subscribed as a testimonial to him and was used by his wish in aid of building industrial dwellings at Jerusalem. His time in office was vigorously employed in the relief of his suffering brethren.

Visits to Palestine.

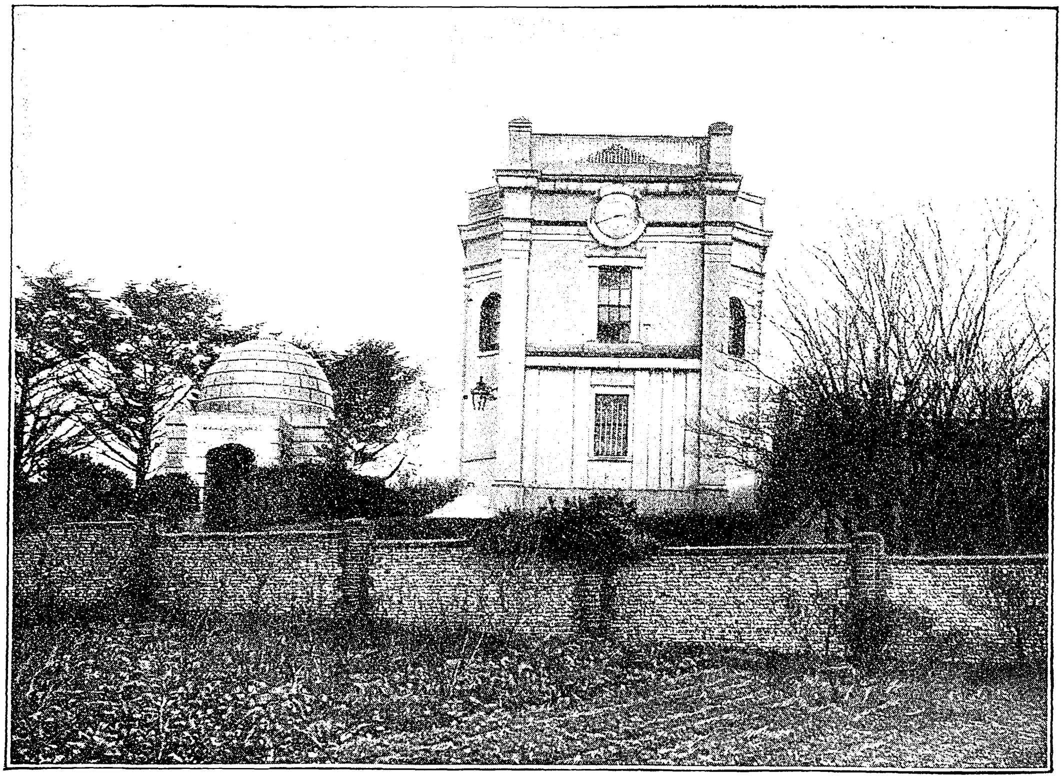
Visits Morocco.

Seven times Sir Moses Montefiore visited Palestine, in 1827, 1838, 1849, 1855, 1857, 1866, and 1875; being accompanied by his wife each time before her death in 1862, and making the last journey when he was ninety-one years old. Another regular companion was Dr. L. Loewe, who became his literary executor. In the Holy Land he endowed hospitals and almshouses, set on foot agricultural enterprises, planted gardens, and built synagogues and tombs. He not only gave bounteously of his own means, but administered public and private subventions, among others a fund bequeathed by Judah Touro of New Orleans, who left $50,000 to be applied, as Sir Moses thought fit, for the benefit of the Jews in the Holy Land. The events of these journeys were carefully narrated in his own diaries and in those of Lady Montefiore, some of which have been published in full, while others have unfortunately been destroyed, though not till extracts from them had been printed. Besides passing references to interesting personages whom the travelers met, the diaries furnish incidentally a history of the gradual development of the means of travel. In their early adventures the courageous couple encountered serious dangers; even in England they were shot at, presumably by highwaymen, on the Dover Road. But they were not deterred by the fears of slavery and imprisonment which then beset travelers in the East, or by breaking ice or by wolves in Russia. On one of his journeys (1840) Sir Moses obtained from the Sultan of Turkey a firman denouncing the inveterate charge of ritual murder brought against the Jews. He obtained promises of friendliness from two czars (1846 and 1872), crossed the desert of the Atlas and at the age of seventy-nine won for his brethren the favor of the Sultan of Morocco; made an unsuccessful journey to Rome to obtain the return to his parents of the boy Mortara (1858), and went to Rumania (1867), where he presented himself at an open window to a mob at the imminent risk of his life. It was at the age of seventy-six that he went to the office of the London "Times" after midnight, with a letter soliciting relief for the Christians of Syria. His own contribution was £200, and he collected over £20,000. The affection which his magnetic personality and his native goodness inspired can not be exaggerated. In Palestine

His Popularity.

his brethren flocked to kiss the hem of his garment. On his entering into his one hundredth year (Nov. 8, 1883) Queen Victoria, Albert Edward Prince of Wales, and many hundreds of his most distinguished fellow, citizens sent telegrams of congratulation. The birthday was a public festival at Ramsgate, where he passed the evening of his days.

Sir Moses was buried at Ramsgate, near the synagogue he had founded, side by side with his wife in the mausoleum which he had erected for the purpose, a reproduction of the building known as the Tomb of Rachel on the Bethlehem road. By his will (proved at £370,000) he directed the continuance of many and various charities, and among others added to the endowment of the Montefiore College and Library, Ramsgate, which he had first established in memory of his wife. The college is now devoted to a few learned men who spend their days in the study of the Law. For a time an institution for younger students was also maintained, but the trustees in lieu thereof make an annual subvention to Jews' College, London.



Synagogue and Tomb of Sir Moses Montefiore, Ramsgate, England.
(From a photograph.)

Sir Moses Montefiore had no children; but the baronetcy was revived by the crown in favor of Francis Montefiore, grandson of Abraham, Sir Moses' brother and partner; while his seat at Ramsgate became by his will the property of Joseph Sebag (afterward Sir Joseph Sebag-Montefiore), son of Sir Moses' sister.

J. I. Da.

Nathaniel Montefiore: English communal worker; second son of Abraham Montefiore and Henrietta, daughter of Mayer A. de Rothschild; born in London 1819; died there 1883. He married Emma, the youngest daughter of Sir Isaac Lyon Goldsmid. He was trained for the medical profession at Guy's Hospital and was elected a member of the Royal College of Surgeons in 1858. He did not establish a practise, but used his medical knowledge for the benefit of the inmates of the Beth Holim Hospital, an ancient charity of the Spanish-Portuguese Jews of London of which he was treasurer for over a quarter of a century. He filled also numerous other communal offices. He was president of the Jewish and General Literary Institution, in Leadenhall street, which was known as "Sussex Hall"; president of the Jews' Infant Schools; and president of the Jews' Emigration Society. But most of his communal work was in connection with the Spanish-Portuguese congregation, to which most members of his family belonged. He served as senior warden of the congregation, president of the board of elders, president of the Gates of Hope school, and representative of the congregation on the Board of Deputies. He was buried in the Balls Pond Cemetery of the West London Reform Synagogue, by the side of his son Leonard.

MONTÉLIMAR (Hebrew, איימר or מונטיל אדמר): Capital of the department of the Drome, France. A large number of Jews lived here from the beginning of the fourteenth century. They possessed a synagogue in the Rue du Puits-Neuf, formerly the Rue de la Juiverie, as well as a school situated near the Porte Saint-Martin, a cemetery, and a slaughter-house, the privilege of maintaining the latter being ratified by the Dauphin Louis in 1455.

The condition of the Jews of Montélimar was comparatively prosperous. The following were the principal men among them during the fourteenth and fifteenth centuries: Solomon, Isaac Maignan, Lionel de Livron, Josse Nercas, Isaac de Lattes, Solomon Massip, Isaac Saul de Mornas, and Bonsenhor Bonafossa. In 1339 and 1340 Samuel ben Judah of Marseilles revised at Montélimar his Hebrew version (made in 1324) of the "Treatise on the Soul" by Alexander Aphrodisius, a work which had been translated from Greek into Arabic by Isaac ibn Hunain.

In 1439 the lords of Montélimar required the Jews of the city to wear the badge, from which the toleration of the consuls had hitherto exempted them; and this decree was renewed two years later by Jean de Poitiers, Bishop of Valence. In 1453 the Jews were commanded to attend Christian worship, and a preacher was appointed to convert them to Christianity. After this the Jewish community gradually lost its importance; and in 1468 it contained but seven families, which, on account of accusations—admitted to be false by the parliament of Grenoble—were maltreated by the inhabitants and expelled from the city in that year.

MONTEZINOS, ANTONIO DE (AARON LEVI): Marano traveler of the seventeenth century. He claimed that while journeying in South America about 1641 near Quito, Ecuador, he met with savages who practised Jewish ceremonies and recited the SHEMA' and who were of the tribe of Reuben. He met other savages of the tribe of Levi. Going to Holland in 1644 he told this story to Manasseh ben Israel; the latter repeated it to Thomas Thorowgood, by whom it was printed in his "Jews in America," pp. 1-9 *et seq.* It was also published by Manasseh ben Israel in his "Hope of Israel," pp. 1-7.

MONTEZINOS LIBRARY: Division of the library of the Portuguese Rabbinical Seminary 'Ez Hayyim at Amsterdam, Holland. It was bequeathed in 1889 by D. R. Montezinos (b. Dec. 6, 1829), the well-known bibliophile of that city, and was dedicated on April 10, 1891, after the seminary had enlarged its structure in order to accommodate the valuable collection.

The Montezinos Library consists of 20,000 volumes of Hebraica and Judaica, including a number of incunabula and about seventy volumes of responsa. Besides, it contains more than 1,000 pamphlets and about 300 portraits of Jewish celebrities. The collection includes a number of very rare Hebraica and Judaica, several of which are not recorded by Jewish bibliographers. Among its manuscripts are to be found a few by Isaac Cohen Belinfante, Isaac Sasportas, and David Franco Mendes.

Montezinos, who for some time was in charge of the 'Ez Hayyim library, supervised the arrangement of the entire library of the seminary, when his collection was added to it.

MONTGOMERY. See ALABAMA.

MONTH (Hebrew, "yeraḥ," "ḥodesh"; plural, "yeraḥim," "ḥodashim"): A unit of time; the period between one new moon and another. According to the account of Creation in Genesis, it was decreed that the "lesser light" should "rule the night" and serve "for signs and for seasons" (Gen. i. 14). The Psalmist also says, "He appointed the moon for seasons" (Ps. civ. 19). In round numbers thirty days constituted a month, as is evident from the Flood narrative, counting 150 days for five months from the 17th of the second to the 17th of the seventh month (Gen. vii. 11, 24; viii. 4); and the mourning period, reckoned as a full month in Deut. xxi. 13, is elsewhere fixed at thirty days. That twelve months constituted a year also is evident from the Flood narrative (Gen. viii. 5-13).

Undoubtedly there was an occasional interpolation of an extra month to correct the lunar year to the solar cycle; and it is evident from the fact that the festivals named in given months—such as Passover, Pentecost, and Tabernacles—all had to do with crops, and therefore solar seasons, that this correction to solar time is of the highest antiquity. The relation of the months to the signs of the zodiac is a further evidence that the solar-lunar year was employed.

From the first Babylonian exile the Jews adopted the Babylonian names of the months (R. Ḥanina, in Yer. R. H. i. 2). Prior to the Exile the months were designated partly by names and partly by numbers. Thus Nisan was called "Abib" (Ex. xii. 2), Iyyar = "Ziw" (I Kings vi. 1, 37), Tishri = "Yeraḥ ha-Etanim" (*ib.* viii. 2), and Ḥeshwan = "Yeraḥ Bul" (*ib.* 6, 38). The Babylonian name "Ara-aḥ-sham-nu" means the eighth month = ירח־שמיני. According to Ḳimḥi, מרחשון is transposed from (י)רח־שמון. The pronoun "Mar" was at a later period sometimes dropped, leaving the name "Ḥeshwan."

The following names of the months are mentioned in post-exilic Biblical writings: Kislew, the seventh month, and Shebaṭ, the eleventh month, in Zech. i. 7, vii. 1; Kislew, Nisan, and Elul in Neh. i. 1, ii. 1, vi. 15; Nisan, Siwan, Ṭebet, and Adar, the twelfth month, in Esth. ii. 16, iii. 7, viii. 9. The months Tishri, Marḥeshwan, Iyyar, Tammuz, and

Ab are not mentioned in the Bible, but are found in the Talmud. Tishri is characterized as the month of the birth of the Patriarchs; Ṭebet, as the month of marriages (Meg. 13a); Nisan, as the month of coronations (Shab. 87b); Adar, as that of rejoicing; and Ab as the month of mourning (Ta'an. 26b, 29a). In the Middle Ages Elul became the month of repentance. See Almanac; Calendar; New Moon; Zodiac.

Table of the Jewish Months.

MONTI, ANDREA DI. See Joseph Ẓarfati.

MONTICELLI: Small town in the province of Piacenza, northern Italy, with a Jewish community dating from the expulsion of the Jews from the duchy of Milan in 1597. The first settlers were the Soavi and Sforni families of Cremona. The community brought its German ritual from Lombardy, and has retained it until the present time. A society for nursing and for study, entitled "Ḥebrat Biḳḳur Ḥolim," founded in the sixteenth century, is also still in existence. In 1865 the Jewish inhabitants numbered 143; but in 1901 they had become reduced to 32. Flaminio Servi officiated as rabbi in 1863.

G. I. E.

MONTORO, ANTON DE: Spanish poet of the fifteenth century; born in Montoro 1404; died after March, 1477; son of Fernando Alfonso de Baena Ventura, and a near relative of the poet Juan Alfonso de Baena. His vocation was that of a "ropero"; he calls himself "el Ropero" or "Aljabibe," both signifying a dealer in old clothes. When advanced in years he was baptized, but despite his baptism he remained a Jew at heart throughout his life; and in a poem to a magistrate in Cordova, his place of residence, he laments that, driven by hunger, he had had to break the oath of his ancestors and buy pork, as he found no other meat in the butcher's shop. Even in his old age he took a lively interest in his persecuted coreligionists. Thus he addressed a pathetic complaint to King Henry IV. in reference to the plundering of the houses of the Maranos of Carmona in 1474.

Anton de Montoro, who was welcomed by the noblest families of Cordova, and whose verse was valued highly by some of the best poets of his time, as by the Marquis de Santillana, Juan de Mena, etc., was treated with contumely by poets of his own race. At sixty-five he wrote a poem to Queen Isabella in which he complains that he is still treated as a Jew and called "the old, contemptible Jew." Commendador Roman, who posed as a pious Christian, taunted Montoro with the fact that his father had been a ḥazzan; Juan de Valladolid, Rodrigo Cota, and others scorned him because of his former faith. He was in high favor with D. Pedro de Aguilar and with his son D. Alonso Fernandez de Aguilar, the noble protector of the Maranos, whom he celebrated in several poems. After the persecution of the Maranos in March, 1473, Anton de Montoro, who was also made to suffer under this calamity, found protection and refuge with D. Alonso de Aguilar. He settled in Seville, but soon returned to Cordova, where, old and weak, he made his will March, 1477, and soon afterward died. His poems were collected by Emil Cotarelo y Mori, and published with an excellent introduction and valuable notes under the title "Cancionero de Anton de Montoro" (Madrid, 1900).

MONTPELLIER (Hebrew, מונטפשליר or מונפשליר): Capital of the department of Hérault, a part of the old province of Languedoc, France. It is sometimes called also "Har Ga'ash" = "Mountain of Trembling," "Har ha-Niḳra Pissulano" = "Mount Pessulanus," or simply "Har" = "Mountain." In the Middle Ages Montpellier was divided into two distinct cities, one being the capital of the Guillems, and the other the fief of the bishops of Maguelone. One of the most important communities of Languedoc existed here from the second half of the eleventh century. Through their relations with their coreligionists all over the world, the Jews of Montpellier helped enormously to build up the commerce of the city; and they at the same time contributed largely to the development of the school of medicine established there in the twelfth century. Guillem VIII., Lord of Montpellier, granted them in 1180 the right to practise medicine; and the kings of

School of Medicine.

Aragon and Majorca, James I and James II., merely added (in 1272 and 1281 respectively) the proviso that the Jewish physicians must pass the regular examinations before exercising their profession. The progress made by these Jewish physicians was such that in 1300, according to Astruc ("Mémoires pour Servir à l'Histoire de la Faculté de Médecine de Montpellier," p. 168), the Jew Jacob b. Machir, called "Don Profiat" (Latin, "Profatius Judæus"), was appointed regent of the faculty of medicine. James I. interested himself in the Jews on many occasions, especially in 1252, 1266, and 1268, and confirmed them in all the privileges which they had enjoyed under his predecessors.

These fortunate conditions changed in 1292, when Bérenger of Frédol, Bishop of Maguelone, ceded to King Philip the Fair of France the Jews then living in his territory. They were expelled in 1306, but returned to Montpellier in 1319, having been recalled by King Sancho, who protected them in 1320 against the fury of the Pastoureaux. On demand of the consuls, King John of France compelled the Jews in 1363 to wear the Jews' badge. In 1368 the same consuls forbade them to drink or to draw water from any well other than that which had been assigned to them ("Petit Thalamus," pp. 166–167). Finally, a royal edict issued on Sept. 17, 1394, put an end to the existence of the Jewish community of Montpellier.

In the sixteenth century a number of Marano fugitives from Spain fled to Montpellier. The physician Felix Platter of Basel, who resided in the city from 1552 to 1559, knew several of these Maranos, whom he mentions by name and whose customs he describes (autobiography of Felix Platter, ed. Fechter, Basel, 1840). In the seventeenth century some Jews from the Comtat-Venaissin joined the Spanish refugees. The parliament of Toulouse authorized them at first to remain at Montpellier for one month only in each of the four seasons; but thanks to the tolerance of the consuls, the assistance of the Marquis of Grave, proprietor of the markets of Pont-Juvénal, and, especially, the protection of Louis Basil of Bernage, commissary of Languedoc, the Jews, in spite of the most bitter complaints of the Christian merchants, established themselves definitely in the city. In the beginning of the nineteenth century the Jewish community numbered 105 persons.

Jewish Quarter.

The site of the Jewish quarter was often changed. At first it was near the synagogue and the Jewish baths (traces of which still exist in Rue Barralerie No. 1), extending northward as far as the tolerance of the kings of Majorca permitted. The Jews acquired some houses near the square of Castel-Maton, and spread themselves as far as the right side of Rue Vieille-Intendance. By order of the Duke of Anjou in 1365 they were restricted to the Rue de la Vacherie ("Vacaria"), near the gate of La Saunerie. In this street was the synagogue which the Bishop of Montpellier permitted the community, on the representations of Hélias of Loan and Samuel Caylli, to erect in 1387, in consideration of the payment of 400 pounds Tours currency. Finally, in the beginning of the sixteenth century the Jews established themselves in the blind alley of the Vieux Consulat, called "Juiverie" or "Juzétarie," which has now disappeared.

The Jews owned successively two cemeteries. One of these was situated between the gates of La Saunerie and St. Guillem. In 1263 James I. presented it to the Cistercians of Valmagne, who established a theological college there. The other cemetery was in the suburb of Villefranche, between the present seminary and Boutonnet. It was sold in 1306 by Philip the Fair; but in 1319, by permission of King Sancho, the Jews of Montpellier repurchased it. In 1287 James I. permitted the Jews to establish their own slaughter-house. A police regulation of 1364 forbade the Christian butchers to sell or to permit the sale of meat to the Jews ("Petit Thalamus," p. 166).

Rabbinical Schools.

Benjamin of Tudela, who visited Montpellier in 1165, speaks in terms of the highest praise of the scholars of that city, who devoted themselves to the study of the Talmud. The Jewish school was a very important one. It was compared to the Sanhedrin of Jerusalem ("Har ha-Bayit"; "Temim Deim," No. 7) and to the great school of Granada ("Rimmon Sefarad"; Neubauer, "Cat. Bodl. Hebr. MSS." p. 17), and was sometimes called "the Holy Mountain," "the Mother of Israel" ("Har ha-Ḳodesh," "Em le-Yisrael"; Solomon ben Adret, Responsa, i. 418). This school issued the first anathema against the writings of Maimonides. In 1232 Rabbi Solomon b. Abraham together with two of his pupils, Jonah b. Abraham Gerundi and David b. Saul, prohibited the "Moreh Nebukim." He even went so far as to invoke the ecclesiastical authorities against his adversaries and to denounce Maimonides' work as impious and injurious to the Christian faith. But the only result was that the adversaries of Maimonides were declared to be calumniators; and it is said that some of them were condemned to have their tongues burned.

After a time, however (1303–6), the battle against Maimonides' writings waged afresh. The chief author of the new attack was another rabbi of Montpellier, Abba Mari of Lunel. Two of his partizans, Todros of Beaucaire and Simeon b. Joseph, called "En Duran of Lunel," signed, together with twenty-four notables of the community of Montpellier, the letter which he addressed to Solomon ben Adret of Barcelona. But Abba Mari found even at Montpellier bitter opponents, in the above-mentioned Jacob b. Machir, in the physician Solomon of Lunel, in Judah b. Moses ibn Tibbon, and especially in Jedaiah ben Abraham Bedersi, one of Maimonides' most enthusiastic admirers. The controversy was carried on bitterly by both sides, and it was stopped only by the cruel persecutions attendant on the expulsion of the Jews from France by Philip the Fair in 1306.

In addition to those that have been referred to above, the following scholars of Montpellier should be mentioned here: Abraham b. David of Posquières (RABaD III.), Moses b. Samuel ibn Tibbon, Judah (Aryeh) Harari, Elijah, Levi b. Abraham of Villefranche, Reuben b. Isaac, Aaron b. Joseph ha-

Levi, and Abraham Bonet b. Meshullam b. Solomon Abigdor.

In 1902 there were from thirty to thirty-five Jewish families in Montpellier, subject to the authority of the consistory of Marseilles.

MONTREAL: Metropolis of the Dominion of Canada, situated on an island in the St. Lawrence River; the most important center of Jewish population in British North America. In 1901 the Jewish population of Montreal was 6,790. Owing to the large influx of settlers from eastern Europe since that date the present (1904) Jewish population is about 13,500 in a total population of 370,000, including the suburbs. For the history of its community see Jew. Encyc. iii. 524 *et seq.*, *s.v.* Canada. In religious, philanthropic, and educational work the Jews of Montreal have shown much activity, and their communal organizations are numerous and important. The first congregation was founded in 1768, but it was not until 1858 that the community had grown sufficiently large to support a second synagogue. In 1882 a third congregation was formed, and between that year and the present (1904) the growth of the community has been so rapid that eleven other congregations have been organized; some of these have a large membership, and possess commodious synagogues, while some have hardly passed the formative stage. In the western part of the city are the places of worship of the congregation of Spanish and Portuguese Jews, Shearith Israel (organized in 1768); of the English, German, and Polish congregation, Shaar Hashamayim (1858); and of Temple Emmanuel (1882). Other congregations are the B'nai Jacob (Russian; 1885), the Beth David (Rumanian; 1888), the Shaaré Tefilla (Austro-Hungarian; 1892), and the Chevra Kadisha (1893). The more recently established congregations are: the Beth Hamidrash Hagadol, Chevra Shass (1894), the Aavath Achim (1896), the K. K. Ohel Moshé (1902), the Chevra Tillim (1902), the Beth Israel, Chevra Shass (1903), the K. K. Adath Jeshurun (Galician; 1903), the Kether Torah (1903), and the Tifereth Israel (1904). All the congregations are Orthodox with the exception of Temple Emmanuel, whose founders introduced Reform when the congregation was organized.

Congregations.

Education.

The secular education of Jewish children in the Province of Quebec is provided for by a bill passed by the legislature in 1903. By the "Provincial Education Act" Protestant and Catholic school commissioners maintain separate public schools. Previous to 1903 Jews were given the option of contributing their taxes to either the Protestant or Catholic panel. Generally they paid their taxes into the former, and sent their children either to the Protestant public schools or to Jewish schools subsidized by the commissioners. So long as the number of Jewish pupils formed but a small ratio of those attending, there were no difficulties, but with the growth of the population serious differences arose. The law attributed the tax to the landlord, whether paid by him or by the tenant, and as the ratio of Jewish landowners was small, this led to the claim that the Jewish contribution to the tax was not in proportion to the number of Jewish pupils attending the schools of the Protestant Board. Although the Protestant commissoners continued to receive Jewish pupils at their schools, they declined to acknowledge any obligation to educate children of the Jewish faith whose parents were not owners of immovable property subject to taxation for school purposes; and they claimed the right to refuse to receive Jewish pupils in the event that the schools should become too crowded.

A crisis was provoked when a scholarship won by a Jewish pupil was withheld by the Protestant commissioners. The case was carried into the courts in 1903, and the validity of the Protestant commissioners' contention was judicially established. Vigorous measures were promptly taken to alter an act which was so opposed to the full civil rights secured to the Jews by the act of 1831. Public opinion was unanimous in demanding that the anomalies of the law should be corrected. A committee of the Jewish Educational Rights Movement, representative of every section of the community, waited on the government, and with the cooperation of the Protestant commissioners a law was passed in April, 1903, enacting that all Jews were to pay their taxes into the Protestant panel and enjoy equal rights with the Protestants in the schools under the Protestant commissioners. A conscience clause was provided protecting Jewish children in their religious observances.

In addition to those that attend the ordinary public schools a large number of Jewish children are educated at the school attached to the Baron de Hirsch Institute; they receive instruction in Hebrew and in secular subjects, the cost in the case of the latter being assumed by the Protestant Board. A night-school is also connected with the Baron de Hirsch Institute. The Talmud Torah Association (founded 1896) maintains a large school for the training of children in Jewish religion and history and in the Hebrew language. Instruction in these subjects is imparted also in the several schools supported by the congregations.

The Jewish philanthropic organizations of Montreal are numerous. The excellent work performed by The Baron de Hirsch Institute and Hebrew Benevolent Society in relieving distress and assisting immigrants has been mentioned in the article Canada, referred to above. Other associations which have performed important charitable work are the Ladies' Hebrew Benevolent Society (founded 1877), the Ladies' Chevra Kadisha (1878), the He-

Organizations.

brew Sick Benefit Association (1892), the Hebrew Benevolent Loan Society (1893), the Hebrew Young Ladies' Sewing Society (with Diet Dispensary; 1894), the Hebrew Ladies' Aid Society (1894), the Charity Society of the Chevra Tillim (1898), and the Jewish Endeavor Sewing School (1902). Several of the congregations maintain their own aid societies and sewing circles.

Montreal is the headquarters of the Federation of Zionist Societies of Canada, and in 1904 supported six local branches of the movement. Among other communal organizations are four lodges of the Independent Order of the Sons of Benjamin, the Montreal Lodge of B'nai B'rith, the Zion Cadet Corps and Jewish Lads' Brigade, the Montefiore Club, the Maimonides Literary Circle, the Gereuth Circle, the Young Men's Hebrew Association, and the Montreal Branch of the Jewish Theological Seminary; the Anglo-Jewish Association maintained a branch in Montreal from 1881 to 1891, and the Kesher Shel Barzel supported a lodge from 1872 to 1890. In 1895 the Montreal Chovevei Zion Society No. 2 purchased 4,000 "duman" of land in Palestine, east of the Jordan, for colonization; this land, however, was afterward transferred to other hands. Several other philanthropic and literary societies established in the earlier days of the community have been replaced in their activities by later organizations.

A. C. I. de S.

MONUMENTS IN THEIR BEARING ON BIBLICAL EXEGESIS: For centuries the evidence of the authenticity of the Old Testament Scriptures had to be sought from within; of contemporaneous external testimony there was practically nothing. All this is now changed. The civilized nations by whom Israel was surrounded have risen, as it were, from the dead, and there is at hand as much information about the culture of Egypt and western Asia in the Mosaic age as about the culture of Athens in the age of Pericles. The books of the Old Testament are taking their place as part of a vast and ever-increasing literature which explains and illustrates them and at the same time affords the only sure and certain test of their veracity.

The belief that the use of writing for literary purposes was of comparatively late date has been swept away forever. There were schools and libraries in Egypt and Babylonia long before Abraham was born. Under the dynasty of Hammurabi or Amraphel, the contemporary of Abraham (Gen. xiv. 1), Babylon was the center of a great literary movement. Old literary works were reedited, and new poets and writers arose who cast the ancient legends and traditions of the country into literary form. In Egypt there was already an extensive literature, and "The Proverbs of Ptah-ḥotep," of which there is now a copy in the Louvre, Paris, was written in the time of the Old Empire or at least as early as 3,000 B.C.

El-Amarna Tablets.

The Mosaic age, accordingly, belongs to a late epoch in the history of Oriental literature; and there is no need for surprise at finding that it was emphatically an age of readers and writers, of schools and students, of books and correspondence. The cuneiform tablets discovered in 1887 at Tell el-Amarna in Egypt have shown that from one end of the civilized world to the other letters were being constantly sent, sometimes on the most trivial of matters; that Canaan was the center of the correspondence; and that it was carried on in the language and script of Babylonia. As the language of Babylonia was not that of most of the writers it is evident that schools must have existed throughout the civilized world of the East in which the foreign language and writing were taught and learned, as well as libraries in which Babylonian books and the native archives could be preserved. Indeed, among the El-Amarna tablets fragments of Babylonian literary works have been found, some of which were used for purposes of study. Fragments of dictionaries have also been discovered. When it is remembered that among the correspondents of the Egyptian court are Bedouin sheiks and a Canaanitish lady, an idea may be formed of the extent to which education had spread. At all events Moses could have written the Law, and some at least of the Israelites could have read what was written. Moreover, there was plenty of material in the libraries of Canaan, not to speak of those of Egypt and Babylonia, with the help of which the historian could have compiled a truthful history of the past. Urusalim, or Jerusalem, and Gezer, more especially, are prominent in the El-Amarna letters.

From the Babylonian inscriptions it has been learned that in the Abrahamic age Canaan was a province of the Babylonian empire, and that colonies of "Amorites," as its inhabitants were called, were settled in Babylonia itself. One of the witnesses to a contract dated in the reign of Hammurabi's grandfather is an "Amorite," the son of Abiramu or Abram. For some years Babylonia had been under the domination of Elam, and Eri-aku or Arioch, the son of an Elamite prince, had been established at Larsa in the south of the country, but Hammurabi in the thirty-second year of his reign at last succeeded in shaking off the Elamite supremacy and in ruling over a united Babylonian empire. The Babylonian monuments have proved that the migration of Abraham was no isolated or unusual event; and they have further proved that the political position described in Gen. xiv. is in strict accordance with fact. They have also shown that Babylon was at the time under the rule of kings who belonged to the western branch of the Semitic race, who revered the god Samu (Sumu) or Shem, and who spoke a language resembling those of Canaan and southern Arabia rather than that of Babylonia. Canaanites were settled in Babylonia; and among them are found the names of Abram (Abi-ramu), Jacob (Ya'ḳub-ilu), and Joseph (Yasupu-ilu).

In the sixteenth century B.C. Canaan passed from the Babylonians to the Egyptians. The kings of the eighteenth dynasty made it an Egyptian province, so that Canaan became for a while the political brother of Mizraim and Cush. The same close intercourse which in the Abrahamic age had existed

Canaan Under the Egyptians.

between Canaan and Babylonia now existed between Canaan and Egypt. In Egypt itself the land of Goshen has been rediscovered by Professor Naville. It lay in the Wadi Tumilat on the southeastern border of the Delta, in touch with Asia, and separate from the cultivated land of Egypt proper. The Pharaoh Me(r)neptaḥ states that it had been handed over as pasturage to "foreign" herdsmen from the south of Canaan. Naville has discovered the site of Pithom also, now Tell el-Maskhuṭa, in the district of Succoth (Thukut) and on the edge of the land of Goshen. It was built by Rameses II., and the store-chambers have been found in which provisions were laid up for the soldiers and travelers who passed into Asia. Rameses II. was the builder also of the city of Rameses (Ex. i. 11), an account of which is given in a papyrus. Zoan, moreover, was restored by him and made one of the residences of the court.

Rameses I., the grandfather of Rameses II., was the founder of the nineteenth dynasty and the representative of a national reaction against the Semitic tendencies of the kings who had immediately preceded him. The Canaanitish officials who had held high places at court were driven away, and the Semitic form of religion which had been introduced by the Pharaoh himself was suppressed. In accordance with this policy, every effort was made to weaken the Semitic settlers who still remained in Egypt. An explanation is thus afforded of the treatment of the Israelites; they were turned into royal bondsmen, and the male children were destroyed. The massacre is referred to in a hymn of victory in honor of Me(r)neptaḥ, the son and successor of Rameses II., which was discovered by Flinders Petrie at Thebes. Here it is said that "the seed" of the "I-s-r-a-i-l-u," or Israelites, had been destroyed, so that the women of Khar or Edom were left, "like the widows of Egypt," without husbands. The hymn was written just after the defeat of the Libyan hordes who had invaded the Delta in the fifth year of Me(r)neptaḥ; and, while all the other peoples mentioned in it have a country assigned to them, the Israelites alone are without local habitation. They must therefore already have left Egypt and not as yet been settled in Palestine. The Exodus was probably effected under cover of the Libyan invasion; Me(r)neptaḥ states that the invaders had encamped at the western extremity of the land of Goshen, where they were in contact with "the foreign" herdsmen, while three years later an Egyptian official writes to the Pharaoh that the district had been deserted and that he had accordingly allowed a fresh body of herdsmen from Edom to occupy it. It may be added that the geographical background of the Exodus as described in the Pentateuch is the eastern Delta as it was in the time of the nineteenth dynasty, and at no subsequent date, and that even the name of Moses appears as "Messu" or "Messui" in the Egyptian inscriptions of that period. There was a Messui, for example, who was governor of Ethiopia in the reign of Me(r)neptaḥ.

The conquest of southern Palestine by a king of Aram-naharaim in the early days of the Judges has been explained by the El-Amarna tablets, from which it has been learned that Aram-naharaim, or Mitanni as it was called by its inhabitants, interfered from time to time in the internal politics of Canaan. The King of Jerusalem refers to its intrigues in his letters to the Egyptian court, and Rameses III., the contemporary of Othniel, includes Mitanni among his enemies.

Biblical Chronology.

A flood of light has been thrown upon the later history of Jerusalem by the Assyrian monuments. The Biblical chronology, so long the despair of historians, has been corrected by means of the synchronisms established between Assyrian and Israelitish history. Shalmaneser II. (858–823 B.C.) made repeated attacks on Hamath and Damascus, and in 853 defeated a league which had been formed by Hamath, Arvad, Ammon, and other states under the leadership of Hadadezer of Damascus, the Ben-hadad of the Old Testament. The decisive battle took place at Ḳarḳar, among the allies being Ahab of Israel, who contributed 2,000 chariots and 10,000 men. Twelve years later Jehu of Beth-omri or Samaria is met with, paying tribute to the Assyrian king. His envoys are represented on a black obelisk now in the British Museum. The capture of Damascus by Assyria in 804 (when Samaria again paid tribute to the Assyrian conqueror) had doubtless much to do with the successes of Jeroboam II. (II Kings xiv. 25, 28). The older Assyrian dynasty was overthrown in April, 745, and the throne seized by Pul, who took the name of Tiglath-pileser III. The Assyrian army was reorganized, and a new policy was entered upon, that of uniting the whole of western Asia under the rule of Nineveh. In 738 tribute was paid to Assyria by Menahem of Samaria and Rezon of Damascus: and the appeal of Ahaz for help in 734 gave Tiglath-pileser a further opportunity of asserting his suzerainty over Palestine. Rezon was blockaded in his capital, while Samaria, Ammon, Moab, and Philistia were overrun. In 732 Damascus was taken, Rezon put to death, and his kingdom placed under an Assyrian prefect: Pekah had already been murdered, and Hoshea, an Assyrian nominee, placed upon the throne, a fine of 10 (?) talents of gold and 1,000 of silver being exacted from him. After this Tiglath-pileser held an assembly of the subject princes; among them was Ahaz, to whom the Assyrian scribes give his full name of Jeho-ahaz (see II Kings xvi. 10). Tiglath-pileser died in Dec., 727, and was succeeded as king by Ulula, who took the name of Shalmaneser IV. The revolt of Hoshea caused him to besiege Samaria; but before the siege was ended he died (Dec., 722), and another usurper, Sargon, made himself king. Sargon soon captured Samaria, and carried the upper and military classes into captivity. The captives amounted in all to 27,280 persons, but only fifty chariots were found in the city. Samaria was now placed under an Assyrian governor.

The death of Shalmaneser had allowed the Babylonians to recover their independence under a "Chaldean" from the Persian Gulf, Merodach-baladan by name. For some years Sargon was too much occupied in fighting against his northern neighbors to turn to the south. But by 711 B.C. his hands were free, and Merodach-baladan accordingly began to look for allies. An embassy was sent to Hezekiah, and an anti-Assyrian league was formed in the west between Judah, Edom, Moab, and Egypt, of which Ashdod (at that time under the suzerainty of Judah, like the rest of Philistia) was the head. But Sargon moved too rapidly for the allies. Ashdod was taken by the tartan or commander-in-chief; the states of southern Syria were compelled once more to pay tribute; and Sargon himself invaded Babylonia. In 709 he entered Babylon in triumph, and Merodach-baladan fled to his ancestral domains.

Assyriological Evidence.

Sargon was murdered in 705 B.C., and his son Sennacherib succeeded him in the following July. In 701 the revolt of Hezekiah and the neighboring princes, who had trusted to Egyptian help, brought Sennacherib to Palestine. The Sidonian king fled to Cyprus; Ammon, Moab, and Edom submitted; Judah was wasted with fire and sword, and Hezekiah alone held out behind the strong walls of Jerusalem. He was, however, compelled to restore to Ekron its former ruler, whom he had imprisoned in Jerusalem in consequence of his faithfulness to Assyria. Tirhakah of Egypt indeed came to Hezekiah's assistance, but was defeated at Eltekeh, and Hezekiah vainly endeavored to buy off his offended suzerain by numerous presents, which included, according to Sennacherib, 30 talents of gold, 800 talents of silver, his Arab body-guard, his daughters, singing men and singing women, and furniture inlaid with ivory. The Jewish king was shut up in his capital, "like a bird in a cage," but suddenly, for reasons which Sennacherib naturally does not state, the Assyrian forces were withdrawn and the rebellious vassal remained unpunished. Sennacherib had to content himself with the presents sent to him at Lachish—the capture and plunder of which are represented in a bas-relief now in the British Museum—and with the spoil of the country districts, 200,150 Jews being carried into captivity.

Sennacherib was murdered by two of his sons in Dec., 681 B.C.; but a battle soon afterward near Malatiyeh placed the crown on the head of Esar-haddon, who formally ascended the throne at Nineveh in May, 680. Esar-haddon adopted a policy of conciliation, one result of which was that Judah returned to its allegiance, and the name of Manasseh appears among his tributaries. Babylon, which had been destroyed by Sennacherib, was restored and made one of the capitals of the empire (see II Chron. xxxiii. 11). The conquest of Egypt was effected by Esar-haddon and completed by his successor, Assurbanipal, in whose reign Thebes, the No-amon of Nah. iii. 8 (R. V.), was razed to the ground.

The inscriptions of Nebuchadnezzar and his successors which have been thus far found contain but few references to political events, and therefore do not touch directly upon the Old Testament. The invasion of Egypt by Nebuchadnezzar, however, is mentioned as taking place in the thirty-seventh year of his reign (see Jer. xliii. 10-13), and there exists a very full account of the conquest of Babylonia by Cyrus, and of the peaceful occupation of Babylon by his general Gobryas. Belshazzar, the eldest son of Nabonid, the last Babylonian king, is also named in the inscriptions; he seems to have been in command of the Babylonian army, and he is found acting as a wool-merchant and paying tithes to the temple of the sun-god at Sippara. The restoration of the various exiles in Babylonia with the images of their gods (or, in the case of the Jews, their sacred vessels) is alluded to by Cyrus in a proclamation issued by him shortly after his occupation of Babylon.

Outside the cuneiform inscriptions the most important illustration of Old Testament history comes from the inscription of the Moabite king Mesha which was discovered at Diban or Dibon in 1868. In this reference is made to the "oppression" of Moab by Omri and Ahab, and to its successful revolt under Mesha and still more successful war against Israel. Mesha describes also his restoration of the ruined Moabite towns, as well as of his capital, with the help of Israelitish captives. See MOABITE STONE; also ASSYRIOLOGY; BABYLONIA; SILOAM INSCRIPTION.

E. C. A. H. S.

MONZON: Town near Lerida in the ancient kingdom of Aragon, Spain. It had a considerable Jewish community, the members of which were engaged in business, especially money-lending. In 1260 Solomon de Daroca was one of the wealthiest Jews in Monzon; he was probably also a farmer of the taxes. He often advanced large sums of money to the court, and received as security the taxes of the Jewries of Monzon and Lerida. In 1262 he appears as leaseholder of the salt-works of Arcos (Jacobs, "Sources," Nos. 221, 249, 336 *et seq.*).

When the Jews of Aragon were called upon to render King James II. pecuniary assistance in his war against Sicily, the Jews of Monzon, by a special agreement with the king, were exempted from contributing. During the bitter persecution of the Jews of Aragon in 1349 the Jews of Monzon fasted and prayed and fortified themselves within the Jewry, which they did not leave until the danger had passed. According to Jewish chronicles, a general massacre of the Monzon Jews took place on the middle days of a certain Passover festival. Some Jews were engaged in playing blind man's buff, when a quarrel arose between them and certain Christians who were passing by. In order to avenge themselves on the Jews, the Christians lodged a complaint against them with the justice, who believed their statements. Without, however, awaiting the results of an investigation the people fell upon the Jews and caused terrible bloodshed, while many children were forcibly baptized ("Shebeṭ Yehudah," p. 39). This massacre occurred probably in 1391, in which year several Jews in Monzon submitted to baptism.

Among the richest Jews in Monzon at that time were the Zaportas, of which family several members were converted. Louis Zaporta's daughter married a son of the first duke of Villahermosa. Jaime Ram, the son of Rabbi Ram (the word "Ram" being formed perhaps of the initial letters of "Rabbi Abraham [or Aaron] Monzon"), was considered one of the leading jurists of his time. The Jewish community of Monzon, which in the beginning of the fifteenth century paid 350 sueldos in taxes, was represented at the Tortosa disputation by Don Joseph ha-Levi and R. Yom-Ṭob Carcosa. The study of the Talmud was pursued with zeal at Monzon; and the rabbinical college there was recognized by Solomon b. Adret as among the foremost of the day. At Monzon lived En-Parid Saladin, who was among Isaac ben Sheshet's opponents when the latter was rabbi in Saragossa; Judah Alshech; Ḥayyim Emtabuch (?), who corresponded with Isaac ben Sheshet; the industrious translator Elijah Ḥabillo; and others.

D. M. K.

MONZON, ABRAHAM (the Elder): Rabbi of the latter part of the sixteenth century; died at Constantinople. He was a pupil of Bezaleel Ashkenazi, and on account of his knowledge and acumen was called by his contemporaries "Sinai we-'Oḳer Harim" = "Polyhistor, and Eradicator of Mountains." He officiated as rabbi first in Egypt, but later went to Constantinople, where he remained until his death. He was an excellent scribe, and wrote many Torah scrolls, which are still extant in Egypt. He was also the author of a large number of decisions and responsa, which are included in great part in the collections of Samuel of Medina (ii. 175 *et seq.*), Solomon ben Abraham Cohen (ii. 5; iii. 2, 20 *et seq.*), Abraham de Boton (Nos. 28, 29), and Joseph di Trani (i. 104, 121, 122, 144; ii. 40). Other responsa of his, as well as his novellæ, his collections of "derashot," and his defense of Vital against Menahem di Lonsano, still exist in manuscript.

MONZON, ABRAHAM (the Younger): Rabbinical and Talmudic scholar of the middle of the sixteenth century. He was originally from Tetuan in Morocco, where he was engaged in commerce. He left that city and settled successively in Algiers, Oran, and Cairo. At Cairo a generous patron enabled him to devote his time to study, while Jonah Nabon of Jerusalem was one of his correspondents. Monzon was the author of the following works, all of which exist in manuscript: "Toẓe'ot Ḥayyim," a reply to the "'Eẓ ha-Ḥayyim" of Ḥayyim Abulafia; "Eshel Abraham," a collection of responsa; "Shulḥan Shabbat," a commentary on the Talmudic treatise Shabbat; and "'Eẓ ha-Da'at," a commentary on the Yoreh De'ah.

MOON.—Biblical Data: The most common Hebrew word for the moon is "yeraḥ," the root of which is probably akin to "araḥ," so that the meaning of the term would be "the wanderer." Poetically, it is called, on account of its whiteness, "lebanah," a term occurring in the Bible three times only (Cant. vi. 10; Isa. xxiv. 23, xxx. 26). The word "ḥodesh," which also occurs thrice (I Sam. xx. 5 and 18; II Kings iv. 23), as its meaning indicates, denotes the New Moon. In the narrative of the Creation, the moon is indicated, without any special name, as one of the two great luminaries. Relatively to the sun, it is "the lesser light to rule the night"; and it is to serve together with the sun for signs, seasons, days, and years (Gen. i. 14, 16). In Ps. civ. 19 it is expressly stated that the moon was created in order to indicate the seasons. Its course, like that of the sun, was stopped by the divine will (Josh. x. 13).

Like the other celestial bodies, the moon was believed to have an influence on the universe. Its injurious influence on man is referred to in Ps. cxxi. 6, which passage probably refers to the blindness which, according to Eastern belief, results from sleeping in the moonlight with uncovered face (Carne, "Letters from the East," p. 77). It was also believed that the moon caused epilepsy (comp. the Greek *σεληνιαζόμενος* and the Latin "lunaticus"; Matt. iv. 24). On the other hand, there are "precious things put forth by the moon" (Deut. xxxiii. 14); that is to say, the growth of certain plants is influenced by it. Steuernagel, however, thinks the allusion is to the dew.

The moon was regarded by all Oriental nations as a divinity, whose worship was forbidden to the Israelites (Deut. xvii. 3). Nevertheless, the latter practised for a long time the cult of the "queen of heaven," making sacrifices to her (Jer. vii. 18, xliv. 17). Kissing the hand on seeing the moon, an act of adoration, is referred to in Job xxxi. 26–27. The moon-shaped ornaments which adorned the necks of the Midianite camels in the time of Gideon (Judges viii. 21, 26) and the "round tires like the moon" of the Israelitish women (Isa. iii. 18) were probably results of the same idolatrous tendency. The moon is frequently used in figurative language: it is the emblem of beauty (Cant. vi. 10) and of eternity (Ps. lxxii. 5, 7; lxxxix. 37). Its eclipse (Isa. xiii. 10, xxiv. 23; Joel ii. 10) and its turning to blood (*ib.* ii. 31) are tokens that the day of God's wrath is near. The light of the moon will be as the light of the sun when Yhwh shall have restored His people to their former state (Isa. xxx. 26). See Calendar; Month.

——**In Rabbinical Literature:** Referring to Gen. i. 16, where the moon and sun are first called "the two great lights" and the moon is then styled "the lesser light," R. Simeon b. Pazzi declared that at the time of the Creation the moon was of the same size as the sun. The moon then objected that it would not be decorous for two kings to use one crown, whereupon God diminished her size. In reply to the moon's question "Ought I to be punished for having spoken reasonable words?" God consoled her by promising that she also should reign in the daytime; and on her objecting that the light of a candle in the daytime was useless, God promised her that the Jews should count the years after the moon. The latter again objecting that the sun served a similar purpose, God consoled her with the idea that certain righteous men would bear the same epithet ("the smaller one"), *e.g.*, Jacob (Amos vii. 5), David (I Sam. xvii. 14), and Samuel ha-Ḳaṭon. The moon, however, remained disconsolate, and God therefore required that a he-goat be sacrificed on the first of every month as a sin-offering for His having diminished the moon's size (Ḥul. 60b). According to R. Johanan, God required that sin-offering for having caused the moon to encroach on the domain of the sun. God appeased the complaints of the moon also by surrounding her with a host of stars, like a veritable queen (Pesiḳ. R. 15; Gen. R. vi. 3–4). R. Ḥanina thinks that at first the sun alone was created to give light, and that God subsequently created the moon because He foresaw that the sun and moon would be worshiped like gods, and He said: "If when they are two, rivaling each other, they are considered as divinities, how would it be if the sun were alone?" (*ib.* vi. 1). The orbit of the moon is, like that of the sun, in the second heaven (*ib.* vi. 9; comp. Heller, "Tosafot Yom-Ṭob" to R. H. ii. 6).

There is a disagreement between R. Judah and the other rabbis as to the setting of the moon and the sun. According to the former, after setting they continue their route above the celestial vault; and it is for this reason that in summer the springs are colder than the surface of the earth. The Rabbis argued that, after setting, both moon and sun travel below the vault and consequently under the earth; and this is why in the winter the springs are not as cold as the surface of the earth (Gen. R. vi. 8). The reason why the Jews count the days of the year by the moon is that, like the moon, which reigns both in the daytime and at night, the Jews have both this world and the future one (*ib.* vi. 2). On this account the eclipse of the moon is considered by the Rabbis as a bad sign for the Jews. The eclipse of the moon and stars is caused by four kinds of sin: (1) forgery, (2) false witness, (3) breeding small cattle in Palestine (for they spoil the land), and (4) cutting down fruit-trees (Suk. 29a). The fact of women spinning their wool or flax by the light of the moon is mentioned several times in the Talmud (Soṭah vi. 1 [= p. 31a]; Giṭ. 89a; *et passim*).

The moon, on account of its monthly reappearance, is considered as the emblem of Israel; the latter, like the moon, undergoing several phases through persecution without being destroyed. Therefore the reappearance of the moon is sanctified, like the entrance of the Sabbath or festivals, by the recitation of benedictions known in the liturgy as "Ḳiddush ha-Lebanah" or "Birkat ha-Lebanah." See New Moon, Blessing of.

S. M. Sel.

MOOS, SOLOMON: German otologist; born at Randegg, near Constance, Germany, July 15, 1831; died at Heidelberg July 15, 1895; educated at the universities of Prague, Vienna, and Heidelberg (M.D. 1856). He settled in Heidelberg and was admitted to the medical faculty of the university there in 1859. In 1866 he was appointed assistant professor. From 1875 he practised otology, and he was elected assistant professor of that science in 1891. He founded the otological clinic hospital and dispensary at Heidelberg, of which he remained chief surgeon and director until his death.

Moos wrote many essays and monographs on his specialty, and conjointly with Knapp founded in 1868 the "Archiv für Augen- und Ohrenheilkunde," which journal now appears in Wiesbaden under the title "Zeitschrift für Ohrenheilkunde." He translated Toynbee's "Diseases of the Ear" under the title "Lehrbuch der Ohrenkrankheiten" (Würzburg, 1863).

Of his works may be mentioned: "Klinik der Ohrenkrankheit," Vienna, 1866; "Anatomie und Physiologie der Eustachischen Röhre," Wiesbaden, 1875; "Meningitis Cerebrospinalis Epidemica," 1881; "Ueber Pilzinvasion des Labyrinths im Gefolge von Einfacher Diphtherie," Wiesbaden, 1887: "Ueber Pilzinvasion des Labyrinths im Gefolge von Masern," *ib.* 1888; "Histologische und Bakterielle Untersuchungen über Mittelohrerkrankungen bei den Verschiedenen Formen der Diphtherie," *ib.* 1890.

Moos was one of the leading otologists of his time. He succeeded in demonstrating that in various infectious diseases microorganisms enter the labyrinth, causing disturbances in the auditory organs and in the equilibrium.

MORAIS, HENRY SAMUEL: American writer and minister; born May 13, 1860, at Philadelphia, Pa.; educated at private and public schools of that city. He received his religious instruction from his father, Sabato Morais. For about twelve years he was a teacher in the schools of the Hebrew Education Society and in the Hebrew Sabbath-schools of Philadelphia. Morais was the principal founder and for the first two years managing editor of the "Jewish Exponent." He edited also "The Musical and Dramatic Standard" (Philadelphia) and "The Hebrew Watchword and Instructor" (*ib.*), and has been a frequent contributor to the Jewish and general press of the United States; he was on the reportorial and special staff of the "Philadelphia Public Ledger" almost four years.

Morais has been successively acting minister of the Mikve Israel congregation in Philadelphia (1897–98) and minister of the Adath Yeshurun congregation, Syracuse, N. Y. (1899–1900 and again 1902–3), and of the Jeshuat Israel congregation at Newport, R. I. (1900–1). He is the author of: "Eminent Israelites of the Nineteenth Century," Philadelphia, 1880; "The Jews of Philadelphia," *ib.* 1894, the most important local history of the Jews in America thus far published; and of various pamphlets.

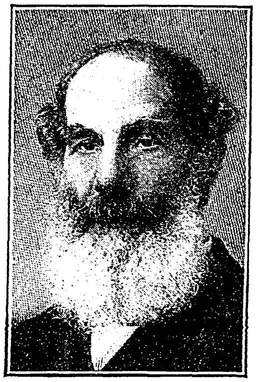
Bibliography: Markens, *The Hebrews in America*, pp. 231–232, New York, 1888.

A. I. G. D.

MORAIS, SABATO: American rabbi; born at Leghorn, Italy, April 13, 1823; died at Philadelphia Nov. 11, 1897. He was the elder son and the third of nine children of **Samuel** and Bona Morais. The Morais family came originally from Portugal, being probably among the large number of Jews who fled thence from the Inquisition. At the time of Sabato's birth Italy was in the thick of her great struggle for freedom. Samuel Morais was an ardent republican, at one time undergoing imprisonment for his political views; and his father, Sabato Morais, was prominently identified with the political movements of his day. Upon young Sabato early rested the responsibility of aiding in the support of the family. While still a child he earned a little by teaching

Early Years.

Hebrew hymns and prayers to other children, meantime pursuing his own studies under Rabbis Funaro, Curiat, and others, and then under his Hebrew master, Rabbi Abraham Baruch Piperno, and gaining honorable mention in belles-lettres under Prof. Salvatore de Benedetti. In addition to Hebrew and Italian, he acquired familiarity with Aramaic, French, and Spanish. He remained at his home studying and teaching until 1845, when he went to London to apply for the vacant post of assistant ḥazzan of the Spanish and Portuguese congregation in that city. Owing to his unfamiliarity with English he was unsuccessful and returned to his home; but in the following year (1846) he accepted an invitation to become Hebrew master of the Orphans' School of the same congregation. Here he remained five years, meantime perfecting himself in English. During this period he formed a close friendship with Joseph Mazzini; and that patriot's struggle for Italian freedom was warmly seconded by Morais.



Sabato Morais.

Elected Ḥazzan in Philadelphia.

In 1850, owing to the withdrawal of Isaac Leeser, the pulpit of the Mickve Israel congregation at Philadelphia, Pa., became vacant, and Morais was an applicant for the post. He arrived in Philadelphia on March 17, 1851, and was elected April 13 following, the synagogue services in the interval being conducted by him. In 1855 he married Clara Esther Weil, who died in 1872, leaving seven children. From the date of his installation as ḥazzan until his death his influence was a continually growing power for conservative Judaism. The synagogue now occupied by the Mickve Israel congregation was built and consecrated during his incumbency. Though his ministry covered the period of greatest activity in the adaptation of Judaism in America to changed conditions, he, as the advocate of Orthodox Judaism, withstood every appeal in behalf of ritualistic innovations and departures from traditional practise, winning the esteem of his opponents by his consistency and integrity. His sermons covered a wide scope of thought and action; and he showed the loftiness of his spirit when, in spite of congregational opposition to the expression of his views during the American Civil war, he continued, both in prayer and in his discourses, to show his warm sympathy with the cause of the slave. In appreciation of his attitude during these trying times the Union League Club of Philadelphia placed him on the roll of its honorary members.

Aids in Founding the Theological Seminary.

When, in 1867, Maimonides College was established in Philadelphia, Morais was made professor of the Bible and of Biblical literature; and he held the chair during the six years that the college existed. For a number of years thereafter he felt the urgent need of an institution for the training of Jewish ministers on historical and traditional lines; and the declarations of the Pittsburg Conference in 1885 urged him to immediate action. After a considerable agitation of the subject he succeeded, in conjunction with a few others, in establishing (Jan., 1886) the Jewish Theological Seminary at New York. He was at once made president of the faculty and professor of Bible, holding both posts until his death. Unquestionably the establishment of the seminary constitutes Morais' most lasting influence upon Judaism in America. The directors of that body have fittingly recognized his memory by naming the chair of Biblical literature and exegesis "the Sabato Morais professorship." In 1887 the University of Pennsylvania conferred upon him the honorary degree of doctor of laws, he being the first Jew so honored by that institution.

His Multifarious Activity.

In addition to the work which he did in official positions, Morais was most active in religious, educational, and charity matters. The Hebrew Sunday-School, Society, the Hebrew Education Society of Philadelphia, and the Young Men's Hebrew Association of that city numbered him among their most steadfast friends. In his own home he gathered about him a small band of young men whom he instructed in Hebrew, Talmud, and Jewish history, and in whom he inspired a zealous love for Judaism which has had a very marked effect upon the character not only of his pupils, but of the community at large. The strong conservatism of the Jews of Philadelphia and the warm interest in the higher things of Judaism evinced by the younger men of that city may be in a large measure directly traced to the influence of Sabato Morais. He was greatly interested in the Alliance Israélite Universelle, and was in constant correspondence with rabbis and scholars in Europe and the Orient. Through his friend Chevalier Emanuel Felice Veneziani, the almoner of Baron de Hirsch, he was enabled to secure timely aid for the agricultural colonies in New Jersey and was the representative of Baron de Hirsch in the Carmel Colony.

When the Russo-Jewish exodus began, in 1882, and Russian Jews in large numbers settled in Philadelphia, Morais immediately became their friend. Although unable to speak their language, his perfect familiarity with Hebrew as a living tongue gave him a ready means of communication. Among Gentiles also he was widely known and esteemed, and was very frequently called upon to address public assemblies.

Besides his sermons, he contributed to Jewish literature much in the form of addresses to various Jewish organizations and of theological, polemical, literary, and critical articles for the Jewish press at home and abroad. He wrote classic Hebrew in prose and in verse with ease and elegance. Among his later works are: a translation of the "Prolegomena to a Grammar of the Hebrew Language," by S. D. Luzzatto (in "Fifth Biennial Report of the Jewish Theological Seminary"); "An Essay on the Jew in Italy" (in "Second Biennial Report" of the same); "Italian Jewish Literature" (in "Publications of Gratz College," 1897). His translation of the Book of Jeremiah for the Bible of the Jewish Publication Society of America was completed shortly before his death.

MORATA, OLYMPIA FULVIA. See Heidelberg.

MORAVIA: Austrian province, formerly part of the kingdom of Bohemia, containing 44,255 Jews in a total population of 2,437,706 (1900). The first historical notice of Jews in Moravia is found in the toll law of Raffelstetten (Jew. Encyc. ii. 322), which mentions Jews who came from Moravia (Dudik, i. 381). This, however, does not prove conclusively that Jews lived in Moravia in the beginning of the tenth century, for its regulations applied probably to traveling merchants who went to Moravia chiefly to buy slaves (Thietmar's "Chronicon," vi. 36, in Pertz, "Monumenta Germaniæ Scriptores," iii. 821; "Vita Sancti Adalberti," in Pertz, *ib.* iv. 586 and 600; Dudik, iv. 211). Jews must have lived in Moravia in the eleventh century, for Cosmas of Prague, the Bohemian chronicler (1040-1125), refers to them on various occasions. He gives the somewhat improbable report that, in 1096, when the Jews, having heard of the approach of the Crusaders, desired to emigrate, Duke Bretislav issued an order for the confiscation of all property belonging to the Jews; for, he said, "they have made their money in the country, and therefore should leave it there" (Pertz, "Scriptores," ix. 103-104; Dudik, iv. 216; D'Elvert, "Zur Geschichte der Juden in Mähren," p. 49, Brünn, 1895; Grätz, "Gesch." vi. 94, 3d ed.). Cosmas reports also that Duke Ladislaus (1109-25) ordered that thereafter (1124) no Christian should serve a Jew, because a certain Jew had taken holy relics from the altar of a church and had thrown them into a sewer. For this crime the Jews were forced to pay 1,000 pounds of gold and 3,000 pounds of silver as ransom (Pertz, *l.c.* ix. 128).

Early Traces.

The attempt which had been made by the territorial lords to wrest from the emperor jurisdiction over the Jews especially affected Bohemia also, as King Ottocar II. (Margrave of Moravia from 1247 and King of Bohemia 1253-78), after the death of Duke Frederick II. of Austria in 1246, claimed succession to the latter's possessions, in which the ducal jurisdiction had been proclaimed in 1244 (Jew. Encyc. ii. 322). In his charter of March 29, 1254, Ottocar promulgated the same law that Frederick had proclaimed for Austria, but omitted the limit of the rate of interest, and added the prohibition against accepting Church vestments as pledges and the provision that a Christian who accuses a Jew of child-murder, and who can not support his charge with the testimony of three Christians and three Jews, shall be punished as the Jew would have been punished. This last provision is identical with one in the bull of Innocent IV. of the same year (Jirecek, "Codex Juris Bohemici," i. 131-143; Roessler, "Prager Stadtrecht," pp. 177-187). A second charter, granted 1268, confirms that of 1254 and adds that, except in the presence of two sworn city officials, the Jews of Brünn shall not be permitted to receive a pledge after nightfall, nor to buy horses or cattle on which there rests a suspicion of theft. They were required to contribute one-fourth of the cost of maintaining the city's fortifications. The last provision was a concession to the rising hostility of the cities against the Jews, a hostility which affected the Jews of Moravia as those of other countries of western Europe until the beginning of the nineteenth century. An undated document promulgated by Ottocar exempts the Jews for one year from all taxes "because they have been mulcted by foreign lords, and because we shall soon derive profit from them, they being of our exchequer" ("Cod. Dipl. Mor." iv. 17-22; Dudik, viii. 232).

The animosity of the Church, which allied itself with the cities against the princes, did not affect the Jews in Moravia at that time. Bishop Bruno of Olmütz did not attend the council of Vienna (Jew. Encyc. ii. 323), held in 1267, which passed resolutions hostile to the Jews; and he absented himself, as Dudik thinks (vi. 40), probably on account of the Jews who were favored by the king in the charter issued the following year. The passing of the country into the hands of the Hapsburgs did not produce any change. King Rudolf ordered (1278) that the Jews of Olmütz, like those of Brünn, should contribute to the city's expenses ("Cod. Dipl. Mor." iv. 218, v. 267; Dudik, viii. 235). Olmütz must have had an important congregation in the twelfth century, for Isaac of Durbalo in his notes to the Maḥzor Vitry quotes a decision which he had heard in that city (Maḥzor Vitry, p. 388, Berlin, 1896-97). The Rindfleisch riots, which started in Franconia in 1298, spread also to Bohemia and Moravia. The Jews intended to flee, but King Wenzel II. (1283-1305) would not permit it. "He spared their lives, but took from them immense wealth" (Chronicle of Königsaal, in Dudik, viii. 218). Perhaps this is an exaggerated report of the sums exacted by the same king for confirming the charter of Ottocar II. about 1300.

Under the Hapsburgs.

While Bishop Bruno of Olmütz became hostile to the Jews, and in a report to Pope Gregory XII. in 1273 complained that they were guilty of violating the Church canons by keeping Christian servants and by accepting Church vestments as pledges, and that they were exploiters of the country as usurers and tax- and mint-farmers, the cities became more favorably disposed toward them, since the kings had ordered that they might be taxed for municipal purposes. Iglau asked even for the privilege of keeping Jews, and the Iglauer "Stadtrecht" restricted to Maundy Thursday the prohibition that Jews may not appear in public during Holy Week (Pertz, "Leges," iii. 426). When King John (1310-46) came to Brünn in 1311 the Jews participated in the festivities, and met the king outside of the city limits (Dudik, xi. 103). In 1322 King Charles IV. gave permission to the Bishop of Olmütz to allow one Jew to settle in each of his four cities, including Kremsir.

Expulsions.

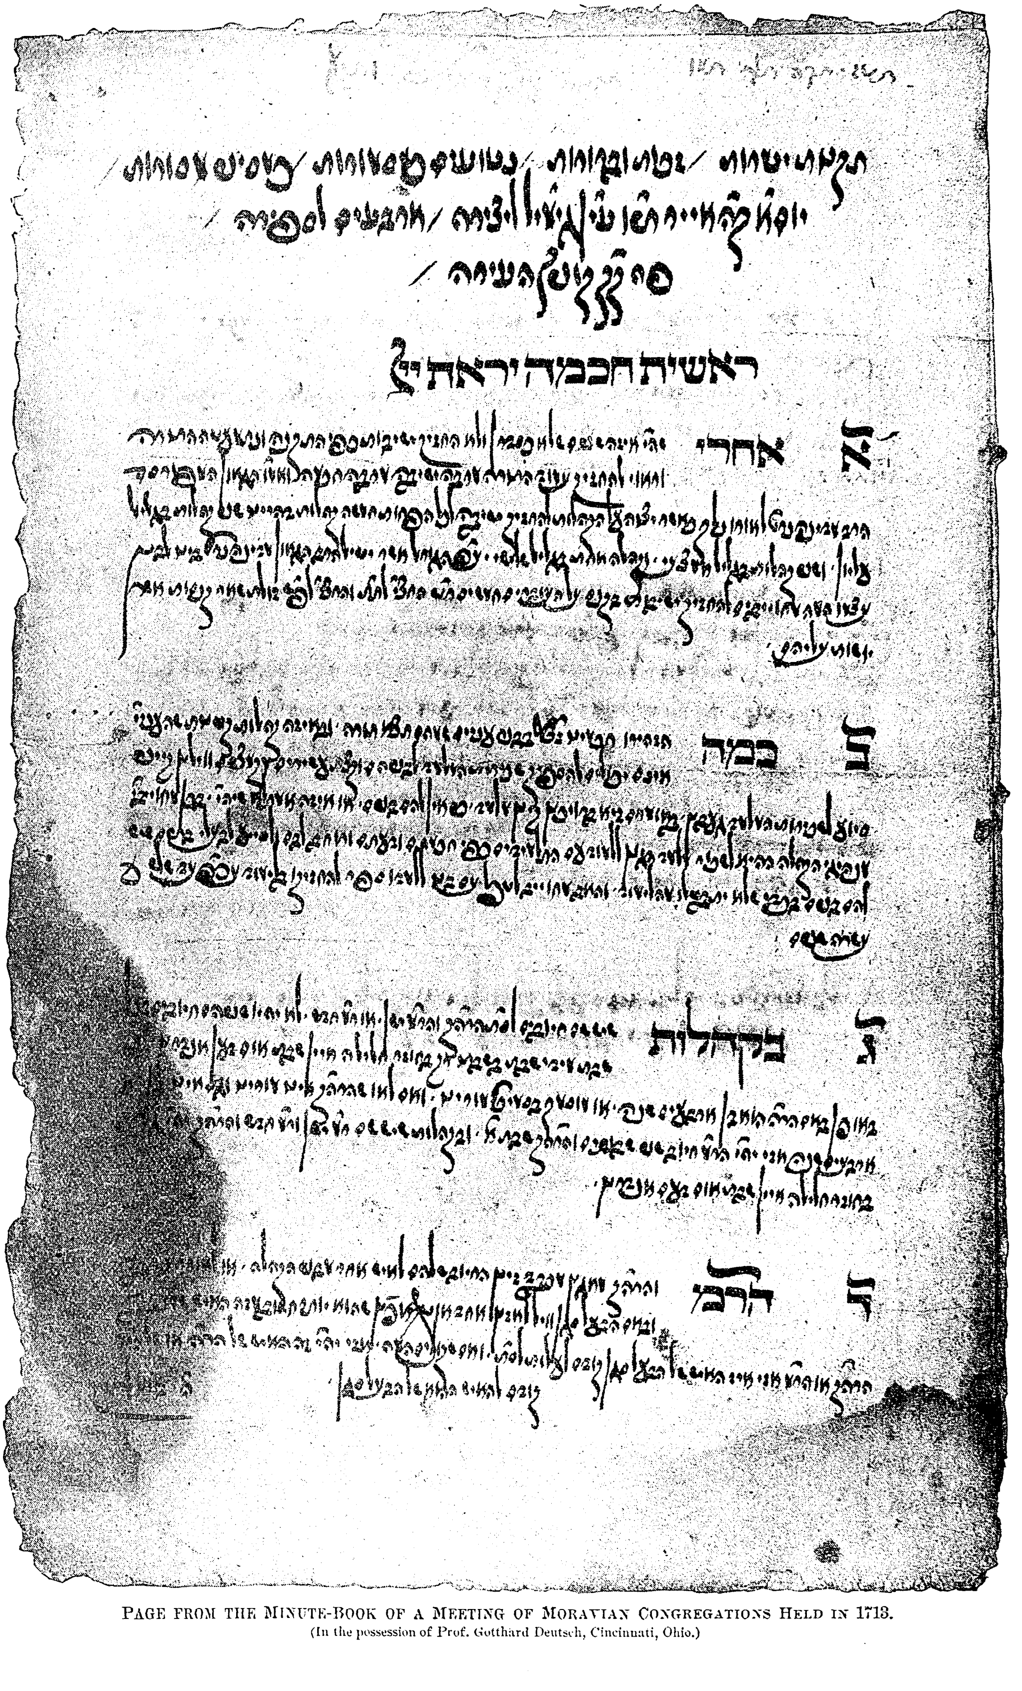
Right to Attend Fairs.

A great change occurred in the fifteenth century, due partly to the general hostility then manifested toward the Jews in the cities, and partly to local conditions, as the country was the prey of warring factions owing to the Hussite movement, and the Jews were accused of favoring the rebels. The first expulsion occurred in Iglau in 1426; and it was probably due to the influence of the Franciscan friar John of Capistrano on the young king Ladislaus Posthumus (1440–57) that the Jews were later expelled from Brünn, Znaim, Olmütz, and Neustadt ("Luaḥ," ed. by Epstein, Brünn [1887, or 5648]; Willibald Müller, pp. 12–17). The king gave them only four months' time to find another home. The citizens of the places from which the Jews were expelled were compelled to pay their debts to the latter, but without interest; and they received, moreover, the synagogue cemeteries and baths; but they had to pay the king an annual tribute equal to the amount which had been collected from the Jews in the form of taxes. Occasional expulsions occurred during the sixteenth century, as in Hradisch, 1514, and in Neutitschein and Sternberg, 1562. The edicts of expulsion against all Jews of the kingdom of Bohemia promulgated by Ferdinand I. in 1541 and 1557 were not carried into effect. The Jews expelled from the cities settled in small towns under the protection of the feudal lords, although the records of their activities and sufferings are very meager until the Thirty Years' war, when the Jews came into greater prominence. Ferdinand II., although a bigot, treated the Jews comparatively well, because he needed the revenues derived from their taxation to wage his wars and because he concentrated all his efforts to crush Protestantism in his dominions. By a charter, dated Oct. 15, 1629, he permits Jews to visit fairs even in the cities where they have no right of residence; he promises not to exact more than the sum of 12,000 florins annually, and forbids that they be taxed by any one but their lords, to whom, moreover, they shall pay no more than the usual tribute. Further, it was expressly stipulated that they should not have to pay more toll than the legal rate. Still it would seem that these laws were never strictly enforced, for as early as 1635 the "Landtshauptmann" (governor), Cardinal von Dietrichstein, had to admonish the royal cities to allow the Jews free passage. Cities and states continued to lay complaints before the emperor that the Jews adulterate spices, misrepresent the quality of the fabrics, woolen goods, and hides they deal in, buy stolen goods, seduce Christian women, and "take the scanty bread from the mouths of Christians." Nevertheless, Ferdinand II. (1657) and Leopold I. (1659) reconfirmed the charter of 1629, and especially their right to frequent the fairs in the cities in which they had no right of residence (Müller, pp. 19–31). The expulsion of the Jews from Vienna in 1670 brought a great many of them to Moravia, and possibly the growth of the congregation of Nikolsburg dates from that period. The newcomers were heavily taxed, and, notwithstanding the solemn promise made by Ferdinand II. in 1629 that they should not be taxed beyond the limit stated in his charter, they were continuously harassed with "special" and extraordinary imposts by the imperial treasury, by their lords, and by the cities to which they went on business, and were constantly deprived of the means of earning a livelihood.

Segregated in Ghettos.

The emperor, while in need of the taxes paid by the Jews, had to consider the wishes of the states and the cities which complained of the constant increase in the Jewish population, and it was repeatedly stipulated that only those Jews who had lived there in 1657 might transmit their right of residence to their children. Still the emperor Charles VI. not only confirmed their privileges (May 13, 1723), but even reduced their annual taxes from 12,000 to 8,000 florins, renewed their right to visit all fairs, and allowed them to enter the crafts. These favors seem to have aroused the enmity of the states, for on Sept. 15, 1726, the emperor proclaimed a law decreeing that in any Jewish family only one son should be allowed to marry (Familianten Gesetz), and on Dec. 8, 1726, the Jews were driven into ghettos, having been compelled to sell all their houses and to accept others which were assigned to them. The reason for these harsh measures seems to have been religious fanaticism, for the edict of the emperor refers specifically to the fact that the Jewish houses were near the church and that the object of the tyrannical measure was "die ungehinderte Uebung des Cultus divini." The destruction of the synagogue of Aussee in 1722, upon the false accusation that the Jews had assaulted the Catholic priest who attempted to convert them to Christianity, may have given occasion for the promulgation of that law. The Bishop of Olmütz, to whose diocese the priest belonged and who was particularly anxious to save him from the punishment which he had incurred by disturbing the peace of a synagogue, reported that the Jews of Rausnitz had mocked at the rites of the Catholic Church. This report, which was written May 6, 1727, seems to have had a decisive effect, for on June 27, 1727, the order to separate the Jewish houses from those of the Christians was finally issued. Further hostile measures were planned. The Jews should be compelled to wear beards and a distinctive costume; they should not be locksmiths or goldsmiths; foreign Jews should not be tolerated in the country, and private synagogues should not be permitted. These propositions were submitted to the "Landesrabbiner" Issachar Berush Eskeles, who curiously enough took occasion to ask the government to issue a prohibition against shaving with a razor, but at the same time declared himself against the distinctive costume and against the order to compel the Jews to wear beards (Schram, "Ein Buch für Jeden Brünner," iii. 39, Brünn, 1903; Müller, pp. 68–72).

A time of severe trial for the Jews of Moravia began with the reign of Maria Theresa (1740–80). As soon as war broke out the Jews were accused of aiding the enemy. General von Scherr, the com-



ראשית חכמה יראת יי

PAGE FROM THE MINUTE-BOOK OF A MEETING OF MORAVIAN CONGREGATIONS HELD IN 1713.
(In the possession of Prof. Gotthard Deutsch, Cincinnati, Ohio.)

mander of the fortress of Brünn, gave orders that no Jew be admitted into the city, no matter what passport he held. On March 14, 1742, he ordered also that the Jews of Moravia should pay within six days the sum of 50,000 florins under penalty of massacre and pillage. Upon the intercession of Baron Diego d'Aguilar and of the "Landesrabbiner" Eskeles, the empress repealed this order temporarily; but the Jews had to pay the amount afterward.

In the Seven Years' War.

The "General-ordnung" of 1754.

The second war between Frederick the Great and Maria Theresa brought still greater trouble upon the Jews, and the empress, influenced by the persistent report of a conspiracy of the Jews with the Prussians, ordered the expulsion of the former from the kingdom of Bohemia within six months. For the province of Moravia this edict was promulgated Jan. 2, 1745 (Trebitsch, "Ḳorot ha-'Ittim," pp. 17b *et seq.*; D'Elvert, *l.c.* pp. 190 *et seq.*; Grätz, "Gesch." 3d ed., x. 355; Kaufmann, "Barthold Dowe Burmania," in "Grätz Jubelschrift," pp. 279–313, Breslau, 1887). Efforts made by the Jews, who were supported not only by some foreign powers, as the Netherlands and the Hamburg Senate ("Oesterreichische Wochenschrift," 1902, p. 137), but even by the local authorities, induced the empress to grant a temporary suspension of the cruel law (May 15, 1745). Later a further suspension was granted which permitted the Jews to remain ten years, and finally the entire edict was relegated to obscurity. The imperial office ("Hofkanzlei") expressly stated in 1762 that the suspicion of high treason under which the Jews had suffered had never been proved ("Allg. Zeit. des Jud." 1887, p. 678). But the attitude of the empress did not become any more favorable to the Jews. Immediately after the edict of expulsion had been revoked she considered the suggestion of a Jew named David Heinrich Lehmann of Prague to put a tax on Etrogim, and demanded of the Jews of the Bohemian kingdom an annual sum of 40,000 florins for the privilege of importing this fruit, of which tax the Jews of Moravia were to pay five-twelfths. The impossibility of collecting this exorbitant sum led to a reduction of the amount in 1746 to 4,000 florins; and in 1748, when the Jews were given permission to remain another ten years in the province, this tax, like all other Jewish special taxes, was abolished, and the Jews of Moravia were called on to pay annually a "Schutzgeld" of 87,000 florins during the first five years, and of 76,700 florins during the next five years. In 1752, when the first five years had expired, the tax was increased to 90,000 florins, but in 1773 it was reduced to 82,200. For the empress the ten-year limit was evidently merely a means of saving herself from the embarrassment of a direct repeal of the edict of expulsion, and she ordered at once a compilation of the existing statutes regulating the affairs of the Jews of Moravia. Alois von Sonnenfels was ordered to prepare a translation of the old Jewish constitution as it had grown out of the deliberations of the periodical assemblies ("Shay Taḳḳanot," 311 articles). The product of his labors was the "General-Polizei-Prozess- und Kommerzialordnung für die Judenschaft des Markgrafthums Maehren," published in 1754. In its attempt at regulating all details of congregational life it is typical of the spirit of institutionalism prevailing in Austria. It states who has the right to confer the title of "Reb" (Ḥaber) and of "doppelter Reb" (Morenu), makes it the duty of the "Landesrabbiner" to assign to the other rabbis which "so-called Masechte" they should teach during the coming term, regulates the marriage fees of the rabbi, ḥazzan, and sexton, and contains several very humiliating regulations, *e.g.*, that the "Landesrabbiner" should every other year pronounce the "great ban" against thieves and receivers of stolen goods. This law contains also a civil code and a constitution of the Jewish congregations. The empress was very fond of interfering in every detail of government. Thus she revised personally the cost of the elections of the elders for the province in 1758 (G. Wolf, in Wertheimer's "Jahrbuch," vol. x., pp. 14 *et seq.*); she had a census of the Jewish families taken in 1754, and limited the number of all Jewish families in the province to 5,106 (Von Scari, p. 3; D'Elvert, *l.c.* p. 177).

Under Joseph II.

Under the reign of Joseph II. (1780–90) conditions were considerably improved. Although most of the officials and the city councils did not favor it, he issued his "Toleranzpatent" in Brünn on Feb. 13, 1782. Limitation of the number of Jewish families remained, but the number was increased to 5,400. The "Schutzgeld" was abolished, but the Jews still had to pay special taxes—namely, a family tax of five florins annually for each head of a family, and an impost on every article of consumption—so that the treasury should not lose the 82,200 florins paid theretofore by the Jews of the province. From the surplus of these taxes a fund was created which still exists as the "Maehrisch-Juedischer Landesmassafonds." The tax on articles of consumption was especially burdensome, and its method of levy led to constant quarrels and accusations. The dues on cattle and fowl were levied when they were killed, but fish had to be carried from the market to the revenue office, and a receipt for two kreutzer had to be shown when the collector appeared in the house, which he did very often during the Friday night meal. Similar vexatious measures were applied in the case of wine which the Jews used for their own households. These conditions remained almost unchanged until 1848.
